- Excess velocity profiles in confined jets in presence of uniform transverse magnetic field, confirming affinity hypothesis 13 p2140 A66-25433
- MHD channel flow as affected by extremities 13 p2141 A66-25474
- Two-dimensional analysis of flow in electrofluid dynamic generator showing effect of radial fields and viscous forces on performance, stressing effect on electrical breakdown of gas, noting basic equations 13 p2001 A66-26257
- MHD channel flow as affected by nonuniform and anisotropic electric conductivity and boundary effects 13 p2150 A66-26339
- Drag coefficient of gas flow in circular tube at transonic velocity 13 p2065 A66-26485
- One-dimensional gas flow in tube with heat transfer 13 p2066 A66-26488
- Transition from laminar to turbulent flow, establishing critical Reynolds number of 2223 for steady pipeflow 13 p2069 A66-26702
- Mean velocity, rms velocity fluctuations and Reynolds shear stress for air flow at high Reynolds number in rectangular channel partially roughened, measuring turbulence intensity 13 p2070 A66-26703
- Pipe flow turbulent temperature fluctuation measurements in mercury and ethylene glycol with fast response thermocouple 14 p2410 A66-26936
- End effects in steady state MHD J x B accelerator, noting voltage and current distribution and eddy-current geometry 14 p2342 A66-27430
- Solution of boundary layer equation for two-dimensional laminar steady motion of viscous incompressible fluid in convergent channel with suction at wall 14 p2276 A66-27728
- Effect of instantaneous change in viscosity on laminar vortex of flow through suddenly widening pipe 14 p2277 A66-27933
- Channel flow of inviscid fluid with tensor conductivity considered when flow leaves transverse magnetic field, noting spatial distribution and ohmic power loss for application in MHD generators 14 p2346 A66-28302
- Laminar adiabatic gas flow in parallel plane channel taking place up to 3/4 of critical velocity 14 p2278 A66-28315
- Laminar fluid flow in channel generated by arbitrary generatrix, allowing for interaction between boundary layer and flow core, calculating boundary layer 14 p2278 A66-28316
- Laminar flow of incompressible fluid in rectangular channel, determining temperature distribution over channel cross section and thermal flux through wall for case of energy dissipation 14 p2415 A66-28317
- Unsteady flow of viscous liquid through tube of rectangular cross section under nonuniform pressure gradient assumed to be linear function of time 14 p2279 A66-28462
- Pressure drop for non-Newtonian flow in inlet length of straight channel 14 p2279 A66-28464
- Two-dimensional laminar MHD flow in convergence channel with uniform input, finding effect of flow convergence on boundary development for arbitrary magnetic field induction 15 p2549 A66-28638
- One-dimensional flow through nozzle and stability of weakly ionized plasma with induced Hall current 15 p2550 A66-28958
- Hysteresis effects in one-dimensional conducting gas flow through rectangular MHD converter channel with constant magnetic gap and variable electron spacing 15 p2428 A66-29219
- Two-dimensional isothermal liquid flow electrically conducting in channel under electromagnetic fields, finding self-modeling solutions, using Jacobi functions 15 p2551 A66-29221
- Motion of non-Newtonian liquid through two coaxial curved pipes, noting relation between pressure gradient and outflow rate, curvature effect and secondary flow 15 p2479 A66-29397
- Forced convection heat transfer in symmetrical ducts when fluid is liquid metal, examining new prediction methods for engineering analysis and design 16 p2824 A66-30304
- Steady flow of highly rarefied ionized gas through channel with magnetic field solved by Monte Carlo method obtaining density, energies, wall shear stress, etc 16 p2759 A66-30371
- Approximation method for limit Nusselt number for channels of nonuniform geometrical configuration and linearly variable wall temperature 16 p2684 A66-30677
- Linearized supersonic flows in quasi-cylindrical tubes and wall form determination from given pressure distribution 16 p2629 A66-31038
- Stress in viscoelastic polystyrene in Aroclor flowing in straight, converging and diverging channels 16 p2686 A66-31043
- Annular diaphragms to produce turbulent flow in tubes 16 p2828 A66-31065
- Heat transfer between turbulent supersonic air stream and circular water-cooled tube at Mach 1 to 4, using two-dimensional flow model 16 p2829 A66-31161
- Steady flow of conducting dissociating gas in channel of constant cross section in presence of magnetic field 16 p2687 A66-31165
- Velocity profile of incompressible and electrically conducting flow in entrance region of constant area MHD channel 16 p2763 A66-31255
- Natural frequency of fluid oscillations in complex pipelines 16 p2687 A66-31296
- Numerical analysis of stabilization of one-component conducting plasma in two-dimensional coaxial duct 16 p2763 A66-31307
- Optimum operation modes of MHD converter 16 p2637 A66-31368
- Laminar-turbulent transition conditions in MHD channel flow 16 p2764 A66-31370
- MHD fluid flow in rectangular channels with allowance for finite wall conductivity 16 p2764 A66-31371
- Effect of single or periodic disturbances on intermittency in pipe flow at various Reynolds numbers, noting relation of disturbance input frequency to output frequency of turbulent slugs 16 p2688 A66-31394
- Diffusive corrosion processes caused in circular tubes by reactive fluid simulated by rotating disk electrodes 16 p2728 A66-31597
- Constant flow velocity and constant Mach number flow problems in MHD generator of minimal length for given temperature drop at output and internal efficiency 16 p2638 A66-31611
- Critical flow rate, critical pressure ratio and critical mass flow of dissipative adiabatic nozzle and pipeflow of ideal gas 16 p2690 A66-31635
- Malkus theory in weakly-conducting turbulent liquid flow between parallel plates in transverse magnetic field, noting velocity profile and transition region 16 p2766 A66-31652
- Heat transfer of forced laminar convection in multiply connected regions 16 p2830 A66-31708
- Resistance coefficient calculation procedure for turbulent flow in circular pipes extended to case of annular conduits 17 p2906 A66-32034
- Convective heat transfer during subsonic and supersonic gas flow in inlet section of cylindrical tube 17 p3034 A66-32561
- Velocity and temperature profiles, hydrodynamic elements, heat transfer and friction coefficients of turbulent incompressible flow through circular and flat tube 17 p2909 A66-32583
- MHD approximation of laminar duct and channel flow of electroconductive viscous Newtonian fluid 17 p2971 A66-32861
- Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866
- Steady-state axially-symmetric channel flow of ionized gas in external electromagnetic field in one-dimensional approximation 17 p2971 A66-32867
- Longitudinal Faraday emf, thermoelectric and Hall effects on channel flow of ionized gas 17 p2972 A66-32868
- Geometric, gasdynamic and electromagnetic parameters of one-dimensional flow of conducting gas with Hall effect for maximum power tapping from channel electrodes 17 p2972 A66-32869
- Effect of sudden enlargements and contractions in flow area on single pressure waves in gases in pipes, covering incident waves of various pressure amplitudes 17 p2841 A66-32890
- Laminar flow velocity field and pressure distribution in inlet region of rectangular ducts [ASME PAPER 66-FE-7] 17 p2914 A66-33261
- Photocurrent and leakage current in zinc diffused GaAs junction diodes in terms of channel effect 17 p2987 A66-33319
- Viscous incompressible fluid motion between two parallel planes and between two co-axial circular cylinders with one boundary moved by impulse 17 p2916 A66-33418
- Forced convection heat transfer for liquid metal flow in rectangular channels with prescribed wall heat fluxes and heat sources in fluid stream 17 p3038 A66-33468
- Gas-phase heat-transfer augmentation by steady and alternating electric field in pipeflow 17 p3039 A66-33473
- Fully developed laminar incompressible flow in stepped rectangular channel, with velocity profiles obtained by variational

method 18 p3097 A66-33596  
 Transverse magnetic field effects on heat transfer in turbulent flow of mercury in circular iron tube 18 p3145 A66-34109  
 Channel flow general equations including nonviscous uniform flow, steady flow, stagnation state and speed of sound in ideal gas 18 p3098 A66-34121  
 Laminar steady incompressible nonuniform flow in rectangular duct, stream tube and pipe 18 p3099 A66-34124  
 Hartree solution of MHD laminar boundary layer incompressible conducting fluids, specifically considering flow at inlet to semiinfinite flat channel 18 p3147 A66-34636  
 MHD flow with parabolic velocity at entrance region of flat channel 18 p3149 A66-34915  
 Drag coefficient of turbulent flow of electrically conducting liquid metal in MHD channels of round cross section 19 p3407 A66-36098  
 Optimization of MHD generating duct by varying cross-sectional area and electrical loading 19 p3281 A66-36372  
 Hydraulic-approximation equations in calculating MHD channel flows 19 p3410 A66-36458  
 MHD boundary layer at conducting wall of plane channel treated by numerical method 19 p3410 A66-36459  
 Free-molecular flow of rarefied gas in plane channels or through cells of heat conducting grid whose cells are smaller than mean free path of gas 19 p3277 A66-36480  
 Pulsating laminar flow of viscous incompressible conducting fluid in annular channel between circular cylinders under radial magnetic field, solving MHD equations 19 p3432 A66-36643  
 Electromagnetic field effect on heat transfer during laminar flow of electrically conducting incompressible fluid in flat channel 20 p3607 A66-36980  
 Spatial correlation coefficients and transverse temperature perturbation scales during turbulent nonisothermal flow of mercury in circular pipe 20 p3607 A66-36982  
 Heat transfer in turbulent carbon dioxide pipeflow at supercritical region 20 p3674 A66-36983  
 Electric field in MHD generator channel under mixed boundary conditions solved by Wiener-Hopf technique, evaluating ohmic losses 20 p3500 A66-37491  
 Differential equations for quasi-homogeneous MHD flow of electrically conducting medium at low magnetic Reynolds numbers 20 p3611 A66-38109  
 Calculation of heat transfer in laminar flows of structurally viscous fluids in tubes with constant thermoconductivity, heat capacity and density 20 p3681 A66-38122  
 Fading multipath channel behavior simulator for communication system performance study 20 p3534 A66-38359  
 Supersonic turbulent flow in low temperature plasma accelerator with rapid boundary layer growth 21 p3693 A66-38684  
 Wall conductance effect on stability of Hartmann flow in curved channel, solving eigenvalue problem via Galerkin method 21 p3777 A66-38762  
 Quantities and relations for describing two-phase flows, kinematics and kinetics of both phases of laminar pipeflow 21 p3724 A66-38933  
 Unsteady convective heat transfer of incompressible fluid between two solid channel walls 21 p3728 A66-39340  
 Heat transfer in laminar flow of Bingham material through circular pipe, taking into account dissipation effect 21 p3836 A66-39441  
 Dissipation of sheet of heated air in turbulent air flow in pipe 21 p3836 A66-39445  
 Slip flow in hydrodynamic entrance region of tube and parallel plate channel determined by solving linearized momentum equation 21 p3730 A66-39459  
 Steady laminar flow of viscous incompressible fluid through two-dimensional channel with fluid sucked or injected with different velocities through uniformly porous parallel walls 21 p3730 A66-39461  
 Laminar forced-convective heat transfer for dissipative fluid in tube bounded by

concentric circles 21 p3837 A66-39610  
 Steady state equations for one-dimensional flow of conducting medium through channel of MHD generator in homogeneous magnetic field 22 p3952 A66-39692  
 MOS capacitance of p-type silicon in inversion layer and ion drift in fringing field 22 p3872 A66-39744  
 Active component of voltage behavior in channel of helium pulse discharge measured, obtaining time dependence of channel resistance, input velocity and energy magnitude 22 p3953 A66-39755  
 Heat losses from turbulent gas flowing through poorly insulated pipe where heat lost from outer surface is by free convection and radiation, solving heat equation [ASME PAPER 65-WA/HT-16] 22 p3997 A66-40027  
 Mean viscous dissipation and bulk temperature variation in incompressible fully developed duct heat transfer, using Green theorem 22 p3998 A66-40033  
 Viscosity, surface tension and inclination angle effect on motion of long bubbles in closed tubes 22 p3900 A66-40388  
 MHD flow in rectangular channel due to periodic pressure gradient at high Hartmann number 22 p3957 A66-40704  
 Laminar heat transfer in plane channel with nonuniform temperature field at inlet 22 p4000 A66-40812  
 Adiabatic gas flow pattern in plane parallel channel near critical point 22 p3902 A66-40815  
 Erosive burning in rocket engines of radial burning type, using polyurethane/ammonium perchlorate base propellant grains, examining flow channel constriction 23 p4121 A66-41433  
 Unsteady air flow discharge coefficients compared for sharp-edged orifices with steady flow values 23 p4009 A66-41700  
 Approximation method for wall effect in cavitation flow around bodies in water tunnel, examining effect of solid boundary on resistance factor 23 p4056 A66-41727  
 Steady state flow of liquid metal in MGD channel of rectangular section, noting magnetic field effect on resistance factor 23 p4106 A66-41729  
 Hydraulic loss decrease in complex pipeline owing to wire grating 23 p4024 A66-41798  
 Thermal transport in channel-gas flow, discussing integral equation and power series solution 23 p4150 A66-41869  
 Steady fully developed MHD channel flow of viscous electrically conducting fluid studied by Galerkin method under applied magnetic and electric fields 23 p4107 A66-41886  
 Oscillating two-phase flow through rigid circular pipe investigated to understand blood cells effects on changes in shape of pressure pulse wave 23 p4058 A66-41916  
 Plasma flow processes in slip type traveling wave accelerator investigated to determine degree to which one-dimensional channel flow is used in design and scaling laws 23 p4053 A66-41917  
 Pressure fluctuations under turbulent boundary layer or in pipe flow, noting surface deflection effect and pressure representation 23 p4061 A66-42027  
 Heat transfer in incompressible viscous fluid between two nearly parallel walls with harmonically varying distance, determining velocity field and temperature distribution 23 p4150 A66-42029  
 Turbulent heat transfer coefficient in smooth pipes at high Prandtl numbers has higher value than when turbulence is not assumed 23 p4151 A66-42054  
 Flow coefficient of elliptical cylindrical pipe, analyzing boundary layer at exit for various Reynolds numbers, noting velocity profile 23 p4014 A66-42057  
 Finite difference method solution of Navier-Stokes equations and applicability to cylindrical-channel viscous flow at small Reynolds numbers 23 p4062 A66-42061  
 Motion equations, shear stress and skin friction for three-dimensional flow in conical pipes 23 p4014 A66-42062  
 Turbulent momentum transfer mechanism in separated flow region of rectangular

cavity facing oncoming turbulent boundary layer 24 p4193 A66-42154  
 Temperature distribution of laminar channel flow with tangential stress and wall temperature 24 p4294 A66-42720  
 Micropolar fluid theory with derivation of motion equation, constitutive equations and boundary conditions, noting channel flow 24 p4195 A66-42828  
 Pressure effects of flexible walls on boundary layer transition in turbulent pipe inlet flow 24 p4195 A66-42859  
 Stroboscopic instantaneous velocity measurements near wall in turbulent flow of water in channel and analysis of viscous layer turbulent pulsations 24 p4196 A66-42880  
 Laminar flow of fluid with varying viscosity in tube with walls at constant temperature, analyzing equations of motion and equations for conservation of energy 24 p4197 A66-42991  
 Flow behind shock wave in long tube analyzed by time effect and integrating equations, using Galerkin method 24 p4197 A66-42997  
 Channel flow deriving equation for proper turbulence spectrum and expression for spectrum of dynamic and turbulent quantities 24 p4197 A66-43061  
 MHD flow, examining effects of finite electric conductivity on basic flows due to compression and shear 24 p4246 A66-43115  
 Generalization of experimental data on hydraulic resistance in tubes with ribbon turbulizers for laminar flow with macrovortices and turbulent flow 24 p4198 A66-43223

## CHAPLYGIN EQUATION

Approximate methods for integration of equations of plane isentropic motion of gas at supersonic velocities 08 p1165 A66-19572  
 Boundary value problem solution constructed as expansion of particular solutions of Chaplygin equation in region bounded by parabolic line and two characteristics 12 p1904 A66-24240  
 Exact solution derived for gas jet flow with three characteristic high subsonic velocities, using Falkovich extension of Chaplygin hodographic method 15 p2425 A66-29850  
 Problems of various subsonic gas jets of finite width around dihedral obstacle solved with Chaplygin hodographic method 16 p2627 A66-30207  
 Subsonic flow around circular cylinders using three alternate hodographic approximations to Chaplygin law 16 p2627 A66-30208  
 Approximation of Chaplygin plane motion equations of gas flow at high supersonic velocities 16 p2688 A66-31304  
 Improved Chaplygin solutions to ordinary differential equations 18 p3126 A66-33955  
 Chaplygin equation solution translating current function and velocity potential from physical into hodograph plane 19 p3342 A66-36474  
 Existence of solution for equilibrium problem of circular symmetrically loaded membrane with stress-free contour proven by Chaplygin method 19 p3476 A66-36838  
 Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation [ICAS PAPER 66-26] 23 p4007 A66-41008  
 Singular solutions for Chaplygin equations using generalized wave functions, noting iteration method for finding wave equation corresponding to first terms of expansion series 23 p4085 A66-41561

## CHAPMAN-ENSKOG METHOD

## SA BOLTZMANN EQUATION

Convergence of Chapman-Enskog expansion for linearized Boltzmann equation, using perturbation theory 07 p1081 A66-17935  
 Chapman-Enskog method applied to equations obtained when Bogoliubov functional assumption is introduced into BBGKY hierarchy, determining transport coefficients 14 p2276 A66-27640  
 Approximation method for thermal diffusion factor of almost Lorentzian gas mixture with better convergence properties than Chapman-Enskog

approximation 16 p2824 A66-30119  
 Measuring and calculating methods for dilute gas transport properties independent of fluid dynamic environment in which they operate 16 p2825 A66-30306  
 Boltzmann equation for dilute monatomic gas, discussing asymptotic interpretation of Hilbert and Chapman-Enskog theories 23 p4097 A66-42011  
 Dissipative mechanism in cylindrical plasma confined by axial magnetic field noting coefficients, linear transport relations, equations of change, Chapman-Enskog expansion and anomalous effects 24 p4246 A66-43112  
**CHAPMAN-FERRARO CAVITY**  
 Chapman-Ferraro hollows for system of parallel line currents enveloped by stratified corpuscular flux 22 p3975 A66-40806  
**CHAPMAN-JOUGET FLAME**  
 Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 06 p0969 A66-16256  
 Propagation of combustion-wave, consisting of flame front and shock wave passing down tube closed at one end, in presence of magnetic field in undisturbed gas at rest 06 p0874 A66-17002  
 Detonation in gaseous mixtures and in condensed phase, reviewing aerodynamic theory 15 p2617 A66-29315  
 Ionized gas flow rate behind detonation wave used with Chapman-Jouguet condition to determine speed of sound in reaction products 16 p2687 A66-31160  
 Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 17 p3037 A66-33237  
 Ideal detonation wave and Chapman-Jouguet condition, considering plane permanent and shock waves 18 p3266 A66-34721  
**CHAPMAN-JOUGET THEORY**  
 Imploding cylindrical shock wave production through imploding detonation waves in oxygen-acetylene mixtures, using Chapman-Jouguet theory 08 p1204 A66-18523  
 One-dimensional CJ detonation existence as self-sustaining phenomenon 08 p1208 A66-19203  
**CHAPMAN SHEAR LAYER**  
 Improved HF prediction using ray tracing techniques to determine F-2 layer scale heights and scale height h for alpha-Chapman electron density distribution 08 p1217 A66-19218  
**CHAR**  
 Char generation and determination of thermal conductivity function under simulated entry heating conditions [AIAA PAPER 65-640] 01 p0162 A66-10597  
 Char formation in solid rocket nozzle exit cones made from reinforced plastic predicted from corrosion standpoint 07 p1151 A66-17585  
 Metallographic technique for encapsulating char layers of plastics tested under reentry conditions to preserve them for microscopic examination 10 p1545 A66-21223  
 Char-layer structural integrity limits application of charring-ablator heat-protection materials to advanced ballistic reentry [AIAA PAPER 66-424] 18 p3239 A66-33642  
 Engineering method to determine combined effects of entry and combustion heating on total char regression of ablative nozzle as function of distance from exit plane [ASME PAPER 66-MD-72] 21 p3806 A66-38500  
**CHARACTER RECOGNITION**  
 Standardization of characters for optical character recognition, class B, using merit curve technique 02 p0193 A66-11598  
 Line structured pattern by vidicon tube and beam control logic 03 p0337 A66-12438  
**CHARACTERISTIC EQUATION**  
 Simple semigroup treatment of problems involving powers of nonnegative matrices 02 p0249 A66-11255  
 Stability limit on forward gain in control systems with small time delay by approximating exponential in characteristic

equation 02 p0207 A66-11877  
 Model consisting of closed rectangular box with one vibrating panel, comparing results of one-term approximation with orthogonal-mode solution 03 p0437 A66-12809  
 Book on motion stability using Liapunov method noting motion equations, perturbing forces effect on equilibrium, instability, Lagrange theorem, etc 03 p0393 A66-13286  
 Perturbed-motion damping for characteristic equation with null root or two imaginary roots 05 p0717 A66-15313  
 Integral curves of particular ordinary differential equation containing singularity 11 p1721 A66-22642  
 Relations between coefficients of characteristic equation of automatic systems and parameters of root loci with hyperbolic branches 11 p1680 A66-23325  
 Root locus methods applied to synthesis of linear multivariable control systems for noninteraction 12 p1855 A66-24644  
 Orr-Sommerfeld equation regarding stability of parallel flows solved for large Reynolds number, using inner and outer expansion theory 12 p1866 A66-24944  
 Stability and sensitivity requirements considered simultaneously in control system design, minimizing time domain sensitivity index and incorporating transient response characteristics 13 p2052 A66-26073  
 Stability of control systems with distributed parameters and hysteresis-curve-type nonlinearity for various critical cases of system characteristic equation 16 p2668 A66-30750  
 Operating characteristics equations of energy converters constructed of anisotropic materials and subjected to physically meaningful constraints 19 p3281 A66-36292  
 Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510  
 Motion stability conditions of plant equipped with automatic control device in certain critical cases 24 p4236 A66-42213  
**CHARACTERISTIC FUNCTION**  
 Elements of eclipsing binary spherical stars determined from Fourier transforms of their light curves by defining characteristic functions of system 02 p0285 A66-11298  
 Characteristic functions of rectifier contact multipoles extended to multipoles containing closing contacts of internal and external relays 05 p0658 A66-15330  
 Decomposition of probability laws that possess specific type of characteristic function 07 p1061 A66-18511  
 Boundary value problem solution constructed as expansion of particular solutions of Chaplygin equation in region bounded by parabolic line and two characteristics 12 p1904 A66-24240  
 Generalized quadratic detection system with n entries, evaluating probability law of output function by derivation of cumulants from second characteristic function 13 p2027 A66-25450  
 Graph analysis by connectivity considerations, based on generating and characteristic functions, noting application to sampled data systems, discrete Markov processes, computer programs, etc 15 p2453 A66-29771  
 Characteristic functions of rectifier contact multipoles extended to multipoles containing closing contacts of internal and external relays 15 p2475 A66-29975  
 Elliptic restricted problem of three bodies, discussing analytical determination of characteristic exponent to equilibrium solutions [AIAA PAPER 65-685] 19 p3461 A66-35892  
 Analyzer of characteristic function of random phase of quasi-harmonic signal using statistics 20 p3529 A66-37520  
 Numerical differentiation formulas for coefficients of given characteristic function, using tabulated Stirling numbers 22 p3938 A66-39904  
 Characteristic operator of Markov process on smooth manifold 24 p4230 A66-42210  
**CHARACTERISTIC METHOD**  
 Method of characteristics applied to three-dimensional supersonic flow equations for compressible inviscid gas 07 p0982 A66-18130

Inviscid supersonic flow fields of reacting gas mixture around pointed bodies calculated, using characteristics method 08 p1164 A66-19128  
 Three-dimensional supersonic gas flow past truncated cone with shock separation calculated by method of characteristics 11 p1629 A66-22336  
 Liapunov first method and applicability to asymptotic stability of stationary points of nonlinear differential systems 11 p1721 A66-22641  
 Strong plane shock produced in Al by hypervelocity impact and late stage equivalence examined, using analytical and graphical solution of method of characteristics and realistic state equation 13 p2194 A66-25061  
 Legendre transformation and characteristics of MGD potential equation 13 p2142 A66-25708  
 Direct numerical solution by method of characteristics for hyperbolic partial differential equation of Timoshenko beam under moving force 14 p2398 A66-27423  
 Difference equations arising when one-velocity kinetic equation is solved by characteristics method, estimating error 14 p2338 A66-28280  
 Points in interior and boundary of three-dimensional supersonic gas flow determined, using characteristic method, deriving difference equations 14 p2278 A66-28284  
 Unified treatment of nonlinear partial differential equations, considering solution technique in engineering application 16 p2739 A66-31740  
 Symmetrical stress wave propagation in thin plate with small, circular hole at center, noting boundary conditions and solutions via Laplace transforms and by method of characteristics 17 p3022 A66-32012  
 Propagation along rays or bicharacteristics for two equations with partial linear derivatives having two unknowns and coefficients which are indefinitely differentiable 17 p2945 A66-32280  
 Propagation of cylindrical shear waves in nonhomogeneous elastic bodies treated by method of characteristics [AIAA PAPER 66-444] 17 p3027 A66-32757  
 Method of characteristics computer code applied to partial differential equations of inviscid fluid, calculating flow fields [AIAA PAPER 66-412] 18 p3097 A66-33637  
 Load characteristics and characteristic curves for proportional and bistable fluid amplifier noting output, input and dynamic effects 18 p3054 A66-34133  
 Multiple rocket engine exhaust plumes calculated by method of characteristics and finite difference and compared with schlieren data [AIAA PAPER 66-651] 18 p3264 A66-34448  
 Gas flow formation ahead of flame front in circular and rectangular shock tubes analyzed, based on high speed photographs and method of characteristics 21 p3836 A66-39097  
 Annular nozzle shapes established via method of straight line characteristics, noting flow patterns at various regions 23 p4009 A66-41731  
 Flows with relaxation involving very rapid flow processes accompanied by reactions without chemical or thermodynamic equilibrium, using characteristics method 23 p4014 A66-42048  
 General theory of mixed problems for two-dimensional hyperbolic system of any order with continuous and discontinuous coefficients 24 p4230 A66-42220  
**CHARACTERISTICS**  
 S AERODYNAMIC CHARACTERISTICS  
 S AIRFOIL CHARACTERISTICS  
 S FLIGHT CHARACTERISTICS  
 S FLOW CHARACTERISTICS  
 S PERFORMANCE CHARACTERISTICS  
 S POLARIZATION CHARACTERISTICS  
 S VOLT-AMPERE CHARACTERISTICS  
**CHARGE**  
 SA ELECTROSTATIC CHARGING  
 SA EXPLOSIVE  
 SA ION CHARGE  
 SA SHAPED CHARGE  
 SA SPACE CHARGE  
 Built-in surface charge on thermally oxidized silicon as function of exposed

crystal face orientation 09 p1411 A66-19929  
 Charge-controlled /p-n-p/ transistors, discussing three-dimensional asymmetric model, dynamic characteristics and switching time calculation 09 p1355 A66-20569  
 Charge motion in Hf accelerator described by nonadiabatic approximation in magnetic field under action of polarized wave 15 p2553 A66-29639  
 Power dissipation in input and output matching networks of varactor doubler for calculating true input and output powers from semiconductor bulk material, noting charge storage occurrence 15 p2466 A66-29674  
 Schrodinger equation in semiconductor with N atoms containing dislocation, vacancy or other defect, noting phase shift and local charge neutrality 16 p2775 A66-30730  
 MOS transistor characteristics based on model in which bulk charge due to ionized impurity in semiconductor and difference between electrostatic potential and voltage drop in channel are included 16 p2662 A66-31015  
 Thermal noise theory extended for insulated gate /MOS/ FET with gate voltage induced channel structure by including bulk charge from ionized impurities in semiconductor substrate 16 p2663 A66-31016

**CHARGE DISTRIBUTION**  
 Charge distribution in ion beams after passage through nitrogen and inert gases 02 p0267 A66-11724  
 Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma, determining radiation spectrum range and total radiation energy 03 p0397 A66-12389  
 Relationship between field singularities of electrostatic theory and equations for fixed charge and dipole models, including geometrical distributions 03 p0391 A66-12404  
 Cylindrical receiving and scattering antennas, determining current from admittance, charge distribution and near field for incident plane wave 06 p0827 A66-16036  
 Photoelectric storage tube capable of long term integration of faint optical images, employing as storage target low density layer of KCl for increased charge multiplication 06 p0883 A66-17017  
 Potential and forces acting on charged body in rarefied plasma flow 07 p1090 A66-18141  
 Carrier number fluctuation in semiconductor conduction band due to generation and recombination of charge carriers 07 p1105 A66-18371  
 Diffusion technique preparation of GaP p-n junctions and relation of p-i-n junction electric field calculation to Baraff carrier ionization rate theory 07 p1108 A66-18415  
 Potential and charge density distributions derived for stationary charged sphere and charged body moving through plasma 08 p1261 A66-18744  
 Charge density distribution, electric field strength and flow rate of turbulent flow of incompressible fluid in flat nonconducting channel 08 p1263 A66-19172  
 Effect of surface charging on superconducting transition temperature, locating negative charges at oxide-oxygen interface in experiments with thallium films 09 p1419 A66-20043  
 Effect of orientation of silicon substrate on surface charge density and properties of silicon-silicon dioxide interface 10 p1573 A66-21346  
 Space charge theory of one-dimensional, monoenergetic, unipolar and bipolar currents traversing on otherwise evacuated space between infinite plane parallel electrodes 10 p1557 A66-21572  
 Unified theory of cold plasma nonlinear oscillations /Dolph/ fails to apply to traveling wave solutions 10 p1569 A66-21921  
 Density of free carriers in semiconductor conduction band varying with electric field, noting growth and phase velocity of RF wave of small amplitude 10 p1584 A66-22070  
 Heat treatment and ionizing irradiations effect on charge distribution and number of surface states in silicon-silicon dioxide system 12 p1932 A66-24824  
 Cerenkov radiation by charge moving lengthwise in magnetic field of cold plasma,

determining radiation spectrum range and total radiation energy 13 p2139 A66-25394  
 Motion equation of viscous oil flow under action of electric forces caused by surface charge 13 p2070 A66-26709  
 Influence of p and n doping on electrification of dust of Ge monocrystals grown from zone-melted material 14 p2364 A66-27717  
 Formula derivation for dynistor delay time and switching-on time on basis of system of charge equations 14 p2254 A66-27741  
 Charging effect of Ag-Au alloys and other properties determined by perturbation theory 14 p2365 A66-27754  
 Durham horizontal spectrograph measurements of charge ratio of cosmic ray muons at sea level 15 p2588 A66-29574  
 Muon charge ratio derived from inelastic collision model of pion production, considering just average multiplicities 15 p2588 A66-29575  
 Effect of electrical charge on surface of glass substrate on nucleation density and initial growth structure of thin films of gold prepared by evaporation under ultrahigh vacuum 15 p2466 A66-29683  
 Fragmentation probabilities, charge spectrum and interaction mean free paths of relativistic heavy nuclei in primary cosmic radiation investigated in stack of nuclear emulsions 16 p2795 A66-31010  
 Limits to charge groups classified according to structure and geometry into linear dipole-type concentrated moments analyzed, using generalized functions 16 p2823 A66-31713  
 FET structures with linearly graded junctions noting maximum gain configuration, transconductance expression, etc 17 p2895 A66-33116  
 X-ray irradiated MOS structure behavior, noting ionic charge motion in oxidized silicon that depends on electric field 18 p3155 A66-34083  
 Charge distributions in systems of nucleons and pions with given total isotopic spin and charge 18 p3219 A66-35191  
 Theoretical distribution of charges and potential in vicinity of metal-dielectric barrier in absence and presence of applied field 19 p3448 A66-36753  
 Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555  
 Quasi-oscillations of cold sharply bounded plasmas, noting surface charge role in scattering and AC probe resonances 20 p3611 A66-38361  
 Nonlinear theory of parametric excitation applied to modulated wide beams of uniform cross section, analyzing propagation in such beams of charge density oscillations 21 p3781 A66-39013  
 Unified method for evaluation of electron-repulsion integrals for Slater-type orbitals 22 p3949 A66-39912  
 Carrier density, mobility and space-charge-limited current in p-type silicon 22 p3962 A66-40049  
 MOS work function difference effect on surface charge density and orientation calculations for Si-silicon dioxide interfaces 22 p3962 A66-40050  
 Charge distribution in thermally grown silicon dioxide and silicon n-type inversion layer 22 p3962 A66-40087  
 Taxonomy of electric charges in Si-silicon dioxide metal insulator semiconductor /MIS/ systems under presence or absence of bias 22 p3877 A66-40178  
 Resistance network analog method determination of carrier density distribution and charge constant in p-n junction for two-dimensional axisymmetric case 23 p4115 A66-41858  
 Small charge asymmetry and entropy of hot universe, finding rational solution for almost-charge symmetrical case 24 p4280 A66-43057

**CHARGE EXCHANGE**  
**SA RESONANCE CHARGE EXCHANGE**  
 Charge exchange and ionization cross sections for hydrogen ions passing through ordinary and heavy hydrogen 01 p0107 A66-10194

Secondary emission ratio and multiplication constant of electron-ion oscillatory discharge 06 p0919 A66-16872  
 Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering error due to unequal scattering of primary and secondary particles 12 p1918 A66-24876  
 Charge exchange cross section increase during single collisions of alkali-metal ions with atoms of inert gases and atomic hydrogen and nitrogen 14 p2336 A66-27155  
 Effective ionization and charge exchange areas of certain gases undergoing collisional ionization by accelerated ions 17 p2961 A66-32954  
 Charge exchange loss of confined thermal plasma in mirror magnetic field 17 p2972 A66-32975  
 Apparent HF stability of highly anisotropic plasma, noting charge exchange and trapped proton energy spectrum 18 p3142 A66-33671  
 Exchange pairs spectrum analysis based on observation of nonlinear splitting of EPR signals of pairs of exchange-coupled chromium ions in corundum 18 p3154 A66-33943  
 Instability effect in n-channel silicon MOS transistors bombarded with ionizing radiation 20 p3528 A66-37317  
 Ionization of oxygen examined, using charge exchange in double mass spectrometer, noting break in electron impact ionization efficiency curve and constructing breakdown graph 20 p3605 A66-38097  
 Charge exchange of protons in alkali metal vapors with formation of highly excited hydrogen atoms, noting cross section, reaction mechanism, etc 22 p3953 A66-39762  
 Optical charge exchange in silicon carbide analyzed, using electron paramagnetic resonance 22 p3964 A66-40311  
 Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering error due to unequal scattering of primary and secondary particles 23 p4097 A66-41083  
 Charge exchange cross sections for argon ions incident on hydrogen and deuterium measured over energy range of 30 to 1000 ev, taking into account ion-molecule reactions 23 p4098 A66-41267  
 Charge exchange cross section increase during single collisions of alkali-metal ions with atoms of inert gases and atomic hydrogen and nitrogen 24 p4239 A66-42975

**CHARGE SEPARATION**  
 Charge separation into film about symmetrically gravitating body at high temperatures and small Debye radius 03 p0396 A66-12290  
 Wave propagation along magnetic field in collisionless plasma taking charge separation effect into account 13 p2148 A66-26036

**CHARGE TRANSFER**  
 Grid dispersion mobility dependence on temperature in p-type Ge, noting discrepancy of theoretical and experimental results 08 p1273 A66-19257  
 Photomicrographic analysis of reactions during charging and discharging of nickel-cadmium alkaline cells 08 p1170 A66-19643  
 Size-effect problem affecting charge transport coefficients in thin films 09 p1428 A66-20577  
 Charge transfer between nitrogen ions and oxygen atoms, calculating cross sections 09 p1405 A66-20681  
 Charge transfer and charge rearrangement in atmospheric ion-neutral particle collisions 10 p1557 A66-21143  
 Charge-carrier concentration and mobility in thin silicon specimens 10 p1589 A66-22172  
 Potential sweep method for organic and adsorption analyses, showing relation between galvanostatic and fast potential sweep transients, noting mathematical analysis of current-potential transients 12 p1812 A66-25000  
 Space and time dependence of particle density and current in semiconductor material 14 p2356 A66-27045  
 Ionization cross sections for low energy collisions of neutral nitrogen molecules or neutral argon atoms, using asymmetric

charge transfer 14 p2337 A66-27980  
 Charge-carrier concentration and mobility in thin silicon specimens 19 p3441 A66-35786  
 Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448  
 Nitrogen ion charge-transfer reaction rates with CO and carbon dioxide in pulsed flowing afterglow system 21 p3774 A66-38529  
 Charge transfer between water drops relevance to radiation problem and efficiency of conversion of electrostatic to electromagnetic energy 22 p3942 A66-39679  
 Reaction rates for charge transfer reactions of carbon monoxide with oxygen and carbon dioxide measured at 300 degrees K in pulse-discharge flowing afterglow system 22 p3859 A66-39907  
 Thermal energy Ar charge transfer reactions measured in pulsed-discharge flowing-afterglow system with mass spectrometer detection 22 p3860 A66-39927  
 Hall effect in poly-n-vinylcarbazole-iodine charge-transfer complex, noting sign discrepancy of majority carrier 22 p3963 A66-40109  
 Surface charge mobility measurement method applied to Si and Ge and time variation of surface conductivity 23 p4110 A66-41183  
 Charge transport through hemispherical metal contacts on semiconductors, calculating V-I characteristics and injection ratios 24 p4254 A66-42388  
 Cross sections for charge transfer reactions of nitric oxide with atomic and molecular ions of oxygen and nitrogen 24 p4200 A66-42590

**CHARGED PARTICLE**  
 SA ALPHA RADIATION  
 SA BETA RADIATION  
 SA COULOMB POTENTIAL  
 SA CYCLOTRON RESONANCE  
 SA DEUTERON  
 SA ELECTRON  
 SA MESON  
 SA NUCLEAR PARTICLE  
 SA PARTICLE CHARGING  
 SA PARTICLE TRAJECTORY  
 SA POSITRON  
 SA PROTON  
 SA QUARK

Focused laser as accelerating cavity for cyclic particle accelerator 01 p0080 A66-10328  
 Charged Styropor ball motions in free float between plates of perforated capacitor with alternating electric field 01 p0119 A66-10374  
 Ionization chamber for measuring interplanetary space radiation, using Geiger-Mueller counter as secondary detector 01 p0073 A66-11115  
 Magnetic moment of charged particle as function of initial particle motion, particle distance from axis of field and asymptotic behavior of field 02 p0268 A66-11775  
 Charged particle interaction with magnetic field of toroidal solenoid, taking into account self-consistent polarization fields and short-circuit currents 02 p0268 A66-11777  
 Series of self-quenched Geiger counters for visual detection in cosmic rays of unstable charged particles decaying within millisecond 03 p0417 A66-12281  
 Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 03 p0397 A66-12381  
 Nonlinear oscillations of plasma behind formation front of charged particles 03 p0397 A66-12383  
 Charged particle motion in field of plane traveling wave and acceleration by transverse wave 03 p0397 A66-12387  
 Relationship between laws of electron temperature and charged particle concentration fall-off in helium plasma diffusion flow 03 p0398 A66-12520  
 Reflection and transmission of charged particles incident on plane moving plasma shock with small thickness compared to Larmor radius of particles 04 p0552 A66-14019  
 Recombination of nonequilibrium charge carriers in indium arsenide, noting radiative and impact recombination 04 p0569 A66-14357  
 Solution for group properties of equations

for monoenergetic charged-particle beam extended to beam in presence of stationary background and multivelocity and multicomponent beams 04 p0556 A66-14417  
 Adiabatic motion determination of charged particle containment in combined mirror-multipole cusp magnetic fields 05 p0718 A66-14712  
 Asymptotic theory of photolizationization chamber noting charged particle densities, sheath equations and quasi-neutral plasma 05 p0721 A66-14717  
 Interaction between charged particle beams and plasma in linear stage and saturation stage, using spectroscopic method 05 p0722 A66-14896  
 Physics of cosmic rays - All-Union Conference, Apatity, U.S.S.R., August 1964 05 p0749 A66-15372  
 Low energy charged particle measurements, describing satellite mounted spherical electrostatic analyzer 05 p0751 A66-15373  
 Series of self-quenched Geiger counters for visual detection in cosmic rays of unstable charged particles decaying within millisecond 05 p0756 A66-15453  
 Particles in radiation belt of Earth, considering motion in dipole field, sources, loss processes, etc 05 p0756 A66-15745  
 Instability of plasma supported under gravity by magnetic field, considering collisions between charged and neutral particles dominate over charged particle interaction 06 p0915 A66-16180  
 Survey in satellite era of energetic particle radiations, plasmas and magnetic fields in space, including solar wind, solar cosmic rays, etc 06 p0951 A66-16612  
 Brightness dependence of pulse arc on power per unit length of arc, estimating charged particle density and plasma temperature 06 p0919 A66-16875  
 Angular distribution of secondary particles from interactions in nuclear emulsions, determining energy release ratio in electron photon cascade 07 p1113 A66-17541  
 Identification of charged fast particles in nuclear emulsions, measuring multiple scattering of protons and mesons along track with various kinetic energies 07 p1114 A66-17543  
 Ratio of energy of electron-photon component and energy of charged mesons in interaction between nucleons and iron nuclei 07 p1114 A66-17548  
 Radiation by ultrahigh energy muons in lamellar medium, noting frequency 07 p1117 A66-17566  
 Stochastic acceleration of charged particles in randomly time-varying electromagnetic fields 07 p1084 A66-18426  
 Particle distribution in neighborhood of charged sphere in weakly ionized rarefied plasma 08 p1263 A66-19022  
 Formula for energy deposition from charged particle beams used in techniques for shielding nuclear particles from space 08 p1259 A66-19124  
 Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 08 p1265 A66-19375  
 Fermi acceleration of charged particles in shock transition region beyond magnetosphere 08 p1219 A66-19407  
 South latitude cosmic-ray plateau determined by measuring cosmic radiation-caused charged particle and neutron fluxes 08 p1284 A66-19415  
 Simplification of equations for two-temperature plasma composed of electrons, singly charged ions and neutral atoms, noting effect of viscosity and thermal force 08 p1265 A66-19468  
 Plasma diagnostics by spectroscopic techniques, measuring polarity dependences of temperature and charged particle concentration for flows with shock wave and periodic structure 08 p1265 A66-19470  
 Superconducting persistent magnets, cryogenic pumping and other low temperature techniques for measuring gravitational forces on charged particles 09 p1379 A66-20083  
 Spatial scattering of associated electromagnetic waves arising during

passage of fast charged particles thorough semiconductors, noting role of Cerenkov radiation 09 p1428 A66-20596  
 Transition radiation relative to dispersion of dielectric permittivity for charged particle passing through boundary between two media 09 p1410 A66-20930  
 Earth radiation belts, summarizing present knowledge and noting as-yet-unknown particle acceleration mechanism 09 p1444 A66-21021  
 Spherical electrostatic analyzers on Cosmos XII, Cosmos XV and Elektron II satellites 09 p1445 A66-21029  
 Outer radiation belt with energies between 100 ev and 10 to 40 keV 09 p1446 A66-21039  
 Cosmic rays during flights of Sputniks and Cosmos satellites investigated by analysis of charged particle fluxes obtained by gas discharge counter 10 p1595 A66-21042  
 Colloidal thruster with hot cathode charged colloidal particle source [AIAA PAPER 66-255] 10 p1593 A66-21460  
 Loss rates of charged particles from ohmically-heated discharges in C-Stellarator, showing confinement time parameters 10 p1568 A66-21825  
 Intensities and ratios of intensities of Be, B and S nuclei determined near geomagnetic equator in India, using nuclear emulsion stack 10 p1600 A66-21844  
 Charged particle radial distribution determination as function of amplitude of HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 10 p1570 A66-21998  
 Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 10 p1570 A66-22000  
 Linear theory of resonance excitation of oscillations in plasma by fast-charged particle beam 10 p1571 A66-22015  
 Charged particle motion determined by gravitational-electromagnetic field properties with motion equations following from integrability condition of field equations 11 p1735 A66-22343  
 Charged particle fluxes of 1 kev energy measured by spherical electrostatic analyzer aboard Cosmos XV 11 p1762 A66-22423  
 Cerenkov radiation from charge spiralling in warm plasma under action of infinite magnetostatic field 11 p1745 A66-22494  
 Model of high energy collision processes, based on terms of four-momentum transfer and spectra variation, used for calculation of atmospheric diffusion of heavy triplets produced by primary cosmic radiation 11 p1741 A66-23190  
 Sources and effects of electrical charge accumulation and dissipation on spacecraft 11 p1778 A66-23485  
 Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 12 p1945 A66-23510  
 Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684  
 Threadlike equatorial current ring and effect on geomagnetic cut-off rigidity of directed cosmic radiation 12 p1941 A66-24172  
 Spectrum, energy and radiation field of charge moving above anisotropically conducting surface 12 p1921 A66-24206  
 Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 12 p1921 A66-24209  
 Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 12 p1882 A66-24223  
 Larmor precession of charged particles effect on nonstationary temperature field in plane channel 12 p1922 A66-24361  
 Charged particle motion in time dependent axially symmetric magnetic field, using drift theory of plasma radial compression 12 p1922 A66-24462  
 Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering

error due to unequal scattering of primary and secondary particles 12 p1918 A66-24876

Charged particle excitation of weakly damped MHD waves in metal placed in magnetic field 12 p1825 A66-25021

Structure of disturbed plasma in thermodynamic equilibrium situated near charged solid surface ideally reflecting incident particles 13 p2139 A66-25386

Nonlinear oscillations of plasma behind formation front of charged particles 13 p2139 A66-25388

Charged particle motion in field of plane traveling wave and acceleration by transverse wave 13 p2139 A66-25392

Wave propagation during gyroresonance interaction, noting nonlongitudinal characteristics of waves generated in magnetosphere between beams of charged particles 13 p2072 A66-25462

Charged particles in nonadiabatic magnetic traps, noting behavior in mirror machine with spatially modulated central field, using model with square wave modulation 13 p2145 A66-25727

Triple correlative function solution for plasma system of charged particles and collision integral for pair correlative function 13 p2148 A66-25941

Amplification and attenuation of plasma wave by quasi-neutral charged particle flux on boundary between two plasmas 13 p2148 A66-26035

Electrohydrodynamic phenomena associated with motion of charged particle in plasma, showing that disturbance produced depends on particle speed 13 p2154 A66-26669

Meteor ablation, analyzing size and velocity distributions of meteor showers, noting how hydration in secondary particles promotes formation of charged particles which contribute to noctilucent cloud formation 14 p2378 A66-27094

Energy loss of fast-charge particle passing through weakly turbulent magnetoactive plasma 14 p2340 A66-27136

HF potential for motion of charged particle in combined quasi-static magnetic and HF electromagnetic field 14 p2341 A66-27198

Finite difference solution of nonlinear boundary value problem of Landau-Vlasov equation for charged particle for Maxwellian distribution function 14 p2344 A66-27625

Recombination of nonequilibrium charge carriers in indium arsenide, noting radiative and impact recombination 14 p2368 A66-28255

Charged particle acceleration by coherent radiation 14 p2348 A66-28313

Stoermer method solution of charged particle motion in field of magnetic dipole situated in external uniform magnetic field antiparallel to dipole magnetic moment vector 15 p2482 A66-28491

Charge particle flux in Earth radiation belt as observed by Cosmos 15 p2573 A66-28496

XVII

Adiabatic motion of charged particles in space- and time-variant magnetic field studied, using guiding-center approximation 15 p2574 A66-28902

Concentration waves excited by internal modulation of charged particle concentrations in cross section of plasma flow analyzed for various velocities of flow 15 p2550 A66-29212

Charged particle motion in Van Allen belts, examining effect of nondipole terms on mirror point distributions 15 p2489 A66-29314

Core structure and properties of extensive air showers, stressing lateral density structure of charged particles and energy of nuclear active component 15 p2579 A66-29527

Extremely collimated nuclear interactions in carbon induced by collisions of charged cosmic ray particles in energy region 20-100 gev 15 p2585 A66-29559

Vertical drift of charged particles effect on electron density profile as cause of seasonal variations in ionospheric absorption 15 p2490 A66-29944

Role of corpuscular radiation in lower ionosphere formation, noting charged particle flux, energy spectra, etc 15 p2591 A66-30024

Subsonic parachute-borne blunt probes for charged particle measurement in

ionosphere 15 p2493 A66-30039

Distribution of charged particles of different energies escaping from magnetic trap in which spiral moving electron fluxes are created 16 p2755 A66-30094

Temporary capture of charged particles in static magnetic bottle, based on resonant perturbations and Stoermer neck 16 p2760 A66-30588

Critical electric field for charged droplets atomizing, noting spark discharge and ion concentration in clouds 16 p2742 A66-31109

Cross sections for sticking electrons to spherical charged particles, considering Debye screening distance of Coulomb force field 16 p2754 A66-31158

Perturbation of electron density at large distances from body at high velocity in collisionless plasma under steady external magnetic field 16 p2762 A66-31181

Thick lithium drifted semiconductor silicon detectors for investigation of fluctuations of energy loss by high and intermediate energy particles 16 p2755 A66-31389

Solar radiation protection based on charged particle motion through magnetic field of solenoid 16 p2811 A66-31481

[AIAA PAPER 66-512]

Explosive driven magnetic generator applied to investigate electric, optical and elastic properties of various substances, plasma physics and charged particle accelerator 16 p2637 A66-31585

Emission spectrum of copper atom used to measure temperature and concentration of charged particles in DC-arc plasma burning under water 16 p2766 A66-31600

Plasma injected into magnetic trap with aid of conical theta pinch investigated to determine ion and electron energy, lifetime and charged particle concentration variation 17 p2969 A66-32546

Charged particle distribution in hollow cylinder shaped positive plasma column during diffusion and helical instability in longitudinal magnetic field 17 p2969 A66-32548

Strong axial magnetic field effect on constant current discharge in continuous-duty ion laser, noting plasma diffusion, charged particle density and laser output decrease 17 p2936 A66-33117

Electron-ion emission pattern distribution obtained by pulsed laser focusing on solid target 17 p2937 A66-33256

Force action on charged spherical dust particles in cometary atmospheres, noting interaction with ions 17 p3012 A66-33399

Charged particle effect in Van Allen zone on short circuit currents of photovoltaic cells on D-1A satellite 18 p3053 A66-33980

Spectroscopic measurements of cold plasma charged particle concentrations, specifically spectral broadening due to Stark effect, forbidden-line intensities affected by internal electric fields and autoionization line intensities 18 p3143 A66-34032

Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 18 p3146 A66-34177

Distribution of charged particles in plasma column situated in interspace between two coaxial cylinders 18 p3147 A66-34698

Differential spectra of charge components of primary cosmic ray heavy nuclei at different solar modulation levels and effects of interstellar propagation 18 p3191 A66-34839

Skyhook balloon flight Geiger counter cosmic ray monitor measurements of energy and charge spectra of galactic rays at solar minimum 18 p3192 A66-34847

Hypothetical mechanism of earthward radial drift of charged particles, noting albedo neutron decay, proton belt, etc 18 p3197 A66-34876

Cerenkov counter measurements of primary cosmic ray heavy nuclei made by Elektron II satellite 18 p3199 A66-34886

Unifield field theory equation for energy loss rate of charged particle moving in plasma, considering screened Coulomb potential and dielectric permeability 18 p3150 A66-34937

Charged particle radial distribution determination as function of amplitude of

HF magnetic field, using diffusion in discharge induced by HF traveling H-wave 18 p3151 A66-34975

Large transverse velocity components imparted to charged particles by passing particles through magnetic field prior to injection into trap 18 p3151 A66-34977

Linear nonrelativistic motion of charged particle in field of traveling electromagnetic wave 18 p3092 A66-35073

Charged particle beam interaction with plasma, determining electron-ion temperatures and HF field 18 p3152 A66-35074

Calculations of energy loss of relativistic charged particles in dielectric media compared with mass operator and perturbation theory calculations and with oxygen experiment 18 p3221 A66-35201

Muons and neutrinos from energetic celestial objects, discussing charge ratio, rate and equipment used 18 p3224 A66-35226

High resolution magnetic hodoscope performance for charged particle analysis, measuring momentum response spectrum and experimental error due to instrumental effects 18 p3115 A66-35228

Transfer coefficients of charged particles trapped in magnetic field of Earth studied, examining concept of sudden pulses as basic mechanism 19 p3451 A66-35260

Charged particle motion and penetration of magnetosphere in proximity of neutral point as result of solar wind-geomagnetic field interaction 19 p3405 A66-35281

Charged particle motion in field of magnetic dipole situated in external magnetic field /magnetospheric G region/, using Stoermer method 19 p3451 A66-35282

Role of particle channeling in affecting results from crystal-line detectors used for charged particle and nuclear scattering 19 p3359 A66-35912

Background gamma and electron fluxes reduction in charged-particle spectroscopy with fast-gated electronics 19 p3359 A66-35918

Motion of isolated energetic charged particle in simple force-free magnetic field with rectilinear lines of force 19 p3400 A66-35925

Linear theory of resonance excitation of oscillations in plasma by fast-charged particle beam 19 p3407 A66-36101

Effect of binding on distribution in angle of charged particles having suffered scattering with lattice atoms 19 p3403 A66-36172

Dielectric function for homogeneous plasma calculated, using fluctuation dissipation theorem 19 p3409 A66-36289

Collective interactions of charged particle beams with plasma produced by electron beam, noting power loss of electron beam coincides with power of HF oscillations caused by interaction 19 p3416 A66-36524

Cosmic dust particles of interplanetary space hypothesized to carry electrical charges, based on irregularities in zodiacal light, night airglow and noctilucent clouds 20 p3646 A66-37023

Electron temperatures and concentrations of charged particles behind strong shock wave in air measured, noting techniques, maximal values and accuracy 20 p3545 A66-37369

Spatial scattering of associated electromagnetic waves arising during passage of fast charged particles through semiconductors, noting role of Cerenkov radiation 20 p3622 A66-38130

Correlation of magnetic fields and energetic electrons on IMP I satellite, noting depression in geomagnetic tail region, electron fluxes and diamagnetic effect 20 p3633 A66-38201

Adiabatic theory of charged particle motion, considering first-order effects in radius of gyration and Alfvén theory 20 p3603 A66-38303

Charged particles and plasma in geomagnetic field, noting diffusion of trapped particles and acceleration by Fermi mechanism and wave acceleration 20 p3640 A66-38319

Magnetospheric boundary phenomena, noting dependence of charged particle observations on character of associated

magnetic fields 20 p3641 A66-38329  
 Magnetospheric models, discussing role of fast magnetospheric merging in connection with charged particle acceleration and magnetospheric configuration 20 p3641 A66-38330  
 Adiabatic theory of distorted motion of charged particles in geomagnetic field, showing dependence on equatorial pitch angle 20 p3642 A66-38332  
 Magnetospheric plasma instabilities, discussing resistive, flute type, whistler and HF two-energy component electrostatic loss-cone instability 20 p3642 A66-38333  
 Sideral anisotropy indicated for charged galactic cosmic radiation obtained by celestial scanning, using narrow angle muon telescope 21 p3808 A66-38466  
 Quantum statistical approach to interaction of electromagnetic waves with hot plasma, noting renormalization of Coulomb interaction between charged particles 21 p3776 A66-38545  
 Plasma injection from coaxial plasma gun into magnetic trap with opposite fields 21 p3788 A66-39055  
 Charged particle motion in magnetic traps of acute geometry, examining particle trajectories by numerical integration 21 p3788 A66-39056  
 Rarefied plasma in magnetic trap with oppositely moving magnetic fields, examining charged particle motion 21 p3788 A66-39057  
 Nonadiabatic magnetic trap energy redistribution during charged particle motion in spatially periodic magnetic field 21 p3788 A66-39058  
 Closed magnetic trap for transverse-to-longitudinal conversion of energy of particles moving in spatially periodic magnetic field 21 p3788 A66-39059  
 Electron, charged particle density spectrum and temperature measurements in arc jet of partially ionized argon 21 p3790 A66-39082  
 Fast charged particle and electromagnetic field fluctuations interaction with nonequilibrium plasma 21 p3791 A66-39155  
 Nonlinear theory of fast-particle motion in helical toroidal magnetic fields, using averaging techniques to obtain adiabatic invariants describing nonlinear oscillatory motions 21 p3792 A66-39295  
 Wave theory calculation of moments of velocity change of charged particle in magnetoplasma 21 p3794 A66-39573  
 Energy loss of charged particles during passage through weakly turbulent plasma in magnetic field with HF oscillations 22 p3952 A66-39751  
 Plasma spectrography in shock tube, determining charged particle concentration 22 p3953 A66-39760  
 Charged particle collisions effect on drift instability of low pressure plasma studies, using Landau collision integral as model collision integral 22 p3956 A66-40192  
 Charged particle radiation shielding in space of solar cell panels by use of concentrator geometry 22 p3852 A66-40512  
 Spectrum, energy and radiation field of charge moving above anisotropically conducting surface 22 p3956 A66-40570  
 Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 22 p3956 A66-40573  
 Hot-wire anemometer determination of electron and ion temperature, neutral particle temperature, concentration and velocity and potential of partially ionized helium plasma 22 p3919 A66-40585  
 Behavior of wave function for system of charged particles near coalescence of any two of them, noting electron-nucleus cusp conditions for diatomic molecules 22 p3861 A66-40904  
 Measurement of effective cross sections of double charge of hydrogen, lithium, sodium and potassium ions in gases, considering error due to unequal scattering of primary and secondary particles 23 p4097 A66-41083  
 Magnetic pumping heating rate for plasma, using conversion of organized energy into random energy by charged particle collisions 23 p4100 A66-41250  
 Electric microfields in plasma taken as system of charged particles moving in

uniform neutralizing background, using approximations and Monte Carlo study 23 p4101 A66-41363  
 Second term obtained in asymptotic series for second adiabatic invariant of charged particle motion in static magnetic field and found to vanish at mirror points 23 p4103 A66-41491  
 Potential oscillations in neutral completely ionized plasma-neutral charged-particle beam system in HF electric field and growth rate of plasma instability 23 p4106 A66-41707  
 Electric field effects on collision efficiency of charged cloud droplets 23 p4065 A66-41846  
 Power conversion enhancement of acoustic-electromagnetic wave coupling across plasma-air boundary by suitable thickness and charged particle density 24 p4241 A66-42304  
 Motion of single charged particle inside plasma accelerator with static electric and magnetic fields, showing periodicity of radial motion with time 24 p4241 A66-42397  
 Monochromatic longitudinal wave amplification by charged particle beam in nonlinear plasma, noting amplitude dependence on coordinate 24 p4243 A66-42520  
 Pressurized Ar-filled ionization chamber response to charged particles in cosmic radiation determined as function of atmospheric depth 24 p4264 A66-42604  
 Interplanetary exploration space mission objectives, discussing magnetic fields, energetic particles, cosmic radiation, etc 24 p4264 A66-42660  
 Distributions of extensive air showers with either fixed number of charged particles or muons, using Geiger counter and scintillation counter 24 p4268 A66-42914  
 Ratio of energy flux in nuclear active component to energy flux in electron photon component in extensive air showers with given numbers of particles 24 p4269 A66-42918  
 High energy muon flux in interference radiation incident to fast charged particle constant-speed trajectories through periodic laminar medium 24 p4271 A66-42939  
 RK-1-F radiosonde for stratosphere measurements of X-ray photon energy spectrum, charged particle density and X-ray photon density 24 p4213 A66-42941  
 Three-dimensional voltage traps for charged particles, using equilibrium equations with or without thermal agitation 24 p4245 A66-42996  
 Dispersion equation for cyclotron electromagnetic waves for magnetoactive plasma injected with charged particles 24 p4245 A66-43016  
 HF potential for motion of charged particle in combined quasi-static magnetic and HF electromagnet field 24 p4246 A66-43096  
 Book on theory and application of plasma physics including adiabatic charged particle motion, MHD characteristics, shock waves and hydromagnetic flow 24 p4246 A66-43109  
 Statistical mechanics methods applied to plasma, deducing kinetic equation 24 p4246 A66-43111  
**CHART**  
 SA GRAPH  
 SA MAP  
 SA POLARIZATION CHART  
 Compressibility charts for nonpolar and slightly polar substances in gaseous and liquid states and in two-phase region, using four independent parameters [ASME PAPER 65-WA/PID-1]  
 05 p0793 A66-15680  
 Stability and gain prediction of microwave tunnel diode reflection amplifier, using Smith chart 07 p1007 A66-17508  
 Automatic dynamic chart display, integrating navigation system as well as situation display and link with computer, for monitoring and updating self-contained system 07 p1067 A66-17690  
 Chart display methods of let-down type, roller type and optical projection for aircraft navigation 10 p1554 A66-21897  
 Mixer cross products of mixer frequency charts to determine spurious responses with respect to desired output 13 p2040 A66-25825

Sputnik III data application to plotting of total magnetic field intensity chart above U.S.S.R., using spherical harmonic analysis 19 p3345 A66-35290  
**CHASSIS**  
 Dynamic logic chassis analyzer /DLCA/, diagnostic tool for isolating faults to circuit card or component level in programmer test station /PTS/ and component test station /CTS/ ground support equipment 14 p2260 A66-28266  
 Forced-cooled electronic chassis development history 20 p3527 A66-37347  
**CHEBYSHEV APPROXIMATION**  
 Synchronous tuning of microwave filters involving small changes in rejection bandwidth and being consistent with Chebyshev response 01 p0044 A66-10936  
 Resonant frequency equation for line segment with reactive loads at both ends, using Chebyshev principle 02 p0199 A66-11754  
 Algorithm determining best approximation of bounded function in Chebyshev sense adapted to discrete case 04 p0540 A66-14167  
 Algorithm determining best approximation in Chebyshev sense of continuous function on segment 04 p0540 A66-14168  
 Frequency analysis of wideband RL and RLC phase shifters, using Chebyshev polynomials 04 p0501 A66-14406  
 Distributed stepped impedance low-pass prototype filter, giving impedance values for filters with Chebyshev equal-ripple characteristics 06 p0844 A66-16082  
 Symmetrical transverse electromagnetic-mode directional couplers, deriving formulas for functional parameters and insertion-loss function 06 p0844 A66-16083  
 Chebyshev approximation for function in equation of thermogravimetric data plot 07 p1149 A66-17470  
 Tensor product analysis of alternating direction implicit iteration techniques for approximate solution of elliptic partial differential equations 09 p1396 A66-20637  
 Computational aspects of uniform polynomial approximation to function and derivative 11 p1722 A66-22983  
 Discrete-sample curve fitting using Chebyshev polynomials and approximate determination of optimal trajectories via dynamic programming 12 p1850 A66-24257  
 Computation method of damped resonance frequencies for system of equal masses, spring constants and viscous damping coefficients 13 p2194 A66-25140  
 Minimax polynomial approximation of degree n to continuous function 14 p2323 A66-27779  
 Filter design minimizing maximum value of estimation error over all admissible signal waveforms 15 p2474 A66-29380  
 Approximation theory by generalized rational functions 17 p2947 A66-32843  
 Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858  
 Perturbation theories for equations of celestial mechanics, obtaining analytical solutions in terms of Chebyshev polynomial series  
 [AIAA PAPER 66-534] 18 p3226 A66-33664  
 Discrete time signal estimation, noting minimum mean square error, minimax estimation, etc 18 p3068 A66-33905  
 Digitally computed tables of Chebyshev approximations of Laplace shift operator transfer function enabling analog simulation of time delay systems 18 p3090 A66-34069  
 Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 18 p3091 A66-34670  
 Auxiliary polynomials for direct determination of Chebyshev interpolation polynomial 19 p3389 A66-35936  
 Optimal control of dynamic systems with minimax type performance index, discussing application of proposed method of solution 19 p3334 A66-36686  
 Gain specification of linear controller for large launch booster, using new application of linear control theory 19 p3471 A66-36687  
 Monotony principle for linear approximations to determine upper and

lower bounds of minimum deviation in approximating functions of real variable by generalized polynomials 20 p3590 A66-37529

Generalized Rolle and Bernstein theorems applied to polynomial approximation of ordinary differential equations over compact linear space 21 p3758 A66-39259

Approximately minmax detection of vector signal on Gaussian background 22 p3939 A66-40188

Optimum microwave filters with even number of sections, using first-order Chebyshev polynomial to obtain equivalent circuit 23 p4037 A66-41515

**CHECKOUT EQUIPMENT**

**SA CEMS SYSTEM**

**SA SPACE VEHICLE CHECKOUT PROGRAM**

Preflight checking of aircraft gyroscopes and accelerometers noting built-in spin detection, torque generator and gimbal check 01 p0070 A66-10956

Functional system integration as means of displaying complex electrical and electronic systems to minimize initial design, equipment checkout and trouble shooting problems 02 p0306 A66-11637

Automatic in-flight testing capability of redundant systems [ATAA PAPER 65-732] 03 p0353 A66-13051

Probable reliability of measurement accuracies and decision limits for system checkout 03 p0347 A66-13336

Subsystem checkout in operation termed on-line checkout, noting use of digital computer with random noise signals and role of correlation and transfer functions 04 p0493 A66-13608

Mathematical model that takes into account factors involved in detecting faults as well as MTBF and MTTR for prediction of equipment availability 04 p0494 A66-13682

Error in checkout systems for space or weapon systems 08 p1223 A66-18740

Digital computers to control automatic test equipment 08 p1187 A66-18741

Automated ground station, with computer controlled telemetry system, for Saturn launch vehicle checkout 09 p1347 A66-20675

Ground support equipment /GSE/ concept, onboard checkout system for large space boosters [ATAA PAPER 64-298] 10 p1612 A66-21935

Design of Malfunction Detection System used on board orbiting laboratory type vehicles to monitor and evaluate critical signals 10 p1538 A66-22043

Air traffic control transponder performance preflight test set, ground-based equipment for fast and positive checkout 11 p1732 A66-22898

SNAP-10A instrumentation and control subsystems and ground test program 12 p1911 A66-23676

Self-diagnosable DX-1 computer design to achieve maximum operational availability 12 p1828 A66-23843

Versatile avionics shop test /VAST/ system, computerized test system for carrier-based avionics 12 p1838 A66-24606

Design requirements for checkout equipment to support advanced carrier-based airborne early warning /AEW/ aircraft 12 p1858 A66-24607

Parameters for selection of miniaturized integrated circuit computer for onboard checkout systems 12 p1829 A66-24612

Airborne checkout system, in-flight maintenance and related signal processing problems 13 p2190 A66-25259

Digital computer automatic checkout equipment for Saturn spacecraft 13 p2057 A66-25260

Digital computer automatic checkout equipment for maintenance of avionic systems 14 p2269 A66-27157

Automatic preworkshop screening test apparatus for determining which components removed from aircraft during ground maintenance need to be sent to workshop 14 p2224 A66-28298

Onboard testing and checkout of manned space vehicles 14 p2272 A66-28424

Checkout procedure for automatic test systems, checkout error probability and relation to tolerance limits 17 p2888 A66-32777

Onboard checkout requirements and

application for advanced space missions [SAE PAPER 660461] 17 p2904 A66-33166

Maintenance on long-duration manned space flight facilitated by maintenance job aid information stored in high density retrieval and display system 19 p3309 A66-35950

Space packaged automatic checkout system for aerospace vehicles including test equipment, control, measurement capability and computer program 20 p3542 A66-37244

Acceptance checkout system for checkout assistance to Apollo CSM and LEM facilities during countdown, discussing system configuration variability, composition and operation 20 p3543 A66-37579

Deterministic and quasi-deterministic class of electronic failure predictions as prevention strategy for use in aerospace system test or checkout program 20 p3566 A66-37887

Maintenance Dependency Chart for design checking and troubleshooting in missile and weapon systems 20 p3566 A66-37889

Atoll computer programming language for spacecraft checkout systems and automatic support operations in Saturn launch vehicle 20 p3544 A66-38257

**CHELATE COMPOUND**

**SA CHEMICAL LASER**

Rare earth chelates preparation, luminescence behavior and laser action 05 p0741 A66-15833

Organic cations effect on laser threshold of solutions of tetrakis form of europium benzoyltrifluoroacetate 07 p1046 A66-18418

Preparation and physical properties of polytricyanoethylene /TCNE/ copper chelate film, noting electric conductivity and heat treatment effect 10 p1574 A66-21348

Deuterium isotope effect on thresholds of europium chelate lasers, noting solvent thermal effects 13 p2105 A66-26598

Ionic fluorescence of europium chelates, suitability as laser materials, noting energy transfer role in population inversion 14 p2315 A66-27463

Organic laser systems including luminescence for achieving laser action, fluorescent and phosphorescent systems and chemistry and spectroscopic properties of rare earth chelates 20 p3576 A66-36970

Fluorescence quantum efficiencies of octa-coordinated europium homogeneous and mixed chelates in organic solvents, noting effect of oxygen removal 23 p4030 A66-41153

Spectroscopic, chemical and laser properties of piperidinium salt of europium tetrakis 24 p4226 A66-43034

**CHEMICAL ANALYSIS**

Ultrapurification discussing definition, purification techniques, analytical techniques /e.g. emission and mass spectroscopy/ and role in biochemistry, metals and materials 04 p0474 A66-13867

Rare gas content of stony meteorites measured by dissolving diverse mineral fractions in solvents on step-by-step basis 04 p0580 A66-14497

Grinding technique for accurate and proportional subdivision of chondritic meteoritic specimen and separation of metallic and silicate components for chemical analysis 08 p1179 A66-19095

Coordination of substituted pyridine N-oxides with oxovanadium /IV/ cations, noting stoichiometric variations with changes 09 p1339 A66-20878

Hot-pressed high-purity polycrystalline MgO 12 p1900 A66-24721

Chemical analysis of permanent and trace organic gases in 30-day manned experiment, using gas chromatography 12 p1811 A66-25011

Interferogram interpretation to determine carbon dioxide concentration in air mixture 13 p2208 A66-25315

Neutron analysis techniques for determining hydrogen presence on lunar or planetary surfaces, based on measurement of gamma radiation 14 p2233 A66-28105

Automatic chemical processing systems for extraterrestrial biochemical investigations 14 p2233 A66-28414

Nitrogen, phosphorus and calcium determination from perchloric acid digestion, process includes sample collection, preparation, digestion and determination 17 p2870 A66-32143

Chemical analysis of stony meteorites with

sharp boundaries between light and dark structure, noting differences found in achondrites and chondrites 17 p3007 A66-33281

Use of balanced filter pairs for nondispersive analysis of aluminum and silicon in aluminum-silicon mixtures 18 p3063 A66-33693

Phase anomaly detected by chemical test D during decreasing phase of last solar cycle 21 p3732 A66-38629

Isotopic composition of lithium in chondrules from Bruderheim and Bjurboie meteorites 22 p3975 A66-39681

Rare gas isotope composition of Estherville mesosiderite and Haralaya, Juvinas, Shergotty and Stannern achondrites 22 p3975 A66-39682

Diffuramine chemistry for understanding nature of N-F and N-X bonds, electron distributions and existence and stabilities of N-F radicals and ions 23 p4031 A66-41233

Oxalate determination in two methods based on photochemical decomposition of ferric oxalate complexes in aqueous acidic solution 24 p4171 A66-43166

**CHEMICAL AUXILIARY POWER SOURCE**

Organic and liquid ammonia electrolyte systems in combination with active anode materials to achieve high energy output battery system [ATAA PAPER 64-750] 13 p2007 A66-26651

**CHEMICAL BOND**

**SA COVALENT BOND**

**SA HYDROGEN BOND**

Conformal sets of aromatic and other conjugated compounds, noting that sum of combustion heat of compounds in one set equals sum of compounds in other set 03 p0442 A66-12333

Approximate natural orbitals for four electron wavefunctions for Be and LiH obtained by diagonalization of appropriate first order reduced density matrices 06 p0910 A66-16165

Affinity and stoichiometry of binding of 1-anilino-8-naphthalene sulfonate /ANS/ to apomyoglobin and apohemoglobin 08 p1177 A66-18701

X-ray spectral analysis of chemical bond structure in aluminum semiconductor compounds 08 p1274 A66-19311

Nonpolar solutes on structure of water and hydrophobic bond in protein stability in aqueous solutions 11 p1649 A66-22988

Classification of titanium alloying elements by effect on strength of chemical bonds in process of formation of alpha-solid solutions 12 p1892 A66-23519

Chemical behavior of metallic elements predicted by periodic table, noting formation of liquid and solid metallic solutions, binary and complex metallides and nature of chemical bond 12 p1896 A66-24897

Spin-free derivation of Pauling rules for evaluating matrix elements for spin-free Hamiltonian over anti-symmetric Slater bond functions 16 p2754 A66-30860

Alpha-chloro alkanoyl valine methyl esters analyzed, finding that diastereoisomeric pairs separation by gas-liquid chromatography can assess steric conditions around amide bond 17 p2871 A66-32932

Chemical bonds between rare earth metals and nitrate radicals in lanthanum, gadolinium and yttrium nitrates studied from IR absorption spectra 18 p3063 A66-33842

German papers on metal physics, chemical bonds in crystals and ferromagnetism 19 p3439 A66-35712

Quantum theoretical ferromagnetic behavior of chemical bonds in transition metals and Hartree-Fock calculation of atomic orbitals 19 p3439 A66-35713

EPR detection of dangling bonds at surface of silica and quartz, noting inhomogeneous expansion 19 p3445 A66-36341

Chemical bonds in carbides and nitrides of transition metals, obtaining atomization heat of compound and effective charges of transition atomic nuclei 19 p3386 A66-36425

Extended Hueckel method calculations of bonding in N, F oxidizers 23 p4030 A66-41220

Diffuramine chemistry for understanding nature of N-F and N-X bonds, electron distributions and existence and stabilities of N-F radicals and ions 23 p4031 A66-41233

**CHEMICAL COMPOSITION**

Electrolytic isolation and precise composition of intermetallic phase of titanium silicide formed in alloys of system Ti-Al-Fe-Si-B-Cr 02 p0245 A66-11994

Organized elements of Orgueil meteorite by quantitative fluorescence microscopy, correlating morphology with chemical composition 03 p0429 A66-13353

Fe and Mn variation in tektites, significance in identification of parent material 04 p0575 A66-13454

Partition functions in equilibrium chemical composition and thermodynamic properties of nitrogen and oxygen plasmas 07 p1087 A66-17936

Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 09 p1443 A66-20598

Solar chemical composition by analysis of UV resonance lines 10 p1602 A66-21090

Schlesinger reaction and chemical composition of mixed hydride reagents 11 p1649 A66-22399

Superconducting behavior of various close packed low symmetry intermediate phases in various binary systems, noting relation between transition temperature and composition 12 p1928 A66-23939

Chemical composition and origin of moldavites, noting densities, refractive indices, oxide content, rubidium-strontium ratio, etc 13 p2187 A66-26234

Phosgenation procedure for synthesis of carbon-14 labeled isocyanates, noting isotope distribution in compounds 14 p2231 A66-26871

Chemical composition of meteorites and classification into siderites, siderolites and aerolites, noting method for determining age and origin 14 p2383 A66-27651

Irtrans 1 to 5 chemical composition and far IR transmittance measured by vacuum grating spectrometer 15 p2524 A66-28847

Fe-Ni-P system and structure of iron meteorites 15 p2603 A66-29967

Major element analysis of chemical composition of Georgia tektite 17 p3004 A66-32931

OH production by sublimation and gas hydrate occurrence in cometary nuclei 17 p3009 A66-33373

Energy spectrum, possible chemical composition and anisotropy of ultrahigh energy primary cosmic radiation 18 p3213 A66-35147

Stellar evolution of stars between 1 and 3 solar masses, noting nuclear reactions and chemical composition 19 p3467 A66-36792

Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 20 p3633 A66-38132

Origin and chemical composition of cohenite in meteorites and temperature dependence of weight-percentage content 22 p3981 A66-40479

Phase and chemical compositions of structural components forming in iron-nickel-chromium alloys with aluminum and titanium content 22 p3936 A66-40787

**CHEMICAL COMPOUND**

**SA INORGANIC COMPOUND**

**SA ORGANIC COMPOUND**

**SA POTTING COMPOUND**

Synthesis of complex lithium aluminum hydride, lithium hexahydroaluminum, having hydrogen to aluminum ratio greater than four 11 p1649 A66-22400

Sliding contact wear under very dry high altitude or space conditions due to lack of contact film prevented by using chemical compounds like graphite or lithium carbonate 12 p1888 A66-24664

Hypothesis that system sodium fluoride-yttrium trifluoride serves as model for each of binary systems of rare earth trifluorides SmF<sub>3</sub> to LuF<sub>3</sub> with sodium fluoride 14 p2315 A66-27466

Chemical protection from radiation exposure-induced genetic changes 15 p2438 A66-29484

Physiologically active compounds and cultured antibiotic fluids used to eliminate effects of ionizing beta radiation on plant seeds 15 p2438 A66-29487

Thermoconductivity and electrical

resistivity measurements with derived Lorentz functions for various compounds, using longitudinal heat flow 16 p2771 A66-30252

**CHEMICAL EFFECT**

Intensity of solar corona, Wolf number and biological and chemical tests conducted in Italy 04 p0577 A66-13817

Chemical durability of lithium silicate glass as result of crystallization 12 p1901 A66-24864

Injurious effect of gamma radiation and 660 and 120 mev protons on white mice and protective action of certain pharmacochemics 15 p2438 A66-29480

Effect of chemical attachment in boundary lubrication of aluminum thrust washer using 1-cetene and cetane 24 p217 A66-42700

Chemical effects on RF attenuation during reentry for blunt-nosed lifting vehicles and sphere-cone ballistic vehicles 24 p4158 A66-42782

**CHEMICAL ENERGY**

Carbon dioxide reduction systems using chemical, electrochemical and thermal energy 02 p0185 A66-11641

Discrepancy between measured value of N-H bond dissociation energy in hydrazine and value suggested by other chemical evidence 07 p1000 A66-17463

Chemical potential and integral equation for correlation functions of classical fluids, using Percus method when functions exhibit cluster properties 14 p2276 A66-27637

Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649

Liquid junction cell design, noting equation integration for ideal diffusion potential and salt effects potential for heteroionic junctions of uniform ionic strength and cation concentration 20 p3502 A66-38188

Chemical energy conversion to electromagnetic energy by flux compression, discussing process and obtained efficiency 21 p3698 A66-39502

Dynamic conversion of solar and chemical energy, discussing power conditioning, Brayton-cycle system with inert gas and spacecraft batteries 22 p3851 A66-40128

**CHEMICAL ENGINEERING**

Heat transfer - AICE and ASME Conference, Cleveland, August 1964 07 p1149 A66-17576

Industrial technology and cost estimate of chemical machining metal removal process [ASTME PAPER MR66-155] 14 p2299 A66-26953

Heat transfer - AICE and ASME Conference, Los Angeles, August 1965 18 p3261 A66-34375

Sequential and concurrent chemical engineering operations in solid-propellant Apollo launch motor manufacturing 22 p3968 A66-39867

Lunar environmental effects and logistics problems in industrial chemical processing of lunar resources [AICE PREPRINT 46A] 22 p3977 A66-39894

Equipment design and weight estimates for lunar production of oxygen and water 22 p3977 A66-39896

**CHEMICAL EQUILIBRIUM**

**SA MOLECULAR DISSOCIATION**

Stagnation point viscous shock layer equations for three-component gas model in chemical nonequilibrium and binary gas model in vibrational and chemical nonequilibrium, noting heat transfer rates 08 p1164 A66-19125

Nonequilibrium internal distributions effect on rates of chemical gas-phase exchange reactions 11 p1650 A66-23212

Phase equilibrium diagram of Ti-Co-Al system at 800 degree C, based on X-ray and Microstructural analyses 12 p1893 A66-23762

Phase behavior in helium-xenon system exhibiting gas-gas equilibria 13 p2018 A66-26444

Numerical solution of steady state jump equations for normal ionizing shock waves in hydrogen, assuming upstream and downstream states at chemical equilibrium 13 p2154 A66-26661

Law of mass action derivation of chemical equilibrium ionization of multitemperature

system when electron and heavy particle temperature differ 15 p2551 A66-29218

Photolysis of carbon dioxide, using 1633 angstrom line of bromine lamp 16 p2646 A66-30862

Inequalities of chemical thermodynamics with partial equilibrium 21 p3836 A66-39087

Formation of organic compounds under conditions of thermal equilibrium, noting aromatic compounds in solar nebula and gases activated to plasma state 22 p3860 A66-40483

**CHEMICAL EXPLOSION**

Safety requirements for handling and testing unstable materials, particularly hydrazinium diperchlorate /HP sub 2/ solid propellant oxidizer 12 p1812 A66-24469

**CHEMICAL FUEL**

Beryllium and beryllium compounds are components of most efficient chemical fuels theoretically known but extremely toxic 03 p0414 A66-12907

**CHEMICAL KINETICS**

Rarefied hydrogen flame interaction between hydrogen atoms and molecules of certain organic, aliphatic and cyclic compounds 01 p0161 A66-10414

Hydrodynamic equations for one-dimensional, adiabatic, frictionless, ideal-gas flow and general matrix form equations for coupled chemical reaction kinetics of C-H-O /N/ systems 02 p0303 A66-11533

Radiolysis of pure liquid nitrogen tetroxide, detailing product formation kinetics and effects of added oxygen and nitric oxide 02 p0188 A66-11593

High temperature kinetics of difluoroamino radical decomposition in excess argon studied behind incident shock waves 03 p0413 A66-12337

Reaction kinetics of tetrafluorohydrazine with fluorine to yield nitrogen trifluoride measured by colorimetric technique 04 p0472 A66-13395

Kinetic studies of hydroxyl radicals in shock waves, considering recombination via particular reaction in lean hydrogen-oxygen mixtures 04 p0596 A66-13646

Extremal concentrations in laminar flow of incompressible viscous liquid along tube of constant cross section, noting recombination reactions 04 p0597 A66-13695

Thermistor for measuring rate of liquid-phase exothermal and endothermal reactions in terms of heat loss, considering condensation polymerization of terephthalyl chloride with ethylene glycol in dioxane solution 05 p0787 A66-14959

Chemical kinetics of nonequilibrium combustion of propane-air and ethane-air mixtures in one-dimensional flow, including ignition delay and reaction time [CI PAPER WSCI-65-19] 05 p0788 A66-15143

Computed high temperature rate constants for hydrogen atom transfers involving light elements, noting activation energies for exothermic reactions [CI PAPER WSCI-65-24] 05 p0629 A66-15148

Kinetic studies of high temperature carbon-silica reactions in charred silica-reinforced phenolic resins [CI PAPER WSCI-65-25] 05 p0788 A66-15149

Rates and activation parameters determined from nuclear magnetic resonance spectra for degenerate isomerizations of disubstituted benzofurazan oxides 05 p0629 A66-15155

Vibrational excitation effect in hydrogen-deuterium exchange 05 p0718 A66-15156

Burning modes in initially unmixed reactants, describing stagnation region formation by interaction of opposed flows of fuel and oxidant [AIAA PAPER 66-71] 06 p0969 A66-16258

Fuel drop ignition, discussing parametric extension of quasi-flame surface theory to higher reaction orders and arbitrary stoichiometric ratios [AIAA PAPER 66-70] 06 p0970 A66-16415

Macrokinetics of homogeneous-heterogeneous processes in moving media and estimates of initial material concentration in core and boundary layer regions of reaction vessel flow 06 p0971 A66-16543

Kinetic equations of complex reactions derived, using conical graphs, reducing reversible reaction problems to problems of

Irreversible kinetics 06 p0822 A66-16544  
 Oxidation kinetics of pure tungsten and tungsten alloys with various niobium content at high test temperatures 07 p1050 A66-18065  
 Thermal oxidation kinetics of silicon, describing diffusion process, oxide layer boundary reactions and space charge effects on initial phase 07 p1106 A66-18401  
 Kinetics of reactions in iodide method of growing epitaxial germanium layers 08 p1268 A66-18797  
 Relativistic hydrodynamics of relaxation, discussing limiting cases depending on chemical reaction and annihilation rates and pair growth 08 p1206 A66-18974  
 Kinetics of hydroxyl radical in aqueous solution, examining electron spin resonance spectrum as function of flow rate, temperature and mixture composition 08 p1178 A66-19066  
 Water vapor influence on latitudinal and seasonal distribution of stratospheric ozone concentration explained via Hampson chemical mechanism 08 p1216 A66-19209  
 Diffusion controlled mechanism for operation of nickel hydroxide electrode, analyzing corresponding boundary value problem and predicting electrochemical behavior 08 p1171 A66-19647  
 Deposition kinetics of solid phases on electrodes of second kind, noting conditions affecting crystal growth and lattice formation 08 p1171 A66-19648  
 Chemical reaction kinetics and gas dynamics combined to analyze processes occurring in combustion chambers and nozzles of jet and rocket engines 10 p1620 A66-21367  
 Hypersonic flow of air past circular cylinder with nonequilibrium oxygen dissociation, including dissociation of free stream 10 p1479 A66-21375  
 Reaction rate of atomic oxygen with nitrous oxide in shock tube at high temperatures 11 p1649 A66-22881  
 Nonequilibrium effects in recombination dissociation kinetics, using iterative perturbation procedure 11 p1738 A66-22884  
 Upper atmospheric helium ion chemical loss process, distribution of nitrogen ion and rate coefficient of helium ion-molecular nitrogen reaction 11 p1701 A66-23153  
 Nonequilibrium internal distributions effect on rates of chemical gas-phase exchange reactions 11 p1650 A66-23212  
 Kinematic computer calculations of energy distribution among products of repulsive, mixed and attractive energy release exothermic reactions 11 p1787 A66-23213  
 Ion-molecule reaction rates and recombination coefficients from mass spectrometric ionospheric data 11 p1702 A66-23492  
 Kinetics of two-phase decomposition of solid solution of magnesium-aluminum alloy, using X-ray analysis, noting grain orientation and size 12 p1898 A66-25027  
 Chemical reactions in gas flows including relation between dissociation and recombination kinetics, thermal decomposition of hydrazine, kinetics of high temperature air, etc, analyzed, using shock tube 13 p2016 A66-25160  
 Chemical system and reaction rates behind strong shock waves in mixtures of carbon dioxide and nitrogen used to study entry conditions into Mars atmosphere 13 p2062 A66-25276  
 Nitrogen adsorption effect on thermionic emission from polycrystalline tungsten ribbon at high and low applied fields, explaining work function changes 13 p2162 A66-25381  
 Experimental analysis of regression rates in hybrid rocket engines for both chemical kinetics and gas dynamics domains 13 p2173 A66-26369  
 Carbon-13 chemical shifts of carboxyl carbon atom of acetic, benzoic and mesitoic acids in various compositions of sulfuric acid 14 p2232 A66-27376  
 Nitrogen tetroxide dissociation equations 14 p2371 A66-27829  
 General cosmological problem /GCP/ based on unified field theory involving cosmological expansion, oscillation and organic evolution, discussing quadrant mechanics, entropy, ether, minimum time

problem, etc 14 p2389 A66-28408  
 Chemical kinetics of borane and diborane compounds, decomposition rates and molecular dissociation energy 15 p2447 A66-29237  
 Rate constant of ion molecular processes in ionosphere, tabulating results of laboratory analyses 15 p2495 A66-30054  
 Rate constant for atomic oxygen ion destruction by carbon dioxide measured in pulsed flowing afterglow system 16 p2645 A66-30115  
 Dissociation rate of diatomic molecular fluorine 16 p2646 A66-30863  
 Temperature and structure effect on hydride precipitation kinetics in titanium, using resistometric technique, noting nucleation problem 16 p2724 A66-31266  
 Numerical computation of quasi-equilibrium nozzle flows with finite rate chemical kinetics [AIAA PAPER 66-636] 18 p3048 A66-34220  
 Kinetic factors in diffusion flames, noting fuel/ oxidizer ratios, equilibrium in terms of flame geometry, burning of metallic elements, etc [WSCI 66-10] 18 p3263 A66-34419  
 Measurement of hydrogen-fluorine kinetics at high temperatures [AIAA PAPER 66-637] 18 p3064 A66-34437  
 Mathematical analysis of thermal wave technique for linear kinetics from viewpoint of solid-liquid interface motion 18 p3265 A66-34508  
 Internal ballistic considerations in hybrid rocket design, noting throttling and regimes of operation involving effects of surface-or gas-phase reaction kinetics [AIAA PAPER 66-628] 20 p3663 A66-38035  
 Chemi-ionization in reaction zones of hydrocarbon-oxygen or hydrocarbon air flames, noting association with abnormal excitation of hydroxyl radical 20 p3626 A66-38046  
 Space chamber molecular kinetics, noting importance of molecular flux upon simulation fidelity and effect of various gases and chamber geometry on flux profile 20 p3544 A66-38161  
 Chemical kinetics of electron plasma reactions, discussing energy states, ion-molecule reactions, charge transfer, transport properties, phase interactions, etc 21 p3702 A66-38448  
 Elementary gas phase reactions involving atoms and radicals by mass spectroscopic and diffusion cloud methods 21 p3702 A66-38472  
 Hydrogen bonding kinetics in free radical liquid-phase reactions 21 p3702 A66-38520  
 Nitrogen ion charge-transfer reaction rates with CO and carbon dioxide in pulsed flowing afterglow system 21 p3774 A66-38529  
 Numerical data for common solid state reaction equations which are functions of alpha, fraction of material reacted in time, t 21 p3797 A66-38594  
 SiC role in ablation chemistry, examining experimental results on char-reinforcement reactions 21 p3834 A66-38710  
 Inviscid hypersonic nonequilibrium flow of three-component gas past circular cone, using exact reaction-rate equations to correct solution first obtained from approximate equations 21 p3693 A66-38711  
 Thermodynamic and reaction kinetic parameters in solid rocket motor efficiency, examining Le Chatelier effect of environmental pressure, influence of propellant temperature and system thermal losses 22 p3970 A66-39873  
 Reaction rates for charge transfer reactions of carbon monoxide with oxygen and carbon dioxide measured at 300 degrees K in pulse-discharge flowing afterglow system 22 p3859 A66-39907  
 Kinetics of monosilane pyrolysis, detailing gaseous and solid product formation, surface effects and experiments with added gases 22 p3999 A66-40410  
 Methane/deuterium exchange reaction rate measured in shock tube, using vibrational excitation mechanism to explain data 22 p3860 A66-40903  
 Kinetics of dissociation of carbon dioxide gas molecules behind shock wave front 24 p4196 A66-42882

## CHEMICAL LASER

Self-pumping chemical laser theory and operation, noting chemical pumping 13 p2104 A66-26382  
 Deuterium isotope effect on thresholds of europium chelate lasers, noting solvent thermal effects 13 p2105 A66-26598  
 Chemical pumped UV laser action through thermal decomposition of dimethyl peroxide 15 p2513 A66-28836  
 Laser oscillation in flash photolysis of carbon disulphide and oxygen to form CO 17 p2933 A66-31941  
 Light energy measurements made with argon bomb used as chemically powered laser pump 19 p3373 A66-35388  
 Fluorescence quantum efficiencies of octa-coordinated europium homogeneous and mixed chelates in organic solvents, noting effect of oxygen removal 23 p4030 A66-41153  
 CW laser action in holmium-doped erbium trioxide with dominant pumping by energy transfer between ions 24 p4222 A66-42555

## CHEMICAL MILLING

Chemical milling techniques, particularly for aluminum alloys, comprising surface preparation, chemical etching and finishing 06 p0888 A66-17074  
 Chemical milling of columbium reentry vehicle skin panels using powdered metallurgy, vacuum processing, refractory alloy sheet rolling and electron beam welding [ASTME PREPRINT MR66-712] 12 p1886 A66-24417  
 Tooling and manufacturing technique and requirements for controlled removal of metal by chemical and electrochemical processes [ASTME PAPER MR66-165] 14 p2300 A66-26957

## CHEMICAL PROPERTY

Effect of tantalum carbide additions on mechanical, thermal and chemical properties of WC-TiC-Co alloys 08 p1239 A66-18902  
 Resin compacts prepared by high temperature compression of hardened resins mixed with unhardened resins, noting strength, thermal behavior and physicochemical properties 13 p2113 A66-25911  
 Comparative calculation used in computation of physicochemical properties of hydrides, including densities of beryllium hydride, entropy of cesium hydride, crystal lattice energy of rubidium deuteride, etc 13 p2018 A66-26327  
 Rare earth research - Conference, Phoenix, April 1964 14 p2361 A66-27460  
 Chemical and physical properties of samarium dicarbide, prepared by heating samarium sesquioxide with graphite, using X-ray analysis, hydrolytic studies, etc, noting structure 14 p2362 A66-27465  
 Suboxides of tantalum, examining formation, stability, structure and properties 16 p2722 A66-30221  
 Chemical stability of silver graphite, molybdenum disulfide, zinc oxide, boron nitride, muscovite and phlogopite mica solid lubricants 16 p2715 A66-31675  
 Lanthanum germanide synthesis using arc furnace, noting chemical properties 20 p3584 A66-37416  
 Spectroscopic, chemical and laser properties of piperidinium salt of europium tetrakis 24 p4226 A66-43034

## CHEMICAL PROPULSION

Requirements and performance expectations of chemical and nuclear propulsion systems for manned Mars and Venus missions 06 p0942 A66-16499  
 Hypergolic ignition and restart in Plexiglas window hybrid rocket motor, including oxidizer flow transient, flame propagation, chamber pressurization rates, etc [AIAA PAPER 66-69] 07 p1111 A66-18452  
 Liquid chemical propulsion rocket engines development problems, specifically propulsion system for Titan rocket 08 p1280 A66-18572

## CHEMICAL REACTION

SA ALKYLATION  
 SA DECOMPOSITION  
 SA DEHYDRATION  
 SA DEHYDROGENATION  
 SA DISSOCIATION  
 SA ELECTROLYSIS

SA EXOTHERMIC REACTION  
SA FRIEDEL-CRAFT REACTION  
SA HILL REACTION  
SA HYDROGENATION  
SA HYDROLYSIS  
SA ION EXCHANGE  
SA IONIC REACTION  
SA NITRATION  
SA OXIDATION  
SA PHOTOCHEMICAL REACTION  
SA POLYMERIZATION  
SA SYNTHESIS

Chemical reaction occurring between low temperature plasma jet and nearly inviscid fluid /water/ 02 p0264 A66-11388

Equation solution for flame propagatin in gas mixture with first-order exothermic chemical reaction 02 p0302 A66-11392

Atomic hydrogen reaction with HO-2 as source of hydrogen molecules in lower thermosphere 02 p0221 A66-11504

Chemical reaction between iron and extreme pressure agents like chlorine and sulfur for corrosion mechanism analysis [ASLE PREPRINT 65-LC-11] 02 p0237 A66-12254

Chemical inhibition of pentaborane-oxygen reaction in development of improved fire protection systems 03 p0413 A66-12487

Reaction of molecular hydrogen with oxygen in absence of molecular oxygen at various temperatures, using stirred reactor with mass spectrometer 04 p0473 A66-13649

High temperature analysis of mechanism and kinetics of tetrafluoroethylene decomposition and oxidation in excess argon behind shock waves, using UV absorption and mass spectrometry 04 p0571 A66-13650

Rapid irreversible second-order chemical reactions in turbulent wake of cylinder 04 p0455 A66-13937

Convective mass exchange in heterogeneous chemical reactions in laminar flow along wall 04 p0597 A66-14186

Dichloroborane synthesized in quantitative yields by thermal hydrogenation of boron trichloride 05 p0629 A66-14540

Chemical evolution studied by finding and reconstructing chemical reactions that might have occurred among primeval molecules on surface of Earth 05 p0629 A66-15017

Immiscibility and rapid interface reaction rate as cause of disruption in nitrogen tetroxide-hydrazine impinging jets [CI PAPER WSCI-65-20] 05 p0743 A66-15145

Nucleosynthesis in stars including light element reactions, helium and carbon burning, neutrino processes, etc 05 p0719 A66-15764

Kinetics of HF decomposition in HF mixtures behind incident shock waves over various temperature ranges, using IR emission 06 p0941 A66-16127

Aromatic/heterocyclic polymers from tetraamines reaction with tetraacids at room temperature, developing potential for aerospace application 06 p0901 A66-16299

Ignition of hydrogen-oxygen-argon mixtures containing small amounts of hydrocarbons and bromine substituted hydrocarbons in shock tubes 06 p0822 A66-16634

Interaction of thionyl chloride with chlorides of aluminum, titanium silicon, niobium, tantalum and oxychlorides of phosphor and vanadium 07 p1050 A66-18059

Thermodynamic stability and reaction kinetics of solids at high temperature 07 p1054 A66-18496

Inviscid supersonic flow fields of reacting gas mixture around pointed bodies calculated, using characteristics method 08 p1164 A66-19128

Heat capacity expression due to chemical reaction, relating composition variations and binary diffusion coefficient with Lewis number, presenting integral equation for system enthalpy 08 p1318 A66-19164

Oxygen reduction in sealed nickel-cadmium cells 08 p1171 A66-19646

Particle formation involving homogeneous condensation by mixing reaction technique for eventual development of colloid thruster [AIAA PAPER 66-254] 10 p1593 A66-21459

Approximate method for analyzing chemically reacting turbulent flow fields having initial homogeneities [AIAA PAPER 65-37] 10 p1523 A66-21770

Bimodal formulation applied to chemical reactions in turbulent wake flow behind hypersonic spheres, using quasi-one-dimensional model 10 p1480 A66-21771

Schlesinger reaction and chemical composition of mixed hydride reagents 11 p1649 A66-22399

Oxygen interacting with zinc oxide and UV-irradiated magnesium oxide studied, using electron paramagnetic resonance techniques 12 p1916 A66-23618

Syntheses of three macromolecular chlorocarbons, studying structure and configuration, noting high thermal stability and chemical inertness 12 p1812 A66-23633

Chemical reaction between iron and extreme pressure agents like chlorine and sulfur for corrosion mechanism analysis [ASLE PREPRINT 65-LC-11] 12 p1889 A66-24993

Reactivity of titanium alloy oxidizer tank with nitrogen tetroxide oxidizer under vibration analyzed for LEM when subjected to impact 13 p2111 A66-26222

Analytical solution to rate equations for branching chain reactions of hydrogen-oxygen reaction under shock tube conditions, for application to ignition problems 13 p2018 A66-26442

Rates and stoichiometry of reaction of aluminum hydride in tetrahydrofuran at zero degrees with selected organic compounds containing representative functional groups 13 p2018 A66-26500

Properties of laminar boundary layer undergoing surface catalysis with two reactants and two products obeying Langmuir-Hinshelwood mechanism, solving concentration field by integral equation 13 p2019 A66-26663

Hydrazine hydrate interaction with halogenides of tetravalent germanium in aqueous organic solvents 14 p2231 A66-27137

Cis- and trans-beta-bromostyrene reaction with lithium diphenylphosphide in tetrahydrofuran producing cis- and trans-beta-styryldiphenylphosphine, discussing proton magnetic resonance and configuration retention 14 p2232 A66-27498

Critical injection parameter on porous plate with turbulent boundary layer, noting conditions of neutralization reaction 16 p2684 A66-30324

New synthesis of o-nigrophenylacetaldehyde 16 p2646 A66-30621

Cobalt doping effect on magnetic properties of nickel thin films prepared by chemical precipitation 16 p2774 A66-30694

Atmospheric decay of rocket-released Li due to diffusion, wind and chemical reaction 16 p2697 A66-31008

Chemical release at high altitudes in order to obtain information about atmosphere by ground observation 16 p2697 A66-31012

Kinetics of highly endothermic carbon-silica reaction for silica-reinforced resin systems 17 p2943 A66-32453

Ignition and combustion mechanism of liquid propellant consisting of aliphatic alcohols and mixed acid, using calcium and potassium permanganates as catalysts 17 p2989 A66-32458

Temperature and pressure distribution for fluid flow through porous matrix, noting chemical reaction, heat transfer, boundary layer flow, etc [AIAA PAPER 66-423] 17 p2910 A66-32752

Diamant French satellite launching examining combustion stability during ignition, vibrations, chemical reactions between oxidizer and pressure feed system, etc 17 p3017 A66-33236

Ion-molecular reactions of hydrogen with inert gases caused by low energy electrons in low temperature plasmas, considering energy level populations, reaction cross sections, etc 18 p3064 A66-34026

H, C, N, O, Cl, Ca and Al negative ion formation in plasma, noting role of continuous radiation, formation temperature and metastable and stable states 18 p3144 A66-34041

Dissociation and reassociation reactions of hemocyanin mixtures analyzed by electron microscopy, noting original molecular structures 18 p3060 A66-34459

Chemical vapor deposition technique for materials for electron devices including preferred orientation, high purity material, special layer structures, etc 18 p3125 A66-34619

Catalytic combustion of cyclohexane, cyclohexene and benzene, determining significance of combustion via computer program 18 p3266 A66-35022

Chemical methods for carbon dioxide conversion for oxygen recovery, including relationship to biological processes 19 p3293 A66-36235

Chemical processes in low temperature plasma, noting high energy densities, enthalpies, etc 20 p3606 A66-36900

General theorems for dissociated and chemically reacting compressible laminar unsteady two-component boundary layers derived, based on Nirenberg maximum principle 20 p3510 A66-37524

Fatiguing at room temperature resulting in observable diffusion of silver into copper, using precipitation reaction to analyze influence of large number of vacancies 20 p3584 A66-37618

Asymptotic solutions of differential equations of mass transfer with chemical reaction without assumptions concerning kinematics, showing existence of five regimes 20 p3679 A66-37789

Reactions between silica and graphite studied in vacuum from 1445 to 1765 degrees C by continuously measuring amount of carbon monoxide formed 21 p3753 A66-38593

Solid solutions of titanium, tungsten, chromium prepared by carbidization of mixtures in hydrogen medium and obtained as fine-grained carbide powders 22 p3934 A66-39865

Analytic solution for ignition kinetics of dry carbon monoxide-oxygen reaction obtained, assuming initiation reaction followed by chain-branching steps 22 p3998 A66-40115

Homogeneous isotopic exchange reaction between hydrogen and deuterium in single-pulse shock tube with excess argon 22 p3860 A66-40902

Large-signal AC field effect experiments with A and B real surfaces of indium antimonide exposed to various chemical reactions and high electric field described by tunnel equation 23 p4111 A66-41185

Hydrolytic reactions of nitrogen fluorides, noting inertness of nitrogen trifluoride to pure water and reaction with aqueous base to give nitrite and fluoride 23 p4118 A66-41242

Q-switch pulsed ruby laser irradiation-induced chemical dissociation and ionization in residual gases 23 p4079 A66-42076

Homogeneous gas phase and surface reactions based on mass transfer mechanism during quenching of oxygen-nitrogen mixtures from high temperatures 24 p4170 A66-42134

Chemical interaction among components of CdO, ZnO and PbO admixtures in ammonium perchlorate, noting effect on thermal decomposition 24 p4295 A66-43200

CHEMICAL REACTOR

Theory of homogeneous-heterogeneous radical reactions in turbulent flow in one-dimensional elongated reactor with high Peclet number 08 p1179 A66-19379

Newton-Raphson method iterative solution of two-point boundary value problem and application to trajectory optimization and tubular reactor design 11 p1680 A66-23276

Refrigerated mass spectrometer inlet serving also as low temperature reactor and rough separative device for compounds stable only at very low temperatures 16 p2645 A66-30420

Mass spectrometric analysis of contents of flow reactor in which diborane at low pressure was pyrolyzed, varying temperature, flow time, surfaces, etc 17 p2871 A66-32853

Chemical reactor on-site manufacture of propellant oxygen from metallic silicates found on Moon [AICE PREPRINT 46C] 22 p3977 A66-39895

Arc image stagnation-flow reactor for measuring gas-solid reaction rates between 2000 and 3000 degrees K 24 p4216 A66-43214

CHEMICAL RELAXATION

SA GAS FLOW

## SA SHOCK WAVE

Linearized wave equation of supersonic flow with single relaxation process, using model gas mixture 06 p0874 A66-17003

Simple waves in one-dimensional nonsteady nonmagnetic relaxation hydrodynamic flows of chemically reacting compressible gases 07 p1020 A66-17965

Chemical relaxation effects in nozzle flow by measuring high temperatures created by detonation waves in shock tube, using hydrocarbon mixtures 12 p1977 A66-23748

Equation for laminar boundary layer on flat plate in viscous compressible gas flow under chemical relaxation, solved by approximate method in series form 12 p1863 A66-24244

Book on shock wave relaxation processes, discussing laws governing statistical equilibrium, thermal dislocation and ionization, nonequilibrium zones behind shock wavefront, plasma shock propagation, etc 14 p2277 A66-27788

Relaxation processes behind shock wave in free stream partially dissociated and vibrationally excited by monitoring time history of radiative emission in shock tube [AIAA PAPER 66-519] 17 p2911 A66-32775

## CHEMICAL STERILIZATION

Accidental biological contamination of planets during space exploration, noting different physical and chemical sterilization methods 02 p0184 A66-11609

## CHEMILUMINESCENCE

## SA AIRGLOW

Time variation in radiance of contaminant glow clouds released in upper atmosphere, noting solar radiation scattering 02 p0221 A66-11474

Electrochemical and chemiluminescent ozone-sensor performance, using analysis of comparative ascents 04 p0517 A66-14451

Flame as source of emission of visible UV and IR radiation and ionization source for certain combinations of fuels and oxidants 08 p1317 A66-18856

Changes in current kinetic theory of NO-O reaction, based on observation of release of nitric oxide in E region 11 p1703 A66-23494

Glow-discharge shock tube examination of chemiluminescent, surface-catalytic and gas-phase reaction rates, noting temperature dependence of NO-O and CO-O chemiluminescent reactions 13 p2016 A66-25368

Catalytic efficiency of noncatalysts interferes with accuracy of measurement, noting necessity of oxygen treatment of noncatalytic surfaces 15 p2502 A66-29310

Chemiluminescent technique for flow visualization using electrochemical system and water tunnel 15 p2476 A66-29688

Atmospheric diffusion coefficients by measuring radial growth of chemiluminous trails deposited in upper atmosphere 16 p2695 A66-30712

Simulation of upper atmosphere NO release in low density wind tunnel indicating light output of NO-O chemiluminescent reaction depends on O concentration 19 p3405 A66-36804

Chemiluminescent NO-O-atom reaction, determining effect of change of emission intensities and third 20 p3604 A66-37309

Unfocused ruby laser radiation field-biphenyl compound interaction, resulting luminescence and apparent multiphoton absorption 21 p3745 A66-38528

Chemiluminescence in atomic-oxygen-acetylene and atomic-oxygen-carbon suboxide flames attributed to formation of CO in excited and electronic states 22 p3997 A66-39926

## CHEMISORPTION

Sticking coefficients for interaction of molecular oxygen with clean semiconductor surfaces assuming immobile adsorption process 03 p0408 A66-12406

Adsorption at semiconductor and gel surfaces discussing chemisorption theory, ionizing radiation effect and structural parameters 04 p0563 A66-13768

Interaction between hydrogen and various titanium alloys, noting correlation between sorption capacity of alloys and type of phase diagram 07 p1050 A66-18064

Photoadsorption effect on semiconductor

surfaces determined as function of various parameters, noting role of external electric field 08 p1276 A66-19378

Extrinsic and intrinsic surface states and photoelectronic properties of insulating CdS crystals 09 p1427 A66-20256

Correlation and prediction of adsorption levels of gaseous contaminants for removal from space cabin atmospheres

[AICE PREPRINT 26B] 10 p1491 A66-21189

Antibody globulin coupled to diazotized aminoaryl derivative of carboxymethyl-cellulose to form immunoadsorbent for extracting antigens 12 p1805 A66-23568

Potential sweep method for organic and adsorption analyses, showing relation between galvanostatic and fast potential sweep transients, noting mathematical analysis of current-potential transients 12 p1812 A66-25000

Nitrogen adsorption effect on thermionic emission from polycrystalline tungsten ribbon at high and low applied fields, explaining work function changes 13 p2162 A66-25381

Irreversible form of chemisorption by semiconductor as affected by volume impurity and reaction with chemisorbate 13 p2017 A66-25696

Correlation and prediction of adsorption levels of gaseous contaminants for removal from space cabin atmospheres

[AICE PREPRINT 26B] 17 p2868 A66-32679

GaAs field emission cathode microscopy patterns prepared by chemical etching and low temperature field

desorption 20 p3623 A66-38393

Change in thermionic emission current of palladium wire at 1000 degrees C due to exposure to molecular and atomic-hydrogen beams 22 p3859 A66-39913

## CHEMISTRY

## S AEROTHERMOCHEMISTRY

## S ATMOSPHERIC CHEMISTRY

## S BIOCHEMISTRY

## S ELECTROCHEMISTRY

## S GEOCHEMISTRY

## S NUCLEAR CHEMISTRY

## S ORGANIC CHEMISTRY

## S PHOTOCHEMISTRY

## S PHYSICAL CHEMISTRY

## S PHYSIOCHEMISTRY

## S PLASMA CHEMISTRY

## S POLYMER CHEMISTRY

## S PROPELLANT CHEMISTRY

## S RADIOCHEMISTRY

## S STEREOCHEMISTRY

## S SURFACE CHEMISTRY

## S THERMOCHEMISTRY

## CHICKEN

Age dependence of resistance of chickens to 100 percent oxygen at one atm /OAP/, noting delayed mortality in adult birds 07 p0997 A66-17458

## CHILD LAW

Space charge theory of one-dimensional, monoenergetic, unipolar and bipolar currents traversing on otherwise evacuated space between infinite plane parallel electrodes 10 p1557 A66-21572

## CHINA

Chinese-English/English-Chinese astronomical and astrophysical dictionary 12 p1949 A66-24200

## CHIRP SIGNAL

Oblique ionospheric sounding at medium-sweep frequencies, noting performance of chirp techniques 14 p2233 A66-26771

Computer programming of pulse compression by active and passive generation, noting differences between sidelobe structures of generation 22 p3883 A66-39714

## CHLORELLA

Physiological-ecological investigations of Chlorella cultures as link in closed ecological system 01 p0018 A66-10981

Characteristics of sterols naturally occurring in species of Chlorella with algae grown heterotrophically on glucose 13 p2009 A66-25876

Biological procession of human secretions and water regeneration by Chlorella in bacterial colony 15 p2440 A66-29501

Biological effects of confining fish in sealed aquarium with and without Chlorella 15 p2440 A66-29504

Maximum photosynthetic capacity for

Chlorella determined experimentally from cell reproduction rates 15 p2440 A66-29505

Intensive Chlorella culture need of carbon dioxide concentration in closed and controlled air-carbon dioxide system 15 p2440 A66-29508

Dense continuous Chlorella culture growth at various illumination levels 15 p2440 A66-29509

Intensive Chlorella culture consumption of mineral-nutrition elements 15 p2440 A66-29510

Optimum temperature conditions for cultivating thermophilic strains of Chlorella under varying radiant flux intensities 16 p2644 A66-31589

Buffering capacity of substances liberated by Chlorella expressed in terms of van Slyke buffer index, noting changes in pH 17 p2860 A66-32831

High respiration rate of Chlorella maintained by blue-green light 19 p3287 A66-36435

Difference spectra of glucose cultures of Chlorella vulgaris beyernick indicate increased pigmentation in white light and monochromatic light over dark controls 20 p3507 A66-37791

Photillumination effect on growth rate of Chlorella vulgaris, discussing action spectrum and mechanism of light requirement for heterotrophic growth 20 p3507 A66-37792

## CHLORIDE

## SA BORON CHLORIDE

## SA CARBON TETRACHLORIDE

## SA LANTHANUM CHLORIDE

## SA LITHIUM CHLORIDE

## SA NITROSYL CHLORIDE

## SA POLYVINYL CHLORIDE

## SA POTASSIUM CHLORIDE

## SA SILICON TETRACHLORIDE

## SA SILVER CHLORIDE

## SA SODIUM CHLORIDE

## SA TITANIUM CHLORIDE

## SA TUNGSTEN CHLORIDE

Interaction of thionyl chloride with chlorides of aluminum, titanium silicon, niobium, tantalum and oxchlorides of phosphor and vanadium 07 p1050 A66-18059

Chloride requirement for cathepsin C 24 p4165 A66-43099

## CHLORINE

Cl 36 in stony meteorites produced by spallation reactions and neutron capture 04 p0579 A66-14318

Microwave discharge-fast flow to investigate interaction between molybdenum surface and chlorine 06 p0821 A66-16155

Production rates of Cl 36 and Ar 39 in metallic and stone phases of Leedey chondrite 12 p1948 A66-23904

New inner-shell resonance lines in highly ionized sulfur and chlorine from high-energy theta-pinch plasma light source 14 p2338 A66-28130

Chlorine-fluorine mixture combustion, examining flame speeds, temperatures and burned gas composition [WSCI 66-31] 18 p3263 A66-34415

Predicted capture rate in chlorine experimentator detecting solar neutrinos, using set of nuclear parameters, showing CNO cycle and proton-proton chain contribution to solar energy generation 21 p3809 A66-38657

Fluorine, chlorine and other trace elements determined through differentiated tephritic dolerite sill from Tasmania using statistical techniques, showing hydroxyl lattice sites by chlorine and fluorine 24 p4198 A66-42364

## CHLORINE COMPOUND

## SA PERCHLORIC ACID

Syntheses of three macromolecular chlorocarbons, studying structure and configuration, noting high thermal stability and chemical inertness 12 p1812 A66-23633

Chloride alkoxide of pentavalent tungsten, obtaining UV, IR, NMR and EPR spectra, molecular weight, etc 16 p2646 A66-30620

## CHLORINE FLUORIDE

## S PERCHLORYL FLUORIDE

## CHLORINE TRIFLUORIDE

Chlorine trifluoride analysis using combination of gas chromatography and IR spectrophotometry, noting column containing trichloroethylene 23 p4032 A66-41239

Electrical conductivity variation with

temperature of chlorine and bromine trifluoride, noting maximum conductivity below freezing point of chlorine trifluoride 23 p4118 A66-41241

**CHLOROETHYLENE**  
S TRICHLOROETHYLENE  
**CHLOROPHYLL**  
Hydroquinone and oxygen effects on photovoltaic characteristics of optically excited chlorophyll 06 p0812 A66-16357  
Chlorophyll distribution in mechanically fragmented spinach 11 p1645 A66-23195  
Role of light in chemical and biochemical evolution noting photosynthetic reactions depending on chlorophylls, pigment system, etc 17 p2853 A66-32102  
Complete fractionation of bacteriochlorophyll and degradation products by two rapid methods, using small amount of Rhodospirillum rubrum 17 p2859 A66-32308

**CHLOROPLAST**  
Chlorophyll distribution in mechanically fragmented spinach 11 p1645 A66-23195  
Photoreduction of viologen dyes analyzed with chloroplasts, noting oxygen evolution and photophosphorylation efficiency, reduction potentials, etc 16 p2638 A66-30647  
Isolation of morphologically intact and photochemically functional chloroplasts from marine chrysomonad Hymenomonas sp 16 p2638 A66-30648  
Kinetics and spectral characteristics of photoinhibition of spinach chloroplast reactions 24 p4163 A66-42316

**CHOKER**  
Generalized equation of choking for two or more unmixed streams flowing in same channel, noting relevance to ejector principle 05 p0665 A66-15773

**CHOLESTEROL**  
Free and esterified cholesterol in plasma extracts determined by fluorometric means 13 p2017 A66-25871

**CHONDRITE**  
SA ACHONDRITE  
SA CARBONACEOUS METEORITE  
Aromatic hydrocarbons in carbonaceous chondrites investigated by time-of-flight mass spectrometry and hypothesized as formed in solar nebula under thermodynamic equilibrium 01 p0136 A66-10436  
Rubidium-strontium ages of chondrules and carbonaceous chondrites 02 p0290 A66-11961  
Gallium concentrations in iron phases of several chondritic meteorites 02 p0290 A66-11962  
Contamination of carbonaceous chondrites by ordinary viable microorganisms, isolating three types of bacteria on various meteorites 03 p0325 A66-13339  
Potassium content and K-A ages of 18 amphoterite chondrites determined from isotope dilution technique 04 p0580 A66-14486  
Metal grains in 34 chondritic meteorites examined by electron microprobe 07 p1133 A66-17459  
Mineralogy and chemistry of Farmington hypersthene chondrite, examining microtexture aspects such as metal globules, grain shapes and troilite orientation 08 p1290 A66-19073  
Enstatite chondrites comprise well-defined group of meteorites distinct from other chondrite groups in chemical and mineralogical composition 08 p1291 A66-19074  
Chondritic meteorites shed light on role of oxidation-reduction equilibria in formation of terrestrial planets 08 p1291 A66-19075  
Grinding technique for accurate and proportional subdivision of chondritic meteoritic specimen and separation of metallic and silicate components for chemical analysis 08 p1179 A66-19095  
Bronzite and hypersthene chondrites, evaluating lunar or asteroidal origin 12 p1948 A66-23903  
Production rates of Cl 36 and Ar 39 in metallic and stone phases of Leedey chondrite 12 p1948 A66-23904  
Bjurböle chondrite and several separated phases, analyzed for rubidium-strontium age 14 p2388 A66-28338  
Iron and stony meteorite evolution, cosmic

radiation ages and space erosion model 14 p2390 A66-28409  
Neutron activation analysis of K-Ar age for Barwell, England olivine-hypersthene chondrite of December, 1965 16 p2807 A66-31760  
Amino acid content of carbonaceous and noncarbonaceous chondrites and possible origins 17 p2850 A66-32086  
Chemical analysis of stony meteorites with sharp boundaries between light and dark structure, noting differences found in achondrites and chondrites 17 p3007 A66-33281  
Chondritic meteorite chemical composition and fractional mechanisms in study of chondrite origin 17 p3015 A66-33430  
Melting of solid bodies in chondrule size, discussing accumulation mechanisms involving electrostatic acceleration and gas motions 18 p3225 A66-33622  
Chondrite meteorite that fell in Barwell, England, December 24, 1965, may have weighed 200 pounds before fragmentation, breakup occurred at extremely low altitude 18 p3228 A66-34053  
Cosmic radiation age spectrum of chondrites by calculation based on interplanetary erosion rate, discussing asteroidal origin for meteorites 18 p3232 A66-34528  
Rare gas mass spectrometric analysis of He, Ne and Ar in Bursa and Canakkale chondrites 20 p3651 A66-37578  
Cl, Br and I contents in carbonaceous chondrites measured by activation analysis 21 p3814 A66-39260  
Chondrules origin, discussing possible production by lightning in primitive Laplace type nebula 22 p3981 A66-40477  
Chainpur and similar, apparently primitive, chondritic meteorites may be precursors of ordinary chondrites 22 p3981 A66-40485  
Isotopic composition of xenon extracted from Ca-poor achondrites, noting relation between enstatite achondrites and enstatite chondrites 22 p3983 A66-40558  
Statistical petrographic analysis of meteorite and carbonaceous chondrite evolution on Moon and Mars from rocket photographs 23 p4132 A66-42075  
Amphoterite chondrite, St. Mesmin, noting primordial rare gases associated with dark portions 24 p4274 A66-42610  
Load pressures realized in early history of chondrites indicate parent body of lunar or half-lunar dimensions and formation from jadeditic pyroxene 24 p4279 A66-43023

**CHOPPER**  
Static drift in epitaxial planar silicon transistor choppers 01 p0035 A66-10208  
Chopper using complimentary transistors for converting DC voltage into square wave pulses 14 p2246 A66-26801  
Very low DC voltage measurement using chopper principle, based on resistance effect and employing magnetically controlled resistances 16 p2701 A66-30274  
Transformerless chopper built with integrated circuits, noting low power consumption, offset voltages and HF operation 16 p2661 A66-30660  
Current distribution and input resistance of T type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 23 p4045 A66-41457  
FET characteristics in chopping and analog switching applications 24 p4182 A66-42500

**CHORUS PHENOMENON**  
SA WHISTLER  
ULF radio emission of upper atmosphere and other related geophysical phenomena, analyzing hisses, choruses and contribution to Earth radiation belt 20 p3551 A66-37487

**CHROMATE**  
SA POTASSIUM CHROMATE  
Chromate waste treatment methods, noting hexavalent chromium reduction method and ion-exchange method 21 p3743 A66-38769

**CHROMATOGRAPHY**  
SA GAS CHROMATOGRAPHY  
SA THIN LAYER CHROMATOGRAPHY  
Split-stream chromatographic injection parameters including optimum component velocity, column flow, mixing tube cross section, etc 10 p1534 A66-21294  
Amino acids dissolved in saline waters

removed by ligand exchange chromatography 11 p1650 A66-23128  
Low temperature chromatographic separation of hydrogen isotopes based on interaction with alumina surface electric fields 11 p1650 A66-23209  
Wavefront shearing prism interferometer applied to testing of chromatic aberration of simple and compound lenses and waveforms characterizing monochromatic aberrations 14 p2291 A66-27319  
Chromatography on carboxymethyl cellulose to obtain fractions containing predominantly single bands of malate dehydrogenases 15 p2446 A66-28871  
Electrostatic theory of physical adsorption applied to gas-solid chromatography, discussing chromatographic inseparability of argon and oxygen at room temperature, prediction of elution order of many gases, etc 16 p2646 A66-30646  
Pressure gradient elution technique for rapid and quantitative chromatographic separation of purine and pyrimidine bases 22 p3860 A66-40402  
Achromatization of holograms using two-lens configuration 24 p4211 A66-42626  
Column chromatography used to determine hydrocarbons present in Moonie crude oil from Queensland, Australia, that is two hundred million years old 24 p4170 A66-43024

**CHROMIUM**  
Nickel-chromium base alloys considering aircraft and industrial gas turbine application 02 p0244 A66-11740  
Cr and Mn effects on aging mechanism and anticorrosion properties of Al-Zn-Mg alloys 03 p0381 A66-12723  
Visible spectrum absorption cross section of trivalent chromium in metastable 2E state of pink ruby 05 p0694 A66-14902  
Graphite and carbon steel case hardening by chromium 05 p0702 A66-15111  
Sintering and electroforming of complex shapes of pure chromium from hexavalent chromium bath with fluoride ions as catalyst 05 p0702 A66-15135  
Properties of chromium particles obtained by vaporization of metal in argon at low pressure, noting cubic shape, electron diffraction pattern, etc 06 p0894 A66-16185  
L-band traveling-wave maser for radio astronomy research at 21 cm uses chromium-doped rutile 06 p0891 A66-16640  
Resistive properties of vacuum-deposited chromium films determined by grain size and impurity content 07 p1098 A66-17741  
Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 07 p1049 A66-17901  
Electronic structure of refractory compounds based on X-ray study of chromium spectra 09 p1391 A66-20871  
Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587  
Values for contribution of core polarization to hyperfine structure of excited states of chromium compared theoretically and experimentally, extracting core contributions to magnetic field 13 p2135 A66-26268  
Layered film of Cr and NiFe exhibit biased hysteresis loop in easy axis direction and asymmetric hysteresis loops in hard axis direction 14 p2353 A66-26901  
Chromium doped ruby whiskers grown by vapor phase reaction, determining chromium concentrations, noting whisker growth morphologies 15 p2561 A66-28706  
Self-lubricating properties of composites of porous nickel and nickel-chromium alloy impregnated with barium fluoride-calcium fluoride eutectic [ASLE PAPER 66AM 1C2] 16 p2710 A66-30404  
Paramagnetic iron and chromium ion impurities effect on absorption spectrum and microhardness of rutile single crystals 16 p2786 A66-31733  
Hamiltonian describing EPR spectrum of trivalent chromium ion in ordered lithium-aluminum spinel and rhombic distortion causing deviation of axes in octahedron electric field 16 p2787 A66-31763  
Mass spectrometric measurement of distribution of spallation produced chromium nuclides between alloys in iron meteorite 17 p3007 A66-33282

Exchange pairs spectrum analysis based on observation of nonlinear splitting of EPR signals of pairs of exchange-coupled chromium ions in corundum 18 p3154 A66-33943

Minimum electric resistivity of chromium in antiferromagnetic state shows no disappearance in longitudinal magnetic field 19 p3444 A66-36071

Splitting of EPR lines of trivalent Cr ion in zinc tungstate by external electric field, noting angular dependence and corresponding spin Hamiltonians 20 p3615 A66-37370

L-band traveling wave maser using chromium doped rutile, discussing inverted susceptibility as figure of merit 20 p3580 A66-38239

Highly porous chromium materials prepared by sintering of powdered compacts in hydrogen atmosphere 21 p3752 A66-39401

Fractional metastable-state population measurements of Cr ions in ruby crystal under Q-switching operation 23 p4077 A66-41288

Time resolved emission measurements for Cr-Ar mixtures in three spectral regions and ionization occurrence in excited state inelastic collisions 23 p4033 A66-42083

**CHROMIUM ALLOY**

Polythermal and isothermal cross sections of phase diagram of titanium-niobium-chromium system at high temperatures 01 p0086 A66-10453

Polycrystalline niobium elastic properties and effects of alloying with chromium and iron 03 p0383 A66-13128

Molybdenum effect on properties of chromium-nickel alloy, noting hardness and strength 11 p1716 A66-22748

Nickel-chromium alloys with niobium in study of precipitation hardening and hardness 11 p1716 A66-22749

Structure and wear resistance of chromium-molybdenum deposits, noting parameters of electrolytic deposition, Amsler machine tests, etc [ONERA TP 319] 12 p1894 A66-24366

Chromium-vanadium alloys for brazing tungsten to molybdenum in engine application 13 p2087 A66-26020

High temperature oxidation of two ductile Cr-Ru alloys with composition near bcc alpha-phase solubility limit analyzed by four different techniques 16 p2721 A66-30220

Transformation process effect on superconducting behavior of titanium-chromium alloy 16 p2722 A66-30308

Precipitation behavior of nickel-molybdenum and nickel-molybdenum-chromium alloys 16 p2722 A66-30310

Trace element effect on lifetime of iron-chromium-aluminum heat-resisting alloy 16 p2723 A66-30311

Metastable phase composition diagram for alloys of titanium-chromium system 16 p2727 A66-31567

Electric resistance and thermal expansion of Ti-Nb-Cr alloys, noting phase composition 19 p3387 A66-36450

Nitrogen addition effect on heat resistance of chromium-manganese-austenitic alloys 20 p3584 A66-37695

Long-time relaxation persistence in heat resistant nickel-chromium alloy 20 p3584 A66-37696

Metallography, roentgenography and differential thermal analysis of composition temperature ranges of chromium-germanium phases 23 p4082 A66-41825

Magnetic transformation and effect of plastic strain on shear modulus of Fe-Cr-Ni alloys 24 p4227 A66-42310

**CHROMIUM CARBIDE**

Heat resistant chromium carbide coating with silicate binder applied to steel 06 p0896 A66-16609

Vapor composition, evaporation rate and vapor pressure above chromium carbides determined by effusion method combined with mass spectrometry 14 p2310 A66-26791

Solid solutions of titanium, tungsten, chromium prepared by carbidization of mixtures in hydrogen medium and obtained as fine-grained carbide powders 22 p3934 A66-39865

**CHROMIUM COMPOUND**

IR-active lattice vibrational spectra of

alpha-aluminum oxide and chromium oxide analyzed by reflection and transmission measurements 03 p0380 A66-12341

Isostructural and jadeite mineral called ureyite found as rare emerald-green grains in iron meteorites Coahuila, Toluca and Hex River Mountains 05 p0674 A66-15197

7P terms of excited chromium configurations examined, using level crossing and double resonance spectroscopy, noting core polarization 13 p2135 A66-26267

Inverted susceptibility, inversion ratio, line widths and spin-lattice relaxation times for maser operation point in chromium-doped cobalt potassium cyanate 18 p2718 A66-30934

**CHROMIUM STEEL**

Corrosion resistance and anodic behavior of Kh18N9 steels with various nickel-manganese-carbon-titanium contents 01 p0088 A66-10987

Brittle creep susceptibility of heat resistant chromium steels reduced by proper thermal treatment 03 p0384 A66-13162

Design properties, application and fabricability of super 12-Cr steels 04 p0535 A66-13638

Chromium nickel steel hardening as result of martensitic transformation and aging 05 p0701 A66-14861

Super chromium steel survey, including applications in gas turbines and aerospace industries, physical and mechanical properties, thermal stability, corrosion resistance, etc 09 p1387 A66-19953

Alloying elements effect on anodic corrosion and passivation of stainless steels 09 p1390 A66-20837

Endurance and creep of chromium steels with extended thermal treatment 11 p1716 A66-22746

Chromium steel strength and corrosion resistance improvement by molybdenum and tungsten addition 11 p1716 A66-22747

Phase composition effect on relaxation stability of chromium steel used for helical spring 11 p1716 A66-22750

Effect of molybdenum, niobium and tungsten on structure and properties of nitrogen containing austenitic chromium-manganese steels 12 p1893 A66-23726

**CHROMOSOME**

**SA BIOLOGICAL CELL**

**SA GENETICS**

Chromosome configuration and mitosis impairment in micropores Tradescantia paludosa due to space flight effects of Voskhod I 11 p1645 A66-23050

Chromosome injury in mouse bone marrow due to distant ionizing radiation 12 p1806 A66-24396

Radiosensitivity differences in yeast cells in terms of differences in chromosome-replication and genetic-structure-restitution intensities 15 p2438 A66-29486

Vibration effects on chromosomes of Tradescantia paludosa and other micropores subjected to Vostok satellite conditions 18 p3058 A66-33781

**CHROMOSPHERE**

Chromospheric emission lines of magnesium iodine analyzed, calculating hydrogen concentration and ionization degree at 1000 km 01 p0134 A66-10269

Electron concentration, length and temperature of limb chromospheric flare, using steady state equation of hydrogen atom 01 p0131 A66-10270

H-line of calcium ion analyzed from spectrograms of chromospheric spicules 01 p0131 A66-10277

Chromospheric and coronal propagation of disturbing agents generating changes in intensity of solar radio emission 02 p0287 A66-11489

Spicules of solar chromospheric disk identified in H-alpha line 02 p0292 A66-12190

Quiet chromosphere and corona noting line intensity and coronal electron and kinetic temperature 03 p0420 A66-12841

Cooling of lower chromosphere contributed to radiation in individual spectral lines 03 p0427 A66-12915

Spectroscopic observation of chromospheric limb structure 03 p0428 A66-13112

Appearance of active regions of Sun associated with 10 to 20 percent increase in convection velocity 05 p0761 A66-15091

Relation between Forbush decreases and

chromospheric flares, obtaining longitudinal distributions before and after onset, using statistics 05 p0753 A66-15394

Motion of material in solar atmosphere, analyzing horizontal inhomogeneities necessary in understanding energy transfer from granulation layer into chromosphere 07 p1138 A66-18076

Sunspot activity in quiet part of Sun between spot areas related to solar chromosphere structure 10 p1604 A66-21133

Solar chromosphere observations in 1960-1963 by Istanbul University, noting flares, filaments, observation duration, etc 10 p1609 A66-21833

Synoptic chart of chromosphere and sunspots, discussing coordinate systems, faculae, solar filaments, etc 12 p1948 A66-23910

Small two-dimensional oscillations in XY plane for isothermal magnetosphere in uniform gravitational field, postulating Boltzmann equilibrium density distribution 12 p1943 A66-24282

Properties of stellar chromospheres 13 p2177 A66-25134

Macroscopic inhomogeneities in solar atmosphere, noting vertical velocity fluctuations in chromosphere, oscillation spectrum, etc 13 p2183 A66-25616

Gamma photon flux from solar Na 22 disintegration emitted by Sun after chromospheric eruption 13 p2176 A66-26760

Cooling of lower chromosphere contributed to radiation in individual spectral lines 14 p2380 A66-27264

Solar prominences, proton flares and chromospheric flares in intensity of corona and solar radio emission and sunspots, noting maxima during eleven-year solar activity cycle 15 p2576 A66-29136

Chromospheric eruption distribution in time 18 p3228 A66-33912

Statistical correlation between decameter type III and type III/V solar radio bursts and microwave bursts and chromospheric flares 18 p3234 A66-34615

Magnesium 3 line profiles observed on solar disk and chromosphere used in determining empirical source function variations and chromospheric profiles 19 p3465 A66-36611

Barium ion concentration computed from Ba II 4554 angstrom line and Lyman alpha radiation intensity in lower chromosphere 20 p3646 A66-37013

Intensity and center-to-limb variation of continuous solar spectrum for several models of chromosphere 20 p3650 A66-37340

Thermal instability of small amplitude disturbances in solar chromosphere, showing linear wave amplification 20 p3654 A66-38019

Solar chromosphere observations, noting distribution of spicules and role in coronal heating 20 p3656 A66-38051

Emission rim formation at filaments caused by chromospheric excitation by radiation reflected from filament 23 p4126 A66-41077

Excitation of H-alpha lines in solar chromosphere from internal and external sources, noting theoretical and empiric results 23 p4127 A66-41080

**CHRONOTRON**

**SA PULSE RATE**

**SA TIME DELAY**

Feedback to quadrupole that incorporates device for converting voltage into time parameter of periodic sequence of pulses and vice versa 11 p1671 A66-23334

Feedback to quadrupole that incorporates device for converting voltage into time parameter of periodic sequence of pulses and vice versa 22 p3877 A66-40414

**CINEFLUOROGRAPHY**

X-ray image intensifier in conjunction with motion picture film sequencing of thrust chamber image during hot firing to obtain failure analysis data 13 p2079 A66-25819

**CINEMATOGRAPHY**

**SA LUNAR CINEMATOGRAPHY**

Cinematographic system in which capacitor-discharge pulses are substitutes for high speed shutter 03 p0368 A66-12465

Microscope modification for time-lapse cinematography noting holding camera stand, deflecting light mirror, culture chamber,

etc. 05 p0677 A66-14865  
 High velocity motions in solar flares, using high time-resolution monochromatic cinematography 07 p1130 A66-18074  
 Low speed flow visualization technique using light-pulse illuminated plastic particles suspended in revolving bowl of brine 09 p1364 A66-20399  
 Cinephotomicrographic studies of metallized fuel-rich propellants with high aluminum powder content, discussing composition, burning rates, etc [AIAA PAPER 66-616] 18 p3162 A66-34433

**CIRCADIAN RHYTHM**  
 Geomagnetic micropulsations, noting diurnal patterns of phase difference, propagation medium dispersive characteristics, signal velocities, etc 10 p1529 A66-21151  
 Thermal events in diurnal breathing cycle and vapor loss reduction in volatile liquid storage [AICE PREPRINT 11C] 10 p1521 A66-21181  
 Primary shift of phase of circadian periodicity effected by time displacement for physiological functions 19 p3285 A66-36374  
 Radio telemetry for acquisition of Circadian rhythm data on ambulatory animal, including deep body temperature, heart rate, locomotor activity and oviposition 22 p3856 A66-39792

**CIRCLE**  
 SA MOHR CIRCLE  
 SA RING  
 Circle and sphere theorems for biharmonic equation and application to displacement field of stressed plate under pure bending, noting singularities 01 p0093 A66-10427

**CIRCUIT**  
 SA BISTABLE CIRCUIT  
 SA EXPLODING CONDUCTOR CIRCUIT  
 SA FLIP-FLOP  
 SA INDUCTOR  
 SA INTEGRATED CIRCUIT  
 SA LC CIRCUIT  
 SA LINEAR CIRCUIT  
 SA LOGIC CIRCUIT  
 SA LOOP  
 SA MAGNETIC CIRCUIT  
 SA MICROCIRCUIT  
 SA MICROWAVE CIRCUIT  
 SA PHASE DETECTOR  
 SA PNEUMATIC CIRCUIT  
 SA PRINTED CIRCUIT  
 SA RLC CIRCUIT  
 SA SHORT CIRCUIT  
 SA SWITCHING CIRCUIT  
 SA TRANSISTOR CIRCUIT  
 SA VARACTOR DIODE CIRCUIT  
 SA WIRE BRIDGE CIRCUIT  
 Plotting and analysis of oriented graphs of electrical circuits of any complexity by considering them as N poles 01 p0050 A66-10218  
 Determination of output voltage of square law device ascertained from input voltage 01 p0050 A66-10221  
 Two-parabola type multiplying circuit constructed on principle of z plane consisting of linear superposition of at least two substitute planes 01 p0043 A66-10879  
 Circuit application of diode matrix memory for permanent information storage in computers 01 p0049 A66-11150  
 Gain-bandwidth limitations for physically realizable systems obtained in integral form by employing generalized representation theorem for bounded-real functions 02 p0208 A66-11904  
 Bandwidth expansion of crystal filters by spacing frequency response characteristics in relay circuit at suitable distances from each other 03 p0342 A66-12895  
 High stability control circuit operating tuning fork in constant amplitude self-excitation circuit, using mechanical oscillator excited by fundamental wave of amplified feedback voltage 03 p0371 A66-13243  
 Theory of poles and zeros applied to nonlinear networks, discussing shift 04 p0502 A66-13383  
 Linear system using differential circuits for indirect measurement of perturbations 04 p0503 A66-13771  
 Automatic pulse shaper circuits at pulse length independent of input signal amplitude 04 p0495 A66-13886

Zero conversion loss obtained for certain frequency change using second-order ideal ring modulator with reactive idler circuit at normal output terminals 04 p0500 A66-14094  
 Photovoltaic effect and principles upon which operation of photodiodes are based, including analysis of photovoltaic circuits to determine operating parameters 04 p0524 A66-14456  
 Circuit response to HF circuits for transistorized amplifiers determined, using polar diagram, noting feedback effect and vectorial analysis 05 p0647 A66-14681  
 Hyperfrequency parametric amplifier circuit with modulation-demodulation applicable to very rapid pulse transmission 05 p0633 A66-15102  
 Operating principles of pulse and frequency modulation, using step-recovery diodes as circuit elements 05 p0651 A66-15835  
 Discrete simulation technique using electrical circuit for finite-difference approximation of initial differential equations, noting functional potentiometers 07 p1055 A66-17201  
 Amplitude modulated carrier frequency signal circuit analyzed, showing open loop linear pulse system 07 p1014 A66-17439  
 Discontinuous system investigated, using oscillating circuit governed by second order differential equation 07 p1015 A66-17830  
 Waveguide resonators equivalent to series circuit, obtaining expressions for various parameters 08 p1192 A66-19105  
 One-, two- and three-circuit systems with periodically varying inductance, capacitance and resistance influencing energy transfer, noting application to amplifier design 09 p1363 A66-20782  
 Filter with two tuned circuits and distributed coupling based on equations for complex values of tuned circuit currents, noting formulas for mutual impedance 10 p1510 A66-21673  
 Comparing basic parameters of common high power pulse-transformer circuits, considering parasitic time constants and winding impedance 10 p1511 A66-21680  
 Radio waves and circuits - URSI Conference, Tokyo, September 1963 11 p1653 A66-22626  
 Nonlinear systems including oscillators, frequency multipliers, limiters, etc, driven by periodic carrier, deriving circuit theory for small perturbations propagated throughout system 12 p1848 A66-24136  
 Three-phase half-wave inverter circuit consisting of ring of three SCRs and converting DC into AC power supplied into zigzag motor load 12 p1804 A66-24662  
 Vacuum-evaporation method of fabricating thin film circuits, using resistance-heating process or electron beam gun 12 p1847 A66-24954  
 Low energy independent-discharge three-element sputtering system and use in thin film fabrication 12 p1847 A66-24955  
 Tachometer measuring angular velocity from time of definite number of rotations, noting diagram of basic circuit 13 p2077 A66-25327  
 Parameter indeterminacy in system identification for mathematical model with adjustable parameters matched to system output by feedback 13 p2054 A66-26091  
 Magnetic amplifier telemetry encoder circuit, using silicon controlled rectifiers /SCR/, for application in satellites and rockets 14 p2263 A66-27062  
 Behavior of resonator quantum devices, using oscillating circuit with quasi-linear negative conductance 14 p2260 A66-28167  
 Auto-oscillations in relay systems, discussing parameters, stability region boundaries and clearance effect 15 p2469 A66-28550  
 Asymptotic methods of nonlinear mechanics, involving averaging for differential equations, applied to motion equations of satellites and resonance in electric circuits 15 p2541 A66-29162  
 Automatic pulse shaper circuits at pulse length independent of input signal amplitude 15 p2466 A66-29698  
 Evolution and present status of electronic circuit components including manufacturing and component

applications 15 p2468 A66-29890  
 Plotting and analysis of oriented graphs of electrical circuits of any complexity by considering them as N poles 17 p2898 A66-31901  
 Determination of output voltage of square law device ascertained from input voltage 17 p2898 A66-31905  
 Bandpass filter design with three coupled circuit and determination of amplitude curve and circuit 17 p2895 A66-33243  
 constants 17 p2895 A66-33243  
 Parametric amplifier based on two-port circuit, employing idler frequency equal to difference between pump and signal frequency, noting negative resistance 18 p3086 A66-34391  
 Noise characteristics at integrator input in nonstationary regime 19 p3311 A66-35297  
 Circuitry of automatic surface tension measurement device 20 p3559 A66-37502  
 Fluid circuit theory, discussing transmission lines, matching, pulse forming and definitions of current and voltage analogies 20 p3500 A66-37643  
 Electric analog approximation of static and dynamic performance of Kearfott ball valve switching device, discussing application to complex circuit design 20 p3501 A66-37650  
 Measurement of physical quantity converted to form of AC signal, noting ripple-free circuit and several clamping arrangements 21 p3709 A66-38606  
 One-, two- and three-circuit systems with periodically varying inductance, capacitance and resistance influencing energy transfer, noting application to amplifier design 22 p3884 A66-39841  
 Man-machine merger in computer aided design of circuits, examining changes in circuit parameters caused by component tolerances, simulation of component failure, feasibility and circuit optimization 23 p4072 A66-41252  
 Three-circuit system with circuits connected by nonlinear capacitance applied to frequency converters, amplifiers, etc 23 p4049 A66-41565  
 MOS equivalent circuit for small signal HF operation of insulated gate field effect transistor in pinch-off mode, using differential equation 24 p4183 A66-42638

**CIRCUIT BOARD**  
 Thermal compression bond failures in internal electric interconnects on circuit boards of advanced Minuteman guidance system 01 p0049 A66-11152  
 Carrier-mother board rack approach to microcircuit interconnection and packaging 02 p0195 A66-11322  
 Automated flat pack welding design, discussing operational functions and major components 02 p0234 A66-11323  
 Multilayer printed wiring for reliable Pershing module program 02 p0197 A66-11461  
 Integrated logic circuit design through breadboard, model assembly, system development, final layout, construction and testing 02 p0204 A66-11939  
 Thin copper clad laminates and problems arising in application to multilayer printed circuit boards 03 p0347 A66-13330  
 Multilayer circuit boards for interconnecting integrated circuits in computer and other large systems 04 p0498 A66-14015  
 Multilayer circuit board defect detection and repairing using computer-controlled IR radiometer 04 p0498 A66-14016  
 Digital systems research model design containing logic gates in integrated circuit packages 09 p1356 A66-20676  
 Breadboard microwave pointing device with attached RF source comprising azimuth angle measuring system, with application in geodesy, tropospheric propagation, etc 10 p1538 A66-22048  
 Protective coating of printed circuit assemblies against humidity, salt spray and other adverse environmental factors 11 p1665 A66-22679  
 Table of interconnecting device for use with printed circuit board 13 p2043 A66-26309  
 Ministick packaging system for integrated circuits 14 p2249 A66-27109  
 Multilayer printed circuits and interconnection methods 15 p2465 A66-29668

Integrated circuit connecting and packing, discussing cost flexibility and performance characteristics 18 p3086 A66-34399

**CIRCUIT PROTECTION**

Fuel cell reliability maximized and weight minimized for space mission power requirement [AIAA PAPER 64-746] 13 p2007 A66-26647

Circuit overloading protection using automatic reset, breakers and fuses 14 p2249 A66-27120

Thermal analysis of ceramic-based hybrid microcircuits, using lumped-constant electrical analog 16 p2667 A66-31594

**CIRCUIT RELIABILITY**

System reliability prediction limited when it does not take into account out-of-tolerance operation due to component variation with environmental changes, electric stresses and aging 01 p0167 A66-10055

Stress survival matrix test in evaluating reliability of monolithic silicon integrated circuit, measuring safety margin and performance parameter drift 01 p0035 A66-10082

Reliability and design factors for space power conditioning equipment examining peak power, component part specifications, integrated circuits and failure analysis 02 p0180 A66-11283

High-reliability microwave printed circuits using copper-clad polyethylene dielectric materials 02 p0195 A66-11288

Miniaturization in improving weapon system component availability, transportability and reliability 02 p0198 A66-11464

Packaging techniques interrelated with design specification and manufacturing capabilities noting integrated circuit system, circuit reliability and thermal resistance 02 p0200 A66-11891

Microminiaturization, three-dimensional stacking, ceramic printed, thin film, hybrid and integrated circuits, discussing reduction in system size, weight and primary power requirement and improved reliability 03 p0343 A66-13001

Linear integrated circuits discussing differential and operational amplifiers, development, use, capabilities, new techniques, special designs and reliability 03 p0347 A66-13340

Avionics design using integrated electronics or microelectronics, noting reduction of maintenance requirements 04 p0494 A66-13684

High performance operational amplifier design, discussing monolithic circuit construction and performance parameters 05 p0642 A66-14567

Reliability of integrated circuits noting stress test schedules, failure rates and sources 05 p0650 A66-15369

Radiation test data on solid state equipment of tracking and command system in SNAP-10A environment 05 p0740 A66-15495

Yields, costs and reliability of monolithic integrated circuits 05 p0650 A66-15496

Thermionic reactor network reliability as function matrix network and converter reliability 05 p0623 A66-15596

Reliability, life and relevance of circuit design in electromechanical switching devices 06 p0839 A66-15946

Predictions of future trends of reliability engineering, with particular reference to impact of microelectronics 06 p0839 A66-15952

Reliability of integrated circuits 06 p0856 A66-16925

Algorithm synthesizing sequential circuit from transition matrix, making critical races occurrence impossible during simultaneous relays starting 07 p1013 A66-17384

Reliability of logical elements and systems with given probabilities of individual elements 07 p1013 A66-17387

Determination of length of deductive circuits of recycling memories and oscillators 09 p1352 A66-20357

Integrated circuit reliability control and determination 09 p1354 A66-20565

Convergence, oscillation, functional stability and reliability of m-by-1 homogeneous polyfunctional nets under

iteration 10 p1517 A66-21691

Redundant microelectronic system and reliability 11 p1661 A66-22272

Time to failure and mean recovery time calculated for system with recoverable elements 11 p1667 A66-22787

Reliability and failure mechanisms of integrated circuits 11 p1669 A66-23158

Current mode technique for worst-case design analysis of electronic networks 11 p1678 A66-23179

Reliability, life and relevance of circuit design in electromechanical switching devices 12 p1831 A66-23791

Reliability technique viewed as broad discipline encompassing entire field of traditional design, production and maintenance 12 p1832 A66-24071

Redundancy method based on circuit failure asymmetries for reliability improvement in digital circuits 12 p1842 A66-24668

Reliability improvement through redundancy at various system levels in analog systems 12 p1844 A66-24733

Metal oxide silicon integrated circuits subsystem size, weight, power and cost compared with double diffused counterpart 12 p1845 A66-24848

Properly controlled high-stress life testing used to evaluate failure rate of high reliability solid state components of integrated circuits 12 p1846 A66-24913

Yield and reliability of integrated electronic devices and electronic digital systems, using redundant components by triplicating voting 12 p1846 A66-24914

Optimum tests for check of working order of system with minimal material losses of safe or fault system functioning 13 p2045 A66-25298

Near minimal set of tests detecting all single faults in combinational logic net, using shortcut methods 13 p2040 A66-25804

Book on measurement of specific electronic parameters in circuit design 13 p2042 A66-26121

Reliability assessment techniques for microelectronics, considering integrated circuits, testing procedures, etc 13 p2043 A66-26226

Reliability improvement in airborne electronic equipment 13 p2044 A66-26692

Tolerance range of multicomponent circuit calculated from tolerance limit of individual component 15 p2474 A66-29766

Tolerance limits for structural components in power-filter circuit design, calculating fluctuations of damping property and phase fluctuations in multiply divided circuits 16 p2663 A66-31031

Discoloration in contamination area of aluminum bonds in integrated circuits, noting cause and effect on interconnection bond integrity 16 p2665 A66-31434

Nomograms published in Electronic Design from 1963 to 1966 covering prototype, testing, costs, selection and avoidance of pitfalls 17 p2881 A66-32103

Step-stress technique to induce failures in integrated circuits to pinpoint source of reliability problems 17 p2882 A66-32114

Approximation technique for flow graph that eliminates nonessential equivalent circuit elements, providing for derivation of most concise model with preassigned accuracy 18 p3092 A66-35040

Book on feedback circuit analysis covering circuit stability, closed loop transient response, frequency response, compensating networks, etc 20 p3537 A66-37047

Time to failure and mean recovery time calculated for system with recoverable elements 20 p3525 A66-37127

Silicon nitride as possible replacement for silicon dioxide in highly stable and reliable semiconductor devices, especially insulated-gate field effect transistor circuits 21 p3710 A66-38827

Rake system equipment for tropospheric scatter, noting delay-resolution capabilities and circuit stability 22 p3865 A66-40067

Specification and assessment of electronic equipment reliability, emphasizing statistical aspects of optimal cost/reliability estimation 22 p3883 A66-40961

Microcircuit joints evaluated, using

metallurgical process 23 p4072 A66-41192

Face-bonding technique for attaching semiconductor chips to thin film or similar circuits 23 p4043 A66-41193

Miniature welding of joints, discussing wire-to-wire welding and advantages over soldered connections in light of environmental parameters 23 p4043 A66-41195

Weld quality control in cross wire welding of assemblies in circuit small quantity manufacture 23 p4044 A66-41196

Optimum use of microelectronic reliability data in system development, discussing relation to sources 24 p4179 A66-42099

**CIRCULAR CONE**

Collisionless plasma flow over cone when flow velocity is greater than ion wave speed [AIAA PAPER 65-125] 02 p0267 A66-11534

Dissociation or ionization effects of air on inviscid hypersonic flow past circular cone with attached shock wave 03 p0316 A66-12928

Tropospheric scatter common volume, describing derivation for two intersecting circular cones 06 p0833 A66-16682

Directional radiative characteristics of conical cavities and relation to reflective characteristics of Moon 07 p1136 A66-17729

Flow properties in turbulent near wake of circular and elliptic cones at zero angle of attack in Mach 6 flow [AIAA PAPER 66-54] 07 p0980 A66-17897

Ideal gas flow past infinite circular cone at angle of attack, noting finite-difference method for self-similar solution of Prandtl boundary layer equation 14 p2222 A66-28283

Natural frequencies of torsional vibrations of circular cone possessing cylindrical anisotropy 16 p2823 A66-31633

Inviscid hypersonic flow past circular cone at finite angle of attack with attached shock wave in presence of dissociation air behind shock wave 17 p2837 A66-32033

Static pitching moment coefficient determination from location of center of pressure in right circular cone, using Newtonian impact mechanics 17 p2840 A66-32494

Head wave of frictionless flow of real gas past positioned circular cone for small or zero angles of attack 17 p2842 A66-33169

Tangent cone method extended to determine pressure coefficients of yawed circular cones and ogives at angle of attack 18 p3048 A66-33820

Inviscid hypersonic nonequilibrium flow of three-component gas past circular cone, using exact reaction-rate equations to correct solution first obtained from approximate equations 21 p3693 A66-38711

Perturbation analysis of radiative cooling in shock layers and radiative heat transfer effects on hypersonic flow over wedge and circular cone 23 p4011 A66-41882

**CIRCULAR CYLINDER**

Stress distribution in symmetrically loaded circular cylinders obtained by solving directly equilibrium and compatibility equations 01 p0151 A66-10202

Vorticity distribution in wake of circular cylinder oscillating in unperturbed flow, using Burger linearization of Navier-Stokes equations 01 p0007 A66-10715

Vortex streets behind circular cylinders and flat plates analyzed, using photography and hot wire techniques, noting role of walls and wakes 03 p0354 A66-12321

Torsion problem of nonhomogeneous infinite circular cylinder with symmetrically located spherical cavity 03 p0442 A66-13302

Turbulence wake suppression in Karman vortex street of circular cylinders by controlling transverse oscillations of vortex generating cylinder in transition range 04 p0453 A66-13514

Cyclic edge loading effect on circular reinforced cylindrical shells 04 p0589 A66-14147

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26] 05 p0778 A66-15447

Propagation in rectangular and circular cylindrical waveguide containing inhomogeneous dielectric varying linearly and quadratically 06 p0848 A66-16108

Heat conduction for solid circular cylinder with nonuniform boundary conditions 06 p0970 A66-16327

Rotating non-Newtonian fluid, discussing stabilizing and destabilizing effect of circular magnetic field for cross-viscous parameter variation 07 p1019 A66-17259

Flow of compressible fluid about circular cylinder at Mach number less than unity solved, using small parameter method 08 p1161 A66-18608

Perturbation solutions of stress and deformation problems for homogeneous anisotropic shells constructed from orthotropic material [AIAA PAPER 66-141] 08 p1309 A66-19004

Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 08 p1247 A66-19304

Thermal stresses due to axisymmetric heat flow past spherical cavity inside long circular cylinder solved by stress functions and thermoelastic displacement potentials 08 p1313 A66-19547

Resistance due to viscous shear on circular cylinder in oscillating stream calculated by boundary layer equations formulated in polar coordinates 09 p1367 A66-20262

Cross flow relation to force distribution on circular cylinders curved in plane containing wind vector at subcritical Reynolds number 09 p1328 A66-20746

Elastic general instability collapse pressure of ring-reinforced circular cylindrical shell subjected to uniform external pressure 10 p1613 A66-21318

Electromagnetic scattering by cylinder with inhomogeneous sheath 11 p1652 A66-22392

Leading edge pressure distributions measured on circular cylinders in normal cross flow, obtaining data from tests in arc-heated perfect gas and variable atmosphere wind tunnels 11 p1686 A66-22845

Transport properties, thermoconductivity, molecular collision and viscosity of polyatomic gas of circular cylindrical molecules with hemispherical caps 11 p1741 A66-23215

Stability and buckling of core-filled axially compressed circular cylinder 12 p1957 A66-23603

Elastico-viscosity, cross-viscosity and suction variation effects on rheological behavior of fluid moving steadily past porous circular cylinder and between two coaxial right circular cylinders 12 p1865 A66-24808

Lift, drag and inertial forces due to uniform unsteady flow with constant acceleration past fixed circular cylinder, determining vorticity flux 13 p1993 A66-26705

Shock tube study of high temperature gas flow around circular cylinders caused by electrical discharge 14 p2218 A66-27348

Stresses and displacements in circular cylinder of transversely isotropic material for mixed boundary conditions, obtaining solution by using partial differential equation 14 p2397 A66-27388

Yaw effect on vortex shedding from circular cylinder at low Reynolds number 14 p2219 A66-27440

Normally incident plane electromagnetic wave scattering by circular cylinder coated with radially stratified sheath 14 p2238 A66-27587

Strouhal number relation to cavitation erosion effect of circular cylinder models placed in closed circuit channel, in critical and supercritical Reynolds number range 14 p2275 A66-27634

Scattering of plane electromagnetic wave at infinite circular cylinder with spatially varying dielectric constant 14 p2242 A66-28155

Hooke law analysis of dynamic stability of closed circular cylindrical anisotropic shell compressed by longitudinal force 15 p2609 A66-29196

Torsion of hollow circular cylinder, consisting of arbitrary number of cylindrically orthotropic layers, by stress exerted on cylindrical boundary 15 p2613 A66-29432

Plane rotational motion of incompressible fluids in presence of homogeneous porous circular cylinder 15 p2481 A66-29856

Subsonic flow around circular cylinders using three alternate hodographic approximations to Chaplygin law 16 p2627 A66-30208

Planar subsonic flow around circular cylinder using Kisseleff approximation method for compressible fluid 16 p2627 A66-30210

Natural oscillations of three-layer circular cylindrical shells with freely supported and clamped edges 16 p2818 A66-31056

Variational solution of simultaneous stability equations boundary value problem for transverse displacements and stress state 16 p2819 A66-31137

Local heat transfer rates and pressure distributions over windward half of yawed circular cylinder at Mach 8 16 p2630 A66-31254

Strouhal and Reynolds numbers relation from data on vortex streets of circular cylinder in two-dimensional flow 16 p2688 A66-31299

Velocity spikes in near-wake of circular cylinders held transversely to air stream 16 p2690 A66-31654

Three dimensional character of wake of circular cylinder at three Reynolds numbers utilizing hot wire anemometers 16 p2632 A66-31659

Plane electromagnetic wave diffraction at two parallel circular cylinders for TM and TE polarization 17 p2879 A66-31862

Thermal stresses in anisotropic hollow cylinder by arbitrary radial temperature distribution 17 p3020 A66-31997

Two-dimensional excitation problem of circular cylinder with surface impedance varying over cylinder circumference 17 p2874 A66-32247

Stress-strain law and finite torsion of homogeneous circular cylinder, noting deformation and force needed to keep final state of body in equilibrium 17 p3025 A66-32499

Laminar boundary layer on cylinder with symmetric cross section bounded by two equal circular arcs 17 p2911 A66-32837

Finite-difference calculation of MHD flow of conducting fluid past circular cylinder in transverse magnetic field based on Navier-Stokes equation 17 p2971 A66-32862

Implicit finite difference method applied to plane hypersonic flow over blunt circular cylinder 17 p2842 A66-33170

Torsion of nonlinear viscoelastic circular cylinder in terms of stress tensors prescribed by time-functionals of finite strains 17 p3032 A66-33332

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26] 18 p3248 A66-33582

Variational formulation of equilibrium stability of nonlinear elastic circular cylindrical panel under radial stress 18 p3251 A66-33704

Forced convection heat transfer coefficient of single pin fixed on plate, deriving expression for case corresponding to infinite circular cylinder 18 p3266 A66-34647

Conducting nonmagnetic circular cylinder supported on magnetic field produced by alternating current 19 p3324 A66-35729

Navier-Stokes equations solutions for incompressible fluid representing boundary layer flows with suction along corners of cylindrical bodies 19 p3341 A66-35855

Critical condition for aerosol deposition from symmetrical flow past solid body, considering case of circular cylinder 19 p3393 A66-36041

Bending of plane electromagnetic waves around elliptically ideally conducting cylinder of infinite length and around parallel circular dielectric cylinder, with solution as Mathieu-type series 19 p3303 A66-36064

Comparison of characteristic roots arising from Fluegge and Donnell theories, when certain amount of axial prestress is imposed on circular cylinder 19 p3474 A66-36345

Arbitrary motion of circular cylinder in ideal fluid near wall, using Fourier series 19 p3342 A66-36468

Pulsating laminar flow of viscous incompressible conducting fluid in annular channel between circular cylinders under radial magnetic field, solving MHD equations 19 p3432 A66-36643

Approximate solution for dipole radiator field in space containing two conducting long cylinders with parallel axes 20 p3512 A66-37146

Total cross sections for arbitrarily oriented dielectric circular cylinders used in obtaining extinction and polarization by realistically oriented interstellar particles, noting refractive index 20 p3649 A66-37325

Frequency of wake shedding from circular cylinder in water flow with values above critical Reynolds number, noting eddy generation and drag coefficient dependence on cavitation number 20 p3548 A66-38012

Thermoelastic stresses in elastic strips and cylinders, computing numerical value along axes and centers of elements 21 p3826 A66-38590

Velocity field and suction effects on viscoelastic flow past porous circular cylinder 21 p3724 A66-38709

Axisymmetric temperature field determination in cylindrical bodies 21 p3835 A66-38908

Dissociation of hypersonic airflow past circular cylinder at zero angle of incidence 21 p3695 A66-39230

Influence coefficients for semiinfinite and infinite circular cylindrical elastic shell subject to self-equilibrating edge loads 22 p3995 A66-40451

Instability of long thin circular cylinders under axial compression, bending, torsion, shear and external pressure [ICAS PAPER 66-32] 22 p3996 A66-40663

Slow steady flow of viscous incompressible fluid between two coaxial circular cylinders with axial roughness 23 p4054 A66-41122

Scattering of plane elastic compressional pulse by circular cylindrical cavity in infinite homogeneous isotropic linear elastic solid 23 p4145 A66-41984

Slow steady viscous flow through annulus between porous circular cylinders with uniform arbitrary injection and suction velocities, calculating wall porosity effect on velocity and pressure distributions 24 p4193 A66-42156

Plane stationary elastic wave diffraction by stress-free circular cylinder, noting cylindrical cavity case 24 p4175 A66-42841

**CIRCULAR ORBIT**

Optimal rotation of plane of circular orbit by transverse thrust force, deriving differential equations for rotational maneuver 02 p0289 A66-11653

Circular orbit effect on asymptotically stable stationary rotations of axisymmetrical satellite 03 p0430 A66-12485

First-order perigee to perigee changes in nonequatorial orbital elements due to spherical, rotational, exponential, time-invariant atmospheric drag 06 p0955 A66-16909

First-order perturbation solution to problem of minimum-fuel orbit transfer in form of equal slope guidance constraint [AIAA PAPER 66-11] 07 p1137 A66-17883

Trajectory analysis and Birkhoff rings in restricted three-body problem in three-dimensional coordinate system 09 p1453 A66-20251

Approximative analysis of spacecraft trajectories in circular extra-atmospheric anaorbital flight 09 p1457 A66-20574

Optimum impulsive transfer between elliptic and noncoplanar circular orbits, noting paths with up to three apsidal impulses 09 p1459 A66-20884

Gravitational perturbations of circular satellite orbit [AIAA PAPER 65-550] 14 p2381 A66-27418

Plane change split techniques for circularly orbiting satellite by aerodynamic propulsive and impulsive maneuvers 14 p2384 A66-27894

Perturbation of near circular orbits by Earth gravitational potential 17 p3005 A66-32997

Nonlinear control laws for takeoff and landing of circular-orbit winged glide space vehicle 18 p3132 A66-33880

Torque on rigid body in circular orbit in gravitational central field derived, using

body-centered coordinate system aligned with gravity gradient  
vector 18 p3237 A66-35030  
Infinitesimal economic pulse transfers between quasi-circular noncoplanar orbits 19 p3459 A66-35583  
Derivative-expansion method of first-order asymptotic expansion of takeoff of satellite from circular orbit by small thrust inclined at finite angle to radius vector [AIAA PAPER 65-688] 19 p3462 A66-35894  
Time of rendezvous of two satellites, one on circular and one on elliptical orbit 19 p3470 A66-36247  
Rendezvous maneuver with effect of velocity changes on orbital transfer of near-Earth satellite 20 p3663 A66-37532  
Optimum trajectories between material points moving along same orbit in gravitational field of spherically symmetric central body, obtaining numerical solutions for circular initial orbit 22 p3980 A66-40462

**CIRCULAR PLATE**  
Bending problem of circular orthotropic plate on elastic base under axisymmetric load 01 p0153 A66-10467  
Flexible satellite attitude control, analyzing satellite as thin circular plate with application to radio telescopes, noting vibration modes and nonlinear gyroscopic coupling terms 01 p0142 A66-10674  
Characteristics of flexible circular plate, considering stress and strain in friction zone at clamped section 01 p0160 A66-11181  
Plate theory for case of thin elastic deformable circular plate under rotationally symmetrical stress 02 p0296 A66-11243  
Large deflection analysis of circular ring plates under uniform transverse force along inner edge 02 p0298 A66-11584  
Circular and annular plates calculated by method of networks using polar coordinates 03 p0439 A66-13125  
Large deflection analysis of elliptical plate of lenticular section subjected to uniform temperature gradient through thickness 03 p0440 A66-13271  
Minimum weight circular plate under two independent systems of loading, noting Tresca yield condition 04 p0587 A66-13487  
Poisson-Kirchhoff plate theory for axisymmetric motions of circular elastic plates [ASME PAPER 65-APMW-7] 04 p0591 A66-14213  
Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 04 p0593 A66-14234  
Plane disk design calculations for uniform strength under asymmetric and axisymmetric load 07 p1038 A66-18096  
Poisson-Kirchhoff plate theory for axisymmetric motions of circular elastic plates [ASME PAPER 65-APMW-7] 10 p1616 A66-21485  
Permanent deformations in circular plates subjected to uniformly distributed impulses, compared with predictions of bending theory of rigid-plastic plates 11 p1781 A66-22612  
Creep laws in terms of generalized stress-strain rates formulated, noting secondary deformation, Tresca criterion and associated flow rule 12 p1963 A66-24037  
Inverse problem of stressed state of elastic plate reinforced by members of known rigidity under axisymmetric load 12 p1967 A66-24107  
Inner boundary layer existence in circular plate under symmetric tensile stress obtained by asymptotic method 12 p1968 A66-24345  
Von Karman equations for axisymmetric nonlinear bending circular plates 12 p1969 A66-24363  
Deflections, moments and shears of circular ring plate under transverse load, comparing classical and improved theory of deformation 13 p2195 A66-25180  
Airy stress function applied in solving problems for doubly connected regions with contiguous circular boundaries 13 p2204 A66-26432  
Symmetric bending of circular orthotropic plate of systematically variable thickness for

different types of loading 15 p2613 A66-29435  
Approximate solution of free axisymmetric oscillations of circular structurally orthotropic plate of specific laws of variable thickness 15 p2613 A66-29436  
Creep bending of circular plate with temperature gradients, using iterative technique 16 p2813 A66-30269  
Deflection of uniformly loaded circular plate supported at discrete points equally spaced along circumference of concentric circle 16 p2820 A66-31274  
Bending moment, longitudinal force, radial displacement and transverse deflection of circular plate undergoing elastoplastic bending accompanied by radial tension 16 p2822 A66-31622  
Von Karman plate equations specialized to describe large symmetric deflections of circular membranes 17 p3020 A66-31999  
Complex variable method to solve problem of circular elastic plate elastically restrained at edge and subjected to arbitrary concentrated force 17 p3020 A66-32000  
Assessment of error of method of successive approximations in determination of circular plate deflections 17 p3026 A66-32598  
Load carrying capacity of circular plates under antisymmetric load 17 p3029 A66-32806  
Clamped circular rigid-plastic plates under blast loading distributed over surface [ASME PAPER 65-APMW-34] 18 p3247 A66-33569  
Transverse displacement of circular plate containing radial crack examined, using small deflection theory 18 p3249 A66-33597  
Bending behavior under lateral loads and stretching effects due to in-plane forces described by two uncoupled differential equations governing circular plates 18 p3253 A66-33803  
Strain-energy exposition of creep deflection theory and Ritz-Rayleigh method prediction of creep deformations of laterally loaded circular plates 18 p3256 A66-34561  
Clamped circular plates of rigid plastic material under uniformly distributed blast loading, noting parameters of permanent central deflection 20 p3673 A66-38277  
Bending problems of transversely isotropic circular plates based on Ambartsumian theory of anisotropic plates 21 p3830 A66-38980  
Load carrying capacities of rotationally symmetric plates and shells for limited anisotropic behavior and different yield stresses in tension and compression 21 p3831 A66-39375  
Stress distribution in elastically nonhomogeneous rotating thin circular disk of varying thickness of anisotropic material 21 p3745 A66-39597  
Vibrations of transversal-isotropic circular plates solved, using refined theory of anisotropic plates 23 p4138 A66-41448  
Membrane force in axisymmetric elastoplastic bending of clamped thin circular plate 23 p4142 A66-41951  
Plastic theory of structures for collapse under highly localized loading 24 p4286 A66-42152  
Axisymmetric bending problem of idealized elastic rigidly-plastic two-layer circular plates, deriving exact mathematically strict solutions and uniqueness conditions 24 p4290 A66-42443

**CIRCULAR POLARIZATION**  
Tuning of lens and mirror antennas with circularly polarized radiation patterns 02 p0192 A66-11848  
Circularly polarized monopulse feed system for use with parabolic reflectors generates response independent of return-signal polarization 06 p0851 A66-16448  
Beat frequencies and coherence properties in circularly polarized atomic transitions of gaseous lasers with axial magnetic fields 07 p1046 A66-18429  
Two-element interferometer to investigate Jupiter decimeter circularly polarized radiation 08 p1288 A66-18789  
Lifetimes of orientation and alignment of excited atomic states examined in level crossing and optical double resonance experiments employing polarized light 11 p1740 A66-22969  
Near-isotropic circularly polarized

antenna 13 p2035 A66-25503  
Circularly polarized tracking feed in Haystack antenna 13 p2035 A66-25504  
Propagation of circularly polarized electromagnetic waves in circular semiconductor cylinder surrounded by metal tube and immersed in DC magnetic field 13 p2169 A66-26238  
Propagation of circularly polarized plane electromagnetic waves through helium plasma along direction of static magnetic field, determining electron density 13 p2154 A66-26672  
Hooke law extension to include term expressing dependence of stress on spatial variation of strain, noting rotation of polarization plane in sound wave propagation in isotropic medium 14 p2334 A66-27478  
Direction, frequency and polarization of radio emission from galactic OH determined by hypothesis of stimulated emission 21 p3814 A66-39213  
Linearly and circularly polarized fields in laser amplifier interaction with axial magnetic field, emphasizing combination tone production 23 p4079 A66-41624  
Radar scattering equations for transmitting and receiving circularly polarized waves in terms of characteristics for linear polarization 24 p4171 A66-42374  
Anomalous circular polarization of hydroxyl radical 18-cm radiation from cosmic sources 24 p4272 A66-43188

**CIRCULAR SHELL**  
Deformation of circular membrane containing central rigid disk under axisymmetrically distributed load 04 p0590 A66-14150  
Thin circular cylindrical shell behavior in axial compression, noting buckling under stress, boundary condition detail effects, etc 17 p3031 A66-33064  
Stability of structurally anisotropic circular cylindrical shell under nonuniform compression 21 p3829 A66-38976  
Longitudinal and tangential local and strip loads effect on magnitude of forces, moments and displacements in circular cylindrical shell 23 p4139 A66-41788  
Nonlinear flexural vibrations of thin circular rings analyzed, using Galerkin procedure on motion equations 24 p4285 A66-42142  
Prestressed circular membrane shell subjected to uniform radial line load, determining stresses and displacements from material properties, internal pressure and original size 24 p4288 A66-42272

**CIRCULAR TUBE**  
Transient heat transfer between thin circular tube and incompressible fluid, considering radial conduction and heat loss [ASME PAPER 65-HT-2] 04 p0595 A66-13393  
Entrance region Newtonian flow analysis in tube of circular cross section for possible use in viscometry and flow stability studies [AICE PREPRINT 19D] 04 p0511 A66-13935  
Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 05 p0783 A66-14744  
Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 05 p0663 A66-15428  
Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638  
Pressure drop in entrance region of abrupt inlet circular tube for continuum laminar flow conditions [ASME PAPER 65-WA/APM-5] 10 p1523 A66-21471  
Rarefied gas flow in hydrodynamic entrance region of circular tube, noting variation with density level, velocity profile and pressure drop for developing flow 13 p2070 A66-26713  
Heat transfer rate in thermal inlet of circular tube, describing experimental apparatus and observational results 14 p2411 A66-27313  
Free convection on laminar forced flow heat transfer in horizontal circular tube [ASME PAPER 65-HT-23] 16 p2828 A66-30983  
Kohn-Kato bounds for natural frequencies

of axial shear vibrations for solid circular bar, extending calculations through conformal transformations for bar with many-lobed plane curved boundary 17 p3022 A66-32014

Vaporization of liquid fuel injected in heated horizontal circular pipe for straight and swirl air flow, noting increased rate of vaporization in swirl airflow for increased heat supply 18 p3265 A66-34490

Heat transfer in laminar flow of Bingham material through circular pipe, taking into account dissipation effect 21 p3836 A66-39441

Screening of sound in infinite tube with circular cross section and finite wall thickness placed in compressible fluid 21 p3729 A66-39444

Gaseous dispersion in laminar flow through circular tube with mass transfer to retentive layer 22 p3900 A66-40411

Oscillating two-phase flow through rigid circular pipe investigated to understand blood cells effects on changes in shape of pressure pulse wave 23 p4058 A66-41916

**CIRCULATION**

S ATMOSPHERIC CIRCULATION

S BLOOD CIRCULATION

S PERIPHERAL CIRCULATION

S WIND CIRCULATION

**CIRCULATOR**

Three-port waveguide circulator design analyzed with X-band, using manganese ferrite 01 p0038 A66-10524

4-port E-plane cross junction ferrite circulator analyzed in X-band 01 p0039 A66-10532

Wideband junction circulator design with maximum product of isolation and frequency bandwidth but maintaining minimum temperature and DC magnetic field variation 01 p0040 A66-10548

Disk and parasitic resonance of broadband and small circulators for UHF and VHF 01 p0040 A66-10551

Lumped parameter circulators for 80-400 mc/s range 01 p0041 A66-10566

Configuration of broadband waveguide Y circulator 01 p0041 A66-10578

150 mc strip-line circulator using Altron garnet material, noting isolation, insertion loss, input impedance, etc 10 p1514 A66-21910

Ferrites for resonance-directional insulators and circulators, noting properties at microwave frequencies and applicability 11 p1664 A66-22659

Circulators from lumped circuit elements examined, calculating coil properties and analyzing construction 11 p1664 A66-22660

Flow graph analysis of lossless nonideal 3- and 4-port junction circulators for visualizing scattering matrices and calculating coefficients of combined networks 17 p2896 A66-33277

Coupled waveguide circulator in which secondary waveguide is loaded with distributed nonreciprocal attenuation along coupling length 18 p3075 A66-33566

**CIRCULATORY SYSTEM**

SA BLOOD CIRCULATION

SA CAPILLARY

Exercise tolerance, plasma volume, red cell mass, total blood volume and orthostatic tolerance during four weeks of bed rest 03 p0326 A66-13354

Physiological problems of weightlessness discussing motion sickness, fluid volume control and chronic effects on circulatory system 04 p0465 A66-14071

Prolonged hypokinesia effect on human resistance to transverse g-forces, detailing respiratory and circulatory systems, motor response and visual acuity 15 p2437 A66-29473

Wave propagation, dispersion and energy transfer in arterial blood flow considered as fluid dynamics, noting finite amplitude effects in circulatory system and flow control mechanism 23 p4062 A66-42058

**CIRCUMPOLAR VORTEX WIND**

Stability of expanded circumpolar vortex, using available record of 700-mb subtropical westerly index values for five-day means from 1943 through 1965 07 p1062 A66-17372

**CISLUNAR SPACE**

Velocities of dust particles in cislunar space 05 p0762 A66-15266

Density fluctuation effect on radar

determination of total electron content in terms of recent cislunar density measurement 17 p2917 A66-32520

Electric propulsion for transfer mission between parking orbits in cislunar space under optimum payload 17 p2992 A66-33238

**CIVIL AVIATION**

SA AIR TRANSPORTATION

SA BOEING 733 AIRCRAFT

Approach and landing visibility requirements in terms of information needed by civil pilot 01 p0101 A66-10032

Steady growth of commercial aviation over next years will be limited by economics, not technology 02 p0178 A66-12070

Head-up display /HUD/ developed for automatic landing in civil aircraft 03 p0329 A66-12884

West German federal air transport authority, scope, organization and objectives 05 p0794 A66-15807

Proposal for control of local service subsidies, noting lack of clearly stated public policy with respect to congressional statements and actions 06 p0973 A66-16401

Navigation equipment for civil use based on miniature inertial platform, analog and digital computers, automatic chart display, etc 07 p1067 A66-17689

Mechanization of navigational functions for supersonic aircraft within central airborne digital computer, comparing military experience with commercial requirements 07 p1067 A66-17693

Inertial navigation and guidance systems applied to civil air transport from systems engineering viewpoint 07 p1067 A66-17695

Two automatic astronomical navigation and tracking systems compared for accuracy and performance in civil aircraft 07 p1070 A66-17722

Frequency pattern for transmission from ground stations providing worldwide unambiguous navigation aid for civil aircraft, noting airborne equipment 07 p1073 A66-17769

Air navigation problems in North Atlantic including separation standards lateral and vertical, SST traffic, collision risk, etc 07 p1074 A66-17774

Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 07 p1002 A66-17775

Military inertial navigation equipment applied to civil aircraft, evaluating accuracy, reliability and cost 07 p1077 A66-17799

Principal civil aircraft at 26th Aeronautical and Space Exhibition, detailing AN 22 Antaeus cargo aircraft 07 p0989 A66-17820

French Air Regulation 2054 applicable to sailplanes, considering effect on design speed and gust loads 07 p0989 A66-17822

Civilian and Military Uses of Aerospace-Conference, New York, January 1965 08 p1299 A66-18547

FAA regulation of civilian use of U.S. airspace 08 p1321 A66-18548

Book on political, economic and military analysis of air transport policy and national security 09 p1472 A66-20099

STOL operations in city center, discussing metropolitan transportation problems 09 p1327 A66-20244

Airport suitability for delta wing commercial supersonic transport, discussing noise objectives 09 p1365 A66-20698

Supersonic business aircraft design problems related to payload and range 12 p1800 A66-23643

Air navigation problems in North Atlantic including separation standards lateral and vertical, SST traffic, collision risk, etc 13 p2124 A66-25861

Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 13 p2058 A66-25862

Inertial navigation and guidance systems applied to civil air transport from systems engineering viewpoint 13 p2125 A66-25865

Engine reliability data for four Rolls-Royce civil aircraft engines 13 p2174 A66-26694

Assisted takeoff and landing for commercial aircraft using short runways

[SAE PAPER 660337] 14 p2269 A66-27296

Commercial air transport in 1972, discussing operating economics, management planning, maintenance costs, etc [SAE PAPER 660321] 14 p2223 A66-27300

Medical aspects of commercial jet pilot fatigue, examining effects of socio-economic and off-duty activities 15 p2442 A66-28665

Specialized services provided by air freight forwarding industry to shipper and carrier 15 p2619 A66-29790

Civil Aeronautics Board /CAB/ role in air freight industry and in proposed Department of Transportation 15 p2621 A66-29804

Aircraft utilization and schedule planning, optimum use of flight performance, ground equipment, facilities and personnel [SAE PAPER 660279] 15 p2427 A66-29824

Super airport planning concepts, satellite and unit terminal, stress decentralization to meet changing demands and increased volume of air traffic [SAE PAPER 660282] 15 p2476 A66-29826

Operation and maintenance of Lockheed L-2000 double delta SST aircraft with high thrust engine and large delta wings, designed to meet civil aviation requirements [SAE PAPER 660295] 15 p2427 A66-29832

Helicopter design and application to common carrier transportation, particularly between airport and city [SAE PAPER 660335] 15 p2428 A66-29846

Inertial navigation for commercial aviation economically justified by fuel economy due to reduced flight time 15 p2536 A66-29894

Commercial V/STOL aircraft and systems development, discussing government /FAA/ interest and assistance 16 p2633 A66-31281

Future civil VTOL aircraft potentialities and limitations 17 p2846 A66-32886

Aviation and astronautics - Conference, Tel Aviv and Haifa, February 1966 17 p2912 A66-33063

Navigational display types and requirements for civil aircraft 17 p2956 A66-33223

Canadian labor market for commercial helicopter pilots 18 p3268 A66-34624

Civil aviation safety - International Symposium, Stockholm, April 1966 20 p3493 A66-36990

Flight safety in Soviet civil aviation including takeoff and landing, cruising in airport vicinity, meteorology and medicine 20 p3494 A66-36991

Civil aviation communications between pilot and ground controller on over-ocean flights, considering use of VHF and HF and synchronous satellite to extend VHF 20 p3515 A66-37234

Interior design techniques in civil aircraft seat design and supersonic aircraft interiors 20 p3495 A66-37425

Flight recorder utilization in British civilian jet and turboprop aircraft 21 p3696 A66-38603

Intermediate visual acuity testing of senior airline pilots, including separate testing of each eye with trifocal chart and artificial accommodation measurement 22 p3857 A66-39799

Inertial navigation for civil airline operations, noting azimuth alignment made by automatic gyrocompassing [ICAS PAPER 66-6] 22 p3946 A66-40677

Hypersonic cruise vehicles for military and civil requirements, considering air breathing propulsion and structural weight 24 p4296 A66-42241

**CL-84 AIRCRAFT**

S CANADAIR CL-84 AIRCRAFT

**CLADDING**

Explosion cladding for bonding similar and dissimilar metals without intermediate metal or externally applied heat 03 p0380 A66-12317

Nuclear fuel-cladding diffusion and interactions in uranium-tungsten and uranium-molybdenum systems, covering compatibility, transport rate, thermal cycling effects and cladding surface contamination 05 p0714 A66-15588

Clad metals concept applied to low energy contact using materials system, analyzing material, mechanical and electrical properties of thin precious metal inlays 12 p1930 A66-24666

- Explosive cladding for strong metal-metal bonds  
[ASTME PAPER AD66-112] 14 p2299 A66-26951
- Heat treatment of titanium alloy sheets clad with industrial trial-grade titanium for preventing surface oxidation and hydrogen absorption 15 p2522 A66-29191
- Brazing and cladding research on refractory metals offers dependability and continuity of protective layers and abrasion resistance in extreme environments 19 p3368 A66-36119
- CLAMP**
- Ty-Block injection-molded nylon cable-anchoring device with adjustable nylon strap for clamping cables 11 p1709 A66-22674
- CLASSIC AIRCRAFT**
- S ILYUSHIN IL-62 AIRCRAFT
- CLASSICAL MECHANICS**
- Discrete plasma model describing particle behavior by classical mechanics equations, used for interaction between fast moving bodies and rarefied plasma 09 p1378 A66-21020
- Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 10 p1525 A66-21965
- Asymptotic stability of equilibrium states of nonholonomic systems 14 p2336 A66-28052
- Routh theorem describing motion stability of holonomic systems applied to nonholonomic systems, specifically Bobylov spherical gyroscope 14 p2297 A66-28062
- Classical analytical mechanics applied to mechanics of continua, noting relation between kinetic-stress functions and Ostrogradskii-Hamilton principle and stress tensor and finite deformation 15 p2539 A66-29148
- Investigation methods for multidimensional dynamic systems, including parametric dependence, bifurcation theory and phase-propagation separation structure 15 p2541 A66-29165
- Revision of fundamental laws of Newtonian mechanics, noting condition when relativity principle is not obeyed 16 p2748 A66-31400
- Turbulent vortices in quantum and classical fluid and time dependent meniscus depth of water, He I and He II 21 p3731 A66-39544
- CLAVACIN**
- IR spectrum of clavacin structure 05 p0629 A66-15107
- CLAY**
- S SOIL
- CLEAN ROOM**
- SA ENVIRONMENTAL CONTROL
- Number of viable aerobes and anaerobes accumulating on stainless steel surface in clean room during one year under various conditions, for spacecraft sterilization purposes 13 p2015 A66-25797
- Environmental control manufacture discussing cleaning, design and maintenance problems, historical background, etc 17 p2903 A66-32208
- R and D clean room complex design for guidance and control systems, noting contamination control, maintenance procedures, cost factors, etc 17 p2903 A66-32209
- Contamination problems in space program, discussing clean room equipment, maintenance, cleaning problems, etc 17 p2866 A66-32210
- Contamination control of manned spacecraft, noting problem of biological interactions and methods of monitoring 17 p2866 A66-32211
- Contamination control and space program, objectives, achievements, NASA courses, etc 17 p2868 A66-32894
- CLEANING**
- SA PURIFICATION
- Field cleaning of corrosion resistant steel tubing for LOX and pneumatic service 22 p3922 A66-40040
- CLEAR AIR TURBULENCE**
- Index of clear air turbulence in sloping baroclinic layer 02 p0253 A66-11575
- Clear air turbulence detection and prediction by laser, radiometer, radar and other devices  
[AIAA PAPER 65-800] 03 p0370 A66-13072
- Airborne laser-radar light detection and ranging /LIDAR/ systems applied to detection of clear air turbulence /CAT/ 05 p0697 A66-15297
- Occurrence frequency and intensity of clear air turbulence as function of altitude between 20,000 and 75,000 ft  
[AIAA PAPER 65-13] 09 p1400 A66-20742
- Clear air turbulence, considering energy source by transfer from large to small flow in gravity wave spectra, noting shear role and motion equations 10 p1552 A66-21289
- Flight data used to determine relationship between atmospheric temperature changes and clear air turbulence occurrence at jet altitudes  
[AIAA PAPER 66-365] 12 p1906 A66-24477
- Clear air turbulence types at high altitude identified and intensity and wavelength measured by FM instrument, using vane gust probe installed in U-2 aircraft  
[AIAA PAPER 66-362] 12 p1907 A66-24494
- Clear air turbulence detection with laser Doppler optical radar  
[AIAA PAPER 66-374] 12 p1818 A66-24498
- Clear air turbulence structure, noting measurement results obtained by Canberra aircraft and TOPCAT project, energy yield of gravitational shearing waves, etc 13 p2122 A66-26127
- Effective early warning system to enable pilot to cope with clear air turbulence /CAT/ 14 p2326 A66-27819
- Light detection and ranging /LIDAR/ technique use in atmospheric research, particularly meteorological factors important to aviation and rocket operations  
[AIAA PAPER 65-464] 14 p2309 A66-27892
- Measurements of maser beam propagated through atmosphere, emphasizing beam broadening and signal fluctuation due to clear air turbulence 15 p2448 A66-28581
- National Air Meeting on Clear Air Turbulence, Washington, D.C., February 1966 15 p2531 A66-28911
- Wind shear, gravity waves and Richardson number in relation to clear air turbulence /CAT/ 15 p2425 A66-28912
- Present state of knowledge on physical causes of clear air turbulence /CAT/ 15 p2426 A66-28913
- Synoptic analysis of nature and cause of clear air turbulence 15 p2531 A66-28914
- Atmospheric model describing generation of clear air turbulence /CAT/, noting horizontal shear effect 15 p2532 A66-28915
- Clear air turbulence detection and warning by airborne devices including radar, IR spectrum, air temperature probes, ozone detection, etc 15 p2500 A66-28917
- Atmospheric temperature changes as factor in detection of clear air turbulence, especially above 25,000 ft, noting aircraft instrumentation used 15 p2532 A66-28918
- Clear air turbulence detection instrument development 15 p2500 A66-28919
- Clear air turbulence detection with optical radar, using spectral analysis of backscattered Doppler-shifted light particle formation mapping via correlates of rough flying conditions 15 p2450 A66-28920
- Clear air turbulence research methods, noting structural analysis, computer application, satellite photography, etc 15 p2532 A66-28921
- Correlation between clear air turbulence and aircraft electrical activity, describing corona discharges from DC-8 tail antenna 15 p2426 A66-28922
- LF electrostatic field characteristics of clear air turbulence, noting theory and application of field sensing antennas, turbulence generated signals, etc 15 p2532 A66-28923
- Radar refractivity fluctuations and wavelength dependence of reflectivity in clear air turbulence regions 15 p2532 A66-28924
- CAT detection by radar backscatter measurement of radio refractive index 15 p2532 A66-28925
- CAT detection by radiometric measurement of mm wave emission from oxygen molecules and measurement of ambient air temperature and temperature gradient 15 p2532 A66-28926
- Clear air turbulence detection by measuring associated air temperature gradient by airborne IR radiometer 15 p2500 A66-28927
- Airborne laser radar investigation of clear air turbulence 15 p2533 A66-28928
- CAT detection from Doppler shift in laser light backscattered from atmospheric aerosol 15 p2500 A66-28930
- CAT detection by photometric star tracking system from moving aircraft 15 p2500 A66-28931
- Clear air turbulence forecasting for aircraft, noting methods employed by airlines 15 p2533 A66-28932
- Aircraft safety, noting minimization of clear air turbulence, mountain wave and wind shear effects 15 p2533 A66-28933
- Clear air turbulence, noting importance of good detection system and history of incidents in six-year period 15 p2426 A66-28934
- Pilot techniques for control of passenger transport aircraft during CAT or thunderstorm 15 p2426 A66-28935
- Clear air turbulence, examining detection, forecasting and piloting techniques when passing through CAT 17 p2948 A66-32201
- Airborne IR system to detect temperature discontinuities characterizes some forms of clear air turbulence /CAT/  
[AIAA PAPER 65-459] 19 p3360 A66-36482
- Worldwide long-range navigation satellite /Navsat/, noting use with inexpensive black box, clear-air turbulence mapping and position definition in relation to high ground 20 p3598 A66-38259
- SST in nonoptimum conditions, discussing cost penalties due to navigation error, air traffic conditions, sonic boom restrictions, clear air turbulence and weather 21 p3695 A66-38451
- Clear air turbulence near jet stream, discussing velocity profiles and various meteorological parameters 22 p3902 A66-39677
- Tropopause detection by radar, examining detection of high altitude clear-air turbulence by radar and forward-scatter techniques 22 p3912 A66-40304
- Clear air turbulence detection and warning by airborne devices including radar, IR spectrum, air temperature probes, ozone detection, etc 22 p3945 A66-40325
- Turbulent refractivity spectrum and optimization of airborne radar CAT detectors 22 p3944 A66-40429
- Clear air turbulence detection and prediction by laser, radiometer, radar and other devices  
[AIAA PAPER 65-800] 23 p4066 A66-40981
- Stress, eddy viscosity and viscous dissipation estimations in jet stream obtained during Project TOPCAT in Australia, using aircraft soundings 24 p4234 A66-42984
- Velocity characteristics of clear-air dot angle echoes determined via Doppler radar measurements 24 p4234 A66-42990
- CLEAVAGE**
- Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 10 p1613 A66-21238
- Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 19 p3474 A66-35861
- Lithium cleavage of unsaturated vicinal di-tert-phosphines producing lithium diphenylphosphide 24 p4170 A66-42889
- CLIMATOLOGY**
- Climatic conditions at Earth surface, relation to long-term planetary trends in atmospheric circulation 05 p0712 A66-15221
- Numerical experiment with general circulation model with simple hydrologic cycle 08 p1247 A66-18925
- Twelve monthly world maps of daily means of total solar radiation incident on horizontal surface 11 p1702 A66-23156
- Model simulation study of economic value of improved methods of translating weather information into operational terms 11 p1731 A66-23488
- Long wave radiation and total radiation balance at Earth surface in Arctic region, based on Stefan-Boltzmann formula 12 p1869 A66-24202
- Arctic short-wave atmospheric radiation absorption, long-wave radiation loss, and

tropospheric radiation  
balance 12 p1949 A66-24203  
Arguments pro and con on Milankovitch astronomical theory of climatic changes 15 p2489 A66-29266  
High latitude density regime in upper stratosphere inferred from Arctic and Antarctic observations 17 p2922 A66-33343  
Climatology of surface temperature which meets most engineering design requirements 20 p3593 A66-38180  
WSR radar four-year climatology of thunderstorm penetrations of tropopause at ten locations in U.S. 22 p3944 A66-40430

**CLINICAL MEDICINE**  
Clinical aspects of interplanetary flights noting models of future cosmic diseases, automation of diagnostics, medical aid aboard spacecraft, etc 06 p0815 A66-16052  
Clinical observations and tests of solitary confinement on neurotic pilots 11 p1642 A66-22486  
Alternobaric /pressure/ vertigo severity and frequency among Swedish RAF pilots 11 p1644 A66-22584  
Clinical and medicolegal considerations on fatal case of myocardial infarct involving military pilot in flight 14 p2229 A66-26813

**CLOCK**  
SA ATOMIC CLOCK  
BTC-2 master clock provides basic information and reference signals for operation of various units of satellite tracking and telemetry 14 p2295 A66-27550  
Receiver design and results of dual VLF transmissions for obtaining timing information 19 p3357 A66-35693  
Experimental meteor burst system for microsecond synchronization of isolated clocks 20 p3515 A66-37227

**CLOCK PARADOX**  
Conditions satisfied by transformation equations connecting inertial and relativistic accelerated systems are deduced for rectilinear motion 03 p0392 A66-12609  
Time contraction physically explained for objects moving with velocities significant with respect to velocity of light 21 p3817 A66-39600

**CLOSE PACKED STRUCTURE**  
Superconducting behavior of various close packed low symmetry intermediate phases in various binary systems, noting relation between transition temperature and composition 12 p1928 A66-23939

**CLOSED CIRCUIT TELEVISION**  
Operational space flight simulator using closed-circuit TV with pinhole optics 10 p1518 A66-21231  
Closed circuit television applied to data transfer in air traffic control, discussing accident prevention and information provision to aircraft 17 p2874 A66-32356  
T-27 Space Flight Simulator, for extravehicular activity training, utilizing closed-circuit TV system 19 p3291 A66-35966

**CLOSED CYCLE**  
Compact Ackeret-Keller closed cycle thermodynamic nuclear turbine power plant [ASME PAPER 66-GT/CLC-6] 14 p2329 A66-26980  
Nonconventional application of electric power-generating closed-cycle gas turbines [ASME PAPER 66-GT/CLC-8] 14 p2224 A66-26981  
Graphical matching solution for gas turbine power plant closed cycle systems [ASME PAPER 66-GT/CLC-14] 14 p2224 A66-26984  
Liquid phase compression in closed cycle gas turbine by using particular working fluids for application to nuclear power stations [ASME PAPER 66-GT-111] 14 p2411 A66-27005  
Jet compression requirements for circulating working medium in closed cycle magnetoplasmadynamics /MPD/ electrical power generator [AIAA PAPER 65-466] 19 p3280 A66-35621  
High speed stable system through combination of hunting-type control system without closed cycles designed for plant optimization, with recycling type controller 22 p3883 A66-39661  
Closed Brayton cycle power system for space vehicles, discussing closed loop and

major components 23 p4020 A66-41750

**CLOSED ECOLOGICAL SYSTEM**  
SA LIFE SUPPORT SYSTEM  
SA OXYGEN PRODUCTION  
SA SPACE CABIN ATMOSPHERE  
SA SPACECRAFT ENVIRONMENT  
Physiological-ecological investigations of Chlorella cultures as link in closed ecological system 01 p0018 A66-10981  
Life support closed cycles for missions to outer space lasting 12 months or longer, considering recovery and replenishing of water, food and oxygen from wastes 07 p0998 A66-17229  
Closed ecological systems and endogenous formation of CO in plant and animal tissues 11 p1648 A66-23048  
Soviet monographs on problems of space biology 15 p2431 A66-29439  
Long duration flight physiological data on ducks and chickens in closed ecological systems, including oxygen and food requirements and carbon dioxide output 15 p2435 A66-29452  
Human physiological and hygienic problems when confined in closed system of circulating biological substances 15 p2443 A66-29457  
Human waste nutrient assimilation by Chinese cabbage plants grown in air-moisture medium in closed system 15 p2440 A66-29507  
Intensive Chlorella culture need of carbon dioxide concentration in closed and controlled air-carbon dioxide system 15 p2440 A66-29508  
Intensive Chlorella culture consumption of mineral-nutrition elements 15 p2440 A66-29510  
Trace contaminant control in closed environments as requirement for safe air in habitable areas of manned spacecraft [AICE PREPRINT 26A] 17 p2867 A66-32676  
Carbon dioxide decomposition and oxygen reclamation by chemical reaction with electrochemically reduced lithium 19 p3292 A66-36234  
Chemical methods for carbon dioxide conversion for oxygen recovery, including relationship to biological processes 19 p3293 A66-36235  
Integrated program approach for contamination control of space cabin atmospheres based on identification, estimation of concentration and system specifications 19 p3293 A66-36238  
Closed universe models with two values of Hubble expansion 21 p3817 A66-39560  
Physicochemical methods of creating life support systems in spacecraft cabins 24 p4169 A66-43143  
Life support system in spacecraft cabins based on biological circulation of substances 24 p4166 A66-43144

**CLOSED LOOP SYSTEM**  
Realizable transfer function of closed-loop automatic control system calculated with aid of minimum mean square error criterion 01 p0051 A66-10706  
Discontinuities occurring in closed loop optimal control problems when using maximum principle 02 p0207 A66-11899  
Graphical method for determining closed-loop frequency response of nonlinear feedback control systems 03 p0349 A66-13021  
Optimum stabilization of tumbling satellite, using Hamilton-Jacobi method 04 p0585 A66-13676  
Frequency domain stability criteria, discussing generation and validity of stability criteria 06 p0864 A66-16736  
Optimal control system terminal condition sensitivity, examining parameter variation effects on open loop, feedback and optimal open loop adjacent to closed loop control 06 p0864 A66-16738  
Series analysis of closed-loop system containing loaded hydraulic valve, with equations of motion and response of system to ramp input and Coulomb load 06 p0810 A66-16915  
Closed loop gain of multiple feedback circuit determined, using return-difference matrix analysis 07 p1015 A66-17754  
Fluidic closed-loop digital position-speed servocontrol system without moving parts, using pulsed air 07 p0991 A66-17878

Transient processes in thin open-loop and closed-loop antennas studied by method that takes transmission line processes into account 08 p1199 A66-19759  
Sensitivity of transistor multiple loop feedback amplifier to parameter variations evaluated via replacement with equivalent circuit systems 09 p1355 A66-20603  
Recovery of reusable products of human excretory wastes in closed-loop life support systems for long-duration manned spaceflight [AICE PREPRINT 19B] 10 p1491 A66-21185  
Closed loop MPD power generation at low temperatures and analysis of nonequilibrium processes in magnetoactive flow [AIAA PAPER 66-168] 10 p1486 A66-21689  
Electric output and gas conductivity of cesium-seeded helium closed-loop MPD generator with auxiliary ionization 11 p1639 A66-22246  
Realizable transfer function of closed-loop automatic control system calculated with aid of minimum mean square error criterion 11 p1675 A66-22618  
Free oscillation stability of closed-loop self-adjusting system with several parameters, noting two methods of measuring relative damping 11 p1677 A66-22760  
Stable self-adjusting system with single adjustable parameter designed, using inverse model of desired transfer function of closed-loop system in feedback control circuit with large amplification factor 12 p1851 A66-24315  
Stability of pulse frequency modulated closed-loop control systems determined, using state variables which define system output and error 12 p1855 A66-24640  
Manual closed-loop control systems analysis, discussing operator dynamics for permanent procedural variables 12 p1855 A66-24641  
Root locus methods applied to synthesis of linear multivariable control systems for noninteraction 12 p1855 A66-24644  
Synthesis of closed loop optimal system with nonlinearity and integral criterion 13 p2047 A66-25475  
Component failure examples of Gemini rendezvous radar, emphasizing need for closed loop reliability program 13 p2039 A66-25786  
Algorithm for optimal controller design with closed loop characteristics 13 p2053 A66-26081  
Sensitivity comparison of closed-loop and open-loop systems 13 p2054 A66-26092  
Closed loop hydraulic high-speed universal testing machine and simulation of high strain rate conditions 13 p2197 A66-26108  
Gas lubricated bearings used in Brayton cycle closed-loop system turbomachinery in design of two-shaft power plant [ASME PAPER 66-GT/CLC-9] 14 p2300 A66-26982  
Optimum controller design for systems with unlimited delay 14 p2264 A66-27340  
Restrictions placed on transfer function of linear system with input and output coordinates in presence of given plant in control loop 14 p2265 A66-27522  
Motion equations and simulation of spin-stabilized interplanetary spacecraft closed-loop pitch control system, using low-thrust gas jet torquers with rate gyro sensors 14 p2392 A66-27881  
Tunable precision frequency source using phase locked variable frequency oscillator for mobile radio sets 15 p2451 A66-29313  
Closed loop active networks with distributed RC elements, noting circuit composition, parameters and application 15 p2471 A66-29327  
Closed-loop automatic control system with unvalued substantially nonlinear element, using approximation of characteristics by Fourier series 16 p2669 A66-30754  
Statistical decision theory determination of parameter variations in closed-loop automatic adaptive control system 16 p2670 A66-30880  
Thermostability and control of airborne electronic equipment in closed-loop forced-air cooling systems 16 p2663 A66-31325  
Liquid filled electrostatic generation, noting charge transporting and insulating

function of liquid helium 17 p2848 A66-31814  
 Maximum increase in system error due to computer round-off errors for closed loop linear sampled data 17 p2900 A66-32075  
 Trial and error method for constructing closed loop harmonic response locus of control system with one nonlinear element 18 p3089 A66-34010  
 Superconducting bearing operating on conservation of fluxoid in closed loop of superconductor 18 p3116 A66-34243  
 Experimental antenna with closed loop profile control, noting light sensor application and fast response characteristics 18 p3081 A66-34278  
 Phase characteristics and amplitude of correcting device ensuring closed loop mechanical system stability at critical frequency 18 p3092 A66-34995  
 Sensitivity of closed loop optimal control system to parameter variations and external perturbations 19 p3324 A66-35581  
 Optimization of control loop type for minimum threshold which is function of modulation index, obtaining results using sine wave modulation 19 p3301 A66-35695  
 Near-threshold behavior of phase-locked devices, noting phase error processes 19 p3301 A66-35697  
 Block sensitivity coefficient analysis in application of method of transformed circuits to closed-loop control systems, noting dynamic accuracy problem 19 p3327 A66-36014  
 Distributed parameter systems in discrete-time models compared with response obtained by approximating transcendental transfer function with root factor and other approximations 19 p3282 A66-36683  
 Closed loop control system for space vehicle guidance, formulating efficient steering algorithm 19 p3471 A66-36685  
 Linear optimal control techniques for design of control system for short-range stationkeeping of large assault helicopter 19 p3280 A66-36688  
 Multiloop flight control system root sensitivity to open loop parameter variation, describing method of 19 p3335 A66-36690  
 Criterion for optimum design of quantizer imbedded in closed loop dynamic system is optimization of overall system performance expressed by variational criterion 19 p3336 A66-36707  
 Explicit method for calculating closed-loop gains defining stability boundary and subsequent phase margin boundaries of two-loop linear feedback system 19 p3337 A66-36716  
 Sequential estimation on states of linear systems disturbed by white noise, determining relations between covariance matrices 19 p3338 A66-36736  
 Simulation and analysis of adaptive roll autopilot for air to air missile, using limit cycle with small amplitude controlled by gain changing loop 20 p3595 A66-36865  
 Closed loop control system combined with air beating technology for measurement of multicomponent microforces 20 p3555 A66-36870  
 Multiloop control interaction using linearized technique, noting variable geometry intake loop 20 p3627 A66-36881  
 Block diagram of closed loop automatic control system and conditional feedback control system, both with passive adaptation 20 p3536 A66-36883  
 Computer model analysis of functional relationships of human operator information handling and control in closed loop tracking situation 20 p3509 A66-37236  
 Open and closed-loop network synthesis using transient-response approximation 20 p3538 A66-37581  
 LF combustion oscillation analyzed by theory of dynamical stability of closed feedback loop 20 p3681 A66-38103  
 Closed loop optimization of fixed configuration systems termed specific optimal control solved by applying Pontryagin maximum principle to reduce problem to two-point boundary value problem 21 p3718 A66-38668  
 Pneumatic servomotor synthesis by root loci technique providing direct insight into

effects of parameter changes on system response 21 p3697 A66-39216  
 Four-foot diameter solar radiation simulator system using single xenon arc source and closed-loop heat exchange system for electrode cooling 22 p3887 A66-40206  
 Multiloop flight control system root sensitivity to open-loop parameter variation, describing method of 22 p3884 A66-40360  
 Selection of size of hydraulic servomotor with rotary hydraulic motor controlled by electrohydraulic spool valve to reduce open-loop gain for given closed-loop stiffness 22 p3852 A66-40515  
 Pontryagin maximum principle minimization of time frequency transition in white noise driven phase-locked loop 23 p4048 A66-41316  
 Stable transmission of given transient response in closed loop nonlinear servosystem under fixed initial condition and in presence of possible disturbances 23 p4048 A66-41393  
 Digital simulation study of acquisition capabilities of phase-locked loop in presence of noise 23 p4050 A66-41616  
 Closed Brayton cycle power system for space vehicles, discussing closed loop and major components 23 p4020 A66-41750  
 Nonlinear behavior of second-order phase locked loop in presence of noise, discussing probability distribution of phase error, statistical properties of loop behavior, etc 24 p4172 A66-42618  
 Differential absorption and Faraday rotation in D region, using closed loop feedback system and two signals of different frequencies 24 p4205 A66-43218  
**CLOSURE LAW**  
 Scalar quantity spectrum in statistically stationary turbulent velocity field, using closure approximations to provide unified comparison, noting eddy diffusivity, transfer function, etc [AIAA PAPER 65-814] 03 p0357 A66-13082  
 Evolution of scalar quantity spectrum in statistically stationary isotropic turbulent velocity field determined by closure approximation theory 12 p1865 A66-24583  
 Singularities in closed universes, discussing closed solutions to Einstein equations and inevitability of singularity, based on Hawking theorem 21 p3771 A66-39266  
**CLOTHING**  
 S FLIGHT CLOTHING  
 S HELMET  
 S PROTECTIVE CLOTHING  
 S SHOE  
**CLOUD**  
 SA ARTIFICIAL CLOUD  
 SA CUMULUS CLOUD  
 SA ELECTRON CLOUD  
 SA NOCTILUCENT CLOUD  
 SA PARTICLE CLOUD  
 SA ZODIACAL DUST CLOUD  
 Aerial observation of rare halo formation consisting of small ring, large ring, secondary sun of small ring, horizontal ring and extraordinary secondary sun 02 p0220 A66-11263  
 Effectiveness and reliability of radar observation of clouds in absence of precipitation 02 p0252 A66-11264  
 Comparison of simultaneous radar and aircraft observation of upper boundary of clouds 02 p0252 A66-11265  
 Variation of radio echo in different types of clouds allows identification from vertical variations in radar reflectivity 02 p0252 A66-11267  
 Statistical relations between weather conditions and geometry of radio echoes produced by cloud and precipitation fields 02 p0252 A66-11268  
 Determination of cloud-top altitude by GT-5 manned space flight mission 05 p0712 A66-15482  
 Cloud raindrop sizes and concentration measurement by airborne flow device 06 p0880 A66-16556  
 Initiation of precipitation in vigorous convective clouds traced to cluster of three shower cells which produce radar echo close to -30 C level [AFCL-SR-32-65] 07 p1062 A66-17369  
 Observations of vertical motion and

particle size of growing thunderstorm moving overhead, using pulsed Doppler radar 10 p1552 A66-21277  
 Observational study of cloud forms in vicinity of jet streams as viewed from ground and Tiros meteorological satellite 11 p1727 A66-22316  
 Synoptic interpretation of tropical land convection over Philippines 11 p1728 A66-22322  
 Low cloud characteristics over Sea of Japan during winter 11 p1729 A66-22324  
 Origin of cloud streaks extending over Pacific Ocean near Japan during winter monsoon 11 p1729 A66-22325  
 Effect of supersonic aircraft on cirrus formation and climate, noting influence of combustion products on stratosphere [AIAA PAPER 66-369] 12 p1907 A66-24497  
 Cloud raindrop sizes and concentration measurement by airborne flow device 14 p2297 A66-28228  
 Radar resolution capability for cloud detection 16 p2740 A66-30225  
 Radar observation of cloud with sharply defined base and slow descent 16 p2740 A66-30226  
 Atmospheric heat and moisture transfer during developing cloud conditions 16 p2742 A66-31342  
 Cloud height measurement by optical radar systems 17 p2949 A66-32884  
 Water-vapor mixing ratios near cloudtops of Venus decreases with altitude at rates comparable to Earth 20 p3655 A66-38020  
 Altitude of lower cloud boundary functional correlation with atmospheric parameters obtained from numerical weather forecast 20 p3593 A66-38366  
 Radiation effect on position of lower cloud boundary 20 p3594 A66-38370  
 Long-wave radiative heat transfer between clouds and free atmosphere as basic factor in weather forecasting 20 p3594 A66-38371  
 Cloud and fog droplet spectra rearrangement due to external conditions calculated from distribution function of water content 20 p3594 A66-38374  
 Double cloud vortex near Antarctica detected by Nimbus I high resolution IR 22 p3942 A66-40053  
 Atmospheric heat and moisture transfer during developing cloud conditions 24 p4234 A66-42650  
**CLOUD CHAMBER**  
 Particle localization in spark chamber and ion drift in Wilson cloud chamber, noting experimental result of simultaneous observation of identical particles 09 p1379 A66-20233  
 Density spectrum of extensive air showers at very large densities from cloud chamber study 15 p2580 A66-29534  
 High energy mountain-altitude nuclear interactions produced by pions and nucleons, pion/proton and neutral/charged interacting particle ratios studied, using multiplate cloud chamber with air Cerenkov counter and absorption spectrometer 15 p2584 A66-29554  
 Nuclear interaction characteristics in brass and carbon, noting production by neutral and charged cosmic ray particles, observation methods, energy spectrum, etc 15 p2585 A66-29560  
 Electron-muon similarities and multiple pion production by high energy muons, using accelerators and cloud chamber 15 p2546 A66-29576  
 Electron pair production by high energy muons, noting application of Monte Carlo method for appearance of low energy with high energy partner below target plate 15 p2546 A66-29583  
 Multiple penetrating particles underground, noting interaction of muons with matter at 148 meters water equivalent 15 p2546 A66-29584  
 Electromagnetic interactions and collisions of particles in cores of EAS studied, using GM counters, plastic scintillators and Wilson cloud chambers 18 p3207 A66-35107  
 Response to EAS electron-photon cascade of plastic scintillator, cloud chamber and Geiger counter tray compared 18 p3208 A66-35112

Bolivian Air Shower Joint Experiment /BASJE/ fast-timing methods compared with arrival directions measured in cloud chamber pictures 18 p3210 A66-35123  
Cloud chamber EAS density spectrum measurements at 2285 m 18 p3210 A66-35124  
Tskhra-Tskaro installation for study of high-energy cosmic particle interaction with matter 18 p3218 A66-35182

## CLOUD COVER

Probability of clear lines-of-sight estimated from sunshine and cloud cover observation 08 p1248 A66-19386  
Long-wave radiation flux in optically dense horizontally-stratified layer of clouds as it ascends from lower into upper troposphere with given temperature and humidity 09 p1398 A66-19894  
Venus cloud layer and brightness temperature from radiometric microwave observations from nocturnal side of planet 09 p1451 A66-20112  
Interpretation of outgoing IR radiation data from meteorological satellites, including cloud cover identification and Earth surface temperature 10 p1525 A66-21046  
Synoptic scale storm development stages traced by Tiros satellite photography of associated cloud vortex patterns 11 p1727 A66-22314  
Orographic precipitation areas on windward side of mountains in outer region of typhoon and convective clouds along warm front accompanied by storm 11 p1728 A66-22320  
Simultaneous occurrence and statistical distribution of clouds over separated cities in U.S. 12 p1907 A66-24493  
[AIAA PAPER 66-361] 12 p1907 A66-24493  
Conventional rawin, pibal and surface wind data compared with photoreconnaissance data, showing cumulus population and patterns over Florida 14 p2325 A66-26927  
Automatic cloud cover picture interpretation 18 p3128 A66-33741  
Radiant energy transfer below cloud cover in Venus atmosphere, noting greenhouse effect caused by atmosphere containing components capable of IR absorption 22 p3980 A66-40469  
Probability of overlapping intercept by system of random intercepts and application to detection of flying objects in cloudy skies 24 p4231 A66-42472

## CLOUD GLACIATION

Sferics from lightning from warm cloud, noting microsecond pulse-train format and temporal duration 22 p3942 A66-39678

## CLOUD PHOTOGRAPH

Gridding error in graphical rectification of satellite photographs eliminated by adopting coupled rotation of principal lines 06 p0882 A66-16782  
Satellite picture interpretation of cloud patterns, emphasizing scale identification and dependence on other meteorological parameters 11 p1726 A66-22308  
Cloud identification from Tiros satellite photographs, noting element identification of order of 1 km 11 p1726 A66-22309  
Tiros photographs of tropical cumulus and cirrus clouds along vertical wind shear vector 11 p1726 A66-22310  
Maximum wind velocity in tropical storms and hurricanes estimated from cloud patterns in satellite pictures 11 p1727 A66-22313  
Tiros satellite photograph study of cloud structure related to two major classes of frontal bands 11 p1727 A66-22315  
Incorrect input-induced errors in meteorological satellite photogrids 11 p1704 A66-22318  
Fog and low stratus clouds studied, using Tiros VII photographs of North Pacific fog 11 p1728 A66-22323  
Photomosaic of cloud system distribution made from Tiros IX photographs 14 p2325 A66-27281  
Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 14 p2325 A66-27537  
Organization and size of cloud systems in relation to maximum wind speed, using Tiros satellite pictures 15 p2533 A66-29663  
Automatic cloud cover picture interpretation 18 p3128 A66-33741

Vertical motion of moisture fields and saturation deficit determination from nephanalysis of Tiros cloud photographs for operational quantitative precipitation forecasting /QPF/ 22 p3943 A66-40054  
Digital computer processing of Tiros, Nimbus and Essa vidicon cloud pictures for machine nephanalyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055  
Spatial distribution of four cloud fields studied by photometry of aerial photographs, determining statistical parameters 24 p4233 A66-42323

## CLOUD PHOTOGRAPHY

Stereo pairs taken at one-and two-minute intervals in photogrammetry of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17371  
Cloud altitude determination from single satellite photograph, using Sun altitude 07 p1063 A66-18481  
Thermal and wind structures related to major cloud bands of Tiros-photographed extratropical vortices 08 p1248 A66-19384  
ITC on satellite photographs and use of photographs of cirrus for high level analysis 11 p1727 A66-22311  
Meteorological satellite terrestrial UV radiation and cloud formation photographic data interpretation 11 p1728 A66-22317  
Cumulus to cumulonimbus convection over mountains and dissipation of stratus and sea fog when moving inland, using Tiros photographs 11 p1728 A66-22321  
Diagnostic-cycle routine, collection of computer-programmed techniques for interpretation of meteorological satellite videograph observations 11 p1731 A66-23486  
Reliability of locating jet streams by means of cloud patterns in Tiros pictures, determining most definitive characteristics of those patterns 13 p2121 A66-25813  
High resolution IR radiometer on Nimbus I satellite for providing detailed night cold information 17 p2927 A66-33344  
Triangulation technique for correlating trail points on films of chemical cloud releases in space from two different sites to determine winds and wind shear 18 p3110 A66-33743  
Organized convection as photographed by Gemini astronauts 18 p3129 A66-34214  
Dielectric-tape camera borne by meteorological satellite to provide high-quality photographs of Earth cloud cover 20 p3557 A66-37204  
Martian atmosphere and crust analyzed, based on Mariner IV cloud photographs 20 p3655 A66-38022  
Meteorological studies from manned spacecraft discussing interpretation of cloud pictures and optical inhomogeneity of tropo- and stratosphere 21 p3760 A66-39363  
High resolution IR scanning system and vidicon automatic picture transmission of Nimbus II and ground station printout instrumentation 21 p3821 A66-39497

## CLOUD PHYSICS

Combined effect of turbulent gravitational and electrostatic coagulation on growth rate of cloud droplets estimated by two-layer model of process 01 p0096 A66-10658  
Growth of ice crystals freely falling in atmosphere and form when produced by cloud element coagulation analyzed, using low pressure chamber 01 p0097 A66-11105  
Radar reflectivity of developing convective clouds statistically related to state of turbulence and thunderstorm hazard 02 p0252 A66-11270  
Equations describing crystallization process in low level clouds as function of ice crystal penetration from upper clouds or from artificial seeding 02 p0254 A66-12023  
Angular volume-scattering functions measured as function of scattering angle for natural fogs in atmosphere, using coherent and incoherent radiation 02 p0262 A66-12211  
Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 04 p0542 A66-14306  
Microstructural fluctuation in low clouds, investigating cloud droplet spectra and fluctuation of absolute total

concentration 05 p0712 A66-15115  
Cloud physics - International Conference, Tokyo and Sapporo, Japan, May 1965 06 p0904 A66-16266  
Numerical study of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17370  
Spectral density of vertical wind gusts in clouds calculated, including turbulent energy dissipation rates in cloud strata 09 p1398 A66-19884  
Statistical theory of inert particle fluctuations applied to fine structure of clouds and formation of cloud-particle spectrum 09 p1398 A66-19890  
Liquid and particulate content of atmosphere noting surface rates of rainfall, particle size distribution, cloud data, aerosols, etc 09 p1398 A66-20272  
Tiros IV satellite photographs of various storms, relating equivalent black body temperatures shown on IR analysis to cloud height 09 p1399 A66-20731  
Crystallization kinetics in supercooled cloud under natural conditions 11 p1725 A66-22196  
Precipitation distribution in frontal clouds measured from aircraft 11 p1725 A66-22265  
Heat and humidity transfer effects and turbulent exchange influence on cloud formation 11 p1730 A66-22941  
Differential equations describing air movement, heat exchange and exchange of moisture 11 p1730 A66-22942  
Observation of noctilucent and nacreous clouds from satellites 11 p1730 A66-22944  
Internal wave ripples from fluid impacts on base of stably stratified fluid region, calculating particular case of single ripple in viscous fluid 11 p1693 A66-23009  
Preferred thunderstorm development near surface boundary between maritime tropical air masses and dry air masses, defining radar echo areas 11 p1731 A66-23382  
Solar near-IR scattering by sunlit terrestrial clouds as affected by cloud type, altitude and scattering angle 13 p2073 A66-25989  
Electrostatic interaction effect on EM waves scattering by atmospheric aerosol particles 14 p2284 A66-27539  
Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 14 p2327 A66-28219  
Two Project High Water experiments producing optical, ELF, RF, and radar data on ionospheric abort of large water quantities and expansion process 14 p2289 A66-28417  
Cloud top heights and areal coverage obtained from satellite IR measurements, noting error estimation and effect of cloud size on accuracy 15 p2485 A66-28938  
Sounding rocket-released artificial strontium and barium ion cloud motion in upper atmosphere, based on equations of ambipolar diffusion 15 p2491 A66-29950  
Martian clouds analysis and topographical relationships, discussing white and yellow classification and frequency of occurrences 15 p2602 A66-29951  
Homogeneous nucleation of water vapor determined by laser beam scattering from cloud 16 p2716 A66-30121  
Critical electric field for charged droplets atomizing, noting spark discharge and ion concentration in clouds 16 p2742 A66-31109  
Precipitation model explaining formation of rain drops from clouds less than several kilometers thick, assuming Gaussian frequency distribution of vertical currents 18 p3130 A66-35015  
Precipitation occurrence in fluctuating updraft 18 p3130 A66-35018  
Heat and humidity transfer effects and turbulent exchange influence on cloud formation 20 p3593 A66-37854  
Differential equations describing air movement, heat exchange and exchange of moisture 20 p3593 A66-37855  
Observation of noctilucent and nacreous clouds from satellites 20 p3593 A66-37857  
Lightning flash mechanisms and electric field strengths in clouds 21 p3759 A66-38533  
Airborne photoelectric device for registration of cloud

drops 21 p3739 A66-39365  
Turbulent refractivity spectrum and optimization of airborne radar CAT detectors 22 p3944 A66-40429  
Electric field effects on collision efficiency of charged cloud droplets 23 p4065 A66-41846  
Electrostatic interaction effect on EM waves scattering by atmospheric aerosol particles 24 p4198 A66-42325  
Heterogeneous formation of seed crystals on wettable and nonwettable condensation nucleus in supercooled water droplets 24 p4234 A66-42756

## CLOUD SEEDING

Nucleation of ice formation in supercooled clouds as result of lightning-initiated sound waves 04 p0542 A66-13674  
Resonance radiation emitted by alkali cloud for ionospheric temperature measurement, considering multiple scattering and radiative transfer inside cloud 05 p0672 A66-15040  
Urea effective ice nucleant in supercooled clouds due to endothermic heat of solution and high solubility 13 p2122 A66-26125

## CLUSTER

## SA STAR CLUSTER

Degree of clustering expected from 500-mb horizontal sounding system, using stream functions and velocity potentials derived from historical tapes of National Meteorological Center 13 p2121 A66-25815  
Thermal conductivity of carbon dioxide in critical region interpreted, considering gas as mixture of clusters and heat transfer due to formation and breaking of clusters 21 p3837 A66-39454

## CLUTCH

Overrunning clutches in gas turbines, design, performance characteristics and application to A-4D Skyhawk aircraft, UH-2 helicopter and Curtiss-Wright X-19 VTOL drive systems [AIAA PAPER 66-GT-92] 14 p2300 A66-26996

## COALESCENCE

Condensed phase particle growth in rocket nozzle by particle collision and coalescence [AIAA PAPER 66-639] 18 p3164 A66-34438  
Behavior of wave function for system of charged particles near coalescence of any two of them, noting electron-nucleus cusp conditions for diatomic molecules 22 p3861 A66-40904

## COANDA EFFECT

Attraction switching through use of parallel secondary injection in Coanda-effect nozzle 03 p0355 A66-12775  
Flow of thin jets in vicinity of solid walls with diverging profiles 07 p1026 A66-18230  
Fluid devices as affected by delay for signal transmission in lines, jet behavior and Coanda effect 13 p2062 A66-25366  
Stream-interaction amplifiers and uses in fluidic circuits, discussing momentum exchange, pressure differential and Coanda effect 18 p3053 A66-33898  
Operating characteristics of pneumatic bistable element using Coanda effect, examining correlation between outlet flow and pressure and feed pressure 21 p3697 A66-38802

## COATING

## SA BIREFRINGENT COATING

## SA CERAMIC COATING

## SA CLADDING

## SA DOPING

## SA ELECTROPLATING

## SA FILM

## SA FINISH

## SA FLAME SPRAYING

## SA GLASS COATING

## SA PLASTIC COATING

## SA PLATING

## SA PROTECTIVE COATING

Electrolytic titanium coating properties, covering porosity coating elimination by repeated electrolysis 04 p0536 A66-14005  
Deformation components of photoelastic coatings of shells affected by errors due to rotation of direction of principal deformations 08 p1307 A66-18883  
Refractory oxides from alkoxides for group IVB transition and rare-earth metals applied to powders and coating of zirconia materials by thermal decomposition 16 p2730 A66-30249  
Test chamber to simulate vacuum and heat sink characteristics of space, measuring optical constants of

coatings 16 p2680 A66-30491  
Space environment degradation of thermal control coatings tested by experimental packages on Pegasus I, II and III [AIAA PAPER 66-419] 18 p3239 A66-33640  
Condensation tests in smooth and porous coated tubes in multi-g centrifugal acceleration fields for increasing heat transfer coefficient of condensing nitrogen 18 p3262 A66-34379  
Electrolytic titanium coating properties, covering porosity coating elimination by repeated electrolysis 22 p3935 A66-40547

## COAXIAL ACCELERATOR

## SA PLASMA ACCELERATOR

Exhaust of pinched plasma from axial orifice involves electromagnetic current profile diffraction and thermal expansion of gas column [AIAA PAPER 65-92] 02 p0267 A66-11536  
Velocity and momentum of high current steady state coaxial plasma noting mass flow, exhaust velocity, thrust, arc voltage and power 02 p0267 A66-11559  
Electrode erosion impurities effect on performance of coaxial plasma source in fast particle generation mode 02 p0268 A66-11778  
Langmuir probe velocity and acceleration measurements for coaxial Hall accelerators [AIAA PAPER 66-196] 10 p1562 A66-21441  
Radio locator for position of plasmoids from coaxial injector 10 p1570 A66-22007  
Plasmoid acceleration by coaxial accelerator 10 p1571 A66-22009  
Sufficiently pure plasmoids obtained, using coaxial plasma gun operating in waiting regime 10 p1571 A66-22010  
Energy distribution of hydrogen plasma from coaxial gun 10 p1571 A66-22013  
Energy efficiency trends in two-stage repetitively pulsed coaxial plasma accelerator 12 p1935 A66-23578  
Performance characteristics of two-stage pulsed coaxial plasma engine [AIAA PAPER 66-240] 12 p1935 A66-24518  
Particle collection and emission spectra observation in repetitively pulsed coaxial plasma accelerator [AIAA PAPER 66-197] 12 p1936 A66-24521  
Delays effect on performance of coaxial plasma guns with about 20 kv applied, shown to produce fast burst of clean plasma containing pure hydrogen ion 13 p2000 A66-25750  
Distribution of current and associated field in coaxial plasma gun, noting plasmoid formation from drift 13 p2153 A66-26521  
High energy particle generation in coaxial plasma gun studied by discharge-current curve 13 p2153 A66-26522  
Plasma contamination by electrode material in coaxial accelerator reduced by longitudinal magnetic field 13 p2153 A66-26523  
Predicted and observed calorimetric exhaust efficiencies of capacitor powered coaxial plasma guns [AIAA PAPER 65-340] 15 p2551 A66-29275  
Coaxial plasma accelerator experiments, determining relation with plasma front velocity, density profile and temperature 17 p2972 A66-32871  
Coaxial plasma gun performance in longitudinal magnetic field, noting conditions of generation of single plasmoid 18 p3151 A66-35070  
Plasmoid structure produced by coaxial plasma gun with interchangeable polarity electrodes, noting experimental setup, particle velocity, density, energy, etc 18 p3151 A66-35071  
Hydrogen density in coaxial plasma injector prior to application of high voltage to electrodes, noting experimental setup and results 18 p3151 A66-35072  
Radio locator for position of plasmoids from coaxial injector 19 p3407 A66-36091  
Plasmoid acceleration by coaxial accelerator 19 p3407 A66-36093  
Sufficiently pure plasmoids obtained, using coaxial plasma gun operating in waiting regime 19 p3407 A66-36094  
Energy distribution of hydrogen plasma from coaxial gun 19 p3407 A66-36097  
Current jet and plasma produced by coaxial plasma gun which is source of abundant slow deuterium plasma and fast plasma, examining acceleration

mechanism 19 p3425 A66-36565  
Plasma generating gun using coaxial electrodes, gas injection and preionization device for regulation with plasma purification by injection into magnetic field with double curvature 19 p3427 A66-36572  
Neutral mass density measurements in repetitively pulsed coaxial plasma accelerator 21 p3776 A66-38690  
Fast plasmoid produced by coaxial plasma accelerator, examining mass and energy spectra of plasma ion component 21 p3785 A66-39035  
Energy-and mass-spectrum measurements of ions from plasmoids from coaxial plasma source, examining plasma acceleration mechanism inside source 21 p3785 A66-39036  
Plasmoid composition effect on electrode geometry in coaxial plasma gun, decreasing impurity concentration by gun design and electrode material choice 21 p3785 A66-39037  
Plasma jet motion from coaxial plasma gun through magnetic field of quadrupole lens, examining interaction of plasma with magnetic field 21 p3788 A66-39054  
Pinch phenomena and current distribution in coaxial plasma gun 23 p4101 A66-41295  
Energy storage film capacitors for pulsed plasma thrusters developed for coaxial plasma gun and pulsed arc gun [AIAA PAPER 65-337] 24 p4261 A66-42780

## COAXIAL CABLE

Coupling between coaxial line and plasma waveguide for three configurations, step, abrupt and tapered transitions 01 p0038 A66-10521  
Complex susceptibility measured, using voltage induced in loop around ferromagnetic core situated at short-circuit end of coaxial line 05 p0716 A66-15028  
Varactor evaluation using series resonance and determination of impedance locus of coaxially mounted varactors 07 p1008 A66-17513  
Dielectric loaded waveguides, defining surface, transverse and longitudinal impedances in analogy with circuit theory definition 08 p1200 A66-19121  
Generator for high-voltage pulses with pulses shaped by two-section length of line with transformation by pulse transformer employing coaxial cable windings 08 p1194 A66-19282  
Microwave frequency feedthrough for vacuum systems suitable for use up to X-band, using Teflon-filled rigid type coaxial line 08 p1197 A66-19700  
Self-compensation of phase angle of Diane station coaxial cable of discontinuous disk structure throughout wide temperature range 10 p1511 A66-21709  
Propagation of quasi-TEM mode in ferrite-filled coaxial line 10 p1506 A66-21913  
Propagation velocity and attenuation variation effect in coaxial cables on frequency modulated carrier evaluated, using IBM 1620 computer 16 p2649 A66-30542  
Diffraction of linearly polarized electromagnetic wave by coaxial cylinders, deriving approximate solution for wavelengths smaller than distance between cylinder centers 18 p3068 A66-33977  
Microwave coaxial termination as low temperature noise-reference source, noting variation of VSWR with voltage and frequency 18 p3077 A66-34078  
Thermal conductivity measurements for hydrogen via coaxial cylindrical cell noting temperature, pressure effects, residual and conductivity values 19 p3479 A66-36290  
Electromagnetic interference shielding for conductors that excludes interference energy caused by both magnetic and electric fields over broad frequency range 20 p3499 A66-37195  
Diffusion controlled breakdown theory applied to compute breakdown potential of helium in coaxial geometry by solving continuity equation 23 p4105 A66-41584  
Design and performance analysis of HF analog and digital circuit, using double-transistor in which signal is fed to transistor stage via coaxial cable 24 p4184 A66-42646

## COAXIAL FLOW

Mean flow pattern of round air jet in ambient airstream parallel to jet axis 06 p0802 A66-16504

Propagation of microwaves through circular cylindrical metallic guide filled with two different dielectrics 06 p0857 A66-16951

Stationary flow of viscous incompressible anisotropically conducting fluid in coaxial channel 11 p1743 A66-22235

Oscillation of viscoelastic liquid between stationary outer coaxial cylinder and vibrating inner coaxial cylinder 11 p1688 A66-22440

Mixed flow of two gases through coaxial cylindrical tubes separated by perforated plate 14 p2273 A66-26782

Electric and magnetic-field parameters measured during discharge half-cycle in coaxial plasma source 21 p3785 A66-39038

Second-order fluid flow over finite rotating disk enclosed within coaxial cylindrical casing 21 p3729 A66-39452

Steady liquid flow between rotating coaxial cylinders with arbitrary dependence of viscosity on temperature 22 p3902 A66-40814

**COAXIAL TRANSMISSION**

Reflection and transmission coefficients of magnetically biased YIG ferrimagnetic resonator loaded in aperture of iris in coaxial transmission line 05 p0641 A66-14555

Fundamental electromagnetic wave propagation in coaxial line filled with inhomogeneous dielectric 06 p0823 A66-15886

Nanosecond electromagnetic pulse dispersion in longitudinally magnetized plasma confined in coaxial transmission line 06 p0826 A66-16026

Coaxial transmission line with adjustable harmonic phase delay equalizer network 06 p0848 A66-16105

Precision coaxial standard and component designs based on constant impedance, coplanar compensation and mechanical tolerance sensitivity 10 p1514 A66-21907

P-i-n diode coaxial attenuators and levers noting design, performance parameters and application 12 p1831 A66-23812

Mode selective coaxial directional couplers for measurement of unwanted harmonics effect 13 p2044 A66-26745

Maximum and minimum power absorbed by antenna connected through coaxial transmission line to transmitter under unmatched conditions 18 p3078 A66-34168

**COBALT**

Cobalt electrode performance in high temperature fuel cells, presenting V-I characteristics 01 p0014 A66-10358

Oxidation kinetics of tantalum-iron and tantalum-cobalt alloys and iron and cobalt at 500-900 degrees C 04 p0535 A66-13696

Martensitic transformation in alloys with aging martensite, discussing effects on molybdenum, Fe-Ni alloy, cobalt and titanium 05 p0700 A66-14859

Effect of tantalum carbide additions on mechanical, thermal and chemical properties of WC-TiC-Co alloys 08 p1239 A66-18902

Crystal structure and allotropic transformation of cobalt and thermal, thermodynamic, electrical and magnetic properties 08 p1240 A66-18961

Specific heat of iron, cobalt and nickel in high temperature range measured, using quasi-adiabatic operating calorimeter 08 p1240 A66-19255

Fe, Ni and Co in gallium arsenide determined by tunnel spectroscopy 08 p1278 A66-19624

Changes in domain structure of cobalt films as function of substrate temperature during sputtering and transformation from poly- to single-crystal structure 11 p1753 A66-22803

Magnetic and semiconducting properties of solid solutions of LaMnO sub 3 and LaCoO sub 3 14 p2353 A66-26900

Fe, Ni and Co in gallium arsenide determined by tunnel spectroscopy 17 p2984 A66-33138

Optical absorption spectra of cobalt ion in magnesium aluminate crystal 20 p3621 A66-37822

Butler iron meteorite composition, noting unusually high cobalt and germanium content and low cooling rate 22 p3978 A66-40013

**COBALT ALLOY**

Refractory metal carbide solubility in

cobalt dependent on carbon content, crystal structure and metal-carbon bonds 01 p0085 A66-10287

Silicon and iron effects on embrittlement of cobalt-base alloy 01 p0085 A66-10357

Thermodynamic properties of cobalt-molybdenum alloys determined by emf method measured between 1170 and 1470 degrees K 01 p0088 A66-10940

Thermodynamic properties of cobalt-niobium alloys determined by emf method measured between 1275 and 1425 degrees K 01 p0088 A66-10941

Creep and fracture of series of nickel-cobalt alloys due to variation in stacking fault energy, noting incidence of annealing twins 02 p0245 A66-11947

High temperature nickel and cobalt superalloys for turbojet engines [AIAA PAPER 65-741] 03 p0382 A66-13052

Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 03 p0382 A66-13053

Interpretation of nuclear magnetic resonance spectra from cobalt alloys containing small amounts of solute atoms 04 p0564 A66-14032

Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 07 p1049 A66-17905

MAR-M 509, new cast cobalt-base superalloy for high temperature service, noting creep strength, aging, microstructure, oxidation resistance, etc 08 p1239 A66-18958

Effect of thermal and thermomagnetic treatment of nickel-cobalt ferrite single crystal on rotational magnetic hysteresis losses 09 p1412 A66-19883

Residual stress-strain state of WC-Co alloys by changing sample size during process 09 p1389 A66-20806

Plastic deformation preceding fracture in tungsten carbide-cobalt alloys 11 p1717 A66-22994

Hardness, coercive force, saturation induction and electric conductivity during precipitation hardening of two Co-Ni alloys with Ti and Al admixtures 12 p1894 A66-23967

Age hardening response correlated with structural observations of iron-nickel-cobalt alloys 12 p1895 A66-24374

Aging effect on structure of cobalt alloys annealed at 1200 degrees C suggests formation of laminar regions 12 p1898 A66-25030

Structural, physical and mechanical properties of hard alloys formed by sintering powdered VK 15 tungsten cobalt alloy with nonuniformly distributed carbide phase 15 p2520 A66-28753

X-ray investigation of niobium-cobalt system 16 p2725 A66-31457

Cobalt and nickel eutectic alloys modification with selected elements for high temperature application, noting microstructure and tensile behavior 16 p2726 A66-31460

Structural and physical properties of WC-TaC-Co and WC-NbC-Co alloys studied by metallographic, electrochemical and X-ray methods 17 p2939 A66-31970

Structural transformations in alnico alloy with titanium studied by X-ray 18 p3123 A66-34401

Plastic deformation effect on physical and mechanical properties of hard cylindrical samples of tungsten-cobalt alloy 21 p3752 A66-39405

Casting technique based on directional solidification for nickel and cobalt alloys used in gas turbine blades [AIAA PAPER 65-742] 23 p4079 A66-40973

Notch and heat treatment effect on compressive buckling of WC/Co alloys 24 p4228 A66-43063

**COBALT COMPOUND**

Electrical and magnetic properties of cobalt telluride /gamma phase/ to verify semiconductive character 04 p0559 A66-13479

Cobalt-vanadium-boron system, discussing phases with boron coordination number 8 07 p1047 A66-17225

Optical absorption, energy level structure and exchange interactions of cobalt and

sodium cobalt fluoride ions 14 p2357 A66-27075

Inverted susceptibility, inversion ratio, line widths and spin-lattice relaxation times for maser operation point in chromium-doped cobalt potassium cyanate 16 p2718 A66-30934

Phase relations in cobalt niobate-cobalt tantalate system noting structural characteristics, solubility, phase transitions, etc 17 p2940 A66-33062

**COBALT OXIDE**

Short-time high temperature oxidation of cobaltous oxide 16 p2646 A66-30671

**COBALT 60**

Recombination process of electron-hole pairs in germanium irradiated with cobalt 60 gamma rays, using photovoltaic effect in p-n junctions 06 p0938 A66-17146

Aluminum oxide inclusions effect on radioactive cobalt 60 autodiffusion observed, noting higher diffusion in samples prepared by powder methods 13 p2110 A66-25964

Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n-and p-type material 20 p3617 A66-37552

**COCHLEAR**

Temperature effect on amplitude of cochlear microphonic and on latency action potential of auditory nerve 06 p0812 A66-16405

Effect of oxygen deficiency on acoustic organ of cats, determining content of potassium and sodium ions in perilymph, cerebrospinal fluid and blood serum 13 p2011 A66-26251

Response patterns to tone-burst stimulation of cochlear nucleus and dependency on stimulus parameters 22 p3855 A66-40375

**COCK AIRCRAFT**

S ANTONOV AN-22 AIRCRAFT

**COCKPIT**

SA AIRCRAFT CABIN

Cockpit display correction methods used in design of Trident aircraft 03 p0328 A66-12882

Human perceptual mechanism defined by psychological research and applied to aircraft cockpit display design 03 p0329 A66-12883

Optimum operational influence on design of DC-9 cockpit 07 p0988 A66-17704

White light rather than red for illumination of instruments and cockpits 11 p1648 A66-22667

Flight deck display for future aircraft projects, emphasizing vertical scale director instruments for cockpit display 11 p1649 A66-23250

**COCKPIT SIMULATOR**

Mixed translation and attitude control system using single cockpit stick for low-speed flight control of VTOL aircraft 05 p0610 A66-15078

Wind tunnel, simulator and flight test results to evaluate cockpit accelerations, handling qualities and stability and control of jet transports in severe turbulence [AIAA PAPER 65-330] 16 p2634 A66-31317

British fixed-base aircraft cockpit simulator experiments, testing pilot performance when relying on windshield display as primary information source 17 p2865 A66-32182

Cockpit displays associated with low altitude high-speed flight, emphasizing shift toward designing around man 19 p3287 A66-35508

Extravehicular activity /EVA/ mission simulation, discussing design parameters effect on operating characteristics 19 p3469 A66-35969

Point-to-point contouring systems noting procedures, codes and cost savings [ASTME PREPRINT MS66-725] 12 p1887 A66-24423

## CODING SYSTEM

SA DECODER  
SA ENCODER

Cluster finding technique for determining and coding subclasses in pattern recognition problems 01 p0034 A66-10894

Textbook on communication engineering emphasizing random processes, information and detection theory, statistical communication theory, applications, etc 03 p0335 A66-12992

Value of information concept relating Shannon information theory to theory of optimal solutions 03 p0336 A66-13034

Coding states of partial automaton where memory-element transition functions depend on minimum possible number of variables 03 p0338 A66-13041

Binary pulse sequence conversion to pseudoternary codes for data transmission 04 p0474 A66-13423

False-signal probability in telemetry signals using group distribution and group variable-performance codes 04 p0504 A66-13776

Coding theorems for almost-periodic channels 05 p0638 A66-15362

Nonorthogonal coding in communicating through dispersive or multipath fading channels for increased data rate without increased bandwidth 06 p0835 A66-16866

Properties, symmetries, code matrices and Euler paths for linear graphs used as models for physical systems, considering planar triply connected graphs 07 p1057 A66-17747

Slope quantized binary pulse code modulation by coding signal slopes with unidigit 1/0 pulses, using special feedback circuit and threshold in coder comparator 07 p1002 A66-18248

Optimized hybrid unidigit pulse code modulation system, noting use of secondary feedback loop and equalization of gain/frequency characteristic of coder 08 p1186 A66-19740

Pulse code modulation coder, using delay line as coding network 08 p1186 A66-19744

Generation, selection and implementation of burst-error-detecting and -correcting Fire code, using computed

tables 10 p1496 A66-21513

Linearly separable codes for adaptive threshold networks for pattern recognition 10 p1507 A66-21696

Information assimilation from conspicuity coding of updated alphanumeric information, comparing relative effects of individual and group displays 12 p1809 A66-23927

Lincoln Experimental Terminal /LET/ signal processing system, design, operation and application 13 p2022 A66-25516

Abridged Hamming and Fire code efficiency with respect to randomly distributed disturbances 14 p2245 A66-26794

Information theory, role in communication systems, detailing coding systems 14 p2239 A66-27808

Polyphase coding modulation system with additive white Gaussian noise, finding channel capacity bounds on maximum rate and error exponent 15 p2452 A66-29659

Improvements to be realized through use of single channel black coded communication system 17 p2873 A66-31967

High scanning frequency for transmitting radar information to vehicles with beam arranged to form coded pulse signal 18 p3070 A66-34257

Value of information concept relating Shannon information theory to theory of optimal solutions 18 p3072 A66-34997

Coding states of partial automaton where memory-element transition functions depend on minimum possible number of variables 18 p3074 A66-35004

Space telecommunications techniques, examining reduction of all transmissions to digital type, using current theoretical coding methods and recurrent codes and block codes for error detection 20 p3516 A66-37432

Coding scheme using noiseless feedback link to improve communication over noisy forward link, assuming no bandwidth constraint 21 p3704 A66-39142

Coding scheme using noiseless feedback link to improve communication over noisy forward link, assuming band-limited signals 21 p3704 A66-39143

Communication design techniques for coding set of discrete memoryless channels where transmitter and receiver have no knowledge of channels

selected 21 p3705 A66-39144

Computer code packages for radiation shielding calculations 21 p3769 A66-39392

Modulation and demodulation for probabilistic coding, noting error chances and interrelations affecting performance of communications system 21 p3707 A66-39636

N-orthogonal phase-modulated codes generalized from first-order Reed-Muller codes and biorthogonal

signals 21 p3721 A66-39641

Matrix interpretive codes including SELMA, FORTRAN and

ALGOL 23 p4042 A66-41740

## COHENITE

Origin and chemical composition of cohenite in meteorites and temperature dependence of weight-percentage content 22 p3981 A66-40479

## COHERENCE COEFFICIENT

EEGs of monkeys stimulated cyclically by whole-body vibration, plotting coherence functions relating brain records to acceleration records 12 p1806 A66-24228

Doppler shift and high velocity mirror translation effects on mutual optical coherence function of gas laser Michelson interferometers 19 p3354 A66-35387

## COHERENT LIGHT

Interference effects at thin transparent cylindrical glass fibers exposed to coherent light from He-Ne laser 01 p0081 A66-10368

Switching with optical signals classifying polycrystalline noncoherent and coherent types of optoelectronic devices 02 p0200 A66-11890

Coherence theory for collimation and focusing of time-averaged intensity of pulsed multimode laser radiation 02 p0242 A66-12205

Ultimate sensitivity limit and photoelectron statistics for photomultiplier lit by coherent and noncoherent light 03 p0377 A66-12473

Book on modern optics including laser and coherent light, geometrical optics, lens systems, instruments, etc 03 p0392 A66-12623

Semiconductor application to coherent optical transducers and spatial filters 05 p0647 A66-14822

Pulsed IR laser simulating radiation-induced transient ionizations in semiconductor devices and circuits 05 p0693 A66-14853

Mixed integration techniques used for signal detection having coherence time less than duration when propagating through time-varying medium 06 p0828 A66-16112

Phase perturbation of optical beams due to atmospheric turbulence, using modulated interferometer to produce Doppler beats between two coherent

beams 06 p0909 A66-16434

Triangular resonator for coherent light sources, considering natural oscillations and energy withdrawal 06 p0893 A66-16883

Spontaneous emission noise effects on coherence properties of laser 10 p1542 A66-21550

Coherent light recording and reproduction system 11 p1711 A66-22270

Equations obtained from Hamiltonian for coupling, first Stokes line, first anti-Stokes line and coherent field for Raman laser 11 p1711 A66-22490

Coherent laser light for conventional and unconventional photographic situations 11 p1705 A66-22670

Absolute wavelength stability of helium neon laser measured by direct interferometric comparison with Hg 198 standard lamp 11 p1712 A66-22868

Weakly focusing transparent media properties and guided transmission of coherent light beams with relatively small loss 11 p1657 A66-23091

Two-beam interferometry by wavefront reconstruction from hologram recorded with coherent background successively interfered in same latent image 11 p1708 A66-23204

Holograms and wavefront reconstruction techniques involving prismatic refraction of monochromatic and coherent laser light causing interference pattern on photographic emulsion 13 p2076 A66-25144

Coherent light recording/reproducing techniques based on Debye theory of coherent light source focusing 13 p2091 A66-25541

Magnitude and phase of complex spatial coherence of He-Ne laser beam 13 p2104 A66-26334

Reconstitution in space of curve recorded photographically by displacement of luminous point illuminated by coherent light 13 p2082 A66-26343

Two-beam interferometry in coherence theory 14 p2330 A66-26965

Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 14 p2307 A66-27195

Laser detection of coherent light and superheterodyne and nonlinear parametric studies in optical spectrum 14 p2309 A66-27821

Attenuation of coherent optical waves propagating in troposphere, noting molecular scattering, bending of refractive index homogeneities due to temperature gradients in air, etc 15 p2448 A66-28578

Coherent emission from trivalent holmium ions in rare earth substituted yttrium aluminum garnet, noting three energy transfer combinations in YAG 15 p2512 A66-28690

Kinetic theory of two-photon absorption from single mode of radiation field, noting dependence on coherence properties of field 15 p2544 A66-28943

Influence of object contrast upon partially coherent image formation 15 p2501 A66-28979

Thermal effects in various media due to laser beam 15 p2515 A66-29209

Giant coherent light pulse generation by Q-factor-modulated laser 16 p2719 A66-31183

Partial coherence theory, discussing mutual coherence function, coherent fields, imaging theory, etc 16 p2748 A66-31241

Coherent optical systems in signal processing techniques, information theory and antenna pattern simulation 16 p2657 A66-31242

Coherence properties of optical fields, examining interference effects, intensity fluctuations, photoelectric effects and pulsations 16 p2749 A66-31584

Coherence conditions effects on electromagnetic field density operators and photon density distribution in single excited mode 17 p2957 A66-31975

Optical coherence functions and properties from statistical viewpoint for application to spectroscopy and stellar interferometry 17 p2957 A66-31987

Thermal effects in various media due to laser beam 17 p2936 A66-33058

Measuring amplification of coherent optical radiation in neon-helium filled tube 17 p2938 A66-33512

Parrent theorem in coherence theory

proved, using Fourier-Stieltjes integrals 18 p3118 A66-33987

Coherent laser-type light generators with capability of adjusting frequency over visible spectrum 19 p3375 A66-36265

Holography principles, discussing basic equation, Fourier transform holograms and hologram interferometry 20 p3556 A66-36929

Coherent laser light use in atmospheric communications system, discussing effect of atmospheric turbulence and small vibrations on coherent detection efficiency and SNR 20 p3511 A66-36930

Partially coherent light, noting distinction between narrow-band coherent and incoherent sources 20 p3575 A66-36935

Transformation coefficient and secondary radiation pattern when doubling frequency of focused coherent light beam in approximation of given primary-beam field 20 p3576 A66-37145

Spectrum of spatial frequencies of object analyzed through Michelson method 21 p3738 A66-39130

Holography, discussing potential uses, frozen wave fields, holograms at X-ray wavelength and stress 21 p3739 A66-39199

Signal processing by coherent and incoherent light systems for application in seismology, radar, speech recognition, etc 22 p3862 A66-39734

Magnetic resonance in He 3 ground states examined through interaction with metastable atoms in gas discharge, observing transfer of transverse magnetization by collision 22 p3931 A66-39809

Traveling-wave phase modulation of coherent light propagating in anisotropic medium 22 p3933 A66-40867

Photon time-of-arrival distribution measured in highly monochromatic and spatially coherent light beam from low pressure Hg discharge 23 p4076 A66-41265

Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369

Measuring amplification of coherent optical radiation in neon-helium filled tube 24 p4219 A66-42125

Pulsed laser holograph and problem of overcoming limited coherence 24 p4211 A66-42560

Gas-discharge CW lasers, particularly He-Ne, carbon dioxide, argon-ion and pulsed self-terminating lasers, discussing classification, power output and gain, Doppler width, coherence and noise 24 p4224 A66-42801

Horizontal deflection in TV display produced by Bragg reflection of laser light by ultrasonic waves in water 24 p4212 A66-42816

Bose-Einstein distribution function for quantum photons from amplified spontaneous emission 24 p4226 A66-43093

**COHERENT RADAR**

Distance-and velocity-measurement errors in coherent-pulse systems with periodic modulation law 06 p0837 A66-17180

Master oscillator stability requirements for coherent radar systems 12 p1835 A66-24132

Distance-and velocity-measurement errors in coherent-pulse systems with periodic modulation law 19 p3297 A66-35538

Radar partial coherence theory for clutter construction relationship to radar cross section, waveform coding, output signal, mutual coherence function and random noise 23 p4037 A66-41312

Coherent CW superheterodyne radar system for studying backscattering from hypersonic velocity projectile wakes 24 p4191 A66-42196

**COHERENT RADIATION**

Coherence properties of helium-neon laser with superimposed modes examined by interference pattern 01 p0081 A66-10337

Sharply directional coherent radiation generation by synchronized lasers or multimirrored resonator of single laser 01 p0083 A66-11007

Scattering of radio waves by oscillating reradiators randomly arranged on planar absorbing discontinuity 02 p0190 A66-11409

Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 04 p0568 A66-14346

Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 04 p0533 A66-14363

History and development of molecular amplification by stimulated emission of radiation, noting various laser types 05 p0696 A66-15034

Rare earth chelates preparation, luminescence behavior and laser action 05 p0741 A66-15833

Spontaneous radiation and nonresonant losses as dominant effects in conversion of incoherent light into coherent induced radiation 06 p0889 A66-15891

Coherent radiation from gallium arsenide p-n junction formed by beryllium diffusion, noting radiative recombination with zinc 07 p1105 A66-18378

Beat frequencies and coherence properties in circularly polarized atomic transitions of gaseous lasers with axial magnetic fields 07 p1046 A66-18429

Laser emission in pure cadmium sulfide crystals bombarded by electron beams 08 p1233 A66-18650

Coherent excitation of mercury resonance state by irradiation with light modulated at Larmor frequency 08 p1233 A66-19089

Gallium arsenide luminescent diodes with triangular resonator producing coherent emission at high density 08 p1193 A66-19195

Coherent amplification coefficients of neon lines in helium-neon mixture 08 p1234 A66-19310

Sharply directional coherent radiation generation by synchronized lasers or multimirrored resonator of single laser 09 p1386 A66-19945

Coherent radiation effect on stability of crossed field electron beam, noting raising of potential of space vehicle 10 p1564 A66-21544

Coherent behavior of light-quantum field in quantum electrodynamics, noting explicit terms of correlation and characteristic field conditions for nth order coherence 12 p1913 A66-23727

Pulse excitation of volume of gas to coherently radiating state applied to beam maser spectrometer 12 p1879 A66-23731

Coherence properties of quantized electromagnetic field and hierarchy of correlation functions for complex field operators 13 p2128 A66-26218

Unitarity conditions for photon echo detectors of coherent radiation 13 p2128 A66-26219

Spatial selective fading as random process, discussing spatial coherence, wave number dispersion profile, time delay profile, etc, in ionospheric propagation 14 p2234 A66-26859

Laser radiation coherence property deterioration and molecular scattering during propagation through turbulent atmosphere 14 p2236 A66-27131

Semiconductor and dielectrics for generation of coherent short-wave radiation, using electron beam for excitation 14 p2368 A66-28242

Optically connected laser constructed on gallium arsenide p-n junction, noting coherent radiation 14 p2310 A66-28262

Charged particle acceleration by coherent radiation 14 p2348 A66-28313

Laser lines due to energy transfer from color centers to erbium ions in calcium fluoride crystals irradiated by gamma ray 16 p2717 A66-30278

Truncated equations describing coherent radiation of excited chromium ions in ruby situated in traveling wave resonator 16 p2720 A66-31547

Minimum spectral line width, threshold current density, radiation-peak displacement and possible recombination mechanism for GaSb laser diode p-n junctions in coherent radiation 16 p2721 A66-31764

Spontaneous and induced coherent radiation from indium antimonide electron-hole plasma 16 p2721 A66-31768

Coherent emission of indium arsenide phosphide p-n junction 16 p2721 A66-31788

Focused laser coherent radiation-induced

degradation of solid methylene and gas chromatographic analysis of reaction products 17 p2933 A66-31870

Coherent plasma radio wave emission ineffective for quasar, Crab Nebula and supernovae remnants 17 p2996 A66-31913

Laser oscillation in flash photolysis of carbon disulphide and oxygen to form CO 17 p2933 A66-31941

Oscillation conditions for feedback lasers, superradiant directionally coherent emission lasers and coherence brightened emission lasers 17 p2934 A66-32628

Laser based on excitation of gallium phosphorus arsenide solid solution by beam of fast electrons 17 p2937 A66-33304

Coherence in radiation peaks of ruby laser studied through interference field 17 p2938 A66-33510

Radiation characteristics of circular aperture and linear antenna with partially coherent illumination 18 p3074 A66-33536

Laser action on several hyperfine transitions in Mn I 18 p3118 A66-34000

EAS RF emission detection, discussing enhanced Cerenkov radiation, mutual coherence effects, diffraction, Fresnel zones, Coulomb-field bremsstrahlung, etc 18 p3208 A66-35117

Jodrell Bank experiment testing Askarian hypothesis on radio pulses coincident with EAS under mutual coherence effects and checking coherent condition, internal reflection, shower energy, threshold and polarization 18 p3209 A66-35118

Spatial coherence measurement of He-Ne laser output 19 p3373 A66-35592

Selective feedback and saturation mechanisms of Raman lasers using secondary Raman lines, emphasizing cyclohexane 20 p3579 A66-37777

Coherent radiation generation in IR region by nonlinear optics 20 p3582 A66-38429

Coherent radiation generation in IR region by nonlinear optics 21 p3746 A66-38962

Born approximation for phase shift of microwaves scattered from underdense cylindrical plasma used to determine plasma electron density 21 p3794 A66-39572

Coherent radiation generation in electron-hole indium antimonide plasma, discussing emission spectrum 22 p3965 A66-40319

Doppler frequency shift for radio waves radiating coherently from satellite in ionosphere, considering electron concentration and angles of refraction 22 p3869 A66-40779

Coherence in radiation peaks of ruby laser studied through interference field 24 p4218 A66-42124

Coherent amplification of RF radiation in cosmic space 24 p4265 A66-42754

Quenching of stimulated Raman scattering of coherent radiation by two-photon absorption in organic liquids 24 p4226 A66-43039

**COHERENT SCATTERING**

Angular volume-scattering functions measured as function of scattering angle for natural fogs in atmosphere, using coherent and incoherent radiation 02 p0262 A66-12211

Barrat theory of multiple scattering of magnetic resonance radiation, accounting for vapor dispersion and photon propagation time 05 p0697 A66-15172

Spatial structure for second harmonic generated in anisotropic medium by finite-aperture light beam 08 p1233 A66-18969

Multiple scattering effects on propagation of coherent optical signals studied for laser communications 15 p2448 A66-28580

Dispersion degree of coherent scattering regions, microdeformation and packing defects probability in fcc metals determined, using approximation method 19 p3438 A66-35496

Optical superheterodyne reception of coherent signals scattered by diffuse surface 20 p3516 A66-37456

Spatial distribution of hot electrons coherently scattering in thin Au film 23 p4115 A66-42063

**COHERENT SOURCE**

Plasma electron concentration measured by Fabry-Perot interferometer partially filled

with gas-discharge plasma and incorporating ruby laser 03 p0375 A66-12294

Intensity distribution in Fraunhofer diffraction patterns of slit and apertures illuminated by partially coherent light 18 p3118 A66-33986

**COHERENT TRANSMISSION**

Coherent nonlinear interaction of two electromagnetic waves in plasma, noting F layer radio communication 01 p0029 A66-10594

Phase coherent and nonphase coherent coded communications systems, discussing theoretical word error probability vs signal to noise ratio 04 p0478 A66-13593

Thermal phase noise and VCO effects at ground receiver output of coherent two-way Doppler communication system 08 p1304 A66-19133

Coherent transmission of optical radar from laser source and use of RF subcarriers placed on optical beams for wideband communications purposes 14 p2244 A66-28404

Linear instability of laser propagation in fluid with coupling between light and medium 18 p3120 A66-35034

Statistical communication theory, examining problem of selecting set of M equipowered finite duration waveforms to minimize error rate for coherent channel perturbed by white Gaussian noise 21 p3704 A66-39140

**COHESION**

**SA ADHESION**

Relation of compressibility with cohesive energy and molecular volume for dielectric solids, noting confirmation of relation for 45 crystalline compounds 08 p1244 A66-19254

**COHOMOLOGY**

**S FUNCTION SPACE**

**COIL**

**SA ELECTROMAGNET**

**SA INDUCTOR**

**SA MAGNETIC COIL**

**SA MAGNETIC FIELD COIL**

**SA SOLENOID**

Circuitors from lumped circuit elements examined, calculating coil properties and analyzing construction 11 p1664 A66-22660

Plasma stream conductivity and velocity measurement, using systems of primary coil and several secondary coils 22 p3921 A66-40899

**COLD CATHODE**

Cold cathode gas discharge controlled by magnetic field in design of plasma switch 01 p0042 A66-10582

Aluminum cold cathodes with single mode 6328 angstrom helium-neon gas laser lifetimes exceeding 3000 hours 01 p0043 A66-10855

Brush cathode used in abnormal glow region, determining features of produced plasma 02 p0196 A66-11429

Present state of cold cathode development 03 p0345 A66-13235

HF noise from electron avalanches and relation to mechanism of cold cathode arc 04 p0502 A66-14480

Voltage stabilization using cold cathode trigger tubes 05 p0647 A66-14769

Cold cathode magnetron gauge characteristics and striking characteristics of gaseous discharge 13 p2078 A66-25647

**COLD FLOW TEST**

Subscale cold-flow rocket motor model used to determine effect of purely geometric variables on acoustic performance leading to axial mode combustion instability [AIAA PAPER 66-110] 06 p0944 A66-17080

Two-phase cold-flow modeling analysis for rocket nozzle, noting deviations from one-dimensional flow for static pressures on nozzle shape [AICE PREPRINT 44F] 22 p3971 A66-39881

**COLD FORMING**

Cold forming of metals, noting thin tube flow boundary variation with permanent deformation due to torsion and tension 13 p2195 A66-25455

**COLD HARDENING**

Effect of gamma phase aging and phase cold hardening on austenitic strength of Fe-Ni-Ti steels, noting martensitic point and segregation 05 p0699 A66-14689

Microquenched age-formed titanium alloys and titanium bialloy composites 14 p2313 A66-27093

**COLD NEUTRON**

Radiographic examination through steel using cold neutrons produced by placing polycrystalline beryllium neutron filter and single crystal bismuth gamma-ray filter in beam tube 06 p0884 A66-17030

**COLD PLASMA**

**S COLLISIONLESS PLASMA**

**S RAREFIED PLASMA**

**COLD PRESSING**

Atomic site changes in cold pressure welding of metal 16 p2710 A66-30309

**COLD TOLERANCE /BIOL/**

Effects of cold and abnormal atmosphere discussing tolerance limits to hypercapnia, anoxia induced hypothermia and hypoxia 04 p0464 A66-14067

Flying personnel protection, discussing human organism tolerance to sudden immersion in cold water and protective stratospheric suits 06 p0816 A66-18062

**COLD TRAP**

Spectral analyses of residual gases using mass spectrometer, noting vacuum equipment and effects of backing and cold-trapping 19 p3361 A66-36615

**COLD WEATHER**

Investigation of two cold air fronts of polar origin that occurred in Alpine region in April 1962, using data from Tirois IV 11 p1730 A66-23096

**COLD WEATHER TESTING**

Airline evaluation of aircraft survival equipment, noting Arctic survival exercises and testing 20 p3494 A66-37002

**COLD WORKING****SA STRETCH FORMING**

Norton-Hoff creep parameters by cold working tests and relaxation tests 05 p0771 A66-14534

Effect of structure and volume cold-working related to structural factors on notched samples of steels subjected to cyclic stresses 07 p1048 A66-17441

Oxygen content effect on recovery of cold worked tantalum investigated by measuring Snoek damping, electric resistivity and dynamic E modulus 11 p1717 A66-22997

Cold work and precipitation hardening effect on tensile and thermal characteristics of gas turbine alloys [ASME PAPER 66-GT-102] 14 p2312 A66-27002

High purity aluminum strain rate effects with cold working 14 p2316 A66-27782

Heat treatment effect on superconducting properties of cold-worked niobium, noting results of magnetization, critical current and resistivity measurements 15 p2564 A66-28760

Notched and unnotched bending fatigue strength of machined work hardened AISI type 305 stainless steel affected by cold worked surface layer with high compressive residual stresses 15 p2521 A66-29073

VT14-16 titanium alloys strength and plasticity with cold working and heat treatment 15 p2522 A66-29188

Cold working effect on room temperature tensile properties of TiNi intermetallic compound 18 p3123 A66-33756

High temperature properties and recrystallization of heat-resistant alloy A-286 experimentally studied, noting faster occurrence of overaging with increased cold working 19 p3376 A66-35357

Internal friction as function of temperature in cold worked tantalum and niobium containing oxygen and nitrogen 19 p3387 A66-36729

Susceptibility to cold deformation of semifinished B95-2 Al-Zn-Mg-Cu alloy products, noting machinability in manufacturing of parts 22 p3928 A66-40885

Structural steel design specifications, discussing anisotropy, stress-strain in tension and compression, cold working effects, etc 24 p4289 A66-42285

Cold-drawing effect on creep behavior of nickel-aluminum alloy at various temperatures through changes in fracture, precipitates and structure 24 p4227 A66-42309

**COLLAPSE**

**SA GRAVITATIONAL COLLAPSE**

Collapse loading of rotationally symmetric cylindrical shell 15 p2609 A66-29253

Computer program for axisymmetric nonlinear behavior of stiffened elastic shells of revolution with variable thickness,

calculating collapse pressures [AIAA PAPER 66-529] 16 p2814 A66-30527

**COLLECTOR**

**SA CONCENTRATOR**

**SA DUST COLLECTOR**

**SA SOLAR COLLECTOR**

**SA VENUS FLY TRAP ROCKET**

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 02 p0206 A66-12270

Dependence in transistorized multistage amplifiers of Q on resistances in collector loops 12 p1831 A66-23874

Reverse current across collector-base junction in transistor 12 p1844 A66-24822

Collector target complex eliminating target life time and test equipment contamination by sputtered target material, applied in testing of electrical propulsion systems [AIAA PAPER 66-500] 17 p2991 A66-32774

Secondary breakdown in transistors, noting effect of irregularities in collector base junction and tunneling sites 17 p2894 A66-33108

**COLLISION**

**SA ATOMIC COLLISION**

**SA COULOMB COLLISION**

**SA ELASTIC COLLISION**

**SA ELECTRON COLLISION**

**SA INELASTIC COLLISION**

**SA IONIC COLLISION**

**SA METEORITE COLLISION**

**SA MOLECULAR COLLISION**

**SA PARTICLE COLLISION**

Collision effects on full-wave and ray-optics virtual height computations for LF radio waves reflected from stratified ionosphere 20 p3521 A66-33360

**COLLISION AVOIDANCE NAVIGATION**

Air traffic control requirement for navigational capability, taking safety and economy into account 07 p1073 A66-17765

Air derived separation assurance /ADSA/ systems to avoid in-flight aircraft collisions, detailing range altitude, relative position velocity and projected hazard indicator basic types 07 p1078 A66-18223

Air collision risk and traffic control in long-range air traffic systems as basis for safe procedural separation standards 09 p1401 A66-20431

Collision prevention in controlled and uncontrolled air space, noting onboard visual surveillance, radar systems, etc 13 p2123 A66-25233

Separation standards for air traffic control, with analysis of collision risks 15 p2535 A66-29623

Nuclear radiation anticollision instrumentation for guidance systems of helicopters and other vehicles, both air and surface 17 p2926 A66-33097

Separation of aircraft over North Atlantic especially reduced lane width from 120 to 90 n miles 18 p3130 A66-33558

Safe separation standards estimation for analyzing long-range air traffic systems, emphasizing flying errors observation in operational conditions 21 p3760 A66-38452

Radar displays of true and relative motion to ensure collision avoidance by ships in restricted visibility 21 p3761 A66-38455

Aircraft collision avoidance problems and approaches to solution, discussing air derived separation assurance /ADSA/ 21 p3768 A66-39466

**COLLISION PARAMETER**

Langevin equation used to study interaction between radio wave and plasma, taking into account collisions between electrons and heavy ions and electric field caused by group displacement 01 p0022 A66-10322

Impact process beyond limits of Hertz theory 01 p0154 A66-10478

Single dispersion relation valid for all collision frequencies for electromagnetic and piezoelectric semiconductor acoustic interactions 01 p0029 A66-10589

Finite collision time for artificial celestial body moving under influence of Newtonian force from attractive center 01 p0137 A66-10794

Electron collision cross sections of atoms and molecules of argon, helium, nitrogen and dissociation products of carbon dioxide by dual beam radiolysis methods to study low temperature plasma behind shock

- front 02 p0268 A66-11780
- Approximation formulas for certain collision integrals of gas transport 03 p0395 A66-12836
- Current convection modification in low pressure plasma in magnetic field when collision frequency is less than all other characteristic frequencies 06 p0917 A66-16627
- Atmospheric absorption in IR region, noting effects of water vapor, ozone, carbon dioxide and collision-induced dipole moments 13 p2075 A66-26603
- Molecular inelastic collision cross sections from radiometer force curve 15 p2543 A66-28782
- Knudsen gauge designed by university sophomores, measuring molecular collision cross sections 15 p2498 A66-28787
- Collision cross sections of ions in isoelectronic sequence of lithium, noting dipolar transitions of type 2s to np 16 p2754 A66-31261
- Approximation formulas for certain collision integrals of gas transport 19 p3404 A66-36778
- Classical cross section for producing specified energy transfer in collision of two particles in laboratory system applied to atomic collision cross sections 21 p3774 A66-38544
- Conductivity of potassium-seeded argon plasma, assuming variable collision cross sections and Maxwellian distribution for electrons 22 p3951 A66-40363
- COLLISION RATE**
- Electron density, collision frequency and electron drift velocity obtained from plasma column interaction with electromagnetic wave on physically separated helix 01 p0025 A66-10537
- Electron density and collision frequency in lower D region measured by rocket sounding 03 p0366 A66-12879
- Plasma-electromagnetic interaction control by seeding with charged particles to obtain large collision frequency 04 p0480 A66-13626
- Collision effect on coupling of ion-acoustic waves to neutral acoustic waves at diffuse boundary consisting of partially ionized gas 07 p1088 A66-17955
- Class of exact solutions for one-dimensional single-relaxation equation with arbitrary collision frequency 08 p1316 A66-18532
- Effective electron collision frequency from electron temperature profile for ionospheric heating in F region 11 p1697 A66-22499
- Initial one-dimensional density discontinuity propagation in terms of mean free time between collisions 11 p1689 A66-22905
- D-region electron distribution, collision frequency and amplitudes of partially reflected waves 13 p2075 A66-26739
- Dislocation rate magnitudes and relative collision frequencies influencing relaxation profiles in diatomic gases 14 p2274 A66-27447
- Noncollisional damping effects limiting amplitude of resonance peaks experimentally verified, using mercury plasma discharges 14 p2346 A66-28270
- Hall effect in collision dominated gaseous plasma immersed in uniform magnetic field 17 p2969 A66-32629
- Collision frequency control application to control plasma-electromagnetic interaction [IEEE PAPER CP-65-444] 18 p3068 A66-33907
- Comparison of magnitude of collision frequency of electrons in D and E regions obtained by satellites, rockets, etc, with cross sections measured in laboratory 19 p3352 A66-36627
- Plasma density and collision frequency diagnostics using extraordinary transverse wave 21 p3790 A66-39067
- Microwave plasma diagnostics using longitudinal radio wave propagation 21 p3790 A66-39068
- Velocity dependent collision frequency effect on harmonic generation in ionized gas through which electromagnetic wave passes 21 p3792 A66-39180
- LF incompressible waves and gradient instabilities in ionosphere 21 p3733 A66-39183
- Microwave cavity resonant frequency sampler for direct oscilloscope-photographic recording of electron density, recombination and diffusion time in decaying plasma 21 p3740 A66-39389
- Exact solution for transverse electromagnetic wave in plasma with diffuse boundary, noting reflection and transmission coefficients 22 p3952 A66-39719
- Faraday rotation experiment for determination of electron density and collision frequency observations in arctic D region 22 p3905 A66-39946
- Collision frequency in E and D regions of ionosphere for electrons and neutral molecules 22 p3906 A66-39948
- Partial reflections utilizing different amplitudes of ordinary and extraordinary backscattered waves for electron number densities and collision frequency measurement in lowest ionosphere 22 p3906 A66-39949
- Winter variability of electron number density and collision frequency in lower ionosphere measured, using partial reflection method 22 p3906 A66-39950
- Collision frequency gradient effect on weak partial reflections from ionosphere 22 p3906 A66-39952
- Electron density and collision frequency profiles for D region obtained through simultaneous measurement of radio wave phase and amplitude interaction 22 p3906 A66-39953
- Generalized full wave theory equations derived for EM plane wave propagation through magnetoionic medium for electron collision frequencies proportional to electron energy 22 p3869 A66-40805
- Ionospheric cross modulation analysis by computer-oriented simulation process, noting D region electron density and collision frequency profiles 23 p4041 A66-41641
- Transmission resonant cavity measurements of electron line densities and collision frequencies in ionized wakes of hypervelocity projectiles 24 p4191 A66-42195
- COLLISION WARNING DEVICE**
- EEG experiments on men exposed to intermittent photic stimulation under simulated IFR conditions produced drowsiness as primary response 17 p2864 A66-32165
- COLLISIONLESS PLASMA**
- Perturbation theory of nonlinear oscillations in collisionless plasma 01 p0109 A66-10256
- Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 01 p0109 A66-10260
- Linear oscillations in relativistic Maxwellian plasma, detailing dispersion relations in collisionless cold electron-beam system 01 p0110 A66-10326
- Ionic waves amplified by collective behavior in alkali plasma obtained by contact ionization of cesium or potassium vapors on surface of two coaxial tantalum cylinders 01 p0110 A66-10331
- Saturation and short-time behavior of unstable ion waves in collisionless alkali plasmas in thermal equilibrium 01 p0110 A66-10339
- One-dimensional collisionless plasma in computer simulation with randomized electrons compared with static theory for equivalent diode 01 p0112 A66-10591
- Weak turbulence in media with decay spectrum, analyzing second component of collision term with isotropic model 02 p0264 A66-11385
- Collisionless plasma flow over cone when flow velocity is greater than ion wave speed [AIAA PAPER 65-125] 02 p0267 A66-11534
- Collisionless mass flow of ionized gas through channel with imposed magnetic field [AIAA PAPER 65-124] 02 p0267 A66-11535
- Equilibrium configuration of plasma confined by magnetic field on kinetic equations of particle drift without considering collisions 02 p0268 A66-11781
- Excitation of collisionless shock waves in rarefied plasma, examining neutron radiation and charged particle flux at chamber walls and magnetic field structure in plasma volume 04 p0557 A66-14431
- Space and time dependence of decaying resonant oscillations excited in collisionless plasma by infinitesimally small pulsed dipole 05 p0721 A66-14714
- Shock wave formation in collisionless plasma investigating magnetic compression pulse, electron density and radial magnetic field profile 05 p0722 A66-14720
- Dispersion equation for LF electronic oscillations in electron beam Maxwell collision-free plasma 05 p0722 A66-14722
- Oscillation frequency of plasma and corresponding collision frequency calculated, using Vlasov equation 05 p0725 A66-15242
- Collisionless plasma theory, discussing characteristics and mechanisms of magnetosphere 05 p0674 A66-15250
- Microinstabilities in collisionless plasma due to Boitzmann equation 05 p0726 A66-15253
- Laminar Landau collisionless damping of finite amplitude disturbances in collision-free plasmas 05 p0727 A66-15257
- Dissipative mechanisms in laminar shocks in collisionless plasmas, using analogy between shocks and hydraulic jumps in water 05 p0727 A66-15258
- Separation constants for finite gyromagnetic plasmas, discussing ion motion effects 06 p0826 A66-16024
- Two models /for collisional heating and collisionless transit-time heating/ of cylindrical plasma heated by oscillating magnetic field 07 p1086 A66-17652
- Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 07 p1034 A66-17880
- Nonlinear interaction between ordinary and extraordinary wave modes for collisionless cold magnetoplasma 07 p1090 A66-18203
- Collisionless damping of nonlinear plasma oscillations, with exact solution of Vlasov equation for resonant electrons 08 p1260 A66-18537
- Computer simulation of randomization of electrons in collisionless plasma 08 p1260 A66-18538
- Noncollisional damping modifies HF plasma resonance 08 p1261 A66-18644
- Transformation of longitudinal waves into transverse waves in weakly turbulent plasma 08 p1262 A66-18979
- Strong collisionless shock wave excitation in deuterium plasma 08 p1266 A66-19479
- Hydrodynamic equations describing strongly rarefied collisionless plasma 10 p1572 A66-22035
- Harmonic wave generation by EM plane wave normally incident on collisionless plasma with linear density profile 11 p1652 A66-22548
- Plasma edge phenomena in unified Langmuir treatment for probe in collisionless plasma 12 p1925 A66-24816
- Potential profile around negatively biased spherical and cylindrical ion probes in collisionless plasma computed numerically 13 p2142 A66-25707
- LF flute instability of collisionless plasma in curved mirror-type magnetic field 13 p2143 A66-25718
- Ray-optic theory to determine microwave transmission through collisionless turbulent plasma in Fraunhofer and Fresnel regions 13 p2147 A66-25753
- Perturbation theory of nonlinear oscillations in collisionless plasma 13 p2148 A66-25973
- Nonlinear kinetic equation of self-similar motion of rarefied collisionless electron-ion plasma 13 p2148 A66-25977
- Necessary conditions for stability of collisionless guiding center plasma, sufficient for stability of equilibrium configurations whose distribution functions are bell shaped 13 p2154 A66-26671
- MHD wave propagation along uniform magnetic field in cold plasma solved in terms of Jacobean elliptic functions 14 p2340 A66-27134
- Particle distribution in low density collisionless plasma in vicinity of moving charged body smaller than Debye radius 14 p2284 A66-27556
- Information theory for describing electric and magnetic fields of one-dimensional collisionless plasma 14 p2346 A66-28274
- Electromagnetic and plasma wave propagation in inhomogeneous compressible isotropic collisionless electron plasma bounded by closed surface in free

space 15 p2449 A66-28592

Bounds on density fluctuations and electrostatic oscillation spectrum for homogeneous collisionless plasma according to Maxwell-Vlasov equation 15 p2554 A66-29749

Moment equations from collisionless Boltzmann equation solved by transformation into polarized coordinates 15 p2555 A66-29784

Collisionless Boltzmann and Maxwell equations for plasma instability of plasma without external magnetic field for transverse oscillation propagating perpendicular to streams 16 p2760 A66-30817

Trapped electron effect and stationary longitudinal wave propagation in Maxwellian hot plasma based on exact solution of nonlinear collisionless Boltzmann equation compatible with equilibrium electron distribution 16 p2761 A66-31009

Perturbation of electron density at large distances from body at high velocity in collisionless plasma under steady external magnetic field 16 p2762 A66-31181

Plasma wave quasi-linear theory, noting nonlinear effect treatment via distribution function, electric field, Fourier component decay, etc 17 p2966 A66-32422

Nonlinear ionic-acoustic wave propagation in collisionless hot electron plasma with at least one cold ion stream 17 p2973 A66-32976

Dispersion and modes of MHD wave propagation in collisionless plasma 17 p2973 A66-32977

Incapability of looping trajectories existing in finite amplitude hydromagnetic waves propagating across magnetic field in quasi-neutral cold collision-free plasma 18 p3148 A66-34908

Reflection and loss of particles in collisionless plasma in one-dimensional magnetic mirror field in presence of parallel electric field 18 p3148 A66-34910

Density field calculation for collisionless expansion of moving cylindrical gas cloud, with Maxwellian random velocity distribution superimposed on uniform initial velocity 18 p3103 A66-34933

Set of fluid equations in finite Larmor radius obtained by systematic asymptotic expansion, using gyration period and radius as small space and time parameters 18 p3150 A66-34965

Growth of unstable collisionless plasma waves to turbulent state, decay of turbulent state and concomitant anomalous diffusion 19 p3415 A66-36519

Stability of low pressure confined plasma taking into account effect of particle collisions, analyzing equilibrium configuration stability 19 p3417 A66-36529

Electromagnetic instabilities in collisionless plasma obtained, using Liapunov function 19 p3423 A66-36554

Plasma convergence, structure and heating by collisionless cylindrical shock waves, discussing wave front 19 p3424 A66-36560

Nonrelativistic equations of bulk motion of relativistic /cosmic ray/ gas derived by taking moments of collisionless Boltzmann equation 20 p3649 A66-37327

Macroscopic hydromagnetic equations with magnetic viscosity for collisionless plasma, determining Larmor radius ratio to characteristic length, using Vlasov equation in drift frame 20 p3610 A66-38054

Shock waves in rarefied magnetoplasma and collisionless shock waves ahead of geomagnetic cavity in solar wind 20 p3611 A66-38221

Power flow of cyclotron modes propagating in waveguide filled with cold collisionless axially magnetized plasma studied by Brillouin diagram 20 p3612 A66-38398

Excitation of collective motions in collisionless plasma in magnetic field for case of large temperature anisotropy 21 p3783 A66-39024

Noncollision ergodic shock wave propagating in plasma situated in magnetic field and thermal oscillation effect on thermonuclear kinetics 21 p3787 A66-39052

Asymptotic time behavior of longitudinal waves in one-dimensional plasma of relativistic electrons and stationary ions studied, using collisionless Boltzmann equation 21 p3775 A66-39189

Transmission and coupling resonance of hydromagnetic disturbances in nonuniform model magnetosphere calculated by approximate dipole coordinates valid near equatorial plane 21 p3734 A66-39217

Behavior of small cylindrical Langmuir probe in steady low density flow of argon plasma [AIAA PAPER 66-5] 22 p3918 A66-40350

Dispersion relation for hydromagnetic waves in infinite collisionless plasma in static magnetic field, using numerical solutions 23 p4103 A66-41488

Electrostatic probe in collisionless plasma wherein sheath joins region of ambipolar diffusion 23 p4104 A66-41494

**COLLOID**

SA ELECTROPHORESIS

SA SOLID SUSPENSION

Stability and surface tension of colloidal graphite dispersions in absence and presence of nonelectrolytes 21 p3754 A66-39150

Particle spectrum determination by inversion of scattering data for high concentrations of sol 21 p3760 A66-39364

**COLLOIDAL GENERATOR**

Particle formation involving homogeneous condensation by mixing reaction technique for eventual development of colloid thruster [AIAA PAPER 66-254] 10 p1593 A66-21459

Negatively charged colloid generation by electrostatic spraying, with capillaries arrayed alternately positive and negative [AIAA PAPER 66-251] 10 p1594 A66-21702

**COLLOIDAL PROPELLANT**

Comparison of various electrostatic thrusters and proposed low pressure colloidal power converter for high payload lunar and planetary missions [AIAA PAPER 66-211] 10 p1592 A66-21448

Colloidal thruster with hot cathode charged colloidal particle source [AIAA PAPER 66-255] 10 p1593 A66-21460

Propellant properties and particle formation efficiency determined for homogeneous condensation-type colloid thruster [AIAA PAPER 66-253] 11 p1760 A66-22221

Colloid particle electrostatic thrusters for lunar ferry missions in specific impulse range 1000-3000 sec 12 p1937 A66-24903

**COLOR PERCEPTION**

Two photocells with positive and negative photoconductivity used in model simulating human color vision and anomalies 18 p3061 A66-33843

Vector transformation properties of tristimulus color-coordinates used to characterize human visual sensation 18 p3111 A66-33992

Adaptive color shifts due to chromatic adaptation interpreted as linear mappings 20 p3504 A66-36942

Response characteristics of lateral geniculate cells of macaque monkey, discussing hue, saturation and brightness encoding in primate color visual system 20 p3504 A66-36946

Sensitivity to color differences as function of step size 20 p3505 A66-36948

Iterative transformation of chromaticity coordinates of Munsell samples into another coordinate system with transformed value spacing in accordance with perceptual color spacing 21 p3773 A66-39397

Effect of color and brightness contrast, direction of contrast and contrast values on legibility of circular dial 21 p3701 A66-39420

**COLOR PHOTOGRAPHY**

Standing wave read-only memory based on Lippmann color photography for information storage 05 p0636 A66-14819

Color spectrozonal photography used in plotting topographic maps 06 p0881 A66-16752

Electronic color correction during aerial photograph printing by employing specially programmed computer 10 p1534 A66-21329

Color hologram for white light reconstruction constructed from three-dimensional diffusely reflecting objects 18 p3109 A66-33611

Solar prominence in color photography, using filtering system for H and D lines 20 p3648 A66-37284

Colored spectrozonal aerial photographs in topographic decoding of photographs of wooded regions 21 p3735 A66-38570

White light reflection holography extended to recording of volume holograms in emulsions on sheet film 24 p4220 A66-42260

**COLOR TELEVISION**

Color TV for exploration of space environment, noting techniques for signal transmission via satellites 08 p1180 A66-18611

**COLORIMETRY**

Nuclear fast red technique of calcium in serum, parotid fluid and urine in weightless state 03 p0329 A66-13347

Toxicological effect of hydrazine and monomethylhydrazine in blood serum of rats 05 p0626 A66-14664

20-inch mirror telescope with photoelectric astrophotometer for photometric, colorimetric and polarimetric measurements 05 p0683 A66-15419

Vector transformation properties of tristimulus color-coordinates used to characterize human visual sensation 18 p3111 A66-33992

**COLUMBIUM**

**S NIOBIUM**

**COLUMN**

SA BEAM COLUMN

SA TAPERED COLUMN

SA VERTEBRAL COLUMN

Parametric response of elastic clamped-free column, noting agreement between theory and experiments for first three spatial and first four temporal modes 04 p0594 A66-14391

Creep buckling of columns under axially nonuniform temperature distribution 12 p1969 A66-24364

Creep buckling of column with nonuniform vertical temperature distribution 14 p2408 A66-28344

Flexure of thin elastic plate clamped to rigid columns, determining functions of complex variable 15 p2613 A66-29433

Approximation method for solution of bending problem of isotropic plate resting on rigid columns to cover case of anisotropic plate with reinforced elliptic hole 15 p2613 A66-29434

Elastic deformation of biaxially loaded columns of thin-wall open cross section with initial imperfections 17 p3032 A66-33435

**COMBUSTIBLE FLOW**

Structure and function of wind tunnel used in supersonic combustion processes 04 p0572 A66-13538

Local heat transfer to immersed cylinder in transonic cross flow for gaseous stream 07 p1150 A66-17581

Flow field of two-dimensional Bunsen flame according to source sheet approximation 07 p1154 A66-17940

Imploding cylindrical shock wave production through imploding detonation waves in oxygen-acetylene mixtures, using Chapman-Jouguet theory 08 p1204 A66-18523

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 08 p1179 A66-19482

Approximate method for analyzing chemically reacting turbulent flow fields having initial homogeneities [AIAA PAPER 65-37] 10 p1523 A66-21770

Hybrid rocket combustion regression rate and turbulent boundary layer mass transfer 14 p2412 A66-27449

Unsteady flow field, combustion processes and interaction regions during shock propagation in solid-propellant rocket combustors 17 p2991 A66-32486

**COMBUSTION**

SA AFTERBURNING

SA BOUNDARY LAYER COMBUSTION

SA DEFLAGRATION

SA FLAME

SA FUEL COMBUSTION

SA HYBRID COMBUSTION

SA HYDROCARBON COMBUSTION

SA HYPERSONIC COMBUSTION

SA INTERNAL COMBUSTION ENGINE

SA METAL COMBUSTION

SA PROPELLANT COMBUSTION

SA SUPERSONIC COMBUSTION

Nonlinear system of partial differential equations describing one-dimensional combustion process of gas mixture 15 p2616 A66-28961

Laminar and turbulent diffusion flame combustion mechanisms, stabilization, flame

ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068

Flame propagation theory using one-dimensional model and radial temperature variation to obtain dependence of propagation velocity on thermal-diffusivity coefficient 16 p2830 A66-31515

Thermoplastic surface response to intense surface heating exposure, examining linear pyrolysis of polymethyl methacrylate [WSCJ 66-24] 18 p3263 A66-34418

Polymer flammability measured in terms of minimum oxygen content needed for burning, noting effect of various agents for reducing flammability 20 p3680 A66-38040

**COMBUSTION CHAMBER**

**SA ROCKET CHAMBER**

Developing combustion chamber for MHD generator experimentation 01 p0130 A66-10216

Three kerosene-HTP propellant rocket engines for satellite launching, noting combustion chambers 02 p0279 A66-11675

Parameter relationship governing construction of models for combustion of liquid fuels in rocket engines 02 p0279 A66-11707

Combustion phenomena in model combustion chamber of lift jet engine in terms of efficiency, pressure loss and extinction limit 03 p0443 A66-12400

Energy balances for combustion chambers of gas turbines by electronic computer 03 p0416 A66-13202

High temperature measurement in combustion chambers of air breathing engines discussing optical, pneumatic, acoustic and calorimeter methods 04 p0518 A66-13537

Calculation of mean temperature of mixture burning in flame tube of annular combustion chamber 04 p0597 A66-13760

Various types of periodically discontinuous combustion, showing improved thermal efficiency applicable to turbine combustion chambers 05 p0787 A66-14962

Propulsive duct combustion chamber with application of feedback and spark discharge for VTOL and aircraft propulsion 05 p0744 A66-14997

Heat-and fatigue-resistant metal alloys for construction of jet aircraft combustion chambers, including 18 NiCoMo alloy suitable for temperatures up to 650 degrees C 05 p0704 A66-15806

Data on combustion of pyrolyzing solids as applicable to combustion chambers of hybrid propulsion devices, placing emphasis on coal 07 p1154 A66-18028

Combustion chamber of propulsive duct including duct potential, feedback, reed-type valve, aerodynamic valve, Venturi design, fuel control, etc 07 p1110 A66-18162

Nondestructive test method using fluorescent penetrant techniques for detecting intergranular surface attack on Inconel-X thrust chamber 07 p1040 A66-18392

Chamber pressure balanced piston nozzle for fast depressurization to bring about combustion quenching 08 p1281 A66-18833

Chemical reaction kinetics and gas dynamics combined to analyze processes occurring in combustion chambers and nozzles of jet and rocket engines 10 p1620 A66-21367

Control system of supersonic combustion, using spectral intensity ratio, monitoring combustion chamber in two wavelength regions 10 p1622 A66-21948

Three kerosene-HTP propellant rocket engines for satellite launching, noting combustion chambers 11 p1760 A66-22435

Thermodynamic process within combustion chamber of propulsive duct, examining potential with reference to feedback and spark discharge 11 p1761 A66-23251

Mixing processes for isothermal and nonisothermal simulation of flows in combustion chambers 13 p2210 A66-26490

Shock wave/flame front interaction in cylindrical chamber 14 p2412 A66-27438

Hydrodynamic processes in combustion chamber and production of two-phase combustion mixture 14 p2276 A66-27713

Nozzle precombustion chamber base pressure for sudden pulsating sonic flow propagation 17 p2909 A66-32582

Radiant heat transfer from hot solid combustion products to combustion chamber walls [AIAA PAPER 65-559] 18 p3260 A66-33811

Axial pressure gradient change with geometry in combustion chambers formed by cylindrical and conical sections, using rocket motors burning LOX and JP-5A 19 p3450 A66-35624

Model study of aerodynamic oscillations in ramjet diffuser and combustion chamber prior to booster separation in ramjet missile indicates that venting may solve problem 19 p3468 A66-35630

Plasma velocity measurements in and outside plasmatron nozzle and free stream from combustion chamber as function of flow rate of stabilizing gas and combustion chamber 20 p3609 A66-37567

Ablation analysis in cylindrical coordinates for axisymmetrical configuration of wall materials with temperature-dependent properties and nonlinear heat flux conditions at boundaries [AIAA PAPER 66-542] 20 p3680 A66-38034

Hypergolic liquid propellant combinations, noting effect of feed pressure, injection tube diameter and fluid free path on ignition process in combustion chamber 20 p3626 A66-38140

Project Scorpio USAF Cellular Combustion Chamber Program for cost reduction and injection pattern simplification in liquid propellant rocket engines 20 p3629 A66-38256

Simulation of rocket engine starting transients via shock tube combustion drivers, discussing diaphragm rupture effect on combustion, acceleration and burst pressure [AIAA PAPER 66-761] 22 p3972 A66-40644

Pressure variation induced by ignition of air-hydrocarbon mixtures studied by strioscopic cinematography and simultaneous pressure measurement 23 p4148 A66-41176

Aluminum alloy tube for combustion chamber of Japanese SSR, noting mechanical properties, temperature effects, etc 23 p4081 A66-41424

Compressible fuel mixture deflagration perturbation stability in induction regime characteristic of heat-stressed combustion chambers of rocket engines 23 p4122 A66-41790

Pressure, temperature, gas velocity, thrust and specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method 24 p4261 A66-42743

**COMBUSTION EFFICIENCY**

Burning modes in initially unmixed reactants, describing stagnation region formation by interaction of opposed flows of fuel and oxidant [AIAA PAPER 66-71] 06 p0969 A66-16258

Rotating bomb calorimetric technique, determining accurate values of enthalpy of combustion of boron and boron compounds 08 p1178 A66-19068

Limiting conditions of temperature, gas flow rate and heat removal for combustion of methane in atomic oxygen, calculating heat balance of process 16 p2827 A66-30792

Burning properties of oxygen-nitrogen and oxygen helium spacecraft atmospheres determined for increasing safety of crew members in case of emergency 17 p3033 A66-32147

Ignition and combustion mechanism of liquid propellant consisting of aliphatic alcohols and mixed acid, using calcium and potassium permanganates as catalysts 17 p2989 A66-32458

Kinetic factors in diffusion flames, noting fuel/oxidizer ratios, equilibrium in terms of flame geometry, burning of metallic elements, etc 18 p3263 A66-34419

Correlation study of turbojet afterburner combustion efficiency and fuel/air ratio setting for maximization of efficiency [WSCJ 66-1] 18 p3164 A66-34423

Aluminum particle combustion noting changes from preignition to burnout, flame structure, particle geometry, etc 18 p3266 A66-35021

Catalytic combustion of cyclohexane, cyclohexene and benzene, determining significance of combustion via computer

program 18 p3266 A66-35022

Combustion efficiency measurement of jet-engine systems, noting role of static pressure in outflow nozzle 20 p3681 A66-38443

Hydraulic analogy methods for simulation of internal gas flows containing combination zone 22 p3901 A66-40500

Combustion of atomized liquid fuels, noting optimum value of atomization fineness affecting completeness of combustion 24 p4293 A66-42208

**COMBUSTION HEAT**

Conformal sets of aromatic and other conjugated compounds, noting that sum of combustion heat of compounds in one set equals sum of compounds in other set 03 p0442 A66-12333

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3] 05 p0789 A66-15628

Convective heat transfer measurements for partially dissociated carbon monoxide and hydrogen with high Lewis number [ASME PAPER 65-WA/HT-27] 05 p0793 A66-15676

Heat of combustion of tricarbonyl-cyclopentadienylmanganese 08 p1279 A66-18798

Pressure and temperature distribution in flow of combustion products in presence of transverse magnetic field 11 p1786 A66-22596

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3] 16 p2825 A66-30341

Direct measuring radiation calorimeter developed for determining radiant heat flux of solid propellant gas flame in rocket combustion chambers [AIAA PAPER 65-358] 18 p3159 A66-33814

Liquid methane as fuel for SST propulsion in terms of cost, combustion heat and cooling capacity 24 p4261 A66-42240

**COMBUSTION INSTABILITY**

Pulse technique employing gunpowder charges to evaluate combustion instability in solid propellant rocket motors 03 p0416 A66-13106

Gas combustion and detonation instability 04 p0597 A66-13901

Acoustic combustion instability of solid fuel rocket dependence on response of burning propellant surface to sound field 05 p0744 A66-15783

Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 06 p0969 A66-16256

Subscale cold-flow rocket motor model used to determine effect of purely geometric variables on acoustic performance leading to axial mode combustion instability [AIAA PAPER 66-110] 06 p0944 A66-17080

Nonacoustic combustion instability of aluminized composite propellant [AIAA PAPER 66-111] 06 p0941 A66-17105

Coupling of conversion process and internal field related to effect of injector design on unstable burning of liquid propellant rocket motors 08 p1282 A66-19136

Flame wavelength during vibrational combustion of gas mixtures in tubes 14 p2415 A66-28327

Gas combustion and detonation instability 17 p3033 A66-32064

Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion [AIAA PAPER 66-109] 17 p3037 A66-33237

Combustion instabilities in solid propellant rocket motors, including acoustic and nonacoustic instabilities 18 p3163 A66-34003

Propellant composition influence on finite-amplitude axial wave mode instability in solid propellant rockets [AIAA PAPER 66-600] 18 p3161 A66-34431

Combustion instability in MMH-NTO liquid rocket engine as affected by propellant mixture ratio, injection velocity, droplet size and distribution and chamber pressure [AIAA PAPER 66-603] 18 p3164 A66-34432

Phase relationships of normal stress

perturbations in cylindrical combustor operating near atmospheric pressure with premixed air and natural gas 20 p3680 A66-38038

Unstable combustion products of glow discharge, discussing effect of propagation rate of hydrogen-oxygen flame 21 p3834 A66-38473

Propellant deflagration control for interaction between fluid dynamic disturbance and propellant combustion reaction 22 p3969 A66-39874

Unsteady-state solid-propellant combustion subjected to acoustic pressure oscillations, noting effect of combustion parameters 22 p3971 A66-40352

Nonacoustic combustion instability of aluminumized composite propellant [AIAA PAPER 66-111] 22 p3970 A66-40355

Static firing tests of HT-110 engines with high slenderness ratio using slow burning polyurethane propellant 23 p4121 A66-41428

Measurement and analysis of oscillatory combustion during static firing tests of HT-110 engines by means of pressure indicators and recorded signal playback system 23 p4121 A66-41429

Static firing tests on special small rockets /SSR/ with different igniter cases and combustion instabilities 23 p4119 A66-41436

**COMBUSTION PHYSICS**

Oxygen and combustion, examining mechanisms of flame combustion and study of heat transmission 01 p0166 A66-11091

Pulsating combustion compared with steady combustion as means of increasing energy conversion 01 p0166 A66-11093

Physical and mathematical models in combustion theory of Zeldovich, Frank and Kamenetski 03 p0444 A66-12702

Ammonium perchlorate spheres combustion in flowing gaseous fuel similar to conditions in solid rocket combustion, noting diffusion flame significance 03 p0414 A66-13225

Temperature inhomogeneities in flame jet in condensed system as affected by flow agitation, carbon particles and metal particles 04 p0597 A66-13697

Physics of spark discharges igniting gaseous mixtures, noting increase in thermal power of discharge by gas preionization resulting from energy redistribution 06 p0919 A66-16877

Detonations in gaseous mixtures and in condensed phase, examining effects of pressure, temperature and confinement on normal detonation 12 p1980 A66-24932

Two-phase self-ignition of isooctane-air mixture, considering preignition phase and temperature zones 13 p2209 A66-25695

Laminar air flow past porous plate through which fuel and oxidizer mixture is injected, deriving diffusion combustion processes that develop in laminar boundary layer 14 p2371 A66-28318

Thermal ignition of flowing gas mixtures at nonreactive noncatalytic hot surfaces 16 p2830 A66-31634

Accelerating particulate flow studied, using blowdown system for component velocities and friction 17 p2916 A66-33471

Solid propellant characteristics for application to supersonic combustion, tabulating combustion properties of selected fuels and solid propellants [WSCI 66-32] 18 p3161 A66-34416

Increasing mass flow through gas turbine without additional work from compressor and consequently increasing thermal efficiency, noting combustion problem [WSCI 66-17] 18 p3164 A66-34424

Overall structure of combustion process in jet flow of hydrocarbon-air mixtures stressing conditions for ramjet engines, noting flame propagation angles, flow computation, etc [AIAA PAPER 66-573] 18 p3264 A66-34444

Combustion of solid or hybrid propellants with one or more solid phases, noting properties, erosive and hybrid combustion, etc 18 p3165 A66-35240

Hydrogen combustion in air above solid noncatalytic wall heated to 800 degrees C, examining diffusion equation for slow combustion and laminar boundary layer flow over noncatalytic wall 19 p3479 A66-36249

Compressed-gas dispersion effect on gas turbine engine operation, deriving spraying

law, jet stream, penetration depth, etc 21 p3808 A66-38934

Hybrid rocket combustion mechanism, burning rate, mass transfer coefficient, throttling effects and grain design [AICE PREPRINT 34C] 22 p3970 A66-39877

Measurement and analysis of oscillatory combustion during static firing tests of HT-110 engines by means of pressure indicators and recorded signal playback system 23 p4121 A66-41429

Combustion mechanism of composite propellants including solid propellant combustion rate measurements, flames spectrography, temperature at propellant surface, etc 23 p4122 A66-41660

Flame of homogeneous gas mixture in terms of similarity criteria applied to combustion process analysis 24 p4295 A66-42883

Approximate solution of variation problems in heat explosion theory, noting difficulty resulting from heat liberation dependence on temperature 24 p4295 A66-42884

**COMBUSTION PRODUCT**

Steady state composition mechanism of solid /heterogeneous/ propellants noting linear pyrolysis, exothermal oxidizers, fuels, etc [ONERA TP 240] 02 p0278 A66-11681

Equilibrium combustion products of generalized hydrocarbons with oxygenated air, with charts on enthalpy, entropy, molecular weight, specific heat ratio, etc [ASME PAPER 65-WA/ENER-2] 05 p0789 A66-15627

Combustion process of isothermal quasi-stationary porous particle for Stokes streamline regime 08 p1321 A66-19773

Line-of-sight IR spectral temperature profile measurements in inhomogeneous hot gas 09 p1382 A66-20505

Book on thermodynamic properties of combustion gases 12 p1978 A66-24192

Trails arising in wake of fan-type jets in transverse gas flow during uniform fuel-air mixture combustion 14 p2413 A66-27693

Electroconductivity of combustion products of propane-air mixture determined by double Langmuir probes 15 p2617 A66-29312

Composition and combustion products of boron at 300 to 3200 degrees K and heat of formation of boron oxide 16 p2830 A66-31604

Ionization processes in hot products of combustion processes /flame gases/ as weak plasma media, noting flame properties, mass spectroscopy, electron concentration, etc 18 p3260 A66-34106

Low temperature plasma conductivity of combustion products, particularly of exhaust gases in duct of MHD oscillator 18 p3145 A66-34107

Performance calculations for propellants in terms of composition and enthalpy and principles of rocket engines 19 p3449 A66-36287

Thermodynamics of combustion and concepts of aerothermochemistry using Newton-Raphson iteration process, noting transfer phenomena of matter, heat and momentum 20 p3680 A66-38090

Heat of formation of oxygen difluoride for reaction with hydrogen, using Parr fluorine combustion bomb containing metal ampoule employing burst diaphragm 23 p4118 A66-41238

Molecular mixing of cold air jet containing sodium nitrite vapor and slipstream of gasoline-air mixture combustion products 23 p4149 A66-41793

**COMBUSTION STABILITY**

Stability criterion for steady state combustion of powder with variable surface temperature under constant pressure 02 p0302 A66-11400

Unsteady boundary layer flow of multicomponent gas mixtures, investigating combustion instability in liquid and hybrid rocket motors [AIAA PAPER 65-41] 03 p0444 A66-12796

Oscillations in liquid fuel rocket combustion chambers covering LF and HF theory, stability requirements and optimal performance criteria 04 p0594 A66-14463

Combustion instability in liquid propellant rocket motors causing pressure fluctuations [CI PAPER WSCI-65-22] 05 p0788 A66-15144

Heat transfer in base flow region,

determining parameter of correlation for hydrogen injection and combustion, adiabatic flame temperature, heating rates and recovery temperature [AIAA PAPER 66-108] 06 p0970 A66-16408

Development of 23KS20000 motor for Black Brant IIB vehicle with emphasis on internal ballistics 06 p0942 A66-16702

Impact-induced combustion in hypersonic ramjet engines, determining hypersonic fuel-air mixing from hydrogen concentration at Laval nozzle outlet 10 p1591 A66-21359

Propellant injection distribution effect on transverse modes of liquid rocket engine instability [AIAA PAPER 65-613] 12 p1977 A66-23581

Small disturbances and effect on processes of fast combustion of inflammable /compressible mixture 14 p2374 A66-27690

Laminar and turbulent diffusion flames combustion mechanisms, stabilization, flame ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068

Influence of relative thickness of elastic case on acoustic stability of radial modes in solid propellant rockets 16 p2791 A66-31474

Linear stability boundary for acoustic modes in cylindrical solid-propellant rocket 17 p2990 A66-32479

Diamant French satellite launching /examining combustion stability during ignition, vibrations, chemical reactions/ between oxidizer and pressure feed system, etc 17 p3017 A66-33236

Combustion behavior of aluminum-ferroc oxide thermite with aluminum oxides additions used as combustion model for involatile condensed systems 18 p3259 A66-33718

Combustion rate of ammonium perchlorate-polystyrene and ammonium perchlorate-Plexiglas mixtures related to mixture ratio 18 p3260 A66-33720

Pressure deflagration limit of high energy solid propellants increased to superatmospheric pressures by composition changes [AIAA PAPER 66-679] 18 p3163 A66-34226

T-burner tests for combustion stability evaluation of hydrazine diperchlorate [AIAA PAPER 66-599] 18 p3264 A66-34430

Acoustic absorption liners for suppressing HF combustion instability in rocket engine combustion chambers [AIAA PAPER 65-585] 19 p3449 A66-35608

Combustion stability development with storable propellants for liquid rocket engines, showing coupling between technology and engine system [AIAA PAPER 65-614] 19 p3448 A66-35609

Small perturbation method applied to combustion stability of high explosives taking into account heat release in K phase 19 p3477 A66-35740

Discontinuity characteristics of trough-shaped flame stabilizers for combustion in wake of poorly streamlined body during period of ignition arrest 20 p3674 A66-36915

Stability analysis of one-dimensional steady laminar flame propagation with conductive heat loss 20 p3680 A66-38045

LF combustion oscillation analyzed by theory of dynamical stability of closed feedback loop 20 p3681 A66-38103

Laplace transform applied to small pressure variations effect on gunpowder burning stability 20 p3681 A66-38121

Vaporization and atomization theoretically calculated to be controlling parts of combustion process in determining rocket combustion instability [AICE PREPRINT 28D] 22 p3971 A66-39879

Pressure record of HF combustion oscillations observed in solid propellant rocket motor developed under special small rocket /SSR/ program 23 p4121 A66-41430

Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435

Solid propellant combustion stability and physicomachanical properties evaluated by measuring and calculation procedure 23 p4120 A66-41437

**COMBUSTION TEMPERATURE**

Calculation of mean temperature of mixture burning in flame tube of annular

combustion chamber 04 p0597 A66-13760  
 Combustion temperatures of explosives  
 PETN, hexogyn and tetryl in constant  
 pressure bomb in nitrogen  
 atmosphere 08 p1316 A66-18795  
 Ignition temperatures of powdered metals  
 in simulated atmospheres of Venus and Mars  
 suggest potential chemical energy  
 sources 11 p1786 A66-22458  
 Flame expansion rate in turbulent flow of  
 homogeneous inflammable mixture at  
 ignition temperatures from 423 to 823  
 degrees K 14 p2374 A66-27691  
 Chlorine-fluorine mixture combustion,  
 examining flame speeds, temperatures and  
 burned gas composition  
 [WSCI 66-31] 18 p3263 A66-34415  
 Thermal self-ignition theory employing  
 general functions of temperature  
 characterizing reaction rate of  
 explosive 19 p3477 A66-35741  
**COMBUSTION VIBRATION**  
**S INSTABILITY**  
**COMBUSTION WAVE**  
 Simple rotating drum, streak camera  
 covering principle, design, construction and  
 application 04 p0520 A66-13940  
 Propagation of combustion wave, consisting  
 of flame front and shock wave passing down  
 tube closed at one end, in presence of  
 magnetic field in undisturbed gas at  
 rest 06 p0874 A66-17002  
 Flame generation of pressure waves and  
 wave-combustion front interactions in  
 detonation processes treated by nonsteady  
 gas dynamics 07 p1155 A66-18118  
 Onset of retonation, laser technology and  
 high repetition-high resolution schlieren  
 stroboscopic wave phenomena  
 records 08 p1318 A66-19200  
 One-dimensional CJ detonation existence as  
 self-sustaining  
 phenomenon 08 p1208 A66-19203  
 Heat conduction equation for convective  
 flow applied to gunpowder combustion  
 under harmonic pressure  
 variation 08 p1280 A66-19486  
 Finite strength spherical shock wave  
 propagation due to explosion into  
 inhomogeneous nongravitating and self-  
 gravitating systems 08 p1211 A66-19810  
 Exothermal discontinuities propagation in  
 conducting media without restricting  
 magnetic field orientation, noting velocity  
 and energy released, showing that existence  
 of propagation velocities leads to two  
 detonation modes 13 p2149 A66-26260  
 Formula derivation for acoustic  
 conductivity of combustion surface of  
 condensed system 17 p3033 A66-31896  
 Solid propellant ignition, discussing  
 deflagration wave propagation along gas-  
 solid grain surface, flux equilibrium  
 equation, etc  
 [AIAA PAPER 66-668] 18 p3165 A66-34441  
 Combustion front pressure rise associated  
 with burning of condensed systems with  
 surface pressure greater than ambient  
 pressure 19 p3478 A66-35748  
 Generation of pressure wave by explosion  
 of condensed phase fuel particles dispersed  
 in gaseous oxidizer  
 [AIAA PAPER 65-357] 22 p3999 A66-40357  
**OMBUSTOR**  
**SA ROCKET COMBUSTOR**  
 JP-5 fuel-air mixture ignition by platinum  
 catalytic igniters, using ramjet engine baffle  
 combustors 13 p2171 A66-25594  
**OMET**  
 Motions in tail of comet Humason from  
 photographs taken at different  
 intervals 02 p0287 A66-11487  
 Three additional members of  
 transplutonian comet family, listing  
 approximate orbital  
 elements 02 p0287 A66-11488  
 Orbit of comet 1947 VI in least-squares  
 adjustment with respect to planetary  
 perturbations 02 p0287 A66-11495  
 Final orbit of Johnson  
 comet 02 p0293 A66-12264  
 Spacecraft-comet rendezvous trajectory  
 analyzed in terms of comet properties and  
 spacecraft capabilities to determine  
 feasibility of interception mission  
 [AIAA PAPER 63-413] 03 p0424 A66-12739  
 Cometary emissions and excitation  
 processes and prediction of major atomic

and molecular emissions of UV spectrum of  
 aurora 03 p0425 A66-12869  
 Rocket launching through aurora of high  
 luminosity spectrograph and liquid ammonia  
 to study behavior under solar  
 radiation 03 p0426 A66-12870  
 Comet mission study using space probes  
 boosted by Atlas Agena and Atlas Centaur  
 launch vehicles for interception from 1967  
 to 1975 04 p0577 A66-13579  
 Comet Ikeya-Seki /1965f/ discussing visual,  
 telescopic and spectral  
 observation 04 p0578 A66-14022  
 Spectroscopic observations of Sun-grazing  
 Ikeya-Seki Comet /1965f/ at minimum  
 possible heliocentric  
 distance 05 p0761 A66-15100  
 Finding coordinates of solar apex from  
 distribution of cometary perihelia and  
 cometary statistics 05 p0761 A66-15129  
 Mass accretion and variation in shape and  
 dimensions of comet  
 orbits 05 p0761 A66-15130  
 Photoelectric measurements of C sub 2, C  
 sub 3, CH and CN band strengths in near  
 nuclear region of Comet Ikeya  
 1964f 05 p0762 A66-15282  
 Atlas-Agena and Atlas-Centaur launch  
 vehicles to investigate  
 comets 06 p0951 A66-15903  
 Comet missions, discussing spacecraft  
 exploration criteria for short period and  
 long period first-apparition  
 comets 06 p0952 A66-15923  
 Comet spectrum analysis and variations  
 with distance of comet from  
 Sun 06 p0952 A66-15944  
 Comet gas production rate calculated from  
 whiplike icy-conglomerate model, considering  
 energy balance between solar radiation and  
 reradiation plus evaporation by  
 comet 06 p0956 A66-17011  
 Secular variations in absolute brightness of  
 periodic comets attributed to instrumental  
 and geometrical effects 07 p1133 A66-17519  
 Sudden decrease in brightness of Encke  
 comet in 1964 07 p1134 A66-17520  
 Apparent magnitude of periodic comet  
 Oterma calculated from relation between  
 absolute brightness and computed  
 ephemerides 07 p1134 A66-17521  
 Orbit determination of Everhart  
 comet 07 p1134 A66-17522  
 Effects of commensurability with mean  
 motion of Jupiter upon distribution of mean  
 motions of short-periodic  
 comets 07 p1135 A66-17640  
 Spectrographic analysis of Ikeya-Seki  
 comet 08 p1289 A66-18791  
 Hypersonic collisionless source flow  
 analysis of comet dust tail model, assuming  
 composition consists of small dust particles  
 acted upon by solar radiation pressure  
 [AIAA PAPER 66-32] 08 p1289 A66-18948  
 Orbital, geocentric, heliocentric and  
 heliographic positions of cometary nuclei  
 and tails in ecliptic or parabolic  
 orbit 08 p1292 A66-19198  
 Comet atmosphere analyzed for neutral  
 particle distribution, acceleration and  
 velocity variations relative to Sun,  
 brightness, etc 10 p1605 A66-21207  
 Orbits of Tsuchinshan 1 /1965b/ and  
 Tsuchinshan 2 /1965c/ 10 p1606 A66-21266  
 Halley comet motion during return of 1910,  
 obtaining orbits via differential correction  
 procedures, including perturbation by all  
 planets but Pluto 11 p1769 A66-22531  
 Comet observations in  
 IQSY 11 p1771 A66-22768  
 Comets hypothesized to consist of  
 antimatter, originating from parts of galaxy  
 consisting entirely of  
 antimatter 11 p1774 A66-23039  
 Comet nucleus as source situated in  
 stationary supersonic solar plasma flux  
 subject to laws of  
 hydrodynamics 12 p1945 A66-23508  
 Distribution of atoms and molecules in  
 comet head, assuming particles may be  
 created and annihilated during dissociation  
 and ionization 12 p1945 A66-23509  
 Launching of artificial comets into orbit to  
 evaluate theories of cometary  
 structure 12 p1945 A66-23569  
 Comet Tomita-Gerber-Honda, noting direct  
 photoreduced photograph, spectrum of head and

spectrum of tail 13 p2182 A66-25577  
 Astronomical and orbital data of comet  
 Ikeya-Seki noting elements for parabolic  
 orbit, elliptical orbit, etc 13 p2188 A66-26319  
 Daylight observations of 1965 f comet,  
 noting influence on solar corona, spectra at  
 various wavelengths, polarization data and  
 results of photoelectric  
 scans 15 p2592 A66-28645  
 Orbit of Comet 1959 IX  
 /Mrkos/ 15 p2593 A66-28647  
 Cometary origin of Tungusk meteorite of  
 1908 supported by analysis of space  
 trajectory and observed nightglow at time  
 of fall 15 p2595 A66-29129  
 Cometary motion in outer solar system  
 region, taking galactic nucleus as perturbing  
 body 15 p2596 A66-29141  
 Ionization process in comets does not  
 depend on solar electromagnetic or  
 corpuscular radiation, considering it as  
 intrinsic property of cometary  
 atmospheres 15 p2598 A66-29267  
 Radio observations of comet Ikeya-Seki at  
 frequencies above 160 mc 16 p2694 A66-30656  
 Comet Ikeya-Seki near perihelion  
 passage 16 p2694 A66-30657  
 Type I comet tail origin due to energetic  
 electrons in shock structure, noting inertial  
 slowing down of interplanetary field lines  
 trapped in solar wind 16 p2801 A66-30919  
 Terrestrial origin of tektites, noting  
 possible connection with cometary collision  
 and evidence of lunar origin for  
 some 16 p2802 A66-30926  
 Photographs from observatories of comet  
 Ikeya-Seki discovered in constellation  
 Hydra 16 p2804 A66-31309  
 BESM-2 computer program for calculating  
 parabolic comet orbit from three  
 observations 17 p2877 A66-31808  
 Minor planets, comets and satellites  
 motions and positions in outline of present  
 research 17 p2998 A66-32025  
 Past and future comet orbits, examining  
 value of auxiliary anomaly in Makover  
 method as function of heliocentric distance  
 of perihelion 17 p3000 A66-32337  
 Photoelectric photometry of comet  
 Everhart 1964 h, noting density of carbon  
 radicals and CN  
 molecules 17 p3000 A66-32338  
 Nature and origin of comets - International  
 Colloquium on Astrophysics, Liege, Belgium,  
 July 1965 17 p3008 A66-33367  
 Cometary nuclei discussing brightness,  
 models, evidence from photometry,  
 spectrography, dynamic properties of nuclei,  
 and meteors 17 p3009 A66-33368  
 Photometry of nuclear condensation used  
 to determine dimensions of cometary  
 nuclei 17 p3009 A66-33369  
 Radioactive heating effect on icy  
 conglomerate cometary nucleus and splitting  
 from solar heat shock 17 p3009 A66-33370  
 Comet flares and cometary nuclear  
 structure, specifically considering  
 Schwassman-Wachmann I 17 p3009 A66-33371  
 Evolution of gases from cometary nuclei by  
 sublimation or desorption 17 p3009 A66-33372  
 OH production by sublimation and gas  
 hydrate occurrence in cometary  
 nuclei 17 p3009 A66-33373  
 Physicochemical quantitative analysis of  
 cometary nucleus-coma buildup relationship,  
 discussing gas liberation, entropy and  
 enthalpy variation, change of state and gross  
 energy balance 17 p3010 A66-33374  
 Dimensions, shape spectra and models of  
 head of comet with atmosphere having dust  
 part much less important than gas  
 part 17 p3010 A66-33375  
 Collisions in inner region of cometary  
 head, structure of emission bands and  
 formation of free radicals 17 p3010 A66-33376  
 Telescopic and photographic observation of  
 cometary structure, particularly coma  
 region 17 p3010 A66-33377  
 Cometary diameter variation determined  
 with heliocentric distance for eight comets,  
 noting solar wind effect 17 p3010 A66-33378  
 Rotational line intensities of lambda 4300  
 band of CH in spectrum of comet  
 Ikeya 17 p3010 A66-33379  
 Rotational and vibrational temperature of  
 diatomic C in comets derived from high  
 resolution spectra, considering transition  
 probabilities in R and P

branches 17 p3010 A66-33380  
 Total number of cyanide molecules and diatomic carbon free radicals and density distribution in head of Arend-Roland 1957 III comet 17 p3010 A66-33381  
 Weak comets in vicinity of Sun during solar eclipse 17 p3010 A66-33382  
 Resolution spectra and photometric profiles of comet heads in monochromatic light and physical state and chemical composition of comets 17 p3011 A66-33383  
 Numerical calculation of relative intensity distribution of solid particles in cometary head, neglecting interparticle collisions 17 p3011 A66-33384  
 Integrated brightness observations of comets, using Baker-Nunn satellite tracking camera 17 p3011 A66-33386  
 Mie theory estimation of mass of dust component of cometary atmospheres observed from 1954 to 1964 17 p3011 A66-33387  
 Selection of comet intercept missions based on predictability of future returns, obtainability of spectroscopic data from Earth during intercept and launch energy limitations 17 p3011 A66-33388  
 Continuous spectrum of comet Alcock /1963 b/ observed with quartz spectrograph at Haute-Provence observatory in France 17 p3011 A66-33389  
 Solar wind and type I comet tails, noting solar wind and plasma velocities as compared with Mariner II measurements 17 p3012 A66-33391  
 Cometary and hydrocarbon flame spectra compared, discussing Swan, HCO and other band systems 17 p3013 A66-33404  
 Cometary origin through survey of literature for last 13 years 17 p3013 A66-33405  
 Hyperbolic comets and Oort hypothesis of cometary cloud, discussing probability distribution and existence of interstellar source 17 p3013 A66-33406  
 Rapid secular decrease in absolute brightness and commensurability effects with mean motion of Jupiter studied in evolution of short periodic comets 17 p3013 A66-33407  
 Secular brightness changes in periodic comets and relation to solar activity 17 p3013 A66-33408  
 Solar wind proton, solar flare proton and galactic ray effect on interstellar solids /comet/ 17 p3013 A66-33409  
 Orbital inclinations relation to comets direction of approach, noting transition between long and short period comets 17 p3014 A66-33410  
 Comet cosmogony of Lagrange and problems of solar system, including volcanic processes in planetary bodies, geophysical and geological arguments, etc 17 p3014 A66-33411  
 Physical characteristics of ten periodic comets compared, considering continuum, triatomic carbon radical and other emissions intensity tail and photometric parameters 17 p3014 A66-33412  
 Dynamical aspects of Oort hypothesis on cometary origin 17 p3014 A66-33413  
 Comet nuclei as principal source of meteorites, discussing dynamical arguments, orbital characteristics and exposure age 17 p3014 A66-33414  
 Interstellar molecules relation to corresponding cometary phenomena 17 p3014 A66-33415  
 Solar wind interactions with natural and artificial comets, discussing charge, momentum and energy transfer, Coulomb collision, plasma instabilities, ion clouds, etc 18 p3169 A66-34354  
 MHD and fluid dynamics interpretation of solar wind-comet interaction 18 p3169 A66-34355  
 Solar wind interaction with type I comet tails in interplanetary magnetic field 18 p3231 A66-34356  
 Solar wind particle density dependence on heliographic latitude due to solar magnetic field channeling 18 p3237 A66-35047  
 Photographic interpretation of shape of tail of comet Ikeya-Seki /1965 f/ and computation of velocity of particles in solar wind 19 p3459 A66-35588  
 Gas tails of brighter comets that may

reach 150,000,000 km in length reveal direction and velocity of solar wind 19 p3452 A66-35797  
 Comet nucleus as source situated in stationary supersonic solar plasma flux subject to laws of hydrodynamics 20 p3646 A66-37021  
 Distribution of atoms and molecules in comet head, assuming particles may be created and annihilated during dissociation and ionization 20 p3646 A66-37022  
 Comet disintegration as basic source of interplanetary dust based on zodiacal isophots 20 p3549 A66-37037  
 Solar wind flow past comet, obtaining minimum radius of comet 20 p3647 A66-37041  
 Possible enhancement to low-energy atmospheric proton flux induced by passage of Ikeya-Seki comet examined, using balloon-borne scintillation counter and pulse height analysis 20 p3631 A66-37617  
 Divergence of gas and dust tails of comets calculated, using moving coordinate with origin at comet head 20 p3653 A66-37797  
 Monte Carlo experiments on cometary origin of meteorites and asteroids in solar system and random orbits of stray bodies 21 p3812 A66-38825  
 Solar corpuscular radiation, discussing schemes of molecular transformations in comets for propene, water, acetylene, carbon dioxide and ammonia 21 p3809 A66-39125  
 MHD analysis of luminescence and widening of tail of Finsler 1937 V Comet passing through solar corpuscular stream containing frozen-in magnetic field 21 p3814 A66-39277  
 High resolution spectroscopic study of comets, examining mechanism involved in excitation of cometary spectra 21 p3816 A66-39533  
 Optimum launch and transfer conditions for two concentrations of orbits within meteor stream associated with Kreutz group of sun-grazing comets in space mission 22 p3976 A66-39859  
 Primary nucleus splitting in comet Ikeya-Seki, noting mechanics and velocity of splitting process 22 p3977 A66-39861  
 Photographic photometry of comet Ikeya-Seki using telescope in red region of spectrum, obtaining stellar magnitude 22 p3977 A66-39862  
 IR I and visual V magnitudes of comet Ikeya-Seki determined, using photoelectric measurements 22 p3977 A66-39863  
 Orbit determination for comet 1965 F Seki-Ikeya, projecting collision with Sun at perihelion 23 p4129 A66-41573  
 Tables of observational statistics on comets, minor planets and natural satellites 24 p4273 A66-42205  
 Cometary nature and phenomena, emphasizing uncertainty of composition of icy snowbank, physical interaction of gases and dust with solar wind and solar radiation 24 p4276 A66-42662

## COMMAND CONTROL

Automatic command control system using phonetic voice pattern 04 p0469 A66-13496  
 Subsonic and supersonic aircraft navigational systems requirements, discussing pictorial presentation and effect on command function 07 p1075 A66-17788  
 NASA Space Tracking and Data-Acquisition Network, describing command telemetry, tracking handling and recording system operations 08 p1180 A66-18587  
 Real-time command and control of Gemini and other entry vehicles by variational techniques 08 p1254 A66-19544  
 Mission-dependent Deep Space Instrumentation Facility equipment designed in support of Pioneer spacecraft program including command encoder, computer buffer and demodulator synchronizer 19 p3315 A66-35670  
 Control laws providing attainment of prescribed attitude and acceleration to prescribed speed in minimum time or fuel consumption for VTOL aircraft 21 p3768 A66-39606

## COMMAND MODULE

SA SERVICE MODULE

Hybrid computer simulation of lunar excursion module and maneuvers with orbiting command service module 12 p1828 A66-2383  
 Fuel cell power plant for Apollo command and service module from engineering viewpoint [AIAA PAPER 64-748] 13 p2007 A66-2664  
 Structural dynamics/manned space flight relation, discussing man-machine dynamics Apollo command module LF studies, pilot control of spacecraft and launch vehicle etc 14 p2230 A66-2801  
 Model tests for determination of structural response of Apollo command module water impact 14 p2393 A66-2802  
 Integrated checkout of Apollo payloads command module, lunar excursion module and service module 14 p2271 A66-2842  
 Guidance and navigational system hardware for Apollo Command Module and LEM 18 p3132 A66-3387  
 Central static inverter used to establish 1250-v, 115/200-v, three-phase 400-cps AC power distribution for Apollo Spacecraft Command and Service Module 20 p3498 A66-3717  
 Apollo command service module /CSM/ parts management 20 p3684 A66-3788  
 Theoretical and experimental data on Apollo command module during water impact 20 p3664 A66-3816

## COMMAND SYSTEM

SA DIGITAL COMMAND SYSTEM  
 Optimization of terrain following performance for supersonic fighter aircraft developing usable command signal 01 p0102 A66-1004  
 Spurious commands and error probability in project RELAY command systems, describing spacecraft equipment 03 p0333 A66-1256  
 Design and installation of antennae for airborne command and control systems, noting antenna system for SAC Airborne Command Post [AIAA PAPER 65-730] 03 p0334 A66-1258  
 Information assimilation from conspicuity coding of updated alphanumeric information, comparing relative effects of individual and group displays 12 p1809 A66-2392  
 Optimization of terrain following performance for supersonic fighter aircraft, developing usable command signal 19 p3397 A66-3648

## COMMERCIAL AIRCRAFT

SA SUPERSONIC COMMERCIAL AIRCRAFT  
 TRANSPORT /SCAT/  
 SA TRANSPORT AIRCRAFT  
 Breguet 941 STOL aircraft advantages over conventional commercial jet aircraft to solve requirements imposed on airport facilities 02 p0177 A66-11744  
 V/STOL aircraft economic and operational characteristics for commercial service over routes of 150 miles or less [SAE PAPER 650243] 03 p0446 A66-12632  
 CH-53A helicopter design, testing, reliability and flight characteristics 07 p0988 A66-17494  
 Design of Elliott E.5, low cost inertia navigation system for civil aircraft 07 p1071 A66-17727  
 Takeoff load distribution predetermination for commercial transport craft based on appropriate weight ratios 12 p1800 A66-23784  
 French commercial aircraft accident investigation 13 p1994 A66-25232  
 Fixed shaft turboprop flight control system for business and utility aircraft [SAE PAPER 660218] 14 p2225 A66-27119  
 Costs and operational characteristics of short haul air transportation in mid-1970 and 1980 periods in eastern corridor [SAE PAPER 660332] 14 p2223 A66-27295  
 Three types of cosmic ray measurement on commercial aircraft, using single Geiger Muller counter 15 p2591 A66-29675  
 Navy angle of attack system as aid in transition from propeller airplanes to turbojets, emphasizing application to commercial aircraft 17 p2843 A66-32684  
 Head-up display system design for civil aircraft including SST and current subsonic jets 17 p2952 A66-33200  
 V/STOL aircraft for commercial short-haul transports, considering turboprops, fan-in

- wing and propulsion 24 p4159 A66-42891

- SA SPACECRAFT COMMUNICATIONS SYSTEM
- Communication system for 1969 Apollo spacecraft 01 p0037 A66-10502
- Satellite communication, noting satellite and ground terminal design performance criteria 01 p0030 A66-10804
- Long-distance free space microwave circuits noting repeater stations on satellites, satellite orbit, type of traffic handled, equipment, ground stations, etc 01 p0030 A66-10861
- Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0031 A66-10938
- Development, organization and legal bases of satellite communication system developed by U.S., noting details on COMSAT 02 p0306 A66-11888
- Maximizing flow from source to sink in lossy communication net in which flow through edge is attenuated 02 p0208 A66-11905
- Elliott MCS 920 computer controlled trunk exchange for military area communication network 02 p0194 A66-11932
- Electronic systems in marine, air and space transportation noting radar, ultrasonic devices, computer techniques, etc 02 p0206 A66-12033
- Satellite navigation systems for marine and aircraft industry global, all-weather position determination and communications noting range measurement, range rate, NASA techniques, etc 02 p0260 A66-12237
- FM by mechanical tuning of cavity setting in gallium arsenide crystals for application to communication system 03 p0332 A66-12428
- White noise loading of multichannel communication systems 03 p0333 A66-12492
- Implementation of airborne command and control systems, emphasizing communications equipment, data processing facilities, electromagnetic compatibility and aircraft configuration parameters [AIAA PAPER 65-727] 03 p0336 A66-13049
- Detachable radio relay pods /RRQ-5/ to increase range of UHF and VHF communications systems [AIAA PAPER 65-728] 03 p0336 A66-13050
- Circular waveguides for antenna lead-ins and suitability as line sections and components of communication systems 03 p0345 A66-13237
- Book on channel construction for data transmission using phase-shift keying, considering relative phase telegraphy and noting subassemblies, noise effect, etc 03 p0336 A66-13285
- Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 04 p0575 A66-13361
- Phase coherent and nonphase coherent coded communications systems, discussing theoretical word error probability vs signal to noise ratio 04 p0478 A66-13593
- Nonlinear time-variant phase-lock loop differential equation for arbitrary loop voltage-controlled oscillator sweep voltages used in aerospace tracking and communication systems 04 p0502 A66-13605
- Earth-to-space communications using millimeter-wave region of spectrum, noting atmospheric attenuation, propagation losses, etc 04 p0479 A66-13607
- Book on electronic systems constituting space communications systems, noting orbital motions, space environment, noise, propagation, satellites, etc 04 p0481 A66-13816
- UHF voice communications system for 412L Air Weapons Control System discussing transmitter, receiver and compliance testing 04 p0497 A66-13964
- Optimum message decoding in communication systems with pulse code modulation, using minimum square-error criterion 04 p0489 A66-14415
- Communication system using pulse code modulation with polarized light, deriving bit error probability 05 p0631 A66-14594
- Transient response of narrow-band networks to narrow-band signals, using Laplace transforms with positive frequencies 05 p0652 A66-14595
- Communications and control systems that require faithful transmission of amplitude-modulated signals through linear filters 06 p0823 A66-15964
- Error probability computation for incoherent diversity reception in multichannel communications 06 p0828 A66-16111
- Limitations of communication system transmitting data from analog source obtained, using theorem in Shannon paper on information theory 06 p0828 A66-16115
- Maximum likelihood detection of band limited binary signals perturbed by Gaussian noise and intersymbol interference 06 p0829 A66-16193
- Traffic aspects of communications systems involving single wideband facilities carrying simultaneously traffic of various bandwidths and group switching to meet individual traffic requests 06 p0830 A66-16334
- Communication through unknown or random channel, using part of transmission energy to identify channel parameters by receiver 06 p0830 A66-16337
- Reliability of probabilistic communication network 06 p0830 A66-16338
- Supersonic commercial air transport, evaluating communication, navigation and identification systems 07 p1066 A66-17686
- Doppler frequency shift and effect on single-sideband HF communication systems for supersonic transport 07 p1001 A66-17699
- Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 07 p1002 A66-17775
- Degenerate parametric amplifier receiving two oppositely modulated input waves, improving noise figure 07 p1010 A66-18152
- Polaris nuclear powered submarine defense capability, noting mobility advantages and command communications system 08 p1322 A66-18559
- Arc-sine modulation method of overcoming amplitude nonlinearities in transmission systems 08 p1186 A66-19741
- Data pulsed transmission over electron-injection laser communication system, using continuous waves 09 p1385 A66-19934
- Linear system induced amplitude-frequency and phase-frequency distortions 09 p1361 A66-20296
- Navigation and communication systems using satellites and ground stations economically, by digital techniques 09 p1400 A66-20425
- Orbiting telecommunications satellite network, noting application and necessary launch vehicles 09 p1464 A66-20562
- Output signal and noise components determination from difference-frequency amplifier of two-channel receiver 10 p1504 A66-21671
- Comparison of sequential and nonsequential detection systems with uncertainty feedback, showing performance as function of peak-to-average power ratio 10 p1518 A66-21838
- Scientific research using instruments in space vehicles, noting direct observations of Moon, Venus, Mars, global communications, meteorology, geodetic and navigation satellites, etc 12 p1946 A66-23639
- Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 12 p1812 A66-23732
- Macroscopic factors affecting performance of microwave communication systems in plasma channels including absorption, refraction, dispersion, depolarization, nonlinear and random effects 12 p1813 A66-23793
- Improvement on Montgomery prediction of error probability in intermittent system operating during short intervals when SNR is above certain threshold level 12 p1816 A66-24138
- Operation results of Mariner and Pioneer telecommunication systems, including system design and future capabilities 12 p1819 A66-24609
- Future pattern of communications satellite systems, reviewing world requirements for telephony, telex, TV and radio [AIAA PAPER 66-319] 12 p1824 A66-24790
- Data processing centers integration through ground and satellite telecommunications networks for global information network [AIAA PAPER 66-331] 12 p1824 A66-24798
- Computational aids /charts and nomographs/ applicable to gross design of satellite communication systems 13 p2020 A66-25150
- Hybrid PCM-FM communication system, noting quantization error and threshold characteristics 13 p2020 A66-25218
- Deep space network /DSN/ for navigational and communications support to NASA lunar and planetary space programs 13 p2021 A66-25248
- Link design and transmission rates for entry and surface measurements during space exploration to Mars 13 p2021 A66-25249
- Direct and relay link communication from Martian surface station 13 p2021 A66-25250
- Combination of moored ocean platforms and transatlantic submarine telephone cables for VHF communication service and other ATC facilities for civil aircraft across North Atlantic 13 p2058 A66-25862
- Programmable patching system at Cape Kennedy for communications network composed of two individual switching subsystems, using solid state devices and glass-reed relays 14 p2233 A66-26805
- Diode quad modulator suppresses carrier 65 db in high capacity communication system 14 p2247 A66-26869
- Information theory, role in communication systems, detailing coding systems 14 p2239 A66-27808
- Book on solid state communications and design of equipment using semiconductors 14 p2260 A66-28367
- Passive satellite communications system for conventional and specialized networks, discussing new materials and satellite configurations 14 p2244 A66-28402
- Book on automatic communication switching systems, logic, logical switching components, storage elements, relay centers, etc 15 p2465 A66-29644
- Polyphase coding modulation system with additive white Gaussian noise, finding channel capacity bounds on maximum rate and error exponent 15 p2452 A66-29659
- Noise performance of X-band microwave sources, using transistorized crystal oscillators and amplifiers and varactor frequency multipliers for application to communication systems 15 p2465 A66-29672
- Dual polarized high-power synthetic conical scan tracking system at various frequency ranges for parabolic reflector used in communication link 16 p2650 A66-30552
- Communication effectiveness over VLF paths impaired by variability of VLF field strength due to modal interference effects 16 p2653 A66-30723
- Symmetry measurements in

communications device and systems, noting error 16 p2707 A66-31030

Detachable radio relay pods /RRQ-5/ to increase range of UHF and VHF communications systems [AIAA PAPER 65-728] 16 p2654 A66-31326

Analog communication over randomly time varying channels 16 p2654 A66-31331

Improvements to be realized through use of single channel black coded communication system 17 p2873 A66-31967

Increased transmission capability of radio communications link by applying multifrequency manipulation and multipositional amplitude manipulation 17 p2875 A66-32702

Modulators with constant input resistance applied to FDM communications systems for simplification or elimination of filters 18 p3066 A66-33565

Communication systems at microwave and optical frequencies for future Mars missions 18 p3067 A66-33793

Multilevel narrow-band digital FM modem noting design principles, signal to noise ratio vs error rates, etc 18 p3067 A66-33900

Binary synchronous communication in additive non-Gaussian noise, discussing optimal nonlinear detector for digital data transmission through non-Gaussian channels 18 p3067 A66-33901

Communications system design consisting of sequential encoder-decoder in conjunction with modulation detection system 18 p3067 A66-33903

Mathematical representation of latitude-longitude point pairs for intersection of figure of Earth and plane defined by central ray of signal scattered between communications sites 18 p3068 A66-33908

Computer model study of diversity augmented vehicular radio relay communication system in man-made noise environment 18 p3069 A66-34167

Linear system induced amplitude-frequency distortions 18 p3091 A66-34959

Cyclic product codes operating in variable redundancy modes used in communications systems, noting protection against errors 19 p3296 A66-35336

Optimal design of one-way and two-way coherent communication links for space communication 19 p3300 A66-35667

Extreme value statistics estimation of low error probabilities in binary communication systems 19 p3301 A66-35688

Personal telemetry system design and operation 19 p3301 A66-35689

Transceiver subsystem of two-way voice communication system consisting of ear device and master station 19 p3288 A66-35694

Adaptive on-off communication system for binary data transmission over noisy channel of unknown attenuation 19 p3302 A66-35709

System consisting of communications satellites distributed in nonsynchronous orbits and set of ground stations, formulating link scheduling problem as optimum control 19 p3303 A66-35884

Legal problems involved in space communications systems and organizations, assessing rule of ITU in outer space technology 19 p3483 A66-36219

Scale model of submerged VLF antenna using lossy ceramic powder to model ice and snow for submarine communication, geophysics, etc 19 p3321 A66-36416

Book on antenna analysis and antenna types 20 p3524 A66-37008

Recognition of fading signals transmitted by channels with unknown parameters, considering optimum reception technique based on arbitrary law 20 p3515 A66-37382

Antenna types and designs for aircraft, cars and trains 20 p3530 A66-37720

U.S. Lunar Orbiter program 20 p3663 A66-38063

Integral criterion based on absolute value of error, integral-square-ideal error, used as measure of distortion of communication system 20 p3539 A66-38285

Fading multipath channel behavior simulator for communication system performance study 20 p3534 A66-38359

Communication possibility over memoryless channel with computational iterative decoding scheme that is asymptotically

complex 21 p3704 A66-39141

Communication design techniques for coding set of discrete memoryless channels where transmitter and receiver have no knowledge of channels selected 21 p3705 A66-39144

Timing and framing synchronization of PCM communication systems using analog techniques, analyzing transient state and jitter 21 p3705 A66-39226

Communication network response to arbitrary transients calculated by digital computer, permitting replacement of analytic-function wave forms by lists of equal-interval sample values 22 p3883 A66-39724

Optimal design of one-way and two-way coherent communication links for space communication 22 p3864 A66-40060

Transient response of narrow band networks to narrow band signals, using Laplace transforms with positive frequencies 22 p3864 A66-40063

Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 22 p3865 A66-40075

Satellite communications - WESCON, Los Angeles, August 1966 22 p3867 A66-40709

Manual scheduling technique for allocating military satellite and ground resources to comply with input communications requirements and resources capabilities 22 p3868 A66-40711

Signal and receiver-parameter optimization for additive noise channels with feedback link 22 p3868 A66-40719

Signal systems design approach to problems of communication and radar systems, discussing channel and constraint modeling, data processor performance and signal optimization 22 p3868 A66-40720

Solid microminiature semiconducting materials and devices for microwave communications noting germanium and silicon role, microcircuits, plasma effects, floating zone techniques, etc 24 p4186 A66-43078

## COMMUNICATION THEORY

SA INFORMATION THEORY  
SA STATISTICAL COMMUNICATION THEORY

Textbook on communication engineering emphasizing random processes, information and detection theory, statistical communication theory, applications, etc 03 p0335 A66-12992

Textbook employing signal analysis theory in treating linear systems and communication theory including Fourier series, Fourier and Laplace transforms, convolution integral, etc 03 p0336 A66-13073

Slope quantized binary pulse code modulation by coding signal slopes with undigit 1/0 pulses, using special feedback circuit and threshold in coder comparator 07 p1002 A66-18248

Deriving Erlang lost-signal formula for congestion problem 08 p1184 A66-19236

Signal to noise ratios of AM, FM and PM systems applied to FM-FM receiver 08 p1185 A66-19563

Separation of harmonic components of function E/t/ by double differentiation with subsequent integration 08 p1185 A66-19602

Series solution for average wave field in medium with random inhomogeneities by using Green function for wave equation 09 p1343 A66-20335

Geometrical approximation of amplitude and surface-curvature parameters of wavefront reflected or refracted from curvilinear boundary interface 09 p1343 A66-20336

Morphological method of analysis for space communications, suitable for problems with independent unknowns 09 p1345 A66-20542

Modulation theory, discussing phase-envelope relation for band limited wave in terms of Fourier series 14 p2234 A66-27032

Method of coherent addition of signals to calculate noise resistance of diversity reception 14 p2236 A66-27170

Optimal communication system selection methods 18 p3069 A66-34254

Separation of harmonic components of function E/t/ by double differentiation with subsequent integration 18 p3128 A66-34960

PCM transmission system based on analog data conversion into binary signals, noting use of Shannon decoder for signal demodulation, circuit design and system properties 19 p3306 A66-36653

Antenna radiation pattern synthesis for various array distributions, noting methods applied 20 p3529 A66-37707

Antennas with leaky wave characteristics noting similarities and differences with wave diffraction 20 p3529 A66-37707

Slot antenna research, discussing array and polarization characteristics 20 p3530 A66-37713

Folded antennas, discussing Franklin array and current distribution via equivalent circuit analysis and application for TV transmission and reception 20 p3530 A66-37713

Short wave transmission station conduction, noting shielding to prevent interference from TV transmission 20 p3543 A66-37722

Varactor frequency multipliers, discussing application in low-power ultra-short-wave devices in moving objects for communication purposes 21 p3709 A66-38623

Interchannel generation transfer and multichannel generation in laser with four unsplit levels, noting radiation density, temperature effect and variations in coefficients of losses 21 p3746 A66-38958

Modulation and demodulation for probabilistic coding, noting error chances and interrelations affecting performance of communications system 21 p3707 A66-38633

Radar detection probability in presence of unknown parameters, covering pulse-to-pulse, partial and fully coherent cases 21 p3707 A66-38633

Run-length encodings, determining explicit form of Huffman coding when applied to geometric distribution 21 p3758 A66-39648

State-variable techniques application to communication and radar problems WESCON, Los Angeles, August 1966 22 p3868 A66-40711

Optimum realizable linear filter role in some communication problems, considering detection and continuous estimation 22 p3879 A66-40710

Autocorrelation function and energy spectrum of radiotelegraph signal, noting channel parameter dependency on transmission speed 23 p4036 A66-41050

IEEE Region Six Conference, Tucson, April 1966, Volume 1 23 p4039 A66-41580

## COMMUNICATIONS DEVICE

## SA LIGHT COMMUNICATION DEVICE

Tabulated reliability data on communications systems components for possible application to other fields 12 p1833 A66-24081

Solid state communications devices, discussing HF small signal amplifiers transistor circuits, varactor diodes for frequency multiplier chains, etc 14 p2261 A66-28368

Reflector construction for radar and communications antennas, discussing materials, surface configuration and relative costs 18 p3096 A66-34326

## COMMUNICATIONS SATELLITE

## SA EARLY BIRD SATELLITE

## SA ECHO SATELLITE

## SA INTELSAT SATELLITE

## SA RELAY SATELLITE

## SA SYNCHRONOUS COMMUNICATIONS

## /SYNCOM/ SATELLITE

## SA TELSTAR SATELLITE

Echo II program to launch passive communications satellite that will maintain spherical shape and surface smoothness after loss of inflatable pressure 01 p0145 A66-11122

International TV communications using satellite relaying systems noting Telstar, Relay and Syncom satellites and frequency sharing, video bandwidth, etc 02 p0190 A66-11519

Satellite systems and ground site networks for global surveillance communication nets and synthesis 04 p0475 A66-13460

Communications satellite technology problems discussing synchronization of orbit, attitude stabilization, lifetime and power supply 04 p0475 A66-13499

Communications satellite transponder

discussing system requirements for RF conversion and 04 p0492 A66-13595  
Multiple-access communications satellite discussing modulation and reception techniques for small stations 04 p0478 A66-13596  
Channel capacity of communications satellite repeater, deriving link capacities of radio teletype and voice channels 04 p0478 A66-13597  
Feasibility study indicates that cap-type microwave reflectors can be used as communication satellites 04 p0586 A66-13927  
Shipboard inertial navigation system recalibration, using periodic position information from communications satellite 05 p0712 A66-14604  
Military communications satellite system noting radio frequency, TWT amplifier, synchronous altitude, etc [AIAA PAPER 65-323] 05 p0633 A66-15170  
Moiniva type communication satellite, discussing optimum orbital requirements for maximum coverage, phasing, etc 06 p0952 A66-15907  
Early Bird satellite technology including design parameters, structure, power supply, control system and test program 06 p0958 A66-15921  
Digital range measurement used in design of instantaneous communications handover system for medium altitude multisatellite system 06 p0831 A66-16340  
Solid state output devices in communication satellites 06 p0850 A66-16399  
Traffic needs of communications satellites including random-passing, station-keeping/phased-passing/ and geostationary satellites 06 p0959 A66-16495  
Telecommunications satellite developments and prospects, discussing salient characteristics and traffic requirements 06 p0960 A66-16954  
Possible infringement liability regarding unlicensed transmission of copyrighted works via communications satellites 07 p1155 A66-17227  
Worldwide civilian communications satellite system concept, discussing agreements between U.S. and foreign governments on corporation establishment 08 p1179 A66-18568  
Defense Communication Satellite Program for reliable worldwide military communications 08 p1179 A66-18569  
Design and electrical properties of 25-meter Cassegrainian antenna installed at Raisting ground station for radio communications via satellites 08 p1190 A66-18681  
Time division method of multiple access to military communications satellite by several ground stations 08 p1180 A66-18713  
Medium-capacity satellite receiving system for multiplex FM telephony transmission 08 p1183 A66-18947  
Omega location and satellite reporting for worldwide observation and navigation systems 08 p1252 A66-19508  
Book on antenna systems of non-Soviet communication links via satellites 09 p1342 A66-19974  
Utilitarian space applications, discussing communications, weather, geodetic and navigation satellites and high speed aircraft 09 p1453 A66-20169  
Worldwide satellite communications systems dependence on solution of political, sociological, economic and legal problems 09 p1342 A66-20250  
Transmitters for satellite communications 09 p1345 A66-20545  
Italian participation in COMSAT 09 p1473 A66-20548  
International satellite communications, noting application for air traffic, using VHF band 09 p1346 A66-20561  
Orbiting telecommunications satellite network, noting application and necessary launch vehicles 09 p1464 A66-20562  
Unmanned and manned satellites for communication and terrestrial navigation, noting future plans of NASA 10 p1496 A66-21534  
Gc/s nitrogen-cooled nondegenerate parametric amplifier, noting design, application and operation 10 p1513 A66-21857

Commercial communications satellite for random, phased and synchronous medium altitude, noting design, specifications and operation 11 p1777 A66-22454  
Exact equations derived which can provide all permissible satellite-link assignments for communication satellite scheduling program 12 p1816 A66-24150  
Control system of microwave antenna positioning used in communication satellite tracking, noting servosystems, converter, Leonard drive, control panel, etc 12 p1817 A66-24320  
Future impact of communications satellites on society [AIAA PAPER 66-260] 12 p1981 A66-24735  
Global Commercial Communication Satellite using cylindrical spin stabilized satellite [AIAA PAPER 66-266] 12 p1954 A66-24739  
Satellite providing optimum communications to military users, noting gyroscopic stabilization of antennas, major characteristics, etc [AIAA PAPER 66-267] 12 p1955 A66-24740  
Characteristics and performance of synchronous satellite military communication system [AIAA PAPER 66-268] 12 p1859 A66-24741  
Initial Defense Communications Satellite Project /IDCSP/, current status, objectives and subsystems [AIAA PAPER 66-269] 12 p1820 A66-24742  
Lincoln Experimental Terminal /LET/ system, ground antenna, RF and signal processing equipment for communications via several satellites [AIAA PAPER 66-272] 12 p1821 A66-24745  
Commercial communications satellite system, impact and problems [AIAA PAPER 66-273] 12 p1981 A66-24746  
Manpower projections and problems for communications satellites, discussing requirements for research, development, production and operation [AIAA PAPER 66-275] 12 p1982 A66-24748  
Communications satellites, legal analysis and prognosis [AIAA PAPER 66-277] 12 p1982 A66-24749  
Multiple access modulation techniques /frequency-division, time-division, spread-spectrum and pulse-address/ for use in communications satellites [AIAA PAPER 66-278] 12 p1821 A66-24750  
Time division multiple access /TDMA/ modulation technique for satisfying anticipated demand by many small users for communication satellite facilities [AIAA PAPER 66-279] 12 p1821 A66-24751  
Communications satellites for small nations, describing requirements of worldwide multiple access system [AIAA PAPER 66-281] 12 p1821 A66-24753  
Interference ratios in space telecasting, considering methods of control for cochannel broadcasting [AIAA PAPER 66-283] 12 p1821 A66-24754  
Synchronous stationary satellite system for networking television and radio material to broadcast stations, noting frequency requirements and constraints [AIAA PAPER 66-284] 12 p1821 A66-24755  
Launch vehicle parameter design for optimal support of communications satellites [AIAA PAPER 66-285] 12 p1955 A66-24756  
Effects of varying orbital parameters, including number of satellites, orbit altitude, positioning, tracking accuracy, cost effectiveness, etc, on establishment and maintenance of communications satellite system [AIAA PAPER 66-286] 12 p1955 A66-24757  
Parameters of satellite communication system control and scheduling function, emphasising distinction between scheduling model and scheduling algorithm [AIAA PAPER 66-288] 12 p1822 A66-24759  
Communications satellite system efficiency enhanced by using automatic adaptive voice multiplexer in ground terminal equipment [AIAA PAPER 66-291] 12 p1822 A66-24761  
Adaptive utilization of communication satellite systems optimizing dynamic traffic handling of combined ground and satellite communications complex, noting network configurations [AIAA PAPER 66-295] 12 p1822 A66-24764  
Multiple-access worldwide satellite communication system for aircraft terminals

with limited antenna gain and transmitter power [AIAA PAPER 66-297] 12 p1823 A66-24765  
Design, efficiency and reliability of electric power system related to mission and orbit of communications satellites [AIAA PAPER 66-299] 12 p1804 A66-24766  
Wideband solid state intermediate frequency repeater for communications satellites, using waveguide-cavity diode down converter transistor amplifier and varactor up converter [AIAA PAPER 66-300] 12 p1823 A66-24767  
Increased oscillation stability and efficiency of traveling wave tubes for global satellite communications systems [AIAA PAPER 66-301] 12 p1844 A66-24768  
Requirements for gravity gradient stabilization of medium and synchronous altitude communication satellite systems using zero gain antennas, noting stabilization accuracy, stationkeeping effects, etc [AIAA PAPER 66-303] 12 p1955 A66-24770  
Nuclear power systems for future communications satellites, noting reactor, radioisotope, power system and thermoelectric power conversion equipment [AIAA PAPER 66-305] 12 p1804 A66-24772  
Spacecraft communication link antenna design, noting Earth coverage from synchronous orbit, attitude stability, beam width limits, construction, etc [AIAA PAPER 66-306] 12 p1823 A66-24773  
Direct-to-home TV broadcasting satellite system for upper UHF, describing stabilization, thermal control, antenna, power amplifier, etc [AIAA PAPER 66-309] 12 p1955 A66-24776  
Items affecting information transmitted from payload landed on remote planet to Earth via communications satellite including orbit, transmission policy and orbit injection error effect on communication capability [AIAA PAPER 66-314] 12 p1823 A66-24780  
Lunar communication satellites, discussing satellite relay, librational, random, and synchronous satellite design, lunar orbits, etc [AIAA PAPER 66-315] 12 p1823 A66-24781  
Communications requirements for manned deep space missions, using optical links, with PPM, PCM/PL and coherent reception for each link [AIAA PAPER 66-317] 12 p1823 A66-24782  
Social and legal questions posed by development of large-scale information grids [AIAA PAPER 66-318] 12 p1982 A66-24789  
Long-range projections of demand for intercontinental communication satellite systems and use as basis for business decisions [AIAA PAPER 66-322] 12 p1982 A66-24792  
Implementation of electronically despun satellite antenna system considering limits of impracticability because of excessive weight, control power, etc [AIAA PAPER 66-325] 12 p1844 A66-24795  
Electronic self-steering techniques applied to satellite communications systems with high gain antennas, noting transdirective array and self-phasing array [AIAA PAPER 66-326] 12 p1824 A66-24796  
Parametric analysis, penalty-effectiveness tradeoff and system selection for communications satellites, using block digital computer synthesis with subroutines for operational requirements [AIAA PAPER 66-330] 12 p1824 A66-24797  
International Telecommunications Satellite /INTELSAT/ Consortium and COMSAT participation in program [AIAA PAPER 66-332] 12 p1982 A66-24799  
Antenna drive with feedback control system for radio telescope, noting design, construction and operation 13 p2038 A66-25640  
Lower ionosphere guidance of HF and VHF waves for global communications, outlining computer simulation of phenomenon of whispering galleries 13 p2023 A66-25780  
Design and principles of operation of Relay, Teistar, Syncom, Early Bird and project ATC communications satellites 13 p2193 A66-25858  
Development of satellite communication systems, discussing tentative launching schedule through 1969 14 p2243 A66-28361  
Military communications satellite

developments, describing worldwide network of ground stations and 15 to 22 satellites in near-synchronous equatorial orbit 14 p2243 A66-28362

Synchronous orbit tracking and communication satellite using electronically steered antenna, tracking interferometers and low-powered solid state transmitter-receiver components 14 p2244 A66-28405

Navigation satellites as monitoring device by integrating navigational hardware into communications satellite for 16 p2743 A66-30667

ATC 16 p2743 A66-30667

Book on communications satellites design, testing, operation and power systems for Echo, Telstar, Relay, Syncom, ground stations, etc 16 p2809 A66-30877

Unclassified information concerning military communication satellite system 16 p2655 A66-31650

Graphical method extended to problems of interference between terrestrial line-of-sight radio relay systems and communication satellite systems 17 p2871 A66-31816

Communication satellite design noting use for educational and commercial purposes, instrumentation applied, etc 17 p2872 A66-31935

Phased array antenna system for multidirectional transmission and reception of focused beams with high gain 17 p2872 A66-31936

Time-dependent coverage area design parameter for Comsat systems in elliptical orbits, assuming spherical Earth and Keplerian orbits 17 p3002 A66-32472

U.S. progress in space applications program including communications, geodesy, meteorology and navigation 17 p3040 A66-32692

Optimization of radiation characteristics of satellite mounted antennas 17 p2894 A66-32990

Satellite broadcasting system for TV, international shortwave and high fidelity FM communication 18 p3066 A66-33783

Satellite orbiting via radio command guidance, discussing results with communications and weather satellites, guidance system used, control methods, etc 18 p3131 A66-33848

Mounting problem for land-borne and ship-borne antennas for tracking synchronous, subsynchronous and other communications satellites 18 p3070 A66-34263

Multiple-element steerable Earth-station antenna for communicating with communications satellite 18 p3080 A66-34264

Vertically-fed steerable parabolic reflector system for communications satellite Earth station 18 p3081 A66-34271

System consisting of communications satellites distributed in nonsynchronous orbits and set of ground stations, formulating link scheduling problem as optimum control 19 p3303 A66-35884

French booster projects for orbiting stationary communication satellites, noting SEREB/solid propellant/ and LRBA/liquid propellant/ 19 p3469 A66-36047

Commercial space communication and growth of regional-national organizations 19 p3481 A66-36205

COMSAT and commercial era in space 19 p3482 A66-36210

Objections of Soviet bloc to COMSATCO 19 p3485 A66-36229

Determination method for acquisition time, azimuth of satellite and duration of contact between tracking stations and satellites in general elliptic orbits 19 p3305 A66-36619

Multiple-access systems and characteristics in communications satellite applications, specifically frequency-division multiplex and spread-spectrum modes 20 p3511 A66-36897

Japanese ground antennas for use with communications satellites Telstar, Relay and Syncom 20 p3530 A66-37718

Guidance equations for positioning spin stabilized communications satellite in circular orbit, noting velocity adjustments, using Monte Carlo simulation 21 p3764 A66-38864

Electronic navigation system for marine applications, using communications satellite as data relay link 22 p3945 A66-40324

Long distance communications satellite, considering effect on traditional methods

and organization of global communication system 22 p3867 A66-40699

Comsat Operations Center for support of International Telecommunications Satellites 22 p3867 A66-40710

Coverage and overlap of communications satellites in circular equatorial orbits for multiple-access intercommunication 22 p3870 A66-40964

Electronically despun antenna and electronically controlled phase shifters to increase transmitter output power for spin-stabilized communication satellites 23 p4036 A66-41142

Time varying adaptive filter structure for providing minimum mean square estimate of signal in nonstationary channels for communications satellites 23 p4039 A66-41590

Electromagnetic compatibility of communications satellites, tropospheric scatter and line-of-sight microwave systems operating in same frequency band 23 p4040 A66-41597

Multiple large signal theory for TWT amplifiers with restrictive assumptions 24 p4183 A66-42635

**COMMUTATION**

Commutation relations obtained from commutation operator applied to potential and field intensity 21 p3732 A66-38662

**COMMUTATOR**

SA DECOMMUTATOR

Electronically switched DC motor commutated by light beam directed onto photodiodes 11 p1640 A66-23167

Thyristors for forced-commutated static converter, noting turn-on and turn-off behavior 13 p2029 A66-25115

Configuration-space photon number operators in quantum optics, discussing photoelectric measurements of field, photon localization in space-time regions, commutator formalisms, etc 15 p2543 A66-28942

Flexible commutation system for routing numerous signal-carrying leads to centrally located multiplexer for Saturn 16 p2649 A66-30540

Differential low level junction field effect transistor commutators performance and characteristics for design considerations 19 p3317 A66-35702

High-power nanosecond commutator for control of spark chambers, laser shutters, etc 22 p3933 A66-40945

**COMPARATOR**

Calibration procedures and statistical analysis for error reduction in ballistic camera lead-screw type comparator 02 p0228 A66-11380

Fast analog comparator for hybrid computation using wideband DC amplifier with regenerative feedback circuit providing digital output 03 p0337 A66-12573

Design and performance of two multirange current transformers for audio frequencies operating 400 hz to 10 khz with minimum error 07 p1004 A66-17215

Nonlinear signal comparators in feedback structures used for input-output invariance of single piecewise constant parameter 13 p2054 A66-26090

Basic circuit, sensitivity and mode of operation of balanced magnetic core comparator 24 p4187 A66-43179

**COMPASS**

SA GYROCOMPASS

SA MAGNETIC COMPASS

SA SOLAR COMPASS

Checking and calibration of aircraft compasses, discussing compass base at Dublin Airport and effect of lightning strikes 07 p1032 A66-17675

Controlled direct current applied to flux valve to stimulate rotation of aircraft in compass swing 07 p1033 A66-17723

Controlled direct current applied to flux valve to stimulate rotation of aircraft in compass swing 13 p2079 A66-25866

Compass system on VC10 provides magnetic heading reference, or alternately, inertial reference for grid navigation 13 p2125 A66-26283

**COMPENSATION**

SA TEMPERATURE COMPENSATION

Digital electrometric device with automatic discrete compensation 05 p0680 A66-15211

Compensation and decompensation in

ferromagnetic alloys viewed as electrical interaction of spins 12 p1930 A66-2468

**COMPENSATOR**

Three quarter-wave compensating method for measuring phase difference in visual spectral region 01 p0066 A66-10219

**COMPENSATORY TRACKING**

Manual closed-loop control systems analysis, discussing operator dynamics for permanent procedural variables 12 p1855 A66-2464

Visual and tactile display for compensator tracking, noting conditions for minimum error, mean square error, etc 16 p2644 A66-3127

Psychophysiological study of compensator tracking on digital altimeter display and of combined digital and scale-and-pointer display 17 p2869 A66-3344

**COMPILER PROGRAM**

SA BLOCK DIAGRAM COMPILER /BLODIB/

Universal programming languages and processors, survey and new concepts 12 p1826 A66-2382

New block diagram compiler for sampled data system simulation 12 p1826 A66-2382

Digital computer simulation of sampled data communication system using Block Diagram Compiler, B 13 p2028 A66-2593

Human factor aspects of digital computer programming for simulator control, discussing application and operation 17 p2869 A66-3344

**COMPLEX**

S LAUNCH COMPLEX

**COMPLEX VARIABLE**

SA ANALYTIC FUNCTION

SA MAXIMUM PRINCIPLE

SA RIEMANN SURFACE

Inverse problem of Khavinson and Khavinson approximated for complex plane sets 02 p0250 A66-1209

Heat transfer by laminar forced convection for dissipative fluid in annulus calculated using complex variable method 04 p0598 A66-1421

Resolution of two fundamental problems of elastostatic plane into complex variable under conditions of analytical limits 05 p0775 A66-1509

Complex variable functions, discussing boundary properties for holomorphic continuous unit disk with constant absolute value on boundary 06 p0901 A66-1600

Theorem on quotients of complex-valued almost periodic functions of one real variable containing Bohr theorem 06 p0904 A66-1704

Complete solution of problem of branching of solution of nonlinear equation in multidimensional case 07 p1056 A66-1760

Estimates of Taylor coefficients in theory of regular function of several complex variables 07 p1056 A66-1760

Perturbation method in theory of dynamic stability of systems with distributed parameters, discussing linear Hamiltonian equation in separable Hilbert space 07 p1056 A66-1760

Resolving matrix of normal system of ordinary linear differential equations in complex independent variable for multiply connected fields 07 p1057 A66-1783

Boundaries of convexity of star-shaped functions, order alpha, in open circular region /0, 1/ 07 p1059 A66-1809

Three-dimensional problem of isotropic continuous nonaxisymmetrical body of revolution, applying analytic functions of complex variable 08 p1307 A66-1888

Position of singularities of analytic continuation of potential /geophysical/ fields 09 p1373 A66-20480

Deflection of thin circular plate under eccentric loading using complex variables, obtaining expressions in series form 09 p1467 A66-20581

Potential analog synthesis of linear arrays and radiation pattern representation as function of single complex variable 09 p1356 A66-20605

Heuristical method solving zeros of complex function, transcendental or algebraic, of complex variable, applicable to computation of eigenvalues of general matrix 10 p1548 A66-21214

- Markov direct and inverse problems involving complex value functions on bicomact Hausdorff space and polynomials, with coefficients satisfying linearly independent constraints 10 p1549 A66-21235
- Stress concentration at semicircular notch in semiinfinite plate calculated by Savin complex-variable method 10 p1616 A66-21494
- Cauchy type integral on hypersphere, defining Cauchy principal values, noting role in theory of functions of complex variables 11 p1724 A66-23366
- Mathematical analysis of analogies between theory of heat conduction and theory of functions of complex variable 12 p1977 A66-23562
- Weak, strict and strict-weak Levi conditions defined in complex variables, noting conditions for holomorphy and coincidence of functions 13 p2118 A66-25787
- Dirichlet problem deviation from Bitsadze system with Noetherian properties, giving Hausdorff normal solvability conditions for inhomogeneous problem 13 p2120 A66-26009
- Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 13 p2026 A66-26249
- Locating zeros of complex functions by computing topological index 13 p2121 A66-26326
- Series in function of complex variable applied to mixed problem of elastic equilibrium of annulus 15 p2607 A66-28697
- Flexure of thin elastic plate clamped to rigid columns, determining functions of complex variable 15 p2613 A66-29433
- Complex variable theory of flame surface interaction and flow field of two-dimensional V-shaped flame simulated by source and sink sheets 15 p2617 A66-29605
- First-order linear elliptic system with areolar derivatives involving  $n$  unknown complex functions 16 p2738 A66-31706
- Book on jet theory in ideal fluids, covering compressible flow, steady jet flow, infinite flow past polygonal obstacle, unsteady flow, etc 16 p2632 A66-31746
- Complex variable method to solve problem of circular elastic plate elastically restrained at edge and subjected to arbitrary concentrated force 17 p3020 A66-32000
- Complex analysis of equilibrium equations in two-dimensional theory of elasticity 17 p3025 A66-32592
- Integral representation providing one-to-one correspondence between functions of  $n$  complex variables and complex-valued harmonic functions of  $n$  plus 1 real variables 18 p3126 A66-33837
- Reduction of plane thermoelastic problem of anisotropic body to determination of three analytical functions of complex variables, solving temperature stress distribution in anisotropic plate 18 p3258 A66-34702
- Position of singularities of analytic continuation of potential /geophysical/ fields 19 p3345 A66-35498
- Markov direct and inverse problems involving complex value functions on bicomact Hausdorff space and polynomials, with coefficients satisfying linearly independent constraints 19 p3389 A66-36182
- Feedback control system behavior, examining influence of values of structural parameters and variations in domain of complex variable 21 p3718 A66-38806
- Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 22 p3947 A66-39708
- Construction of Cayley-Dickson type and involution type bimodules for composition algebras 22 p3939 A66-40002
- Reciprocal theorems of best approximations of complex variable, considering domain restricted by finite number of smooth curves forming nonzero angles at junction points 23 p4084 A66-41353
- Binary communications integral equations in complex variable functions and application of Fourier transform for bandlimited signals 23 p4085 A66-41537
- Digital computer program for handling algebraic expressions in complex numbers 23 p4042 A66-41739
- Reinforced semiinfinite under concentrated loads, noting flange stress magnitude and distribution 24 p4285 A66-42144
- ### COMPONENT
- #### S SPACECRAFT COMPONENT
- #### COMPONENT RELIABILITY
- System reliability prediction limited when it does not take into account out-of-tolerance operation due to component variation with environmental changes, electric stresses and aging 01 p0167 A66-10055
- Predicted vs observed avionics reliability in design technique, using factual reliability data of baseline equipment and solid state component advances 01 p0035 A66-10080
- DC-9 reliability program emphasizing simplicity improved proven components rather than completely new equipment 01 p0010 A66-10088
- Reliability and reproducibility of SIL-TEMP 84 fabric used as reinforced filler in ablative components and high temperature insulating material in rockets and missiles 01 p0089 A66-10089
- Machining processes effect on reliability of engine components and methods for detecting failure and failure susceptibility 01 p0077 A66-10104
- Reliability and design factors for space power conditioning equipment examining peak power, component part specifications, integrated circuits and failure analysis 02 p0180 A66-11283
- Worst case design for high reliability welded electrical connections, emphasizing encapsulation stresses and quantitative parameter 02 p0234 A66-11325
- Miniaturization in improving weapon system component availability, transportability and reliability 02 p0198 A66-11464
- Avionic equipment reliability improvement through highly reliable components, noting Minuteman 03 p0343 A66-12903
- Noise characteristics of semiconductor devices turned to advantage by using noise measurements for reliability analysis, noting noise types and transistor irregularities effect on noise 03 p0345 A66-13217
- Statistical base for intuitive reliance on validity of conventional component qualification testing 04 p0528 A66-14447
- Reliability of complicated systems based on rarity of component failures 05 p0688 A66-15367
- Nonhazardous and nondestructive method for testing pressure regulating valves, using simulated gas flow and pressure [ASME PAPER 65-WA/AUT-7] 05 p0661 A66-15707
- Degradation analysis for selection of components for space application 05 p0650 A66-15824
- Parts reliability in USAF and Department of Defense specifications 05 p0691 A66-15829
- Spacecraft microelectronic device failure modes and mechanisms 05 p0650 A66-15830
- NASA procurement technique including incentive contracting, improved performance, timely delivery and reduced cost 05 p0795 A66-15831
- Reliability, life and relevance of circuit design in electromechanical switching devices 06 p0839 A66-15946
- Environmental conditions and circuit design effect on various types of resistors, examining quality of manufacture and economics of reliability 06 p0839 A66-15947
- Prediction and engineering assessment in early design, particularly mean time between failures of electronic equipment 06 p0839 A66-15948
- Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 06 p0839 A66-15950
- Capacitor reliability as function of voltage and temperature of dielectric and environmental conditions 06 p0839 A66-15951
- Reliability of electronic equipment needed to increase availability and reduce maintenance cost 06 p0840 A66-15953
- Bibliography on semiconductor reliability classified under applications /computers, radio, spacecraft, etc/, costs, devices, environments, networks, production, etc 06 p0848 A66-16308
- Principles and statistics behind life-test plans of MIL-STD-690 Life Test Sampling Procedures for Established Levels of Reliability and Confidence in Electronic Parts Specifications 06 p0886 A66-16332
- Lifetime of semiconductor devices determined from noise levels 06 p0860 A66-17195
- Beach and ratchet marks plus component geometry information and stresses to pinpoint fatigue failure in service 08 p1306 A66-18634
- Space radiation environment and guidelines for designing satellite electronic equipment for reliable operation in space 08 p1301 A66-18731
- System reliability by analyzing reliability of components in connection with operation of logic structures 08 p1187 A66-19447
- Radiation effects on electronic components noting sensitivity to gamma, fast neutron and electron radiation 09 p1359 A66-20969
- Component tolerance and measuring error effects on noise measurements 11 p1652 A66-22384
- Dimensionality theory for determining failure rate of aircraft components not in operation 11 p1637 A66-22862
- Trigger functioning, failure due to grid voltage and transistor parameter changes, and reliability parameters of computer and control elements 11 p1677 A66-23032
- Engineering problems in SNAP reactor component irradiation program, including material compatibility, vacuum equipment selection and operation and contaminants within chamber 12 p1857 A66-23674
- SNAP-10A instrumentation and control subsystems and ground test program 12 p1911 A66-23676
- Long-term storage effects on reliability of electronic equipment, covering testing results and available data on failure rates 12 p1830 A66-23755
- Reliability, life and relevance of circuit design in electromechanical switching devices 12 p1831 A66-23791
- Reliability of electronic systems, discussing redundant systems, series and parallel grouping and exponential survival law 12 p1831 A66-23792
- Electronic equipment failures, which show characteristic dependence on time, divided into initial, chance and wear-out failures 12 p1832 A66-24074
- Inherent reliability of equipment estimated during design stage, using component failure data 12 p1833 A66-24075
- Truncation method for determining life characteristics of electronic components such as transistors and vacuum tubes before testing to destruction 12 p1833 A66-24078
- Tabulated reliability data on communications systems components for possible application to other fields 12 p1833 A66-24080
- Component failure-rate testing by inspection or sampling, noting recommendations of advisory groups 12 p1833 A66-24081
- Component reliability, especially in transistors, noting techniques, design, tests and mounting as monolithic circuits 12 p1833 A66-24082
- Defense equipment reliability noting specifications, field data collection, control plan, etc 12 p1833 A66-24083
- Queuing model digital simulation techniques used to determine reliability of stand-by system with maintenance station 12 p1834 A66-24085
- Accelerated life tests of germanium transistors, with failure percentage plotted against time 12 p1834 A66-24086
- Microwave component testing accuracy and analysis of error sources 12 p1833 A66-24725
- Accelerated testing of transistors, resistors and capacitors to determine reason for certain types of component failure 12 p1844 A66-24728
- Design, efficiency and reliability of electric power system related to mission and orbit of communications satellites [AIAA PAPER 66-299] 12 p1804 A66-24766
- Standard redundancy techniques for determining reliability of series elements

and interchangeable stand-by components in digital circuits 12 p1888 A66-24821

Defect analysis by device sectioning, noting techniques, application in crystallography, electronics, etc 12 p1845 A66-24849

Reliability testing of electronic components at low stress levels, showing higher failure rates and different failure distributions than at maximum ratings 12 p1846 A66-24911

Properly controlled high-stress life testing used to evaluate failure rate of high reliability solid state components of integrated circuits 12 p1846 A66-24913

Sterilization requirements of spacecraft electronic systems and relation to equipment reliability 13 p2013 A66-25269

Reliability, durability and reduction of failure probability in radioisotope energy source design 13 p2085 A66-25285

Optimum nonlinear inertialess conversion of signals from several devices, taking into account unreliability in operation 13 p2045 A66-25296

Reliability of nonelectronic components in electronic system, noting failure modes, rates, mechanism, etc 13 p2085 A66-25655

Test system design, discussing operative systems and equipment for Sea Vixen radar and Seaslug Mark I missile 13 p2058 A66-25698

Component failure examples of Gemini rendezvous radar, emphasizing need for closed loop reliability program 13 p2039 A66-25786

Military and spacecraft electronic component testing, specifications and reliability programs 13 p2086 A66-25846

Extrapolating reliability ratings of electronic components and materials tested at high stress to low stress performance 13 p2043 A66-26220

Reliability testing of aircraft engine components 13 p2088 A66-26689

Reliability problems associated with producing to specification from viewpoint of aircraft manufacturer 13 p2088 A66-26693

Causes of failure and guidelines for design of solid state lasers 14 p2309 A66-27669

Component testing and system reliability at various confidence limits for serially connected systems 14 p2305 A66-28428

Structural component reliability analysis for rocket engine propellant tanks, noting variance testing of hemisphere strength for statistical tolerance limits 15 p2507 A66-28795

Component and pyrotechnic production sampling applied to reentry vehicle program, noting technique for selecting size, frequency and quantity of components for testing 15 p2507 A66-28798

Effect of limited quantity and short delivery requirement orders for electronic components in reliability and quality control 15 p2508 A66-28803

Military relay reliability, design factors, manufacturing control, etc 15 p2460 A66-28990

Electronic component reliability and control program 15 p2465 A66-29667

Silicon planar transistor design noting accelerated life test, failure data, etc 15 p2466 A66-29675

Tolerance range of multicomponent circuit calculated from tolerance limit of individual component 15 p2474 A66-29766

Creep fatigue, thermal cycling, vibration control, transient thermal response control, structural loads and hot part reliability relating to long-life jet engine failure [SAE PAPER 660311] 15 p2572 A66-29836

Instability of current distribution related to problem of reliability in transistor electronics 15 p2468 A66-29915

Hostile long term storage environments, discussing aircraft component condition following extensive exposure 16 p2635 A66-30472

Reliability of finite automata determined from analysis of elements capable of misalignment, input errors and structural design 16 p2669 A66-30761

Tolerance limits for structural components in power-filter circuit design, calculating fluctuations of damping property and phase fluctuations in multiply divided circuits 16 p2663 A66-31031

Airborne performance analysis by multiparameter sampling applied to aircraft

maintenance and benefits including prediction of impending malfunctions 17 p2842 A66-31959

Peak power stresses in semiconductor device testing for space power equipment, using photo methods 17 p2880 A66-31984

Step-stress technique to induce failures in integrated circuits to pinpoint source of reliability problems 17 p2882 A66-32114

Accuracy analysis method for radioelectronic circuits, noting statistical-test method 17 p2897 A66-33517

Reliability of complex electronic device incorporating great number of components 18 p3087 A66-34957

Lifetime of semiconductor devices determined from noise levels 19 p3315 A66-35553

Ion engine satellite control system noting design and laboratory tests [AIAA PAPER 65-417] 19 p3450 A66-35616

Component reliability and failure rates in aerospace electric power systems with relays 20 p3525 A66-37180

System effectiveness, Volume 5 - Reliability and Maintainability Conference, New York, July 1966 20 p3563 A66-37879

Contractor components/parts reliability program for Douglas S-IVB stage project 20 p3566 A66-37880

Deterministic and quasi-deterministic class of electronic failure predictions as prevention strategy for use in aerospace system test or checkout program 20 p3566 A66-37887

Materials problems affecting system effectiveness, reliability and maintainability in aerospace industry 20 p3567 A66-37896

Performance degradation and system failures in metal-metal, metal-oxide and metal-semiconductor systems 20 p3532 A66-37900

Economics of Ownership structure and cost effectiveness in microelectronic systems 20 p3684 A66-37904

Ultrahigh reliability medium-power lightweight TWT design 20 p3532 A66-37906

Identifying critical elements /parts and components/ as criteria for system design tradeoff at system and circuit levels 20 p3568 A66-37916

Reliability program, determining assurance and stabilization trend by analysis of lots applied to testing high reliability parts for Saturn V inertial guidance system 20 p3570 A66-37934

Electronic data processing used to analyze AFM 66-1 maintenance data on USAF T-38 supersonic jet trainer for reliability monitoring 20 p3572 A66-37945

Information center concept for accurate acquisition and processing of parts, materials and components reliability and maintainability information for task performance 20 p3572 A66-37947

Solderability test procedure for predicting solder joint reliability 20 p3572 A66-37948

Systems tests coverage for data processing system 20 p3523 A66-37950

Saturn S-II stage project uses ground testing of flight vehicle to achieve high statistical confidence in high reliability 20 p3572 A66-37951

Bounds on reliability, life distributions and open problems for structures 20 p3574 A66-37964

Lunar Excursion Module /LEM/ reliability program, discussing engineering, manufacturing and techniques of design and qualification testing of electronic components 21 p3714 A66-39520

Component characteristics in integrated circuits 21 p3716 A66-39621

FR-1 satellite component reliability program 22 p3876 A66-40159

Man-machine merger in computer aided design of circuits, examining changes in circuit parameters caused by component tolerances, simulation of component failure, feasibility and circuit optimization 23 p4072 A66-41252

Electronic component reliability test program review including test planning, objectives and relation of types of review to projects 23 p4152 A66-41605

Mariner 1964 parts screening program including philosophy, program implementation, screening results and

conclusions 24 p4178 A66-42081

Apollo spacecraft parts screening program showing dependence on reliability for mission success 24 p4216 A66-42099

Reliability prediction, failure rates, failure safe design and packaging of integrated circuit and MOS-FET microminiaturized electronic equipment 24 p4179 A66-42099

Parts sterilization at Jet Propulsion Laboratory 24 p4180 A66-42299

### COMPOSITE FUNCTION

Composite state vector method for linear time-varying system 05 p0655 A66-14611

Monograph on continuous maximum principle covering design and control of industrial and process engineering systems: dynamic programming, process optimization, etc 12 p1901 A66-23533

Construction of Cayley-Dickson type an involution type bimodules for composition algebras 22 p3939 A66-40001

### COMPOSITE MATERIAL

#### SA CERMET

Thermochemical interaction between ablation material and environment during manned reentry, using mainly graphite and composite materials [AIAA PAPER 65-642] 01 p0160 A66-10222

Structural composite materials component development program emphasizing design and fabrication [AIAA PAPER 65-760] 03 p0386 A66-13053

Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 05 p0772 A66-14722

#### Fiber composite materials - ASM Seminar

Metals Park, Ohio, October 1964 05 p0700 A66-14801

Origin and properties of fiber composite materials 05 p0705 A66-14801

Strength of whiskers in fiber composite materials 05 p0705 A66-14801

Influence of fiber and matrix characteristics on mechanics of deformation and fracture of fibrous composite 05 p0773 A66-14811

Unidirectional solidified eutectic alloys as reinforced composites 05 p0700 A66-14811

Macromechanics of stress state at interface of composite material 05 p0700 A66-14811

Strength of fiber reinforced metals: examining fracture mode 05 p0700 A66-14811

Elastic modulus and ultimate tensile strength of fibers and fiber composites 05 p0705 A66-14811

Destructive and nondestructive testing of fiber composite materials 05 p0773 A66-14811

Strengthening metals by using oxide fibers as reinforcements 05 p0700 A66-14811

Metal fiber reinforced ceramics 05 p0705 A66-14811

Structural mechanics and critical conditions of fiber composite materials 05 p0773 A66-14901

High energy protons in synchrocyclotron testing of polyethylene, aluminum, lead and titanium hydride 05 p0627 A66-15111

Stress-strain behavior of tungsten fiber reinforced copper composites, discussing room-temperature tensile and dynamic modulus tests 05 p0702 A66-15321

Electron and ion emission of material in presence of cesium vapor, noting use as emitters 05 p0622 A66-15571

Fracturing model of surface-hardened materials with triaxial stress at subsurface interface from loading [ASME PAPER 65-MET-2] 06 p0961 A66-16204

Materials and fabrication techniques for ablative hardware composite materials engineering 06 p0899 A66-16286

Optimum reinforced composite strength of glass-reinforced plastics depends on filament geometry factors such as filament content, orientation and dimensions [AIAA PAPER 66-142] 06 p0901 A66-17081

Composite materials manufacture and application to high temperatures, with evaluation of various binders and filaments 06 p0898 A66-17110

Survey of composite materials and structures 07 p1053 A66-17846

Composite ceramic systems consisting of metallic or organic phase and ceramic phases, microstructure, mechanical strength

and thermal expansion 07 p1051 A66-18299  
 Validity of three-dimensional photoelastic analysis of composite models of dissimilar materials in nonhomogeneous elastic field problems 08 p1310 A66-19225  
 Tensile properties of composites of tungsten or molybdenum wire uniaxially aligned in copper matrix 09 p1393 A66-20661  
 Strength of structural composites of orthotropic materials with arbitrary thickness and orientation including lamination and anisotropy effects [AIAA PAPER 65-75] 10 p1617 A66-21781  
 Model approximation method for induced elastic and thermal characteristics of materials reinforced by circular cylindrical fibers 11 p1720 A66-22231  
 Sintered W and W plus additive billets used to test feasibility of producing fiber-bearing composites by elongation during extrusion 11 p1715 A66-22537  
 Glass-resin interaction of filament-wound composites, determining material properties and application to high performance pressure vessels 11 p1783 A66-23121  
 Improvement of mechanical properties of structural adhesives and composite materials at cryogenic temperatures 12 p1899 A66-24385  
 Surface area, complexes and water effect on properties of carbon fiber resin composites 13 p2111 A66-25166  
 Naval Ordnance Laboratory /NOL/ multiaxial fatigue test for failure mechanisms in fiber-reinforced composite materials involving cyclic stress under controlled environmental conditions 13 p2113 A66-25312  
 Composite casting as metallurgical bonding technique, noting application to weight reduction and increase of corrosion resistance 13 p2086 A66-25779  
 Composite materials, noting fibrous composites using whiskers, fabrication including spray-up, filament winding, etc, mechanical properties, application for rocket nozzles, heat shields, etc 14 p2318 A66-27228  
 Spacecraft metal-metal composites consisting of continuous filaments in metal matrix 14 p2317 A66-28013  
 Graphite composites suitability for use on hypersonic entry vehicle components 14 p2319 A66-28014  
 Lightweight packageable structurable materials capable of expansion, erection and rigidization in space 14 p2317 A66-28016  
 Microquenched age-formed titanium alloys and titanium Bi-alloy composites, discussing production process using spherical particles produced by rotating electrode [SAE PAPER 660458] 17 p2940 A66-33164  
 Elastic and plastic properties of fiber-reinforced and continuous skeleton tungsten-copper composite materials 17 p2941 A66-33425  
 Nozzle cooling and infiltrant loss from infiltrated refractory metal composites at high gas propellant temperature 19 p3385 A66-36157  
 Aluminum-ductile binder composite alloys containing high volume of nickel-aluminum compounds and CoAl prepared by powder blending and hot extrusion 20 p3585 A66-37783  
 Whisker composite materials, discussing potential of whiskers, utilization of whisker strength, whisker growth, handling whiskers and composite properties 20 p3588 A66-38183  
 Factors affecting strength of whisker reinforced metals, noting characteristics [ASME PAPER 66-MD-81] 21 p3750 A66-38504  
 Mechanical properties of metallic and ceramic fibers in metallic matrices and refractory fibers in ceramic matrices 21 p3751 A66-39231  
 Bonding of similar and dissimilar alloys by composite casting for aerospace use 22 p3926 A66-40273  
 Approximation of elastic constants of unidirectional fiber reinforced composite material from constituent material properties, including longitudinal modulus, transverse modulus and Poisson ratio 22 p3993 A66-40342  
 Composite thermal coating consisting of refractory facing and slightly heat-conducting decomposing

lining 22 p4000 A66-40818  
 Structural composite materials component development program emphasizing design and fabrication [AIAA PAPER 65-760] 23 p4083 A66-40978  
 Use of monofilament composites of S-glass fibers and epoxy-resin in primary aircraft structure [AIAA PAPER 65-761] 23 p4083 A66-40979  
 Fatigue behavior of aluminum reinforced with stainless steel wires, considering effects of fiber volume fraction and interfacial bond 23 p4081 A66-41661  
 Aluminum and titanium alloys, composite materials and nonmetallic materials for supersonic transports and VTOL aircraft noting intakes, nozzles and variable-geometry wings [ICAS PAPER 66-1] 23 p4016 A66-41932  
 Fiber geometry effect on shear stress distribution in composite materials 24 p4292 A66-42861  
**COMPOSITE PROPELLANT**  
**SA BI-PROPELLANT**  
 Manufacturing large production quantities of precise solid propellant mixtures to meet space booster propulsion system [SAE PAPER 650766] 05 p0743 A66-15005  
 Temperature at which predecomposition or decomposition of ammonium perchlorate occurs, changed by perchlorate surface treatment and reflected in burning rate of propellant containing perchlorate [CI PAPER WSCI-65-36] 05 p0744 A66-15151  
 Theoretical detonation characteristics of ammonium perchlorate-polyurethane solid composite propellants 05 p0744 A66-15781  
 Physical model of composite solid propellant combustion which includes oxidizer particle size and surface heat generation [AIAA PAPER 66-112] 06 p0941 A66-17098  
 Ignition of ammonium perchlorate composite propellants by convective heating [AIAA PAPER 66-65] 06 p0941 A66-17101  
 Nonacoustic combustion instability of aluminized composite propellant [AIAA PAPER 66-111] 06 p0941 A66-17105  
 Solid, heterogeneous and gas phase ignition theories of solid propellants [AIAA PAPER 66-64] 08 p1280 A66-19728  
 Prediction of thermal conductivity of binary mixture of solids, particularly solid propellants utilizing metallic filaments 10 p1590 A66-21957  
 Plane shock wave compressions of cylindrical and wedge-shaped specimens used to obtain shock Hugoniot of two unreacted, composite and double-base aluminized propellants 12 p1934 A66-23589  
 Combustion of ammonium perchlorate propellants in solid propellant rockets 12 p1978 A66-23965  
 Bonding strength of polyurethane and polybutadiene composite propellants in cast-in-case rocket motors depends on propellant cohesive strength 12 p1934 A66-24706  
 Combustion of composite ammonium perchlorate based propellants near extinction pressure, noting burning rate parameters 13 p2171 A66-25181  
 Strain rate and pressure effects on tensile behavior of viscoelastic composite solid propellant 13 p2171 A66-26116  
 High speed testing to determine viscoelastic properties of composite propellant polymers, for use in solid propellant rockets 13 p2115 A66-26119  
 Periodic processes in combustion mechanism of composite propellants 14 p2412 A66-27489  
 Laboratory burners used as experimental analogs of actual propellant deflagration process, examining dependence of composite solid propellant deflagration on mixture ratio [WSCI 66-25] 18 p3161 A66-34417  
 Solid, heterogeneous and gas phase ignition theories of solid propellants [AIAA PAPER 66-64] 18 p3162 A66-34580  
 Microwave attenuation magnitude associated with exhaust plasma of nonaluminized and aluminized composite propellant 21 p3807 A66-38687  
 Ignition of ammonium perchlorate composite propellants by convective heating [AIAA PAPER 66-65] 21 p3806 A66-38689  
 Continuous pneumatic mixing of liquid and

solid propellant ingredients into composite type propellant 22 p3968 A66-39669  
 Castable composite high energy propellants manufacturing techniques, discussing economy based on batch mixing and continuous processing 22 p3969 A66-39870  
 Nonacoustic combustion instability of aluminized composite propellant [AIAA PAPER 66-111] 22 p3970 A66-40355  
 Physical model of composite solid propellant combustion which includes oxidizer particle size and surface heat generation [AIAA PAPER 66-112] 22 p3970 A66-40356  
 Direct-casting polyurethane-ammonium perchlorate-based composite propellant grain manufacture for small rocket motor, noting inspection methods 23 p4119 A66-41432  
 Erosive burning in rocket engines of radial burning type, using polyurethane/ammonium perchlorate base propellant / grains, examining flow channel constriction 23 p4121 A66-41433  
 Combustion mechanism of composite propellants including solid propellant combustion rate measurements, flames spectrography, temperature at propellant surface, etc 23 p4122 A66-41660  
**COMPOSITE STRUCTURE**  
 Optimization of viscoelastic damping materials for use in specific composite systems of metal skins and damping viscoelastic layers 01 p0150 A66-10151  
 Macromechanisms of composite structure damping, using viscoelastic materials as in extensional and shear deformation 05 p0772 A66-14552  
 Deleterious effect of heterogeneity on stability of composite cylindrical shells under axial compression [AIAA PAPER 66-140] 06 p0968 A66-17083  
 Compression instability of unidirectional composites consisting of regularly spaced arrays of axially loaded columns supported by elastic filler [AIAA PAPER 66-143] 08 p1309 A66-19005  
 Griffon 02 delta-winged aircraft with composite air breathing turbofanjet engine, noting achievements and prospects 11 p1761 A66-23248  
 Design of composite structures of minimum weight, using flat-bottomed cylindrical tank, noting continuity condition of radial bending moment of plate and shell 14 p2395 A66-27174  
 Stresses in composite spheroids of two different isotropic elastic materials under compressive forces acting along common axis of revolution 14 p2397 A66-27391  
 Stresses and strains in anisotropic multilayered thick walled circular cylinder subjected to radial pressure [AIAA PAPER 65-174] 14 p2402 A66-27869  
 Modes and frequencies of transverse vibrations of composite beams 15 p2610 A66-29339  
 Heterogeneity effect on multilayer composite cylindrical shell stability under axial compression 17 p3025 A66-32454  
 Tungsten and tungsten composite fabrication by gas-pressure-bonding process 19 p3368 A66-36123  
 Composite structures of glass-fiber reinforced resin and other materials for launch shell structures [AIAA PAPER 65-286] 20 p3672 A66-38165  
 Adhesively joined beryllium structures for extreme temperature application, noting properties in various conditions 22 p3926 A66-40277  
 Fiber composites construction from infiltrated powder compacts 23 p4080 A66-41068

## COMPRESSIBILITY

Compressibility charts for nonpolar and slightly polar substances in gaseous and liquid states and in two-phase region, using four independent parameters  
[ASME PAPER 65-WA/PID-1]

Two-fluid anisotropic warm plasma, characterizing macroscopic electromagnetic properties via compressivity and permittivity tensor and permeability

Governing equations for electromagnetic phenomena in lossy magnetoionic media in terms of compressivity tensor, deriving wave equations which are decoupled, giving resulting uncoupled differential equations

Compressibility law corresponding to Tomotika and Tamada generalized approximation for transonic flow, noting Tomotika and Tamada gas

Compressibility factor chart for hydrocarbon-hydrogen and nitrogen-hydrogen gas mixtures, correlating pressure and temperature, using state equation

Energy equation of boundary layer in heat-insulating part of flat wall used to derive equations for gas heat shield efficiency, demonstrating effect of nonisothermicity and compressibility

## COMPRESSIBILITY EFFECT

Velocity distribution in turbine stage with compressible medium for repeating axial velocity profile derived, employing approximation method

Compressibility effect on velocity distribution and gradient at stagnation point in plane subsonic jet incident at arbitrary angle on infinite plate

Electromagnetic problems in anisotropic and compressible plasma solved by characterizing compressibility as compressivity tensor

Externally pressurized foil gas bearings, employing successive approximations method to solve Reynolds equation for fluid and equilibrium equation for foil

Slip and compressibility effect on velocity and pressure drop characteristics of rarefied gas flows in rectangular and annular ducts

One-dimensional heat flow to cool wall, discussing effects of compressibility and variable thermal conductivity

Relation of compressibility with cohesive energy and molecular volume for dielectric solids, noting confirmation of relation for 45 crystalline compounds

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals

One-dimensional adiabatic compressible gas flow in cylindrical tube taking into account Reynolds number variations along tube and compressibility effect on friction factor

Compressibility effect on flow in MHD boundary layer of semilinear thermally insulated flat plate

Effect of incompressibility of substance on gravitational instability, deriving dispersion equation and comparing results with problem of incompressible fluids

Transient response of value-controlled actuator with inertial loading to step input excitation, considering fluid compressibility

Linearization of Rayleigh problem for viscous compressible conducting fluid, considering compressibility effects by evaluating solution of pressure equation

Instability due to coupling between compressibility and resistivity in cylindrical plasma with surface currents, noting growth rate near acoustic velocity phase

Apparatus for determining dynamic compressibility, creep behavior and viscoelastic properties of polymers

Stability loss of shells of revolution under effect of axial compression and radial pressure with no restrictions on generatrix curvature, using strain energy method

Velocity distribution of subsonic flow around von Mises profile, noting compressibility corrections

Secondary flow for supersonic boundary layers with or without swept edges, noting effect of compressibility and heat transfer on reverse flow

Compressibility of material in stability problems of elastoplastic plates and shells

Pressure dependent critical temperature and magnetic field of superconducting transitions in metals

Free convection boundary layer along isothermal plate, using equation of laminar compressible flow and heat transfer, noting profile dependency upon wall coordinate

Boundary layer on spherically blunted cones in supersonic air flow at given wall temperature and thermally insulated wall, graphing calculation

Integral method based on method of moments to investigate compressible laminar boundary layers

Quasi-linearization solution of two-component laminar compressible boundary layer with heat transfer on ablating wall

Separation of gas mixture in curved supersonic flow, noting parameters of concentration gradient profile variation

Corresponding compressible and incompressible jets and wakes in boundary layer equations of turbulent and laminar cases

Hydrodynamic theory relating velocity decrement and curvature of gaseous detonation to conditions at explosive inert interface

Similar solution of differential equations for compressible laminar boundary layers in case of insulated walls

Properties of compressible boundary layers with heat transfer and arbitrary pressure gradients calculated, using integral equation and correlation concept for application in hypersonic flows

Analytical methods for studying turbulent boundary layers at high Mach numbers, comparing theory and experiments for flat plate flow, predicting boundary layer properties around hypersonic configurations

Skin friction methods compared for problem of turbulent compressible boundary layer on flat plate at hypersonic Mach numbers

Turbulent boundary layers in compressible and incompressible flow, examining pressure gradients, temperature distribution and heat transfer effects

General theorems for dissociated and chemically reacting compressible laminar unsteady two-component boundary layers derived, based on Nirenberg maximum principle

Similar solutions for compressible boundary layers with heat transfer and blowing or suction

Compressible turbulent boundary layer on flat plate, noting correspondence between compressible and incompressible flow, numerical results on skin friction and heat transfer, etc

Flow of unsteady compressible boundary layer over semilinear flat plate whose temperature exceeds free stream temperature

Unsteady compressible boundary layer equations solved when wall temperature is perturbing about zero and steady mean

Throttle devices to control compressible gas flow, using gas dynamics laws

Configuration synthesis and optimal utilization of supersonic favorable interference to obtain high lift-drag ratios

Particle in cell method for calculation of supersonic wake flow, noting transient effects for flow initiated by shock diffraction

Losses when compressible and constant density fluids flow across abrupt enlargements and contractions

Axisymmetric integral nozzle design with subsonic /contraction/ and supersonic /effuser/ parts for compressible flow

Fluid dynamics - Symposium, Zakopane, Poland, September 1963

Second approximation of compressible subsonic flow over given wing profile reduced to regular Dirichlet problem

Compressible subsonic flow with symmetric Zhukovskii profile calculated by correspondence principle

Laminar boundary layer problems for compressible and incompressible fluids

Velocity profiles in point-to-point mapping of compressible turbulent boundary layers into constant density flows

Quasi-steady compressible fluid flow and thrust analysis in accelerating nozzles and channels subject to constant axial acceleration or gravitation

Friction resistance of compressible turbulent gas flow through initial section of cooled pipe with large gas-wall temperature gradients

Rarefied compressible gas flow analysis by study of collisions between molecules, molecule-surface collisions and distance molecules travel between collisions

Two-dimensional isoenergetic compressible mixing of jet with fluid at rest for laminar and turbulent mixing

Viscosity and thermoconductivity effects on asymptotic sonic flow structure near profiles and bodies of revolution

Compressible laminar boundary layer equations solved, noting wall flow and suction problem

Handbook of generalized gas dynamics including one-dimensional gas dynamics, compressible flow tables, gamma function, isentropic flow, etc

Low Reynolds number flow past sphere for cases involving density and temperature variations, noting compressibility, transport properties and viscous dissipation

Successive approximation method for compressibility in subsonic flow around elliptical cylinder

Mass transfer, friction and heat transfer analyzed and calculated for turbulent boundary layers in compressible flow

Flow of compressible conducting gas around symmetrical wing in longitudinal magnetic field

Book on jet theory in ideal fluids, covering compressible flow, steady jet flow, infinite flow past polygonal obstacle, unsteady flow, etc

Diffusion combustion in turbulent compressible gas flow

Hydraulic analogy to compressible gas flow, discussing application to aerodynamic motions, flow visualization, measuring techniques and instrumentation

Theoretical and physical limitations restricting hydraulic analogy to compressible gas flow

Approximation method for compressible laminar heat transfer to blunt axisymmetric bodies in high speed flow

One-dimensional theory of compound-compressible nozzle flow

Separation of electromagnetic and plasma modes in two-fluid lossy compressible plasma, deriving field quantities from two

Helmholtz equations 11 p1653 A66-22561

Inviscid flow of compressible conducting gas with aligned magnetic field through axially symmetric Laval nozzle in various transition regions 11 p1636 A66-23256

Transition solution of physical state across plane nonrelativistic MHD shock of finite strength in compressible dissipationless perfect gas in uniform magnetic field 12 p1923 A66-24578

Hydrodynamic equation for ideal compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 12 p1865 A66-24867

Nonstationary two-dimensional channel flow of compressible electrically conducting fluid subject to traveling magnetic field 13 p2140 A66-25422

Compressivity tensors as parameters to characterize two-fluid compressible plasma in external magnetic field 13 p2149 A66-26273

Electrical analog method used in determining potential gas flow past airfoil lattice, noting components of solution 13 p2068 A66-26541

Slot admittance for two-layer compressible plasma sheath-ion sheath in plasma half-space 14 p2235 A66-27128

Heat and mass transfer process in reacting boundary layer of compressible gas in laminar flow along semiinfinite porous plate 14 p2416 A66-28484

Electromagnetic and plasma wave propagation in inhomogeneous compressible isotropic collisionless electron plasma bounded by closed surface in free space 15 p2449 A66-28592

Planar subsonic flow around circular cylinder using Kisseleff approximation method for compressible fluid 16 p2627 A66-30210

Linear integral operators applied to singular differential equations and to computations of compressible fluid flows 16 p2683 A66-30241

Energy dissipation due to deformation of magnetic field in compressible conducting medium near zero field 16 p2762 A66-31182

Dynamic law for pressure variation in throttle chamber of hydraulic control booster, taking into account fluid compressibility and change in discharge coefficient 16 p2637 A66-31219

Generalized model of ideal compressible anisotropic fluid, determining dependence of free energy on density 16 p2689 A66-31517

Flow visualization in compressible fluids, examining optical techniques and Toepler schlieren system 18 p3094 A66-34134

Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas, including presence of traveling shock wave 18 p3102 A66-34918

MHD wave equation for compressible infinitely conducting fluid formulated in Cartesian tensor form 18 p3103 A66-34935

Helical flows of viscous compressible fluids for homogeneous and inhomogeneous flows 18 p3103 A66-34942

Base pressure behind ridge in separated supersonic flow of compressible gas determined for case of turbulent mixing 18 p3103 A66-35053

General relativistic field equations of compressible fluid sphere with variable polytropic index 20 p3545 A66-37465

Entry problem of thin symmetric wedge impinging normally on free surface of compressible inviscid liquid, neglecting gravitational effects 20 p3547 A66-37981

Hamilton principle extended to compressible MHD flow of perfect conducting fluid 20 p3610 A66-37987

Screening of sound in infinite tube with circular cross section and finite wall thickness placed in compressible fluid 21 p3729 A66-39444

Impact of rigid or flexible body on surface of compressible fluid, noting impact of rigid wedge and linear supersonic airfoil theory [ASME PAPER 65-WA-UNT-3] 21 p3731 A66-39531

Hydrodynamic equation for ideal

compressible fluid in case of steady three-dimensional vortex motion solved via two second order PDEs 22 p3899 A66-40328

Lighthill integral transform methods in hodograph transformation theory of plane compressible transonic shock-free potential flows around airfoil sections in solution space of Chaplygin equation [ICAS PAPER 66-26] 23 p4007 A66-41008

Impedance of flat strip antenna embedded in planar dielectric slab surrounded by layers of compressible isotropic electron plasma 23 p4047 A66-41639

Velocity discontinuity surface instability and fluid compressibility effect on stationary flows 23 p4059 A66-42006

**COMPRESSION**

SA AXIAL COMPRESSION

SA DECOMPRESSION

SA METEORITIC COMPRESSION

SA PULSE COMPRESSION

Test apparatus for continuous measurement of stress relaxation in metals which are plastically prestrained in compression 09 p1466 A66-19950

Shock compression of liquid argon at very high pressures and temperatures by reflecting shock wave from tungsten wall for testing interatomic potential 11 p1694 A66-23210

Liquid phase compression in closed cycle gas turbine by using particular working fluids for application to nuclear power stations [ASME PAPER 66-GT-111] 14 p2411 A66-27005

Elasticity equations for materials with different resistance to tension and compression 17 p3025 A66-32590

Compression per stack layer varying as power of layer thickness when multilayer structures are compressed under loads of up to 5 x 10 super 3 lbf 20 p3667 A66-37480

Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, giving theoretical foundations /Part I/ 23 p4091 A66-41859

Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, for case of graphite core /Part II/ 23 p4091 A66-41860

**COMPRESSION BUCKLING**

Buckling of imperfect cylindrical shells under axial compression and external pressure 02 p0298 A66-11563

Shear instability type accompanying shear deformation of structures and normal to compressive load direction [AIAA PAPER 65-770] 03 p0434 A66-12554

Initial deformation effect on upper critical load of spherical shell under uniform distributed external pressure 04 p0590 A66-14148

Behavior of centrally compressed rod beyond proportionality limit, noting system stability 04 p0590 A66-14162

Stiffened cylinder buckling behavior under compressive load, noting analysis methods [AIAA PAPER 65-79] 05 p0781 A66-15787

Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 08 p1308 A66-18996

Compression instability of unidirectional composites consisting of regularly spaced arrays of axially loaded columns supported by elastic filler [AIAA PAPER 66-143] 08 p1309 A66-19005

Compressive strength and instability failure mechanism in uniaxial boron fiber-metal matrix composite material 08 p1240 A66-19139

Von Karman-Donnell large-displacement equations for thin circular cylindrical shells extended by considering larger term numbers in Fourier series representing radial displacements after buckling 08 p1309 A66-19143

Idealized cylindrical shell buckling under axial compression derived from generalized integral expression 08 p1310 A66-19166

New parameter, dimensionless fraction of particle volume irreversibly dislocated by plastic deformation during compression, permits calculation of powder compression

process and constants 10 p1540 A66-21507

Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 12 p1956 A66-23583

Dynamic buckling of imperfection sensitive models, specifically cylindrical shells under axial compression 12 p1957 A66-23590

Stability analysis of shells of revolution with curvilinear generatrices under axial compression, using strain energy technique 12 p1967 A66-24110

Longitudinal stiffeners eccentricity /one-sidedness/ effect on buckling strength of axially compressed cylinders 14 p2404 A66-27989

Filament overwrapped metallic cylindrical pressure vessels show greater efficiency ratio and buckling strength 14 p2405 A66-27992

Stability of three-layer cylindrical shells under compression, load and combined action 16 p2817 A66-31053

Thin circular cylindrical shell behavior in axial compression, noting buckling under stress, boundary condition detail effects, etc 17 p3031 A66-33064

Inelastic buckling strength of aluminum columns, plates and beams in compression and in shear 17 p3032 A66-33434

Exact analytic solution, in confluent hypergeometric functions, to problem of stability of conical shell under uniformly distributed longitudinal compressive forces 18 p3252 A66-33709

Approximation method for checking stability of compression members in rigid-joint space truss or stability against out-of-plane buckling of compression members in rigid-joint plane truss 19 p3475 A66-36489

Finite deflection and stability equations for circular cylindrical shells stiffened in longitudinal and circumferential direction 19 p3475 A66-36636

Postbuckling behavior of clamped infinite flat strip under action of shearing forces analyzed based on von Karman equations 20 p3669 A66-37531

Static and dynamic stability loss of nonconservative mechanical systems describing buckling of clamped-free rod and stability loss of cantilever beam subjected to bending 20 p3672 A66-38267

Inelastic buckling of rod with initial slight sinusoidal deflection subjected to short-term longitudinal compressive dynamic load 20 p3672 A66-38268

Lateral buckling of annular plate compressed radially at inner or outer edge 20 p3674 A66-38294

Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 21 p3828 A66-38728

Stability of structurally anisotropic circular cylindrical shell under nonuniform compression 21 p3829 A66-38976

Variational theorems for creep of shallow cylindrical shells, noting buckling and snap-through of square cylindrical panel compressed along generatrix 21 p3829 A66-38977

Critical buckling load at middle plane of variable-rigidity plate 21 p3832 A66-39376

Instability of long thin circular cylinders under axial compression, bending, torsion, shear and external pressure [ICAS PAPER 66-32] 22 p3996 A66-40663

Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 23 p4138 A66-41107

Approximate finite deflection analysis of buckling of long slightly curved panels in axial compression 23 p4143 A66-41963

Slenderness ratio and compressive buckling stress in plates with stiffeners oriented parallel to direction of applied loads 24 p4289 A66-42286

Notch and heat treatment effect on compressive buckling of WC/Co alloys 24 p4228 A66-43063

## COMPRESSION. LOADING

Uniform compression effect on Curie temperature of ferromagnetic compound EuO 01 p0118 A66-10254

Stability of thin walled cylindrical dural shells under creep during compression and bending 02 p0297 A66-11396

New materials in compression packings and O rings such as fibers, metals, plastics and homogeneous materials 04 p0525 A66-13782

Stress-volume results between 20 and 140 kbar for germanium shock loaded in one-dimensional strain 07 p1108 A66-18419

Strain energy method used to examine stability and supercritical strains of rib-reinforced cylindrical shells under axial compression 08 p1305 A66-18595

Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression loads 09 p1428 A66-20591

Flexure of semiinfinite nonsymmetric three-layer plate under steady transverse compression, using state equation to determine load values impairing equilibrium of plate 09 p1468 A66-20760

Zeta phase in tantalum-carbon system, noting diffusionless transformation of carbon-deficient lattice under compressive stress 12 p1892 A66-23566

Load capacity of condensing vapor-lubricated long self-acting journal bearing, examining two-phase and single-phase regions [ASME PAPER 65-LUBS-5] 12 p1888 A66-24554

Propagation of brittle cracks in body under compression, discussing theory of resistance of brittle bodies to compression 13 p2196 A66-25629

Plastic deformation effects on preaged aluminum-copper alloy structure subjected to 40-75 percent compression 13 p2110 A66-25965

Uniform compression effect on Curie temperature of ferromagnetic compound EuO 13 p2168 A66-25971

Compression of anisotropic fiber monofilaments extended to measurements of expansion of horizontal diametral plane and contact widths for polyethylene terephthalate and nylon, as function of load 13 p2115 A66-26306

Stresses in composite spheroids of two different isotropic elastic materials under compressive forces acting along common axis of revolution 14 p2397 A66-27391

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 14 p2400 A66-27684

Permanent compressive deformation of pyrolytic graphite rapidly heated to very high temperatures and loaded in C direction 14 p2318 A66-27877

Conductivity of compressed powdered refractory compounds found to be exponential function of ratio between material/compact densities 15 p2520 A66-28749

Hooke law analysis of dynamic stability of closed circular cylindrical anisotropic shell compressed by longitudinal force 15 p2609 A66-29196

High temperature compressive deformation equipment for ceramic materials noting loading, alignment and stress-strain measurement 16 p2682 A66-30950

Stress-strain state of plane containing crack in nonuniform field of compression stresses, deriving pressure at contact surface 18 p3252 A66-33714

Temperature, time and loading conditions for adhesion or cohesion of structural metals in vacuum 18 p3117 A66-34651

Compressive load effects on heat flux through multilayer insulation 20 p3675 A66-37062

Plastic deformation effect on critical temperature and magnetic field of superconducting junctions in titanium under uniform high compression loads 20 p3622 A66-38124

Strength of ceramic specimens with parallel cylindrical holes, noting strength/weight characteristics during compression loading 21 p3753 A66-38677

Reinforced cylindrical shell stability under axial compressive force, using linear and quasi-linear formulation 22 p3990 A66-40146

Limiting equilibrium of compression-and-tension-bent shallow shell of revolution 22 p3991 A66-40149

Progressive plastic buckling of cylindrical shells under axial compressive load, noting nonsymmetric patterns 22 p3994 A66-40432

Stability of ideal plate under compression loading beyond elastic limit 24 p4290 A66-42437

## COMPRESSION. TESTING

High speed compression of viscoplastic thin disk between smooth dies considering inertia effects 02 p0299 A66-11690

Structural analysis and experimental verification of sandwich panels with thin plastic-film facings and foam-plastic cores under compression and bending loads 03 p0437 A66-12769

Piezomagneto-resistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 04 p0569 A66-14358

Mechanical testing methods, discussing quasi-static and fatigue fracture due to tensile compressive load and cyclic deformation characteristics of materials 04 p0537 A66-14399

Compressive residual stress effects on surface layers of through-hardened bearing steels produced by prenitriding before hardening [ASME PAPER 65-WA/CF-7] 05 p0690 A66-15625

Poisson ratio for viscoelastic materials undergoing large strains measured, using compression test [ASME PAPER 65-WA/RP-8] 05 p0706 A66-15629

Deformation of double ring used in compression tests to study stress-strain state of brittle and cermet materials 08 p1313 A66-19438

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 10 p1546 A66-21505

Boundary condition effects in magnetic mirror compression experiment, noting dependence of transition from unstable to quasi-stable plasma containment on density and lifetime 10 p1568 A66-21824

Sliding friction and compression testing of rigid polyurethane foams 13 p2112 A66-25303

Rational compression curves and plastic deformation mechanism of cast and drawn polycrystalline beryllium 13 p2106 A66-25356

Resin-impregnated material response to compression testing at intermediate strain rates 13 p2114 A66-26112

AMRA high speed tensile tester analysis of dynamic stress-strain behavior in beryllium oxide in flexure and in compression 13 p2115 A66-26114

State equation analysis from tensile or compression test data and influence of strain, strain rate and temperature on strain-hardening curve for metals such as Al, Cu, Pb, etc 14 p2397 A66-27393

Piezomagneto-resistance on compressive stress for antimony-alloyed germanium, observing magnetic field induction 14 p2368 A66-28256

Compressive creep in thermoplastic materials measured, using simple test cell apparatus 14 p2319 A66-28483

Idle time effect on static friction studied under boundary lubrication conditions, using compression tester and press-fit test specimens [ASLE PAPER 66AM 1C1] 16 p2710 A66-30403

Drag on cylinders of various height mounted on flat plate, noting dependence of compression region length on cylinder diameter during analysis of boundary layer separation phenomena 17 p2909 A66-32493

Compressive tests on WC-Co cemented alloys including preparation of sample, equipment, behavior and failure mode [ASME PAPER 66-MD-80] 21 p3750 A66-38503

Load carrying capacities of rotationally symmetric plates and shells for limited anisotropic behavior and different yield stresses in tension and compression 21 p3831 A66-39375

Megagauss magnetic field generation by

- explosives and related experiments - Conference, Frascati, Italy, September 1965 21 p3773 A66-39501
- Grain boundary cavity growth in Al-Cu alloy during compressive creep testing 22 p3935 A66-40291
- Mechanical properties of VAD23 alloy noting tensile, compression, crushing and shearing strength and notch sensitivity and comparison with D16T alloy 22 p3936 A66-40881
- Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 23 p4081 A66-41526
- COMPRESSION TESTING MACHINE**  
Simple auxiliary torsion testing device for use with universal tension-compression testing machines 01 p0151 A66-10201
- Apparatus for determining dynamic compressibility, creep behavior and viscoelastic properties of polymers 13 p2115 A66-26115
- COMPRESSION TUBE**  
Homogeneous dissociation kinetics of gas examined by means of adiabatic compression apparatus attached to mass spectrometer 13 p2079 A66-25821
- COMPRESSION WAVE**  
Attached coordinate system for approximate solution of compression waves emitted by expanding sphere at constant rate in ideal medium 01 p0057 A66-10420
- Shock wave structure for gas with discrete velocity distribution, examining compression and reflection from plane surface, Broadwell model and increase in specific mass 03 p0354 A66-12538
- Dynamic flexural buckling of rods within axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32]
- 04 p0593 A66-14232
- Separation of gases from isotopes in compression shock produced in expanding gas flow past obstruction, dependent on gas density and hydrokinetic properties of components 06 p0875 A66-17052
- Stability of expanding corona against radial compressional waves 09 p1455 A66-20403
- Nonsteady isentropic compression wave to generate high-velocity air flows with very low ambient dissociation levels 11 p1684 A66-22831
- Time-dependent variation of cross sectional area used to generalize classical theory of elastic-plastic loading waves in thin rods 12 p1960 A66-23949
- Ultrasonic observation of magnetization and flux jumping in superconducting niobium-zirconium alloy, analyzing field penetration effect on temperature dependent compressional wave absorption structure 13 p2159 A66-25071
- Acoustic waves and convection effect on asymmetries of weak to medium-strong solar lines 13 p2183 A66-25614
- Circumventing turbine inlet temperature limitation of gas turbines by direct fluid-to-fluid energy exchanger, using isentropic compression waves to avoid shock losses [ASME PAPER 66-GT-117]
- 14 p2373 A66-27009
- Exact solutions for unsteady two-dimensional gas dynamics equations for self-similar flow behind shocks and expansion waves 14 p2278 A66-28143
- Dynamic flexural buckling of rods within axial plastic compression wave, noting strain-hardening law [ASME PAPER 65-APMW-32]
- 18 p3247 A66-33567
- Compressional wave velocity in limestones, marbles and single crystal of calcite under hydrostatic pressure to 20 kbar 19 p3351 A66-36387
- Gas flow formation ahead of flame front in circular and rectangular shock tubes analyzed, based on high speed photographs and method of characteristics 21 p3836 A66-39097
- Screening of sound in infinite tube with circular cross section and finite wall thickness placed in compressible fluid 21 p3729 A66-39444
- COMPRESSOR**  
**SA AXIAL FLOW COMPRESSOR**
- SA CENTRIFUGAL COMPRESSOR
- SA DATA COMPRESSOR
- SA FAN
- SA MULTISTAGE COMPRESSOR
- SA SUPERSONIC COMPRESSOR
- SA TRANSONIC COMPRESSOR
- First phase of thermodynamic development of compressor for 490 hp turboprop engine, test procedures and data evaluation 13 p2171 A66-25077
- Flow diagram for dimensioning of jet compressors to plot irreversible mixing, noting shape of mixing channel, design guidelines, etc 16 p2632 A66-31645
- Pressure distribution of gas-lubricated spiral-groove thrust bearing or compressor [ASME PAPER 66-LUBS-1]
- 17 p2931 A66-33176
- COMPRESSOR BLADE**  
Axial compressors with nonuniform inlet flow, investigating size of gap between blade rows and rotating stall 01 p0008 A66-10953
- Measurement instrumentation of compressor blade vibrations of Rolls-Royce lifting turbojets during testing 02 p0226 A66-11203
- Root rigidity and damping capacity of vibrating turbine and compressor blade mountings 03 p0372 A66-12398
- Internal friction and elastic modulus of compressor and turbine blade materials 03 p0372 A66-12399
- Photoelastic analysis and theoretical considerations to minimize stress concentration of blade joints of compressor and turbine of jet engine 03 p0373 A66-12402
- Supersonic cascade tunnel to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4]
- 05 p0661 A66-15719
- Helicopter rotor blade and engine erosion by sand and seawater 06 p0804 A66-15997
- Multiple stage axial flow compressor with blades staggered differently at different stages 06 p0801 A66-16000
- Microscopic fatigue crack production in compressor blades, describing methods and application to ultrasonic nondestructive testing 06 p0966 A66-16799
- Compressor blade cascade in flow with boundary layer separation, calculating velocity distribution and blade angle 06 p0803 A66-16967
- Clearance loss in rectilinear cascade, emphasizing flow separation and vortices shed at blade tips 07 p0980 A66-17483
- Number of working blades effect on magnitude of total work coefficient and other characteristics of axialradial compressor 09 p1435 A66-20763
- Vibration suppression in axial flow compressors, discussing blade root damping and pin hole stress 09 p1469 A66-20988
- Compressor cascade flow with blades of different thickness ratio for variable Mach and Reynolds numbers, measuring turbulence level influence on loss coefficients, secondary flow parameters, etc 12 p1799 A66-24553
- Recent progress in aerodynamic design of axial flow compressors and components in U.S. [ASME PAPER 66-GT-95]
- 14 p2217 A66-26998
- Vibration suppression in axial flow compressors, discussing blade root damping and pin hole stress 15 p2468 A66-29926
- Supersonic cascade tunnel used to evaluate compressor blade performance [ASME PAPER 65-WA/GTP-4]
- 16 p2673 A66-30340
- Intake flow maldistribution excitation of rotor blade vibration in V-STOL predicted by blade velocity triangles method 18 p3050 A66-33680
- Low speed three-stage axial flow compressor tests at aspect ratios of one, two and four [AIAA PAPER 66-613]
- 19 p3275 A66-35359
- Recent progress in aerodynamic design of axial flow compressors and components in U.S. [ASME PAPER 66-GT-95]
- 19 p3278 A66-36756
- Early detection of impending failure in aircraft turbines 20 p3629 A66-37828
- Wake motion through moving blade row, demonstrating chopping phenomenon via hot-wire anemometer traces taken downstream of rotor 24 p4157 A66-42583
- COMPRESSOR EFFICIENCY**  
Behavior of unassisted annular cowed compressor intakes under cross-flow conditions [AIAA PAPER 65-707]
- 01 p0130 A66-10945
- Performance of blade rows in transonic axial-flow compressor for V-STOL aircraft 03 p0313 A66-12393
- Rotating stall and blade row interference in axial compressor 03 p0313 A66-12395
- Wall curvature effect on performance of high pressure ratio single-stage compressor [ASME PAPER 65-WA/GTP-12]
- 05 p0745 A66-15727
- Number of working blades effect on magnitude of total work coefficient and other characteristics of axialradial compressor 09 p1435 A66-20763
- Parametric analysis of supersonic compressors, determining relative efficiencies of various leading and trailing guide vane configurations 10 p1479 A66-21365
- Behavior of unassisted annular cowed compressor intakes under cross-flow conditions [AIAA PAPER 65-707]
- 10 p1594 A66-21890
- Aerodynamic characteristics of compressor entry ducts under natural and simulated conditions 13 p1992 A66-26491
- Graphical matching solution for gas turbine power plant closed cycle systems [ASME PAPER 66-GT/CLC-14]
- 14 p2224 A66-26984
- Graduate level textbook on axial flow turbine design, examining useful thermodynamic/fluid mechanic concepts, cascade potential flow, turbine efficiency, etc 17 p2991 A66-32991
- Busemann inlet flow field calculation for hypersonic speeds, considering internal-compression inlet geometry and performance 20 p3493 A66-38178
- COMPRESSOR ROTOR**  
**SA TURBINE WHEEL**  
Fatigue life of aircraft gas turbine compressor disks subjected to cyclic loading 11 p1710 A66-22691
- Mathematical analysis of noise generation mechanism in axial-flow compressor rotors [ASME PAPER 66-GTIN-42]
- 14 p2372 A66-26987
- Gas turbine compressor rotor and power shaft fabrication using electron beam welding 22 p3924 A66-40258
- High temperature testing and evaluation of graphite helical-screw expanders and compressors for use with inert gas Brayton cycle 23 p4075 A66-41755
- COMPTON EFFECT**  
Isotropic photon gas interacting with electron plasma with Maxwellian distribution via Compton effect 05 p0722 A66-14721
- Compton scattering of laser photons, noting transformation into gamma radiation photons upon collision with high energy electrons 07 p1044 A66-17816
- Opacity due to Compton scattering at relativistic temperatures in semidegenerate electron gas 08 p1258 A66-18779
- Magnitude of Compton effect of nuclear reactor operation in space 08 p1254 A66-19593
- Monte Carlo method analysis of electron photon cascade 09 p1436 A66-20134
- Compton process argument for quasar relative nearness to our Galaxy and contrast between Compton and synchrotron radiation scattering effects 12 p1950 A66-24389
- Scattering of electron beam by standing waves of photons inside laser cavity corresponds to stimulated Compton effect 13 p2096 A66-26155
- Annealing effects of gamma ray irradiation on MOS FET increase donor surface state density 15 p2567 A66-29413
- Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914
- Compton-effect produced by thermal photons on relativistic electrons in solar atmosphere 19 p3454 A66-35247
- Space nuclear reactor induction of positive potential and remedy by ambient plasma or positive-ion source 19 p3398 A66-35493
- Inverse Compton scattering effect in quasars, examining assumption that they are

at cosmological distances 22 p3980 A66-40399

**COMPUTATION**

**SA INTERPOLATION**

Survey of IR measurement techniques and computational methods in radiant heat transfer [AIAA PAPER 65-657] 01 p0162 A66-10598

Economical difference scheme of continuous computation for numerical solution to Stefan problem having multiple spatial dimensional variables and phases 01 p0166 A66-11009

Matrix inversion by rank annihilation, discussing memory storage requirements, overlapping input time with computing time, number of computations, etc 09 p1395 A66-20625

Iterative method for computing optimum values of parameters for best agreement in least squares sense between given values and corresponding calculated values 10 p1507 A66-21213

Heuristical method solving zeros of complex function, transcendental or algebraic, of complex variable, applicable to computation of eigenvalues of general matrix 10 p1548 A66-21214

Kinematic computer calculations of energy distribution among products of repulsive, mixed and attractive energy release exothermic reactions 11 p1787 A66-23213

Approximation methods for matrix computation, considering characteristic roots 11 p1723 A66-23361

Computational aids /charts and nomographs/ applicable to gross design of satellite communication systems 13 p2020 A66-25150

Lower bounds on computation times of certain input-output transformations and tradeoff relation between computation time and dimensionality of Turing machine tapes 13 p2027 A66-25802

Computational photogrammetry, deriving relation between image and object space, using collinearity conditions and orientation matrix 16 p2703 A66-30513

Book on methods in computational physics including numerical simulation of Earth atmosphere, computation of propeller design and stellar evolution, etc 16 p2735 A66-30942

Numerical problems in application of Urabe results in considering periodic nonlinear differential systems, obtaining Galerkin approximations 16 p2737 A66-31231

Survey of IR measurement techniques and computational methods in radiant heat transfer [AIAA PAPER 65-657] 19 p3477 A66-35595

**COMPUTER**

**SA PARAMETRON**

**SA VOCODER**

Standardization of characters for optical character recognition, class B, using merit curve technique 02 p0193 A66-11598

Multiplex measuring device and choice of analog or digital computers in electronic measurement 02 p0230 A66-11792

Elliott MCS 920 computer controlled trunk exchange for military area communication network 02 p0194 A66-11932

Microminiaturized LCT 822 P computer for general aerospace navigation 02 p0257 A66-12034

Book on systems engineering problems and tools for solution noting energy, materials, modeling, simulation, computers, control, statistics, signals, etc 02 p0307 A66-12280

Moore and Mealy diagrams in analysis and synthesis of finite automations 03 p0337 A66-12376

Noncontact elements of transfluxor-based alpha detecting system 04 p0490 A66-13777

Utilization of computers to reduce cockpit work load, particularly in SST aircraft 07 p1003 A66-17726

Man-machine systems involved in on-line

man/ computer interaction, manned space systems, satellite communication and display systems 14 p2230 A66-27820

Dynamic logic chassis analyzer /DLCA/, diagnostic tool for isolating faults to circuit card or component level in programmer test station /PTS/ and component test station /CTS/ ground support 14 p2260 A66-28266

Possible use of computer as tool for air traffic control 16 p2742 A66-30089

Navigational information conversion from digital readout to pictorial display 16 p2743 A66-30670

AFIPS Joint Computer Conference, Boston, April 1966 16 p2656 A66-31239

On-line computers in steerable aerial control system for satellite tracking 18 p3073 A66-34314

Central Telecommunications Laboratory 882 P arithmetical airborne computer 20 p3523 A66-38013

High availability computer systems - WESCON, Los Angeles, August 22 p3871 A66-40743

Pattern recognition computer operating under automatic control and stored program control for data transfers, system operation, man-machine interface and display operations 23 p4041 A66-41056

Literature survey of content-addressable and associative memory systems, noting hardware, logical operations, speed, cost, etc 24 p4177 A66-43184

**COMPUTER DESIGN**

Circuit with tunnel-diode-based active element for dynamic memory used to store regenerated information 01 p0046 A66-11048

Power dissipation as sum of quiescent power and transient power dissipation, considering n-channel metal-oxide-semiconductor and MOS complementary logic circuits 01 p0047 A66-11138

Basic emitter coupled logic gate provides fastest nonsaturating gate for high speed computer 01 p0048 A66-11142

Packaging method for integrated circuits based on flow soldering components through printed wiring boards to be used in digital computer design 02 p0204 A66-11940

Graphs for problems of computing system design automation, specifically finding algorithm for graph scheme construction 02 p0250 A66-12102

Content addressable memory systems promise increased computational capability for Army data processing 04 p0490 A66-13686

Logical and computing devices, discussing construction of homogeneous functional structure using integral circuits 04 p0494 A66-13704

Modular synthesis of sequential machines, discussing external variable dependent single memory element devices 05 p0637 A66-14927

Reliability and fault-masking in n-variable two-input and multiple input NOR trees discussing system, function and signal-state reliability measures 05 p0648 A66-14928

One-tape off-line Turing machines covering crossing sequences, recognition problems and computation times 05 p0637 A66-14929

Self-repairing digital computer, discussing switching mechanism activated diagnostic procedure and failed circuitry replacement 05 p0637 A66-14930

Book on switching theory covering circuit synthesis and analysis, Boolean algebra, functional theory, relay type network, etc 06 p0861 A66-16197

Fluidic devices, discussing design, equivalence to logic circuits, fluid amplifier application to build flip-flops, etc 06 p0809 A66-16794

Binary counter circuit, discussing relevance to solid state design, performance and operation 06 p0857 A66-16973

Functional requirements for computer navigational system for Concorde aircraft 07 p1065 A66-17672

DECTRA long range navigational aid, DECTRA airborne receiver and Omnitrac computer 07 p1068 A66-17702

CRT control display console models, console selection pointers, computer programming requirements, etc 07 p1003 A66-17879

Combination of geometrical and physical

optics with modern system design such as computers, cameras for aerial use, space tracking, etc 09 p1403 A66-20918

Parallelism incorporated in large computers for increasing computational power, including internally overlapped and uniform and multiple instruction 10 p1506 A66-21212

DC-9 flight simulator using monolithic-integrated-circuit GP-4 11 p1683 A66-22687

Computer 11 p1683 A66-22687

Circuit with tunnel-diode-based active element for dynamic memory used to store regenerated information 11 p1671 A66-23295

American Federation of Information Processing Societies, Joint Computer Conference, Las Vegas, November 1965 12 p1825 A66-23824

Lockheed multiprocessor simulation system /LOMUSS I/, data processing system for computer design and analysis 12 p1827 A66-23832

Salient hardware, software, and operational features of machine for automatic graphics interface to computer /MAGIC/ operating display system 12 p1827 A66-23835

Digital differential analyzer /DDA/ design for high speed solution of differential equations common in aerospace problems 12 p1828 A66-23841

Self-diagnosable DX-1 computer design to achieve maximum operational availability 12 p1828 A66-23843

Specialized procedures for constructing diversified types of optimum control systems for discrete dynamic processes 12 p1852 A66-24327

Parameters for selection of miniaturized integrated circuit computer for onboard checkout systems 12 p1829 A66-24612

Triple modular redundancy /TMR/ computer organization used in digital computer design for Apollo Command Module 13 p2027 A66-25258

Design and fabrication of computer subsystems for Apollo guidance and navigation systems 13 p2027 A66-25781

Multithreshold threshold element design, discussing realization based on Boolean functions, network synthesis employing transformation technique and logical design application 13 p2039 A66-25803

Thin film hybrid packaging method for series of computer logic circuits designed to operate at 100-mc clock rate 14 p2260 A66-28267

Logical and computing devices, discussing construction of homogeneous functional structures using integral circuits 15 p2454 A66-28545

Low-cost computer design using electro-optics for information processing 16 p2657 A66-31240

Papers on RCA computer progress 17 p2877 A66-32510

Monolithic silicon integrated circuit application in design of two third-generation computers 17 p2877 A66-32511

Monolithic silicon integrated circuit used for current-mode logic of RCA Spectra 70/45 and 70/55 computers 17 p2886 A66-32512

Batch fabrication of large-capacity memory stacks, using integration of monolithic-ferrite stack with integrated MOS circuitry 17 p2886 A66-32515

Developmental memory using monolithic-ferrite integrated arrays of magnetic storage elements provides cost and power savings 17 p2886 A66-32516

Quality of digital smoothing filters with finite transient time improved by rational choice of delay 17 p2878 A66-33491

Logic and operation principle of model of recording device for high speed readout of digital and alphabetic information from digital computer 17 p2928 A66-33494

TRW Systems MARCO 4418, small high-speed lightweight reliable digital computer, for use in manned space missions 19 p3306 A66-35503

Miniaturization of logic components for modular and monolithic integrated circuits in computer design 21 p3708 A66-39624

Advanced spaceborne computer concepts - WESCON, Los Angeles, August 1966 22 p3870 A66-40725

On board computer simultaneously processing spaceborne data including life support, energy management, human

performance control, etc 22 p3871 A66-40726  
 Book on synthesis of multiloop control systems for application to automatic control and computer circuit construction 22 p3885 A66-40854  
 Man-machine merger in computer aided design of circuits, examining changes in circuit parameters caused by component tolerances, simulation of component failure, feasibility and circuit optimization 23 p4072 A66-41252  
 Computer operational center for orbiting space laboratory that will navigate, arrange experiments and devise work schedules 24 p4177 A66-42335  
 Diagrams of computers calculating parallax angle of azimuthally mounted astronomical telescopes 24 p4211 A66-42484  
 Lasers applied to logic, memory, input-output and data transmission-linkages parts of computers 24 p4225 A66-42804  
 Apollo guidance computer, discussing memory storage, central processing unit and sequence generator [AGARDOGRAPH 105] 24 p4236 A66-43128  
**COMPUTER METHOD**  
 General purpose computers for solution of problems in creative design 01 p0033 A66-10863  
 Transient process of nonlinear automatic system calculated by numerical digital computer method based on convolution integral 01 p0045 A66-11021  
 Analog, digital and hybrid computerized systems for investigating problems in aeronautics and astronautics 02 p0193 A66-11894  
 Computer logical gates for characteristics of large systems as local guidance control and regulation systems of plants 03 p0348 A66-12603  
 Zero-crossing data and decision-making procedures used by computer in recognition of vowels 03 p0338 A66-13020  
 Computer algorithm determination of nonlinear system dynamics, using least squares method 05 p0636 A66-14605  
 All-optical computer techniques, noting semiconductor laser digital devices for near future 05 p0637 A66-14824  
 Computer calculation of relative populations of atomic energy levels not in thermodynamic equilibrium 05 p0718 A66-14871  
 Fifth-order Runge-Kutta formulas including extensions of Radau, Lobatto, Newton-Cotes and Legendre-Gauss quadratures 05 p0707 A66-14892  
 Three-dimensional incompressible viscous flow calculated for axial-flow turbine stage of given blade profile, verified by computer method developed from cascade theory 05 p0605 A66-14961  
 In-flight monitoring of advanced aircraft, discussing system requirements and constraints [ISA PREPRINT 1.3-2-65] 05 p0684 A66-15512  
 Manned aircraft self-contained checkout and fault isolation systems, discussing characteristics and operational concepts [ISA PREPRINT 1.3-3-65] 05 p0684 A66-15513  
 Matrix methods in dimensional analysis discussing algebraic, matrix and shortcut methods [ASME PAPER 65-WA/MD-20] 05 p0710 A66-15523  
 Supersonic flight control, discussing reliability and safety devices, computer application and multiplex systems 06 p0816 A66-16055  
 Extension, modification and analysis of Gorenstein-Zierler decoding algorithm for binary codes of Bose, Ray-Chaudhuri and Hocquenghem /BCH/ correcting erasures and errors 06 p0837 A66-16114  
 Sounding rocket instability, covering exact and approximate solution and Magnus moment coefficient for hypersonic rolling vehicle /Sandia Nitehawk rocket system/ [AIAA PAPER 66-62] 06 p0958 A66-16252  
 Synthesis of planetary screw-cam mechanism of optimum efficiency, using digital computer 06 p0886 A66-16313  
 Blake procedure effectiveness and applicability in computing beam loss of radars, extrapolating for rapid-scan systems 06 p0832 A66-16452  
 Service life of antifriction bearings

represented by Weibull distribution law, with computer method for parameters and density function 06 p0886 A66-16486  
 Convex programming problems, developing parametric gradient method for approximate solution 06 p0838 A66-16526  
 Decomposition of mixed-set distributions into normal distributions using graphing and analog computer methods 07 p1003 A66-17381  
 Ozone decomposition effect upon heat transfer determined, using differential energy and material balance equations 07 p1152 A66-17595  
 Computational analysis employing digital computers to evaluate hypoxic stress reactions in man 07 p0998 A66-17659  
 Computer method calculation of minimum time track, using quasi-optical law of refraction 07 p1066 A66-17681  
 Advanced airborne computer double system applied to fault detection, location, flight management and navigation 07 p1003 A66-17715  
 Airborne computer-aided navigation system, utilizing letter printer and pictorial display 07 p1070 A66-17718  
 Numerical computer solutions for several nonlinear gas flow problems in high speed aerodynamics 07 p0983 A66-18143  
 Digital computer determination of coefficients of transfer function from impulse response in time domain 07 p1060 A66-18334  
 Numerical control using computer-aided design /CAD/ equipment 08 p1228 A66-18686  
 Digital computers to control automatic test equipment 08 p1187 A66-18741  
 Trajectory possibilities for Venus swingby mission and role in manned exploration of Mars [AIAA PAPER 66-37] 08 p1290 A66-18988  
 Microminiaturization in control equipment and computers 08 p1194 A66-19300  
 Contractor performance on cost type contracts evaluated by comparing actual and allocated costs, using NASA PERT facilities 08 p1322 A66-19460  
 Spinning rocket attitude measured from geomagnetic field and solar cell data, using digital computer technique, noting instrumentation 08 p1225 A66-19492  
 Processing signal information from digital rate gyros and accelerometers in analytic, gimballless inertial platform 08 p1253 A66-19530  
 Computer calculation of transistor amplifier performance from measured y-parameters 09 p1349 A66-19898  
 Stellar evolution and evolutionary sequences, use of high speed computer methods and application to age determination of stars 09 p1448 A66-20098  
 Digital computer recomputation of stability transition curves in Hill-Meissner equation 09 p1395 A66-20623  
 ESRO/ELDO Space Documentation Service, describing system characteristics, NASA agreement, indexing and search strategy 09 p1473 A66-20658  
 Automated ground station, with computer controlled telemetry system, for Saturn launch vehicle checkout 09 p1347 A66-20675  
 Computer calculation of apparent positions of stars and Sun by reduction of mean stellar coordinates 10 p1604 A66-21131  
 Monte Carlo linear extrapolation of multivariable functions, introducing truncation procedure which saves on machine time and serves for variance reduction 10 p1549 A66-21215  
 Hamel and Cypkin methods, used to determine free oscillation of plus-or-minus servomechanism, applied to transfer function of certain type 10 p1517 A66-21283  
 Electronic color correction during aerial photograph printing by employing specially programmed computer 10 p1534 A66-21329  
 Radar cross section of metal bodies covered by thin plasma calculated, using computer technique, noting modification of TE and TM mode reflection coefficients 10 p1503 A66-21645  
 BRL ballistic camera system noting optical and mechanical characteristics, measurement and computer synchronization methods 10 p1537 A66-21872  
 Computer controlled visual display 11 p1680 A66-22269

Numerical solution of heat conduction and gas dynamics equations by sifting over separate regions 11 p1785 A66-22339  
 Validity of two approximations for removing corners and slope discontinuities from cylindrical metallic bodies in digital approach to Maxwell equations 11 p1653 A66-22563  
 Microdensitometer for evaluating photographically recorded images for direct use as computer input 11 p1705 A66-22672  
 Numerical solution to first geodetic problem of ellipsoid of rotation, using iterative application of Runge-Kutta method to differential equations of geodetic line 11 p1698 A66-22767  
 Algorithm for computer eigenfunction solution of boundary value problem involving partial differential equations for stress functions of semimomentless cylindrical shells 11 p1782 A66-22856  
 General purpose computers and cathode ray tube displays used in automation of air traffic control technical aids 11 p1732 A66-22900  
 Computer capability and probable growth in aerospace vehicle applications considered against mission requirement constraints 11 p1659 A66-22959  
 Real time on-line man-computer graphics system that may obviate need for special-purpose, complex and cumbersome computations 11 p1660 A66-23176  
 Diagnostic-cycle routine, collection of computer-programmed techniques for interpretation of meteorological satellite videograph observations 11 p1731 A66-23486  
 Numerical solutions of problems in gas dynamics in U.S.S.R., using computers stressing methods for solving systems of nonlinear partial differential equations 12 p1861 A66-23807  
 Hybrid computer methodology and electronic data processing applied to quality evaluation of test operations 12 p1828 A66-23837  
 Schumann-ELF natural background samples recorded in three components at separated points resolved by analog and digital methods into constituent modes for comparison 12 p1815 A66-24115  
 Advances in biomedical computer applications - Conference, N.Y. Academy of Sciences, June 1965 12 p1809 A66-24227  
 Mathematical model, using computer, to determine fluid and electrolyte distribution in principal body compartments of young 70-kg human male 12 p1809 A66-24229  
 Responses of neuronal elements in visual cortex of unanesthetized cats shown to depend on time interval length 12 p1806 A66-24232  
 Terminal reentry and dynamics evaluation computer program for small particles, using point-mass calculation during initial phase and determining drag coefficient [AIAA PAPER 66-380] 12 p1951 A66-24505  
 Influence coefficients for computation of atmospheric components of reentry vehicle circular error probable /CEP/, using Bliss adjoint method, noting effects of certain inadequacies on system performance [AIAA PAPER 66-358] 12 p1908 A66-24517  
 Comparison of frequency shift keyed and phase shift keyed pulse compression systems via digital computer simulation 12 p1819 A66-24602  
 Versatile avionics shop test /VAST/ system, computerized test system for carrier-based avionics 12 p1838 A66-24606  
 Digital computer analytical method for simulation of worst shock conditions for subassembly shock testing 12 p1829 A66-24726  
 Parametric analysis, penalty-effectiveness tradeoff and system selection for communications satellites, using block digital computer synthesis with subroutines for operational requirements [AIAA PAPER 66-330] 12 p1824 A66-24797  
 Computer method for determination of distribution of low lying ionization, using ordinary and extraordinary wave traces in ionograms 12 p1873 A66-24838  
 General theory of optimal processes, discussing general version of maximum principle 13 p2116 A66-25342  
 Consistency of Gunn effect with excitation

of conduction band electrons from high mobility minimum to low mobility valleys 13 p2164 A66-25517

Research development effectiveness evaluation, with computer determining resource allocation 13 p2058 A66-26033

Control system design, analyzing sensitivity of system performance to parameter variations by obtaining time domain measure of sensitivity 13 p2050 A66-26062

Numerical integration methods requiring least computation time for truncation error when applied to ordinary differential equations, comparing Butcher with Runge-Kutta, Adams, etc 13 p2121 A66-26324

DATAN, curve fitting process to approximate data and elimination of problems for programming engineer by data analysis 13 p2028 A66-26325

Locating zeros of complex functions by computing topological index 13 p2121 A66-26326

Comparative calculation used in computation of physicochemical properties of hydrides, including densities of beryllium hydride, entropy of cesium hydride, crystal lattice energy of rubidium deuteride, etc 13 p2018 A66-26327

Computational method for cylinders under external pressure, switching from testing in plastic field to elastic field without gaps 13 p2199 A66-26328

Clear air turbulence research methods, noting structural analysis, computer application, satellite photography, etc 15 p2532 A66-28921

Stabilization of unstable two-point boundary value problems, noting field method for avoiding computer storage problems during integration of related differential equations 15 p2528 A66-29292

Spectrometric analysis of aerial photograph, using computers 15 p2504 A66-30010

Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388

Selection, flow and transference of technology in large electronics aerospace firm, noting methodology, planning, market area selection, etc 16 p2830 A66-30400

Computer system for control of deceleration of electrodynamic shaker during vibration test 16 p2678 A66-30465

Propagation velocity and attenuation variation effect in coaxial cables on frequency modulated carrier evaluated, using IBM 1620 computer 16 p2649 A66-30542

Apollo/Saturn S-II telemetry data processing systems 16 p2652 A66-30567

Simulation of controlled diffusion-type Markov processes applied to two stochastic equations related to problem of misadjustment on analog computer 16 p2656 A66-30763

Improved Monte Carlo method for calculating steady state monatomic rarefied-gas flows, using computer for calculating possibility of collision in given geometrical cell 16 p2753 A66-30787

Convex programming problems, developing parametric gradient method for approximate solution 16 p2656 A66-30836

Two-dimensional dynamic analysis of probe and drogue docking concept noting design, operation and performance 16 p2809 A66-30896

Hybrid analog/digital techniques for signal processing, noting performance advantages at relatively low cost and applications to linear transformation, function generation, correlation functions, etc 16 p2658 A66-31250

Automatic vortex recognition system for Tiros satellite photograph analysis, noting phases of development and results obtained 16 p2658 A66-31251

Air traffic control system using primary and secondary radar, radar digitizer and computer complex 16 p2744 A66-31278

Planetary motion representation using trigonometric series and computer evaluation techniques 17 p2998 A66-32043

Digital computer method for formulating state space equations for active RLC networks 17 p2900 A66-32055

Electronic computer technique for dividing phase space of transistorized circuit into linearity regions 17 p2885 A66-32253

Heat transfer problems solved, using Pohlhausen solution for phase-space trajectory, noting effect of boundary conditions and application of analog computer 17 p3034 A66-32497

Digital computer to decode digitized or sampled PCM waveform 17 p2875 A66-32502

Digital computer analysis of mission parameters governing spacecraft thermal behavior 17 p3034 A66-32513

Noise rejecting algorithms for ODE solutions with computer, using redundancy, placement of control and feedback techniques 17 p2877 A66-32569

Axially symmetric or two-dimensional electrode system with emitting surface, discussing convergence and accuracy criteria of iteration methods 17 p2887 A66-32700

Integrated Helicopter Avionics System flight control, noting stability augmentation, long-term motion control, outer and inner loop function separation and fail-safe capability 17 p2951 A66-32730

Propellant tanking computer system for monitoring and controlling Saturn IB and Saturn V vehicles [SAE PAPER 660454] 17 p2904 A66-33162

Onboard checkout requirements and application for advanced space missions [SAE PAPER 660461] 17 p2904 A66-33166

Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 17 p2938 A66-33515

Lunar occultation and identification of MSH 19-27 radio source, noting computer analysis of brightness distribution 18 p3225 A66-33549

Computational method for determination corridors of launch vehicle trajectory and impact dispersions [AIAA PAPER 66-483] 18 p3226 A66-33656

Complex component design using man-computer system with graphic input/output devices, discussing application for digital computer circuit card design [SAE PAPER 660459] 18 p3116 A66-33897

Computer model study of diversity augmented vehicular radio relay communication system in man-made noise environment 18 p3069 A66-34167

Stress and deflection determination in trusses with pin or rigid joints, using digital computer 18 p3255 A66-34275

Stresses and deflections in inhomogeneous sandwich shells calculated via computer programs 18 p3255 A66-34286

Computer code study of magnetospheric trapped-particle drift under influence of magnetic field gradient, magnetic line curvature, electric rotational field and electric field across tail of magnetosphere 18 p3168 A66-34350

Catalytic combustion of cyclohexane, cyclohexene and benzene, determining significance of combustion via computer program 18 p3266 A66-35022

New solution method for nuclear cascade equation for nucleons and charged pions 18 p3206 A66-35105

Computer iteration scheme for calculating arbitrary hyperbolic transfer orbit in field of attracting center, based on Gauss equations 19 p3455 A66-35278

Analog computer solution of high-order optimal control problem, noting application of Pontryagin maximum principle and extension to two-point boundary value problems 19 p3306 A66-35536

LEM Data Reduction System that performs concurrent data processing and telemetry conversion on computer time-shared arrangement 19 p3299 A66-35662

Automatic telemetry checkout station for Saturn V systems using real time signal digitizer and general purpose computer 19 p3339 A66-35677

Lens design by computer methods known as Flair and Triplet 19 p3399 A66-35824

Adaptive subfield method for solution of variational problems by dynamic programming, applicable to pinpoint problem 19 p3310 A66-36651

Amino-acid-sequence determination in peptides using N-fatty acids, mass spectra of peptide derivatives and computer techniques 20 p3510 A66-37057

Computer analysis of interference in complex network resulting from common impedance coupling of signals 20 p3538 A66-37196

IBM 7094 programmed in FORTRAN IV used to determine sidebands in FM with complex periodic modulation functions 20 p3522 A66-37212

Automatic built-in test of advanced avionics systems, noting advantages of airborne computer in sequencing, conducting and evaluating in-flight performance 20 p3522 A66-37245

Digital testing techniques for analog systems, describing bomb computer set for Phantom F-4D aircraft 20 p3522 A66-37246

Computation method used in pulsation of Lyrae models extended to models of Cepheid variables, noting instability of appropriate period, mass size, luminosity and velocity curves 20 p3650 A66-37339

Cathode current density distribution, beam minimum radius and location and electrode current interception, using computer techniques on electron guns 20 p3528 A66-37490

Acceptance checkout system for checkout assistance to Apollo CSM and LEM facilities during countdown, discussing system configuration variability, composition and operation 20 p3543 A66-37579

Vertical velocities in atmospheric front motions, noting pressure and temperature field distributions and application of computer to solve obtained equations 20 p3593 A66-37750

FORTRAN program for calculation of approximate total half-intensity line widths of several spectral lines for atoms in common analytical flames 20 p3605 A66-37758

Computerized cost-effectiveness model for large payload test vehicle system of 50-150 launch program 20 p3684 A66-37901

Parallel evaluation of Boolean function in search memory via multiwrite 20 p3523 A66-38017

Internal ballistic considerations in hybrid rocket design, noting throttling and regimes of operation involving effects of surface-or gas-phase reaction kinetics [AIAA PAPER 66-628] 20 p3663 A66-38035

Computer algorithm for recognition and extraction of planar graph from incidence matrix 20 p3523 A66-38279

Bomb debris motion following Star Fish test, noting formation of MHD shock wave, production of stationary plasma through X-ray ionization and collision in neutral air 20 p3644 A66-38345

Nonstationary forces and bending and torsional moments along wing computed, using punch card system 20 p3674 A66-38442

Free vibration analysis techniques for computers and derivation from past methods 21 p3823 A66-38561

Computer program for numerical solution of ODE systems, noting generation of symbolic solutions via Taylor series expansion 21 p3707 A66-38679

Solution of systems of polynomial equations by elimination procedure, using coding in LISP and FORMAC 21 p3707 A66-38680

Symbolic factoring of multivariate polynomial with integer coefficients, noting application of Kronecker method and techniques of implementation 21 p3708 A66-38681

Optimization of efficiency of gas turbine cycles with heat recovery by finite difference method using digital computer 21 p3807 A66-38805

Computational limitations of onboard orbiting computers such as fixed point arithmetic, limited word length and solution techniques 21 p3766 A66-38884

Computer analysis of cylindrical shell stability under uniform external pressure and critical pressure determination for various boundary conditions 21 p3829 A66-38979

Eulerian finite difference method for solving time-dependent equations of motion for compressible fluid flow, noting shock

- p wave diffraction, supersonic blunt body interaction with shock wave, etc 21 p3730 A66-39472
- 
- Electronic computer for topological and geometrical considerations in space structures analysis 21 p3708 A66-39534
- 
- Computer and model analysis as design tools in structural engineering 21 p3708 A66-39535
- 
- Communication network response to arbitrary transients calculated by digital computer, permitting replacement of analytic-function wave forms by lists of equal-interval sample values 22 p3883 A66-39724
- 
- Computation of impulsive and short-term perturbing forces effect on body in elliptical orbit, using Tschauner-Hempel equations 22 p3979 A66-40327
- 
- Transient heat conduction problems solved by high capacity computers 22 p3999 A66-40379
- 
- Automated minimum weight structural design for various load conditions, integrating matrix displacement analysis and operations research 22 p3995 A66-40490
- 
- Minimization of logical functions in normal disjunctive form, using Gavriloova method and ALGOL 60 algorithm 22 p3941 A66-40541
- 
- Automatic testing equipment, examining role of computer in reliability, quality of testing and time and cost savings 22 p3892 A66-40543
- 
- Associative memory organizational approaches for onboard data processing of spacecraft 22 p3871 A66-40727
- 
- Computer ray tracing study of image-forming in eyes as affected by pupil size, refractive indices and curvatures of cornea and lens 23 p4025 A66-41149
- 
- Supersonic aerodynamic problem of wing-body interaction and solution within lifting-surface theory, using analog method [ICAS PAPER 66-22] 23 p4008 A66-41254
- 
- LF pulse propagation, describing measurement technique and Fourier transform of signal 23 p4039 A66-41588
- 
- General method for determining real solutions of set of nonlinear simultaneous equations, using digital computer 23 p4086 A66-41923
- 
- Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 24 p4219 A66-42128
- 
- Rivet attached stringer effect on stress concentration in thin elastic sheet with crack solved, using computer calculations 24 p4285 A66-42143
- 
- Pressure, temperature, gas velocity, thrust and specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method 24 p4261 A66-42743
- 
- Monte Carlo analysis of plasma of heavy ions, obtaining thermodynamic properties, potential energy and pair distribution 24 p4245 A66-43036
- 
- Book on space navigation guidance and control covering manned lunar landing guidance, pulse torquing and inertial measurement units, computer utilization, control systems, etc [AGARDOGRAPH 105] 24 p4235 A66-43122

- Intensity and center-to-limb variation of continuous solar spectrum for several models of chromosphere 20 p3650 A66-37340
- 
- Stiffness method for analysis of elastic-plastic shells of revolution with axisymmetric loading implemented by step-by-step method of integration in computer program 20 p3667 A66-37482
- 
- Critical Human Performance and

- Evaluation /CHPAE/ Program 20 p3509 A66-37893
- Digital computer program for solution of space-charge-flow problem applied to design of thrusters with variable thrust vector, analyzing two ion-thruster configurations with aid of computer 20 p3629 A66-38179
- Applicability of inverse blunt-body computer program /Norair/ to supersonic and transonic flow problems 21 p3694 A66-38731
- Computer code packages for radiation shielding calculations 21 p3769 A66-39392
- Digital computer program for static worst case design of diode transistor logic 22 p3870 A66-40396
- Logical processing units and interconnection networks design noting reliability, fault diagnosis, computer coordination of data and control processes, etc 22 p3871 A66-40728
- Digital computer program for analysis and weight optimization of thermoelectric generators for space applications 24 p4161 A66-42119
- Computer technique for constitutive equations of viscoelastic modulus, using Laplace transform and Volterra integral equation, applied to data on solid propellants 24 p4289 A66-42279
- Computer program for parametric analysis and trajectory simulation for axisymmetric planetary entry vehicles 24 p4283 A66-42792
- Computer program for calculating average lengths of weather radar echoes and pattern bandedness from exponential function approximations to pattern autocorrelation coefficients 24 p4234 A66-42988
- Onboard calculation for navigation and guidance of Apollo mission vehicle [AGARDOGRAPH 105] 24 p4236 A66-43125
- ### COMPUTER PROGRAMMING
- #### SA LINEAR PROGRAMMING
- #### SA REDUNDANCY ENCODING
- Power series expansions as solutions to differential equations, using electronic computers 01 p0091 A66-10163
- Solution to linear programming problems, using iterative method 01 p0050 A66-10170
- Computer programming of diagonal tension analysis of flat panels in shear 01 p0152 A66-10345
- Three parameter antenna pattern synthesis using nonlinear computer programming technique derived from method of steepest descent 01 p0044 A66-10934
- Computation of values for resistances shunting sections of tapped potentiometers from data using two alternative digital computer programs 02 p0200 A66-11884
- Mechanization of synchronous sequential machines with minimal shift registers, using algorithm 03 p0337 A66-12572
- Machine dependence of degree-of-difficulty relation for recursive functions, considering Turing machine as programmed computer 04 p0489 A66-13366
- Programming techniques for optimizing computer use especially in space tracking network 04 p0489 A66-13609
- Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations 05 p0662 A66-14989
- Data collection system with small on-line computer that monitors stress, temperature, pressure and other physical parameters of environmental laboratory vacuum and temperature chambers [ISA PREPRINT 1.12-1-65] 05 p0638 A66-15502
- Digital computer programming for design of cylindrical vessels 08 p1306 A66-18604
- Power supply system of OAO consisting of solar cells, energy storage device, power controller, etc, and simulation program via digital computer 08 p1168 A66-19493
- Gradient systems of differential equations for solution of linear and quadratic programming problems on analog computer 08 p1188 A66-19687
- Computer code for stress and displacement of shells of revolution under axisymmetric loading 09 p1469 A66-20967
- Generation, selection and implementation of burst-error-detecting and -correcting Fire code, using computed tables 10 p1496 A66-21513
- Analog computer techniques applied to find roots of complex functions, to generate complex functions by Cauchy integral theorem and to scan  $z$  plane 10 p1507 A66-21693
- Advanced Data Management computer programming to provide generalized routines for functions common to large class of command and management problems 10 p1623 A66-22050
- Device for automatically feeding experimental curve coordinates in large quantities into digital computer for high noise level photographic image 11 p1659 A66-22432
- Computer input language for minor engineering calculation 11 p1659 A66-22712
- SCADS, programming system for simulation of combined analog-digital systems 11 p1659 A66-23109
- Programming procedures for analog computer solution of problems consisting of more than 250 linear and nonlinear computing elements 11 p1660 A66-23224
- Guidance by parabolic extrapolation of short-range missile toward pre-established target controlling it aerodynamically, noting finder, computer and navigational errors 11 p1734 A66-23500
- American Federation of Information Processing Societies, Joint Computer Conference, Las Vegas, November 1965 12 p1825 A66-23824
- User-oriented computer programming system using Flexowriter modified to construct new two-dimensional programming language 12 p1826 A66-23828
- Flow of data and control information from apparatus to computer and use of microprogrammed controller 12 p1827 A66-23829
- Management problems of large aerospace computer installation, considering actual costs of change and aspects of turn-around problem 12 p1827 A66-23831
- Management of large physical systems, detailing characteristics of mission planning for Mars exploration including process optimization, computer programming, systems engineering, etc 13 p2179 A66-25238
- Decomposition technique by which convex control programming problem, having coupled subsystem constraints, can be decomposed into smaller subproblems 13 p2117 A66-25349
- Programming under uncertainty and stochastic optimal control for two-stage system treated by derivation of equivalent convex program 13 p2047 A66-25351
- COBLOC programming system for all-digital simulation of operation of large mode-controlled hybrid computers, noting inclusion of patchable logic simulation 13 p2028 A66-25805
- Method for automatically adjusting networks for best approximation to desired responses, using iterative gradient techniques, constraint equations and Carroll programming technique 13 p2051 A66-26070
- Computer programming method for analysis of complex systems 13 p2028 A66-26474
- Programmable patching system at Cape Kennedy for communications network composed of two individual switching subsystems, using solid state devices and glass-reed relays 14 p2233 A66-26805
- Computer design of programmable demultiplexer for multiformat PCM telemetry data 14 p2246 A66-28432
- Arbitrary quasi-orthogonals for calculating flow distribution in turbomachine, noting digital computer calculations [ASME PAPER 65-WA/GTP-2] 16 p2684 A66-30344
- Iterative solution to Krook-Boltzmann kinetic equation noting Navier-Stokes numerical solution, computation and analysis of distribution function within shock wave 16 p2685 A66-30945
- Monte Carlo solutions to two molecular flow problems, heat transfer between parallel walls and shock wave profile-computer programmed in Boltzmann equation analysis 16 p2686 A66-30946
- Molecular-kinetics experiments /trajectory calculation of particle interaction/ using digital computer iterative method for theoretical comparison 16 p2656 A66-30947
- Stability of idealized laminar boundary flow, determining phase velocity, amplification rate and wave number of all disturbances 16 p2686 A66-30948
- AFIPS Joint Computer Conference, Boston, April 1966 16 p2656 A66-31239

- #### SA DIGITAL SIMULATION
- One-dimensional collisionless plasma in computer simulation with randomized electrons compared with static theory for equivalent diode 01 p0112 A66-10591
- Analytical landing simulation to analyze dynamic loads and aircraft response, particularly high sink speed landing gear [SAE PAPER 650845] 01 p0011 A66-10835
- Computer flight simulators at Langley discussing Boeing 707 jet, helicopter, air traffic control, orbital rendezvous and docking, lunar navigation and landing 01 p0055 A66-10957
- Computer simulation of pattern recognition system employing same variables as human visual system and using cell assemblies and contour projection 01 p0034 A66-10963
- Task loading effect on pilot performance in computer simulated low altitude high speed flight 02 p0187 A66-11829
- Hybrid computer simulation system for aeronautical and astronautical test work 02 p0215 A66-11893
- Automatic pattern recognition and

application to space navigation 04 p0543 A66-13511

Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 05 p0723 A66-15168

Jet engine models applicable to analog and Dynasor simulation for transient performance analysis [ASME PAPER 65-WA/MD-16] 05 p0745 A66-15521

Total tactical radar system, describing integrated system, operational functions and computer simulation 06 p0823 A66-15955

Saturn V diphasic data modem, describing computer system for prelaunch checkout 06 p0868 A66-15989

Heuristic approach to reinforcement learning control systems, describing operation and simulation on IBM 1710-GEDA hybrid computer 06 p0864 A66-16734

Simulation of airport with SST aircraft in air traffic control system 07 p1070 A66-17725

Model of North Atlantic air space organized as sets of paths at various heights 07 p1072 A66-17763

Computer simulation of randomization of electrons in collisionless plasma 08 p1260 A66-18538

Onboard lunar orbital navigation system simulation, using minimum variance estimation 08 p1249 A66-18818

Support Evaluation Technique for computer simulation, evaluation and control of complex logistic problems 08 p1203 A66-19527

One-tape off-line Turing machine, analyzing characteristics and computation time minimization 10 p1506 A66-21075

Electro-optic system superiority over radio and inertial techniques for space navigation determined by simulation 10 p1554 A66-21893

Book on analog, digital and hybrid analog-digital computers for random process studies 11 p1659 A66-22864

Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 12 p1812 A66-23732

New block diagram compiler for sampled data system simulation 12 p1826 A66-23827

Hybrid computer simulation of lunar excursion module and maneuvers with orbiting command service 12 p1828 A66-23839

Analog computer, programmed on digital computer, used in examination of lumped and distributed parameter models of cardiovascular system 12 p1809 A66-24230

Lower ionosphere guidance of HF and VHF waves for global communications, outlining computer simulation of phenomenon of whispering galleries 13 p2023 A66-25780

Flight simulation of SST transport using hybrid computer 13 p2028 A66-26330

Circulation distribution over rectangular wings, based on Chushkin algorithm and lifting surface equation calculated by digital computer 13 p2068 A66-26540

Mathematical models for logistics planning providing complete analysis of requirements through computer simulation 14 p2245 A66-27122

Nonlinear gyroscopic system equations solved by analog computer and verified through method of harmonic linearization 14 p2294 A66-27362

Neutralizer configurations, immersed and withdrawn filaments, for given ion gun based on two-dimensional computer simulation of ion-beam neutralization [AIAA PAPER 65-380] 14 p2342 A66-27411

Tracking interruption probability in second order astatic system, obtaining solution from Fokker-Planck equation and computer simulation 14 p2265 A66-27524

Approximation of variable time delays and design of constant and variable delay circuits, noting simulation of delays in automatic control systems by computers 14 p2266 A66-27528

Missile propellant explosion simulation by digital computer with estimate of physical parameters 14 p2395 A66-28445

L/D ratio for gliding recovery of first

stage of launch vehicle, using stage separation conditions as parameters 16 p2807 A66-30348

Discrete transfer functions simulated on analog computer by direct currents 16 p2656 A66-30584

Quasi-redundant system reliability, solving differential equations for repair environment via computer 16 p2714 A66-30665

Nonstationary problem of linear filtering in presence of additive noise solved by computer simulation 16 p2669 A66-30762

High speed computer technique for simulating test design parameters for evaluation of ballistic-weapon system accuracy [AIAA PAPER 65-222] 16 p2809 A66-30888

Large launch vehicle cryogenic propellant logistics including storage and production capacity optimization, cost and heat loss analyses by computer simulation [AIAA PAPER 65-259] 16 p2789 A66-30900

Numerical model of Earth atmosphere used to compute hydro-and thermodynamic evolution of global moist atmosphere, considering solar heating, evaporation, etc 16 p2697 A66-30943

Helicopter simulation system for avionic evaluation 16 p2682 A66-31248

Simulation of fourth order type I linear system, using one-operational amplifier and two-terminal network consisting of four resistors and four capacitors 16 p2672 A66-31385

Three-stage time division switching network with pulse shifting and direct junctors using computer simulation for blocking probability estimation 17 p2878 A66-31812

Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601

Loss of power effects on helicopter at high speeds, noting combination of blade analysis with motion equations, application of computer simulation, etc 17 p2845 A66-32735

Propellant tanking computer system for monitoring and controlling Saturn IB and Saturn V vehicles [SAE PAPER 66-0454] 17 p2904 A66-33162

Human factor aspects of digital computer programming for simulator control, discussing application and operation 17 p2869 A66-33449

T-27 space flight simulator design, system performance and use for training and research at USAF Aerospace Research Pilot School [AIAA PAPER 65-265] 18 p3093 A66-33789

Sensitivity of linear and nonlinear systems to parameter variations studied by analog computer simulation 18 p3089 A66-33910

High speed hybrid computer simulation of aerospace vehicle motion 18 p3094 A66-34068

Computer-simulated mathematical model of thermal environmental effects on expulsion system design parameters for liquid-propellant gas-generator rocket engine [AIAA PAPER 66-686] 18 p3183 A66-34228

Three-fluid hydromagnetic computer code for studying dynamic phase of small theta-pinch, noting effects of impurity ionization and radiation losses 18 p3148 A66-34911

Computer simulation and performance prediction of MMU astronaut maneuvering system, discussing acceleration, velocity, displacement, fuel consumption, propulsion efficiency 19 p3291 A66-35964

Maintenance problems in long space missions by simulation type computer program 19 p3469 A66-35976

Parameter evaluation of delta modulation encoding techniques for image communication applications by computer simulation 20 p3513 A66-37201

VTOL operational availability computer simulation model, studying initial and tradeoff design, maintenance, logistics, manpower and flight operational requirements 20 p3543 A66-37909

Monte Carlo technique of importance sampling applied to estimating probability of occurrence of rare event in complex system by fault tree simulation 20 p3543 A66-37912

High-speed rotor operation in bearing clearances, discussing induction of nonlinear

vibration, harmonic generation and computer simulation results [ASME PAPER 66-MD-1] 21 p3741 A66-38474

Gravity gradient satellite stabilization and performance analyzed, using computer simulation of motion equations, including eddy current dampers, solar effect, orbital eccentricity, etc 21 p3819 A66-38857

Computer simulation techniques, including stochastic phenomena and computer-computer applications performance evaluation 21 p3708 A66-39432

Laplace transformation simulation by analog computer for real and complex values 22 p3870 A66-39996

Digital computer simulation of stochastic multibeam communications channel with long-distance tropospheric propagation of ultrashort waves 22 p3865 A66-40075

Computer simulation experiments design for industrial systems, considering variance techniques, multiple ranking procedures, sequential sampling and spectral analysis 22 p3870 A66-40132

Conceptual analytical method for simulating lunar surface environment, using computer program for parametric curves 22 p3888 A66-40210

Saturn computer design and fault simulation on IBM 7090 22 p3871 A66-40744

**CONCENTRATION**

S ATOM CONCENTRATION

S CARBON DIOXIDE CONCENTRATION

S STRESS CONCENTRATION

**CONCENTRATOR**

SA COLLECTOR

Determination of refractive index of polyethylene terephthalate film necessary in calculations of surface shape of film concentrators 20 p3603 A66-37738

Charged particle radiation shielding in space of solar cell panels by use of concentrator geometry 22 p3852 A66-40512

**CONCENTRIC CYLINDER**

Cavitation induced between rotating and stationary cylinder in vaporizing liquid within gap of simulated electric motor configuration 07 p1039 A66-18176

Electromagnetic scattering from infinite cylinder at oblique orientation 15 p2537 A66-28976

Heat transfer in liquids situated in gap between coaxial cylinders in presence of natural convection, determining effective thermal conductivity coefficient for water and ethanol 16 p2825 A66-30325

Hydrodynamical modification of Heller treatment of mixing and unmixing of viscous fluid between two rotating cylinders 16 p2685 A66-30940

Incompressible viscous conducting flow between two concentric cylinders in radial magnetic field 16 p2765 A66-31376

Viscous incompressible fluid motion between two parallel planes and between two co-axial circular cylinders with one boundary moved by impulse 17 p2916 A66-33418

Thermoconductivity through rarefied gases at rest contained between concentric cylinders, varying pressure 19 p3478 A66-36061

Radiant heat transfer between concentric cylinders determined by extending validity of Rosseland diffusion approximation by introducing temperature jump boundary condition at gas solid surface 21 p3837 A66-39462

**CONCORDE AIRCRAFT**

PERT programming applied to design and manufacture of joint Anglo-French Concorde aircraft 02 p0305 A66-11599

Human factors in Concorde SST program 03 p0329 A66-13357

Air conditioning system of SST Concorde noting reliability 04 p0460 A66-14461

Olympus 593 jet engine for Concorde SST, development, performance and reliability 05 p0744 A66-14768

Functional requirements for computer navigational system for Concorde aircraft 07 p1065 A66-17672

Design status of Concorde navigation system, discussing basic system, interconnection with autopilot and flight director system and optional equipment 07 p1078 A66-17805

Economic aspects of Concorde program, research potential, computational methods and technological progress 08 p1322 A66-19080

Concorde SST aircraft prototype design and development 09 p1329 A66-20132

Single stage bootstrap air conditioning with two-position turbine nozzle for improved high altitude descent conditions for Concorde SST 09 p1331 A66-20133

Concorde navigation system noting inertial platform, digital computer using integrated circuits and microminiaturization 09 p1401 A66-20685

Structural design of Concorde supersonic airframe, noting airframe strength parameters 10 p1483 A66-21717

Air conditioning system of SST Concorde noting reliability 11 p1640 A66-22250

Concorde fuel system in cooling application and adjustment of center of gravity through fuel distribution 11 p1637 A66-23168

Olympus 593 B engine design and characteristics for Concorde application 13 p2172 A66-25564

Concorde aircraft progress report 14 p2223 A66-28106

Concorde aircraft front and rear auxiliary landing gear noting geometry, steering and anti-shimmy control, etc 16 p2633 A66-30317

Main landing gear design for Concorde SST 17 p2846 A66-32950

Biological hazard of radiation doses to which passengers of high-flying Concorde aircraft may be subjected, considering use of in-flight warning meter 19 p3452 A66-35796

Structural design criteria for Concorde aircraft, including necessity for heat-resistant airframe material 20 p3666 A66-37400

Concorde supersonic transport aircraft propulsion, fuel supply and storage systems 22 p3848 A66-40415

Duplicate monitored system for automatic landing control of VC10 and Concorde 23 p4088 A66-41163

Design characteristics and marketing prospects of Concorde SST 23 p4015 A66-41301

Supersonic transport production problems, discussing Concorde, Lockheed and Boeing projects, machining, shaping and assembling 23 p4073 A66-41649

Propulsion control systems for Concorde aircraft, noting aero-and thermodynamic reasons for power plant variables subject to manipulation 23 p4122 A66-41776

British-French cooperation in aeronautics, discussing Concorde SST, variable geometry aircraft, Olympus 593 turbojet, etc 23 p4016 A66-42069

**CONDENSATION**

**SA CORONAL CONDENSATION**

**SA FILM CONDENSATION**

**SA NUCLEATION**

Condensation in underexpanded jet issuing from sonic orifice into quiescent atmosphere 01 p0007 A66-10617

Air condensation in hypersonic wind tunnel strongly related to flow expansion rate 01 p0059 A66-10808

Sticking coefficients for interaction of molecular oxygen with clean semiconductor surfaces assuming immobile adsorption process 03 p0408 A66-12406

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 04 p0542 A66-14306

Potassium condensing tests of horizontal multitube convective and radiative condensers operating at vapor temperatures from 1250 to 1500 degrees F 05 p0786 A66-14932

Liquid metal condensation, noting two-phase turbulent condensation mechanism and determining heat transfer coefficients 07 p1152 A66-17592

Propellant properties and particle formation efficiency determined for homogeneous condensation-type colloid thruster [AIAA PAPER 66-253] 11 p1760 A66-22221

Measurements of decay curves of stored Aitken nuclei with photoelectric nucleus counter show small nonrandom divergencies

from theoretical curves 11 p1707 A66-23098

Load capacity of condensing vapor-lubricated long self-acting journal bearing, examining two-phase and single-phase regions [ASME PAPER 65-LUBS-5] 12 p1888 A66-24554

Condensation in underexpanded jet issuing from sonic orifice into quiescent atmosphere 13 p1990 A66-25178

Detonation limits for binary mixtures of tetramethylsilane with oxygen, analyzing factors controlling transition from detonation to deflagration, noting condensation effects 13 p2209 A66-26303

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 14 p2327 A66-28219

Oblique condensation discontinuities calculated during flow of supercooled water vapor in supersonic jets 16 p2690 A66-31608

Preparation temperature and condensation rate effect on current carrier mobility in lead selenide and telluride films 16 p2787 A66-31769

Detonations in explosive gaseous mixtures and detonations in condensed phase, discussing three-dimensional vibratory phenomena, wall effects and transition between deflagration and detonation 17 p3036 A66-32846

Carbon dioxide supersaturation and condensation in supersonic nozzles in terms of stagnation pressures, temperatures, and expansion rates 17 p3039 A66-33476

Condensation tests in smooth and porous coated tubes in multi-g centripetal acceleration fields for increasing heat transfer coefficient of condensing nitrogen 18 p3262 A66-34379

Molecular-kinetic resistance effect on heat exchange in Nusselt-type vapor condensation on vertical plate and in vapor-bubble growth in superheated liquid 19 p3479 A66-36310

Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697

**CONDENSATION PUMP**

**SA VACUUM PUMP**

Hydrogen ion intrusion into stainless steel surface measured with apparatus in which hydrogen and helium condensation pumps provide ultrahigh vacuum 13 p2108 A66-25754

Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients, shock wave behavior, etc 16 p2825 A66-30383

Hydrogen pumping by means of phenomenon of hydrogen absorption by solid layer of carbon dioxide condensed at temperature of 20.4-14 degrees K 19 p3400 A66-36099

**CONDENSER**

**S CAPACITOR**

**S GERDIEN CONDENSER**

**CONDITIONED RESPONSE**

**SA LEARNING**

**SA REFLEX**

Food reinforcement of pigeons, comparing two types of extinction following fixed ratio training, noting response rate variation 09 p1336 A66-20876

Conditioned reflex role in information of subthreshold stimuli of respiratory system in dogs subjected to electric shock and carbon dioxide increase 14 p2228 A66-27185

Repeated vertical vibration and noise effects on conditioned reflexes of rats 23 p4026 A66-41339

Vibration effect on conditioned reflexes, oxidation mechanism and electric activity of brain in rats 23 p4027 A66-41342

Neutron, proton and gamma radiation effect on small animals examined, using conditioned response drinking method 23 p4027 A66-41345

Gamma and fast neutron radiation effect on nervous activity of mice examined, using conditioned reflex drinking method 23 p4028 A66-41346

Gamma radiation, fast neutron and proton effect on conditioned and motor responses, nervous activity, excitation and inhibitory processes of white rats 23 p4028 A66-41347

Effect of total chronic and acute gamma

radiation on higher nervous activity of white rats 23 p4028 A66-41348

Conditioned motor food reflexes of rats exposed to vibration, vibrostand noise and X-ray 23 p4028 A66-41351

Possible sustention of observing behavior in pigeons by stimuli of chain schedule or by stimuli correlated with passage of time in interval schedules 24 p4167 A66-42366

Neuronal spike populations and EEG activity in chronic unrestrained cats, noting multiple unit responses of acceleration/inhibition during behavioral conditioning procedures 24 p4169 A66-43098

**CONDUCTING MEDIUM**

Electrohydrostatic boundary equations solving two- and three-dimensional axisymmetric situation and sessile drop problem 04 p0545 A66-13808

One-dimensional unsteady flow of ideal compressible finite conductivity medium in presence of mass forces and plane magnetic field 04 p0516 A66-13856

Radiation from vertical magnetic dipole in inhomogeneous stratified media above horizontal conducting plane, noting Hertz potential as contour integral 04 p0483 A66-14041

Non-one-dimensional solutions of MHD equations for axisymmetric motion of electrically conducting gas in magnetic field 04 p0552 A66-14153

Two-dimensional flow of inviscid nonheat-conducting gas with variable conductivity in crossed constant electric and arbitrary magnetic fields 04 p0557 A66-14422

MHD flow in rectangular ducts, discussing laminar motion of conducting liquid under uniform transverse magnetic field 04 p0558 A66-14475

Electrophoretic motion of dielectric particle determined from flow rate of liquid metals and semiconductors near infinite plane 05 p0733 A66-14688

Formalism for determining linearized hydromagnetic wave phenomena in perfectly conducting plasma permeated by static magnetic multipole field 05 p0720 A66-14709

Corrugation growth on infinitely conducting fluid sheets, discussing acceleration induced by constant axial and linearly increasing currents 06 p0871 A66-16276

Shock wave propagation in electrically conducting incompressible fluid imbedded in magnetic field 07 p1089 A66-17975

Electromagnetic interaction between moving conducting ring and magnetic field inducing voltage in search coil 07 p1091 A66-18416

Explosive wave propagation during cylindrical and plane explosions in ideal electrically conducting gas, taking account of counterpressure and magnetic field 08 p1208 A66-19372

Steady state exothermal hydromagnetic discontinuity in perfectly conducting gas for arbitrarily oriented magnetic field 08 p1267 A66-19822

True heat capacity of solid heat-resistant dielectric or conducting materials at high temperatures 09 p1470 A66-20141

Induction synchronous MGD generator fed with jet of varying-conductivity working medium 10 p1484 A66-21313

Electromagnetic wave diffraction around finite perfectly conducting cone 10 p1506 A66-21924

Stationary flow of viscous incompressible anisotropically conducting fluid in coaxial channel 11 p1743 A66-22235

Hydraulic resistance coefficient dependence on Reynolds and Hartmann numbers in turbulent flow of conducting fluid through tube in magnetic field 11 p1743 A66-22337

Stability of forward and rearward slug flows due to motion of body through perfectly conducting liquid with embedded magnetic field 11 p1746 A66-23011

Input impedance of spherical emitter in infinite homogeneous isotropic conducting medium 11 p1656 A66-23031

Plane electromagnetic wave scattering by conducting cylinder surrounded by hot magnetoplasma sheath 11 p1657 A66-23112

Magnetic forces effect on laminar wall jet of electrically conducting incompressible

fluid of constant properties 12 p1796 A66-23594  
 Electromagnetic properties of gases interacting with magnetic fields whose conductivity increases with temperature 12 p1919 A66-23642  
 Hot-wire anemometer applications to turbulence measurements in conducting liquids and vacuum deposition of quartz film on coated hot-film probe 12 p1880 A66-23848  
 High speed photography determination of current cut-off and recurrent breakdowns during electrical discharges in water 12 p1922 A66-24221  
 Pressure distribution of viscous electrically conducting fluid in lubricating layer of cylindrical bearing 12 p1887 A66-24425  
 X-ray radiation effect on electrical conductivity of liquid organic semiconductors obtained on diethyl ether base with halogen derivatives of benzene, methane, etc 13 p2160 A66-25096  
 Plane wave diffraction by infinitely conducting network representing diffracted electric field by Rayleigh expansion 13 p2021 A66-25457  
 Electric field force dragging of fine jets from surface of conducting fluid in form of cylinder and hemispheroid on earthed plate 13 p2129 A66-26301  
 Laminar ducted flow of viscous electrically conducting fluid under uniform arbitrarily oriented magnetic field for rectangular duct with nonconducting walls 14 p2342 A66-27407  
 Impedance integral evaluation for antenna loop immersed in conducting medium 14 p2256 A66-27923  
 Theoretical and experimental investigations of electromagnetic scattering by conducting cylinder coated with anisotropic ferrite sheath magnetized along axis 15 p2449 A66-28594  
 Ferrite-air interface in waveguide with conducting thin film coated core solved by use of boundary condition or impedance condition 15 p2565 A66-29053  
 Approximation of electrical conductivity change in ideally conducting gas in turbulent MGD flow 15 p2551 A66-29220  
 Flow in viscous incompressible conducting fluid subjected to magnetic field in concentric cylinders rotating at different angular velocities, assuming planar motion, using differential equations 16 p2757 A66-30214  
 HF backscattering by plane electromagnetic wave incident on imperfectly conducting sphere covered with concentric layers of different materials, noting refractive index value 16 p2647 A66-30224  
 Steady flow of conducting dissociating gas in channel of constant cross section in presence of magnetic field 16 p2687 A66-31165  
 Energy dissipation due to deformation of magnetic field in compressible conducting medium near zero field 16 p2762 A66-31182  
 Conical refraction of magnetosonic waves occurring when Alfvén waves propagate at speed of sound in conducting fluid in presence of constant uniform magnetic field 16 p2764 A66-31364  
 Numerical solution of MHD equations for boundary layer conducting gas flow near flat plate when velocity distribution of external flow obeys power law 16 p2764 A66-31366  
 Busbar effect on interaction between conducting fluid flow and traveling wave magnetic field created by long line with concentrated inductance and capacitance, deriving line gain 16 p2765 A66-31374  
 Incompressible viscous conducting flow between two concentric cylinders in radial magnetic field 16 p2765 A66-31376  
 Reynolds analogy computation of heat transfer coefficient of turbulent electroconducting liquids in transverse magnetic field 16 p2765 A66-31401  
 Two-dimensional MHD jet flow of conducting fluid in coplanar magnetic field and nonstationary flow past body with magnetic field perpendicular to surface 16 p2765 A66-31402  
 Excitation of electroacoustic lateral waves in compressible plasma in contact with conducting boundaries 17 p2962 A66-31817

Viscous forces influence on instability of liquid conductor model of hard-core pinch 17 p2964 A66-32032  
 Hall current effect on capillary instability of finitely conducting liquid jet carrying axial volume current 17 p2908 A66-32432  
 MHD approximation of laminar duct and channel flow of electroconductive viscous Newtonian fluid 17 p2971 A66-32861  
 Finite-difference calculation of MHD flow of conducting fluid past circular cylinder in transverse magnetic field based on Navier-Stokes equation 17 p2971 A66-32862  
 MHD flow of electroconductive fluid in transverse magnetic field 17 p2971 A66-32863  
 Electric and magnetic fields effect on three-dimensional laminar boundary layer of conducting fluid near line of intersection of two surfaces 17 p2971 A66-32865  
 Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866  
 Steady-state axially-symmetric channel flow of ionized gas in external electromagnetic field in one-dimensional approximation 17 p2971 A66-32867  
 Geometric, gasdynamic and electromagnetic parameters of one-dimensional flow of conducting gas with Hall effect for maximum power tapping from channel electrodes 17 p2972 A66-32869  
 Conducting fluid flow velocity measuring technique using properties of pulsed electromagnetic field 17 p2926 A66-32873  
 Unsteady slip flow of electrically conducting viscous fluid over porous flat plate under transverse magnetic field 17 p2973 A66-32980  
 Explosive wave propagation during cylindrical and plane explosions in ideal electrically conducting gas, taking account of counterpressure and magnetic field 18 p3099 A66-34171  
 Conductive sheet analogy applied to steady heat conduction problem, noting evaluation without use of potentiometers 18 p3265 A66-34491  
 Transverse propagation of waveguide modes in conducting cylindrically stratified magnetoplasma analogous to VLF radio waves propagating in Earth-ionosphere 18 p3071 A66-34565  
 Hartree solution of MHD laminar boundary layer incompressible conducting fluids, specifically considering flow at inlet to semiminfinite flat channel 18 p3147 A66-34636  
 Transitions of steady flows of conducting gases through two successive oblique MHD shock waves 18 p3147 A66-34726  
 Lagrange equation for symmetric, nonhomotropic, spherical, cylindrical and one-dimensional unsteady flow of perfectly conducting gas behind normal shock wave of variable strength 18 p3102 A66-34728  
 Force-free magnetic fields generated by orthogonal current systems in unbounded conducting fluid 18 p3151 A66-35032  
 Optimum MHD generators using anisotropic plasma, discussing conducting-gas MHD flow, Hall effect, ion slip effect, etc 18 p3152 A66-35075  
 Conducting nonmagnetic circular cylinder supported on magnetic field produced by alternating current 19 p3324 A66-35729  
 Bending of plane electromagnetic waves around elliptically ideally conducting cylinder of infinite length and around parallel circular dielectric cylinder, with solution as Mathieu-type series 19 p3303 A66-36064  
 Self-similar motions in variable conducting fluid in strong magnetic field 20 p3607 A66-36988  
 Method for calculating distribution of electric potential above conducting media with parallel interfaces for general case of  $n$  layers and arbitrary resistivities of base 20 p3551 A66-37512  
 Resistance and heat transfer coefficient relation theoretically determined for flow of electrically conducting liquid in magnetic field 20 p3679 A66-37614  
 Hamilton principle extended to compressible MHD flow of perfect conducting fluid 20 p3610 A66-37987  
 Differential equations for quasi-

homogeneous MHD flow of electrically conducting medium at low magnetic Reynolds numbers 20 p3611 A66-38109  
 Two-dimensional problem of current distribution on surface of permeable electrodes adjacent to flow of conducting medium under Hall effect 20 p3611 A66-38110  
 Field, mass, momentum and energy conservation, entropy and evolution conditions for steady MHD oblique shock discontinuities in perfectly conducting gas flow with Mach and Alfvén number parameters 21 p3795 A66-39577  
 Steady state equations for one-dimensional flow of conducting medium through channel of MHD generator in homogeneous magnetic field 22 p3952 A66-39692  
 Uniform magnetic field effect on plane acceleration wave propagation and growth in homogeneously deformed perfectly electroconductive elastic material 22 p3955 A66-40135  
 Four-point probe technique to measure conductivity of epitaxial layers on conducting substrates 23 p4110 A66-41157  
 EHD traveling potential wave interaction inducing electroconvection in slightly conducting current without electrical contact with flow 23 p4104 A66-41496  
 Boundary layer control of conducting fluid by transverse magnetic field and spanwise electric field 23 p4107 A66-41904  
 Velocity field of conducting fluid interaction with electromagnetic fields, noting applications to electric propulsion, MGD power generation and reentry 24 p4240 A66-42281  
 Plane laminar jet of incompressible conducting fluid propagating homogeneous magnetic field at magnetic Reynolds number 24 p4196 A66-42872  
 Propagation of weak shock wave in heterogeneous conducting medium in presence of magnetic field 24 p4238 A66-42874  
**CONDUCTION**  
**S IONIC CONDUCTION**  
**CONDUCTION BAND**  
 Thermoelectric emf related to entropy in quantizing magnetic field in semiconductor with polyellipsoidal conduction band 04 p0564 A66-14252  
 Hall effect and resistivity measurements on high resistance  $n$ -silicon related to formation conditions at low temperature of level placed at 160 meV from conduction band 06 p0935 A66-17128  
 Pronounced quantum effects of solid-bismuth plasma properties at quantum limit and low temperature 07 p1082 A66-18212  
 Carrier number fluctuation in semiconductor conduction band due to generation and recombination of charge carriers 07 p1105 A66-18371  
 CdS-type superlinear photoconductivity due to excitation from localized levels 09 p1426 A66-20195  
 Electron tunneling in semiconductors with degenerate band structure 10 p1581 A66-21739  
 Negative-conductance amplification and Gunn effect oscillations in two-valley semiconductors 10 p1583 A66-22066  
 Density of free carriers in semiconductor conduction band varying with electric field, noting growth and phase velocity of RF wave of small amplitude 10 p1584 A66-22070  
 Dependence of threshold field for Gunn oscillations on energy minima separation, noting decrease under uniaxial stress 10 p1584 A66-22073  
 Spin resonance of donor electron in Ge and anisotropic line width in relation to dislocation stress 11 p1750 A66-22463  
 Magnetoresistance of reduced and doped strontium titanate to investigate band structure 12 p1927 A66-23722  
 Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 13 p2160 A66-25101  
 Consistency of Gunn effect with excitation of conduction band electrons from high mobility minimum to low mobility valleys 13 p2164 A66-25517  
 Gunn effect in gallium arsenide, noting negative differential electron mobility at high electric fields in conduction

- band 13 p2165 A66-25546  
Hall coefficient increase with temperature and electron transition to second conduction band in InSb 15 p2558 A66-28614  
Conduction band in cadmium arsenide semiconductor, measuring transport phenomena 15 p2560 A66-28635  
Resistivity increase in Cadmium Telluride, attributed to conduction band separation due to deionization into impurity levels 16 p2768 A66-30131  
Negative conductivity, induced by nonequilibrium state in semiconductors, due to short electron lifetime in conduction band 16 p2771 A66-30280  
Effect of thermal population of /000/ and /100/ conduction bands on elastic constants of heavily doped n-type germanium 16 p2778 A66-31070  
Optical reflection, transparency and Faraday effect for indium antimonide, calculating effective electron mass, relation between energy and wave number, etc 16 p2788 A66-31777  
State density for highly doped semiconductor in magnetic field, obtaining results at near Fermi level energies and at bottom of conduction band 16 p2788 A66-31779  
Magnitude of DC conductivity change in CdS by microwave phonons at liquid helium temperature explained with piezoelectric polaron effect 17 p2975 A66-31886  
Quantum theory of electric conductivity of semiconductors with nonstandard band, discussing influence of spin splitting of Landau levels on oscillations of transverse magnetoresistance in n-InSb 17 p2978 A66-32508  
Dangling bonds and dislocations in semiconductors, noting existence of core charge dependent localized state in gap caused by local decrease in atom density 17 p2985 A66-33155  
Steady state distribution functions for photoexcited carriers in semiconductors bands determined by competition between intraband intercarrier collisions and recombination processes 18 p3154 A66-33919  
Conduction band structure of KCl calculated by overlapping-plane-wave method 18 p3156 A66-34470  
Sb concentration and ESR linewidth of Sb donors in compensated and uncompensated n-silicon 18 p3156 A66-34475  
Suggested origin of low energy tails in radiative recombination spectra due to degenerate conduction band 19 p3437 A66-35475  
Dipole scattering of electrons in germanium and silicon whose conduction-band structure is described by many-valley model, using distribution function and computing relaxation-time ratio 19 p3446 A66-36393  
Quasi-localized states associated with high-energy conduction-band minima in semiconductors, particularly Se-doped GaSb, plotting pressure-dependence of photoluminescence 20 p3618 A66-37598  
Electron tunneling from metal to doped indium antimonide through oxide layer measured, obtaining characteristics of conductance vs applied voltage for n-and p-type crystals 20 p3620 A66-37769  
Magneto-optical phenomena studied by extension of wavelength range of electroreflectance measurements in solids using electrolyte into near IR 23 p4111 A66-41263  
Charge carrier mobility by combining conductance with thermogravimetric measurements 24 p4250 A66-42295
- CONDUCTION ELECTRON**  
Interaction of conduction electrons with lattice vibrations in semiconductor produces additional transmission bands or disappearance of resonance absorption region 04 p0564 A66-14251  
Rise and decay of photoconductivity of cadmium sulfide single crystals with superlinear photocurrent illumination characteristics 08 p1272 A66-19248  
Anisotropic effect of interelectronic scattering on semiconductor conductivity of ellipsoidal isoenergetic surface 09 p1411 A66-19981  
Conduction electron interaction with spin wave in ferromagnetic superconductor, noting decay and damping 09 p1430 A66-20867  
Coexistence of superconductivity and ferromagnetism in alloy containing paramagnetic impurities explained by spin-orbit interaction of conduction electrons 13 p2169 A66-26566  
Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 14 p2358 A66-27083  
Effective-mass approximation of conduction electron scattering in very thin films 14 p2360 A66-27192  
Conduction electron spin resonance in rubidium and cesium observed, using reflection technique 16 p2750 A66-30146  
Electronic density of states of superconducting ferromagnetic alloys determined by static electron-impurity exchange interaction 16 p2768 A66-30148  
Ferromagnetic semiconductors with exchange interaction due to conduction electrons 17 p2986 A66-33306  
Thermal emf of semiconductors in strong magnetic field, examining formation of spherically symmetric zone subject to arbitrary conduction-electron energy dispersion law 22 p3960 A66-39824  
Cross section of slow neutron scattering in superconductors and polarization of scattered electrons 22 p3964 A66-40308  
Spin-lattice relaxation of conduction electrons in semiconductors of n-InSb type with scattering at acoustical and optical phonons 22 p3967 A66-40839  
Effective-mass approximation of conduction electron scattering in very thin films 24 p4259 A66-43090

New techniques in astronomy - Conference, Kazan, U.S.S.R., May 1964 05 p0679 A66-15202  
 Plasma physics - Seminar, Trieste, Italy, October 1964 05 p0724 A66-15233  
 Physics of cosmic rays - All-Union Conference, Apatity, U.S.S.R., August 1964 05 p0749 A66-15372  
 Radiation effects in electronics - ASTM and ANS Meeting, Syracuse, N.Y., October 1964 05 p0738 A66-15486  
 Thermionic electrical power generation - European Nuclear Energy Agency and IEE International Conference, London, September 1965 05 p0613 A66-15532  
 MHD - Symposium, University of Tokyo, October 1965 05 p0728 A66-15808  
 Reliability in space vehicles - Seminar, Los Angeles, April 1965 05 p0770 A66-15823  
 Military electronics - MILECON/9, Conference, Washington, D.C., September 1965 06 p0840 A66-15954  
 Atomic and molecular quantum theory - NATO and AEC International Symposium, Sanibel Island, Florida, January 1965 06 p0910 A66-16163  
 Signal transmission and processing - IEEE Symposium, New York, May 1965 06 p0829 A66-16187  
 Physiological and performance determinants in manned space systems - AAS and HFS Symposium, San Fernando Valley State College, Northridge, California, April 1965 06 p0816 A66-16234  
 Cloud physics - International Conference, Tokyo and Sapporo, Japan, May 1965 06 p0904 A66-16266  
 Insulation materials and processes for aerospace and hydrospace applications - SAMPE Symposium, San Francisco, May 1965 06 p0898 A66-16284  
 Energy conversion and storage - Conference, Oklahoma State University, October 1965 06 p0808 A66-16390  
 Dimensioning and strength calculations - Conference, Budapest, October 1965 06 p0963 A66-16472  
 Cosmic rays and problems in space physics - Conference, Yakutsk, U.S.S.R., August 1962 06 p0945 A66-16568  
 Ferroelectricity - All-Soviet Conference, Rostov, U.S.S.R., September 1964 06 p0925 A66-16712  
 V/STOL Aircraft Symposium, Wright-Patterson AFB, Ohio, November 1965 06 p0805 A66-16808  
 Manufacturing methods in space flight technology - German Symposium, Munich, November, 1964 06 p0887 A66-17068  
 Physics of semiconductors - International Conference, Paris-Royaumont, July 1964, Volume 3, Radiation damage in semiconductors 06 p0930 A66-17111  
 Aerospace - Society of Experimental Test Pilots Symposium, Beverly Hills, September 1965 07 p0985 A66-17267  
 Nuclear engineering - AICE Conference, Chicago, December 1962 07 p1079 A66-17298  
 Physics of semiconductors - International Conference, Paris, July 1964, Volume 4, Radiative recombination in semiconductors 07 p1092 A66-17310  
 Microwave theory and techniques - IEEE G-MTT Symposium, Clearwater, Florida, May 1965 07 p1006 A66-17501  
 Physics of cosmic rays - All-Union Conference, Moscow, October 1963 07 p1111 A66-17534  
 Heat transfer - AICE and ASME Conference, Cleveland, August 1964 07 p1149 A66-17576  
 Astronomical Society Conference, Eisenach, Thuringia, East Germany, September 1965 07 p1134 A66-17630  
 International Air Transport Association, Technical Conference, Miami, April 1965, Volume 1 07 p1063 A66-17667  
 Network theory - Conference, Cranfield, England, September 1965 07 p1014 A66-17744  
 International Air Transport Association, Technical Conference, Miami, April 1965, Volume 2 07 p1071 A66-17757  
 Cosmic rays - International Conference, Jaipur, India, December 1963 07 p1118 A66-17977  
 Plasma space science - Symposium, Catholic University of America, Washington, D.C., June 1963 07 p1137 A66-18072  
 Fluid dynamics - Symposium, Zakopane,

Poland, September 1963 07 p1021 A66-18101  
 Cavitation in fluid machinery - ASME Symposium, Chicago, November 1965 07 p1024 A66-18166  
 Plasma effects in solids - Conference, Paris, July 1964 07 p1100 A66-18197  
 Electron devices - IEEE Symposium, San Francisco, August 1965 07 p1011 A66-18266  
 Energetics /engineering developments in energy conversion/ - ASME International Conference, University of Rochester, August 1965 07 p0992 A66-18308  
 Civilian and Military Uses of Aerospace - Conference, New York, January 1965 08 p1299 A66-18547  
 ASTM Southeastern Engineering Conference and Tool Exposition, Atlanta, October 1965 08 p1228 A66-18685  
 Crystal-Diffusion Spectra-International Colloquium, Paris, July 1965 08 p1233 A66-19231  
 Atmospheres of Venus and Mars - Astrophysics Conference, Kiev, Ukrainian SSR, June 1964 08 p1293 A66-19322  
 ASTM conference, Purdue University, June 1965 08 p1241 A66-19713  
 Antennas in ionized medium - Colloquium, Paris, June 1965 09 p1339 A66-19841  
 Low temperature physics - International Conference, Columbus, Ohio, August-September 1964 09 p1413 A66-20004  
 Low temperature physics LT9 - International Conference, Columbus, Ohio, August 1964 09 p1424 A66-20075  
 Planetary atmospheres and surfaces - Symposium, Dorado, Puerto Rico, May 1965 09 p1448 A66-20101  
 Cosmic ray physics - All-Union Conference, Moscow, October 1963 09 p1436 A66-20201  
 Cosmic space physics - All-Union Conference, Moscow, June 1965 09 p1460 A66-20986  
 Radio astronomy, Volume 5 of Progress in radio science 1960-1963, URSI General Assembly, Tokyo, September 1963 10 p1601 A66-21058  
 Astronomical observations from space vehicles - International Astronomical Union Symposium, Liege, Belgium, August 1964 10 p1596 A66-21078  
 Scientific experiments for manned orbital flight - Goddard Memorial Symposium, Washington, D.C., March 1965 10 p1607 A66-21517  
 German Physical Society, Physics Session, Frankfurt am Main, October 1965 10 p1556 A66-22052  
 Meteorological satellite data interpretation and use - Seminar, Tokyo, November-December 1964 11 p1725 A66-22305  
 Aviation and space medicine - International Congress, Rome, October 1963 11 p1641 A66-22478  
 Radio waves and circuits - URSI Conference, Tokyo, September 1963 11 p1653 A66-22626  
 Thin ferromagnetic film physics - All-Union Symposium, Irkutsk, U.S.S.R., July 1964 11 p1751 A66-22796  
 Hypervelocity techniques - Symposium, Tullahoma, Tennessee, November 1965 11 p1683 A66-22826  
 Rarefied gas dynamics - International Symposium, Institute for Aerospace Studies, University of Toronto, July 1964, Volume 1 11 p1688 A66-22901  
 Forms of water in biologic systems - Conference, New York, October 1964 11 p1644 A66-22987  
 Automatic control - Conference, Rensselaer Polytechnic Institute, Troy, New York, June 1965 11 p1659 A66-23108  
 Optimal control - Symposium, Imperial College of Science and Technology, London, April 1964 11 p1679 A66-23271  
 Systems effectiveness - Conference, Electronic Industries Association, Washington, D.C., October 1965 11 p1788 A66-23434  
 Heat transfer information week notes - Conference, Poitiers, France, April 1963 12 p1972 A66-23522  
 Nonequilibrium thermodynamics, variational techniques and hydrodynamic stability - Symposium, University of Chicago, May 1965 12 p1974 A66-23540  
 Radiation detector, nuclear reactor, measurement, etc - Nuclear Science

Symposium, San Francisco, October 1965 12 p1910 A66-23670  
 American Federation of Information Processing Societies, Joint Computer Conference, Las Vegas, November 1965 12 p1825 A66-23824  
 Extraterrestrial civilizations - All-Union Conference, Yerevan, Armenian SSR, May 1964 12 p1813 A66-23887  
 Advances in biomedical computer applications - Conference, N.Y. Academy of Sciences, June 1965 12 p1809 A66-24227  
 Automation of control processes - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1850 A66-24314  
 Discrete and self-adaptive systems - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1851 A66-24323  
 Wire and data communication - IEEE International Convention, New York, March 1966 12 p1818 A66-24594  
 Radio communication, broadcasting and audio - IEEE International Convention, New York, March 1966 12 p1838 A66-24597  
 Aerospace and electronic systems - IEEE International Convention, New York, March 1966 12 p1818 A66-24600  
 Antennas, microwaves, electron devices - IEEE International Convention, New York, March 1966 12 p1838 A66-24613  
 Automatic control, systems science, cybernetics, biomedical engineering, human factors - IEEE International Convention, New York, March 1966 12 p1854 A66-24634  
 Circuit theory, information theory, basic sciences, electrostatic processes - IEEE International Convention, New York, March 1966 12 p1855 A66-24645  
 Power, industrial and general applications - IEEE International Convention, New York, March 1966 12 p1803 A66-24658  
 Parts, materials and packaging reliability and electric contacts - IEEE International Convention, New York, March 1966 12 p1842 A66-24663  
 Instruments, measurements, industrial electronics, nuclear science, ultrasonics - IEEE International Convention, New York, March 1966 12 p1842 A66-24672  
 Fundamental phenomena in hyperperson flow - Conference, Buffalo, June 1966 13 p2060 A66-25152  
 Stepping stones to Mars - AIAA-AAS conference, Baltimore, March 1966 13 p2177 A66-25234  
 Society of Plastics Engineers, Conference, Montreal, March 1966 13 p2111 A66-25301  
 Programming and control - International Conference, Air Force Academy, Colorado Springs, April 1965 13 p2046 A66-25339  
 Northeast Electronics Research and Engineering Meeting, Boston, November 1965 13 p2032 A66-25501  
 Stability of systems - Discussion, IME Automatic Control Group, London, May 1964 13 p2118 A66-25580  
 Electrochemical kinetics of fuel cells - Conference, Moscow, 1964 13 p1998 A66-25667  
 Circuit and system theory - Allerton Conference, University of Illinois, October 1965 13 p2049 A66-26057  
 High speed stress-strain testing of polymers - International Symposium, Boston, March 1965 13 p2114 A66-26105  
 Physics of quantum electronics - Conference, San Juan, Puerto Rico, June 1965 13 p2093 A66-26141  
 Engineering aspects of MHD - Symposium, Princeton University, March 1966 13 p2000 A66-26253  
 Stress concentration - Symposium, Kiev, Ukrainian SSR, May 1964 13 p2199 A66-26401  
 Fluid mechanics - Midwestern Mechanics Conference, Case Institute of Technology, Cleveland, April 1963 13 p2068 A66-26701  
 Cause and structure of temperature latitude sporadic E - Seminar, Swiss Village, Colorado, June 1965 14 p2279 A66-26834  
 Magnetism and magnetic materials - IEEE and AIP Conference, San Francisco, November 1965 14 p2349 A66-26875  
 Philosophical problems of Einstein theory of gravitation and relativistic cosmology - All-Union Conference, Kiev, Ukrainian SSR, May 1964 14 p2331 A66-27208  
 Photographic and spectroscopic optics -

Conference, Tokyo and Kyoto, September 1964 14 p2291 A66-27316  
 Rare earth research - Conference, Phoenix, April 1964 14 p2361 A66-27460  
 Numerical calculus and physical calculus - Colloquium, Henri Poincare Institute, Paris, May 1963  
 [PST PAPER NT-147] 14 p2323 A66-27790  
 Numerical calculus and applied mathematics - French Colloquium, Rennes, France, June 1963 14 p2324 A66-27835  
 Structures and materials - AIAA/ASME Conference, Cocoa Beach, Florida, April 1966 14 p2403 A66-27986  
 Aerospace technology, spacecraft and spacecraft systems, launching, control, recovery, etc - Space Congress, Cocoa Beach, Florida, March 1966 14 p2388 A66-28401  
 Antenna and propagation - IEEE International Symposium, Washington, D.C., August 1965 15 p2454 A66-28566  
 American Society for Quality Control - Conference, Los Angeles, May 1965 15 p2505 A66-28788  
 National Air Meeting on Clear Air Turbulence, Washington, D.C., February 1966 15 p2531 A66-28911  
 National Relay Conference, Oklahoma State University, April 1966 15 p2459 A66-28988  
 Analytical mechanics, motion stability, celestial ballistics - All-Union Conference, Moscow, January-February 1964 15 p2538 A66-29144  
 System theory - Symposium, New York, April 1965 15 p2471 A66-29367  
 Extensive air showers - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2577 A66-29513  
 High energy interactions - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2582 A66-29541  
 Cosmic rays, muons and neutrinos - International Conference, Jaipur, India, December 1963 15 p2586 A66-29570  
 Physics of luminescent ionic crystal - Conference, Lvov, Ukrainian SSR, January-February 1964 15 p2568 A66-29728  
 Air cargo - International Forum, Chicago, May 1966 15 p2619 A66-29788  
 Numerical solution of partial differential equations - Symposium, University of Maryland, May 1965 16 p2731 A66-30233  
 Special ceramics - Symposium, British Ceramic Research Association, Stoke-on-Trent, U.K., July 1964 16 p2728 A66-30244  
 Mars and Venus exploration - Conference, Virginia Polytechnic Institute, August 1965 16 p2796 A66-30350  
 Rarefied gas dynamics, Advances in applied mechanics - International Symposium, University of Toronto, July 1964 16 p2751 A66-30370  
 Environment and man - IES Conference, San Diego, April 1966 16 p2674 A66-30434  
 Telemetry - International Conference, Washington, D.C., May 1965 16 p2647 A66-30534  
 Physics of thin ferromagnetic films - All-Union Conference, Irkutsk, U.S.S.R., July 1964 16 p2772 A66-30680  
 Instruments and measurements, automatic control - International Conference, Stockholm, September 1964 16 p2706 A66-30879  
 AFIPS Joint Computer Conference, Boston, April 1966 16 p2656 A66-31239  
 Materials science and technology in integrated electronics - Conference, San Francisco, September 1965 16 p2781 A66-31414  
 Hall effect application - MIT Conference, Cambridge, November 1965 16 p2785 A66-31571  
 Solid Mechanics - Conference, Cleveland, April 1963 17 p3019 A66-31996  
 Transactions of International Astronomical Union, Volume 12A, Reports on astronomy 17 p2997 A66-32018  
 Circuit theory - Midwest Symposium, Oklahoma State University, May 1966 17 p2899 A66-32049  
 Origins of prebiological systems and their molecular matrices - Conference, Wakulla Springs, Florida, October 1963 17 p2849 A66-32083  
 Aerospace Medical Association, Scientific Meeting, Las Vegas, April

1966 17 p2853 A66-32134  
 Aerospace life support - Conference, American Institute of Chemical Engineers, Houston, February 1965 17 p2866 A66-32667  
 American Helicopter Society, Annual Forum, Washington, D.C., May 1966 17 p2843 A66-32723  
 Sonic boom - Symposium, Saint Louis, November 1965 17 p2846 A66-33020  
 Aviation and astronautics - Conference, Tel Aviv and Haifa, February 1966 17 p2912 A66-33063  
 Geophysical monograph on extension of gravity anomalies to unsurveyed areas 17 p2920 A66-33191  
 All-weather operations, head up displays long-range navigational aids - Conference, International Federation of Air Line Pilots Associations, Rotterdam, October 1965 17 p2953 A66-33212  
 Nature and origin of comets - International Colloquium on Astrophysics, Liege, Belgium, July 1965 17 p3008 A66-33367  
 Stress corrosion, delayed failures, fatigue corrosion and relation between these phenomena - Commissariat on Atomic Energy, Metallurgical Colloquium, Cadarache Rhone, France, June 1964 17 p2941 A66-33440  
 Physical principles of cathode electronics - All-Union Conference, Leningrad, October 1965 17 p2988 A66-33458  
 Fluid mechanics and heat transfer Conference, Santa Clara, June 1966 17 p3038 A66-33467  
 Peaceful uses of automation in outer space - Symposium, International Federation of Automatic Control, Stavanger, Norway, June 1965 18 p3240 A66-33848  
 Environmental effects on man, Volume 1 - Symposium on environmental engineering and society, London, April 1966 18 p3062 A66-34201  
 Shock and vibration - Underground, underwater and in air - Volume 2, Symposium on environmental engineering and society, London, April 1966 18 p3095 A66-34208  
 Space technology, Volume 5 - Symposium on environmental engineering and society, London, April 1966 18 p3230 A66-34208  
 Design and construction of large steerable antennas - IEE Conference, London, June 1966 18 p3079 A66-34262  
 Solar wind - Conference, California Institute of Technology, Pasadena, April 1964 18 p3166 A66-34330  
 Industrial nuclear electronic supplies - Conference, French Atomic Energy Commission, December 1965 18 p3113 A66-34411  
 Cosmic rays - International Conference, Imperial College of Science and Technology, London, September 1965, Volume 2 18 p3200 A66-35088  
 Nature of lunar surface - IAU/NASA Symposium, Goddard Space Flight Center, Greenbelt, Maryland, April 1965 19 p3456 A66-35437  
 Aerospace electronics - IEEE National Conference, Dayton, May 1966 19 p3394 A66-35501  
 Life sciences and space research, Volume 4, International Space Science Symposium, Argentina, May 1965 19 p3283 A66-35567  
 Atmospheric circulation - International Space Science Symposium, Argentina, May 1965 19 p3346 A66-35636  
 Stress-corrosion cracking of titanium - ASTM Meeting, Seattle, October-November 1965 19 p3377 A66-35647  
 Telemetry - National Conference, Boston, May 1966 19 p3297 A66-35661  
 Geometric optics - Seminar, El Paso, March 1966 19 p3399 A66-35825  
 Factors in operation of manned space chambers - ASTM Symposium, Seattle, October-November 1965 19 p3288 A66-35837  
 Serrated yielding by metals during tensile tests at temperatures near absolute zero 19 p3380 A66-35846  
 Optimization techniques - Symposium, Carnegie Institute of Technology, Pittsburgh, April 1965 19 p3307 A66-35867  
 Scintillation and semiconductor counter - Symposium, Washington, D.C., March 1966 19 p3358 A66-35906  
 Space maintenance and extravehicular activities - National Conference, Orlando, Florida, March 1966 19 p3289 A66-35946

Sensitivity methods in control theory - International Symposium on Sensitivity Analysis, Dubrovnik, Yugoslavia, August-September 1964 19 p3326 A66-36009

Refractory metals and alloys - Conference, Los Angeles, December 1963 19 p3364 A66-36104

Law of outer space - Colloquium, Athens, September 1965 19 p3480 A66-36201

Space cabin atmosphere and closed environment - ACS Symposium, Atlantic City, September 1965 19 p3292 A66-36230

Plasma physics and controlled nuclear fusion research - Conference, International Atomic Energy Agency, England, September 1965 19 p3410 A66-36494

Plasma physics and controlled nuclear fusion research - IAEA Conference, England, September 1965, Volume 2 19 p3419 A66-36539

Automatic control - Conference, University of Washington, Seattle, August 1966 19 p3330 A66-36660

Stellar evolution - International Conference, Goddard Institute for Space Studies, New York, November 1963 19 p3466 A66-36788

Microminiaturization in automatic control equipment and digital computers - Symposium, International Federation of Automatic Control and International Federation for Information Processing, Munich, October 1965 19 p3322 A66-36806

Galactic evolution and structure - Solvay Physics Conference, Brussels, September 1964 20 p3645 A66-36957

Civil aviation safety - International Symposium, Stockholm, April 1966 20 p3493 A66-36990

Cryogenic engineering, Volume II - Conference, William Marsh Rice University, Houston, August 1965 20 p3599 A66-37059

Aerospace systems - Conference, Seattle, July 1966 20 p3659 A66-37155

Metal and alloy optical properties and electronic structure - International Colloquium, Paris, September 1965 20 p3612 A66-37271

Physics of ferro- and antiferromagnetism - All-Union Conference, Sverdlovsk, U.S.S.R., July 1965 20 p3616 A66-37475

Experimental stress analysis - Conference, West Berlin, March 1966 20 p3667 A66-37496

Position of variable stars in Hertzsprung-Russell diagram - International Astronomical Union Colloquium, Bamberg, West Germany, August 1965 20 p3652 A66-37609

Fluid logic and amplification - International Conference, England, September 1965 20 p3500 A66-37642

Deformation of solids by impact of liquids and relation to rain damage in aircraft and missiles, to blade erosion in steam turbines and to cavitation erosion - Meeting, London, May 1965 20 p3546 A66-37801

Satellite observations - Symposium, Krakow, Poland, April 1965 20 p3517 A66-37834

International Union for Vacuum Science, Technique and Applications - International Congress, Stuttgart, June-July 1965 20 p3621 A66-38083

Solar terrestrial physics - Symposium, Japan, December 1965 20 p3634 A66-38211

Radiation trapped in Earth magnetic field - Conference, Christian Michelsen Institute, Bergen, Norway, August-September 1965 20 p3636 A66-38301

Progress in mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3823 A66-38560

Recent progress of mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3824 A66-38571

Mechanics of linear vibrations - Symposium, Paris, April 1965 21 p3824 A66-38576

Guidance and control - AIAA/JACC Conference, Seattle, August 1966 21 p3761 A66-38838

Plasma physics and problems of controlled thermonuclear fusion - Conference, Kharkov, Ukrainian SSR, May 1963 21 p3777 A66-39002

Information theory - IEEE International Symposium, University of California, Los Angeles, January-February 1966 21 p3703 A66-39134

Megagauss magnetic field generation by

explosives and related experiments - Conference, Frascati, Italy, September 1965 21 p3773 A66-39501

Structural components and applications, electronics in aeronautics and astronautics - Conference, Hanover, West Germany, May 1966 21 p3715 A66-39617

Theoretical and applied mechanics - Israel Conference, Haifa, June 1965 22 p3921 A66-39667

Electron density profiles in ionosphere and exosphere - NATO Advanced Study Institute, Finse, Norway, April 1965 22 p3903 A66-39943

Space simulation - IES/ASTM Conference, Houston, September 1966 22 p3886 A66-40204

Mediterranean cooperation for solar energy - Meeting, Marseille, May 1966 22 p3851 A66-40242

Joining of materials for aerospace systems - National Symposium, Dayton, November 1965 22 p3923 A66-40255

Information display - National Symposium, New York, September 1965 22 p3927 A66-40286

Aerodynamic deceleration systems - AIAA Conference, Houston, September 1966 22 p3848 A66-40589

Satellite communications - WESCON, Los Angeles, August 1966 22 p3867 A66-40709

Nondigital applications and interconnection aspects of integrated electronics - WESCON, Los Angeles, August 1966 22 p3878 A66-40713

State-variable techniques application to communication and radar problems - WESCON, Los Angeles, August 1966 22 p3868 A66-40715

Advances in HF solid state transmitter systems - WESCON, Los Angeles, August 1966 22 p3879 A66-40721

Advanced spaceborne computer concepts - WESCON, Los Angeles, August 1966 22 p3870 A66-40725

Millimeter wave - WESCON, Los Angeles, August 1966 22 p3879 A66-40730

Microwave receiver devices - WESCON, Los Angeles, August 1966 22 p3879 A66-40734

Power and control integrated circuits - WESCON, Los Angeles, August 1966 22 p3880 A66-40739

High availability computer systems - WESCON, Los Angeles, August 1966 22 p3871 A66-40743

HF amplifier design - WESCON, Los Angeles, August 1966 22 p3881 A66-40745

Space antenna arrays - WESCON, Los Angeles, August 1966 22 p3881 A66-40747

Solid state mechanics - All-Union Conference, Moscow, January-February 1964 23 p4134 A66-40988

Delay devices for pulse compression radar - IEE Conference, London, February 1966 23 p4033 A66-41013

Microbonding - Colloquium, Sunbury-on-Thames, Middlesex, England, January 1966 23 p4043 A66-41188

Deep submergence propulsion and marine systems - AIAA Conference, Forest Park, Illinois, February-March 1966 23 p4054 A66-41205

Advanced propellant chemistry - ACS Meeting, Detroit, April 1965 23 p4116 A66-41218

Welding and adhesion techniques in aircraft and space vehicle construction - Conference, Hanover, West Germany, May 1966 23 p4073 A66-41530

IEEE Region Six Conference, Tucson, April 1966, Volume 1 23 p4039 A66-41580

IEEE Region Six Conference, Tucson, April 1966, Volume 2 23 p4049 A66-41600

Applied mechanics - International Congress, Munich, August-September 1964 23 p4092 A66-41934

Electronic reliability - IEEE Conference, New York, May 1966 24 p4178 A66-42087

IEEE and AIAA Thermoelectric Specialists Conference, Washington, D.C., May 1966 24 p4160 A66-42106

Instrumentation in aerospace simulation facilities - International Conference, Stanford, August 1966 24 p4205 A66-42166

Double Langmuir probe measurement of turbulent structure and ionization intensity of hypervelocity projectile and spectral characteristics of probe signal fluctuation 24 p4192 A66-42198

Applied mechanics - U.S. National

Congress, University of Minnesota, Minneapolis, June 1966 24 p4287 A66-42265

Unmanned exploration of solar system - AAS Symposium, Denver, February 1965 24 p4274 A66-42653

Cosmic ray physics - All-Union Conference, Apatity, U.S.S.R., August 1964 24 p4265 A66-42901

Metrology and precision mechanics - National Conference, Warsaw, September 1966 24 p4214 A66-43011

Magnetics - International Conference, Stuttgart, April 1966, Volume 2, covering ferrite and semiconductor devices, superconductivity and magnetic logic 24 p4260 A66-43170

**CONFIDENCE LIMIT**

Relationships of hazard rate distributions to reliability growth and confidence computations 01 p0077 A66-10109

Confidence ratio for Gaussian random processes satisfying certain linear differential equations 12 p1902 A66-23769

Component testing and system reliability at various confidence limits for serially connected systems 14 p2305 A66-28428

System availability, noting lower confidence limit and estimation of time-to-failure and time-to-repair from test data 16 p2661 A66-30664

Reliability data analysis for systems, discussing confidence intervals, limits and parameters independent of mathematical models employed 16 p2714 A66-30666

Error analysis of absorbed energy flux density and ignition exposure time data, accuracy, precision and confidence limit estimates for arc image furnace ignition experiments 18 p3261 A66-34224

[AIAA PAPER 66-669] Reliability statistical confidence levels and relation to mean time between failures /MTBF/ 20 p3682 A66-37182

Reliability analysis problem involving set of 30 identical parts which had intervals to failure recorded in order to make inferences about population from which parts are random sample, noting Weibull population 20 p3592 A66-37965

Methods for finding lower confidence bounds on reliability of item, noting reliabilities for items whose lifetimes follow Weibull distribution 20 p3574 A66-37966

Bayesian statistics applied to reliability and maintainability transactions 20 p3574 A66-37967

**CONFIGURATION**

S AIRCRAFT CONFIGURATION

S HAMMERHEAD CONFIGURATION

S LAUNCH VEHICLE CONFIGURATION

S MISSILE CONFIGURATION

S PLANETARY CONFIGURATION

S SATELLITE CONFIGURATION

S SPACECRAFT CONFIGURATION

**CONFINEMENT**

SA PLASMA CONFINEMENT

SA REACTOR CONTROL

Psychological and medical aspects of human confinement, isolation and sensory deprivation 11 p1642 A66-22485

Clinical observations and tests of solitary confinement on neurotic pilots 11 p1642 A66-22486

Nervous activity increase, EEG, EKG, gas exchange, respiration, urine, blood pressure, oxygen content and morphological state of humans after prolonged pressure chamber confinement 15 p2443 A66-29444

Biological effects of confining fish in sealed aquarium with and without Chlorella 15 p2440 A66-29504

**CONFORMAL MAPPING**

Conformal mapping analysis of reflections and mode conversions in tilted millimeter circular cylindrical waveguide 03 p0344 A66-13102

Wave propagation in groove waveguide analyzed by conformal mapping 05 p0641 A66-14557

Multiple meson production analyzed by conformal mapping of Lobachevskii plane onto Euclidean strip 07 p1116 A66-17559

Open circuit voltage, inner resistance, Hall voltage and tensorial conductivity for Faraday generator, using conformal mapping for single pair of electrodes 07 p0993 A66-18309

Conformal mapping analysis of waveguide,

Limited by two parallel metallic plates with two symmetric opposite grooves of properly chosen shape 08 p1198 A66-19742

Impedances of offset parallel-coupled strip transmission lines analyzed by conformal mapping techniques 10 p1514 A66-21906

Basic biharmonic problem for any singly or doubly connected region with piecewise-smooth boundary solved by method of summary representations 11 p1778 A66-22225

Electrode size effects on performance of infinitely long MHD power generation duct calculated by conformal mapping, analyzing gas Hall parameter, electrode-insulator length ratio, etc 13 p2000 A66-25735

Conformal mapping of unit circle onto given, singly connected or multiply connected region bounded by simple closed contour 13 p2204 A66-26433

Airfoil shape construction by conformal mapping and development of analog computer program to plot two-dimensional potential flow about various airfoil sections 16 p2629 A66-31116

Critical analysis of certain conformal mappings of ellipsoid of revolution onto plane 18 p3109 A66-34739

Conformal mapping technique applied to boundary value problem of plane wave diffraction by perfectly conducting elliptical cylinder, noting integral equation 22 p3866 A66-40185

Eigenfunctions of full dislocation solution of cut annulus in plane elastostatics 23 p4144 A66-41970

Incompressible flow in two-dimensional bends treated by Rayleigh-Ritz method in Kamiyama modification of conformal mapping 24 p4157 A66-42264

Conformal mapping to determine shape and field distribution of shim used to modify field in air gap between pole faces of electromagnet 24 p4239 A66-43211

**CONFORMAL TRANSFORMATION**

Aerodynamic characteristics of arbitrary slender reentry bodies predicted by conformal mapping 10 p1481 A66-21942

Segmented electrode MHD generator performance for various electrode-insulator length ratios 13 p2000 A66-25714

Conformal transformation to determine electrical field of symmetrical air-filled strip line under static conditions 14 p2264 A66-27242

Nonrectilinear blade rows with zero thickness when produced by conformal transform 20 p3491 A66-36966

Einsteinian gravitation equations stated in terms of three-dimensional tensor analysis as applied in conformal space 23 p4091 A66-41834

New gravitation theory, noting role of Einstein equations following conformal transformation 24 p4237 A66-42540

**CONICAL FLOW**

Temperature distribution of slow incompressible viscous flow through conical tube and comparison with two inclined walls 01 p0161 A66-10435

Exact solution of conical flow equation with zero velocity and pressure 01 p0008 A66-11082

Asymptotic representation of solutions for boundary layers near weak shock waves in conical flows 02 p0176 A66-12181

Dissociation or ionization effects of air on inviscid hypersonic flow past circular cone with attached shock wave 03 p0316 A66-12928

Special cases of conical flow permitting two flows to join and predicting flow limited by conic wall 05 p0605 A66-14536

Ratio base pressure of spherical cone in turbulent flow at zero angle of attack 05 p0609 A66-15804

Compressible fluid flow, discussing simple wave supersonic flow mechanism for bodies with developable surfaces 06 p0802 A66-16352

Similarity solutions of boundary layer equations with algebraic decay for viscous incompressible fluid inside infinite circular cone 06 p0873 A66-16996

Sweeping conditions for oblique and conical shock waves and transonic flows 07 p1020 A66-17868

Quasi-conical flow to calculate pressure on wings having curved leading edges 07 p0983 A66-18229

Laminar boundary layer on cone with uniform mass transfer, discussing velocity and energy fields 08 p1161 A66-18530

Homogeneous isotropic cone with surface loadings and internal temperature distributions 08 p1309 A66-19142

Parameter estimation for laminar conical flow of viscous inelastic non-Newtonian fluids 10 p1521 A66-21056

Free-molecule flow through conical tubes noting mass transport, axial momentum, energy, flow distribution and speed ratio 11 p1635 A66-22938

Correlations of distance to downstream stagnation point and axial static pressure along axis of symmetry of near wake of cone at Mach 6 12 p1795 A66-23571

Viscous fluid motions around conical surface, using Navier-Stokes equations 12 p1797 A66-24198

Aerodynamic characteristics of shapes constructed by current surfaces of supersonic flows past cones, noting lengthwise variation of cross sections 12 p1798 A66-24438

Numerical solution of problem of supersonic flow at angle of attack past arbitrarily smooth conical bodies 12 p1798 A66-24441

Streamline flow of ideal stable gas with constant ratio of specific heats around conical body with arbitrary taper, determining flow velocity components 14 p2220 A66-27679

Flow loss in conical diffusers with boundary layer suction through single slit 16 p2629 A66-30813

Behavior of inviscid supersonic conical flow fields near crossflow stagnation points studied by constructing coordinate expansions of exact conical flow equations [AIAA PAPER 66-491] 16 p2631 A66-31494

Flow along free border of conical vortex sheet above delta wing and rolling-up conically from apex 17 p2837 A66-32274

Vortex sheets rolling-up along leading edges of delta wings, comparison with slender body theory and conical flow 17 p2837 A66-32275

Coherent conical vortex sheet formation theory in two-dimensional and three-dimensional vortex filaments 17 p2906 A66-32276

Shanks approximation of stationary shocks attached to point of cone 17 p2837 A66-32282

Wall thermal factor for supersonic flow incident on cone 17 p2838 A66-32283

Rotating vortex flow and transition phenomena in conical diffuser [AIAA PAPER 66-426] 18 p3046 A66-33643

Sources of nappe image in variable-analysis plane as related to distribution of vortices 18 p3097 A66-33909

Stability derivatives of sharp cones performing pitching oscillations in viscous hypersonic flow 21 p3693 A66-38723

Interferometric measurement of density distributions in shock layer of nonequilibrium flow field around cone 21 p3694 A66-39168

Finite difference analysis of viscous laminar converging flow in conical tubes, assuming parabolic inlet velocity profile and simplified motion equation 21 p3729 A66-39450

Supersonic flow around thin polygonal wings and polygonal wings of symmetrical thickness studied by Carafoli hydrodynamic analogy for wings in conical flow 21 p3695 A66-39603

Boundary layer transition on downstream surface of sharply pointed cones when angle of incidence is slight and boundary layer is attached throughout 23 p4007 A66-41172

Supersonic gas flow problems around lattice of conical blades solved in any approximation of perturbation theory 23 p4008 A66-41358

Surface mass transfer effect for supersonic flow over cone, examining solution of equations of motion for inviscid compressible gas with velocity field normal to surface of inner cone 23 p4011 A66-41898

Diameter and location of wake neck and trailing wake shock for pointed and blunt slender hypersonic cones 23 p4012 A66-41919

Motion equations, shear stress and skin friction for three-dimensional flow in conical

23 p4014 A66-42062

Secondary jets investigated on sharp nosed 9 degree half-angle cone at Mach 6, noting effect on ratio of jet interaction normal force coefficient to jet reaction normal force coefficient 24 p4158 A66-42791

**CONICAL INLET**

Local emissivity of vertex point of diffuse conical or V-groove cavity, noting dependence on wall material, angle factor and agreement with theoretical solution 17 p3035 A66-32613

**CONICAL NOZZLE**

Performance correlation of conical and contoured nozzles for gas-particle flows, defining differences between particle effects for such nozzles 08 p1165 A66-19157

Flow regime data for wide range of conical diffuser geometries determined from clear plastic diffuser experiments 11 p1687 A66-22331

Modification of conical plasma source of Azovskii design by replacing thin glass conical section with thick-walled neck section of glass bottle 21 p3785 A66-39039

**CONICAL SCANNING**

Antenna construction, RF system, receiver and detector, information bandwidth, target modulation and efficiency points of monopulse and conical scanning system for tracking radars 04 p0487 A66-14130

Conical beam scanning by nutating subreflector in Cassegrain antenna system, showing most favorable motion pattern from point of view of electrical performance 18 p3082 A66-34282

**CONICAL SHELL**

Plastic analysis of conical shells of revolution under axisymmetric loads based on approximate parabolic hypercylindrical yield 01 p0153 A66-10445

Axisymmetric modes and frequency vibration of thin conical shells subjected to rapid surface heating [AIAA PAPER 65-788] 03 p0434 A66-12558

Transient response of truncated conical shell due to traveling pressure front of constant velocity and amplitude approximating vibration modes 03 p0437 A66-12819

Large axisymmetric nonlinear elastic or plastic deformations of zero-moment circular conical shells 04 p0590 A66-14160

Yield point load of conical sandwich shell simply supported and loaded at vertex for material obeying Tresca yield condition [ASME PAPER 65-WA/APM-30] 05 p0779 A66-15451

Inextensional buckling of thin conical shell under axial compression [AIAA PAPER 66-125] 07 p1148 A66-18461

Unsymmetric free oscillations of conical shell of medium length and linearly variable thickness 08 p1312 A66-19432

Stress-strain state of conical shells of variable thickness loaded along generatrices and at peripheral points 08 p1312 A66-19433

Stability of thin-walled conical shells under axially symmetric loading determined from nonlinear shell theory 10 p1614 A66-21382

Elastic buckling of clamped conical shells under external pressure 10 p1617 A66-21786

Internal or external pressure effect on natural frequencies of conical shell, noting role of inertia forces, using linear shell theory 11 p1780 A66-22330

Thermal radiation from conical surfaces with nonuniform radiosity and application to nozzle design 12 p1977 A66-23598

Yield point load of conical sandwich shell simply supported and loaded at vertex for material obeying Tresca yield condition [ASME PAPER 65-WA/APM-30] 12 p1961 A66-23978

Axisymmetric configurations of oscillations of thin conical shell, solving equations for fundamental frequency 13 p2207 A66-26497

Eigenvalues of truncated cones of revolution with degenerate poles and various rigidities and geometries 14 p2400 A66-27686

Edge load solution for conical shells 14 p2408 A66-28133

Torsion of elastic cone as mixed boundary value problem, using Mellin transforms and Wiener-Hopf technique 14 p2408 A66-28395

Deformation of finned conical shell under axial load 15 p2608 A66-28781

Vibration modes of conical frustum shells with free ends  
[AIAA PAPER 66-450] 16 p2814 A66-30603

Vibration mode of conical shells measured, showing that it varies with conical angle and circumferential wave  
16 p2821 A66-31381

Stability of truncated conical thin shells under torsional load  
16 p2821 A66-31382

Longitudinal bending of elastic truncated conical shell subjected to edge loads  
17 p3020 A66-32001

Newtonian formulas for determining pitch and roll and normal force derivatives for various types of conical and spherical bodies  
17 p2838 A66-32333

Parametric vibrations determining dynamic stability of simply supported truncated conical shells under pulsating pressure  
17 p3031 A66-33075

Exact analytic solution, in confluent hypergeometric functions, to problem of stability of conical shell under uniformly distributed longitudinal compressive forces  
18 p3252 A66-33709

Limit analysis of conical shells under uniform internal pressure in correcting membrane solution  
18 p3259 A66-35017

Impact of elastic conical shell of revolution moving with constant axial velocity toward rigid obstacle  
21 p3827 A66-38692

Bend-resistant conical shells of uniform wall strength under periodic loading treated by operator method  
21 p3828 A66-38811

Effect of stiffening ribs on stressed-strained state of shallow symmetrically loaded conical shells, noting reduction of boundary value problem to integration of differential equations  
22 p3991 A66-40150

Resonant frequencies and associated mode shapes of transverse vibrations of truncated conical shells over wide range of geometrical and modal parameters  
23 p4139 A66-41691

Steady state inviscid gas flow around conical bodies solved, using stabilization method for three-dimensional supersonic flow around smooth body  
23 p4013 A66-42012

Drop bursting by surface forces such as electric fields and fluid environments with larger viscosity  
23 p4060 A66-42018

**CONJUGATED SYSTEM**

Conformal sets of aromatic and other conjugated compounds, noting that sum of combustion heat of compounds in one set equals sum of compounds in other set  
03 p0442 A66-12333

Ionospheric disturbances following geomagnetic sudden commencements propagating from two isolated locations in high latitudes which are conjugate points  
08 p1216 A66-19214

Optimal trajectory and guidance role of conjugate points in determining maximum duration of optimal control for linear and nonlinear processes  
10 p1516 A66-21076

Matrix analysis of scattering from conjugate-matched antenna  
11 p1662 A66-22541

Linear ODEs in canonical form with after-effect in functional space of continuous functions  
11 p1676 A66-22644

Data on geophysical phenomena at magnetically conjugate points on Earth including cosmic noise absorption, conjugacy of visual auroras, magnetic variations, VLF phenomena, etc  
19 p3453 A66-35981

**CONNECTOR**

**SA ELECTRIC CONNECTOR**

Cylindrical connectors, nomenclature, terminology and tables  
13 p2043 A66-26308

Table of interconnecting device for use with printed circuit board  
13 p2043 A66-26309

**CONSERVATION EQUATION**

Conservation laws in general relativity and definitions of gravitational momentum and energy  
05 p0715 A66-14531

Integral form of fluid dynamic conservation equations relative to arbitrarily moving volume  
08 p1205 A66-18677

Electron conservation equation and effects of laminar or turbulent flow on breakdown in gases  
08 p1206 A66-18933

Generalized theory of physical quantities in scalar and vector form in moving reference regions  
08 p1211 A66-19730

Mathematical model for heterogeneous

continua, discussing kinematical definitions, conservation principles, thermodynamics  
15 p2478 A66-29250

Conservation equations for cylindrical blast and radiation effect on shock layer profiles of blast wave  
16 p2686 A66-31114

Mode characteristics of solid state lasers from analytical solution of conservative equation  
18 p3118 A66-33839

Conservation equations for two-dimensional axisymmetric simultaneous turbulent mixing and supersonic combustion of hydrogen-oxygen-nitrogen-water streams solved by finite difference methods  
18 p3099 A66-34219

[AIAA PAPER 66-617] Asymptotic property derived for particular solutions of Hamilton-Jacobi equation of conservative systems with two degrees of freedom  
19 p3401 A66-36252

Approximation of nonlinear characteristics of conservative vibrations by two polygon characteristics chosen so that mechanical energy of system remains same  
21 p3833 A66-39599

Energy, linear and angular momentum conservation principles for elastic body with finite number of defects  
23 p4091 A66-41855

Separation point of laminar boundary layer before dihedral, determining conservation of momentum and mass  
23 p4013 A66-42010

**CONSERVATION LAW**

Macroscopic conservation equations for ionized dilute hydrogen plasma derived directly from Bogoliubov-Born-Green-Kirkwood-Yvon equations  
01 p0110 A66-10338

Energy function and conservation of inertial mass and three-momentum from relativity principle and conservation of energy in particle collisions  
05 p0719 A66-15530

Conservation laws involving mass, momentum and energy applied to asymptotic properties of hypersonic flow  
09 p1327 A66-20266

Conservation principle as applied to heat equation, assuming equation is one-dimensional  
12 p1974 A66-23530

Particle theory in which additive particle labels are defined in geometric terms of classical gauge theories of Yang-Mills type  
12 p1916 A66-23823

Nonlinear ordinary differential equations applicable to damped oscillatory circuits with exploding wires, obtaining conservation law and approximate solutions by Picard method  
13 p1219 A66-26667

Small-signal energy conservation theorem for one-dimensional multiveLOCITY electron beam according to Boltzmann and multistream descriptions  
15 p2467 A66-29755

Energy pulse tensor formulation of law of conservation of energy in interacting electromagnetic field, using complete inhomogeneous Lorentz group  
18 p3135 A66-34579

Komar covariant formulation of conservation laws of general relativity obtained directly from variation of scalar curvature density  
19 p3401 A66-36168

Plasma radiative processes theory with conservation principles derivation and H-theorem proof  
20 p3607 A66-37012

Field, mass, momentum and energy conservation, entropy and evolution conditions for steady MHD oblique shock discontinuities in perfectly conducting gas flow with Mach and Alfven number parameters  
21 p3795 A66-39577

**CONSTANT**

**S COUPLING CONSTANT**

**S DIELECTRIC CONSTANT**

**S ELASTIC CONSTANT**

**S GRAVITATIONAL CONSTANT**

**S GRUNEISEN CONSTANT**

**S TIME CONSTANT**

**CONSTELLATION**

**S CYGNUS CONSTELLATION**

**S ORION CONSTELLATION**

**S SCORPIO CONSTELLATION**

**CONSTITUTIONAL DIAGRAM**

Thermal, micrographic and X-ray diffraction techniques used for constitution diagram of ternary system tungsten-molybdenum-osmium at various high temperatures  
03 p0385 A66-13209

Binary boron-metal systems, except B-Cu, show large miscibility gaps in liquid state  
07 p1052 A66-18353

## CONSTRUCTION

**S AIRCRAFT CONSTRUCTION**

**S MISSILE CONSTRUCTION**

**S SANDWICH CONSTRUCTION**

**S SPACECRAFT CONSTRUCTION MATERIAL**

**S STRESSED-SKIN CONSTRUCTION**

## CONTACT

**SA ELECTRIC CONTACT**

**SA ROLLING CONTACT**

**SA SLIDING CONTACT**

Plane contact problem for circular ring and elastic or absolutely rigid disk, using method of successive approximations  
18 p3252 A66-33710

Contact problem for elastic rectangle solved by reducing problem to solution of quasi-fully regular infinite set of linear algebraic equations with bounded free terms  
19 p3476 A66-36837

## CONTACT POTENTIAL

Hot glow probe determination of plasma space potential noting disturbance due to contact potential drift and probe construction, accuracy and applicability  
01 p0113 A66-10639

Surface charges on light-induced charges in contact potential difference of semiconductors  
05 p0738 A66-15345

Contact potential difference measurements for adsorption of cesium on polycrystalline tungsten surfaces in cesium vapor  
05 p0622 A66-15582

Surface potential in high and low resistivity semiconductors determined by comparing surface and contact potentials and Fermi levels  
09 p1427 A66-20537

Contact barriers on insulating semiconductor cadmium sulfide measurements, based on pulsed light and bridge  
10 p1573 A66-21245

Stored charge storage in surface states of germanium and silicon  
10 p1581 A66-21877

Contact potential difference measurements between aged polycrystalline tungsten foil and polished single crystal disk and work function calculation for /110/ oriented surface  
10 p1582 A66-21888

Surface charge sign effect on capacitor photoelectromotive force in semiconductors and photoinduced contact potential change  
15 p2559 A66-28628

Surface charges on light-induced charges in contact potential difference of semiconductors  
15 p2569 A66-29984

Voltage and density of contact-corrosion current arising at contact surface of different metals  
18 p3124 A66-35011

Theoretical distribution of charges and potential in vicinity of metal-dielectric barrier in absence and presence of applied field  
19 p3448 A66-36753

Contact problem of half-plane inelasticity theory using Jacobi polynomials and taking into account thermal stresses and presence of adhesion and friction in contact area  
19 p3476 A66-36835

Saha-Langmuir formula applied to description of temperature dependence of positive ion current in surface ionization of silicon atoms, comparing work functions by methods using contact potential, thermionic emission and Richardson graphs  
22 p3968 A66-40942

**CONTACT RESISTANCE**

Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface  
01 p0043 A66-10764

Binary-ternary switching algebra used to analyze multiterminal two-position contact networks which include resistors and ideal rectifiers  
02 p0209 A66-11911

Mode of use and effect of precision coaxial connectors on precise methods of impedance measurement  
03 p0344 A66-13017

Thermal contact resistance between uniformly loaded thin plates in vacuum, noting hysteresis test for effect of creep [ASME PAPER 65-HT-16]  
05 p0783 A66-14740

Interfacial metallic foils effect on thermal contact resistance [ASME PAPER 65-HT-44]  
05 p0785 A66-14755

Heat transfer between two metallic cylinders in close contact, examining effect of interstitial gas on thermal contact resistances  
07 p1149 A66-17452

Contact pressure between two bodies with two contact sections in theory of creep 07 p1146 A66-18255

Steady thermal regimes in multilayer medium with perfect and imperfect contacts and varying heat 09 p1471 A66-20831

Current-controlled negative-resistance effect between nonsymmetrical ohmic contacts on opposite side of p-type indium antimonide 10 p1585 A66-22081

Negative resistance and oscillation generation in current voltage characteristics of indium antimonide point contacts connected with oxide layers on crystal surface 11 p1661 A66-22275

Surface roughness effect on boundary friction for various loads, speeds and lubricants [ASLE PREPRINT 65 AM 6AZ]

13 p2085 A66-25367

Heat transfer through contact zone of two solids which are joined 13 p2209 A66-25445

Analog computation of contact thermal resistances for two joined materials and interstitial gas 13 p2209 A66-25477

Contact bouncing in protective gas relays measured in circuit with inductive and real load 13 p2031 A66-25484

Thermal contact resistance between smooth rigid isothermal planes separated by elastically deformed smooth spheres [AIAA PAPER 66-461] 16 p2814 A66-30604

Contact resistance of sliding contact over thin film as affected by material, pressure and contact area 16 p2662 A66-30963

Effect of temperature, pressure and initial wall treatment on thermal resistance at stainless steel-liquid metal interface 17 p3036 A66-32845

Heat flux dependence and directional effect of thermal contact resistance for interface between dissimilar metals 22 p4000 A66-40921

Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 01 p0096 A66-10754

Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 14 p2326 A66-27853

Wettability determination and detection of organic contaminants of surface 17 p2870 A66-32206

Space simulation chamber determination of contamination causes and effects 22 p3892 A66-40238

**CONTAMINATION**

SA DECONTAMINATION

SA FUEL CONTAMINATION

SA RADIOACTIVE CONTAMINATION

SA SPACECRAFT CONTAMINATION

Contamination of carbonaceous chondrites by ordinary viable microorganisms, isolating three types of bacteria on various meteorites 03 p0325 A66-13339

LOX-compatible packaging films for maintaining cleanliness of supercleaned components 17 p2943 A66-32203

Contamination control methods used in Royal Swedish Air Force, presenting special particle counting and patch test methods in hydraulic oils 17 p2870 A66-32204

R and D clean room complex design for guidance and control systems, noting contamination control, maintenance procedures, cost factors, etc 17 p2903 A66-32209

Liquid nitrogen-cooled shield against oil vapor contamination of proton accelerator in vacuum chamber 19 p3281 A66-35814

Moisture contamination and associated water band absorption spectra recorded by balloon-borne spectrometer 20 p3554 A66-38206

Aircraft hydraulic system contamination control program under clean as you go principle 22 p3851 A66-40043

Thermal control surface contamination due to rocket exhaust plumes and effects on solar absorptance and IR emittance of protective coatings 22 p3891 A66-40231

LOX characteristics for on board breathing equipment including contaminants noxious to people, clogging of equipment, explosiveness and possible use of contaminated LOX 22 p3858 A66-40504

Gas chromatography analysis of ambient gas and vapor effects on semiconductor and solid state devices at low temperatures 24 p4179 A66-42095

Projectile-borne and gaseous impurity effects on spectroscopic turbulence and velocity measurements at reentry simulating range 24 p4190 A66-42184

**CONTINUITY EQUATION**

Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 01 p0062 A66-10752

Ionospheric plasma diffusion, noting electric field effect in derived equation of continuity for F region 08 p1215 A66-19206

Hollow-cylinder experiments with superconducting transition taking place while cylinders are rotating 09 p1418 A66-20040

Measurement of magnetic field produced by rotating singly and multiply-connected superconductors, formulating macroscopic electrodynamics of rotating body at low angular velocities 09 p1418 A66-20041

Solid rotating mercury cylinder, reversibly obeying London equation when cooled through superconducting transition, at given angular velocity 09 p1419 A66-20042

Coordinate systems describing portions of Friedman world and adjacent empty regions do not satisfy Liechnerovitch continuity conditions 09 p1403 A66-20595

Analytical continuation and first-order stability of short-period orbits originating at equilateral center of libration in Sun-Jupiter system 13 p2048 A66-25308

Design of composite structures of minimum weight, using flat-bottomed cylindrical tank, noting continuity condition of radial bending moment of plate and shell 14 p2395 A66-27174

Solution of continuity equation for electrons leads to high loss rate in prenoon maximum of electron density in F-2 layer 14 p2283 A66-27397

Stationary distribution of ozone density with height in presence of long waves in atmosphere, solving continuity equation for ozone and considering photochemical processes 14 p2285 A66-27851

Fluid dynamics equations of state, motion, continuity and energy stress-strain relationship and shearing stress deformations 18 p3098 A66-34120

Optimum field thicknesses of radiation-resistant drift-field solar cells obtained by continuity equation 20 p3500 A66-37492

Viscosity distribution within Moon analyzed, using Navier-Stokes and continuity equations, abnormal inertia moment explained, maria and continent distribution examined for understanding internal state of Moon 20 p3656 A66-38030

Coordinate systems describing portions of Friedman world and adjacent empty regions do not satisfy Liechnerovitch continuity conditions 20 p3603 A66-38129

Character of continuity of solutions to second-order linear elliptic equations with many independent variables 20 p3592 A66-38421

Constitutive equations for nonlinear elastic solid-linear viscous fluid mixture and for mixture of two nonlinear elastic solids 22 p3898 A66-40140

Error correction in Vlasov equations of continuity of deformations in curvilinear coordinates 22 p3948 A66-40374

Variational principles for viscous, incompressible hydromagnetic equations of flow including continuity equation, motion equations, etc 23 p4099 A66-41123

Numerical solution of continuity equation for transient compressible flow in closed vessel 24 p4193 A66-42135

Approximate steady state solutions of continuity equation containing effects of

diffusion, drift and recombination for carrier diffusion region of forward-biased p-n junction over wide range of injection 24 p4249 A66-42225

**CONTINUOUS FLOW SYSTEM**

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 05 p0774 A66-15036

Continuous flow, solid state electrochemical device for simultaneous carbon dioxide removal and oxygen generation [AICE PREPRINT 47E] 17 p2867 A66-32675

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 18 p3257 A66-34594

Continuous pneumatic mixing of liquid and solid propellant ingredients into composite type propellant 22 p3968 A66-39869

**CONTINUOUS FUNCTION**

Decomposition theory of continuous submartingales 01 p0094 A66-10728

Discrete-point series representation of continuous function 02 p0251 A66-12150

Optimal control problems considering arbitrary piecewise-continuous function with finite number of discontinuities of first kind 02 p0209 A66-12176

Continuous periodic functions approximation by Fejer and arithmetic means 03 p0388 A66-12712

Class of periodic functions for which given method of summation gives trigonometric approximation of optimal order 03 p0388 A66-12713

Algorithm determining best approximation in Chebyshev sense of continuous function on segment 04 p0540 A66-14168

Approximation of continuous function by typical mean of Fourier series 05 p0709 A66-15357

Complex variable functions, discussing boundary properties for holomorphic continuous unit disk with constant absolute value on boundary 06 p0901 A66-16007

Isoperimetric problems of controlled systems of continuous functions solved, using Lure canonical transformations 07 p1012 A66-17376

Continuation of certain classes of differentiable functions beyond limits of region 07 p1060 A66-18465

Approximation of continuous and differentiable functions by algebraic polynomials on closed interval 10 p1551 A66-21976

Linear ODEs in canonical form with after-effect in functional space of continuous functions 11 p1676 A66-22644

Linear approximation method for continuous periodic functions based on theorems concerning relation between triangular matrix and continuity modulus of subset of functions 11 p1724 A66-23365

Automatic control system relay represented by means of limit toward which continuous function tends when chosen parameter increases indefinitely 12 p1848 A66-24029

Ionospheric sounding using random diffusion of electromagnetic wave by ionospheric plasma with continuous wave through two separate antennas 16 p2653 A66-30953

Approximation of continuous and differentiable functions by algebraic polynomials on closed interval 19 p3390 A66-36186

Optimal control and dynamics of class of hybrid state continuous time systems described by differential equations combined with multistable element 19 p3337 A66-36734

Continuous system replacement by lumped parameter models, considering undamped flexural vibrations of beam systems, particularly free vibrations 21 p3825 A66-38581

Finite realization extrema of continuous time stationary stochastic processes 23 p4085 A66-41535

**CONTINUOUS NOISE**

S IMPULSE NOISE

CONTINUOUS WAVE

SA MODULATED CONTINUOUS WAVE

Planetary radar system at Venus site of NASA Deep Space Instrumentation Facility for space communications, noting continuous-wave transmitters and receivers 04 p0478 A66-13602

High power Brewster window laser with gas fills, discussing power output and efficiency parameters 04 p0531 A66-13983

Continuous recording of CW transmission frequency M.S.F. Rugby permits study of effects of traveling ionospheric disturbances on phase height of reflection levels of both magnetotonic components 04 p0488 A66-14379

Trimming microcircuit elements like evaporated thin-film and silk-screened cermet-film resistors attempted with CW and pulsed lasers 05 p0692 A66-14562

Transistor CW amplifier delivering 14 watts into 15-ohm load over frequency band from 46 to 90 mc for use with FM optical modulator 05 p0649 A66-15177

Pumping power formula for determining characteristics of continuous wave and pulsed lasers 06 p0889 A66-15900

Intensity fluctuations in output of four-level CW laser oscillators by linearized rate equations 07 p1047 A66-18434

Data pulsed transmission over electron-injection laser communication system, using continuous waves 09 p1385 A66-19934

Output power of CW laser measured by wire bolometer in form of plane single-layer spiral as sensitive element 09 p1381 A66-20364

Integrated field intensity of atmospherics analysis compared to continuous wave method for data acquisition for radio systems design 10 p1496 A66-21073

Optical second harmonic generation in focus of lowest transverse mode of continuous wave Gaussian gas laser beam 10 p1541 A66-21175

CW laser action on triple state phosphorus-sulfur transition, using hydrogen sulfide-noble gas mixtures 10 p1543 A66-21577

Short-pulse scattering by simple geometric shapes useful for heuristic models of electromagnetic scattering, illustrating creeping-wave return 10 p1500 A66-21618

CW bistatic radar design with arrival direction, distance and Doppler measurements obtained from phase comparisons and used in ionospheric wind determination from meteor trails 10 p1501 A66-21626

Floating zone technique for preparing high purity GaAs crystals for CW microwave devices 10 p1516 A66-22099

High cut-off frequency epitaxial gallium arsenide varactors generating continuous wave power when biased in avalanche region, showing dimensions, resistivities, etc 10 p1516 A66-22103

Electromagnetic propagation into cavity formed by two parallel walls, for case of continuous wave impinging perpendicularly 11 p1653 A66-22558

Current-voltage characteristics of CW X-band GaAs microwave Gunn generator 11 p1713 A66-23029

Matched filter for frequency modulated continuous wave radar signal processing system 11 p1669 A66-23110

Spurious sideband power levels for linear FM carriers encountered in FM-CW and FM pulsed radars 11 p1658 A66-23482

Continuous wave measurement of optical nonlinearity of ammonium dihydrogen phosphate, using helium-neon laser 12 p1912 A66-23716

Bulk germanium arsenide operating simultaneously as microwave amplifier, mixer and oscillator under continuous wave conditions 12 p1835 A66-24144

Radar maps of Moon and planets using bistatic continuous wave mode of radar operation between orbiting spacecraft and ground station 12 p1825 A66-24891

Radar observation of Sun, noting continuous wave transmitter, antenna, etc 13 p2022 A66-25537

Performance of two-photon laser operating in continuous wave mode, deriving formula for pulse frequency 14 p2310 A66-28166

Pulsed toroidal excitation of gas ion lasers extended to drive high power CW laser

transitions in Ar, Kr, Cl and Br, noting operating parameters and power output 15 p2513 A66-28877

CW IR laser oscillation in atomic Cl in HCl and HI gas discharges, noting use of two power supplies and energy level diagram 15 p2513 A66-28880

Receiver noise factor, discussing CW and dispersed signal source measurement techniques 16 p2649 A66-30549

Continuous wave oscillations in n-type GaAs due to voltage controlled negative conductance 17 p2983 A66-33107

High power continuous wave four-level solid neodymium glass laser showing length and host loss as dominant factors in limiting output power 17 p2937 A66-33334

Solid state CW optically pumped microwave maser, using divalent thulium doped calcium fluoride 18 p3117 A66-33614

First-and second-order sidebands due to strong CW signal intermodulation effect in 3.39 mu He-Ne laser 18 p3117 A66-33615

Continuous wave power ratings of strip transmission lines, noting temperature profile parameters, power limit curves, etc 18 p3077 A66-34062

Output power of CW laser measured by wire bolometer in form of plane single-layer spiral as sensitive element 19 p3353 A66-35321

Phase comparison telemetry consisting of passive VHF receivers and CW transmitters for satellite detection 19 p3301 A66-35692

Ionospheric absorption measurement by A3 method in which field strength of distant CW transmitter is continuously recorded 19 p3351 A66-36359

Overlay transistor used for continuous microwave power output of 6.5 watts at 1 gigacycle and over 1 watt at 2 gigacycles 20 p3524 A66-36898

Continuous wave gas laser as light source in scattered light static photoelasticity 20 p3577 A66-37443

Continuous wave UV ionized gas laser emission over four transitions in neon, krypton and argon 20 p3579 A66-37771

Self-induced divergence of continuous wave He-Ne laser beams when traversing transparent liquid, noting nonlinear effect in propagation of light 21 p3748 A66-39164

Continuous wave ultrasonic piezoelectric amplifiers at gigacycle frequencies, noting desirability of high velocity sound in active medium and unimportance of high mobility 21 p3713 A66-39467

Coupling of two avalanche diode oscillators to obtain increased continuous wave microwave power output 22 p3877 A66-40180

Frequency tuning of coherent emission over vibronic continuum of phonon-terminated optical masers by thermal tuning and wavelength-selective feedback 23 p4077 A66-41369

Competition, hysteresis and reactive Q-switching in carbon dioxide lasers at 10.6 microns, using moving mirror technique 23 p4079 A66-41631

10.6 micron output of carbon dioxide-He laser modulated, using Bragg diffraction from longitudinal acoustic waves in Te 24 p4219 A66-42251

Mode selection, relaxation oscillations, mode interaction and thermal effects in room temperature CW lasers in ellipsoidal pumping systems 24 p4221 A66-42546

Linearized population rate equations and quantum noise sources used to calculate spectra of intrinsic second moment intensity fluctuations in 3-and 4-level CW laser oscillators 24 p4221 A66-42548

Crystalline solid lasers, considering rare Earth and transition metal impurities and host materials, noting CW laser characteristics 24 p4224 A66-42799

Gas-discharge CW lasers, particularly He-Ne, carbon dioxide, argon-ion and pulsed self-terminating lasers, discussing classification, power output and gain, Doppler width, coherence and noise 24 p4224 A66-42801

**CONTINUOUS WAVE /CW/ RADAR**

CW-equivalent radar cross section measurements of reflectivity of body by short pulses 03 p0332 A66-12429

Linear homodyne mixer used to eliminate interference and extract range information

in CW radars 06 p0833 A66-16644

Satellite ionization effects, CW-reflection and pulse radar techniques in 10 to 20 mc frequency range 08 p1181 A66-18749

High resolution X-band FM/CW radar for radar cross section measurements 10 p1500 A66-21620

CW microwave oscillation in bulk GaAs, discussing harmonic content, linewidth, circuit and electronic tunability, etc 10 p1585 A66-22077

Metal wall ionized argon lasers, discussing use of water-cooled quartz discharge channels, CW lasers, development of satisfactory metal, etc 13 p2091 A66-25555

1964 results of high resolution CW radar spectral studies of Venus at NASA/JPL Deep Space Instrumentation Facility at Goldstone, California 13 p2185 A66-25812

Digital-mode FM CW laser ranging and tracking system using compound axis servomechanism 13 p2024 A66-25982

Correlations and intensity fluctuations in light from individual lasing and nonlasing modes of CW GaAs laser and threshold noise change in laser emission 13 p2102 A66-26210

Resolution of multiple target ambiguities in twin-channel frequency-modulated continuous wave radar system using fixed antenna 20 p3596 A66-37218

Coherent CW superheterodyne radar system for studying backscattering from hypersonic velocity projectile wakes 24 p4191 A66-42196

**CONTINUUM**

Small-amplitude wave propagation in incompletely ionized plasma, based on continuum theory 19 p3406 A66-35465

**CONTINUUM FLOW**

Transition regime mass flow rate and longitudinal pressure distribution along short tube with bellmouth entry 08 p1207 A66-19131

Transition from near free molecular flow at leading edge of flat plate in rarefied hypersonic flow to continuum boundary layer flow downstream 11 p1633 A66-22925

Estimates of expected relative magnitudes of convective and radiative heat transfer at stagnation point of blunt body for superorbital speeds and altitudes with continuum flow 13 p1989 A66-25154

MHD theory and experiment 13 p2156 A66-26706

Argon flow through long tube compared with Weber theoretical model, applying classical continuum equations 14 p2274 A66-27444

Mathematical model for heterogeneous continua, discussing kinematical definitions, conservation principles, thermodynamics 15 p2478 A66-29250

Low Reynolds number flow past sphere for cases involving density and temperature variations, noting compressibility, transport properties and viscous dissipation 15 p2425 A66-29740

Electro-magnetoplasma gas dynamics /EMPGD/ equations based on single fluid continuum-theory macroscopic plasma-dynamics theory 24 p4244 A66-42834

**CONTINUUM MECHANICS**

**SA DYNAMICS**

**SA FLUID MECHANICS**

**SA STATISTICAL MECHANICS**

Nonlinear elastic-plastic theory and multipolar continuum mechanics 01 p0154 A66-10482

Calculation method for natural bending pulsations of continuous medium extended to case of torsion pulsations 01 p0154 A66-10643

Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 01 p0106 A66-10656

General theory for construction of constitutive equations describing purely mechanical properties of continuous media with tensor and group theoretic concepts 01 p0106 A66-10717

Detailed account of dislocation loops according to continuum theory 04 p0590 A66-14164

Dynamic reciprocal theorem for sinusoidal oscillation of elastic medium treated as extension of static reciprocal theorem of

Betti and Rayleigh, using continuum mechanics  
[ASME PAPER 65-WA/MD-21]

05 p0779 A66-15524

Elasto-plastic matrix displacement analysis of arbitrary three-dimensional continuum under strain hardening 06 p0963 A66-16464

Heat capacity and thermal conductivity related to elastic-mechanical macroscopic physical properties, using invariance properties of tensors 06 p0971 A66-16616

Generalized theory of physical quantities in scalar and vector form in moving reference regions 08 p1211 A66-19730

Monograph on continuum mechanics principles including thermal, chemical and electrical effects 10 p1556 A66-22064

Displacement bound theorems for work hardening continua subjected to impulsive loading in inelastic continua 11 p1781 A66-22610

Kinetic theory of leading edge of plate interacting with streaming gas evaluated by Bhatnagar-Gross-Krook equation of statistical mechanics 11 p1633 A66-22924

Thermodynamics of irreversible processes applied to continuum mechanics, deriving classical rheological equations 12 p1976 A66-23546

Thermodynamics of deformation, discussing Coleman theorem 12 p1976 A66-23547

Properties of continuum determined experimentally, noting deformed shapes, displacement, strains, stresses, etc, taking advantage of grid, moire, photoelasticity and other methods 12 p1957 A66-23628

Relating general theory of elastic-plastic continuum, valid for nonisothermal deformations and explicit thermodynamic restrictions, to Drucker postulate 12 p1959 A66-23862

Uniqueness theorem for dynamically loaded rigid-plastic and rigid-viscoplastic idealizations of deformable bodies 12 p1962 A66-23999

Pulse energy tensor and internal macroscopic interactions in gravitational field and in material media 12 p1914 A66-24008

Zhukovskii and Lagally theorems for arbitrary fluid motion derivable from momentum equations of continuous medium 13 p2067 A66-26533

Fibrous continuum media theory, discussing geometrical properties, stress state, motion equations, boundary value problems, etc 14 p2397 A66-27383

Solution for free nonstationary convection in bounded region of Landau-Lifshits mechanics of continuous media 14 p2414 A66-28282

Classical analytical mechanics applied to mechanics of continua, noting relation between kinetic-stress functions and Ostrogradskii-Hamilton principle and stress tensor and finite deformation tensor 15 p2539 A66-29148

Oscillatory component in solar granulation continuum brightness fluctuations, secondary maxima in temporal autocorrelation functions and power spectra 17 p2996 A66-31920

Geometrical and kinematical conditions of compatibility associated with moving discontinuities in material media 17 p3032 A66-33501

Nonlinear material with memory defined by constitutive functional, examining fading memory theory 19 p3438 A66-35484

Weierstrass necessary condition and basic equations for optimal control of initial or boundary states of continuum mechanical MHD and hypersonic partial differential systems 20 p3535 A66-36853

Continuous media model theory and comparison with theory of many-dimensional non-Euclidean manifolds, noting kinematic characteristics of particle deformation, variational principles, thermodynamic equation, etc 21 p3756 A66-38627

Thermodynamics of irreversible processes methods applied to stress-strain relations of single-phase nonelastic continuous medium 21 p3830 A66-38986

Balance equations for heterogeneous continua - substances consisting of many distinct, possibly interacting constituents derived from classical continuum physics viewpoint 21 p3772 A66-39348

Thermoelastic wave equations in continuum mechanics model of laser-induced fracture in transparent media in terms of laser beam energy absorption 22 p3931 A66-40089

Large amplitude oscillations of cylindrical and prismatic bodies resulting from generalized shear deformation in longitudinal direction 22 p3990 A66-40141

Linear theory of micropolar elasticity, noting all components of asymmetric stress tensor are determined and motion of media is fully described when deformation and microrotation vectors are known 22 p3995 A66-40566

Continuum mechanical Cartesian tensor analysis theorem on completeness of Beltrami stress function 23 p4139 A66-41544

Energy, linear and angular momentum conservation principles for elastic body with finite number of defects 23 p4091 A66-41855

Design of models of continuum media for research in plasma physics, aerodynamics, polymeric structures, motion, creep, etc 23 p4096 A66-41935

Coupled ODE sets describing continuum wave propagation in discrete structures with and without dispersion or linearity 23 p4096 A66-41939

Thermodynamics problems when applied to continuum mechanics deformations, noting Onsager theory 23 p4096 A66-41942

Deformation theory of classical continuum in four-dimensional representation, particularly in time derivatives 23 p4144 A66-41972

Generalized strain and transition concepts for elastic-plastic deformation creep and relaxation 23 p4144 A66-41973

CONTINUUM RADIATION  
Continuous operation of gallium arsenide injection laser cooled by helium gas flow 01 p0084 A66-11190

Continuum emission from Venus, Mars, Jupiter and Saturn at 21.2 cm wavelength, measuring brightness temperature to determine source of radiation solar activity effects 11 p1776 A66-23491

Continuous operation of gallium arsenide injection laser cooled by helium gas flow 12 p1890 A66-24011

Spatial cross-correlation analyses between radial velocity and continuum brightness fluctuations of solar disk center spectrograms 17 p2996 A66-31919

Total continuum radiation from high temperature air and components for wavelength greater than 2000 angstroms, based on radiation measurements from constricted arc at atmospheric pressure 18 p3140 A66-34587

Linear polarization of continuum emission from galaxy and discrete sources, detection in radio astronomy, noting relevant synchrotron theories 21 p3815 A66-39488

XUV C, Ti, Mn, Fe, Ni, Cu, Zn and Ar line spectra and continuum radiation spectra in plasmas produced by focused ruby laser beam 22 p3954 A66-39812

CONTOUR  
Point-to-point contouring systems noting procedures, codes and cost savings [ASTME PREPRINT MS66-725] 12 p1887 A66-24423

Polynomials orthogonal with respect to contours, examining analytic function representation via Fourier series expansion of such polynomials 16 p2738 A66-31409

CONTRACT  
Alternative method of determining incentive fee schedule for government contracts, based on linear programming and system reliability 12 p1888 A66-24669

Combining R and D and follow-on production in single contract 14 p2417 A66-28434

Total value concepts applied in system effectiveness analysis are helping Contract Definition type contracts meet cost effectiveness requirements 18 p3268 A66-34251

CONTRACTION  
Length of two-dimensional contractions in terms of flow uniformity 18 p3098 A66-33952

Contraction to improve isotropy of grid-generated turbulence 22 p3899 A66-40381

CONTRACTOR  
Contractor performance on cost type contracts evaluated by comparing actual and allocated costs, using NASA PERT facilities 08 p1322 A66-19460

Relationship between military and contractors in aircraft development, noting adherence to military specifications, costs, weapons, etc 14 p2416 A66-27812

Optimal support costs of weapon systems requires contractor selection based on high order of management capability 20 p3682 A66-37238

Contractor performance evaluation program and relation to weapon system effectiveness 20 p3571 A66-37940

Control circuit of image converter tube 01 p0071 A66-11041  
Fluid state analog-computation technology and process control computation systems [ASME PAPER 65-WA/PID-11] 05 p0624 A66-15637

Circuits for variable impedance control at centimeter-wave frequencies, using varactor semiconductors and dephasing ferrites in waveguide 07 p1002 A66-17828  
Nonlinear differential equation analysis of motion stability of plant with automatic control device 07 p1080 A66-17858

Motor controllers for DC current supply must be inverters of constant or variable frequency 08 p1168 A66-19299  
Control system of supersonic combustion, using spectral intensity ratio, monitoring combustion chamber in two wavelength regions 10 p1622 A66-21948

Control circuit of image converter tube 11 p1708 A66-23287  
Book on automatic control of linear and nonlinear systems, particularly aircraft utilization 16 p2744 A66-31058

Brake force acting on piston of constant-speed controller with fluid friction 21 p3698 A66-39330  
Comparison of Czechoslovakian human engineering standards for control pushbuttons with U.S. 22 p3859 A66-40861

High-power nanosecond commutator for control of spark chambers, laser shutters, etc 22 p3933 A66-40945

Analog and digital controls used in electron beam welding and metal working machinery including electron beam milling machine 24 p4217 A66-42345

Control PANEL

Human factors in control/indicator panel design of ground support equipment [ASME PAPER 65-WA/HUF-16] 05 p0628 A66-15696

Long-range navigation system control/display concepts and automation for airline navigation 07 p1074 A66-17779

Cockpit flight instrument display in integrated navigation system for SST, stressing smooth transition in handling from enroute navigation to terminal-area and approach procedures 07 p1078 A66-17810

Experimental testing effectiveness of sensor lines showing linkages between displays and controls 12 p1808 A66-23924

CONTROL SIMULATOR

SA COMPUTER

SA FLIGHT SIMULATOR

Mission simulation techniques for training Gemini flight controllers 02 p0186 A66-11802

Navigator sighting accuracy in midcourse guidance system for manned space flight, using simulated vehicle mounted space sextant 03 p0390 A66-12740

Navigation and control simulation portion of overall manned space cabin test program [AIAA PAPER 65-277] 03 p0328 A66-12776

Closed loop hydraulic servo system simulating flight stresses on motor case of solid propellant rocket motor in static firing test stand for calibrating stand 03 p0353 A66-13218

Simulation study of human performance in manual control tasks in orbital rendezvous and lunar landing 06 p0818 A66-16245

Manual guidance and control simulation for reentry vehicle flight and landing 08 p1203 A66-19533

Added pilot work load imposed by additional commands in compensatory display reduces tracking performance in control of simulated terrain-following aircraft 12 p1808 A66-23922

Electronic predictor instruments for dynamic control and simulation and possible application to lunar spaceship 13 p2048 A66-25896

Mechanical prediction display to improve human behavior in control system 21 p3700 A66-38454

Optimization of VTOL control concepts with and without stabilization compared with six degree of freedom motion simulator, noting system failure effects and

nonlinear concepts [ICAS PAPER 66-9] 22 p3851 A66-40675

CONTROL STABILITY

Best stabilizing control for linear system under given class of perturbations 01 p0050 A66-10354

Condition of existence of universal best stabilizing control in second order control system 01 p0050 A66-10355

Stability of control systems with tachometric feedback 01 p0067 A66-10455

Stability of automatic control system with variable structure studied for application to stabilization of linear objects whose parameters vary quite rapidly within wide limits 02 p0207 A66-11312

Frequency criteria of absolute stability of nonlinear control systems with periodically varying parameters 02 p0207 A66-11847

Stability limit on forward gain in control systems with small time delay by approximating exponential in characteristic equation 02 p0207 A66-11877

Generalizing Tsytkin stability criterion for class of time-varying nonlinear sampled data feedback systems 03 p0348 A66-12668

Current trends in nonlinear control theory 03 p0349 A66-12701

Axiomatic approach to control system theory as generalization of dynamic systems, noting weak and strong stability and Liapunov function 03 p0351 A66-13255

General dynamical system defined by contingent equation giving existence and uniqueness theorems 03 p0389 A66-13256

Stability regions of optimized modulated sample-data system determined from parametric fluctuation analysis 04 p0504 A66-13975

Relative stability of linear feedback systems noting Hurwitz, Nyquist and Mikhailov stability criteria 05 p0707 A66-14623

Limited transients for certain single-loop systems containing nonlinear amplifier and linear system 05 p0656 A66-14727

Book on structural synthesis of high-accuracy automatic control systems with large stable amplification 05 p0657 A66-15086

Boundaries of stability sector of nonlinear controlled systems with delay, deriving criterion for designing maximum boundaries 05 p0657 A66-15114

Boundedness of solutions of nonlinear functional equations for stability of feedback and electrical systems 05 p0658 A66-15182

Control mechanisms in nonlinear steady flow forces of hydraulic valves [ASME PAPER 65-WA/AUT-20] 05 p0624 A66-15616

Fundamental Theorem of Stability for systematic determination of practical stability regions for nonlinear systems [ASME PAPER 65-WA/AUT-19] 05 p0659 A66-15617

Split-path nonlinear filter /span filter/ for independent gain and phase to achieve control system compensation [ASME PAPER 65-WA/AUT-4] 05 p0659 A66-15705

Nonlinear automatic control system, discussing optimum tuning via parametric stability region construction 06 p0863 A66-16528

Automatic relay systems, describing self-oscillation induced parameter variation 06 p0863 A66-16530

Frequency condition of absolute stability of controlled systems with hysteresis nonlinearities of backlash type derived based on matrix inequalities 07 p1012 A66-17375

Principle of stabilization systems design based on sequential reduction of dimensionality of phase plane of controlled variable and derivatives 07 p1013 A66-17427

Stabilization of steady motions of nonlinear controlled system in critical case of pair of purely imaginary root 07 p1016 A66-18185

Sufficient conditions for stabilization of motion of nonstationary controlled system 07 p1016 A66-18186

Practical determination of stability region of equilibrium point of second-order nonlinear recurrence with real variables 08 p1255 A66-18639

Phase-advance stabilization of servocontrol

systems by use of limiters controlled by error signal 08 p1199 A66-18671

Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 08 p1201 A66-19684

Stability criteria in tuned transistor amplifiers treated by feedback system theory 10 p1510 A66-21652

Absolute stability of automatic control system with allowances for external load of hydraulic servomotor 11 p1674 A66-22358

Mikhailov criterion for stability and oscillation of linear sampled data systems 11 p1674 A66-22362

Mathematical stabilization theory for dynamic systems from Liapunov motion stability theory and theory of games 11 p1736 A66-22639

Model of spectrotron with external feedback in dynamic behavior analysis, considering control pulse and transient process 11 p1677 A66-22761

Stability definitions for generalized control systems 11 p1681 A66-23450

Existence of Liapunov functions for problem of Lure with removal of complete controllability and observability 11 p1681 A66-23451

Nonlinear control systems consisting of single-loop negative feedback circuit with one isolated instantaneous type nonlinear element 12 p1850 A66-24258

Liapunov second method applied to stability of general second order bang-bang control systems 12 p1850 A66-24259

Stability and transient characteristics in single channel sinusoidal perturbation adaptive system 12 p1853 A66-24336

Generalization of parameter plane method for case when characteristic equation coefficients are nonlinear functions of system of adjustable parameters 12 p1855 A66-24642

Absolute and relative stability of linear control systems containing transport or distributed lag 12 p1855 A66-24643

Four new theorems on absolute stability of nonautonomous nonlinear control system with strongly bounded or monotonically bounded input 12 p1856 A66-24653

Automatic control system stability reserve using amplitude phase criteria with respect to modulus and phase 13 p2049 A66-26055

Stability of phase-locked loops using Fokker-Planck equation and under additive stationary white Gaussian noise linearized about some equilibrium point 13 p2025 A66-26075

Dual input describing function /DIBF/ of two-state relay with hysteresis 14 p2265 A66-27481

Stability of nonlinear control systems, noting Hermitian matrix for linear system of ordinary differential equations and analogous problem for difference equations 15 p2525 A66-28513

Dissipative gyroscopic force effects on mechanical system, noting necessary and sufficient conditions for stability and controllability 15 p2537 A66-28949

Control system stability under external forces discussing Liapunov function construction, transfer functions and matrix analysis, frequency conditions of absolute stability, etc 15 p2470 A66-29147

Self-oscillations and stability of model reference adaptive systems with constant plant parameters and control response 15 p2476 A66-29991

Stability of control systems with distributed parameters and hysteresis-curve-type nonlinearity for various critical cases of system characteristic equation 16 p2668 A66-30750

Nonlinear automatic control system, discussing optimum tuning via parametric stability region construction 16 p2670 A66-30838

Formulation and proof of theorem and lemma defining conditions of absolute stability for specified new class of control systems 17 p2901 A66-32252

Sufficient conditions for absolute stability of servosystem with backlash, taking into account plant inertia and hypothesis of absolutely inelastic collisions 17 p2901 A66-32258

Nonstationary automatic control systems design by reaction quenching method 17 p2902 A66-32580  
Dynamics of self-adaptive systems with stabilized frequency characteristics 18 p3089 A66-33735  
Attenuation factor and degree of stability of automatic control systems determined by Mikhailov criterion and Chebyshev polynomials 18 p3091 A66-34670  
Stability analysis of automatic control systems with random parameters, applying Mikhailov criterion 18 p3092 A66-34996  
Absolute stability criteria of control system with one nonlinear element, using Liapunov functions 18 p3092 A66-35016  
Stability, reproducibility and sensitivity of combined systems of automatic control with variable structure determined by presence of sliding mode region 19 p3329 A66-36025  
Stability and sensitivity of terminal linear feedback control systems 19 p3334 A66-36668  
Distributed parameter systems in discrete-time models compared with response obtained by approximating transcendental transfer function with root factor and other approximations 19 p3322 A66-36683  
Stability problems in randomly excited dynamic systems, discussing partial differential equations governing evolution of conditional probabilities and expectations 19 p3471 A66-36718  
Stability and quality of automatic control of plant with pure time delay, using regulator with constant and switching parameters 20 p3537 A66-36894  
Sufficient conditions for equilibrium stability of mixed distributed and lumped parameter feedback control system in parabolic PDE form 21 p3718 A66-38666  
Popov criterion application in determining stability of linear time-invariant systems with nonlinear feedback, using root locus 21 p3718 A66-38667  
Stability of automatic control systems with nonlinearity and nonunique equilibrium state 23 p4048 A66-40967  
Stability analysis of inertial guidance platform control system with saturation and Coulomb friction nonlinearities, using Liapunov method 23 p4089 A66-41319  
Bang-bang principle in problem of epsilon-stabilization of linear control systems extended to systems of arbitrary dimension 23 p4051 A66-41874  
Generalized Popov criterion for stability of control system with arbitrary number of memoryless nonlinearities 24 p4187 A66-42130  
Thermistor temperature sensing bridge for precision temperature control of liquid volume 24 p4214 A66-43033

## CONTROL SURFACE

SA AILERON  
SA ELEVATOR  
SA FIN  
SA STABILIZER

Response of hypersonic aircraft to abrupt control displacements, determining vehicle characteristics, design and operational parameters 09 p1330 A66-20739  
Motion equations for dynamics of aircraft control surface controlled by autopilot 14 p2328 A66-27687  
Rolling friction studies of intermetallic and zirconium oxide for control surface bearings for space reentry vehicle [ASLE PAPER 66AM 5D4] 16 p2712 A66-30413

Near UV effects on thermal control surfaces at cryogenic temperature 17 p3035 A66-32749  
Linearized motion equations for low-altitude flight pitching stability of aircraft with control surface 21 p3696 A66-38937  
Thermal control surface contamination due to rocket exhaust plumes and effects on solar absorptance and IR emittance of protective coatings 22 p3891 A66-40231  
Fluid venting effects on thermal control surfaces studied, using vacuum chamber for thermal environment simulation 22 p3891 A66-40236  
Fundamental modes of nonservo-assisted aircraft control surface 24 p4159 A66-42344

## CONTROL SYSTEM

SA ADAPTIVE CONTROL SYSTEM  
SA BIOCONTROL SYSTEM  
SA DATA CONTROL SYSTEM

## SA FEEDBACK CONTROL SYSTEM

Hydraulic gear motor and gear backlash effects on stability of hydraulic control system 01 p0014 A66-10282  
Control systems to avoid detuning effects caused by plasma in resonant cavity experiments on plasma acceleration and confinement in HF fields 01 p0040 A66-10546  
Redundancy techniques for flight control systems applied to tactical military aircraft, noting monitorless channel output selection, failures, etc 01 p0103 A66-10666  
XB-70 vehicle control system sensing, local force application, coupling and adaptability for increasing structural mode damping ratio, thus avoiding disturbing pilot accelerations and structural loads 01 p0103 A66-10672  
Difficulties in control system synthesis for launch vehicles exhibiting severe mode interaction 01 p0104 A66-10673  
Progress in constant speed drive generating systems and control equipment for constant frequency aircraft electric systems [SAE PAPER 650827] 01 p0016 A66-10827  
Turbulence amplifier system noting principles and application 02 p0180 A66-11963  
Book on systems engineering problems and tools for solution noting energy, materials, modeling, simulation, computers, control, statistics, signals, etc 02 p0307 A66-12280  
Comparison of feedback arrangements using pneumatic amplifiers for static accuracy and dynamic performance improvements of control systems 03 p0323 A66-12374  
Digital computer simulation for control system design including electrical circuits, mechanical systems and chemical processes 03 p0337 A66-12375  
Control problems associated with stable platforms using single-axis integrating gyroscopes including axes design, drift due to vibration and compensation 03 p0390 A66-12533  
Propulsion-control systems interface for V/STOL hover control in aircraft, using lift plus lift cruise propulsion concept [AIAA PAPER 65-799] 03 p0319 A66-12564  
Design and installation of antennae for airborne command and control systems, noting antenna system for SAC Airborne Command Post [AIAA PAPER 65-730] 03 p0334 A66-12581  
Flying qualities requirements related to control system complexity noting longitudinal, lateral and directional requirements [AIAA PAPER 65-794] 03 p0320 A66-12597  
Successive approximations for variational problems in control theory including pulse amplitude and pulse width modulation, using quasi-linearization techniques 03 p0349 A66-12685  
Stability of automatic control system with nonlinear elements, obtaining quadratic equations by using Liapunov method 03 p0349 A66-12707  
Spinning satellite attitude control using interaction between Earth magnetic field and onboard current carrying coils [AIAA PAPER 64-235] 03 p0430 A66-12735  
Synthesis of time-optimal control system in presence of constraints on displacement and displacement rate of steering element 03 p0350 A66-13044  
Implementation of airborne command and control systems, emphasizing communications equipment, data processing facilities, electromagnetic compatibility and aircraft configuration parameters [AIAA PAPER 65-727] 03 p0336 A66-13049  
Control system 465L used by Strategic Air Command noting automated functions, data processing, integration of human and electronic elements, etc 04 p0507 A66-13687  
Simplest system of auto-oscillatory extremal control, examining control plant output law 04 p0502 A66-13701  
Error control systems in digital communications accomplished by adding constraints to digital alphabet through coding 04 p0481 A66-13766  
Failure probability of redundant system considering dynamic and static failures of switches and control

circuit 04 p0503 A66-13770  
Algorithms for teaching open-loop optimizing control system correct recognition of situations expressed as regions of complex configuration 04 p0503 A66-13773  
Book on state variables for control theory noting transfer functions, time domain, nonlinear system stability using Liapunov method, optimization, etc 04 p0504 A66-13836  
Centralized vibration control of vibration testing noting details of automatic equalizers, switching panel, data reduction, etc 04 p0508 A66-14446  
Magnetic torquing system controlling satellite spin rate and spin axis orientation 05 p0769 A66-14521  
Global search of performance surface to find parameters optimizing performance of learning control system, using variable structure stochastic automaton 05 p0653 A66-14598  
Frequency sensor and roving notch filter for control system, discussing parasitic signals with time-varying frequencies 05 p0645 A66-14603  
Forced oscillations in nonlinear relay type control system predicted via periodic solutions to nonlinear difference equation 05 p0654 A66-14606  
V/STOL Canadair CL-84, evaluating control and lift propulsion system 05 p0609 A66-14767  
Accessory power drive, variable sweep wing actuation, hydraulic, electric and environmental control systems of Boeing SST [ASME PAPER 65-AV-13] 05 p0611 A66-15131  
Fluidic control subsystem, describing components such as electric/fluid and position transducer, operational amplifier, fluid bellows and operation characteristics [ASME PAPER 65-WA/AUT-10] 05 p0624 A66-15609  
Mathematical and control operations, utilizing fluieric components such as jet deflection type proportional fluid amplifiers, capillary-tube resistors and tank capacitors [ASME PAPER 65-WA/PID-2] 05 p0624 A66-15679  
Manual control of vehicles considering aircraft handling, human dynamics, etc [ASME PAPER 65-WA/HUF-10] 05 p0628 A66-15697  
Common framework for automata theory and control theory 06 p0863 A66-16619  
Relative stability of self-excited nonlinear oscillations subject to small amplitude perturbation 06 p0864 A66-16737  
Upper bound on dynamic/transient and steady state/quantization error in digital control systems, using direct method of Liapunov 06 p0865 A66-16741  
Criteria for reachability of subspace by trajectories of linear control system 06 p0865 A66-16744  
Nonlinear control system, discussing method to obtain estimate of region of stable initial conditions 06 p0865 A66-16747  
Sampled data control systems using z-transform method when sampling device is followed by data hold 06 p0866 A66-16749  
Control power composition and usage characterized for VTOL aircraft flight control system design 06 p0806 A66-16812  
Flight controls of tilt wing XC-142A aircraft, noting mechanization and operation of wing and flap control system 06 p0809 A66-16815  
Method of time domain analysis of nonlinear hybrid systems with first or fractional order data extrapolation 06 p0866 A66-16963  
Sensitivity of eigenvalue to changes in matrix calculated by formula used to investigate control systems 06 p0867 A66-16976  
Traffic control for space vehicles and probable flight data requirements 07 p1140 A66-17228  
Two-stage/descent and ascent/Lunar Excursion Module control system for landing gear, ascent stage, liftoff from lunar surface, etc 07 p1140 A66-17280  
Isoperimetric problems of controlled systems of continuous functions solved, using Lure canonical transformations 07 p1012 A66-17376

Synthesizing dual control in absence of a priori information concerning unknown plant parameter 07 p1012 A66-17380

Probability characteristics of distributed parameter system subjected to parametric and additive noises, obtaining mathematical expectation and correlation function expression 07 p1014 A66-17433

Graphoanalytical calculating method of statistical characteristics of step extremal control systems under steady state operation in presence of random noise 07 p1014 A66-17434

Statistical problem of control system synthesis, discussing plant algorithm 07 p1014 A66-17438

General performance indices for time and frequency response for free motion of linear discrete control systems 07 p1016 A66-18280

Frequency stabilization of gas lasers, using atomic resonance and interferometers 07 p1045 A66-18357

Techniques for synthesis of control systems, based on Liapunov second method 08 p1200 A66-19016

Charge current control circuit for nickel-cadmium cells with control electrodes 08 p1169 A66-19506

Three-axis limit cycle operation of reaction jet attitude stabilization 08 p1304 A66-19515

Reliability of automatic control systems, considering properties of controlled plant, taking error probability in control as criterion 08 p1201 A66-19691

Improvement of transient response of third order servosystems by discrete control of system parameters, noting application of switching circuit 09 p1360 A66-19859

Dynamic programming in linear vector system and application in switching system 09 p1393 A66-19909

Higher order correlation function evaluated for shot noise statistics 09 p1342 A66-19925

Carrier circuit techniques applied to fluid amplifier control systems 09 p1332 A66-20326

Book on advances in control systems, Volume 2 09 p1362 A66-20649

VTOL control power requirements under low speed flight conditions for randomly disturbed mechanical system 09 p1330 A66-20736

Fluid control system design and principles 10 p1485 A66-21511

Necessary conditions for extremum in problems of control with aftereffect 10 p1518 A66-21975

Dynamic characteristics of linear plant determined under noise conditions, allowing for error in input-signal measurement 11 p1673 A66-22202

Optimum quantization step for given distribution law of quantized signal, using minimum error distortion criteria 11 p1674 A66-22204

Optimization of five second and third-order systems with saturating and relay controllers and with random Brownian Motion input 11 p1674 A66-22222

Ambient temperature compensation in indirectly heated thermistors with negative temperature coefficients used as control elements 11 p1661 A66-22273

Control criterion for linear system with constant matrix, discussing quadratic functionals ensuring aperiodic transient 11 p1674 A66-22351

Extension of Pontryagin maximum principle for application to optimum discrete control systems 11 p1674 A66-22355

Optimum control processes in systems containing plants with distributed parameters described by ordinary or partial differential equations with initial and boundary conditions 11 p1674 A66-22356

Forced sliding regimes in automatic control systems 11 p1675 A66-22640

Optimization of systems with stepwise control constraints, using Pontryagin maximum principle to determine special features 11 p1676 A66-22753

Transient processes and periodic motions in extremal control system with higher derivative control action 11 p1677 A66-22757

Control system design capable of automatically locating malfunctioning elements and replacements from external reserve 11 p1677 A66-22762

Design of variable structure automatic control system frequency characteristics, using harmonic linearization 11 p1677 A66-22763

Optimal control systems and numerical analysis of error effect on sensitivity 11 p1680 A66-23274

Automata theory and control theory analytically compared for general and linear systems and tolerance automata 11 p1680 A66-23275

Numerical dynamic predictor for control systems disturbed by random noise, discussing Fokker-Planck equation, Crank-Nicolson difference model, etc 11 p1680 A66-23279

Adaptation, learning and self-learning in automatic systems, discussing stochastic approximation, pattern recognition, adaptive filters, etc 11 p1680 A66-23332

Complete controllability of particular plant 11 p1682 A66-23455

NERVA reactor control systems, using limiter circuits to protect nuclear subsystem from controller malfunctions and for pressure control 12 p1912 A66-23701

Quasi-optimal minimum-time controllers for high-order dynamic systems obtained by least-squares fitting points on optimal switching surface 12 p1849 A66-24253

Quadratic performance index in designing linear multivariable control systems 12 p1849 A66-24254

State variable approach for analysis of linear multivariable system with multiple eigenvalues 12 p1849 A66-24255

Automation of control processes - International Federation on Automatic Control Congress, Basel, Switzerland, August-September 1963 12 p1850 A66-24314

Rocket equipment simulation on rocket engine test facilities, describing fuel tank design for experiment with suitable flow characteristics and parameters 12 p1829 A66-24317

Orientation control of orbital astronomical observatory examined, using dynamic model consisting of three independent subsystems, each with one degree of freedom 12 p1829 A66-24318

Control of radio telescope, noting servosystem ability to keep tracking position errors and wind-caused error within certain limits 12 p1851 A66-24319

Control system of microwave antenna positioning used in communication satellite tracking, noting servosystems, converter, Leonard drive, control panel, etc 12 p1817 A66-24320

Optimum design strategies for discrete control systems with minimal time of control 12 p1852 A66-24328

Optimum dual system design for plant investigation and regime requirements 12 p1853 A66-24331

Measuring time as dynamic characteristic of performance of self-adaptive control systems 12 p1853 A66-24333

Self-adaptive control system reflecting internal and external conditions of operation 12 p1853 A66-24334

Integrated stability augmentation circuits in AN/ASW-16 automatic flight control system 12 p1837 A66-24381

Design of control deflections and structural loads of space vehicle for flight stability through atmospheric disturbances [AIAA PAPER 66-350] 12 p1954 A66-24487

Statistical characteristics of output of nonlinear sampled data control system evaluated by two methods 12 p1855 A66-24639

Stability of pulse frequency modulated closed-loop control systems determined, using state variables which define system output and error 12 p1855 A66-24640

Manual closed-loop control systems analysis, discussing operator dynamics for permanent procedural variables 12 p1855 A66-24641

Root locus methods applied to synthesis of linear multivariable control systems for noninteraction 12 p1855 A66-24644

Circuit design for high impedance amplifier for control systems, considering input and output impedance and amplifier gain 12 p1844 A66-24731

Early bird hydrogen peroxide control

system maneuvers to place satellite into final stationary position [AIAA PAPER 66-262] 12 p1954 A66-24736

Commercial communications satellite system, impact and problems [AIAA PAPER 66-273] 12 p1981 A66-24746

Satellite communications central control support system consisting of Earth stations and satellite relays accommodating different RF power, orbits and antenna orientations [AIAA PAPER 66-287] 12 p1859 A66-24758

Parameters of satellite communication system control and scheduling function, emphasising distinction between scheduling model and scheduling algorithm [AIAA PAPER 66-288] 12 p1822 A66-24759

Limitations and reliability of human operator of control systems to process information, noting importance of endurance and sensory perception 12 p1807 A66-25012

Control problems regarding space developments, considering automation, reliability, computer role, human operator, etc 13 p2056 A66-25231

Man-machine systems for interplanetary exploration, using functional analysis techniques for system design 13 p2013 A66-25281

Harmonic linearization of logic law control systems, deriving complex equivalent transmission coefficient for nonlinear part of circuit with variable structural elements 13 p2045 A66-25299

Design of multivariable control system using signal flow graph techniques and establishing optimality criteria 13 p2045 A66-25337

Programming and control - International Conference, Air Force Academy, Colorado Springs, April 1965 13 p2046 A66-25339

General theory of optimal processes, discussing general version of maximum principle 13 p2116 A66-25342

Minimizing functionals on normed linear spaces, discussing steepest descent and rendezvous problems in control theory 13 p2116 A66-25343

Control problems in operation of transport aircraft noting degrees of freedom, computer aid, human factor, etc 13 p2047 A66-25497

Circuit and system theory - Allerton Conference, University of Illinois, October 1965 13 p2049 A66-26057

Controllability of linear and nonlinear dynamical systems, using perturbation properties expressed as sensitivity functions 13 p2050 A66-26059

Sensitivity operator as extension of time-domain sensitivity function to time-varying change of elements in nonlinear dynamic system, deriving sensitivity equations 13 p2050 A66-26060

Combined optimization problem, equivalent to dual control problem, considering determination of optimal control policies for plant under random disturbances, using iterative equations 13 p2051 A66-26065

Approach to sensitivity problem of optimal control systems by introducing performance index 13 p2052 A66-26072

Stability and sensitivity requirements considered simultaneously in control system design, minimizing time domain sensitivity index and incorporating transient response characteristics 13 p2052 A66-26073

Inequality constraints in open-loop minimum time control problem 13 p2053 A66-26080

State-variable feedback decoupling of multivariable linear plants with cross coupling between various input-output pairs 13 p2053 A66-26083

Nonlinear time varying open-loop feedback system design and infinitely integrable function space boundedness condition 13 p2053 A66-26085

Sensitivity comparison of closed-loop and open-loop systems 13 p2054 A66-26092

Sensitivity of sampled data systems with finite sampling duration derived as function of pulse width 13 p2054 A66-26093

Book on unmanned aircraft and rocket control systems, flight dynamics in conjunction with control processes, design of stabilization and guidance systems 13 p2055 A66-26462

Random variable representation of errors

- in control system 14 p2263 A66-26767
- Optimal control problems described by classical boundary problems for equations of parabolic and hyperbolic type 14 p2263 A66-26768
- Probability-statistics analytic human-operator model in control systems analysis 14 p2263 A66-27108
- Control theory of nonlinear servomechanisms, based on describing function technique, provides design data for type I servomechanisms, deriving equations 14 p2264 A66-27117
- Diodes, transistors, rectifiers and inverters application to control and instrumentation systems, providing phase changing, frequency stabilization, source voltage, etc 14 p2249 A66-27118
- Spontaneous processes simulation for self-alignment of poles in recognition system 14 p2264 A66-27204
- Phase space techniques for optimization of relay control systems with plants having multivalued nonlinearities 14 p2265 A66-27482
- Synthesis of linear automatic control system with constant parameters for integral Q-factor, noting effect of small parameters on properties of optimum system 14 p2265 A66-27521
- Restrictions placed on transfer function of linear system with input and output coordinates in presence of given plant in control loop 14 p2265 A66-27522
- Solution of optimum filtering problems when input signals of automatic control system are described by different differential equations at successive time intervals 14 p2265 A66-27523
- Linearized motion equation of self-adaptive systems with stabilized frequency characteristics, considering effect of control and noise signals in basic control loop 14 p2265 A66-27525
- Coordination of integral and relay components in algorithms for adjusting control coefficients in model-reference self-adaptive control systems described by differential equations 14 p2266 A66-27526
- Transfer function of pulse amplitude modulated sampled data control systems with element generating arbitrarily shaped pulses and first order element series connected with constant parameter elements 14 p2266 A66-27527
- Approximation of variable time delays and design of constant and variable delay circuits, noting simulation of delays in automatic control systems by computers 14 p2266 A66-27528
- Minimum effort control problem in rotund reflexive Banach space and extension to Hilbert space under bounded linear transformation 14 p2266 A66-27631
- Nonsteady coordinates of linear delay system determined from observable linear combination of phase coordinates 14 p2267 A66-27671
- Autocorrelation and hypergeometric function applied in evaluating response of nonlinearities to Gaussian noise 14 p2267 A66-27726
- Money-saving technique to speed up potentiometer in control systems 14 p2267 A66-27804
- Fluid control devices 14 p2226 A66-27816
- Optimum control systems for plants described by ordinary nonlinear differential equations or differential equations with constant or variable delay 14 p2268 A66-28278
- Error coefficients and astatism estimation for controllable system in normal operation 14 p2268 A66-28353
- Dielectric-tape TV camera for panoramic scanning application in meteorological satellite, discussing subject logic and control system design 14 p2262 A66-28418
- Effect of backlash between servomotor and control element on dynamics of indirect control systems, assuming system has rigid feedback, sensitive element is inertialess and plant has positive self-regulation 14 p2269 A66-28475
- Determination for piecewise analytic F/t of what vectors can be represented by bang-bang control having finite number of discontinuities 15 p2469 A66-28514
- Simplest system of auto-oscillatory extremal control, examining control plant output law 15 p2469 A66-28542
- Functional analysis of electromechanical control systems, noting application of mathematical methods for system reliability determination 15 p2428 A66-28797
- Minimax problem for pursuit problem of two linearly controlled objects describable by identical differential equations 15 p2526 A66-28948
- Stability of variable-structure control systems, noting two-stage motion in linear system stabilization and image point impingement on switching surface 15 p2471 A66-29161
- Behavior, properties and related concepts of control systems, noting attainability function 15 p2472 A66-29373
- Synthesis of relay automatic control systems with optimum dynamic properties 15 p2476 A66-29994
- Synthesis of correcting units for automatic control systems, using quasi-invariance condition 15 p2476 A66-29995
- Averaging systems for control of sinusoidal vibration tests noting methods, crosstalk effect etc 16 p2678 A66-30463
- Vibration equipment, discussing armature and control oscillator 16 p2679 A66-30474
- Vacuum thermal environmental testing of Nimbus I control system 16 p2809 A66-30504
- Optimization of linear control systems when placing step limitations on control, using functional analysis 16 p2668 A66-30751
- Synthesis problem of optimum dynamic characteristics of multivariate linear control systems with random input signals 16 p2668 A66-30752
- Optimum control of two-dimensional oscillating system when placing limitations on control, using Butkovskii L-problem of moments 16 p2668 A66-30753
- Closed-loop automatic control system with univalued substantially nonlinear element, using approximation of characteristics by Fourier series 16 p2669 A66-30754
- Approximation method determining follow-up failure conditions for nonlinear automatic systems in presence of control and noise signals 16 p2669 A66-30755
- Optimal control problem of variable structure system, deriving necessary and sufficient conditions for existence of trajectories 16 p2669 A66-30756
- Comparison of nonoptimum and optimum strategies in dual control of inertialess plants in presence of noise in feedback loop 16 p2669 A66-30757
- Equation for conditional overshoot density of normal stationary process in centralized and positional centralized control, noting error estimate 16 p2669 A66-30767
- Solar simulation testing of thermal control systems for nuclear test detection spacecraft [AIAA PAPER 64-209] 16 p2682 A66-30890
- Hill climbing in self-optimizing control systems, noting effect of sinusoidal perturbation, application, etc 16 p2671 A66-31059
- Pneumatic control systems, discussing turbulence amplification method and system with miniaturized elements with moving parts 16 p2636 A66-31063
- Pole-zero method to determine frequency response of second-order linear control systems with phase-advance signal shaping 16 p2671 A66-31157
- Duality theory of optimal control and resulting duality correspondence between formulation of optimal control and calculus of variations, noting decomposition algorithm 16 p2671 A66-31229
- Reciprocal optimal control problem and several variations, using inequalities based on convexity assumptions 16 p2671 A66-31232
- Performance of human operators in three-state relay control system with velocity augmented displays 16 p2644 A66-31270
- Three models of constrained preview control with successive target values of nonuniform importance 16 p2644 A66-31272
- Thermostability and control of airborne electronic equipment in closed-loop forced-air cooling systems 16 p2663 A66-31325
- Simulation of fourth order type I linear system, using one-operational amplifier and two-terminal network consisting of four resistors and four capacitors 16 p2672 A66-31385
- Sensor threshold definitions applied to rate gyros, comparing old and new AIAA specifications, noting threshold definitions relation to flight control system malfunctions 16 p2708 A66-31439
- Automatic control systems with carrier frequency information transmission channel, deriving transfer functions 16 p2672 A66-31552
- Monograph on theory of ordinary delay differential equations and optimal control processes with time delay 16 p2673 A66-31749
- Text on random processes in nonlinear control systems, covering statistical analysis, nonlinear transformation with and without feedback, extremal systems, etc 16 p2673 A66-31753
- Mathematical analysis of axioms that provide local definition of generalized control systems 17 p2898 A66-31868
- Reliability of back-up system with consideration of failures in switches and automatic control systems 17 p2880 A66-31904
- R and D clean room complex design for guidance and control systems, noting contamination control, maintenance procedures, cost factors, etc 17 p2903 A66-32209
- Modern control theory applied to system design for reduction of sensitivity of system to plant-parameter variation by use of feedback 17 p2901 A66-32290
- Dynamic programming applied to synthesis of linear optimal or suboptimal multivariable control systems in which control-signal vector depends only on certain prescribed state variables 17 p2901 A66-32291
- Synthesis method for automatic control systems, examining controller design for turboprop engine 17 p2901 A66-32311
- Synthesis of control systems with minimum complexity, noting application to filter discrimination of nonstationary signals 17 p2901 A66-32568
- Optimal system determined from maximum probability criteria of target hitting 17 p2901 A66-32571
- Minimum control system optimization, noting adaptation with respect to minimum mean square error, statistical criterion calculation, etc 17 p2901 A66-32572
- Switching surface construction using one to one correspondence between points in controllability region and points on surface of n-th order system 17 p2902 A66-32575
- Accuracy problems in control systems, discussing error assessment and accuracy estimates of optimal control 17 p2902 A66-32576
- Controlling motion of object directly from accelerometer data without need of object coordinate determination 17 p3003 A66-32587
- Divergent vertical helicopter oscillations due to pilot presence in collective control loop and physiological response of pilot to oscillations 17 p2843 A66-32719
- Control forces in nonlinear integral equations solved by iteration method 17 p2902 A66-32816
- Propellant tanking computer system for monitoring and controlling Saturn IB and Saturn V vehicles [SAE PAPER 660454] 17 p2904 A66-33162
- Optimal trajectory problem solution using in-flight guidance computers for control rockets and aircraft under influence of random disturbances 17 p2956 A66-33239
- Control feel application to aircraft controls, noting man-machine system configurations, anthropometric and physical factors, sensory motor requirements, etc 17 p2869 A66-33446
- Optimal processes in sampled data control system 18 p3089 A66-33734
- Systems and operation of quantized data attitude control system for spacecraft [AIAA PAPER 64-660] 18 p3240 A66-33787
- Man-machine system in control and guidance of Saturn V launch vehicle, emphasizing participation during atmospheric phase of flight profile 18 p3242 A66-33847
- Syncom communications satellite reaction control system for spin axis precession and orbit correction, noting design and operation 18 p3242 A66-33854
- Thermal noise in internal measuring

- instruments affecting limitations on spacecraft open-loop inertial autonomous control system precision 18 p3132 A66-33872
- Trial and error method for constructing closed loop harmonic response locus of control system with one nonlinear element 18 p3089 A66-34010
- Fluid interaction devices, noting induction and turbulence amplifiers, impact modulators, logic gates, inverters, etc 18 p3054 A66-34131
- Large steerable antennas in control systems, emphasizing antennas using paraboloidal reflectors 18 p3081 A66-34267
- Accuracy limitations in control and construction of large steerable paraboloid antennas 18 p3081 A66-34273
- Aerial mount and satellite orbit effect on steerable antenna control system, noting frequency and tracking data rates 18 p3071 A66-34279
- Gust alleviation systems for transport aircraft using linkage, noninteracting and split control 18 p3052 A66-34493
- Reliability of automatic control systems, considering properties of controlled plant, taking error probability in control as criterion 18 p3091 A66-34676
- Dynamics of nonlinear control systems by constructing cross sections of parameter space 18 p3091 A66-34989
- System containing reference model with amplification factor of controller reconstructed, making system stable or auto-oscillatory 18 p3091 A66-34990
- Optimal control minimizing quadratic functional for plant, showing difference in certain phase coordinate region from linear control 18 p3092 A66-34992
- Variable-structure automatic control system with switchable phase-shifting filters for linear plants, converting error signal to control switching device 18 p3092 A66-34994
- Synthesis of time-optimal control system in presence of constraints on displacement and displacement rate of steering element 18 p3092 A66-35007
- Maintenance and inspection of air transport vehicle structures 19 p3278 A66-35399
- Flight control system design for high performance aircraft, particularly longitudinal transient response handling qualities 19 p3278 A66-35509
- Sensitivity of closed loop optimal control system to parameter variations and external perturbations 19 p3324 A66-35581
- Graphical analysis of extremal control system stepwise adapted to process with extremal characteristic located between two first-order linear operators 19 p3324 A66-35582
- Minimum-energy control law derived for attitude acquisition of satellite about single axis, using reaction-wheel control system [AIAA PAPER 65-434] 19 p3468 A66-35602
- Optimal and suboptimal design of vehicular control and proportional navigation system based on Pontryagin maximum principle 19 p3397 A66-35882
- Control moment gyroscope for angular momentum transfer with minimum power consumption, noting design and application for free body motion stabilization 19 p3360 A66-35962
- Block sensitivity coefficient analysis in application of method of transformed circuits to closed-loop control systems, noting dynamic accuracy problem 19 p3327 A66-36014
- Sensitivity analysis for relative stability of self-excited oscillations and transient response of nonlinear control systems 19 p3328 A66-36019
- Synthesis of control systems invariant to parameter changes, examining sensitivity and advantages over self-adjusting systems 19 p3328 A66-36023
- Synthesis of automatic control systems for linear plants with variable parameters satisfying specified performance criteria 19 p3328 A66-36024
- System having insensitivity to variation of plant parameters, characteristics or particular elements shown as structural problem 19 p3329 A66-36026
- Optimal control system sensitivity to inaccuracies determined in error measurement of initial state 19 p3329 A66-36028
- Synthesis of minimum sensitive open loop control system subjected to unpredictable environmental changes, discussing perturbation effects during and before process transient 19 p3329 A66-36029
- Optimal stochastic control system with control of linear plants approximating characteristics of airframes, allowing plant parameters to vary randomly 19 p3329 A66-36030
- Necessary conditions for extremum in problems of control with aftereffect 19 p3330 A66-36185
- Self-learning control system theory, discussing power yield, adaptive and extremum systems, nondeterministic systems, combined deterministic/ self-organizing systems, etc 19 p3330 A66-36433
- On-line and off-line self-organizing control systems for space vehicle application 19 p3333 A66-36661
- Learning control system design, discussing hill-climbing and pattern recognition schemes in framework of statistical decision, automata and information theory 19 p3333 A66-36662
- Coordination technique for synthesis of dynamic multilevel control systems 19 p3334 A66-36667
- Liapunov method synthesis of time variable nonlinear multivariable systems, deriving simplified control law for tracking of linear noninteracting model 19 p3335 A66-36697
- Pontryagin principle extended to control systems, computing optimal control laws 19 p3337 A66-36735
- Pneumatic control system based upon dual membrane relay permitting all fundamental logic operations 19 p3282 A66-36808
- Control algorithms for microminiaturized sampled data digital control systems 19 p3311 A66-36822
- Synthesis procedure which insures good control system performance by adding to performance index term involving sensitivity coefficients 20 p3535 A66-36854
- Mathematical model for systems comprising human operator controlling typical controlled elements, noting behavior variability and performance estimation of mean-squared error in tracking 20 p3508 A66-36861
- Closed loop control system combined with air beating technology for measurement of multicomponent microforces 20 p3555 A66-36870
- Multiloop control interaction using linearized technique, noting variable geometry intake loop 20 p3627 A66-36881
- Self-adjusting control systems with models, reviewing basic theoretical problems of analysis and synthesis 20 p3537 A66-36896
- Soviet RT-15 radio telescope control system, noting two-reflector system-telescope antennas, parabolic mainreflector and automatic and visual tracking possibilities 20 p3540 A66-37026
- Preliminary design, mission specifications and outgoing data specifications for advanced control center for vehicles in orbital flight 20 p3651 A66-37394
- General maintenance techniques for large digital controllers to achieve high order of system dependability 20 p3522 A66-37907
- Book on variational methods in control engineering covering optimal processes based on maximum principle, variational calculus and dynamic programming 20 p3539 A66-37985
- All-fluid control systems, noting achievements in vector control navigation aids and vehicle flight stabilization 20 p3503 A66-38263
- Linear dynamic system synthesis from weighting patterns 21 p3717 A66-38600
- Electromagnetic interference from pulse circuits, switches and relays produced by photo-optical control systems 21 p3709 A66-38608
- Titan II control system modification for Titan III missions involving incorporation of acceleration loop, division of autopilot, etc 21 p3819 A66-38852
- Autonomy in multiply connected variable structure automatic control systems 21 p3719 A66-39247
- Maximum transient deviation in response to step disturbance in control loop 21 p3719 A66-39398
- On-line-learning and off-line-learning self-organizing control systems 21 p3720 A66-39431
- Mathematical and control operations, utilizing flueric components such as jet deflection type proportional fluid amplifiers, capillary-tube resistors and tank capacitors [ASME PAPER 65-WA/PID-2] 21 p3699 A66-39529
- Absolute stability of distributed control system with nonlinear elements of backlash type analyzed by distributed parameters method 22 p3883 A66-39660
- High speed stable system through combination of hunting-type control system without closed cycles designed for plant optimization, with recycling type controller 22 p3883 A66-39661
- Aircraft hydraulic system contamination control program under clean as you go principle 22 p3851 A66-40043
- Flight control system providing control augmentation, self-adaptive control and self-organizing control 22 p3848 A66-40125
- Apollo environmental control system simulation chamber for suit and manned system evaluation and operational verification 22 p3892 A66-40241
- Human operator transfer function capability bounds and system stability characteristics and performance 22 p3858 A66-40252
- Adaptation, learning and self-learning in automatic systems, discussing stochastic approximation, pattern recognition, adaptive filters, etc 22 p3884 A66-40412
- Liapunov function and Meyer-Kalman-Yakubovich lemma used to obtain frequency domain stability criteria for linear plant with both monotone increasing and odd monotone increasing nonlinear feedback functions 22 p3940 A66-40529
- Optimization of linear control system by expressing quadratic performance index as quadratic functional of control functions 22 p3884 A66-40533
- Stability of nonlinear controlled systems with infinite degrees of freedom 22 p3885 A66-40692
- Differential equations with delayed argument describing laws of motion and action of control elements upon motion in problem of trajectory with moving right hand terminus 23 p3941 A66-40800
- Book on synthesis of multiloop control systems for application to automatic control and computer circuit construction 22 p3885 A66-40854
- Propulsion control systems interface for V/STOL hover control in aircraft, using lift plus lift cruise propulsion concept [AIAA PAPER 65-799] 23 p4015 A66-40985
- Control design using force as criterion, discussing effect of varying height and handle orientation of push-pull task 23 p4029 A66-41575
- Asymmetrical nonlinear oscillations of control systems analyzed by parameter plane method, considering systems with reference-perturbing and slow-varying input signals 23 p4050 A66-41610
- Propulsion control systems for Concorde aircraft, noting aero-and thermodynamic reasons for power plant variables subject to manipulation 23 p4122 A66-41776
- Averaging controls of discontinuous stochastic system with sequence of discontinuities forming Poisson flow of events 23 p4051 A66-41782
- Analog computer analysis of input signals effect on time constant, vibration frequency and overshoot ratio of nonlinear control system 23 p4051 A66-41854
- System maintainability in Back-Up Interceptor Control System /BUIC II/ using modular design of system, discussing software and failure 24 p4178 A66-42093
- Operational effectiveness and maintainability verification for surveillance and control systems influence by quantitative reliability 24 p4179 A66-42094
- Control law synthesized for limiting transient processes in second-order systems, including arbitrary functions which allow

additional requirements to be fulfilled 24 p4187 A66-42211

Analytical method based on Taylor series to substitute linear control system for nonlinear control system 24 p4188 A66-42482

Microwave transducers for measuring geometric dimensions and displacements in industrial process control 24 p4214 A66-43012

Navigation, guidance and control system instrumentation for Apollo manned lunar landing mission [AGARDOGRAPH 105] 24 p4236 A66-43124

Optimal control problem formulated for linear constant-coefficient system subjected to class of amplitude bounded load disturbances 24 p4189 A66-43205

**CONTROL VALVE**

Pulse operated bipropellant control valve design for attitude control systems of space vehicles 01 p0015 A66-10668

Four-way fluid state vortex hydraulic servovalve discussing design principles, performance and application 04 p0460 A66-13785

Electrohydraulic servovalve presenting essential characteristics of redundancy by majority choice in analog servosystem 05 p0612 A66-15413

Control valve design for cryogenic fluids, galling, seizing and stress accumulation and material-valve compatibility 12 p1885 A66-24380

Steady state characteristics and transient behavior of vortex valve, examining effect of wall friction and shearing stresses due to radial velocity gradients 20 p3501 A66-37649

Valve technology for spacecraft and rocket engine applications, discussing zero-gravity vent valve, zero leakage valve, insensitive valve seat and solenoid actuator [ASME PAPER 66-MD-61] 21 p3742 A66-38494

Temperature loop operation and transient response performance of pneumatic temperature control consisting of sensor and valve 22 p3853 A66-40540

Control valve seat leakage as function of fluid viscosity, density, pressure drop and cube function of gap between two surfaces 23 p4017 A66-41145

**CONTROLLED FUSION**

Equilibrium of plasma confined in toroid 05 p0725 A66-15240

Controlled thermonuclear fusion, international developments 10 p1555 A66-21267

Soviet high-temperature plasma physics and controlled nuclear fusion 13 p2145 A66-25736

Plasma physics and controlled nuclear fusion research - Conference, International Atomic Energy Agency, England, September 1965 19 p3410 A66-36494

Anomalous escape of ions from plasma contained in magnetic mirror into loss cone studied for evaluation feasibility of controlled thermonuclear reaction in magnetic mirror trap 19 p3415 A66-36517

Plasma physics and controlled nuclear fusion research - IAEA Conference, England, September 1965, Volume 2 19 p3419 A66-36539

Book on plasma diagnostics covering measuring devices and techniques, SHF antenna and waveguide system, emission measurements, etc 21 p3737 A66-38949

Plasma physics and problems of controlled thermonuclear fusion - Conference, Kharkov, Ukrainian SSR, May 1963 21 p3777 A66-39002

Controlled thermonuclear fusion program noting nuclear reactions, plasma production and confinement, etc 24 p4247 A66-43121

**CONTROLLED STABILITY**

Solving method for dynamic equation system describing controlled object element having distributed relationships 04 p0502 A66-13493

Analytical design of controller for stabilization of linear system with random delay in form of intermittent Markov process 04 p0504 A66-13973

Correction of motion of two degree of freedom system with one cyclic coordinate 24 p4189 A66-42837

**CONVAIR MILITARY AIRCRAFT**

S F-111 AIRCRAFT

**CONVECTION**

S ADVECTION

S FORCED CONVECTION

S FREE CONVECTION

S THERMAL CONVECTION

**CONVECTION CURRENT**

SA ELECTRON BUNCHING

Continental structure and drift from convection currents in Earth mantle indicate depth of several hundred kilometers 03 p0360 A66-12378

Cellular convection in conditionally unstable atmosphere, determining preferred areas of ascending and descending regions and current distribution 05 p0666 A66-14542

Influence of suction or injection in boundary layer flow past vertical flat porous plate in presence of uniform magnetic field 06 p0969 A66-16181

Gravity anomalies and convection currents, examining sphere and cylinder sinking beneath surface of viscous fluid 06 p0877 A66-16785

Viscous fluid model estimates of crustal thickness and free-air anomaly compared with measured free-air anomalies and seismic depths of Puerto Rico trench and mid-Atlantic rise 06 p0877 A66-16786

Synoptic interpretation of tropical land convection over Philippines 11 p1728 A66-22322

Internal wave ripples from fluid impacts on base of stably stratified fluid region, calculating particular case of single ripple in viscous fluid 11 p1693 A66-23009

Nonconducting fluid motion in infinite tube applied to violent thunderstorm dynamics, reducing current intensity to value for convection currents 14 p2346 A66-28268

Vertical wind shear effect on development and structure of convection, noting perturbation growth rate and unstable stratification 16 p2742 A66-31110

Organized convection as photographed by Gemini astronauts 18 p3129 A66-34214

Internal turbulence scale for convection jets determined, using measurements of light intensity 21 p3760 A66-39357

EHD traveling potential wave interaction inducing electroconvection in slightly conducting current without electrical contact with flow 23 p4104 A66-41496

**CONVECTIVE FLOW**

Convection pattern changes in Earth mantle and continental drift as evidence of cold origin of Earth 03 p0361 A66-12379

Solar photosphere noting radiative equilibrium theory, granules and convection observations for temperature distribution 03 p0420 A66-12840

Velocity field and wave propagation in hydrogen convective zone of Sun 03 p0425 A66-12846

Convective mass exchange in heterogeneous chemical reactions in laminar flow along wall 04 p0597 A66-14186

Rotating fluid sphere, discussing power law for dependence of Rayleigh number on Taylor number 04 p0599 A66-14471

Macrokinetics of homogeneous-heterogeneous processes in moving media and estimates of initial material concentration in core and boundary layer regions of reaction vessel flow 06 p0971 A66-16543

Initiation of precipitation in vigorous convective clouds traced to cluster of three shower cells which produce radar echo close to -30 C level [AFCLRL-SR-32-65] 07 p1062 A66-17369

Unsteady, combined free and forced convective MHD channel flow of conducting fluid through transverse magnetic field 07 p1085 A66-17580

Stability of piecewise linear velocity profile of shear flow in convectively unstable layer 07 p0980 A66-17942

Heat conduction equation for convective flow applied to gunpowder combustion under harmonic pressure variation 08 p1280 A66-19486

Analogy between eigenvalues for fluid convection and flow stability extended to rotating cylinders with corresponding temperature distribution for given angular velocities 08 p1212 A66-19821

System of equations derived for dynamics of convective atmospheric vortices for

model with unstable stratification and basic vorticity 10 p1530 A66-21274

Local boundary layer approximations of first order for steady laminar convection flow produced by nonuniform axisymmetric heating or cooling of infinite horizontal surface 10 p1620 A66-21276

Cumulus to cumulonimbus convection over mountains and dissipation of stratus and sea fog when moving inland, using Tiros photographs 11 p1728 A66-22321

Differential equations describing air movement, heat exchange and exchange of moisture 11 p1730 A66-22942

Convection and stability criteria for nonlinear steady solutions with homogeneous vertical magnetic field acting on fluid 11 p1787 A66-23420

Stability of steady finite amplitude convection determined by method of successive approximations 11 p1787 A66-23421

Nonlinear Benard convection 12 p1976 A66-23549

Axisymmetric convection between two rotating disks, noting secondary flow and viscous effects of Ekman layers 12 p1980 A66-24941

Vertical displacement rate of air particles in finite volume under effect of internal heat sources in free convection 13 p2209 A66-25318

Forced turbulent convective incompressible flow along rough plates, measuring velocity and temperature profiles 14 p2410 A66-26934

Stability to infinitesimal disturbances of plane Couette flow in presence of negative vertical temperature gradient, noting instability at critical Rayleigh number for convection without shear 15 p2481 A66-29741

Existence of convective interaction of mechanism affecting direction and stability of electric current in flowing gas, using electric arc confined in supersonic flow 15 p2481 A66-29744

Instability arising as overstability in magnetohydrodynamic Benard problem 16 p2761 A66-31104

Convective diffusion of material from single drop moving in liquid medium at low Reynolds numbers, using quasi-stationary approximation 16 p2689 A66-31516

Convective effects role in exciting axisymmetric oscillations in plasma cylinder in magnetic field with aid of radius restricted electron beam 17 p2968 A66-32538

Lunar structural lineaments as boundary conditions for convection theory 17 p3007 A66-33235

Semiconvective zone in very massive stars during hydrogen burning, noting factors leading to instability 18 p3229 A66-34142

Forced convection caused by normal and longitudinal components of flow around hot wire, noting effect of wire length 20 p3544 A66-36928

Differential equations describing air movement, heat exchange and exchange of moisture 20 p3593 A66-37855

Sturrock criteria for differentiating between absolute and convective instability and between amplification and nontransmittance of oscillations 21 p3770 A66-39028

Nonstationary convective diffusion flow toward moving droplet at small Reynolds number 22 p3902 A66-40816

Linear perturbation theory of flow due to convection of entropy and vorticity in nonuniform flow field, noting sound generation 23 p4062 A66-42051

Thermal convection in horizontally infinite layer of fluid confined between rigid heat conducting plates driven by temperature difference 23 p4151 A66-42055

**CONVECTIVE HEAT TRANSFER**

Slow motion of sphere in compressible, viscous and heat conducting fluid analyzed, using Navier-Stokes equations 01 p0006 A66-10424

Unsteady convective flow of electrically conducting fluid through vertical channel in magnetic field, using differential equations 01 p0111 A66-10426

Free convection boundary layers on horizontal flat plate 01 p0161 A66-10434

Heat transfer data obtained in combined convection regime for rotating isothermal cone, noting influence of cone vertex

angle 01 p0164 A66-10902  
 Convective heat transfer behavior of 90 percent hydrogen peroxide studied with reference to possible use as rocket propellant 01 p0164 A66-10903  
 Forced convection vaporization of Freon 113 flowing in horizontal Pyrex tube examined, using motion pictures 01 p0165 A66-10910  
 Temperature difference method of computing convective heat transfer, using flat plate laminar boundary layer equations 02 p0303 A66-11569  
 Equations of quasi-stationary mean flow of momentum and heat on spherical Earth averaged over long period, and over latitude circle 02 p0221 A66-11574  
 Natural convection at thermal leading edge on vertical wall matched with known solution immediately above this region 02 p0304 A66-12199  
 Charring ablative materials effectiveness in combined convective and radiative heating as reentry shield 03 p0444 A66-12792  
 Free convection heat transfer in partially enclosed channel flow; noting effect of vertical fin geometry and temperature [ASME PAPER 64-WA/HT-33] 04 p0595 A66-13386  
 Forced convective heat transfer from isothermal and nonisothermal uniformly spinning bodies of revolution obtained by similar flow analysis [ASME PAPER 64-WA/HT-15] 04 p0595 A66-13387  
 Heat and mass transfer rates compared with correlations for frost formation on vertical plate in free convection [ASME PAPER 65-HT-32] 04 p0595 A66-13391  
 Convective heat exchanger using air and subjected to resonant pulsating flow [ASME PAPER 65-HT-30] 04 p0595 A66-13392  
 Stationary heat sources effect on convective fluxes in unstable atmosphere 04 p0513 A66-13413  
 Heat transfer by laminar forced convection for dissipative fluid in annulus calculated, using complex variable method 04 p0598 A66-14211  
 Cellular convection in horizontal layers heated from below, noting effect of critical Rayleigh number and width-height ratio of cells 05 p0666 A66-14543  
 Heat transfer from Ar and Xe to end wall of shock tube measured, using thin film gauge monitored by IR photocell 05 p0782 A66-14705  
 Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate [ASME PAPER 65-HT-54] 05 p0785 A66-14760  
 Convection heat transfer for turbulent flow in subsonic diffusers [ASME PAPER 65-HT-64] 05 p0605 A66-14765  
 Boundary value problem solution for composite media applied to cooling of composite cylinder by convection at outer surface [ASME PAPER 65-WA/HT-52] 05 p0792 A66-15664  
 Slug flow and film boiling of hydrogen, deriving formula for forced convective film boiling heat flux [ASME PAPER 65-WA/HT-32] 05 p0793 A66-15673  
 Convective heat transfer measurements for partially dissociated carbon monoxide and hydrogen with high Lewis number [ASME PAPER 65-WA/HT-27] 05 p0793 A66-15676  
 Interaction or coupling of radiation with conduction and convection mechanisms in nonisothermal nongray gas flowing in entrance region of tube with isothermal black walls [AIAA PAPER 66-136] 06 p0875 A66-17090  
 Ignition of ammonium perchlorate composite propellants by convective heating [AIAA PAPER 66-65] 06 p0941 A66-17101  
 Convective heat transfer in thin rectangular channels commonly found in nuclear reactor fuel assemblies 07 p1148 A66-17299  
 Empirical formula for convection coefficient of bounded space of parallelepiped shape permits determination over wide range of parameters 07 p1148 A66-17393

Dimensionless flow parameter for free convection, equivalent to Reynolds number for forced convection, used for correlating through single curve free and forced convective heat and mass transfer from single bodies 07 p1149 A66-17517  
 Combined free and forced convection flows with heat and mass transfer in laminar boundary layers on vertical surfaces 07 p1150 A66-17579  
 Convective heat transfer coefficients at rocket nozzle throat handling nonaluminaized propellant gas 07 p1151 A66-17583  
 Atmospheric argon effect on hypersonic stagnation point convective heat transfer, using arc-heated shock tube simulating flight velocities up to 34,000 fps [AIAA PAPER 66-29] 07 p1153 A66-17891  
 Variational principle generalization for elimination of simplifying assumptions in convective heat transfer model in forced incompressible flows 07 p1155 A66-18127  
 Convective and radiative heat transfer to reentry vehicles at superorbital velocities [AIAA PAPER 66-106] 07 p1155 A66-18459  
 Annular flow and two-dimensional forced convective boiling heat transfer to hydrogen in nucleate and film boiling regimes 08 p1316 A66-18832  
 Convective heat transfer and artificially turbulent flow through roughened corrugated channels 08 p1317 A66-18864  
 Prediction of solid propellant hot-gas ignition based on preignition transient convective heat transfer model [AIAA PAPER 66-67] 08 p1317 A66-18993  
 Ablation rates, surface temperature, emittances and reradiated fluxes of heat shield materials heated by irradiation [AIAA PAPER 66-44] 08 p1318 A66-19070  
 Equilibrium stability of horizontal layer of fluid in field of modulated temperature gradient when layer thickness is greater than penetration depth of heat waves 08 p1320 A66-19471  
 Heat transfer in fluids with volume heat source homogeneously distributed throughout volume of fluid 08 p1321 A66-19830  
 Free convection thermal transfer in narrow horizontal channels and infinitely wide channels 09 p1471 A66-20704  
 Temperature field in infinite plate heated simultaneously by radiation and convection 09 p1471 A66-20748  
 Heat convection in vertical annular tube filled with mechanically incompressible viscous liquid 09 p1471 A66-20823  
 Free convection heat transfer to carbon dioxide near critical point, noting free, turbulent and oscillating flow 10 p1619 A66-21271  
 Analog method for solution of unsteady radiant heat transfer problems with combined conduction and convection 10 p1622 A66-21938  
 Combined free and forced laminar convection heat transfer inside inclined circular tubes of varying position [ASME PAPER 65-WA/HT-3] 11 p1785 A66-22191  
 Convective and radiative heat transfer during atmospheric reentry examined, using double-diaphragm shock tube operated in expansion tube mode 11 p1684 A66-22828  
 Surface tension and buoyancy effects in cellular convection of electrically conducting liquid in magnetic field 12 p1978 A66-23953  
 Radiative heat transfer near stagnation point of blunt body in hypersonic flow, noting effect on convective heat transfer 12 p1978 A66-24241  
 Laboratory studies of heat balance in rocketsonde thermistors for measurement of upper air temperature, noting dissipation constant and solar radiation effect [AIAA PAPER 66-386] 12 p1883 A66-24509  
 Variational calculus methods for convective heat transfer to nonhomogeneous fluids and fluids with thermal expansion 12 p1979 A66-24817  
 Free convection film boiling heat transfer from isothermal vertical plate to subcooled stagnant liquid, using two-phase boundary layer theory 12 p1980 A66-24907  
 Estimates of expected relative magnitudes of convective and radiative heat transfer at stagnation point of blunt body for

superorbital speeds and altitudes with continuum flow 13 p1989 A66-25154  
 Engineering method for calculating distribution of convective heat transfer for continuous boundary layer gas flow past body 13 p2208 A66-25316  
 Convective heat transfer to flat plate and at stagnation point in partially ionized equilibrium air boundary layer, noting heating rates 13 p2210 A66-28720  
 Single blow transient testing of compact heat exchanger surfaces [ASME PAPER 66-GT-93] 14 p2411 A66-26997  
 Heating rates in gas mixtures of planetary atmospheres predicted by equation using transport properties of gases at lower temperatures 14 p2411 A66-27432  
 Convective heat transfer in centrifugal force field of cavity between two rotating disks in turbulent gas flow 14 p2375 A66-27692  
 Perturbation solutions in differential analysis of radiation interactions with conduction and convection 14 p2259 A66-28162  
 Transverse magnetic field applied to high Reynolds number flow of liquid mercury in pipes and ducts inhibits convective mechanism of heat transfer [AIAA PAPER 65-539] 15 p2616 A66-29279  
 Convective heat transfer to particles in shock-heated gas 15 p2617 A66-29300  
 Integral relations method for flow field calculations of blunt body entries for determining convective heat flux to reentry body 15 p2424 A66-29305  
 Forced convection heat transfer in symmetrical ducts when fluid is liquid metal, examining new prediction methods for engineering analysis and design 16 p2824 A66-30304  
 Heat transfer in radiating media and interaction of convection with radiation heat transfer, considering one-dimensional slab problem and optically thick and thin media 16 p2824 A66-30305  
 Heat transfer in liquids situated in gap between coaxial cylinders in presence of natural convection, determining effective thermal conductivity coefficient for water and ethanol 16 p2825 A66-30325  
 Convective heat transfer to and low gravity heating of liquids contained in rotating cryogenic fuel tanks in orbit [AIAA PAPER 66-432] 16 p2826 A66-30521  
 Thermal performances of radiative and convective plate fins, considering effect of mutual irradiation between surfaces, solving integro-differential equations describing process 16 p2827 A66-30816  
 Interaction of radiation and convection in laminar boundary layer of perfect gas on flat black plate [ASME PAPER 65-HT-54] 16 p2828 A66-30988  
 Thermoacoustic streaming equations, examining effect of sound on free convection from heated cylinder 16 p2828 A66-30992  
 Text on convective heat and mass transfer for first-year graduate students in mechanical, nuclear and aeronautical engineering 16 p2829 A66-31315  
 Free convective heat transfer in horizontal cylindrical interlayer with heat emitting element 17 p3034 A66-32560  
 Convective heat transfer during subsonic and supersonic gas flow in inlet section of cylindrical tube 17 p3034 A66-32561  
 Approximate calculation of free convective heat transfer in rectangular region 17 p3034 A66-32562  
 Gas-film-cooled nozzle extension application to large rocket engines, discussing operational parameters, advantages, etc [SAE PAPER 660455] 17 p2991 A66-33163  
 Forced convection heat transfer for liquid metal flow in rectangular channels with prescribed wall heat fluxes and heat sources in fluid stream 17 p3038 A66-33468  
 Frictional drag and convective heat transfer of rotating cones of arbitrary vertex angles in mixed and turbulent flow 17 p3038 A66-33469  
 Laminar boundary layer heat transfer measurements by thick-film calorimeter gauges on flat plate in dissociated and partially ionized air 17 p3039 A66-33483  
 Transverse magnetic field effects on heat

transfer in turbulent flow of mercury in circular iron tube 18 p3145 A66-34109

Transient heat transfer to liquids in cylindrical enclosures subjected to step change in wall temperature 18 p3263 A66-34384

Bench-top calorimeter for determining radiation and convection in small-scale combustion of fuel 18 p3113 A66-34425

[WSCI 66-14] Ignition pressure transient of rocket motor, discussing initial ignition event, flame spreading and final chamber filling, convective heating effect on burning rate, etc 18 p3165 A66-34449

[AIAA PAPER 66-666] Coupled radiative and convective heat fluxes in high temperature hydrogen propellant rocket nozzles with shape and temperature variations 19 p3449 A66-35612

[AIAA PAPER 65-557] Natural convective heat transfer to gas turbine rotor blade and thermal resistance of cooling system using centrifugal pump 20 p3627 A66-36926

Data correlations on forced-convective heat transfer to cryogenic fluids by nucleate, film and transition region boiling 20 p3677 A66-37098

Convective heat transfer to cryogenic nitrogen and methane from cylindrical surface by nucleate-and film-boiling at high pressures and large temperature differences 20 p3677 A66-37099

Engineering method to determine combined effects of entry and combustion heating on total char regression of ablative nozzle as function of distance from exit plane [ASME PAPER 66-MD-72] 21 p3806 A66-38500

Ignition of ammonium perchlorate composite propellants by convective heating [AIAA PAPER 66-65] 21 p3806 A66-38689

Radiative and convective heat transfer between two parallel streams of absorbing and emitting radiating gases 21 p3835 A66-38715

Free convection boundary layer along isothermal plate, using equation of laminar compressible flow and heat transfer, noting profile dependency upon wall coordinate 21 p3835 A66-38945

Unsteady convective heat transfer of incompressible fluid between two solid channel walls 21 p3728 A66-39340

Laminar forced-convective heat transfer for dissipative fluid in tube bounded by concentric circles 21 p3837 A66-39610

Regression rate for gas-solid hybrid motor described by convective heat transfer feedback mechanism through laminar sublayer [AICE PREPRINT 34B] 22 p3970 A66-39876

Heat transfer in liquid-film boiling on vertical surfaces analogous to free convection of gases in narrow vertical ducts 22 p4000 A66-40813

Free convective heat transfer in thermal boundary layer of rarefied gas 22 p3902 A66-40922

Disperse material heating by simultaneous radiative and convective energy with temperatures expressed as integral equations 23 p4148 A66-41270

Vacuum UV radiation measurement from high temperature nitrogen, detecting radiation from shock layer of ballistic model 24 p4208 A66-42182

Reentry heat flux condition transformation into specified convective coefficients and temperatures, accounting for variation of flux with wall temperature 24 p4261 A66-42795

## CONVERGENCE

Stability theorems concerning unconditionality of bases, considering Riesz theorem and Banach and Gilbert spaces 01 p0093 A66-10402

Coefficient properties and absolute convergence of Fourier series of periodic function 06 p0902 A66-16230

Proof of two theorems concerning convergence of Fourier-Lebesgue series 06 p0903 A66-16902

Convergence of nonlinear problem solutions with respect to higher derivatives 07 p1057 A66-17853

Convergence of trigonometric interpolation polynomials 07 p1058 A66-17864

Convergence of Chapman-Enskog expansion for linearized Boltzmann equation, using perturbation theory 07 p1081 A66-17935

Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964

Stability of complex moment problems determined by constructing sequence of interpolation polynomials which converge uniformly to solution in bounded region 07 p1060 A66-18099

Convergent series representation of system of measurable functions that are complete and orthonormalized 07 p1060 A66-18251

Convergence of transformations of differential equations to normal form 08 p1245 A66-19370

Convergence of numerical solutions of ODE initial value problems 09 p1394 A66-20616

Globally convergent iteration function for solution of polynomial equations according to certain algorithms 09 p1395 A66-20624

Convergence and uniqueness theorems and series convergence in difference equation theory 10 p1549 A66-21227

Convergence of solutions of finite-difference analogs of equation satisfied by generalized axially symmetric potential 11 p1723 A66-22986

Multidimensional spline theory generalized from one-dimensional spline theory and preserving minimum curvature, best approximation and convergence properties 11 p1723 A66-23182

Limit functions of sequence of solutions in nonlinear differential system of MHD, making no convergence assumptions 11 p1746 A66-23187

Limit functions of sequence of solutions in nonlinear differential system of MHD 11 p1746 A66-23188

General convergence theorem for gradient method of minimizing functions with Lipschitz continuous first partial derivatives, noting role of steepest descent algorithms 11 p1724 A66-23402

Convergence properties of exponential series expansions used as approximation in electrical network theory for real Schwartz distribution 11 p1724 A66-23423

Convergence of optimal control for denumerable system of differential equations treated by functional-space decomposition 14 p2267 A66-27672

Geometrical theory governing flow over surface of convergent spillway 14 p2277 A66-27936

Convergence of discrete analogs of Dirichlet problems for Poisson equation in two dimensions, describing finite difference method for producing algorithms 16 p2731 A66-30235

Convergence of transformations of differential equations to normal form 16 p2736 A66-30977

Limit properties of uniform process with independent increments 17 p2946 A66-32299

Aids in converging particular numerical process, noting similar technique for isotropic expansions in thermochemical equilibrium air 17 p2946 A66-32475

Fourier series of Gegenbauer function, examining convergence characteristics 18 p3126 A66-33696

Erdos and Turan theory of fine and rough convergence of interpolation and quadrature processes 18 p3127 A66-34543

Lacunary interpolatory polynomials and Mth derivatives prescribed in roots of unity, examining Dini-Lipschitz condition for convergence 18 p3127 A66-34638

Summability of independent random variables, discussing convergence properties of sequence 19 p3389 A66-35982

Class K matrices, discussing new methods and application to convergence rate of iteration procedures 19 p3391 A66-36335

Min-H Strategy in deriving two iterative methods for rapid convergence to optimum solutions for nonlinear variational two-point boundary value problems 19 p3466 A66-36677

Convergence of difference approximations in rectangular grids for general first-order quasi-linear hyperbolic initial value problems

in two independent variables 20 p3590 A66-37526

Class of nonlinear second-order differential equations with algebraic moving singular points, considering convergent series inversion and existence conditions 20 p3591 A66-37753

Asymptotic forms exhibited by powers of nonnegative matrix, discussing index of convergence and associated values 21 p3755 A66-38602

Unstable minimization problem of functional, examining construction of sequences and stability 22 p3938 A66-39899

CONVERGENT-DIVERGENT NOZZLE

Exhaust beam from colloid thruster investigated, using quadrupole mass filter [AIAA PAPER 64-874] 02 p0278 A66-11549

Analogy between gas flow through convergent/divergent nozzles and open side-contracted channel 08 p1205 A66-18628

Transonic flow in throat of convergent-divergent nozzle for continuous fluid acceleration from subsonic to supersonic velocities 23 p4013 A66-42015

CONVERGENT NOZZLE

Optimum conditions for molecular beam generation determined by measuring particle flow density and speed ratio of short beam pulses from convergent nozzle 16 p2752 A66-30384

Supersonic molecular beam apparatus, noting maximum intensity for variation of inlet stagnation pressure and nozzle-skimmer distance 16 p2746 A66-30385

Shock wave speed behind convergent and divergent ducts for different pressures and taper angles 17 p2913 A66-33072

Shock wave motion in tubes of diverging or converging cross sections 23 p4149 A66-41503

Neutrino producing cooling reaction rates indicate that discrete X-ray sources located in direction of galactic center are not neutron stars 05 p0760 A66-14895  
Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587  
Amplification of interaction of atoms and of pulsed or periodic cooling of transparent media produced by laser beam, noting changes in kinetic energy of atoms 13 p2093 A66-26021  
Free cooling of thin rod in constant temperature medium, finding temperature field for thermodynamics application 15 p2616 A66-29223  
Nozzle cooling and infiltrant loss from infiltrated refractory metal composites at high gas propellant temperature 19 p3385 A66-36157  
Experimental assembly for measuring true heat capacity of heat resistant insulating materials during natural cooling at temperatures from 1200 to 2400 degrees K 20 p3556 A66-36989  
Delayed energy produced by fission product decay when restart of nuclear rocket engine is considered, noting effects of cooldown requirements [AIAA PAPER 66-551] 22 p3946 A66-39676  
Surface properties, temperature effect, cooling and detectability of neutron stars, using pure iron and pure magnesium compositions 22 p3976 A66-39803  
Integral ratios for calculating diffusion rate of magnetic field into wall-cooled plasma 23 p4106 A66-41716  
Ion energy balance equation for ionosphere including effects of O, He, and H ions, thermoconductivity and cooling by atomic hydrogen and helium 24 p4198 A66-42431
- COOLING FIN**  
Contact effectiveness of space radiator for specific case of rectangular fin of constant thickness heated uniformly along one edge and perfectly insulated along opposite edge 03 p0444 A66-12771  
Free convection heat transfer in partially enclosed channel flow, noting effect of vertical fin geometry and temperature [ASME PAPER 64-WA/HT-33] 04 p0595 A66-13386  
Optimization of design parameters of parabolic radiating fins [ASME PAPER 65-HT-42] 05 p0784 A66-14754  
Heat rejection per unit weight of radiator with evolve type reflectors compared with radiators with rectangular fins, considering mutual irradiations of neighboring radiator parts [ASME PAPER 65-WA/HT-17] 05 p0790 A66-15647  
Grapho-analytical method of determining heat carrier parameters of cooler-radiator system in off-design operation 06 p0970 A66-16326  
Temperature distribution and efficiency of thick plate and annular fins used on heat exchangers, space radiators and nuclear fuel elements analyzed through heat conduction equation 16 p2827 A66-30815  
Thermal performances of radiative and convective plate fins, considering effect of mutual irradiation between surfaces, solving integro-differential equations describing process 16 p2827 A66-30816  
Vapor-fin heat rejection system employing boiling-condensing cycle, noting performance characteristics 18 p3055 A66-34381  
Heat transfer from gray fin-tube radiators with numerical results for diffuse surfaces, noting fin and tube emissivities 22 p3998 A66-40037
- COOLING SYSTEM**  
SA GAS COOLING SYSTEM  
SA REFRIGERATION  
SA VENTILATION  
Radiative vs active cooling systems as part of refurbishment requirements critical to economic feasibility of reusable launch vehicle systems 01 p0143 A66-10796  
XB-70A components and subsystem operation and design noting engine, electrical and cooling control systems [SAE PAPER 650841] 01 p0130 A66-10833  
Combined Peltier-Ettingshausen device evaluated for cryogenic refrigeration to 70 degrees K 02 p0272 A66-11490  
Three air-cooled and one water-cooled pressure suit evaluated in hot environments 03 p0327 A66-12360
- Cooling device for reentry vehicle windows consisting of rotating disk with radial slots placed in front of window 06 p0871 A66-16222  
Aerodynamically induced vibration in coolers, describing inclined splitter plates for noise and structural vibration elimination 07 p0991 A66-17492  
Comparison of 14 basic methods for cooling rocket engines 07 p1110 A66-17617  
Steady cooling regime of pseudoliquidified layer, determining cooling time and heat transfer coefficients of solid particles and liquid media 08 p1317 A66-18865  
Pressure drop and heat transfer to Newtonian fluids in cooled pipes for laminar flow, establishing empirical correlation 10 p1620 A66-21272  
Thermal insulation of hypersonic blunt body by central coolant injection formation of insulating layer between body and high temperature freestream 10 p1481 A66-21797  
Thermomolecular heat pump with cooling from gas diffusion through capillary material driven by external pressure difference 11 p1639 A66-22245  
Concorde fuel system in cooling application and adjustment of center of gravity through fuel distribution 11 p1637 A66-23168  
Operating characteristics of electrodeless MHD converter with primary winding cryogenically-cooled, comparing performance with one having conventional winding 12 p1803 A66-23749  
Microwave apparatus cooling system design problems 12 p1836 A66-24157  
Cooling systems for use in space, discussing specific radiator area and specific power 12 p1979 A66-24873  
Electric machines employing evaporative and universal cooling systems for aircraft use 13 p2041 A66-25902  
Low temperature techniques in satellite communications systems, noting maser, cooled parametric amplifier and trend toward closed-cycle refrigerators 13 p2042 A66-26104  
Vapor-cycle air conditioning for business aircraft, considering weight vs power consumption, compatibility with integrated system and test results [SAE PAPER 660208] 13 p2002 A66-26386  
Cooler for semiconductor lasers and photodetectors using low temperature gas 13 p2104 A66-26559  
Electron beam heating of alloy specimen and liquid-nitrogen cooled anvils for rapidly cooling it 13 p2084 A66-26560  
Noise measurement in axial flow fans for military vehicle cooling installations 14 p2220 A66-27567  
Negative effect of air countercurrents and thermal stresses on performance of cooling systems of gas turbine rotor disks with lateral air flow 15 p2570 A66-28776  
Semiconductor cooler creating hypothermia in small animals, operating on Peltier effect and employing quaternary metal alloy 15 p2444 A66-29497  
Design and laboratory tests of vapor-phase heat exchanger coupled to power generating bismuth telluride thermopile for waste heat dissipation 16 p2637 A66-31101  
Water conditioned suit performance characteristics noting cooling rate, inlet and outlet temperatures, etc 16 p2643 A66-31131  
Thermostability and control of airborne electronic equipment in closed-loop forced-air cooling systems 16 p2663 A66-31325  
Cooling of diodes, transistors and thyristors at intermediate power levels, determining heat dissipation by radiation, conduction and convection 16 p2664 A66-31346  
Cryogenic system used to remove heat from space simulator solar radiation source 20 p3541 A66-37071  
Solid cryogenics as heat sinks for cooling electronic components, particularly IR detectors in aircraft and spacecraft 20 p3676 A66-37073  
Thin insulating Teflon film bonding to internal surface of space cryopanel for increased heat transfer and faster cooling 20 p3677 A66-37100  
Fan selection for high-altitude cooling of electronic equipment 20 p3527 A66-37346  
Aircraft equipment cooling techniques and

systems, particularly natural or free convection 21 p3699 A66-39614

Materials and cooling of aircraft gas turbine engines, noting nickel and tantalum alloys, turbine-inlet temperatures, coatings, etc 23 p4122 A66-41662

**COORDINATE SYSTEM**

SA INERTIAL COORDINATE SYSTEM

Image translation from plate into coordinate system on another plate using homographic coordinates of object applied to astrometry 01 p0135 A66-10276

Attached coordinate system for approximate solution of compression waves emitted by expanding sphere at constant rate in ideal medium 01 p0057 A66-10420

Kinematic and physical relations for small motion superposed on initial motion defined in fixed reference frame 01 p0106 A66-10735

Tables and maps of geomagnetic coordinates corrected by higher order spherical harmonic terms 01 p0062 A66-10888

Algebraic sign of voltage field components in orbital coordinate system, using dipolar approximation of Earth magnetic field 02 p0295 A66-11655

Rotation of rigid body force affected, using matrix equations, noting coordinate system and differential equation 02 p0290 A66-11989

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 02 p0224 A66-12118

Geometric shape of axisymmetric shock waves from point source explosion in nonhomogeneous medium 03 p0355 A66-12621

Astrometry current status, examining establishment of coordinate system and determination of astronomical constants 03 p0427 A66-12922

Establishment and plotting of suitable coordinate systems for solution of geodetic problems via satellites 03 p0367 A66-13198

Corrected tables and maps of geomagnetic coordinates, covering methods of calculation and corrected data charts 04 p0513 A66-13377

Dynamic equations in quasi-static and quasi-solenoidal approximations to describe synoptic meteorologic processes in spherical coordinate system 04 p0540 A66-13412

Lunar topographical asphericity, lunar coordinates, absolute and relative, harmonic analytical interpolation, formations, stratigraphy and optical librations 07 p1139 A66-18265

Fundamental concepts of tensor calculus essential for technological application 08 p1245 A66-18859

Pendulum motion in system of coordinates related to pendulum base, considering damping of absolute and relative angular velocity 08 p1223 A66-18892

Graph for system of currents of solar diurnal variation during IGY winter season, considering night and evening vorticity individually and using coordinate system 08 p1221 A66-19797

Coordinate systems describing portions of Friedman world and adjacent empty regions do not satisfy Liechnerovitch continuity conditions 09 p1403 A66-20595

Consistency of subtraction technique for calculating gravitational mass in nonquasi-rectangular coordinates from surface integrals provided by von Freud superpotentials 10 p1555 A66-21195

Mutual orientation of oblique aerial photographs at nadir distance greater than 50 degrees for simultaneous rotation of y and z axes of universal autograph 10 p1536 A66-21800

Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 10 p1556 A66-21994

Geographic distribution of solar diurnal variations of magnetic field during quiet days determined by coordinate

system 11 p1696 A66-22421

Passive element analogs for linearized three-dimensional elasticity derived in rectangular, cylindrical and polar coordinates equating power dissipation and strain energy [ASME PAPER 65-AV-4] 11 p1780 A66-22467

Retarded observer time as coordinate in relativistic spherical hydrodynamic equations prevents Schwarzschild surface formation 11 p1772 A66-22779

Cylindrical coordinate system describing geomagnetic field analyzed, noting consequences in magnetic cartography when going from field to time 12 p1875 A66-24970

gradients 12 p1875 A66-24970

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method 13 p2206 A66-26455

Solutions of nonstationary equations of plane laminar MHD boundary layer, using transformation to specialized form of curvilinear coordinates 14 p2338 A66-26773

Astrometry current status, examining establishment of coordinate system and determination of astronomical constants 14 p2380 A66-27271

Effect of faulty compensation for accelerating force of Earth gravity on accuracy in determination by inertial navigation system of coordinate of object in flight 14 p2328 A66-27361

Reduction of order of aeroelastic and flutter motion equations while retaining purely elastic contribution of eliminated coordinates, using quasi-static assumption and matrix algebra 14 p2405 A66-27996

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 14 p2286 A66-28077

Equivalent mass matrix for rectangular plate elements in bending, noting coordinate system 15 p2610 A66-29306

Distribution of arrival directions of muon-rich air showers, using equatorial and galactic coordinate systems 15 p2579 A66-29524

Tesseral harmonics of coordinates using Baker-Nunn data and geopotential and dynamical procedures, noting iterative cycle for correction determination 15 p2491 A66-29999

Photographing of satellites, using optical system and image converter for determining coordinates 15 p2453 A66-30002

Two-dimensional flow in fluids related to system of vortex coordinates, using Hamiltonian operator for characterization of motion studies 16 p2683 A66-30213

Evaluation of nonstereoscopic pairs of photographs obtained from vertical base by moving camera, determining spatial coordinates of points on photographs 16 p2703 A66-30512

Geometrical quality of elements of exterior orientation after double and single point resection in space, noting position determining characteristics of linear and angular parameters 16 p2704 A66-30515

Radiation coordinates for gravitational radiation in general relativity 16 p2746 A66-30528

Error determination in autonomous determination of coordinates, obtaining solution for kinematic equations of navigation in near-polar region 16 p2744 A66-31146

Nomogram construction for transformation of astronomical object position from one spherical coordinate system to another, using trigonometric functions 16 p2737 A66-31398

Book on spherical astronomy including celestial coordinate systems, parallax, diurnal motion, precession and nutation, time measurement, etc 16 p2806 A66-31738

X-Y plotter for analog computers, analog to digital converters and digital computers 17 p2925 A66-32313

Generalized vertical coordinate system for application in atmospheric dynamics 18 p3129 A66-33965

Distribution law for collective coordinates established via probability methods, noting application to Ising model and to problems of absorption 18 p3135 A66-34632

Integration of equations, approximating Maxwell equations, in curvilinear coordinates separating scalar Laplace equation, with vectors representing electric and magnetic fields 18 p3136 A66-34971

Space vehicle orientation with respect to rotating system of coordinates 19 p3467 A66-35279

Optimum radar measurement of multiple target coordinates with unknown signal amplitudes and phases 19 p3296 A66-35303

Field determination of coordinates of points of mountainous terrain from aerial photographs with known elements of external orientation 19 p3353 A66-35363

Photoelastic Wertheim law in general tensor coordinate system derived for linearly anisotropic or isotropic homogeneous matter 19 p3474 A66-36320

Coordinate control theory of self-adapting systems, considering problems of sensitivity, optimization and invariance 20 p3535 A66-36852

Divergence of gas and dust tails of comets calculated, using moving coordinate with origin at comet head 20 p3653 A66-37797

Coordinate systems describing portions of Friedman world and adjacent empty regions do not satisfy Liechnerovitch continuity conditions 20 p3603 A66-38129

Vibrations of complex structure analyzed, using coordinate system relative to displacement modes, calculating errors due to natural vibration frequencies 21 p3826 A66-38584

Graph for system of currents of solar diurnal variation during IGY winter season, considering night and evening vorticity individually, using coordinate system 21 p3733 A66-38793

General theory of stability of elastic equilibrium in three-dimensional system of orthogonal curvilinear coordinates 21 p3828 A66-38803

Elastic stability theory for second-order strain components in Cartesian, cylindrical, spherical and polar coordinates 21 p3828 A66-38804

Mixed bending problem of eccentric ring solved by coordinate system with origin at center of outer boundary of cut 21 p3831 A66-39290

Device that will conveniently, rapidly and precisely determine position of point in specific perspective from space coordinates 21 p3745 A66-39332

Approximate solution of two-dimensional boundary layer problem using Rayleigh-Ritz method, coordinate functions and interpolation 21 p3831 A66-39351

Satellite space coordinates from photographs made simultaneously from two points on Earth surface 22 p3917 A66-39739

Differential equations for stream functions of particle trajectories in unsteady three-dimensional flows in cylindrical and spherical coordinate systems 22 p3898 A66-40111

Magnetic coordinate definitions and relation to parameters of geomagnetically trapped particles 22 p3912 A66-40425

Conservative systems motion stability, generalizing precession and nutation of gyroscope with respect to noncyclic coordinate 22 p3948 A66-40681

Successive approximation method for optimization of nonlinear systems of ordinary differential equations with limitations on phase coordinates 23 p4084 A66-41352

Feedback compensated third-order control systems analysis, using coefficient plane reference system 23 p4051 A66-41703

Satellite gravitational stabilization system in orbital coordinate system, considering atmospheric resistance and damping natural oscillations 23 p4134 A66-41979

Middle surface geometry of thin shells using line coordinate system with arbitrary direction and length of base vector 24 p4291 A66-42737

**COORDINATE TRANSFORMATION**

SA SCHWARZSCHILD METRIC

Expansion of Joukowski transformation into third-degree algebraic solution for two projective planes, using certain complex function lying between two Gaussian planes 01 p0092 A66-10198

Coordinate transformation for synthesizing network functions, considering matrix equation used in Foster form realization for RC driving point impedance 02 p0207 A66-11881

Transformation and equivalence of higher than second order homogeneous linear differential equations 05 p0708 A66-15153

Boundary layer equation transformation, using special curvilinear coordinates 08 p1206 A66-18872

Trajectory analysis and Birkhoff rings in restricted three-body problem in three-dimensional coordinate system 09 p1453 A66-20251

Graphical device for transformation between horizon system of coordinates and equatorial system, noting construction techniques, operation and application 09 p1381 A66-20395

Stereographic mapping of plane Cartesian coordinate grid onto sphere for polar navigation use 09 p1401 A66-20914

Unified theory of cold plasma nonlinear oscillations /Dolph/ fails to apply to traveling wave solutions 10 p1569 A66-21921

Equations of linear automatic control systems decomposed asymptotically 10 p1518 A66-21979

Cardinal points and focal lengths of holographic system established by treating holographic imaging as projective transformation between object and image space 11 p1706 A66-22872

Relativistic rocket mechanics, considering coordinate transformation, velocity and dependence of mass on inertial reference system 11 p1775 A66-23118

Transformations for study of nonlinear systems behavior in neighborhood of phase plane infinity 13 p2054 A66-26089

Coordinate transformation of Schwarzschild metric for gravitational field of oblate Earth and equatorial satellite orbits into symmetric metric 13 p2187 A66-26137

Tensor analysis, discussing stress tensors, metric tensors, Riemann-Christoffel curvature tensor, coordinate transformations, etc 14 p2320 A66-26921

Canonical transformation in optimal steering and cut-off-relight programs for orbital transfer about central field 14 p2387 A66-28182

Motion equation of variable mass point solved, using coordinate transformation 15 p2538 A66-29048

Superpotentials in relativity theory, noting use of Freud identities and finite coordinate transformations 15 p2542 A66-29654

Moment equations from collisionless Boltzmann equation solved by transformation into polarized coordinates 15 p2555 A66-29784

Transformation equivalency of various forms of partial differential equations of motion of nonholonomic systems 16 p2747 A66-31144

Variable-parameter network analysis using z-transformation 17 p2900 A66-32199

Transformation of tesseral harmonics under rotation in elementary and self-contained method 17 p2921 A66-33225

Nonlinear transformations for solution of variational problems 18 p3089 A66-33737

Generalized vertical coordinate system for application in atmospheric dynamics 18 p3129 A66-33965

Brown lunar theory interpretation of observed lunar motion and associated rectangular-to-polar lunar coordinate transformations 18 p3234 A66-34655

Equations of linear automatic control systems decomposed asymptotically 19 p3324 A66-35857

Generalized Lur coordinates used in canonical forms for controllable systems, with applications to optimal nonlinear feedback 20 p3535 A66-36848

Congruent relativistic gravitational fields, red shift and geodetic coordinate transformations 20 p3603 A66-38011

Comparison variables transformation of linearized perturbation initial value problems for nonlinear ordinary first-order differential equation 21 p3756 A66-38817

Book on plane problems in elasticity theory for calculation of deep beams with arbitrary boundary curvilinear

coordinates 21 p3834 A66-39616

Oscillatory properties of linear matrix differential system, applying generalization of polar coordinate transformation to certain systems of second order 24 p4233 A66-43100

**COORDINATION POLYMER**

Crystal and molecular structure of chlorotetraammine /sulfur dioxide/ ruthenium chloride 06 p0820 A66-15939

Coordination of substituted pyridine N-oxides with oxovanadium /IV/ cations, noting stoichiometric variations with changes 09 p1339 A66-20878

**COPOLYMER**

Silicone copolymers lubricants containing both trifluoropropyl and halophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5] 02 p0237 A66-12233

Mechanical double refraction of unsaturated copolymer polyesters of styrene subjected at different temperatures to constant tensile stress [ONERA TP 276] 04 p0538 A66-14242

Silicone copolymer lubricants containing both trifluoropropyl and halophenyl substitution to cover wide temperature range [ASLE PREPRINT 65-LC-5] 12 p1889 A66-24990

Brewster coefficient as function of temperature, number of cross-linking modes and styrene content for diethylene-glycol succinofumarates copolymerized with styrene 14 p2319 A66-28273

Superheating crystallization of ethylene-propylene and ethylene-butene-1 copolymers and extended chain morphology 17 p2943 A66-32557

**COPPER**

Van der Pauw method for measuring resistivity, Hall mobility and thickness of thin metallic film under vacuum, considering copper films 01 p0119 A66-10393

Dislocation relaxation of silver and copper and asymmetry of Bordoni internal friction peak of metals 01 p0087 A66-10603

Vibration compaction of two-component spherical copper powders, noting effects of frequency amplitude and particle sizes 01 p0087 A66-10744

Electrical properties of copper diffused p-type indium antimonide crystals 01 p0127 A66-11030

Electric properties of n-type GaAs after alloying with Cu, determining impurity concentrations 02 p0277 A66-12095

Thin copper clad laminates and problems arising in application to multilayer printed circuit boards 03 p0347 A66-13330

Total nonelastic strain recovery of copper single crystals after small prestrains, discussing parameters 04 p0535 A66-13400

Low temperature copper diffusion limits frequency range of cadmium sulfide shear mode diffusion layer transducer 06 p0851 A66-16461

Measurement of creep rate complex stress time relations for copper under loading conditions at 250 degrees 06 p0897 A66-16949

Radiotracer measurements of copper incorporated from quartz into GaAs 08 p1268 A66-18663

Copper and zinc abundances in carbonaceous, enstatite and ordinary chondrite determined by neutron activation techniques 08 p1291 A66-19093

Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 08 p1277 A66-19623

Tensile properties of composites of tungsten or molybdenum wire uniaxially aligned in copper matrix 09 p1393 A66-20661

Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 10 p1613 A66-21238

Preparation and physical properties of polytetraacyanoethylene /TCNE/ copper chelate film, noting electric conductivity and heat treatment effect 10 p1574 A66-21348

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing

defect occurrence 10 p1546 A66-21505

Low energy electron diffraction study of epitaxial deposition of copper on single crystal /110/ face of tungsten under ultrahigh vacuum 12 p1894 A66-23911

Low energy electron diffraction observation of calibrated epitaxial nickel film on /111/ copper 12 p1894 A66-23912

Mechanical deformation used in fabrication of composite made of continuous columbium wires in copper matrix by drawing, noting optical inspection 12 p1895 A66-24378

Sputtering yields of copper single crystals as function of normally incident argon-ion energy 13 p2158 A66-25050

Chemical composition effect on fracture properties of Al-Zn-Mg-Cu alloys 14 p2317 A66-28009

Surface hardening of titanium alloys by copper diffusion for small-size machine parts production 15 p2522 A66-29189

Radioactive tracer technique to measure yield and angular distribution of copper sputtered from monocrystalline target subject to cesium ion bombardment [AIAA PAPER 65-379] 15 p2566 A66-29290

Free energy of aluminum alloy containing two-dimensional Guinier-Preston zones of copper atoms 16 p2722 A66-30307

Copper and Armco iron structural defects during cyclic deformation studied by electron-microscope and optical-microscope techniques 16 p2727 A66-31528

Emission spectrum of copper atom used to measure temperature and concentration of charged particles in DC-arc plasma burning under water 16 p2766 A66-31600

Metallography of cadmium crystals with copper impurities obtained by sublimation from copper powder, noting that copper solubility is limited 17 p2984 A66-33137

Elastic and plastic properties of fiber-reinforced and continuous skeleton tungsten-copper composite materials 17 p2941 A66-33425

Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 19 p3474 A66-35861

Fatiguing at room temperature resulting in observable diffusion of silver into copper, using precipitation reaction to analyze influence of large number of vacancies 20 p3584 A66-37618

Metal strength in pulsed magnetic fields at low temperatures, noting resistance of copper wire as function of number of pulses 21 p3750 A66-39064

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 23 p4081 A66-41526

**COPPER ALLOY**

**SA BRASS**

Thermal and electrical properties of copper antimony telluride/tin telluride system as function of composition 01 p0116 A66-10190

Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 01 p0087 A66-10745

Effect of varying percentages of constituent elements in alumina dispersion-strengthened copper-nickel alloys, listing creep rupture properties 04 p0534 A66-13378

Aging of Cu-Ti alloy stimulated by Al additions to 2 percent and retarded by Al additions of 2 to 4 percent 12 p1892 A66-23521

X-ray study of 16 monolith and powdered brass samples with 30.07 to 40.1 percent copper, indicating two phase fields for gamma region of Cu-Zn system 12 p1896 A66-24866

Electrical resistance and thermoelectric power of Ni-Cu solid solutions near Curie point 13 p2162 A66-25407

Plastic deformation effects on preaged aluminum-copper alloy structure subjected to 40-75 percent compression 13 p2110 A66-25965

Welded beryllium-copper structures, techniques and properties 13 p2086 A66-26015

X-ray method determining diameter of Guinier-Preston I zones and fraction of copper atoms contained in such zones in Al-Cu alloys 13 p2111 A66-26583

Age hardenable nickel-copper steels with strength achieved by copper phase hardening 16 p2723 A66-30319

Kinetics of natural aging process of Al-4 percent Cu alloy, experiments indicate addition of up to 1.0 percent Mg proportionately slows down aging process 16 p2723 A66-30871

Mechanical strength, toughness, elastic modulus, relaxation stability and specific conductivity of copper-titanium alloys 16 p2727 A66-31568

Grain growth from solution precipitation and grain coalescence in liquid phase sintering of W-Ni-Fe and W-Ni-Cu alloys 17 p2939 A66-32393

Phonon-drag thermopower variation in dilute copper alloys assuming Rayleigh law for phonon scattering 17 p2984 A66-33152

Elevated temperature tensile properties of copper alloy-tungsten fiber-reinforced composites 18 p3120 A66-33724

Graphite content effect on antifriction properties of graphitized nickel-based copper and iron alloys 18 p3117 A66-34981

Grain boundary cavity growth in Al-Cu alloy during compressive creep testing 22 p3935 A66-40291

Susceptibility to cold deformation of semifinished B95-2 Al-Zn-Mg-Cu alloy products, noting machinability in manufacturing of parts 22 p3928 A66-40885

Thermoelectric power and electric resistivity of copper-gold alloy doped with 3d transition metals as function of temperature and atomic number of impurity 23 p4114 A66-41712

**COPPER COMPOUND**

Stress-strain behavior of tungsten fiber-reinforced copper composites, discussing room-temperature tensile and dynamic-modulus tests 05 p0702 A66-15324

Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 12 p1922 A66-24218

Resistivity and thermoelectric power of copper telluride at various temperatures, finding that it retains semiconducting properties in liquid state 13 p2162 A66-25411

Charge carrier mobility variation with temperature in copper phthalocyanin thin film 17 p2977 A66-32286

Energy spectrum of semiconductor compounds with chalcopyrite structure analyzed, using perturbation theory, noting changes resulting from crystalline and spin-orbital interactions 21 p3799 A66-38923

Superhigh vacuum creation in OGRA-1 facility, using titanium sputtered liquid nitrogen-cooled copper surfaces 22 p3957 A66-40582

Oxygen inhibition of grain boundary movement and stabilization of optical transmission in cuprous iodide thin film 23 p4110 A66-41152

Thermoelectric properties of solid solution of germanium telluride in copper antimony telluride 23 p4114 A66-41572

Liquid filter cell for telescopes, using half-saturated solution of cupric sulfate to block red leak of UG filter glass 23 p4071 A66-41927

**COPPER FLUORIDE**

Sublimation pressure of copper fluoride measured via mass spectrometry, noting dissociation energy 19 p3295 A66-36062

**COPPER OXIDE**

Cuprous oxide-cadmium sulfide junction photocells enhanced in photosensitivity and rectifying properties by exposure to periods of light and darkness 03 p0413 A66-13190

Neutron and proton bombardment effects on exciton spectrum of cuprous oxide 06 p0937 A66-17139

Film-type photocell consisting of p-n heterojunction between copper oxide and cadmium sulfide with secondary maximum in sensitivity 09 p1429 A66-20821

Cuprous oxide conductivity caused by ionization of thermal lattice defects 14 p2358 A66-27091

Temperature dependence of resistivity of zirconium oxide with copper oxide additions indicates suitability as heat sensitive resistor material in 300 to 1000 degree C range 16 p2777 A66-30872

Cuprous oxide conductivity caused by

ionization of thermal lattice defects 22 p3967 A66-40847

**CORE**

SA EARTH CORE

SA HONEYCOMB CORE

SA MAGNETIC CORE

SA REACTOR CORE

Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, giving theoretical foundations /Part I/ 23 p4091 A66-41859

Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, for case of graphite core /Part II/ 23 p4091 A66-41860

**CORE FLOW**

Secondary motion generation in vortex field, noting vortex core deformation by oscillation, radial perturbation effect on vorticity distribution, etc 13 p2070 A66-26715

**CORIOLIS EFFECT**

Atmospheric tidal oscillations, Coriolis forces dominate diurnal tide causing small scale depth 05 p0672 A66-15026

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 05 p0774 A66-15036

Comparative effects of prolonged rotation at 10 rpm on postural equilibrium in vestibular normal and vestibular defective human subjects 06 p0813 A66-16826

Perceiving undetectable rotation in semicircular canals by employing self-induced Coriolis stimulation, determining psychophysical functions for direction or rotation discrimination at different yaw velocities 09 p1337 A66-20531

Brief Vestibular Disorientation Test /BVDT/ assesses subject reaction produced by head movements in rotating chair 11 p1647 A66-22574

Coriolis interaction in first and third fundamental frequencies of ozone, noting vibration rotation spectrum and coupling of two states 13 p2016 A66-25373

Vegetative responses of human organism to angular, linear and Coriolis accelerations 13 p2011 A66-26230

Psychological and physiological reaction to Coriolis effect under artificial gravitational field simulated in rotating space station 15 p2443 A66-28682

Small Coriolis accelerations effect on functional state of human heart 15 p2437 A66-29474

Gravitational instability of magnetoplasma in radial electric field, noting resistive drift modes, stabilization criterion effect of Coriolis force, Landau damping, etc 17 p2966 A66-32425

Fluctuations in human acoustic sensitivity after 24 hours in room under effect of Coriolis accelerations of various magnitudes 17 p2861 A66-32941

Wave propagation in rarified plasma under action of Coriolis force, Hall current and self-gravitation, noting LF coupling rotation effects, etc 17 p2973 A66-33000

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 18 p3257 A66-34594

**CORK**

Sheet cork as thermal protection during vehicle launch and ascent flight [AIAA PAPER 65-356] 22 p3999 A66-40358

Internal thermal behavior of charring cork with reference to heat shield design 24 p4294 A66-42783

**CORONA**

SA AURORA

Radiative transfer equation for isothermal model of solar corona, noting radiation flux and electron density variation 01 p0131 A66-10267

Heating of solar prominence by surrounding corona, considering nonlinear dependence of thermoconductivity coefficient on temperature 01 p0131 A66-10268

Drift of magnetic fields of sunspots and bipolar areas from photosphere into corona,

coronal formations, corpuscular fluxes and nature of integral solar magnetic field 01 p0134 A66-10271

Soviet electronic telescope, indicating possibility of noneclipse observation of coronal lines in IR band 01 p0137 A66-10456

Coronal spectrum of eclipse of February 15, 1961 studied at constant height as function of heliographic latitude from circular slit spectrograph plates 02 p0286 A66-11354

Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 02 p0286 A66-11357

Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 02 p0286 A66-11358

Quiet chromosphere and corona noting line intensity and coronal electron and kinetic temperature 03 p0420 A66-12841

Heating of corona and chromosphere for generating solar wind 03 p0421 A66-12848

Data on origin and effects of dust particles in interplanetary space obtained from solar corona, zodiacal light and meteor observation 03 p0425 A66-12850

Intensity of solar corona, Wolf number and biological and chemical tests conducted in Italy 04 p0577 A66-13817

Occultation of Tau A radio source by solar corona, noting interaction of radio source with corona irregularities 05 p0749 A66-15128

Achromatic coronagraph for spectrography of solar corona 07 p1030 A66-17246

Polar rays of solar corona, discussing distribution, magnetic field approximation, electron density and kinetic temperatures 07 p1133 A66-17418

Extraordinarily enhanced radial emission when radio source Taurus A was occulted by supercorona, concluding that supercorona shape is affected by intensity and direction of inclined interplanetary magnetic field 07 p1136 A66-17643

Isophotometric representation of solar corona, using photographs of equal density 07 p1136 A66-17735

Coronal and prominence phenomena accompanying solar flares noting shock wave, radio burst, ionospheric fadeouts and absorptions, coronal density and temperature increases, etc 07 p1130 A66-18075

Dynamical properties of solar wind and solar corona atmosphere with extended temperature bound strongly by gravity 07 p1132 A66-18263

Calculation of intensity and polarization of forbidden lines of Fe XIII ion in solar corona in presence of nonradial magnetic field 08 p1287 A66-18640

Green corona before birth and after death of calcium plage in intensity plot vs heliographic latitude 09 p1455 A66-20379

Stability of expanding corona against radial compressional waves 09 p1455 A66-20403

Solar wind enhancement of heavy element content in composition of solar corona relative to value for photosphere 09 p1456 A66-20415

Solar corona emission line polarization resulting from anisotropic effect of photospheric radiation 09 p1442 A66-20463

Radio brightness distribution over quiet Sun and various deductions concerning electron temperature and density of corona, including data on overdense regions radiating thermally 10 p1601 A66-21061

Thermal origin of X-ray radiation of quiet Sun possible, suggesting quasi-stable component produced in undisturbed corona and slowly varying component in active corona 10 p1598 A66-21087

Dielectronic recombination for low density plasma, estimating coefficient and ionization balance for iron and calcium ions in corona 10 p1602 A66-21088

Resonance lines of coronal ions of silicon appearing in two widely separated spectral regions 10 p1602 A66-21092

Collisional excitation of autoionizing levels in solar corona 10 p1557 A66-21093

White-light corona of Sun photographed with rocket-mounted Lyot coronagraph equipped with external occulter, noting agreement of rocket with eclipse

data 10 p1603 A66-21112  
 Exospheric model of solar wind for ionized atmosphere with velocity-dependent collision cross section 10 p1605 A66-21206  
 Solar radio bursts used to study physical properties of corona 10 p1609 A66-21853  
 Coronal spectra of solar eclipse of 1952 at Khartoum, noting spectral distribution of total corona, F corona and electron densities and separation of K and F coronas 11 p1768 A66-22364  
 Monograph on solar corona physics covering ground based, satellite and sounding rocket observation, spectral emission and absorption lines, ionization mechanism, RF and UV radiation, etc 12 p1949 A66-24069  
 Polar magnetic field variability confirmed by study of solar corona during total eclipse of May 30, 1965 in South Pacific 16 p2794 A66-30658  
 Solar activity review discussing sunspots, flares, coronal condensations, etc 17 p2997 A66-32021  
 Solar corona emission spectrum and narrow passband photography of solar disk, noting measurement of intensity variation and absorption coefficient 17 p2999 A66-32133  
 Solar supercorona wave scattering effect on position and shape of discrete radio source 17 p2999 A66-32235  
 Solar corona and interplanetary plasma noting solar wind effect on comet tails and shock wave caused by interaction of geomagnetic field and plasma 17 p3000 A66-32272  
 Theoretical transition probabilities of forbidden lines and unobserved lines of ions in solar corona 18 p3230 A66-34151  
 Radial diffusion effects on composition of solar corona and solar wind 18 p3168 A66-34344  
 Silicon, iron and nickel in solar corona determined by method of Pottasch 18 p3233 A66-34575  
 Spectral analysis methods used to calculate iron abundance in solar corona 18 p3233 A66-34577  
 Coronal scattering of radiation from solar radio source, considering angular deflections and brightness 18 p3199 A66-35044  
 LASL lens design program for Doublet Achromat, from existing Fraunhofer design, used in solar corona monochromatic photography 19 p3354 A66-35383  
 Winking filaments, prominence and coronal magnetic fields 19 p3463 A66-36171  
 Polar coronal ray form relationship to overall solar corona form 19 p3464 A66-36299  
 Brightness of white corona in vicinity of solar prominences determined by trichromatic selection from color pictures of Sun during eclipse 19 p3454 A66-36610  
 Detectability of coronal IR lines due to Mg, Al and Si ions with practicable IR spectrometers and photoconductive detectors, considering atmospheric attenuation 20 p3649 A66-37333  
 Solar magnetic field effect on solar wind, computing solar wind properties and coronal density distribution 20 p3630 A66-37334  
 Solar chromosphere observations, noting distribution of spicules and role in coronal heating 20 p3656 A66-38051  
 Primary cosmic radiation composition, discussing abundance of protons, He nuclei and heavier nuclei 20 p3632 A66-38098  
 Electron temperature of solar corona, noting radiative transfer of radio emission in corona, deriving distribution of brightness temperature over solar disk 21 p3811 A66-38638  
 Soviet papers on solar corona and corpuscular radiation in interplanetary space 21 p3812 A66-39119  
 Soviet observational data on solar corona and wind collected during solar eclipse of June 19, 1936 21 p3813 A66-39120  
 Photometry, polarization, structural peculiarities and density distribution of solar corona 21 p3813 A66-39121  
 Basic laws of variations in detailed coronal structure with solar activity phase 21 p3813 A66-39122  
 Arc shaped formations in solar corona, discussing possible existence of solar magnetic field with 22-year cycle of variations 21 p3813 A66-39123

Microparameters of solar corona as physical system, discussing Vsekhsvyatskii-Bugoslavskaja and Chapman theories 21 p3813 A66-39124  
 Polar coronal temperature inferred from density gradients and based on solar wind and latitude dependence of coronal composition 22 p3983 A66-40698  
 Scattering angle of spherical radio waves on isotropic and radially elongated inhomogeneities of supercorona of Sun 22 p3983 A66-40754  
 Transient anisotropic cosmic ray increase during recovery phase of Forbush decrease due to reflection from receding blast wave and co-rotating shock wave formed during explosive heating of solar corona 23 p4123 A66-41687  
 Solar UV emission lines for 11 elements heavier than helium analyzed, obtaining relative abundances values and relation between electron temperature and temperature gradient in chromosphere-corona transition region 23 p4130 A66-41809  
 Solar corona pictures during July 1963 eclipse, analyzing polar rays frequency distribution along Sun limb and deviation from radial direction, all linked to solar activity cycle 23 p4123 A66-41810  
 Angular velocity of solar corona determined as function of radial distance from Sun including effect of solar wind, magnetic field and viscosity 23 p4130 A66-41811  
**CORONA DISCHARGE**  
 Electron passage from surface ion into semiconductor layer interior during charging from corona discharge, estimating thermal overshoot and tunneling through potential barrier 01 p0071 A66-11025  
 Progressive modification of anode surface of negative point-to-plane system used in corona discharge with microcrystals becoming seat of luminous phenomena 03 p0395 A66-12977  
 Transition from coronal streamer discharge to spark discharge in long air gaps, noting leader role in streamer formation 06 p0919 A66-16876  
 Point-discharge currents between negative points and positive plane 11 p1695 A66-22376  
 Intensity variations of 5303 and 6374 angstrom coronal lines during last two solar cycles compared 12 p1952 A66-24931  
 Tornado dehydration and burning effects in terms of conventional hot wind mechanism, corona discharge mechanism and new ring-current mechanism 13 p2122 A66-26126  
 Correlation between clear air turbulence and aircraft electrical activity, describing corona discharges from DC-8 tail antenna 15 p2426 A66-28922  
 Siting of static discharger to control nature and occurrence positions of coronas to minimize RF noise capable of causing hazard to aircraft navigational aid systems 19 p3282 A66-36752  
 Radio wave propagation in simple plasma in presence of solar gravitational field, noting coronal and relativistic effects 21 p3771 A66-39270  
 Coronal emission-line intensities in extreme UV, calculating fluxes for resonance lines of coronal ions from rocket measurement data 21 p3816 A66-39553  
 Coronal emission lines in presence of strong sky background utilizing difference between gradients of line and sky intensities 21 p3816 A66-39554  
**CORONAGRAPH**  
 Achromatic coronagraph for spectrography of solar corona 07 p1030 A66-17246  
 White-light corona of Sun photographed with rocket-mounted Lyot coronagraph equipped with external occulter, noting agreement of rocket with eclipse data 10 p1603 A66-21112  
 Design of simplified noneclipse coronagraph, describing optical system and basic performance characteristics of instrument 22 p3921 A66-40958  
**CORONAL CONDENSATION**  
 Sunspots, plagues, coronal activity, flares, prominences and emission of coronal rays in solar center activity 03 p0420 A66-12842  
 Coronal condensation observation indicates existence of long-lived quiescent

prominences due to continuous accretion of new coronal gases 05 p0761 A66-15092  
 Current knowledge and theories of solar radio bursts and flares of various types, coronal condensation effects and quiet Sun as sources of radiation 07 p1118 A66-17631  
 Total intensities of continuum and of red, green and yellow coronal lines emitted by sporadic coronal condensation shown to yield lower limits to Fe and Ca abundances 20 p3649 A66-37332  
 Acceleration of plasma cloud from Sun producing geomagnetic storm, noting magnetic cloud squeezed out from sunspot region 24 p4262 A66-42459  
**CORONARY CIRCULATION**  
 Plane crash as result of pilots coronary disease, discussing prevention and rehabilitation 04 p0469 A66-14387  
 Electromagnetic and ultrasonic flow measurement of blood flow rate for cardiocirculatory physiology, discussing future application of nuclear resonance and laser 14 p2230 A66-27553  
 Levy hypoxia test and associated arterial oxygen desaturation and increased cardiac output 24 p4163 A66-42452  
**CORPUSCULAR RADIATION**  
 Corpuscular flux entry zone and spiral time distribution of disturbance maxima 01 p0133 A66-11165  
 Ionosphere electron content near auroral zone obtained from differential Faraday observations of multifrequency beacon satellite Explorer XXII, noting corpuscular radiation role 02 p0223 A66-12017  
 Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 02 p0284 A66-12133  
 Corpuscular radiation effect on electronic components during interplanetary flight, assigning safety margins to each component 04 p0493 A66-13606  
 Quasi-stationary corpuscular streams from Sun suggesting role of active regions in formation 05 p0748 A66-14867  
 Properties of solar and geophysical phenomena analyzed, concluding that magnetic field of corpuscular fluxes has forceless structure 05 p0753 A66-15392  
 Particles in radiation belt of Earth, considering motion in dipole field, sources, loss processes, etc 05 p0756 A66-15745  
 Variations in cosmic ray intensity recorded at world network of stations during consecutive magnetic storms, noting changes in corpuscular fluxes, interplanetary medium, etc 12 p1941 A66-24167  
 Magnetic storms during IGY, assuming effect on cosmic ray intensity is associated with influence on galactic cosmic rays of magnetic fields of solar and corpuscular fluxes 12 p1941 A66-24169  
 Corpuscular intrusions into Earth magnetosphere involving entire auroral zone and occurring only on night side 12 p1871 A66-24296  
 Structure and coherency of lunar dust layer, considering corpuscular radiation such as solar wind and meteorite bombardment 12 p1952 A66-24892  
 Radio emission in ionosphere during high solar activity explained as electron emission produced by particles moving as corpuscular fluxes 14 p2241 A66-28090  
 Role of corpuscular radiation in lower ionosphere formation, noting charged particle flux, energy spectra, etc 15 p2591 A66-30024  
 Geomagnetically trapped proton and electron fluxes in immediate vicinity of Earth 18 p3186 A66-34809  
 Corpuscular radiation from UV Ceti stars assumed to be mainly protons, noting role of interstellar matter 20 p3652 A66-37611  
 Chapman-Ferraro hollows for system of parallel line currents enveloped by stratified corpuscular flux 22 p3975 A66-40806  
 Dense particle population of Van Allen belts formed by interaction of high energy corpuscular radiation with interplanetary magnetic field and geomagnetic field 23 p4123 A66-41186  
 Augmented special relativity theory to account for Einstein effects, with extension to general scalar field theory and notes on corpuscular light and galactic-centered

reference frame 23 p4090 A66-41273  
 Nighttime electron temperatures in upper F region suggest corpuscular energy input 23 p4064 A66-41682  
 Comparison of various geomagnetic variations associated with corpuscular precipitation at South Pole, noting day-night effect 23 p4064 A66-41688  
 Electromagnetic and corpuscular radiation hazards to astronauts deduced from data on dogs 24 p4166 A66-43140

**CORRELATION**  
 S ANGULAR CORRELATION  
 S AUTOCORRELATION  
 S CROSS CORRELATION  
 S DATA CORRELATION  
 S IMAGE CORRELATION  
 S STATISTICAL CORRELATION

**CORRELATION COEFFICIENT**  
 Relation between angle of attack envelopes and correlation parameter for spinning bodies entering atmosphere at large inclinations 03 p0432 A66-12811  
 Negative correlation coefficient between Izsak satellite geoid and Lee and MacDonald heat flow distribution, suggesting correlation between geoidal undulations and heat flow highs and lows 04 p0518 A66-14454  
 Change rate of pitching moment coefficient upon aerofoil correlated to deflection of flap control for application to wing reversal analysis 06 p0801 A66-16001  
 Correlation factor for induced radiation frequency shifts and crystal temperature variations in ruby laser 08 p1233 A66-19269  
 Frequency correlation in radio communication using scattering media 10 p1504 A66-21677  
 Correlation coefficients for daily ranges of horizontal component of quiet day diurnal magnetic variation 11 p1695 A66-22370  
 Coefficient of mutual correlation of noises for two-antenna phase-type direction finder 17 p2879 A66-31860  
 Spatial correlation coefficients and transverse temperature perturbation scales during turbulent nonisothermal flow of mercury in circular pipe 20 p3607 A66-36982

**CORRELATION DETECTION**  
 Correlation dependence of F-2 layer on solar wave energy entering Earth atmosphere 04 p0515 A66-13850  
 Dual-mode acquisition and tracking system using random noise as carrier signal 06 p0842 A66-15977  
 Scene correlation tracking system or sensor device measures displacement between two views of same scene 06 p0842 A66-15978  
 Correlation between strength of induced optical absorption G band and strength of features in electron spin resonance spectrum in electron irradiated diamonds 06 p0934 A66-17125  
 Fluctuation errors of analog correlation meters under time displacement of random signals 07 p1031 A66-17356  
 Transient characteristics of nanosecond-range pulse devices measured by wideband interference correlator 08 p1194 A66-19280  
 Predicting change in state of automatic control system, using correlation analysis 09 p1361 A66-20304  
 Correlation method measuring far-field patterns of large-aperture antennas, using radio star sources and auxiliary antenna for providing reference signal for cross correlation with test antenna signal 11 p1662 A66-22540  
 Vibrational analysis, discussing spectrum analyzers, correlation and autocorrelation analysis and hybrid and digital computer applications 12 p1970 A66-24722  
 Variations of zodiacal light and airglow, suggesting correlation with solar and lunar cycle 14 p2283 A66-27096  
 Quadratic integral equation solution for bandlimited signal design for binary communication, using memoryless correlation detection 19 p3296 A66-35339  
 Signal detection techniques for discrete-frequency, phase-coherent pulse frequency modulation telemetry system, using analog and digital circuits 19 p3302 A66-35698

**CORRELATION FUNCTION**  
 Scaling of near field pressure correlation patterns around jet exhaust 01 p0010 A66-10123

Turbulent motion of elastoviscous fluid degeneration when highest velocity and stress field correlation moments are neglected in comparison with second moments 02 p0217 A66-11394  
 Variance of number of zeros in narrow band normal noise of finite duration calculated from energy spectrum of phase derivative 02 p0190 A66-11406  
 Location and nature of singularity of Ising square lattice susceptibility, using Pade approximation based on Clapp spin-spin correlation function 02 p0263 A66-11887  
 Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray intensity 02 p0284 A66-12129  
 Correlation of large and small scale roughness for plane wave scattering from rough surface 03 p0335 A66-12818  
 Subsystem checkout in operation termed on-line checkout, noting use of digital computer with random noise signals and role of correlation and transfer functions 04 p0493 A66-13608  
 Signal fluctuation effect on operation of electronic device, approximating empirical correlation function 04 p0504 A66-13778  
 Two-point correlation function expressed in terms of structural function of velocity field 04 p0542 A66-14305  
 Correlation equation estimating pitting fatigue life of bearings from minimal rolling contact rig data [ASME PAPER 65-WA/CF-5] 05 p0690 A66-15624  
 One-and two-dimensional superconductivity, discussing effect of thermodynamic fluctuations on off-diagonal long-range order 05 p0718 A66-15865  
 Correlation relations of output voltage of switched RC integrator 06 p0823 A66-15888  
 Transformations with correlation function unaltered, changing generalized Barker sequences 06 p0860 A66-16113  
 Multicoordinate systems, discussing control method development for plants with large number of correlated inputs and outputs 06 p0863 A66-16527  
 Ionization bursts observed in chambers used for continuous registration of intensity variations in hard component of cosmic radiation, correlating variation frequency with solar cycle 06 p0950 A66-16591  
 Correlation analysis to study reactions of human cardiovascular system during space flight of Voskhod 06 p0814 A66-17175  
 Probability characteristics of distributed parameter system subjected to parametric and additive noises, obtaining mathematical expectation and correlation function expression 07 p1014 A66-17433  
 Dimensionless flow parameter for free convection, equivalent to Reynolds number for forced convection, used for correlating through single curve free and forced convective heat and mass transfer from single bodies 07 p1149 A66-17517  
 Active regions on Sun responsible for modulation process evidenced by correlation of cosmic radiation intensity variation with solar activity features 07 p1125 A66-18002  
 Interaction between hydrogen and various titanium alloys, noting correlation between sorption capacity of alloys and type of phase diagram 07 p1050 A66-18064  
 Electronic correlator circuit yielding intercorrelation function at same rate at which signal is applied to device input 08 p1192 A66-19099  
 Performance correlation of conical and contoured nozzles for gas-particle flows, defining differences between particle effects for such nozzles 08 p1165 A66-19157  
 Spatial statistical correlation functions for normalized field of geopotential calculated for Europe and Asia 09 p1398 A66-19892  
 Higher order correlation function evaluated for shot noise statistics 09 p1342 A66-19925  
 High resolution radar correlometer measurement of spatial correlation radius of RF radiation scattered by disturbed ocean surface 09 p1343 A66-20340  
 Method determining variance and correlation function fluctuations on limiter-inertial RC circuit system 09 p1344 A66-20440  
 Errors in measuring correlation function of

two random processes represented in form of voltages 09 p1345 A66-20444  
 Auroral absorption measured, using riometers compared with energetic particle fluxes simultaneously detected by passing satellite, showing absorption and particle flux correlation 09 p1374 A66-20881  
 Cross correlation and autocorrelation functions of nonstationary signals based on optimal approximation of ensemble correlation function for one pair of signals 10 p1517 A66-21694  
 Dynamic characteristics of linear plant determined under noise conditions, allowing for error in input-signal measurement 11 p1673 A66-22202  
 Angular autocorrelation function of circular-aerial radiation pattern 11 p1662 A66-22397  
 Contribution of electron-electron correlations to longitudinal dielectric constant for case of one-component plasma, noting resonance effect and formula for plasma oscillation damping 11 p1744 A66-22446  
 Correlation function of response of multichannel electronic multiplier to Gaussian input noise 11 p1676 A66-22711  
 Radio receiver design for precisely given signal and nonsteady Gaussian noise 11 p1658 A66-23221  
 Nonstationary contributions to transport coefficients, especially bulk viscosity coefficient, combine with stationary ones yielding result equivalent to that provided by autocorrelation function theory 12 p1916 A66-23617  
 Coherent behavior of light-quantum field in quantum electrodynamics, noting explicit terms of correlation and characteristic field conditions for nth order coherence 12 p1913 A66-23727  
 Hot-wire anemometer measurement of turbulent velocity fluctuations in air flow and energy spectrum and correlation analyses 12 p1880 A66-23846  
 Time resolution error of measured correlation function, based on frequency response of hot-film and hot-wire anemometer 12 p1880 A66-23847  
 Best linear unbiased (BLU) estimator for large class of error correlation models 12 p1904 A66-24197  
 Multivariate statistical analysis of wind sounding data, applying high degree of correlation between two wind parameters and empirical density function [AIAA PAPER 66-353] 12 p1907 A66-24489  
 Properties of compressible boundary layers with heat transfer and arbitrary pressure gradients calculated, using integral equation and correlation concept for application in hypersonic flows 12 p1865 A66-24581  
 Fourier transform of time-dependent density-density correlation function calculated from linearized Boltzmann equation for Maxwell molecules 12 p1917 A66-24584  
 Transport coefficients of moderately dense gas calculated by three methods based on correlation function or generalized Boltzmann equation 12 p1979 A66-24586  
 Vertical incidence fading amplitude experiment using array of receiving antennas, obtaining data on ground diffraction pattern of reflected radio waves, noting correlation function shapes 12 p1824 A66-24840  
 Correlation functions of amplitude and intensity fluctuation for laser model near threshold obtained by using distribution functions evaluated by Fokker-Planck equation, treating amplitude as random variable 12 p1892 A66-25018  
 Effective diffusion cross section of ultrasonic and laser beam while acting on turbulent flow 13 p2062 A66-25404  
 Nonthermal microwave radiation from plasma of electrodeless induction discharge, establishing correlation between microwave and X-ray radiation 13 p2143 A66-25710  
 Triple correlative function solution for plasma system of charged particles and collision integral for pair correlative function 13 p2148 A66-25941  
 Components of gradient of performance criterion in adaptive control systems, employing correlation technique by use of

- time delay 13 p2051 A66-26067
- Extension of three-field mixing theory to include effects of convective nonlinearities on excitation in plasma, using correlation function of spectral densities for interpretation of thermally enhanced light-by-light scattering 13 p2132 A66-26151
- Correlations and intensity fluctuations in light from individual lasing and nonlasing modes of CW GaAs laser and threshold noise change in laser emission 13 p2102 A66-26210
- Photoelectron counts of photomultiplier illuminated by gas laser light source 13 p2102 A66-26211
- Quantum theory of lasers presented in terms of correlation functions of second-quantized electromagnetic and matter fields 13 p2103 A66-26214
- Coherence properties of quantized electromagnetic field and hierarchy of correlation functions for complex field operators 13 p2128 A66-26218
- Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746
- Propagation distribution of impurity atoms in heavily doped semiconductors 14 p2356 A66-27068
- Combined frequency and space correlation of wave fields scattered by rough surfaces where conditions of applicability of Kirchhoff approximation hold true 14 p2236 A66-27144
- Correlation expressing reduced coefficient of thermal expansion as function of reduced Debye temperature for metallic solids used for predicting coefficient at any temperature 14 p2411 A66-27375
- Cross correlation of satellite signals through slab containing small anisotropic irregularities 14 p2237 A66-27398
- Integral equations derived from correlation functions, determining transport coefficients in classical fluid, formally valid to general order in density 14 p2276 A66-27635
- Chemical potential and integral equation for correlation functions of classical fluids, using Percus method when functions exhibit cluster properties 14 p2276 A66-27637
- Integral equations defining transport coefficients of moderately dense gas obtained from Boltzmann equation shown to be identical to first order in density, with results obtained by autocorrelation function method 14 p2276 A66-27639
- Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray intensity 14 p2377 A66-28086
- Two-point correlation function expressed in terms of structural function of velocity field 14 p2327 A66-28218
- Equilibrium binary correlations in classical relativistic homogeneous electron gas 14 p2336 A66-28275
- Pulsed transient functions determination from control channels of multidimensional plant, assuming output signal correlation functions are determined by double averaging 15 p2469 A66-28643
- Kinetic theory of two-photon absorption from single mode of radiation field, noting dependence on coherence properties of field 15 p2544 A66-28943
- Correlation analysis technique for stochastic processes in RLCM circuits with random parameters in case of stochastic input functions 15 p2469 A66-29055
- Correlation of time variations of proton and electron intensity of outer radiation belt and dependence on geomagnetic environment 15 p2575 A66-29103
- Frequency correlation of ionospheric radio waves in inhomogeneous thin layer medium and effect of irregular horizontal ionization gradients 15 p2451 A66-29111
- Statistical properties of dispersive waves in upper atmosphere analyzed, using correlation technique 15 p2493 A66-30040
- Functional time-delay device and integration into analog correlator for analysis of autocorrelation and cross-correlation functions of measured system response signals 16 p2676 A66-30445
- Wind velocity spectra and correlation functions statistically analyzed in ULF range for lowest levels of atmosphere 16 p2742 A66-30773
- Multicordinate systems, discussing control method development for plants with large number of correlated inputs and outputs 16 p2670 A66-30837
- Hybrid analog/digital techniques for signal processing, noting performance advantages at relatively low cost and applications to linear transformation, function generation, correlation functions, etc 16 p2658 A66-31250
- Relation between output correlation functions of full-wave and half-wave linear rectifier with random inputs 16 p2664 A66-31335
- Two-dimensional correlation time relation to spectral bandwidth and corresponding one-dimensional quantities of Lampard 16 p2671 A66-31336
- Integral expression for log likelihood ratio of two Gaussian processes in signal detection 16 p2738 A66-31714
- Quantitative measurement of electron correlation spectrum for deuterium plasma in thermal equilibrium 17 p2963 A66-31885
- Mean-square response of thin elastic plate to random pressure acting normal to plate surface 17 p3021 A66-32010
- Probability distribution of phase difference between two spaced antennas excited by random fan of rays plus specular component 17 p2874 A66-32385
- Design of adaptive systems with forced oscillations, using correlation and filter methods 17 p2902 A66-32573
- Partitioning procedure for shell theory equations, using intercorrelation function 17 p3025 A66-32591
- Improved correlation function in Kirchhoff-Huygen method of solution of scattering of waves from statistically rough surfaces 18 p3068 A66-34015
- Low residue ambiguity function, using incoherently processed pulse train waveforms for application in clutter environment 18 p3070 A66-34260
- Critical heat flux for boiling water, sodium and rubidium, correlating burnout data for liquid metals only and as relation for metallic and nonmetallic fluids 18 p3262 A66-34376
- Correlation study of turbojet afterburner combustion efficiency and fuel/air ratio setting for maximization of efficiency [WSC1 66-1] 18 p3164 A66-34423
- Riometer recordings at high geomagnetic latitude of intense and sporadic absorption events correlated with occurrence of auroral and geomagnetic disturbances 18 p3108 A66-34531
- Boltzmann equation, interpreted in terms of certain correlation functions known as product densities, applied to fluctuation theorem and gases and liquids not in equilibrium 18 p3136 A66-34706
- Dynamic characteristics of unsteady feedback control system during normal operation, ascertaining signal correlation and cross correlation functions 18 p3091 A66-34987
- Noise characteristics at integrator input in nonstationary regime 19 p3311 A66-35297
- Error analysis of area correlation guidance system using parametric analysis of spatial frequency domain-equivalent power spectral density 20 p3597 A66-37237
- Moving image velocity measuring technique using parallel-slit spatial filter is treated as continuous optical correlation processing 20 p3558 A66-37288
- Linear system providing maximum signal to noise ratio for given parameters of correlation function of incoming quasi-harmonic signal mixed with white noise 20 p3515 A66-37379
- Statistical characteristics of atmospheric ozone distribution, determining autocorrelation and cross correlation functions, concentration and temperature profiles 20 p3552 A66-37751
- Correlation of magnetic fields and energetic electrons on IMP I satellite, noting depression in geomagnetic tail region, electron fluxes and diamagnetic effect 20 p3633 A66-38201
- Altitude of lower cloud boundary functional correlation with atmospheric parameters obtained from numerical weather forecast 20 p3593 A66-38366
- Distortions and errors in calculating structural and correlation functions from experimental results 20 p3594 A66-38377
- General nonequilibrium system in contact with reservoir described via correlation functions of quantized field operators, noting influence of cavity and optical pump 21 p3746 A66-38633
- Coefficients of Taylor expansion of correlation function in various velocities defined to describe space-time behavior 21 p3770 A66-38749
- Correlation formulas improvement for laminar shock tube boundary layer for air and argon 21 p3727 A66-39167
- Doppler radar measurements of wind velocity horizontal components variation in rain and snow, calculating time correlation and structural functions for neutral and unstable stratifications 21 p3760 A66-39358
- Propagation distribution of impurity atoms in heavily doped semiconductors 22 p3966 A66-40827
- Autocorrelation function and energy spectrum of radiotelegraph signal, noting channel parameter dependency on transmission speed 23 p4036 A66-41050
- First-order Markovian gyro drift numerically evaluated and square root plotted vs interval and gyro correlation time 23 p4068 A66-41318
- Quasi-stellar radio sources correlated for prediction of Lyman lines relative strengths and optical depth of nebulas beyond Lyman continuum, using simple models 23 p4130 A66-41807
- Line strengths variation in spectra of HD 124224 and HD 19832 analyzed, establishing anticorrelation of He I variations with variations in temperature 23 p4130 A66-41808
- Spectral distribution of space-time velocity correlations as function of velocity fluctuation scale in turbulent boundary layer 23 p4014 A66-42026
- Integral equations for weight function of optimum filter and correlation function of random absolute error 24 p4188 A66-42475
- Frequency characteristic and transient delta function of plant, using algorithm based on correlation functions 24 p4188 A66-42483
- Thermodynamic properties of electron plasma investigated by Bogoliubov-Born-Green-Kirkwood-Yvon hierarchy equation, calculating correlation energy 24 p4243 A66-42764
- Phase-lock servo-loop circuit for space communication providing estimate of incoming signal through correlation process 24 p4175 A66-42826
- ## CORROSION

- ## CORROSION PREVENTION
- Helicopter corrosion problems discussing causes, exposed surfaces, prevention and treatment 03 p0372 A66-12300
- Prevention of metallic edge corrosion of naval aircraft, evaluating surface treatments, primers, epoxy enamels, etc 03 p0380 A66-12318
- Effect of corrosive environments on various metals and anticorrosion techniques to protect metal surfaces 04 p0534 A66-13374
- Corrosion occurrence and control, noting prone areas, detection and removal 11 p1717 A66-23014
- Wear life and corrosion protection of solid film lubricants improved through substituting other lubricative pigments for graphite [ASLE PAPER 66AM 1C3] 16 p2711 A66-30405
- Voltage and density of contact-corrosion current arising at contact surface of different metals 18 p3124 A66-35011
- Throat erosion rates of carbon chokes in rocket motor nozzle predicted, using

- mathematical approach combined with experimental result  
[AIAA PAPER 65-351] 24 p4261 A66-42772
- CORROSION RESISTANCE**  
Corrosion resistance and anodic behavior of Kh18N9 steels with various nickel-manganese-carbon-titanium contents 01 p0088 A66-10987  
Heat treatment cycle effect on mechanical properties of corrosion resistant precipitation hardened steel AM 355 in terms of metallographic structure 02 p0242 A66-11304  
Nucelite, ceramic-metal composite with high mechanical strength and abrasion resistance noting crystal structure, application, properties, etc 02 p0244 A66-11742  
Explosion cladding for bonding similar and dissimilar metals without intermediate metal or externally applied heat 03 p0380 A66-12317  
Heat pipe characteristics covering performance analysis and experimental results such as heat transfer rate, life tests, working liquid selection, etc 05 p0616 A66-15544  
Measurement of surface emittance of surface coatings for selected metals, providing low-thermal emittance characteristics in IR spectrum for thermal and corrosion control [AIAA PAPER 66-18] 05 p0705 A66-15849  
Refractory alloy corrosion, discussing columbium and tantalum base tubing alloy resistance to refluxing potassium between 1800 and 2400 degrees F 06 p0894 A66-16071  
Corrosion resistance of titanium and its alloys in solutions of acetic and nitric acids as affected by aluminum additions 06 p0896 A66-16608  
Accelerated cooling of ferritic-martensitic steel and ferritic steel after sintering, combined with additional heat treatment, increases strength and corrosion resistance 06 p0896 A66-16690  
Fracture toughness and stress corrosion resistance of several heats of maraging steel compared with results for low-alloy and hot-work die steel 06 p0897 A66-16801  
Aircraft fuel tank coating corrosion resistance, discussing polyurethane and epoxy material characteristics and application 07 p1053 A66-17491  
Spark igniter that successfully operates at 50 to 120 psig chamber pressure and 2300 to 3000 degrees K without observable thermal shock or electrode erosion 08 p1281 A66-18838  
Super chromium steel survey, including applications in gas turbines and aerospace industries, physical and mechanical properties, thermal stability, corrosion resistance, etc 09 p1387 A66-19953  
Device for taking long time corrosion fatigue curves on small cross section specimens at high temperatures and pressures 09 p1388 A66-20433  
Alloying elements effect on anodic corrosion and passivation of stainless steels 09 p1390 A66-20837  
Corrosion resistance and electrochemical properties of alloys of niobium-titanium system 09 p1390 A66-20838  
Corrosion resistance, electrochemical and mechanical properties of alloys of titanium-niobium system 09 p1390 A66-20839  
Corrosion resistance of yttrium is higher at higher pH because of slower anodic process 10 p1546 A66-21747  
Corrosion of rhenium in various acids and hydroxides is electrochemical in nature and determined by kinetics of anodic and cathodic processes involved 10 p1546 A66-21748  
Chromium steel strength and corrosion resistance improvement by molybdenum and tungsten addition 11 p1716 A66-22747  
Heat treatment effect on structure, hardness, microhardness and corrosion resistance of VT1 titanium and OT4 titanium manganese-aluminum alloy sheets 12 p1897 A66-24900  
Shot peening for resistance to stress corrosion cracking of high strength steel and aluminum alloys and to improve fatigue life of landing gears, wing spars, jet engine components and other structural parts 13 p2196 A66-25771
- Composite casting as metallurgical bonding technique, noting application to weight reduction and increase of corrosion resistance 13 p2086 A66-25779  
Corrosion of magnesium in water 15 p2523 A66-29724  
Glass reinforced plastics for helicopter primary structures 18 p3124 A66-33690  
Properties of small tube Teflon heat exchangers noting corrosion resistance, smooth slippery surface, etc, and heat transfer coefficient 18 p3262 A66-34383  
Susceptibility of titanium alloys to elevated-temperature static and dynamic sea-salt stress cracking, noting operative mechanism 19 p3377 A66-35648  
Hardness, toughness, stress relaxation, corrosion resistance, etc, of niobium-aluminum alloy with stable elastic modulus 20 p3583 A66-37366  
Additive effects on jet propellants, noting corrosion and oxidation resistance 20 p3627 A66-38296  
Additives effect on antioxidant stability and antiabrasion characteristics of lubricating oils used in jet and turboprop engines 20 p3575 A66-38445  
Field cleaning of corrosion resistant steel tubing for LOX and pneumatic service 22 p3922 A66-40040  
Corrosion fatigue strength of duralumin in presence of stress concentrators, noting parameters of resistance and alloy properties 22 p3935 A66-40679  
Heat treatment effect on structure, mechanical properties and corrosion resistance of VTZ-1 alloy, noting influence of annealing 22 p3935 A66-40680  
Structural, mechanical and corrosion properties of aluminum alloy of various compositions 22 p3936 A66-40877  
Magnesium alloy components protected from corrosion by subjection to anodic oxidation 23 p4074 A66-41659
- CORROSION TEST**  
Chemical reaction between iron and extreme pressure agents like chlorine and sulfur for corrosion mechanism analysis [ASLE PREPRINT 65-LC-11] 02 p0237 A66-12254  
Corrosion control on aircraft skin, countersinks and fasteners describing tests, sealant coatings, chemical treatments, mechanical barriers, platings on fasteners and organic coatings 03 p0372 A66-12298  
Cr and Mn effects on aging mechanism and anticorrosion properties of Al-Zn-Mg alloys 03 p0381 A66-12723  
Trapezoidal stress waveforms effect on low cycle corrosion fatigue strength, clarifying mechanism of corrosion fatigue 12 p1959 A66-23849  
Chemical reaction between iron and extreme pressure agents like chlorine and sulfur for corrosion mechanism analysis [ASLE PREPRINT 65-LC-11] 12 p1889 A66-24993  
Friction corrosion caused by alternate pivoting of steel ball on plane of light alloy 14 p2302 A66-27934  
Stress corrosion testing to evaluate materials for specific application 15 p2523 A66-29723  
Stress corrosion cracking of titanium alloy in long duration and high temperature tests, using salt coating of specimens 19 p3379 A66-35657  
Stress corrosion tests on specimens of titanium alloy in contact with sodium chloride, noting crack formation and effect of argon 19 p3379 A66-35658  
Separation of gaseous, liquid and solid reaction products generated by hot salt corrosion of titanium, noting gas diffusion effect on cracking 19 p3379 A66-35659  
Corrosion tests on eight refractory metals and alloys in liquid lithium and cesium vapors 19 p3383 A66-36136  
Refractory niobium alloy corrosion tests in potassium liquid at 2000 to 2200 degrees F 19 p3383 A66-36137  
Ephemeral-corrosion tests of refractory metals in molten lithium between 2000 and 3000 degrees F 19 p3383 A66-36138  
Deformation of solids by impact of liquids and relation to rain damage in aircraft and missiles, to blade erosion in steam turbines and to cavitation erosion - Meeting, London, May 1965 20 p3546 A66-37801
- Corrosion problems with simulated fuel in launch vehicle models 21 p3750 A66-38799
- CORRUGATED PLATE**  
Characteristics of partially clamped corrugated membrane, investigating effect of forces of clamping friction 01 p0160 A66-11182  
Radiation from modulated corrugated surface excited by waveguide, noting reflection coefficient, radiation pattern, etc 19 p3302 A66-35724
- CORRUGATED SHELL**  
Exhaust mixing process in Rolls-Royce bypass jet engines, noting stream mixing in common duct with corrugated metal interface on inlet side 17 p2990 A66-32079  
Nonequilibrium flow of chemically reacting gas past infinite corrugated cylinder 21 p3724 A66-38717
- CORRUGATION**  
Corrugation growth on infinitely conducting fluid sheets, discussing acceleration induced by constant axial and linearly increasing currents 06 p0871 A66-16276
- CORTI ORGAN**  
S COCHLEA
- CORTICOSTEROID**  
Effects of 9-alpha-fluorohydrocortisone on metabolic changes occurring during six days of bed rest, including water and sodium retention, hematocrit decrease, plasma increase, etc 06 p0813 A66-16824  
Acceleration stress-induced changes in fat metabolism, level of circulating glucose and corticosterone level in rats 15 p2431 A66-28868  
Corticosterone injection in rats, assaying amino acid incorporation into liver microsomal and cell-sap protein 17 p2860 A66-32554  
Parotid fluid collection technic for determining in-flight biochemical responses for 17-OHCS levels 22 p3854 A66-39791  
Corticosteroid responses to limbic stimulation in man and localization of stimulus sites 22 p3855 A66-40487
- COSINE SERIES**  
Approximation of band-limited function by sum of cosines arising in design of phased array antennas 03 p0342 A66-12709  
Properties of sums of special trigonometric series 09 p1394 A66-20458
- COSMIC DUST**  
SA INTERPLANETARY DUST  
SA ZODIACAL DUST CLOUD  
Mariner IV Cosmic Dust Detector measurement of momentum, mass distribution, flux densities and time histories of dust particles near Earth and in space 01 p0073 A66-11113  
Interstellar obscuration of starlight suggests that vast quantities of dust spread thinly throughout galaxy differ in composition 07 p1132 A66-17254  
Extraterrestrial dust as atmospheric argon source and influx of black spherules 08 p1287 A66-18770  
Extraterrestrial dust as possible cause of background ionization and stratification in sporadic E layer 14 p2282 A66-26855  
Spatially homogeneous anisotropic irrotational solutions of Einstein field equations for cosmological dust source 14 p2330 A66-27019  
Newtonian approximation for irregularities in statistically homogeneous and isotropic dust-filled universe 14 p2386 A66-28119  
High altitude balloon top collections of cosmic dust shows evidence of absence of crystal structure in particles 15 p2604 A66-30065  
Massive central body influence on cosmic dust density distribution in Newtonian oscillating world model 19 p3464 A66-36295  
Glassy spherules found in precipitate of melted ice in Antarctica may be cosmic dust particles /microtektites/ 19 p3465 A66-36389  
Comet disintegration as basic source of interplanetary dust based on zodiacal isophots 20 p3549 A66-37037  
Singularities in Newtonian cosmology and in Friedman universes and behavior of relativistic world model with spherically symmetric distribution of matter 20 p3658 A66-38291

COSMIC GAS

Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 03 p0426 A66-12909  
Radio galaxies contribution to kinetic temperature of intergalactic gas on basis of cosmological model 14 p2380 A66-27257  
Expanding universe theory of hot ionized intergalactic gas and blackbody radiation and X-ray emission energy spectra 21 p3817 A66-39561  
Matter traversed by low energy cosmic ray nuclei in space determined, using spallation cross sections with proton beams from accelerators and Li/M ratios 24 p4265 A66-42718

COSMIC NOISE

Electromagnetic wave absorption and cosmic noise absorption measurements useful in radio communication 01 p0072 A66-11101  
Satellite observation of solar protons from flares in September 1963, measuring impact zone effect, differential spectrum, latitude distribution of proton energies, proton fluxes, cosmic noise absorption, etc 03 p0417 A66-12649  
Multiple antenna based on corner reflector used in absorption measurements in magnetically conjugate regions 03 p0334 A66-12661  
Frequency dependence of cosmic noise levels during anomalous type II absorption, noting shielding sporadic E layer 04 p0574 A66-13859  
Response of D-region absorption of cosmic noise to passage of totality during eclipse of May 30, 1965 recorded in New Zealand 05 p0668 A66-14798  
Satellite Ariel II receiver for measuring cosmic radio noise, using dipole antenna 05 p0769 A66-15841  
Sky brightness and cosmic radio emission in satellite Ariel II 05 p0769 A66-15842  
Times of peak cosmic radio noise concentration and usefulness to forward propagation ionospheric scatter reception on DEW-Line as performance monitor, etc 06 p0825 A66-15985  
Spaceborne observations of radio noise from 0.7 to 7.0 mhz and dependence on terrestrial environment 10 p1603 A66-21115  
Satellite observation of radiation belt and absorption of cosmic noise in polar aurora during magnetic storms of February 1964 12 p1943 A66-24267  
Auroral absorption at 18-mc/s in middle latitudes, noting daily and seasonal variation 13 p2074 A66-26361  
Auroral absorption of cosmic radio noise which is not identical at magnetic conjugate point 13 p2076 A66-26743  
Auroral absorption of cosmic radio noise 18 p3238 A66-35086  
Data on geophysical phenomena at magnetically conjugate points on Earth including cosmic noise absorption, conjugacy of visual auroras, magnetic variations, VLF phenomena, etc 19 p3453 A66-35981  
Cosmic radio noise used to measure ionospheric absorption, comparing extraordinary and ordinary wave flux effect in overcoming measurement problems 19 p3351 A66-36361  
Separation of D-E and F-layer contribution to integral absorption of cosmic noise by means of combined pulse reflection and cosmic noise measurements 19 p3351 A66-36363  
Height distributions for atmospheric ionization rate and Balmer radiation resulting from precipitation of auroral protons 21 p3734 A66-39338  
Microwave background radiation field accounted for by integrated effect of population of radio sources if CN excitation is collisional in origin 22 p3978 A66-40004  
Sudden cosmic radio noise absorption, polar cap absorption and auroral absorption 24 p4202 A66-42832

**COSMIC PLASMA**  
Galactic cosmic ray intensity modulation by interplanetary plasma turbulence, noting cosmic ray and geomagnetic storm 07 p1122 A66-17987  
Plasma space science - Symposium, Catholic University of America, Washington, D.C., June 1963 07 p1137 A66-18072

Motion state of interplanetary plasma and properties of interplanetary magnetic fields, including relation to those of Sun 07 p1138 A66-18078  
Penetration of interplanetary plasma into magnetosphere, connected to aurorae and magnetic storms, noting that plasma need not behave like magnetofluid 07 p1138 A66-18081  
Electron and ion acceleration by cosmic plasma waves, examining contribution of these processes to radiation belt formation 20 p3647 A66-37033

COSMIC RADIATION

SA CERENKOV RADIATION  
SA PRIMARY COSMIC RADIATION  
Intercalibration of cosmic ray neutron monitors at nine European sea level stations and deduction of daily latitude effect in 1963 01 p0132 A66-10321  
Expected cosmic ray intensity variations on Moon from analysis of such variations on Earth 01 p0132 A66-10323  
Fine structure of energy spectra of Forbush decrease and dependence on solar cycle 01 p0132 A66-10336  
Momentum spectra of muon flux measured at various angles for production process and environmental influences 01 p0132 A66-10620  
Momentum spectrum of muons at large zenith angles and contribution of pion and kaon production 01 p0132 A66-10621  
Cosmic rays and fundamental problems in elementary particle theory 01 p0133 A66-10642  
Propagation of cosmic synchrotron radiation by individual and aggregate electrons and effect on propagation and radiation of electromagnetic waves 01 p0133 A66-10647  
Book on geo-and heliophysical effects in cosmic rays and auroras 02 p0280 A66-11329  
Forbush decrease characteristics in cosmic ray intensity 02 p0280 A66-11330  
Primary Forbush effect dependence on latitude and time from worldwide data on neutron component of cosmic rays 02 p0281 A66-11331  
Interplanetary magnetic field model developed by Elliot from data of intensity variation of low energy cosmic rays 02 p0281 A66-11332  
Seasonal variations of cosmic ray intensity in stratosphere compared with temperature variation in atmosphere 02 p0281 A66-11333  
Changes in nature of 27-day variations in cosmic ray intensity 02 p0281 A66-11334  
Stellar-diurnal variation of cosmic rays during period 1958 through 1960, on basis of meson-activity data recorder by two crossed counter telescopes 02 p0281 A66-11335  
Lunar-diurnal variation of cosmic ray intensity based on observations of neutron and meson component 02 p0281 A66-11336  
Atmospheric source of diurnal variation of cosmic radiation whose properties undergo substantial variation 02 p0281 A66-11337  
Magnetic storm accompanied by Forbush decreases taking into account atmospheric temperature, noting cyclonic storm origin 02 p0282 A66-11338  
Cosmic radiation variations during passage of cyclones agree with theory for meteorological effects based on two-meson scheme 02 p0282 A66-11339  
Diurnal and nocturnal variations in cosmic radiation intensity during period of maximum solar activity 02 p0282 A66-11340  
Compression of geomagnetic field effect on cosmic radiation at cut-off rigidities and asymptotic directions of radiation incidence 02 p0283 A66-12111  
Crossed counting telescopes used to determine distortions in cosmic ray anisotropy measurement 02 p0283 A66-12112  
Forbush decrease in cosmic radiation spectra as function of solar activity 02 p0283 A66-12113  
Effect of currents, distributed over envelope surface formed by revolution of magnetic dipole force line about its axis, on cosmic ray cut-off 02 p0284 A66-12128  
Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray intensity 02 p0284 A66-12129  
Series of self-quenched Geiger counters for

visual detection in cosmic rays of unstable charged particles decaying within millisecond 03 p0417 A66-12281  
Plasma clouds, relativistic cosmic ray and subcosmic ray particle emission associated with solar flares 03 p0421 A66-12845  
Interplanetary medium observation from zodiacal light and radio wave scattering during radio source occultation and influence on galactic and solar cosmic rays 03 p0425 A66-12852  
Effects connected with auroras and magnetic storms in lower ionosphere considering radio wave attenuation, cosmic ray absorption, etc 03 p0365 A66-12854  
Cosmic ray helium nuclei along with heavier nuclei, traverse interstellar and interplanetary matter propagation in space and slope of energy spectrum 03 p0423 A66-12927  
Photon-flux measurements by high energy gamma-photon detectors onboard Explorer XI and OSO-I 03 p0423 A66-13028  
Cosmic X-ray sources in Scorpius and Crab nebula, examining creation of neutron stars from supernova explosion 03 p0423 A66-13029  
Observations of interplanetary magnetic field by Mariner and Imp spacecraft confirm predictions based on behavior of cosmic rays 03 p0429 A66-13263  
Soviet monograph on continuous measurement of cosmic ray mu component, covering experimental apparatus, data analysis, atmospheric dynamics, etc 03 p0423 A66-13287  
Geomagnetic relationship of daily variation of cosmic ray neutron intensity corrected for barometric pressure variation at various ground stations 03 p0423 A66-13360  
Excessive cosmic radiation absorption in lower nocturnal ionosphere at middle geomagnetic latitudes during Forbush effects 04 p0514 A66-13443  
Biological characteristics and physical conditions of space flights, such as low pressure, ionizing radiation, noise, acceleration, weightlessness, artificial atmosphere, feeding problems, etc 04 p0464 A66-14066  
Biological effects of cosmic radiation under laboratory and flight conditions on various craft to study measures for pharmacological and biological protection 04 p0466 A66-14077  
Diurnal variation of cosmic radiation of intermediate energies measured at Earth attributed to particle removal due to scattering by magnetic irregularities 04 p0575 A66-14181  
Cosmic ray induced lithium and calcium in iron meteorites by improved technique of potassium isotope detection 04 p0580 A66-14487  
Rocket measurements of energetic particles discussing electron fluxes, energy spectra, angular distribution and data 05 p0745 A66-14777  
Rocket measurement of energetic particles discussing proton flux, energy spectra, pitch angular distribution and data 05 p0746 A66-14778  
Secular variations of cosmic ray produced carbon 14 in 150 wood samples up to 2000 years old 05 p0747 A66-14795  
Cosmic ray contribution to background of NaI scintillation spectrometers noting counting rate, surrounding material and atomic number 05 p0678 A66-14967  
Terrestrial radiation belts, satellite data, geographical coordinate location and cosmic radiation measurement 05 p0749 A66-15230  
Cosmic radiation studies in U.S.S.R during IGY noting 11-year variations, Forbush effect, solar particle propagation, etc 05 p0749 A66-15232  
Physics of cosmic rays - All-Union Conference, Apatity, U.S.S.R., August 1964 05 p0749 A66-15372  
Stratospheric cosmic ray intensity, discussing Soviet measurements above Antarctica 05 p0751 A66-15375  
Fundamental problems in cosmic radiation astrophysics 05 p0752 A66-15379  
Cosmic radiation investigated by using meteorites 05 p0752 A66-15382  
Cosmic ray variations studied by effects on Zaisan chondrite 05 p0752 A66-15383  
Neutron-group fluxes and variations with solar activity during IYQS observed by

Elektron II 05 p0752 A66-15385  
Cosmic ray 27-day variations using  
periodograms, with measured data processed  
continuously from 1957 to 1964 05 p0753 A66-15393  
Secular changes in stratospheric cosmic ray  
intensity from 1962 to 1964 05 p0754 A66-15397  
Increase with latitude of Forbush effects  
and secular variations in cosmic ray  
intensity explained by worldwide data  
obtained with meson  
detectors 05 p0754 A66-15398  
Energy spectrum of variations in cosmic  
ray intensity and changes in spectrum with  
decreasing solar activity calculated for  
additional particle flux 05 p0754 A66-15399  
27-day changes in solar diurnal variation  
from 1957 to 1958 based on neutron  
component data, noting modulation of  
cosmic ray anisotropy 05 p0754 A66-15402  
Magnetic storm accompanied by cosmic ray  
intensity increase analyzed, considering  
Forbush effect and determining all  
peaks 05 p0755 A66-15403  
Secondary particle generation in satellite  
walls due to 0.1 to 20 beV pi-mesons and  
protons 05 p0756 A66-15411  
Series of self-quenched Geiger counters for  
visual detection in cosmic rays of unstable  
charged particles decaying within  
millisecond 05 p0756 A66-15453  
Cosmic radiation transmission at 3392  
meters through lead studied for thicknesses  
from 10 to 20 cm, measuring intensity from  
star frequency in photographic  
emulsions 06 p0944 A66-16274  
Cosmic X-ray and gamma ray astronomy in  
studying stellar evolution, cosmic ray origin  
and structure of universe 06 p0944 A66-16314  
Book on high energy particles dealing with  
concepts and techniques for studying  
properties of material through interaction  
with cosmic radiation 06 p0944 A66-16376  
Cosmic rays and problems in space physics  
- Conference, Yakutsk, U.S.S.R., August  
1962 06 p0945 A66-16568  
High energy photons from discrete sources  
of cosmic radiation, verifying radio source  
electron production through proton-nuclei-  
matter interaction 06 p0947 A66-16572  
Energy level of mu-meson at sea level in  
10 super 11 to 10 super 13 eV  
range 06 p0948 A66-16579  
Frequency distribution of time and energy  
characteristics of cosmic ray bursts used to  
construct model of interplanetary magnetic  
field 06 p0948 A66-16580  
Difference in cosmic ray intensity due to  
variations in geomagnetic  
cut-off 06 p0948 A66-16581  
Increase of cosmic ray intensity during  
Forbush decrease 06 p0948 A66-16582  
Cosmic ray behavior associated with  
sunspot activity in July 06 p0948 A66-16583  
Azimuthal measurements of cosmic ray  
variations at Yakutsk, U.S.S.R. 06 p0949 A66-16584  
Solar particle effect on daily variation in  
neutron component of cosmic  
radiation 06 p0949 A66-16585  
Anomalies in cosmic radiation during  
December 1957 accompanying geomagnetic  
storms connected with solar  
flares 06 p0949 A66-16588  
Four-year cosmic ray ionization bursts,  
using ASK-2-34 ionization  
chamber 06 p0949 A66-16589  
Secular variation of cosmic radiation  
intensity 06 p0950 A66-16590  
Ionization bursts observed in chambers  
used for continuous registration of intensity  
variations in hard component of cosmic  
radiation, correlating variation frequency  
with solar cycle 06 p0950 A66-16591  
Periodic temperature fluctuations in  
mesosphere based on underground  
measurements of cosmic ray intensity at  
Yakutsk, Siberia 06 p0950 A66-16595  
Cosmic ray intensity and geomagnetic field  
changes induced by electric current systems  
excited in ionosphere, noting seasonal  
changes in diurnal  
variations 06 p0950 A66-16596  
Instrumentation used in analysis of short-  
periodic and microvariations of cosmic ray  
intensity, noting supermonitor with

scintillation counters, photomultipliers,  
etc 06 p0951 A66-16597  
Cosmic ray spark counter operating in  
conjunction with ionization calorimeter and  
photoemulsions 06 p0880 A66-16599  
Beta-electron in nuclear photoemulsion  
study of primary cosmic ray  
properties 06 p0880 A66-16600  
Neutron monitor and mu-meson telescope  
for cosmic ray studies at Kazakh State  
University 06 p0880 A66-16601  
Automatic potentiometer for recording  
data of cosmic ray intensity obtained by  
neutron monitor 06 p0881 A66-16603  
Survey in satellite era of energetic particle  
radiations, plasmas and magnetic fields in  
space, including solar wind, solar cosmic  
rays, etc 06 p0951 A66-16612  
Measurement of cosmic radiation of  
counter telescope 06 p0882 A66-16894  
Vertical intensity and angular distributions  
of penetrating cosmic ray muons measured  
by scintillators, Geiger counters and neon  
flash tubes, underground in  
India 06 p0877 A66-17039  
Attenuation coefficients deduced in lower  
atmosphere near Rome, using IGY cosmic  
ray neutron monitor 07 p1032 A66-17465  
Physics of cosmic rays - All-Union  
Conference, Moscow, October  
1963 07 p1111 A66-17534  
Strong interactions and cosmic rays,  
discussing Regge poles, one meson  
approximation and multiperipheral model  
theory of elastic and quasi-elastic  
interactions 07 p1112 A66-17535  
Nuclear interaction at high energies,  
discussing active component structure  
ionization calorimeter application, energy  
spectrum of particles, etc 07 p1113 A66-17536  
Cosmic ray particle interaction at hundred  
beV range, discussing parameters of  
inelasticity for collision with  
nucleus 07 p1113 A66-17538  
K meson and hyperon production cross  
sections, discussing primary energy  
dependence and upper limit  
determination 07 p1113 A66-17539  
Nucleon-nucleus collisions at high energies,  
describing statistically independent  
successive interactions of incident particles  
with target nucleus 07 p1113 A66-17540  
Coefficients of inelasticity of interactions  
between cosmic ray particles with iron and  
carbon nuclei 07 p1114 A66-17544  
Fraction of energy transferred to photon-  
electron component during interactions of  
particles with graphite nuclei at energies  
exceeding 100 beV 07 p1114 A66-17545  
Ratio of energy of electron-photon  
component and energy of charged mesons in  
interaction between nucleons and iron  
nuclei 07 p1114 A66-17548  
Interaction characteristics of nuclear-active  
cosmic ray particles with carbon nuclei at  
mountain altitudes 07 p1114 A66-17549  
Nature and momentum spectra of nuclear  
active particle flux at low altitudes,  
determining root mean square  
error 07 p1115 A66-17552  
Origin of high energy pions, muons and  
photons studied from available spectral  
data 07 p1115 A66-17555  
Interaction characteristics calculated for  
Feynman diagram of nucleon-nucleon  
scattering at 300 beV 07 p1115 A66-17556  
Inelastic photonuclear process in forming  
high energy meson jets recorded by nuclear  
emulsion in stratosphere 07 p1116 A66-17557  
Polarization of cosmic ray muons with  
various residual energies, using hodoscopes  
and Wilson chamber 07 p1117 A66-17565  
Cosmic radiation measured by neutron  
monitor in Antarctic during enhanced solar  
activity in September 1963, determining  
flares connected with particles producing  
Forbush effects 07 p1118 A66-17642  
Cosmic rays - International Conference,  
Jaipur, India, December  
1963 07 p1118 A66-17977  
Orientation detector mechanism for high  
altitude cosmic ray research utilizing  
directional East-West symmetry in  
geomagnetic rigidity  
cut-off 07 p1034 A66-17980  
Solar corpuscular stream effect on  
magnetic storms and Forbush  
effect 07 p1121 A66-17985

Cosmic ray variations as affected by space  
electromagnetic  
conditions 07 p1121 A66-17986  
Galactic cosmic ray intensity modulation by  
interplanetary plasma turbulence, noting  
cosmic ray and geomagnetic  
storm 07 p1122 A66-17987  
Solar modulation and geomagnetic effects  
on cosmic rays, noting daily variation and  
rigidity spectrum 07 p1122 A66-17990  
Cosmic ray research and facilities at  
Hobart, Tasmania,  
Australia 07 p1123 A66-17992  
Intensity of cosmic ray alpha particles on  
July 16, 1959 when counting rates of  
neutron monitors were near absolute  
minimum value 07 p1124 A66-17997  
Cosmic ray modulation by interplanetary  
magnetic field indicated by dependence of  
secular, 27-day and diurnal variations on  
solar activity 07 p1124 A66-17999  
Active regions on Sun responsible for  
modulation process evidenced by correlation  
of cosmic radiation intensity variation with  
solar activity features 07 p1125 A66-18002  
Responses of cubical meson telescopes and  
neutron monitors, at equatorial and high  
latitude stations, to anisotropy with  
different assumed spectrum and latitude  
dependence 07 p1125 A66-18005  
Frequency distributions of characteristics  
of daily variation of cosmic ray intensity  
with solar activity from 1958 to  
1962 07 p1125 A66-18006  
Phase shift and amplitude computation for  
cosmic ray diurnal oscillation, using  
autocorrelation analysis  
methods 07 p1126 A66-18007  
Atmospheric diurnal variation investigated,  
using temperature controlled high-counting  
neutron and meson  
monitors 07 p1126 A66-18008  
Fluctuation of ratio of yearly average  
amplitudes of meson-to-neutron diurnal  
variation owing to variability of energy  
dependence of cosmic ray  
anisotropy 07 p1126 A66-18009  
Cosmic ray meson intensity diurnal  
variations measured, using neutron monitor  
and Geiger counter  
telescope 07 p1126 A66-18010  
Presence of genuine sidereal daily cosmic  
ray intensity variation in  
1961 07 p1126 A66-18011  
Correction of cosmic ray meson intensity  
monitor counting rates for atmospheric  
temperature variation 07 p1127 A66-18012  
Periodical and quasi-periodical cosmic ray  
variation according to data of worldwide  
network of stations, using crossed  
telescope 07 p1127 A66-18013  
Diurnal intensity time variation of cosmic  
ray neutrons compared with relative number  
of sunspots observed 07 p1127 A66-18014  
Cosmic ray diurnal variation near  
geomagnetic poles measured over declining  
phase of solar cycle, using neutron monitor  
data 07 p1127 A66-18015  
Cosmic ray threshold rigidities determined  
by trajectory calculations, noting  
disagreements between hemispheric  
data 07 p1128 A66-18017  
Empirical and experimental modulation  
functions for cosmic ray intensity variation,  
showing rigidity dependence of intensity  
changes 07 p1128 A66-18018  
Vertical cut-off rigidities of cosmic rays,  
using sixth degree simulation of  
geomagnetic field 07 p1128 A66-18019  
Galactic cosmic ray modulation by  
interplanetary plasma, deriving by method  
of best fit, direction and energy spectrum  
of anisotropy outside of geomagnetic  
field 07 p1128 A66-18020  
Sea level cosmic ray intensity and  
threshold rigidity around South African  
magnetic anomaly, noting Quenby and Wenk  
measurements 07 p1129 A66-18022  
Forbush effect and region of decreased  
cosmic ray intensity extending from Earth  
to Sun 07 p1129 A66-18024  
Temperature changes in entire atmosphere  
and effect on diurnal variation of meson  
component of cosmic rays 07 p1129 A66-18025  
Asymmetry of cosmic ray variations and  
structure of interplanetary magnetic field,  
based on data recorded at Yakutsk and  
Tiksi 07 p1130 A66-18026

- Parameters of dynamic modulation determined from measurements of proton and alpha particle spectra, used in cosmic-ray modulation in interplanetary space 11 p1762 A66-22411
- Chromospheric flares effect on hard component of cosmic rays as function of solar coordinates during quiet and magnetically disturbed days 11 p1762 A66-22412
- Secular variation of atmospheric radiocarbon concentration, noting dependence on geomagnetic field strength 11 p1698 A66-22569
- Flux and energy spectrum of low energy cosmic ray protons, noting rocket measurement results and analogy to solar flare spectrum 11 p1764 A66-23059
- Total counting rate and detected multiplicity spectrum of standard IGY neutron monitor analyzed on basis of neutron production and cosmic radiation components 11 p1765 A66-23144
- Measurement of differential energy spectra of protons, helium nuclei and heavy nuclei by cosmic radiation telescopes mounted on POGO and Pioneer satellites 12 p1877 A66-23684
- Three parameter pulse height analyzer and coincidence system for satellite-borne scintillation telescope study of cosmic radiation 12 p1878 A66-23691
- High resolution pulse height analyzer for satellite and balloon-borne telescope 12 p1878 A66-23692
- Cosmic ray meson monitors with plastic scintillators and near cubical geometry designed for total counting rate of 1,000,000 counts/hr 12 p1879 A66-23709
- Monograph on methods and equipment used by Soviet satellites and space probes to study Earth radiation belts 12 p1938 A66-23802
- Bronzite and hypersthene chondrites, evaluating lunar or asteroidal origin 12 p1948 A66-23903
- Production rates of Cl 36 and Ar 39 in metallic and stone phases of Leedey chondrite 12 p1948 A66-23904
- Cosmic rays, collected papers on international geophysical projects 12 p1939 A66-24159
- Solar wind and geomagnetic storm effects on galactic cosmic ray 11-year variations and energy spectrum, from neutron monitor data 12 p1940 A66-24160
- Cosmic ray variations analysis based on IGY and IGC data, discussing diurnal variations, cosmic ray burst, Forbush effect and existence of interplanetary magnetic field and of solar magnetic traps 12 p1940 A66-24161
- Solar wind as radial flux of electromagnetic inhomogeneities, galactic ray modulation by solar wind and cosmic ray intensity variation with sunspot cycle 12 p1940 A66-24162
- Magnetospheric and upper atmospheric meteorological effects on cosmic ray intensity variation and solar corpuscular streams 12 p1940 A66-24163
- Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164
- Forbush, geomagnetic interaction, cosmic ray variation and solar corpuscular flux effects during magnetic storms in period of maximum solar activity 12 p1940 A66-24165
- Variations in cosmic ray neutron component intensity and solar corpuscular flux with H-component of geomagnetic field during magnetic storm 12 p1941 A66-24166
- Variations in cosmic ray intensity recorded at world network of stations during consecutive magnetic storms, noting changes in corpuscular fluxes, interplanetary medium, etc 12 p1941 A66-24167
- Abrupt increase in cosmic ray intensity coinciding with presence of Forbush effects, noting dependence on geographic latitude and cut-off rigidity, obtaining energy spectra 12 p1941 A66-24168
- Magnetic storms during IGY, assuming effect on cosmic ray intensity is associated with influence on galactic cosmic rays of magnetic fields of solar and corpuscular fluxes 12 p1941 A66-24169
- Diurnal and semidiurnal variations in

cosmic-ray hard component and magnetic activity 12 p1942 A66-24176

27-day cosmic ray variations from July 1957 to December 1960 and general characteristic of electromagnetic conditions in interplanetary space 12 p1942 A66-24177

Small cosmic ray bursts effect on geomagnetic activity and nature of high-energy solar cosmic ray propagation in interplanetary space 12 p1942 A66-24179

Integral multiplicity and coupling coefficient estimation of muon-meson component of cosmic rays for case of primary particle impinging at arbitrary zenith angle 12 p1943 A66-24182

Solar-diurnal cosmic-ray variations analyzed, showing that averaging observational data over worldwide network of stations leads to large errors 12 p1943 A66-24183

Operation of scintillation and Cerenkov counters used for recording cosmic radiation, noting design, amplitude properties, collection of scintillating light from phosphor, etc 12 p1882 A66-24185

Short period variations in cosmic ray intensity, using neutron monitors, cubic telescopes, etc, analyzed with superhigh statistical precision 12 p1943 A66-24186

Al-26 and Be-10 radioactivities in cores of Pacific sediments and implications regarding low-energy proton flux in interplanetary space over last 100,000 years 12 p1943 A66-24236

Iron meteorites with low cosmic ray exposure ages examined via analysis of product of argon 39 and 13 p2177 A66-25135

Electron and proton differential velocity spectra observed for low-energy relativistic cosmic rays, noting spectral neutrality of radiation 13 p2174 A66-25570

Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642

Barometric coefficient of Leeds neutron monitor determined by method of successive differences 13 p2176 A66-26360

Solar wind parameters and geomagnetic activity determined from satellite plasma experiments and observations of magnetopause locations 13 p2075 A66-26368

Heavy ionizing particle path detection by thin dielectric sheets 13 p2084 A66-26561

Pion emission in backward hemisphere in laboratory system of cosmic ray jets 13 p2088 A66-26576

Modification of hot big-bang theory to account for helium abundance in universe and cosmic radiation temperature, noting possible variation of Newtonian gravitational constant 13 p2189 A66-26599

Production spectrum of high energy electrons from high energy cosmic ray pion decay and proton-proton collisions 13 p2176 A66-26762

High energy cosmic ray collisional pion production spectrum and pion energy and angle distributions in CMS and laboratory frames from Landau-Milekhin hydrodynamic model of very high energy nucleon 13 p2176 A66-26763

Cosmic rays and fundamental problems in elementary particle theory 14 p2377 A66-27949

Compression of geomagnetic field effect on cosmic radiation at cut-off rigidities and asymptotic directions of radiation incidence 14 p2377 A66-28070

Crossed counting telescopes used to determine distortions in cosmic ray anisotropy measurement 14 p2377 A66-28071

Forbush decrease in cosmic radiation spectra as function of solar activity 14 p2377 A66-28072

Effect of currents, distributed over envelope surface formed by revolution of magnetic dipole force line, about axis, on cosmic ray cut-off rigidity 14 p2377 A66-28085

Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray intensity 14 p2377 A66-28086

Cosmic ray origin and space plasmas 14 p2377 A66-28359

Iron and stony meteorite evolution, cosmic radiation ages and space erosion

model 14 p2390 A66-28409

Cosmic radiation measurements beyond radiation belts as observed by Cosmos XVII 15 p2573 A66-28497

Measuring devices and observational methodology used in determining time variant and cyclic variations in cosmic ray occurrence 15 p2573 A66-28518

Changes in cosmic-ray rigidity spectrum during cosmic ray storms, showing correlation with magnitudes of geomagnetic disturbances 15 p2574 A66-28900

Corrected geomagnetic coordinates of Hakura compared to study of geomagnetic threshold rigidity for cosmic ray particles 15 p2484 A66-28908

Solar system geometric effect in diurnal, annual and semiannual cosmic ray variations 15 p2575 A66-29082

Energy dissipation channels of nuclear and electron components of cosmic rays in Galaxy and Metagalaxy 15 p2576 A66-29131

Biological experiments under flight conditions in Vostok spacecraft, noting reproduction of *Drosophila melanogaster* and effect of weightlessness and cosmic radiation on hereditary structures 15 p2436 A66-29465

Space flight effect on living cells examined by using higher plants as biological dosimeters 15 p2436 A66-29469

Research activities at Chacaltaya Cosmic Physics Laboratory in Bolivia 15 p2476 A66-29514

High energy interactions - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2582 A66-29541

U.S.S.R. accelerator experiments in high energy nuclear interaction cross section and inelasticity, primary and secondary cosmic ray particle energies, charged nuclear-active particle energy spectra, momenta measurements, etc 15 p2545 A66-29549

Atmospheric fast cosmic ray neutron flux measurements, using boron fluoride recoil neutron counter 15 p2584 A66-29553

High energy mountain-altitude nuclear interactions produced by pions and nucleons, pion/proton and neutral/charged interacting particle ratios studied, using multiplate cloud chamber with air Cerenkov counter and absorption spectrometer 15 p2584 A66-29554

Interaction of nuclear active particles with atomic nuclei, using ionization chamber at 3260 m above sea level 15 p2584 A66-29558

Extremely collimated nuclear interactions in carbon induced by collisions of charged cosmic ray particles in energy region 20-100 gev 15 p2585 A66-29559

Nuclear interaction characteristics in brass and carbon, noting production by neutral and charged cosmic ray particles, observation methods, energy spectrum, etc 15 p2585 A66-29560

Peripheral inelastic encounters, complex orbital momenta and cosmic ray analyses of interactions, noting hydrodynamical model and Regge pole method 15 p2585 A66-29562

Energy and angular distribution of meson created by 22 gev protons in lithium hydride with respect to secondary cosmic radiation 15 p2585 A66-29563

Secondary cosmic radiation and meson production at high energy, noting particle flux regularities and collision 15 p2586 A66-29564

Atmospheric high-energy cosmic ray cascade, using fire ball and gev-range nucleon isobars in model 15 p2586 A66-29565

Spark emulsion chamber for balloon-borne cosmic radiation measurements 15 p2503 A66-29569

Cosmic rays, muons and neutrinos - International Conference, Jaipur, India, December 1963 15 p2586 A66-29570

Cosmic ray intensities underground and energy spectrum of cosmic ray muons at sea level, tabulating depths, operation time, angular distribution, telescope aperture, etc 15 p2587 A66-29572

Muon momentum spectrum at various zenith angles, noting pion derivation 15 p2588 A66-29577

Momentum spectra of cosmic ray muons measured at large zenith angles with improved Ashton-Wolfendale spectograph, comparing observed and predicted

intensities 15 p2588 A66-29580

Cosmic ray muons polarization at various energies and estimation of asymmetry coefficient ratio 15 p2589 A66-29581

Variation of most probable muon energy loss with momentum, noting density effect and decrease in ionization loss 15 p2589 A66-29586

Spectral energy loss rate of cosmic ray muons measured in plastic scintillator 15 p2589 A66-29587

Cosmic neutrino production and stellar evolution, prospects of observational neutrino astronomy as branch of cosmic ray physics 15 p2589 A66-29589

Cosmic ray measurements at 9000 ft underground where atmospheric muon intensity has attenuated and signal due to neutrino interactions is detectable 15 p2589 A66-29590

Large-scale underground experiment for detecting cosmic ray neutrino-induced interactions 15 p2590 A66-29591

Low energy cosmic neutrino detection with radiochemical methods, noting mass spectrometric and nuclear emulsion methods based on Pontecorvo-Davis reaction 15 p2590 A66-29592

Energy spectra of muons and neutrino production from cosmic gamma rays 15 p2547 A66-29597

Delta-electron generation by muons and fluctuations in soft cosmic ray component, assuming thick absorption layer 15 p2547 A66-29598

Energy spectra of neutrinos from secondary cosmic-ray decay in Earth atmosphere 15 p2590 A66-29646

Three types of cosmic ray measurement in commercial aircraft, using single Geiger-Muller counter 15 p2591 A66-29679

Dutch space research program noting solar and stellar research, cosmic radiation, wind measurement, rocket sounding, etc 15 p2600 A66-29910

Radiation levels on Gemini IV flight including Van Allen belt and South Atlantic Anomaly 15 p2591 A66-29997

Cosmic ray flare effects observed by Pioneer VI spacecraft 15 p2591 A66-30022

Comparison of magnetic and cosmic ray data of Pioneer VI with particle guidance properties of interplanetary magnetic field 15 p2591 A66-30023

Discrete source of cosmic gamma rays above 1 gev in balloon-borne detection 16 p2792 A66-30171

Prediction that above presently measured energy level cosmic ray spectrum will steepen abruptly and finally have cosmologically meaningful termination 16 p2793 A66-30194

Cosmic black body radiation at 2.6 mm wavelength from 2.7 to 3.4 degrees K, noting CN molecules 16 p2793 A66-30199

Cosmic microwave radiation from observations of interstellar CN rotational temperature, rotational excitation by H I region H atoms and excitation by slow electrons and slow protons in H II region 16 p2793 A66-30200

Cosmic ray storms analyzed for changes in effective integral rigidity spectrum of nucleon component, noting time dependency of spectrum exponent 16 p2793 A66-30229

Adiabatic deceleration effect on cosmic ray spectrum, noting particle momentum and energy change, diffusion coefficient independent of energy, etc 16 p2795 A66-30924

True radio-brightness distribution of cosmic radiation source by reducing spatial frequency distortions with passband radio interferometer 16 p2806 A66-31544

27-day cycle in diurnal variation of amplitude of meson component of cosmic radiation based on 20 years observation 16 p2795 A66-31692

Intergalactic matter temperature parameters such as heating by cosmic ray ionization, dissipation of hydrodynamic turbulence, inelastic electron collision with H, He and He-ions 17 p2996 A66-31912

Inverse Compton X-ray and gamma ray flux due to high energy electron interaction with cosmic blackbody radiation at 3.5 degrees K 17 p2992 A66-31914

Interstellar plasma wave damping by

relativistic suprathermal particles, noting magnetosonic and Alfvén waves 17 p2996 A66-31915

Cosmic ray neutron flux as function of altitude measured near Earth surface, using boron trifluoride detectors 17 p2992 A66-31974

Origin and propagation of cosmic radiation, discussing interplanetary magnetic fields, plasmas, Faraday rotation of polarized radiation, Zeeman splitting of hydrogen line, etc 17 p2964 A66-32029

Propagation of cosmic synchrotron radiation by individual and aggregate electrons and effect on propagation and radiation of electromagnetic waves 17 p2992 A66-32062

Cosmic neutrinos, discussing sources and forms of existence 17 p2994 A66-32835

Ionospheric electron generation formula derived, based on analysis of interaction of cosmic radiation on ionosphere 17 p2994 A66-32882

Proton I and II space stations to study cosmic ray particles of high and ultrahigh energies 17 p3004 A66-32957

Cosmic X-ray sources observed through rocket-mounted detectors, noting differences in spectra 17 p2994 A66-32970

Cosmic radio source strength, explaining spectral output from substructures of 3C-273 17 p3007 A66-33084

High altitude cosmic ray measurements by Cerenkov scintillator counter system near solar minimum 17 p2994 A66-33147

Launching balloon measurements of cosmic ray intensity as function of atmospheric depth at cosmic equator 17 p2994 A66-33150

Mass spectrometric measurement of distribution of spallation produced chromium nuclides between alloys in iron meteorite 17 p3007 A66-33282

Cometary tail phenomena interpreted, using plasma dynamics theory coupled with observed solar wind 17 p3011 A66-33390

Solar wind proton, solar flare proton and galactic ray effect on interstellar solids /comet/ 17 p3013 A66-33409

Atmospheric contribution to diurnal variation of cosmic ray meson intensity at Deep River, Canada 17 p2994 A66-33429

Proton energy density, pressure and compressibility of galactic cosmic ray gas 18 p3165 A66-34140

Mariner II data analysis on effect of magnetic field on radiation and high energy particles in interplanetary space and solar plasma 18 p3167 A66-34334

Interstellar and intergalactic plasma instability effects on energy distribution functions, cosmic ray diffusion and direction and interspace field interaction 18 p3169 A66-34477

Cosmic radiation age spectrum of chondrites by calculation based on interplanetary erosion rate, discussing asteroidal origin for meteorites 18 p3232 A66-34528

High energy X-ray spectrum from Crab Nebula at photon energies up to 90 kev 18 p3170 A66-34529

Collimation of cosmic rays by interplanetary magnetic field based on Pioneer VI measurements during flare event 18 p3170 A66-34539

Center-to-center collisions of cosmic radiation nuclei with heavy nuclei of Ag, Br plasma emulsions 18 p3170 A66-34578

HF brightness intensity of cosmic background radiation at 20.7 cm wavelength may be primordial fireball residue of big-bang cosmology 18 p3171 A66-34717

Cosmic rays - International Conference, Imperial College of Science and Technology, London, September 1965, Volume 1 18 p3171 A66-34740

Cosmic radiation, interplanetary magnetic field, solar proton propagation long-term /solar cycle/ modulation of intensity, Forbush effect and daily intensity variation 18 p3175 A66-34741

Cosmic ray modulation by solar wind fields noting transit time, energy loss and time variations 18 p3175 A66-34743

Galactic magnetic field strength and distribution determined from synchrotron emission of relativistic electrons, noting

Faraday rotation of polarized radiation from distant radio sources 18 p3235 A66-34744

Cosmic ray origin, discussing role of plasma effects in galaxies, radiogalaxies, metagalactic space, etc 18 p3175 A66-34747

X-ray and gamma ray astronomy, discussing observational methods, physical processes of generation, radiation intensity, etc 18 p3176 A66-34749

Isotopic changes in materials caused by high energy nuclear active particles and solar wind in interplanetary space and on Earth 18 p3176 A66-34750

Quasi-stellar radio source characteristics, noting methods of identification, emission of high energy particle flux, etc 18 p3176 A66-34751

Energy characteristics of 11-year cosmic ray variations, evaluating electromagnetic conditions in interplanetary space for proton, alpha particle and electron variations in energy 18 p3176 A66-34752

Explorer XVIII satellite measurements of proton energy spectra in region corotating with Sun, noting modulation of galactic cosmic radiation and source of continuous particle accelerations 18 p3177 A66-34754

Composition of cosmic rays of supernova origin, noting limited mixing and enrichment of elements of outer layer with thermonuclear synthesized core substances due to shock acceleration 18 p3177 A66-34755

Generically related cosmic ray spectrum explaining variations in abundance ratios of helium isotopes and light to medium elements in terms of solar and geomagnetic modulation 18 p3178 A66-34758

Dynamical behavior of cosmic ray gases, noting modes of hydromagnetic wave propagation and static equilibrium configurations for thermal interstellar gas and field 18 p3178 A66-34759

Galactic evolution examined, using luminosity and volume emissivity diagrams 18 p3178 A66-34760

Solar and sidereal daily variations of cosmic ray intensity at depth of 60 mwe underground in London 18 p3178 A66-34763

Two-way sidereal anisotropy vs seasonal modulation of solar daily variation 18 p3178 A66-34764

Isolation of sidereal-diurnal variations in cosmic ray intensity 18 p3179 A66-34765

Cosmic ray changes during past three solar cycles observed by balloons, noting hysteresis loop and Zurich sunspot number 18 p3179 A66-34767

Solar wind and energy modulations of cosmic rays 18 p3179 A66-34769

Galactic cosmic ray diffusion into solar system as affected by zonal distribution of solar activity, noting 11-year modulation 18 p3180 A66-34771

Cosmic ray intensity attenuation due to energy loss of particles passing through electric field in solar system 18 p3180 A66-34773

Cosmic ray nucleon and meson component intensity changes during 11-year cycle, noting asymmetry in modulating mechanism dissipation 18 p3181 A66-34776

Rigidity dependence of intensity variation of nucleonic component during solar cycle 18 p3181 A66-34778

Solar diurnal variation of cosmic ray intensity and anisotropy in interplanetary space 18 p3181 A66-34781

Semidiurnal anisotropy of cosmic radiation observed from neutron monitor data treated by numerical filter techniques 18 p3182 A66-34783

Diurnal variation of cosmic radiation in Axford-Parker model of diurnal anisotropy, noting amplitude discrepancy with prediction 18 p3182 A66-34784

Diurnal variations of cosmic ray intensity by correlating phase difference and amplitude ratio of Zugsptize and Norikura neutron monitors 18 p3182 A66-34785

Local time of maximum in diurnal variation of cosmic ray neutron intensity and relative sunspot number 18 p3182 A66-34786

Solar-diurnal and semidiurnal variation in cosmic ray neutron component during last cycle of solar activity from 1957 to 1965 18 p3182 A66-34787

Parameters of solar diurnal variation determined from neutron monitor data from 1957 to 1958 18 p3183 A66-34788

Solar diurnal variation of nucleonic component of cosmic radiation from 1957 to 1962 18 p3183 A66-34789

27-day modulation of solar diurnal variation of cosmic ray neutron component 18 p3183 A66-34790

Earth heliolatitude change and effect on cosmic ray intensity from 1963 to 1964 18 p3183 A66-34791

Spherical harmonic analysis to obtain latitude dependence of diurnal variations and changes with time during Forbush decrease 18 p3183 A66-34792

First spherical harmonic in cosmic ray distribution for different energy intervals 18 p3184 A66-34793

27-day variations of cosmic ray intensity in stratosphere from 1957 to 1963 18 p3184 A66-34794

Cosmic ray rigidity spectra during solar rotations 18 p3184 A66-34795

Twenty Forbush decreases with amplitude greater than 4 percent in neutron intensity 18 p3184 A66-34796

Rigidity dependence of Forbush decreases, using underground meson intensity measurement 18 p3184 A66-34797

Cosmic radiation and solar activity from stratosphere measurements 18 p3184 A66-34798

Cosmic ray meson intensity close to zenith, using telescopes of small solid angle 18 p3185 A66-34802

Cosmic ray anisotropy perpendicular to ecliptic plane 18 p3185 A66-34804

Frequency distribution of sudden changes of cosmic ray intensity in connection with solar activity 18 p3185 A66-34805

Convolution product theory applied to smoothing neutron monitor data of daily variations in cosmic ray intensity 18 p3186 A66-34808

First-order modulation effects of galactic cosmic radiation, considering hysteresis effect and variation of energy spectrum in 11-yr modulation 18 p3186 A66-34811

Cosmic ray electron component intensity measurements by instrument consisting of telescope made of two scintillation counters 18 p3187 A66-34815

Cosmic ray flux variation with height in stratosphere at geomagnetic latitude 47 degrees S 18 p3188 A66-34820

Activated emulsion camera detection of low energy very-heavy multiply-charged scarce cosmic ray nuclei 18 p3190 A66-34835

Balloon-borne nuclear emulsion detection of finite fluxes of low energy cosmic ray heavy nuclei and interstellar cosmic radiation propagation 18 p3191 A66-34838

Seventy-channel scintillation spectrometer high atmospheric measurement of cosmic gamma radiation of extraterrestrial origin 18 p3192 A66-34845

Spark chamber experimental investigation of flux of high energy gamma rays at high altitudes near magnetic equator 18 p3193 A66-34849

Charge ratio of cosmic ray electrons, examining excitation of baryon resonances in high energy collisions with no exchange of isospin 18 p3193 A66-34850

Balloon flight experiment to search for celestial sources of X-rays in energy range 20 to 58 kev 18 p3193 A66-34852

Energy spectrum of cosmic ray diurnal variation determined from IGY neutron monitor data by introducing upper energy cut-off parameter 18 p3195 A66-34864

Daily variations of cosmic ray distribution, examining effect of geomagnetic field, aperture, orientation and geographical position of counters 18 p3195 A66-34865

Coupling coefficients of directed muon component of cosmic rays calculated, noting higher energy displacement with increase of zenith angle 18 p3195 A66-34866

Simultaneous amplitude-phase modulation of periodic cosmic ray variations, examining properties of satellites produced by these variations for case of true waves 18 p3196 A66-34867

Smooth curves of cosmic ray neutron component intensity variations compared with H component of geomagnetic field

during IGY and IGC 18 p3196 A66-34868

Cosmic ray intensities in stratosphere over Antarctica and Murmansk, noting differences not due to low energy primary particles or temperature 18 p3196 A66-34869

Latitude distributions obtained for nucleonic and neutron components of cosmic radiation during flights from South Africa, compared with Northern Hemisphere distributions 18 p3197 A66-34878

Latitude and altitude survey in North America made by road transport carrying neutron monitor, meson telescope, mercury barometer, etc 18 p3198 A66-34879

Effect of geomagnetic cavity field on cosmic ray threshold rigidity, using model of cavity field, finding cavity shape produces amplitude in diurnal variation of cosmic ray intensity 18 p3198 A66-34882

Effect of compression and expansion of magnetosphere on cut-off rigidities and position of impact zones 18 p3198 A66-34884

Low energy fast cosmic ray neutrons, measurements of energy spectrum and primary intensity variations, using organic scintillator in field of photomultiplier tube 18 p3199 A66-34885

Cosmic ray produced lithium and calcium in iron meteorites 18 p3236 A66-34890

Coronal scattering of radiation from solar radio source, considering angular deflections and brightness 18 p3199 A66-35044

Principle source of radiative energy loss in intergalactic medium in spectral region from 2 to 18 angstroms is line emission from ions of elements oxygen, carbon, neon, magnesium and silicon 18 p3237 A66-35046

Cosmic rays - International Conference, Imperial College of Science and Technology, London, September 1965, Volume 2 18 p3200 A66-35089

Nuclear active component of cosmic rays studied with arrangement consisting of ionization calorimeter, Geiger counter hodoscope and two large spark chambers 18 p3215 A66-35156

High energy cosmic ray jets studied in large nuclear emulsion stacks at Krakow 18 p3215 A66-35161

Spectrum of nuclear active component of cosmic rays determined by nuclear calorimeter 18 p3217 A66-35171

Nucleon isobar production in photoemulsion giving rise to large energy transfer to several secondary charged particles 18 p3141 A66-35172

Particle production at superhigh energies based on composite model of particle and resonance 18 p3141 A66-35175

Two-fireball and CKP models of ultrahigh energy interactions 18 p3217 A66-35177

Mu meson charge ratio variation with energy at sea level 18 p3219 A66-35186

Positive excess of cosmic ray muons at sea level, taking into account change of ratio of proton to neutron with atmospheric depth 18 p3219 A66-35187

Positive excess of cosmic ray muons as function of energy from data collected by Nagoya spectrometer at large zenith angle 18 p3219 A66-35189

Data on energy and angular distribution of high energy muons, noting detector and structural bursts 18 p3220 A66-35193

Bursts produced by high energy muons undergoing large energy transfers analyzed for information on muon electromagnetic interactions over region where muon spectrum is known 18 p3220 A66-35195

Cosmic ray intensity measured underground by scintillation counter, noting pulse height conversion into digital form 18 p3222 A66-35206

Telescope design for detection of muons produced by neutrinos installed underground and consisting of plastic scintillators 18 p3222 A66-35212

Muons and neutrinos from energetic celestial objects, discussing charge ratio, rate and equipment used 18 p3224 A66-35226

Cosmic ray threshold rigidities examined, discussing penumbral and threshold perturbation effects produced by superimposing external magnetic fields on dipole model 18 p3096 A66-35227

High resolution magnetic hodoscope performance for charged particle analysis, measuring momentum response spectrum

and experimental error due to instrumental effects 18 p3115 A66-35228

Pulse shape discrimination technique using scintillation counter, distinguishing events of nuclear disintegration from those due to minimum ionizing particles 18 p3115 A66-35229

Quark detection in cosmic rays noting flux dependence on mass, energy loss through ionization, production spectrum threshold, etc 18 p3225 A66-35231

Flux of elementary triplets of unitary symmetry in cosmic radiation, noting production via nucleon-nucleon collision, particle interaction, etc 18 p3225 A66-35232

Secular variations of cosmic ray intensity governed by 11-year solar cycle 19 p3451 A66-35252

Cosmic radiation intensity fluctuation in stratosphere, noting absence of explanation for anomaly 19 p3451 A66-35261

Modified RK-1 radiosonde circuit for stratospheric cosmic ray measurements 19 p3352 A66-35274

Delta electrons formed in interstellar hydrogen-galactic ray collision 19 p3452 A66-35283

Red shift observed in quasi-stellar radio sources due to high gravitational potential 19 p3459 A66-35587

Biological hazard of radiation doses to which passengers of high-flying Concorde aircraft may be subjected, considering use of in-flight warning meter 19 p3452 A66-35796

Balloon measurements of cosmic ray hydrogen and helium nuclei at locations with nominal geomagnetic threshold rigidities 19 p3452 A66-35926

Maximum temperature of any substance in equilibrium with thermal radiation, considering properties of hot matter at very high densities, including gravitational interaction of photons 19 p3463 A66-36069

Sidereal variation of cosmic muon component at depth of 440 meters, attributing modulation to phenomenon linked to solar period 19 p3453 A66-36257

Geomagnetic cut-off rigidities determined for cosmic ray particles arriving at top of atmosphere over Hyderabad as function of zenith and azimuthal angles 19 p3454 A66-36642

Possible presence of relic quarks in cosmic rays 19 p3454 A66-36723

Low energy cosmic ray modulation relationship to observed interplanetary magnetic field irregularities in terms of diffusion, using space probes 19 p3454 A66-36765

Satellite instrumentation, discussing data handling systems, cosmic ray detection, signal and information processing, etc 20 p3556 A66-36963

Cosmic ray origination from extragalactic radio sources 20 p3630 A66-37252

Diurnal cosmic-ray anisotropy in studying temporal independence of small scale irregularities in interplanetary magnetic field 20 p3630 A66-37302

Intensity and spectra of cosmic ray electrons and positrons in determining mean confinement time, density and solar modulation 20 p3630 A66-37303

Astronomical model for diffusion of galactic cosmic rays in solar system, based on zonal character of solar activity 20 p3630 A66-37329

Determination of constancy of cosmic radiation and of terrestrial and cosmic ages of ferrous meteorites by radioactivity of Al 26 and Be 10 20 p3651 A66-37411

Anomalous high count of gamma rays from direction of constellation Cygnus associated with energy spectrum differing from spectrum of secondary gamma rays generated by cosmic rays 20 p3631 A66-37600

Sidereal diurnal variation of high-energy cosmic radiation, noting parameters of anisotropy coefficient, cosmic ray source distribution and air shower measurements 20 p3631 A66-37851

Gamma-spectroscopy determination of special reaction products of cosmic radiation in meteorites 20 p3656 A66-38060

Forbush decreases using meson and nucleon component records in study of sudden commencements during periods

between cosmic ray storms 20 p3632 A66-38070

Cosmic ray storms, difference in Forbush decrease recovery in nucleon and meson component 20 p3632 A66-38072

Direction response of meson telescopes with vertical and inclined axes used in recording of cosmic ray variations 20 p3632 A66-38073

Cosmic ray meson component distribution with time plots of particle flux revealed characteristic disturbances accompanying sudden commencements of geomagnetic storms associated with Forbush decreases 20 p3632 A66-38074

Magnetospheric models, discussing role of fast magnetospheric merging in connection with charged particle acceleration and magnetospheric configuration 20 p3641 A66-38330

Cosmic ray intensity recorded with scintillation counter corrected without stabilizing efficiency of counter by recording changes, using pulse height spectrum 20 p3562 A66-38433

Relativistic electron production by cosmic radiation in lower ionosphere 20 p3645 A66-38437

Sidereal anisotropy indicated for charged galactic cosmic radiation obtained by celestial scanning, using narrow angle muon telescope 21 p3808 A66-38466

Solar diurnal and semidiurnal variations in neutron component of cosmic rays obtained from worldwide network from 1959 to 1962 21 p3809 A66-38771

Sinusoidal hydromagnetic pulsations noting morphological properties, planetary distribution and inverse dependence of amplitude, frequency and duration on solar activities 21 p3733 A66-38780

Energy transfer mechanism in solar corpuscular flux interaction with terrestrial magnetosphere 21 p3809 A66-38782

Solar diurnal variation data used to determine parameters of phase-amplitude modulation of periodic cosmic-ray variations 21 p3809 A66-38784

Cosmic X-ray source near direction of north galactic pole, noting empirical results from balloon observations 21 p3810 A66-39267

Interferometric observation of cosmic emission at OH frequency, noting emission source dimensions 21 p3814 A66-39268

Cosmic radiation and space flight effects on lysogenic bacteria and human cells in culture 21 p3700 A66-39315

Cosmic-ray neutron production and flux distribution on sea level and mountain altitude measured with boron fluoride counter for Maxwellian energy distribution with shifted neutron temperature 22 p3972 A66-39680

Flare stars as sources of cosmic X-rays, spectra contain 4686-angstrom line of doubly ionized helium indicating that atmospheres contain either ionizing radiation or electrons 22 p3972 A66-39707

Cosmic microwave background radiation, considering statistically homogeneous and isotropic but nonuniform distribution of matter 22 p3978 A66-40009

Cosmic ray modulations in solar system and in interstellar space, presenting graphs of rigidity spectra of protons and helium 22 p3973 A66-40524

Dependence of diurnal cosmic ray variations on angle which is proportional to shortest distance from Earth to axis of corpuscular stream 22 p3974 A66-40757

Pulse amplitude measurement from scintillation cosmic-ray counter 22 p3920 A66-40771

Geomagnetic activity and Earth heliolatitude effect on diurnal variation of cosmic radiation, based on IGY neutron component observations 22 p3974 A66-40775

Statistical and instrumental fluctuations effect on distribution of first-harmonic amplitude and phase in harmonic analysis of cosmic radiation variation 22 p3975 A66-40776

Galactic radio sources noting disk model brightness distribution, relativistic particle energies, continuous particle acceleration and ratio between proton and electrical component of cosmic radiation 22 p3985 A66-40952

Star collapse observation by detection of

high energy neutrino fluxes produced by  
catastrophic star contraction 22 p3975 A66-40953

Penetrating radiation measurement on  
Moon surface obtained by Luna IX  
spacecraft 23 p4128 A66-41410

Transient anisotropic cosmic ray increase  
during recovery phase of Forbush decrease  
due to reflection from receding blast wave  
and co-rotating shock wave formed during  
explosive heating of solar  
corona 23 p4123 A66-41687

Shield of volatile matter acting as cosmic  
radiation barrier as possible explanation of  
contraction between radiation ages of stony  
and iron meteorites 23 p4065 A66-41832

Phosphorus 32 and 33 produced by  
interactions of secondary neutrons from  
cosmic rays with argon in atmosphere  
determined radiochemically from rainwater  
samples 23 p4124 A66-41845

Balloon-borne spark chamber observations  
of cosmic gamma rays from 30 to 500  
mev 23 p4124 A66-42066

Radiosonde for high altitude balloon  
soundings using large polyethylene balloons  
to carry payloads of electronics, cosmic ray  
and nuclei counters 23 p4087 A66-42084

Large air Cerenkov counter construction  
and performance characteristics for use in  
distinguishing protons and pions in cosmic  
radiation in 10-45 gev energy  
region 23 p4072 A66-42086

X-rays and Auger electron emission by  
krypton 81 measured, using proportional  
counter 24 p4262 A66-42430

Anisotropy of cosmic rays in N-S direction  
determined by comparison of intensity  
variations observed in Arctic and Antarctic  
regions 24 p4263 A66-42464

Cosmic ray nucleon interaction with high  
energies, estimating transition probability  
and interaction cross section of baryon in  
passive state 24 p4263 A66-42519

Cosmic ray ionization intensity  
measurement using special ion  
chamber 24 p4264 A66-42603

Pressurized Ar-filled ionization chamber  
response to charged particles in cosmic  
radiation determined as function of  
atmospheric depth 24 p4264 A66-42604

Interplanetary exploration space mission  
objectives, discussing magnetic fields,  
energetic particles, cosmic radiation,  
etc 24 p4264 A66-42660

Source spectra and composition of galactic  
cosmic rays implied by analysis of  
interstellar and interplanetary travel, noting  
solar modulation 24 p4265 A66-42716

Cosmic-ray electron flux above 4.7 BV  
measured, using lead-plate spark chamber,  
determining upper limit to primary  
flux 24 p4265 A66-42717

Solar activity variations, C 14 production  
by cosmic rays and reevaluation of C 14  
dating 24 p4265 A66-42738

Cosmic ray physics - All-Union Conference,  
Apatity, U.S.S.R., August  
1964 24 p4265 A66-42901

Satellite possibilities for measuring cosmic  
radiation in 1000 bev energy range and  
comparison of indirect and direct  
measurements 24 p4267 A66-42909

Cross section for lambda, kappa and sigma  
particle production in cosmic ray interaction  
with C, Cu and Pb nuclei dependent on  
atomic weight of target  
material 24 p4268 A66-42911

Density fluctuations of penetrating  
particles in extensive air showers at various  
distances from shower  
axis 24 p4268 A66-42916

Ratio of energy flux in nuclear active  
component to energy flux in electron  
photon component in extensive air showers  
with given numbers of  
particles 24 p4269 A66-42918

Resonance of antineutrino-electron  
interaction cross section, calculating  
electron density and velocity distribution via  
Ritz method 24 p4270 A66-42932

True and measured energy values of  
cosmic ray spectra, discussing relations and  
application of results 24 p4271 A66-42934

Polarization measurements of cosmic ray  
muons by detection of positrons from muon-  
to-positron decay 24 p4271 A66-42937

Neutron spatial asymmetry measured from

reaction of cosmic ray muons on nuclei with  
different spins 24 p4271 A66-42940

RK-1-F radiosonde for stratosphere  
measurements of X-ray photon energy  
spectrum, charged particle density and X-  
ray photon density 24 p4213 A66-42941

Multilayer wide gap spark chambers and  
application to cosmic ray  
physics 24 p4213 A66-42942

High accuracy directional recording of  
cosmic ray flux components, using counter  
telescope 24 p4213 A66-42943

Cosmic ray electron sign ratio and absolute  
flux measured by balloon-borne  
equipment 24 p4272 A66-43041

Energy spectrum of cosmic rays near  
upper limit and effect of photon-gas  
temperature 24 p4272 A66-43056

Book on space biology and medicine  
covering interplanetary trajectories,  
biological effects of prolonged and impact  
accelerations, weightlessness and cosmic  
radiation 24 p4165 A66-43130

Anisotropy of Forbush effect in  
ascertaining structure and intensity of  
interplanetary magnetic  
field 24 p4272 A66-43159

Anomalous circular polarization of hydroxyl  
radical 18-cm radiation from cosmic  
sources 24 p4272 A66-43188

Spark chamber system designed to detect  
gamma rays in cosmic radiation on high  
altitude balloon flights 24 p4215 A66-43212

**COSMIC RADIO WAVE**

Cosmic radio emission at frequencies of  
210 and 2200 kc at distances up to 8 earth  
radii measured by Zond-2 automatic  
interplanetary station 02 p0283 A66-11661

Optimum wavelength and spectral  
bandwidth for measuring polarization of  
distributed cosmic RF  
radiation 02 p0191 A66-11837

Cosmic radio-noise intensities below 5 mc  
measured by rocket  
probe 08 p1287 A66-18775

Depolarization of cosmic radio emission  
due to dispersion of Faraday rotation of  
plane of polarization of radio  
waves 09 p1441 A66-20334

Brightness distribution of cosmic radio  
noise at 4.7 mc/s 09 p1456 A66-20410

Radio emission from CTA-21 and CTA-102  
sources in cm wavelength range at  
Pulkovo 12 p1947 A66-23890

Postdetector correlation interferometry of  
size of noise burst at decimeter  
wavelengths from Jupiter 13 p2182 A66-25552

Cosmic radio emission attenuation in  
ionosphere measurements including  
characteristic period and seasonal absorption  
measurements 13 p2186 A66-26050

Auroral absorption of cosmic radio  
radiation recorded by shipboard station  
drifting in North Geographic Pole region in  
winter 1963-64 15 p2487 A66-29099

Cosmic radio wave absorption dependence  
on frequency and number of electron-ion  
collisions during atmospheric magnetic  
storms 19 p3344 A66-35267

Linear polarization of continuum emission  
from galaxy and discrete sources, detection  
in radio astronomy, noting relevant  
synchrotron theories 21 p3815 A66-39488

Cosmic radio wave, whistler and sigma  
transmitted radio wave interactions with  
ionospheric magnetoplasma in collision-  
dominated, photoequilibrium and  
photoionization-dominated  
regions 22 p3916 A66-40873

**COSMIC RAY**

**S HEAVY COSMIC RAY PRIMARY**

**S SOLAR COSMIC RAY**

**COSMIC RAY ALBEDO**

Geomagnetically trapped protons,  
examining possibility that they may be  
caused by cosmic ray albedo  
neutrons 03 p0421 A66-12868

Proton injection into radiation belts for  
large B-L space regions by cosmic ray and  
solar proton albedo neutron decay  
injection 11 p1764 A66-23130

Injection of protons into inner radiation  
belt caused by decay of fast cosmic ray  
albedo neutrons and superimposition of low-  
energy protons of unknown  
origin 20 p3639 A66-38318

**COSMIC RAY PROPAGATION**

Cosmic ray telescope /CRT/ carried on

Mariner IV Mars probe to measure flux and  
energy of protons and alpha particles in  
interplanetary space and near  
Mars 01 p0072 A66-11112

Diurnal solar variation in cosmic ray meson  
intensity recorded in southerly and  
northerly directions at high  
altitudes 04 p0574 A66-13840

Low energy spectrum of cosmic rays  
corrected for solar modulation and diffusive  
passage through interstellar  
matter 04 p0574 A66-14014

Secondary protons from interstellar cosmic-  
ray collisions, noting solar modulation  
effects on detection 05 p0747 A66-14796

Cosmic ray electromagnetic acceleration  
mechanism, calculating motion of charged  
relativistic particles in applied  
fields 05 p0753 A66-15388

Planetary distribution and interpretation of  
abrupt increases in cosmic ray intensity  
observed during periods of maximum solar  
activity but not related to visible solar  
phenomena 05 p0755 A66-15404

Solar cosmic ray propagation, discussing  
intensity time dependence in terms of  
isotropic diffusion of solar  
particles 06 p0947 A66-16571

Cosmic ray diffusion, discussing existence  
and influence of radial magnetic  
field 06 p0947 A66-16574

Contribution of spallation and ionization  
loss to operator that modulates cosmic ray  
nuclei with Z greater than or equal to 2  
during propagation 07 p1124 A66-17998

Variation spectrum stability of Forbush  
decrease and small cosmic ray flare during  
intensity recovery, noting electric field  
effect, calculation methods,  
etc 07 p1129 A66-18023

Diffusion model study of solar cosmic ray  
propagation during burst of September 28,  
1961 08 p1283 A66-19019

Propagation mechanisms of solar cosmic  
radiation in interplanetary space other than  
classical diffusion 09 p1438 A66-20212

Diffusion and regular model of motion of  
cosmic rays, noting dependence of  
applicability to cosmic ray fluxes on  
chemical composition 09 p1443 A66-20598

Lower limit of age of cosmic ray nuclei,  
flux ratio of Be nuclei to B nuclei and  
intergalactic cosmic ray  
propagation 12 p1938 A66-24092

Satellite data indicates correlations  
between cosmic ray variations and radiation  
intensity of radiation belts and related  
phenomena 12 p1941 A66-24170

Relation between Forbush decreases and  
magnetic storms, examining spatial  
distribution of predecrease moments relative  
to sudden  
commencements 12 p1941 A66-24171

Threadlike equatorial current ring and  
effect on geomagnetic cut-off rigidity of  
directed cosmic radiation 12 p1941 A66-24172

Effect of equatorial current ring  
distributed over globe on geomagnetic cut-  
off rigidity of cosmic  
rays 12 p1941 A66-24173

Stellar-diurnal variations in cosmic ray  
intensity, recording vertically falling  
particles with telescope and cross  
telescope 12 p1942 A66-24175

Effect of higher harmonics of geomagnetic  
field on cosmic ray trajectories, noting  
reception cones of Soviet  
stations 12 p1943 A66-24268

Quantum mechanics and gravitational  
effect on origin of cosmic particles,  
discussing Schrodinger wave equation,  
electric potential and alpha  
decay 12 p1944 A66-24465

Sea level energy spectrum analysis of high  
energy cosmic ray muons generated by pi-  
mu decay 15 p2589 A66-29588

Galactic acceleration and solar modulation  
of cosmic rays examined via energy  
spectrum of galactic electrons, estimating  
Fermi acceleration, low energy electron  
flux, etc 18 p3177 A66-34756

Cosmic ray friction in limiting solar wind  
cavity 18 p3180 A66-34772

Long-term modulation of cosmic ray  
intensity in interplanetary  
medium 18 p3180 A66-34774

Cosmic ray anisotropy induced by solar  
wind and magnetic field

- irregularities 18 p3181 A66-34779
- Anisotropy of cosmic ray with gradient and curvature drifts in spiral interplanetary magnetic field 18 p3181 A66-34780
- Galactic cosmic ray anisotropy behavior obtained from observations of daily variation of cosmic ray intensity 18 p3182 A66-34782
- Solar particles generated during small chromospheric flares 18 p3184 A66-34799
- Solar cosmic ray disturbances in stratosphere measured by balloon-borne radiosondes 18 p3185 A66-34800
- Degree of agreement between cosmic ray cut-offs derived from McIlwain parameter and those from numerical integration of motion equations 18 p3198 A66-34880
- Effects of deformed magnetic field on trajectories and asymptotic directions of arrival of medium energy cosmic rays at various stations, using spherical harmonics 18 p3198 A66-34883
- Cosmic ray isotropy mechanism, examining plasma beam instability and cosmic ray scattering at plasma turbulent pulsations 20 p3629 A66-37032
- Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 20 p3633 A66-38132
- ### COSMIC RAY SHOWER
- Penetrating particle detector sensitive to muons of energy greater than 700 mev and nuclear active particles of energy greater than 15 gev used to monitor extensive air shower 01 p0132 A66-10330
- Spark spectrometer for measurement of high energy cosmic ray shower particles 01 p0067 A66-10454
- Large polystyrene scintillator for cosmic shower density measurement 01 p0071 A66-11038
- High energy proton from local radio sources, using telescopic system for Cerenkov effect detection of broad atmospheric showers 05 p0753 A66-15389
- Spectrum of primary cosmic radiation determined for ultrahigh energies, based on international data on electron and meson air showers 05 p0753 A66-15390
- Primary cosmic rays of superhigh energy using extensive air shower data, noting Geiger-Muller counters, scintillation counters and muon detector 05 p0753 A66-15391
- Extensive atmospheric showers as means of gaining insight into energy spectrum and composition of primary cosmic radiation 05 p0755 A66-15405
- Atmospheric showers and high energy nuclear-active particles 05 p0756 A66-15410
- Extensive air showers of cosmic radiation, noting flux and energy distribution 06 p0947 A66-16576
- Cosmic radiation measurements in extensive air showers, recording high energy muon fluxes 06 p0947 A66-16577
- Atmospheric density effects on frequency of extensive air showers 06 p0948 A66-16578
- Extensive air showers and intensity of cosmic rays of moderate energy 06 p0949 A66-16586
- Spark chamber with air filler for cosmic ray detection 06 p0880 A66-16598
- Jet characteristics considered from viewpoint of formation of shower particles resulting from intermediate pi-pi interaction 07 p1113 A66-17542
- Energy spectra for nuclear-active particles and particle distribution in air showers indicate that pionization plays minor role relative to high energy cosmic rays 07 p1114 A66-17546
- Neutral pi-meson production in processes involved in formation of large ionization bursts by high-energy nuclear-active particles 07 p1114 A66-17547
- Energy distribution of particles produced in elementary interaction expressed in terms of shower characteristics derived from cascade theory 07 p1116 A66-17562
- Fluctuations in number of particles in electromagnetic cascade and effect on spectrum of ionization bursts produced by mu mesons 07 p1117 A66-17568
- Muon detection and energy determination in multilayer system of ionization chambers and probability of finding muon in n-electron shower at depth t 07 p1117 A66-17569
- Ultrahigh-energy primary cosmic ray particle interactions cause electron photon cascades and muon emission 07 p1117 A66-17570
- Electron-photon, mu-meson and nuclear-active components of extensive air showers 07 p1117 A66-17571
- Mu-meson flux irregularities, lateral distribution and average characteristics in extensive air showers at 200 mwe depths 07 p1118 A66-17572
- Extensive air shower high energy gamma rays in upper third of atmosphere 07 p1118 A66-17573
- Energy and density spectra of X-ray photons in extensive air showers and in stratosphere 07 p1118 A66-17574
- Mean free path for nucleon-light atom interaction changed from 75 to 90 g/sq cm affecting air shower characteristics 07 p1118 A66-17575
- Fluctuation problem in electromagnetic cascade theory analyzed, using invariant imbedding method 07 p1083 A66-17973
- Dynamical properties of solar wind and solar corona atmosphere with extended temperature bound strongly by gravity 07 p1132 A66-18263
- Model of cosmic ray shower, measuring time-integrated energy flux in radiation field 08 p1283 A66-18619
- Geomagnetic sudden-commencement storms effect on electron concentration in F-2 layer above Europe 08 p1215 A66-19082
- Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 08 p1285 A66-19452
- Probability of high-energy cosmic ray muon undergoing electromagnetic interaction in lead with energy transfer at various ranges 08 p1286 A66-19836
- Monte Carlo method analysis of electron photon cascade 09 p1436 A66-20134
- Primary ultrahigh energy cosmic radiation composition analyzed, using Cerenkov flash 09 p1437 A66-20205
- Ultrahigh energy primary cosmic ray energy spectrum calculated from EAS particle-number spectrum 09 p1437 A66-20206
- Geometric program for processing penetrating cosmic ray shower data consisting of individual track processing and initial point location 09 p1441 A66-20234
- Improvement of Moscow State University installation for detailed investigation of extensive air showers and high energy muons 09 p1379 A66-20237
- Sidereal component of diurnal variation of cosmic ray intensity 09 p1442 A66-20461
- Solar cosmic ray generation, interplanetary proton diffusion and stratospheric showers 10 p1595 A66-21045
- Four momentum transfer in high energy jet showers and resultant number of multifireballs 11 p1763 A66-22701
- Two-center model evaluation of four momentum transfer in high energy jet showers, noting pion or boson exchange 11 p1763 A66-22702
- Kinematic analysis of multiple pion production in high energy jet showers under asymmetric angular distribution 11 p1763 A66-22703
- Monte Carlo method test of new formulae of pion emission in high energy jet showers 11 p1763 A66-22704
- High energy cosmic ray jet showers noting energy, angular momentum, collision inelasticity, secondary meson distribution, etc 11 p1763 A66-22705
- High energy jet showers examined to obtain four momentum transfers and transverse momentum of recoil protons 11 p1763 A66-22706
- Large polystyrene scintillator for cosmic shower density measurement 11 p1708 A66-23284
- Anisotropy of weak cosmic ray bursts studied by examining diurnal variations for days with increased solar flare activity 12 p1942 A66-24178
- Scintillation counter for extensive air showers, noting time-analysis channels for determining pulse delays, monitoring unit, unit calibrating amplitude channels, etc 12 p1881 A66-24184
- Mathematical construction of extensive air shower based on hypotheses for nuclear phenomena, noting proton-proton interaction, pion generation, etc 13 p2174 A66-25454
- Separation of radio emission of extensive air showers /EAS/ polarized in East-West direction from usual Cerenkov radiation 13 p2175 A66-26023
- High energy solar cosmic ray spectrum during solar flare of February 23, 1956 15 p2575 A66-29080
- Extensive air showers - International Conference on Cosmic Rays, Jaipur, India, December 1963 15 p2577 A66-29513
- Extensive air shower generation by high energy primary rays over Bolivia studied by methods of fast timing and density sampling 15 p2577 A66-29515
- Extensive air shower studies in Australia 15 p2578 A66-29516
- Energy spectrum of high energy cosmic rays from EAS observations 15 p2578 A66-29517
- Energy spectrum and arrival directions of high energy primary cosmic rays 15 p2578 A66-29518
- Extensive air showers core structure and muon distribution 15 p2578 A66-29519
- N and muon number and lateral distribution in various air showers, noting EAS array 15 p2578 A66-29520
- Air showers size, lateral distribution and arrival direction at 5,200 m altitude 15 p2578 A66-29521
- Experimental data concerning electron, photon and muon components of extensive air showers, noting scintillation counters, Geiger-Muller counters, muon detectors, etc 15 p2579 A66-29522
- Hodoscope recordings of extensive air showers with abnormally low content of penetrating particles 15 p2579 A66-29523
- Distribution of arrival directions of muon-rich air showers, using equatorial and galactic coordinate systems 15 p2579 A66-29524
- Cosmic ray anisotropy and gamma rays in Orion analyzed, using Geiger counter and Cerenkov telescope 15 p2579 A66-29525
- High energy photons from radio sources, registering EAS with Cerenkov telescope 15 p2579 A66-29526
- Core structure and properties of extensive air showers, stressing lateral density structure of charged particles and energy of nuclear active component 15 p2579 A66-29527
- Extensive air showers at various atmospheric depths analyzed, using hodoscope counters and ionization chambers, noting differential spectra of densities 15 p2580 A66-29528
- Measurement of total number of nuclear active particles in showers with various particle numbers at 3330 m above sea level, determining size spectrum of EAS 15 p2580 A66-29529
- Structure of air showers, considering muon components and distribution of arrival directions of muon-rich EAS 15 p2580 A66-29530
- Anisotropy of arrival directions of extensive air showers /EAS/ with one or more high energy nuclear active particles 15 p2580 A66-29531
- Arrival directions of large EAS falling in 10 to 80 degree band of north declination, noting angle, azimuth and sidereal time 15 p2580 A66-29532
- Multiple muon events at sea level and association with air showers detected, using Geiger and scintillation counters 15 p2580 A66-29533
- Density spectrum of extensive air showers at very large densities from cloud chamber study 15 p2580 A66-29534
- Muon distribution and irregularities in extensive air showers, noting detector triggering 15 p2581 A66-29535
- Integral number spectrum and absorption characteristics of muons in extensive air showers 15 p2581 A66-29536
- Density fluctuation of muons in extensive air showers, obtaining minimum separation of adjacent particles 15 p2581 A66-29537
- Primary proton-air nuclei interactions leading to EAS containing very few muons, noting energy transfer fluctuation and

isobar production 15 p2581 A66-29538  
 Nucleon-initiated air shower fluctuations and random variations in FA approximation theory 15 p2581 A66-29539  
 Two large air shower studies of spectrum and isotropy of primary particles 15 p2582 A66-29540  
 Experimental data analysis of cosmic ray showers, secondary particle production by nucleon-nucleon collision at high energy, momentum distribution in pions and primary energy-inelasticity relation 15 p2583 A66-29547  
 Young air electron-photon showers at 3200 m altitude, noting average nucleon energy and inelasticity coefficient 15 p2583 A66-29552  
 Cosmic ray showers, discussing high energy interactions of nuclear active particles, intensity and energy spectra of gamma rays and muons, young air showers, ionization bursts, etc 15 p2584 A66-29555  
 Cascade theory of cosmic ray showers 15 p2586 A66-29567  
 Cosmic ray measurements, muon production from decay of charged pions and kaons, muon polarization, momentum spectra, atmospheric gamma cascades and derivation of kaon/pion ratio 15 p2587 A66-29573  
 Production rates of muons in extensive air showers determined from spatial and energy distributions 16 p2795 A66-31694  
 Muon interactions in scintillator stack analyzed for average shower development, noting agreement with theories 18 p3228 A66-33917  
 Earth troposphere affected by solar corpuscular fluxes, cosmic rays, atmospheric radiation, chromospheric flares and intensified radio wave absorption 18 p3169 A66-34481  
 Sidereal time variation of cosmic rays explained by diffusion in galactic arm for coilnear magnetic field and proximity of solar system 18 p3178 A66-34762  
 Flux limits for high energy gamma rays from quasars and other possible cosmic ray sources 18 p3186 A66-34813  
 Threshold rigidities for vertical incident cosmic ray particles derived, using trajectory computations by higher-order simulation of geomagnetic field 18 p3198 A66-34881  
 Extensive air shower research aimed at study of composition of primary cosmic rays and component properties 18 p3204 A66-35090  
 Underground scintillator stacks used to study coincidence events caused by muon extensive air showers, noting muon shower energy and grouping 18 p3204 A66-35092  
 Central part and core structure of muon extensive air shower studied by large area underground hodoscope 18 p3204 A66-35093  
 Absolute number of ultrahigh energy muons in extensive air showers estimated by using large air shower array on ground and muon detectors far below ground 18 p3205 A66-35094  
 Anisotropy of muon-rich extensive air showers examined by observation, using large area air Cerenkov detector at 60 degrees zenith angle 18 p3205 A66-35095  
 Mu-triggered extensive air showers are rich in muons and have less component energy flow than electron triggered showers 18 p3205 A66-35096  
 Decrease in distribution of arrival directions of muon-rich air showers between 15 h and 21 h in right ascension confirmed by analysis of EAS 18 p3205 A66-35097  
 Muon-poor EAS determined from 80,000 EAS recordings, representing distribution of recorded muon multiplicities over large intervals by Polya 18 p3205 A66-35098  
 Energy flow variation of high energy nuclear active particles in EAS measured by scintillation detectors in Bolivia 18 p3205 A66-35099  
 Electron-photon and nuclear active components energy of young air showers measured by ionization calorimeter, determining inelasticity coefficient 18 p3206 A66-35100  
 Ionization calorimetry of energy spectrum of leading particles in cores of EAS

compared with data from model 18 p3206 A66-35101  
 Three-dimensional Monte Carlo simulation of nuclear cascade of extensive air showers, examining nuclear particle spatial and energy distribution 18 p3206 A66-35102  
 Stationary aspects of cosmic ray propagation through atmosphere explained by model calculating high energy nuclear active and muonic components of extensive air showers, presenting energy spectra 18 p3206 A66-35103  
 Comparison of total number of nuclear active particles in cosmic ray shower measured at very high altitudes, examining discontinuities in dependence of number on shower size 18 p3206 A66-35104  
 Scintillation counter observation of EAS core structure and high energy interactions 18 p3207 A66-35106  
 Electromagnetic interactions and collisions of particles in cores of EAS studied, using GM counters, plastic scintillators and Wilson cloud chambers 18 p3207 A66-35107  
 EAS core fine structure observations using spark chamber compared with response of plastic scintillation counter 18 p3207 A66-35108  
 Neon hodoscope study of energy and production heights of high energy EAS electron-photon cascades, comparing results to nuclear emulsion study findings 18 p3207 A66-35109  
 Transition region of pulse spectrum from EAS particle density recordings by Cerenkov and scintillation detectors 18 p3207 A66-35110  
 High energy nuclear active particles in EAS discussing lateral and zenith angle distribution energy spectrum, anisotropy, etc 18 p3207 A66-35111  
 Response to EAS electron-photon cascade of plastic scintillator, cloud chamber and Geiger counter tray 18 p3208 A66-35112  
 Cerenkov and scintillation counters responses to electron-photon EAS 18 p3208 A66-35113  
 EAS mu component fluctuations in density distribution and reception spectrum recorded, using hodograph detectors 18 p3208 A66-35116  
 EAS RF emission detection, discussing enhanced Cerenkov radiation, mutual coherence effects, diffraction, Fresnel zones, Coulomb-field bremsstrahlung, etc 18 p3208 A66-35117  
 Jodrell Bank experiment testing Askarian hypothesis on radio pulses coincident with EAS under mutual coherence effects and checking coherent condition, internal reflection, shower energy, threshold and polarization 18 p3209 A66-35118  
 Air shower detection with radio receiving system, broadband band helical antenna and Cerenkov particle detector 18 p3115 A66-35119  
 Primary gamma ray production, arrival directions, particle collisions and distribution of EAS penetrating particles in intergalactic space 18 p3209 A66-35120  
 Component composition and photonuclear interactions of photon-initiated EAS 18 p3209 A66-35121  
 Heavy cosmic ray primary energy spectrum from BASJE measurements 18 p3209 A66-35122  
 Bolivian Air Shower Joint Experiment /BASJE/ fast-timing methods compared with arrival directions measured in cloud chamber pictures 18 p3210 A66-35123  
 Cloud chamber EAS density spectrum measurements at 2285 m 18 p3210 A66-35124  
 Altitude variation of EAS particle density and primary energy/nucleon spectra measured with proportional counters 18 p3210 A66-35125  
 EAS front structure and normal energy transfer determined from pulse forms recorded by Cerenkov detectors 18 p3210 A66-35126  
 Production spectra and arrival time distributions of heavy cosmic ray particles in air showers 18 p3210 A66-35127  
 High primary energy EAS composition, energy spectrum of nuclear active particles and high energy collisions 18 p3210 A66-35128

Energy spectra of muon, electron and N components of extensive air showers /EAS/ 18 p3210 A66-35129  
 Electronic data on electromagnetic core structure of extensive air showers 18 p3211 A66-35130  
 Airborne scintillation counter-spark chamber observations of particle energy flow and incident zenith angle distribution of air showers 18 p3211 A66-35131  
 Lateral distribution of high energy gamma rays, successive interactions and core structure of EAS, using emulsion chambers at mountain altitudes 18 p3211 A66-35132  
 Extensive air showers /EAS/, discussing lateral distribution function variation with atmospheric density, primary energy dissipation, shower front radius of curvature, etc 18 p3211 A66-35133  
 Muon component of vertical and inclined extensive air showers, determining energy spectrum, lateral distribution at sea level and relation of mean height of origin and sea level energy 18 p3211 A66-35134  
 Numerical calculations of lateral distribution, energy spectrum and heights of origin of muons in extensive air showers 18 p3211 A66-35135  
 Direct measurement of attenuation length of extensive air showers through water 18 p3212 A66-35136  
 Differential momentum spectrum and charge ratio of muons in EAS measured, using solid iron magnet spectrograph 18 p3212 A66-35137  
 Extensive air showers with fixed muon number and fixed electron number studied, emphasizing correlation between cascade parameter and other EAS characteristics 18 p3212 A66-35138  
 Muon component of air showers, discussing total number of muons relation to shower size 18 p3212 A66-35139  
 Comparison of various models of EAS development with experimental data and prospects of cosmological and nuclear aspects of EAS investigation 18 p3212 A66-35140  
 Monte Carlo calculations on extensive air shower development, discussing nuclear active and electromagnetic multicore frequencies in terms of particle atomic number and primary baryon 18 p3212 A66-35141  
 Mean square angular and lateral spreads of electrons and photons in cascade shower calculated over wide ranges of finite energy and observation points 18 p3213 A66-35142  
 Solar and sidereal time variations of small air showers measured by array of water Cerenkov detectors 18 p3213 A66-35143  
 Inverse problem in cascade theory of showers to derive information about nuclear interaction 18 p3213 A66-35144  
 One-dimensional cascade theory of photon-electron showers for light and heavy substances, taking into account polarization of medium upon cross section for electron bremsstrahlung 18 p3213 A66-35145  
 Bremsstrahlung and pair production processes as regarded in cascade theory of showers 18 p3213 A66-35146  
 Time lags of nuclear interacting particles in extensive air showers 18 p3214 A66-35148  
 Experimental search for heavy mass particles in air showers with total absorption spectrometer 18 p3214 A66-35149  
 Extensive air showers of energies about one trillion ev 18 p3214 A66-35151  
 Tien-Shan high altitude installation for studying strong interactions at 100-1000 gev of cosmic ray nucleons and pions 18 p3214 A66-35152  
 Balloon experiment using spark chambers and ionization spectrometer to measure flux, composition, time variation and properties of individual interactions of cosmic rays above 100 gev 18 p3115 A66-35153  
 High-energy pion generation in showers produced in carbon by cosmic ray particles 18 p3215 A66-35162  
 Azimuthal angular distributions of secondary particles in cosmic jets, discussing shower particles from fireball model 18 p3215 A66-35163  
 Shower production by pions and protons with momenta 0.1 and 20 gev/c in thin layers of matter, determining secondary

particle energies and multiplicities 18 p3216 A66-35166  
 Inelastic n-p cross section at 80 gev determined from attenuation of penetrating shower-producing cosmic ray neutrons in paraffin and graphite 18 p3216 A66-35167  
 Multiplicity of high-energy interactions causing extensive air showers determined from maximum position 18 p3217 A66-35176  
 Angular distribution of high-energy jets analyzed by kinematic approach, assuming constant transverse momentum of secondary pions 18 p3217 A66-35178  
 Relationship of neutral and charged particles generating electron-nuclear showers studied by ionization calorimeter 18 p3218 A66-35184  
 Angular distribution and energy spectrum of cosmic particle showers at large zenith angles analyzed, using ionization calorimeter 18 p3220 A66-35196  
 Electron-photon cascade showers recorded with ionization calorimeter, determining influence of value of radiation length on form of mean cascade curve 18 p3221 A66-35198  
 Electromagnetic interactions of muons analyzed underground using scintillator stack, deducing energy of cascade shower from size 18 p3221 A66-35199  
 Classification of underground electromagnetic shower events due to muon interactions in scintillator stack 18 p3221 A66-35200  
 Frequencies of secondary particles and penetrating particles, using underground scintillators, Geiger counters and flash tubes 18 p3221 A66-35202  
 Vertical intensity and angular distributions of penetrating cosmic ray muons measured underground by scintillators, Geiger counters, etc 18 p3221 A66-35205  
 Interaction between ultrahigh energy cosmic rays and neutrinos in universe, noting distortion of energy spectrum 18 p3224 A66-35220  
 Energy spectra of muons and neutrinos generated by cosmic rays in dense objects without atmosphere analyzed in connection with nebulae problems 18 p3224 A66-35221  
 Muon decays arising from neutral primary in cosmic rays, using detector built of scintillating plastic and located near sea level 18 p3224 A66-35222  
 Almost horizontal air shower observed from cloud chamber photography suggests nuclear interaction of muon 18 p3224 A66-35223  
 Angular distribution of secondaries in elementary multiple high energy production event, evaluating expected frequency of asymmetrical showers 24 p4267 A66-42905  
 Angular dependence of charged neutron-producing component of cosmic rays, using 15-channel counter telescope on rotating platform with neutral monitor 24 p4268 A66-42913  
 Distributions of extensive air showers with either fixed number of charged particles or muons, using Geiger counter and scintillation counter 24 p4268 A66-42914  
 Central region of muon shower investigated, using Geiger counter hodoscope detector 24 p4268 A66-42915  
 Monte Carlo calculations of simultaneous distribution of extensive air showers with respect to several fluctuating parameters for elementary event models 24 p4269 A66-42919  
 Extension of formalism of theory of branching random processes applied to fluctuations in development of extensive air shower cascade by Kolmogoroff method 24 p4269 A66-42920  
 Ionization calorimeter measurement of number of particles in electron photon cascade with energy transferred from ionization calorimeter 24 p4269 A66-42924  
 Computer calculation of dependence of average characteristics of extensive air showers on adopted nucleon nuclear-interaction model 24 p4270 A66-42926  
 Extent of maximum in altitude dependence curve for extensive air showers, noting energy dissipation among secondary particles 24 p4270 A66-42927  
 Calculation of rms numbers of particles in three-dimensional theory of electron-photon

showers, considering scattering 24 p4270 A66-42928

 Directional intensity of electron distribution of energies larger than 40 kev with respect to pitch angles in inner belt from Cosmos V data 06 p0951 A66-17172  
 Cosmos V satellite measurement of July 9, 1962 high altitude nuclear detonation used to determine fission debris over Johnston Island 08 p1219 A66-19414  
 Soft electrons and ions study by traps on Cosmos V satellite 19 p3451 A66-35248  
**COSMOS XII SATELLITE**  
 Low energy charged particle measurements, describing satellite mounted spherical electrostatic analyzer 05 p0751 A66-15373  
**COSMOS XLI SATELLITE**  
 Cosmos XLI satellite measurements of low energy proton distribution and intensity 11 p1762 A66-22408  
**COSMOS XV SATELLITE**  
 Charged particle fluxes of 1 kev energy measured by spherical electrostatic analyzer aboard Cosmos XV 11 p1762 A66-22423  
**COSMOS SATELLITE**  
 Space studies of Cosmos and Elektron satellites including space radiation hazards, particle observation, ionosphere chemical composition, onboard equipment, etc 01 p0136 A66-10415  
 Russian Cosmos satellite series classification and description according to orbital inclination 02 p0296 A66-11889  
 Location and radiation intensity variation in upper radiation belts determined, using scintillation counters aboard Cosmos satellites 05 p0754 A66-15400  
 Characteristic distortion of Doppler curves and radio signals of artificial satellite from behind horizon 07 p1000 A66-17209  
 Radiation measurement equipment on Cosmos 41 satellite including scintillation counter, gas discharge counter, etc 08 p1228 A66-19798  
 Terrestrial radiation belt measurement with Cosmos satellite, noting launch and orbit data, instrumentation and results 09 p1441 A66-20231  
 Primary cosmic radiation and terrestrial radiation belt measurement by Cosmos XVII satellite, noting instrumentation, equipment operation and results 09 p1441 A66-20232  
 Spatial distribution of protons and electrons captured by terrestrial magnetic field, as measured by Cosmos satellites 09 p1443 A66-21011  
 Cosmic rays during flights of Sputniks and Cosmos satellites investigated by analysis of charged particle fluxes obtained by gas discharge counter 10 p1595 A66-21042  
 Geomagnetic field measurements by Cosmos satellites at 49 degrees latitude, including typical magnetograms of magnetic field intensity 10 p1526 A66-21051  
 Energy spectrum of electrons recorded by fluorescent screen indicators onboard Cosmos satellites, noting ratio of electron intensities 11 p1763 A66-23042  
 Physical pattern of high altitude fission cloud and motion of gamma and beta fission fragments captured by geomagnetic field and observed by Cosmos satellite 11 p1764 A66-23043  
 Purposes and technical details of Soviet Cosmos satellites 13 p2193 A66-25857  
 Cosmos-65 spectrophotometric measurements of atmosphere-reflected UV radiation spectra 15 p2485 A66-29076  
 Cosmos satellite observational values of atmospheric density during low solar activity 15 p2496 A66-30083  
 Telemetry data for extreme orbital deviations of Soviet satellites with orbital inclination of 65 and 51 degrees 19 p3468 A66-35722  
 Radiation measurement equipment on Cosmos XLI satellite including scintillation counter, gas discharge counter, etc 21 p3736 A66-38794

Angular, spectral and geographical distributions of outgoing fluxes of thermal radiation and Earth albedo measured, using Cosmos satellite 22 p3913 A66-40471  
 Relativistic-electron diffusion wave in outer radiation belt recorded by device mounted on Cosmos XLI satellite in high geomagnetic latitudes 22 p3974 A66-40756  
**COSPAR**  
 Space research activities in U.S. /1964 and early 1965/, condensed comprehensive report to COSPAR 09 p1458 A66-20690  
 Model atmosphere structural parameters and improvement proposals for 1964 COSPAR International Reference Atmosphere 09 p1375 A66-20989  
 Text on international cooperation in space, institutions involved and technical and political constraints 10 p1623 A66-21765  
 Catalog of sounding rocket launchings and meteorological rocket firings prepared for COSPAR 15 p2599 A66-29900  
 U.S. space science program 1965, report to COSPAR 15 p2600 A66-29903  
**COST ESTIMATE**  
 Microelectronic integrated circuits and thin films applied to inertial navigation systems to achieve cost reduction 01 p0034 A66-10011  
 Changes to improve reliability of attack aircraft, estimating cost and gains in operational effectiveness 01 p0167 A66-10049  
 Evaluation and future of cost effectiveness management 01 p0167 A66-10052  
 Maintainability and reliability cost effectiveness program /MARCEP/ for improving reliability by adding redundancy in cost-effective manner to nonredundant system 01 p0168 A66-10063  
 Product assurance in terms of cost and enhancement in reliability and quality 01 p0170 A66-10101  
 Cost factors in launch operations controlled by management techniques and tools used in other facets of research and development 01 p0141 A66-10105  
 Operational research techniques applied to procurement and capital investment programs of aviation industry 01 p0170 A66-10341  
 Economic feasibility of all-rocket approach to reusable launch system, comparing various classes of launch vehicles, noting need for payload recovery [SAE PAPER 650802] 01 p0144 A66-10817  
 Potential air freight market in next decade forecast as many-fold times present level [SAE PAPER 650782] 01 p0012 A66-10839  
 Performance operation and cost of rockets and airbreathing launch system, noting preliminary designs 02 p0295 A66-11676  
 Integrated circuit economics discussing design, construction and running costs 02 p0205 A66-11944  
 RCAF system of aircraft fleet operations management /TC-91/ for unserviceability cost estimate 02 p0178 A66-11992  
 Contractor-customer responsibilities for Model A-7 aircraft design in firm fixed price environment 03 p0320 A66-12589  
 [ATAA PAPER 65-758] 03 p0320 A66-12589  
 Cost effectiveness of VTOL short range jet airlines, discussing significance of block time [ATAA PAPER 65-797] 03 p0320 A66-12598  
 V/STOL aircraft economic and operational characteristics for commercial service over routes of 150 miles or less [SAE PAPER 650243] 03 p0446 A66-12632  
 Runway design by assessing capacity, delay of operations, costs, etc, using mathematical models 03 p0352 A66-12706  
 Flight operating techniques influence upon engine maintenance costs and new engine design, specifically Pratt and Whitney JT3C-12 on Boeing 720 aircraft [SAE PAPER 650212] 03 p0322 A66-13220  
 V/STOL transport aircraft noting productivity, flexibility, simplicity, economy of numbers, low fleet cost, high speed and turbofan propulsion 03 p0322 A66-13269  
 Ground and flight procedures of minimum cost satellite launcher noting control, range safety, reliability and orbits 04 p0586 A66-13947  
 Optimum design employing merit function of cost and weight for structural/material components and subsystems applied to space vehicles

[SAE PAPER 650785] 05 p0773 A66-15010  
Meteoroid protection weight requirements effects on space exploration costs, examining environment and hypervelocity impact penetration

[SAE PAPER 650786] 05 p0774 A66-15011  
Assault helicopter cost and system effectiveness in mission of delivering cargo from carrier to landing zone, evaluating avionics system

[AIAA PAPER 64-785] 05 p0610 A66-15079  
Energy-optimal control with cost function for bounded time and control system

[ASME PAPER 65-WA/AUT-14] 05 p0659 A66-15605  
Reliability of electronic equipment needed to increase availability and reduce maintenance cost

06 p0840 A66-15953  
Short-range aircraft design efficiency and possible reduction in operating cost

06 p0804 A66-15990  
British short-range aircraft operating cost affected by reliability, design and engines

06 p0804 A66-15991  
Short-range jet transport operating cost reduction through technical innovation, labor cost and research

06 p0804 A66-15992  
Possible cost reduction with all-wing short-range aircraft, noting ogee design

06 p0804 A66-15993  
Lowering total airline operating costs through nonaircraft

06 p0804 A66-15994  
economizing

06 p0804 A66-15994  
Price discrimination and regulation of air transportation, examining history, interplay and evolution

06 p0973 A66-16402  
Differences between inertial equipment and that in current use, emphasizing economic aspects

07 p1069 A66-17710  
Productivity and cost comparison of water-bomb forest fire fighting

07 p0989 A66-18051  
Fuel cell considered from viewpoint of fuel costs, noting hydrocarbon fuel for application with low load factor and instant starting

07 p0997 A66-18478  
Costing air traffic control deviations and relation to size of separation

09 p1401 A66-20432  
Value analysis as cost reduction factor, using production of Bulpup A and B missiles as example

11 p1711 A66-23060  
Lagrange and Mayer problems of optimal control of cost

11 p1680 A66-23277  
Systems effectiveness - Conference, Electronic Industries Association, Washington, D.C., October 1965

11 p1788 A66-23434  
Rationale for systems effectiveness in Air Force systems command

11 p1789 A66-23435  
Cost effectiveness as analytical tool for engineering and management, noting risks involved, limitations, benefits, etc

11 p1789 A66-23439  
Past and future of cost effectiveness, noting actions needed to implement growth

11 p1790 A66-23446  
Airline long-haul maintenance objectives, methods for monitoring maintenance equipment and cost

12 p1801 A66-23859  
analysis

12 p1801 A66-23860  
Cost reduction in aircraft maintenance and servicing

12 p1834 A66-24101  
Multipurpose chips for reduction of analog computer integrated circuit cost

12 p1834 A66-24101  
Estimation of manufacturing costs of low volume high-cost complex electronic subsystems

[ASTME PREPRINT MM66-701] 12 p1886 A66-24411  
Aerospace structural material machinability, cost estimating, machine tool selection, metal cutting problems, etc

[ASTME PREPRINT MM66-715] 12 p1887 A66-24419  
Point-to-point contouring systems noting procedures, codes and cost savings

[ASTME PREPRINT MS66-725] 12 p1887 A66-24423  
Digital simulation of scheduling logistic support by helicopter, using Backtrack techniques

12 p1858 A66-24683  
Effects of varying orbital parameters, including number of satellites, orbit altitude, positioning, tracking accuracy, cost effectiveness, etc, on establishment and maintenance of communications satellite

system

[AIAA PAPER 66-286] 12 p1955 A66-24757  
Minimum cost ground receiving station for synchronous satellite system

[AIAA PAPER 66-311] 12 p1859 A66-24777  
Effective radiated power /ERP/ satellite for educational TV distribution, discussing design feasibility, cost comparison, spectrum utilization and system model

[AIAA PAPER 66-320] 12 p1982 A66-24791  
Economic aspects of educational television distribution system, using comprehensive total cost model

[AIAA PAPER 66-321] 12 p1982 A66-24793  
Ground-based steerable paraboloid spherical reflector and multiplate type antennas, noting cost per unit area for unit wind speed of 30 mph and frequency of 1400 mc, performance, restrictions, etc

[AIAA PAPER 66-324] 12 p1844 A66-24794  
Silicon monolithic circuit development, discussing cost reduction and performance improvement in microcircuits

12 p1845 A66-24850  
Rotationally-symmetric intake nozzles manufactured by low cost technique for wind tunnels from glass fibers and plastics, using wooden pattern

13 p2085 A66-25080  
Reliability feasibility evaluation of Voyager spacecraft, determining launches necessary, chances of success and program cost

13 p2192 A66-25509  
Economic analysis of maintainability in selecting alternative maintenance resource allocation

13 p2210 A66-25660  
Optimum control of linear systems in presence of random disturbances, noting choice between cost design and cost variance methods

13 p2051 A66-26066  
Decision theory and dynamic programming applied to problems concerning cost and weight minimization in structural engineering

13 p2207 A66-26699  
Industrial technology and cost estimate of chemical machining metal removal process

[ASTME PAPER MR66-155] 14 p2299 A66-26953  
Machinability data for hard-to-machine materials, noting cost reductions, tool holder test program, cutting fluids, fixtures, producibility, etc

[ASTME PAPER MM66-178] 14 p2300 A66-26958  
Orbital satellite launching systems, problem of increasing percentage orbital payload at minimum cost and advantages of air breathing engines

14 p2391 A66-27010  
ATA direct operating cost formula for transport aircraft, considering flying operations, maintenance, depreciation and indirect costs

[SAE PAPER 660280] 14 p2222 A66-27289  
Cost and performance comparison of satellites, relay links, waveguides and lasers, showing line-of-sight microwave relay is best wideband data transmission medium

14 p2238 A66-27667  
Money-saving technique to speed up potentiometer in control systems

14 p2267 A66-27804  
Multimode antenna feed in radar design requiring only two hybrids for azimuth and elevation measurements

14 p2255 A66-27806  
Antenna cost, efficiency, noise, minimum detectable signal and signal temperature relationships

14 p2257 A66-27928  
Combining R and D and follow-on production in single contract

14 p2417 A66-28434  
Quality system analysis, determining structural soundness, requirements and functional relationship of components

15 p2507 A66-28794  
Small gas turbine engine controls, discussing design, development and cost factors

15 p2571 A66-28861  
Economic effects of turbulence on airline operations, considering costs on temporary grounding for repairs, passenger injuries, information dissemination on turbulence, etc

15 p2618 A66-28916  
Aircraft design for large cargo transport noting aerodynamic efficiency, wing construction, cargo loading, cost estimates, etc

15 p2426 A66-29803  
Aircraft mile cost vs seat mile cost, noting payload estimation, profit potential, productivity and other parameters

[SAE PAPER 660277] 15 p2427 A66-29823  
Helicopter capabilities in solving interurban mass transport problems, particularly cost and time considerations

[SAE PAPER 660336] 15 p2427 A66-29838  
Effect of VTOL size on operational cost per ton-mile, noting mission weight vs payload variations, comparison of fuel consumption of STOL, time savings, etc

[SAE PAPER 660316] 15 p2428 A66-29840  
V/STOL aircraft use in California corridor in next decade, considering time savings costs analysis, etc

[SAE PAPER 660317] 15 p2428 A66-29841  
Hot forming of titanium sheet structures and relation to cost

[SAE PAPER 660327] 15 p2511 A66-29848  
Selection, flow and transference of technology in large electronics aerospace firm, noting methodology, planning, market area selection, etc

16 p2830 A66-30400  
Predicting structural reliability by recent developments in statistics, reliability, cost effectiveness analysis and decision theory

[AIAA PAPER 66-503] 16 p2714 A66-30607  
Jet engine technology, including spinoffs from lift jet, propulsion systems, cost estimates, etc

16 p2791 A66-31280  
Structures cost effectiveness in optimization weight-cost design in aerospace structures

[AIAA PAPER 66-505] 16 p2831 A66-31479  
Reliability procedures in converting Thor tactical system to advanced booster in space program, noting time and costs savings

17 p3015 A66-31981  
Rules for comparing designs of aerospace transporters and selecting optimum configuration, based on overall cost criterion

17 p3040 A66-32378  
Military aircraft procurement, discussing development production cost estimate and design

17 p3040 A66-32796  
Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost

17 p2878 A66-33122  
Coordinated management planning required for minimizing funding escalation and overdiversification of potential missions

[SAE PAPER 660450] 17 p3040 A66-33159  
Iterative gradient method application to trajectory optimization problems, noting feasibility to systems with continuous bang bang controls

17 p2903 A66-33259  
Practical cost reduction possibilities within aerospace industry

18 p3268 A66-33947  
Low cost approach to development of vehicle for European-based space exploration

18 p3246 A66-33972  
Algorithm for cost effectiveness comparison of aircraft tradeoffs of performance vs cost vs time of obtainability

18 p3052 A66-34163  
Total value concepts applied in system effectiveness analysis are helping Contract Definition type contracts meet cost effectiveness requirements

18 p3268 A66-34251  
Cost and performance factors of steerable parabolic reflectors, spherical reflectors and multiplate antennas

18 p3268 A66-34288  
Integrated circuit connecting and packaging discussing cost flexibility and performance characteristics

18 p3086 A66-34399  
Supersonic transport propulsion systems noting thrust requirement, noise reduction commercial feasibility, etc

[SAE PAPER 660297] 18 p3165 A66-34943  
Cost-effectiveness guidelines for designing tactical system in absence of firm specifications, noting avionics system

19 p3480 A66-35528  
Gomory all-integer linear programming algorithm based on lexicographical ordering principle and relation to cost function

19 p3309 A66-35876  
Extravehicular activities interface with data recording system and economical recovery of optimum quantity of data

19 p3291 A66-35967  
Interplanetary mission planning including energy requirements, payload definition, spacecraft design, launching, cost data, etc

19 p3470 A66-36314  
Optimization methods for preliminary cost and mass distribution assessment for multistage rocket

- vehicles 19 p3470 A66-36622
- Reusable first stages using liquid propellant compared with nonreusable stages using solid and liquid combinations, for minimum cost of loaded-and-ready-for-launch stage cost per unit of stage payload mass 19 p3470 A66-36623
- Existence of inflection points in cost vs terminal time curve for linear minimum energy regulator 19 p3339 A66-36745
- Transition matrices of ergodic finite Markov chains and readiness models in cost effectiveness systems 20 p3681 A66-37176
- Reliability requirements for spacecraft guidance and control systems, emphasizing redundancy in existing systems 20 p3596 A66-37177
- System and cost effectiveness techniques applied to procurement of military operational systems, noting need for new standards for reliability input data 20 p3682 A66-37183
- Function, method of operation, complexity and effect on weight and cost for BITE /built-in test equipment/, as applied to electric power systems for jet aircraft 20 p3499 A66-37189
- Cost-effectiveness evaluation methodology for choosing best aircraft to construct for given purpose 20 p3682 A66-37197
- Optimal support costs of weapon systems requires contractor selection based on high order of management capability 20 p3682 A66-37238
- Integrated circuits economics, discussing design, construction and running costs 20 p3531 A66-37830
- Lockheed C-5 quantitative maintainability program and application to air-vehicle utilization and cost 20 p3495 A66-37891
- effectiveness 20 p3495 A66-37891
- Spacecraft maintainance and repair cost minimization and system effectiveness increase by controlling contamination due to personnel, static electrification and bacteria 20 p3567 A66-37899
- Computerized cost-effectiveness model for large payload test vehicle system of 50-150 launch program 20 p3684 A66-37901
- Digital computer programmed optimization model of Earth-orbiting space station missions including reliability, maintainability and cost considerations 20 p3663 A66-37902
- Economics of Ownership structure and cost effectiveness in microelectronic systems 20 p3684 A66-37904
- Reliability-maintainability cost tradeoff via dynamic and linear programming, discussing states, alternatives within states, transition rates and expected costs 20 p3568 A66-37911
- Management in applying reliability and maintainability for improved cost effectiveness by first-tier supplier 20 p3685 A66-37913
- Planned inspection of hardware based on warning analysis, relation to improved cost effectiveness 20 p3569 A66-37921
- Learning curve theory used to explain tendency toward decreasing downtime observed in maintenance of many systems 20 p3569 A66-37924
- System safety concept relation to cost and system effectiveness 20 p3685 A66-37932
- Cost of turbojet engine development plans estimated in computer simulation and Monte Carlo techniques 20 p3523 A66-37935
- Project Scorpio USAF Cellular Combustion Chamber Program for cost reduction and injection pattern simplification in liquid propellant rocket engines 20 p3629 A66-38256
- SST in nonoptimum conditions, discussing cost penalties due to navigation error, air traffic conditions, sonic boom restrictions, clear air turbulence and weather 21 p3695 A66-38451
- Costing of parallel route systems for supersonic traffic, examining diurnal traffic patterns, sensitivities to fuel requirements, sonic bang avoidance and layout of track systems 21 p3761 A66-38453
- Vehicle Millemile concept in ascertaining composite mix of load and revenue needed to meet cost of operating large jet aircraft 21 p3838 A66-39244
- Castable composite high energy propellants manufacturing techniques, discussing economy based on batch mixing and continuous processing 22 p3969 A66-39870
- Optimal control synthesis for cost functionals involving convex single valued functions of state and control variables, noting steepest ascent method and evaluating gradient 22 p3885 A66-40871
- Specification and assessment of electronic equipment reliability, emphasizing statistical aspects of optimal cost/reliability estimation 22 p3883 A66-40961
- NASA management, budgetary problems, controversy of incentives system, etc 23 p4151 A66-41047
- Design characteristics and marketing prospects of Concorde SST 23 p4015 A66-41301
- New jet transports, discussing subsonic, SST and stretched versions of subsonic transports 23 p4016 A66-41302
- Short haul air transportation in Europe, noting market development with helicopter techniques and development of more efficient rotor aircraft 23 p4151 A66-41303
- Air transportation between 1980 and 2000, noting cost limitation, possible trends, management planning, etc 23 p4152 A66-41304
- Passenger and cargo aircraft development 23 p4152 A66-41647
- Manned mission design analysis, examining spacecraft electrical power requirements, weight correlation and cost estimation 23 p4021 A66-41753
- Economics of various orbital boosters from completely expendable to completely recoverable vehicles, noting concept of cost-optimum vehicle 23 p4133 A66-41775
- Factors involved in bringing propulsion system to operational status noting engine design, development, cost, testing, etc 24 p4296 A66-42243
- Launch vehicle and spacecraft cost trends including larger vehicles, post Saturn phase, performance improvement by throttling, etc [SAE PAPER 660463] 24 p4281 A66-42394
- Book on project ERIE covering techniques for analytic evaluation of space equipment designs with respect to environments and missions required in 1975 24 p4217 A66-42572
- COUETTE FLOW**
- Couette flow, unpressurized axial flow in annular gap between two cylinders and flow between two rotating cylinders, taking into account energy dissipation and dependence of viscosity on temperature 04 p0512 A66-14423
- Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectrally selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 05 p0789 A66-15642
- Couette flow, Neumann-Liouville series expansion convergence for various flow regimes and related Fredholm integral equation solutions 07 p1020 A66-17964
- Exact solution of hydromagnetic stability of nondissipative conducting Couette flow between two coaxial cylinders in axial magnetic field 07 p1021 A66-18048
- Stability of frictionally heated Couette and Poiseuille flows, specifically Couette flow in inviscid limit 08 p1204 A66-18527
- Infinitesimal time-dependent perturbation of steady viscoelastic flows with application to Couette viscometer 08 p1208 A66-19229
- Viscosity and density variations due to imposed radial temperature gradient effects on Couette flow stability between rotating cylinders 08 p1211 A66-19681
- Accuracy of kinetic theory approximations assessed by comparison of approximate and exact solutions of Krook kinetic equation for Couette flow and shock wave structure 11 p1690 A66-22906
- Discrete ordinate technique for solution of distribution function of linearized Boltzmann equation, with application to Couette flow 11 p1692 A66-22923
- Overstability in elastico-viscous flow between rotating cylinders 11 p1693 A66-23010
- Asymptotic approximations in hydrodynamic stability problems including Couette, spiral and parallel shear flows 12 p1860 A66-23548
- Asymptotic solution, valid in physical space, obtained for kinetic layers in slip flow of linearized Couette problem 12 p1865 A66-24589
- Small gap equations for Couette flow stability considering nonaxisymmetric disturbances, solving eigenvalue problem and noting role in instability of Taylor vortices 12 p1866 A66-24946
- Stability of two-dimensional Couette-Poiseuille flow 12 p1866 A66-24951
- Heat transfer in Couette flow of radiating fluid with viscous dissipation, noting conduction coupling, effects of temperature level, profile, wall emission, fluid optical thickness, etc 13 p2210 A66-26718
- Steady state motion of Couette plasma flow in electric field, assuming transfer of collective motion is effected by ions and heat transfer by electrons 14 p2339 A66-26774
- Stability to infinitesimal disturbances of plane Couette flow in presence of negative vertical temperature gradient, noting instability at critical Rayleigh number for convection without shear 15 p2481 A66-29741
- Hydrodynamical modification of Heller treatment of mixing and unmixing of viscous fluid between two rotating cylinders 16 p2685 A66-30990
- Simultaneous radiation, conduction and convection heat transfer for steady state conditions in one-dimensional spectrally selective, emitting and scattering porous bed [ASME PAPER 65-WA/HT-23] 16 p2828 A66-30990
- Numerical solutions of Krook kinetic equation for Couette flow and plane shock wave 18 p3101 A66-34665
- Variational principle applied to boundary value problems in kinetic theory, specifically examining Kramer problem, plane Couette flow and plane Poiseuille flow 18 p3102 A66-34919
- Rotating Couette flow of miscible binary liquid mixture between two coaxial cylinders 18 p3102 A66-34924
- Couette flow and heat transfer through hard-sphere rarefied gas enclosed between parallel walls analyzed by Monte Carlo method 19 p3478 A66-35803
- Energy method applied to stability of flows governed by nonlinear Boussinesq equations, establishing universal stability region in Reynolds-Rayleigh number plane 19 p3478 A66-36199
- Couette and Poiseuille flow and temperature distribution of fluids with two viscosity ranges, including viscoplastic and dilatant fluids 19 p3341 A66-36304
- Interface propagation in mixed laminar-turbulent flow between counter-rotating concentric cylinders, noting spiral turbulence as dominant feature of Couette flow transition 20 p3547 A66-37979
- Distortion of laminar circular Couette flow measured by end effects, noting two-dimensional tangential motion near axial plane of symmetry 20 p3547 A66-37980
- Maxwell-Lorentz field equations for Couette flow birefringence of Rivlin-Ericksen viscoelastic fluid and Noll simple fluid 21 p3724 A66-38761
- Stability of viscoelastic liquid in Couette flow compared with non-Newtonian liquid of same limiting viscosity 21 p3729 A66-39451
- Pressure induced flow of elasticoviscous electrically conducting incompressible fluid between relatively moving porous walls in presence of transverse magnetic field 23 p4053 A66-41121
- Boundary layer solutions to two-dimensional stationary viscous incompressible flow past finite object under vanishing skin friction 23 p4060 A66-42009
- COULOMB COLLISION**
- Forced vibration in nonlinear system with Coulomb and combination friction 01 p0159 A66-11176
- Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 04 p0567 A66-14344
- Coulomb interaction of electrons and holes in contacts of degenerate n-and p-type semiconductors causes ground state instability relative to electron-hole pair formation 05 p0730 A66-14645
- Coulomb collision effect on transverse electron oscillations in fully ionized hot

plasma determined by Fokker-Planck equation 05 p0721 A66-14715

Particle distribution and motion in field of force, discussing density profile, energy dissipation, Coulomb charge shielding for local thermodynamic equilibrium and free orbital motion 08 p1261 A66-18743

Forced vibrations of two-degree-of-freedom system with combined Coulomb and viscous damping 09 p1469 A66-20950

Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 10 p1569 A66-21972

Coulomb collisions and equilibrium states in fully ionized plasma, deriving kinetic equation in pairwise collision approximation 10 p1572 A66-22037

Electron Coulomb interaction in strongly alloyed semiconductor films tends to reduce all energies to constant value without changing spectrum shape 11 p1750 A66-22344

Coulomb relaxation of distribution of fast electrons or ions in Earth radiation belts 11 p1762 A66-22425

Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 11 p1655 A66-22722

Relaxation of isotropic distribution of test particles in homogeneous background gas, including nonzero temperature effects 11 p1741 A66-23390

Coulomb interaction of electrons and holes in contacts of degenerate n- and p-type semiconductors causes ground state instability relative to electron-hole pair formation 13 p2166 A66-25918

Surface photoeffect from highly alloyed semiconductor accounting for Coulomb electron interaction 14 p2367 A66-28239

Collision cross sections of ions in isoelectronic sequence of lithium, noting dipolar transitions of type 2s to np 16 p2754 A66-31261

Light absorption coefficient for indirect photon transitions during Coulomb interaction of electrons at high electron densities 16 p2787 A66-31766

Longitude dependence of distribution function of electrons for fixed value of McIlwain parameter, using kinetic equation 18 p3197 A66-34873

Galvanomagnetic effect of anisotropic electron energy spectrum on acoustical branch perturbation spectrum of system of electrons and ions in homogeneous magnetic field 20 p3618 A66-37559

Quasi-linear current instability in two-temperature plasma for Coulomb collision and free electron acceleration 21 p3794 A66-39551

Charged particle collisions effect on drift instability of low pressure plasma studies, using Landau collision integral as model collision integral 22 p3956 A66-40192

Discrepancies in electron-impact broadening of isolated ion lines due to neglect of collision-induced transitions between upper and lower levels of line and Coulomb interactions with perturbed ions 22 p3951 A66-40419

Coulomb interaction in two-zone superconductor model, noting variation of critical electron-temperature and effect on superconductivity 22 p3968 A66-40916

Self-consistent theory of curvilinear electron fluxes interaction with wave conducting line, taking into account space charge 23 p4037 A66-41460

**COULOMB POTENTIAL**

Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 01 p0125 A66-10774

Tables of classical collision transport integrals for screened Coulomb potential 03 p0401 A66-12958

Radial distribution function computed for classical particles interacting with Coulomb, shielded Coulomb and truncated Coulomb forces 06 p0908 A66-16120

Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 11 p1749 A66-22286

Limiting cases of screened Coulomb T matrix in complex energy

plane 15 p2547 A66-29618

Model potential consisting of Coulomb potential and linear terms in electric field potential, obtaining eigenfunctions of model and deriving optical absorption coefficient for electric field excitons 16 p2775 A66-30729

Impurity energy levels in semiconductors described by equivalent Schroedinger equation containing short-range as well as conventional terms for long-range Coulomb potential 16 p2784 A66-31446

Atomic energy levels in plasma, considering energy spectrum of hydrogen-like atom in plasma, based on cut-off Coulomb potential model 20 p3607 A66-37373

Ferromagnetic spin correlations from strong Coulomb interactions between valence electrons resulting in enhanced singlet-state repulsion 21 p3803 A66-39263

Matrix elements of Coulomb potential between Schecter functions and overlap integrals necessary in determining two-center acceptor states in p-type Ge and Si 24 p4255 A66-42497

**COULOMETER**

Quantitative coulometric analyses of water yield for thermal dehydration of solids, using electrolytic hygrometer cell 07 p1036 A66-18490

**COUNTDOWN**

Markov process model of Gemini countdown and transition probability matrix 13 p2192 A66-25505

Missile prelaunching development stage, detailing countdown and field test preparation 18 p3246 A66-34043

Alternate mode of operation for minimizing occurrence of delays caused by launch support equipment failures for Saturn manned missions 20 p3542 A66-37243

**COUNTER**

SA CERENKOV COUNTER

SA GAS DISCHARGE COUNTER

SA GEIGER COUNTER

SA IONIZATION COUNTER

SA NEUTRON COUNTER

SA PARTICLE COUNTER

SA PROPORTIONAL COUNTER

SA QUANTUM COUNTER

SA RADIATION COUNTER

SA SCINTILLATION COUNTER

Digital counter synthesis for fixed base and periodic sequence-variable base counters with various feedback loops 09 p1361 A66-20606

Counting system for use with rubidium magnetometer for ground observations of geomagnetic micropulsations with sensitivity of 1/100 gamma 13 p2085 A66-26752

Integrated circuit binary counters using majority logic current mode gate element 14 p2255 A66-27803

Realization of numerical counters with micrological elements, discussing flip-flop and memory elements 16 p2656 A66-30964

Single-chip decade counter as fuse timer and programmer for weapon system 17 p2883 A66-32125

Miniaturized no-moving-parts fluid pulse counter development for ordnance application 19 p3282 A66-36674

**COUNTERBALANCE SYSTEM**

**S COMPENSATOR**

**COUNTERMEASURE**

**S ELECTRONIC COUNTERMEASURE**

**COUNTING RATE COMPUTER**

Counting decade consisting of three ferrite-transistor triggers and fourth binary element in form of ring with rectangular hysteresis loop 02 p0232 A66-12146

Oscillograms and circuit diagrams of counter in which storage of preceding state is performed by trigger with direct coupling by means of unitrons 04 p0490 A66-13917

Correction of cosmic ray meson intensity monitor counting rates for atmospheric temperature variation 07 p1127 A66-18012

Counting decade consisting of three ferrite-transistor triggers and fourth binary element in form of ring with rectangular hysteresis loop 14 p2297 A66-28102

Oscillograms and circuit diagrams of counter in which storage of preceding state is performed by trigger with direct coupling by means of unitrons 20 p3522 A66-37875

**COUPLED MODE**

Coupled-mode equations for wave propagation through magnetized ferrite rod

with variable cross section, noting Faraday rotation 03 p0410 A66-12935

Natural modes of partitioned networks in analysis and synthesis of transfer functions, noting potential analog or root locus method 05 p0655 A66-14625

Perturbation calculation of average rate of energy transfer in random vibration of nonlinearly coupled modes 05 p0716 A66-15051

Linear dynamical systems with weak coupling solved approximately, noting examples and definition 06 p0862 A66-16362

Wave reflection and refraction across density discontinuity in two-fluid fully ionized plasma studied by coupled linearized hydrodynamic equations and Maxwell equations 07 p1088 A66-17948

Distributed-parameter systems in terms of matrices whose elements are functions of coupling parameters between modes and phase constants of modes 07 p1144 A66-18042

Decay theory of closely coupled unstable states based on Green function formulation for transition amplitude 11 p1741 A66-23189

Light coupling with phonons, magnons and plasmons, deriving wave equations and coupling constants, observing Raman effect in spin systems and in plasmas, noting second harmonic generation 13 p2132 A66-26154

Coupled wave formalism, giving unified description of parametric down conversion of light, stimulated Brillouin and Raman effects, etc, stressing exponential character of gain 13 p2132 A66-26156

Theory, basic relations and general theorems for coupled thermoelectricity 13 p2199 A66-26377

Mode selective coaxial directional couplers for measurement of unwanted harmonics effect 13 p2044 A66-26745

Coupled waveguide antenna analyzed based on coupled-mode theory 15 p2455 A66-28569

Hysteresis phenomena in He-Ne gas laser in axial magnetic field and polarization of oscillating mode within certain tuning region 15 p2516 A66-29385

Second-harmonic enhancement in nonlinear crystal by loss modulator coupling of pulsed ruby laser modes 17 p2933 A66-31939

Bandpass filter design with three coupled circuit and determination of amplitude curve and circuit constants 17 p2895 A66-33243

Self and mutual admittance of coupled dipoles in dissipative medium 18 p3065 A66-33529

Coupled waveguide circulator in which secondary waveguide is loaded with distributed nonreciprocal attenuation along coupling length 18 p3075 A66-33566

Spectral density and mean value of power flow between two stiffness coupled oscillators under white noise random excitation 18 p3251 A66-33675

Spark shadow projections in air for giant pulse synchronization from two lasers, using rotating prism to modulate quality factors 18 p3144 A66-34036

Subharmonic vibrations during resonant testing of thin walled beams for coupled torsional and bending vibrations 18 p3256 A66-34559

Laser mirror transducer decoupling from mechanical resonances of laser cavity 19 p3374 A66-35813

Coupled waveguides structure proposed as leaky-wave antenna, extending previous coupled-mode theory 19 p3320 A66-36401

Relation of kinetic theory to unstable plasmas /weak turbulence/, noting expansion parameters and extension to include discrete particle effects 19 p3418 A66-36536

Coupling between oppositely directed traveling waves in He-Ne ring laser in form of mutual backscattering of energy from each beam into direction of other 20 p3579 A66-37778

Coupling of adjacent axial modes in external Raman resonator observed as first Stokes frequency with benzene as Raman medium and Q-switched ruby laser as pump source 21 p3747 A66-39109

Support flexibility effect on natural frequency free vibrations of uniform cantilever carried by mass supported on string 21 p3833 A66-39608

- Numerical solution of full-wave equation with mode coupling governing electromagnetic wave propagation in horizontally stratified inhomogeneous anisotropic medium 22 p3863 A66-39938
- Coupled-modal equations for arbitrary vibratory system, with example for longitudinal vibrations of bar 22 p3992 A66-40298
- Large, small and infinite phased array antennas and coupling effects 22 p3881 A66-40749
- Adaptive antenna system circuitry for maximum signal to noise ratio of signals reaching ground station from deep space probe 22 p3881 A66-40750
- Electromagnetic wave scattering by stratified medium, noting Mathieu and Floquet type wave representation 24 p4171 A66-42292
- Traveling wave phototube /TWP/ theory in terms of modified TWT coupled mode theory, noting equivalent impedance concept and noise output calculation 24 p4184 A66-42746
- Electric contact design factors for shock vibration environments 24 p4186 A66-43058
- COUPLED STRESS**
- Couple stresses in problems of torsion covering prismatical bars, linear isotropic and hyperelastic bodies 04 p0591 A66-14210
- Couple-stresses in dislocated solids and effect in classical elasticity 04 p0594 A66-14292
- Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 05 p0776 A66-15427
- Cylindrically symmetric tension field covering strain gradient effects on potential energy of elastic body [ASME PAPER 65-WA/APM-14] 05 p0777 A66-15436
- Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 10 p1615 A66-21480
- Cylindrically symmetric tension field, covering strain gradient effects on potential energy of elastic body [ASME PAPER 65-WA/APM-14] 12 p1960 A66-23974
- Nonlinear theory for elastic surface deformation, assuming existence of strain-energy function governed mechanically by virtual work 12 p1970 A66-24564
- Stresses and coupled-stresses generated by dislocation in isotropic media treated in terms of boundary value problem for Cosserat medium 14 p2409 A66-28468
- Linearized theory of coupled stress elasticity and stress distributions around simple edge and screw dislocations 15 p2609 A66-29241
- Tensor field/vector field representation of stress functions for couple and dipolar stresses 16 p2812 A66-30261
- Couple stress theory and virtual work principle applied to thermoelasticity of Cosserat medium, including energetic, uniqueness and reciprocity theorems 17 p3031 A66-33330
- Cosserat coupled stress and effects on stress concentration factor in semiinfinite solid medium with varying elastic modulus 20 p3667 A66-37466
- Three-dimensional linear-anisotropic elasticity with inertia effects analyzed in isotropic and anisotropic Cosserat continua, deriving static and kinematic components 23 p4141 A66-41945
- COUPLING**
- SA ANTENNA COUPLER
- SA CROSS COUPLING
- SA GYROSCOPIC COUPLING
- SA MICROWAVE COUPLING
- SA OPTICAL COUPLING
- SA SPIN-SPIN COUPLING
- SA THERMOCOUPLE
- SA THERMODYNAMIC COUPLING
- Aircraft engine rotating shaft coupling design, noting splined shafts, correct lubrication, flexible members and test results 09 p1383 A66-19863
- Effect of degree of coupling between resonator system and load on generation zones and regenerative amplification of pulsed magnetron, noting characteristics 09 p1353 A66-20437
- Filter with two tuned circuits and distributed coupling based on equations for complex values of tuned circuit currents, noting formulas for mutual impedance 10 p1510 A66-21673
- Hose coupling utilized in oxygen umbilical cord for astronaut extravehicular activity 14 p2225 A66-27110
- Magnetoionic couplings and electromagnetic wave propagation in horizontally stratified layer of gyrotropic medium 14 p2283 A66-27125
- Distant-field antenna model of current sheet array used to approximate ultimate decay of mutual coupling in planar array antenna 14 p2257 A66-27926
- Asymptotic behavior of coupling coefficients of infinite array of thin walled rectangular waveguide 14 p2257 A66-27927
- Cumulative coupling and impedance mismatch and radiation pattern problems in large uniformly spaced flat phased array 15 p2456 A66-28585
- Electromagnetic and acoustic wave coupling in homogeneous compressible isotropic plasma and diffraction by half-plane due to sharp structural discontinuities in antenna configurations 15 p2448 A66-28591
- Mean probability of coupling between electrons of flame on electronegative gas and radioactive bromium tracer injected into flame, calculating electrons coupling cross section on bromium atoms 16 p2763 A66-31208
- Nonresonant coupling of, RF power to plasma during ion cyclotron resonance heating in Model C 17 p2962 A66-31822
- Numerical results of slot couplings of rectangular single mode waveguides as function of length, width, position and wavelength 19 p3311 A66-35300
- Laser action in closed molecular system with mixture of carbon dioxide, nitrogen and water vapor, noting coupling-out plate reflectivity and population inversion 19 p3373 A66-35433
- Approximate expression derived for loose coupling in turbulence theory, suggesting possible explanation for inadmissibility of Kraichnan conclusion 20 p3544 A66-36909
- Coupling phenomena in recombination processes of complex ionosphere composed of positive ions under vertical field of ionization drift applied to wind shear theory of sporadic E layers 22 p3907 A66-39962
- Tunable coupling of open waveguide type for semiconfocal Fabry-Perot cavity gives high transmission and high Q 24 p4216 A66-43221
- COUPLING CONSTANT**
- Magnetoelastic coupling constant in microwave frequency of ferrites and garnets 03 p0408 A66-12418
- Phonon interaction with iron group ions characterized by coupling constant discussing double quantum detection of phonon, propagation in dispersive medium and phonon maser 03 p0376 A66-12420
- Quantum scattering theory of hydrogen-like ions in 1-S, 3-S, 1-P and 3-P states 03 p0395 A66-13110
- High sensitivity method for measuring small phase modulations according to line width of Lissajous figures 07 p1005 A66-17346
- Coupling coefficient for different components of cosmic rays based on interaction of primary nucleon with air nuclei 09 p1440 A66-20224
- Cosmological-galactic creation, steady state expansion and high energy particle production associated with radio sources 11 p1774 A66-23068
- Integral multiplicity and coupling coefficient estimation of muon-meson component of cosmic rays for case of primary particle impinging at arbitrary zenith angle 12 p1943 A66-24182
- Radiation impedance of phased array of rectangular waveguides, noting coupling coefficient amplitude, phase difference, etc 14 p2256 A66-27910
- Dynamics of baryon-meson systems in 27-fold representation, obtaining self-consistent bound state and low lying resonant solutions with Balazs method 15 p2544 A66-28945
- Input and output coupling constants of spin-2 mesons with two pseudo-scalar mesons obtained by producing resonances at experimentally observed positions 15 p2544 A66-28947
- Dishal method, logical means of tuning multiple-resonant-circuit filters and for adjusting coupling coefficients between adjacent resonators 15 p2463 A66-29036
- Energy from hydrogen molecule interaction with magnetic field and from hyperfine interaction expressed as products of irreducible spherical tensors 15 p2548 A66-29806
- Coupling coefficient between TE 11 and TM 11 mode in tapered circular waveguides, noting behavior near cut-off frequency 17 p2895 A66-33275
- Coupling coefficients of directed muon component of cosmic rays calculated, noting higher energy displacement with increase of zenith angle 18 p3195 A66-34866
- Resonant cavity transducer for converting TE mode of rectangular waveguide into circular waveguide mode, noting coupling coefficient of cavity 22 p3918 A66-40183
- COUPLING NETWORK**
- Characteristics of balanced transistor amplifiers with symmetrical directional couplers 03 p0342 A66-12708
- Lossless multiconductor transmission line model extended for description of gyromagnetic coupling effects 06 p0846 A66-16094
- Coupled cavity slow-wave circuits, discussing equivalent circuit construction with similar current flow characteristics for behavior analysis 06 p0846 A66-16096
- Circulators from lumped circuit elements examined, calculating coil properties and analyzing construction 11 p1664 A66-22660
- Explicit relation between mutual coupling and radiation pattern of array antenna evaluated via scattering formalism, based on spherical modes 12 p1841 A66-24627
- Coupling impedance selection for Perceptron-like adaptive pattern recognition system 13 p2045 A66-25338
- Passband filters with three coupled circuits, determining circuit characteristics by method based on use of right angle triangles 13 p2043 A66-26315
- Passband filters with three coupled circuits 14 p2246 A66-26802
- Voltage-controlled switch using p-i-n diodes loop-coupled to section of WR975 waveguide for use in satellite tracking radar system 14 p2258 A66-27953
- UHF amplifier design, linear active and coupling networks, loading, admittance-impedance characteristics, etc 14 p2261 A66-28373
- Coupling efficiency evaluation in light emitting diodes 15 p2514 A66-29032
- Slot couplings of rectangular single-mode waveguides analyzed by equivalent circuit and concentrated parameter methods 17 p2879 A66-31856
- Coupling of resonators in electromechanical filter, noting application of energy trapping in piezoelectric resonators 18 p3078 A66-34090
- COVALENT BOND**
- Effect of relativistic interaction terms, mass velocity, Darwin and spin-orbit coupling upon electronic levels of covalent-bond compound semiconductors BN, SiC, AlP and GaAs 04 p0561 A66-13725
- Metal-ceramic boundary structures and reactions, considering metal-oxide and metal-glass interfaces, ionic and covalent bonds, oxidation, reduction, solution and precipitation 13 p2108 A66-25767
- COVARIANCE**
- Covariant treatment of solutions of Einstein field equations representing pure gravitational radiation propagating in fluid and electromagnetic media 15 p2542 A66-29621
- Komar covariant formulation of conservation laws of general relativity obtained directly from variation of scalar curvature density 19 p3401 A66-36168
- Weierstrass characteristic and covariant constant vector fields, noting two metric tensors with same Christoffel symbols, two

connections with same curvature tensor and Ch-equivalence class of metric tensors 22 p3941 A66-40567

**COVER**

**S CLOUD COVER**

**COWLING**

Center of pressure formulae for cowl shapes at zero incidence having profiles for which drag is minimum in Newtonian flow 01 p0006 A66-10344

**CRAB NEBULA**

Intensity of early postexplosion radiation field and high energy electron emission from supernovae 12 p1938 A66-23918

Crab Nebula X-ray spectrum from 16-120 kev by balloon 16 p2792 A66-30143

Coherent plasma radio wave emission ineffective for quasar, Crab Nebula and supernovae remnants 17 p2996 A66-31913

High energy X-ray spectrum from Crab Nebula at photon energies up to 90 kev 18 p3170 A66-34529

Spark chamber experimental investigation of flux of high energy gamma rays at high altitudes near magnetic equator 18 p3193 A66-34849

Depolarization of Crab Nebula produced by Faraday rotation in filamentary shell that surrounds nebula 20 p3648 A66-37261

**CRACK**

**SA FAILURE**

**SA FATIGUE**

**SA MICROCRACK**

**SA STRAIN**

**SA STRESS**

**SA SURFACE CRACK**

Dual trigonometric integral equations solved, then applied to determining stress field due to crack 14 p2325 A66-28391

Flat elliptical crack in infinite elastic medium under shear stress at infinity 22 p3995 A66-40457

**CRACK FORMATION**

Strength of adhesive joints showing ratio of normal and shear stress as important parameter, using crack propagation theory 01 p0152 A66-10380

Distribution of thermal stress in infinite elastic solid containing penny-shaped crack 01 p0157 A66-10960

Stress distribution in vicinity of infinite row of collinear Griffith cracks in elastic body calculated for internal pressure distribution 02 p0298 A66-11577

Varestraint test used to evaluate base metal weldability and influence of particular welding process and welding variables on hot cracking 02 p0236 A66-12227

Fracture micromechanisms of materials having regular crystalline structure, considering mechanical strength, atomic imperfections, dislocation interactions and crack growth 03 p0382 A66-13000

Stress corrosion cracking in titanium alloys in presence of salt, high temperature and sustained stress [AIAA PAPER 65-764] 03 p0383 A66-13059

Causes and development of delayed cracking in material/weld interfaces of high strength steels 03 p0375 A66-13124

Parallel grooves as surface damage in semiconductors produced by ruby laser as diffraction effect 04 p0563 A66-13753

Fractures in neodymium-doped alkaline silicates and borosilicates produced by laser beam 04 p0532 A66-14174

Microstructural alterations developing with cycling stressing in rolling contact exemplified by bearing steel parts [ASME PAPER 65-WA/CF-4] 05 p0779 A66-15623

Load cycle prediction for crack initiation and propagation in notched fatigue specimens 06 p0961 A66-15936

Ultrasonic detection of fatigue crack formation in center-notched sheets of steel and alloys of aluminum and nickel 06 p0884 A66-15938

Microscopic fatigue crack production in compressor blades, describing methods and application to ultrasonic nondestructive testing 06 p0966 A66-16799

Torsional fatigue induced slip bands and crack initiation in aluminum-zinc-magnesium alloy at room temperature to 250 degrees C 07 p1048 A66-17485

Hot cracking in Hastelloy X fusion weld as affected by microsegregation produced

during solidification 10 p1547 A66-21768

Annealing twins and twin-boundary intersections in niobium, noting invalidity of cause-and-effect relationship between twins and crack formation in bcc structures 11 p1717 A66-22998

Formation of fatigue cracks in center notched sheet specimens of various metals ultrasonically tested for axial tensile fatigue 12 p1957 A66-23630

Stress corrosion cracking test employing precracked bar stressed in bending, noting apparatus and results on martensitic steel and titanium alloy 12 p1958 A66-23647

Stress crazing mechanism for amorphous thermoplastics 13 p2112 A66-25305

Unsharpness and contrast effect on slit detection studied by radiography 13 p2086 A66-25820

Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2292 A66-27325

Heat affected zone cracking in nickel-base superalloys attributed to grain-boundary liquification 14 p2314 A66-27343

Effect of variations of seven elements on resistance of Invar production heats to weld metal cracking, using circular patch test 14 p2314 A66-27344

Crack susceptibility of ultrahigh-strength steel welds related to thermal cycles in welding and heat treating 14 p2301 A66-27345

Opening of parallel cracks by applied tensile stress in terms of dislocation distribution theory 14 p2408 A66-28389

Electron microscope investigation of dislocation effect on stress corrosion cracking in aluminum alloy 15 p2523 A66-29418

Elastic and plastic deformation of polycrystalline metals exposed to ultrasonic load and high temperatures 15 p2523 A66-29601

Stress corrosion testing to evaluate materials for specific application 15 p2523 A66-29723

Stability of two coplanar wedge-shaped cracks, showing under what conditions interaction effects are important 16 p2814 A66-30533

Plasticity problem involving plane strain and plane stress simultaneously, groove formation in machining of high temperature alloys [ASME PAPER 65-PROD-10] 16 p2714 A66-30857

Intercrystalline and transcrystalline fracture in molybdenum 16 p2727 A66-31527

Theoretical attempt to bridge gap between micro and macro crack formation, estimating plane strain transition and nominal stress for fracture 17 p2939 A66-32303

Resistance to cavitation flow erosion and cracking in metal alloys studied, using rotating disk in water [ASME PAPER 66-FE-11] 17 p2915 A66-33265

Stress level for crack initiation and propagation and delayed failures in stainless steel used for bolts 17 p2941 A66-33442

Synergistic action of dynamic stresses and fatigue corrosion in metals 17 p2942 A66-33443

Dislocation distribution and crack propagation due to stress corrosion 17 p2942 A66-33444

Stress distribution in neighborhood of crack in infinitely long elastic strip 17 p3032 A66-33503

Stress-strain state of plane containing crack in nonuniform field of compression stresses, deriving pressure at contact surface 18 p3252 A66-33714

Stress-corrosion cracking of titanium - ASTM Meeting, Seattle, October-November 1965 19 p3377 A66-35647

Susceptibility of titanium alloys to elevated-temperature static and dynamic sea-salt stress cracking, noting operative mechanism 19 p3377 A66-35648

Elevated temperature stress corrosion tests on titanium alloys, noting susceptibility in presence of hot salt 19 p3377 A66-35649

Elevated temperature stress-corrosion cracking behavior of titanium alloys, noting test variables and possible application to SST material selection 19 p3378 A66-35650

Stress corrosion in titanium alloys noting measurement techniques, crack forming

effect of chlorine and surface treatment via metal coating 19 p3378 A66-35651

Cracking and stress corrosion of titanium alloys noting test environment, temperature and measurement techniques 19 p3378 A66-35652

Hot salt cracking of titanium alloys noting stress corrosion, fracture toughness and crack propagation mechanism 19 p3378 A66-35653

Stress corrosion mechanism of titanium noting experimental conditions, results of chemical analyses, time factor, material resistance to crack formation, etc 19 p3378 A66-35654

Cracking of jet engine components made of titanium alloys results from silver chloride stress corrosion 19 p3473 A66-35655

Creep tests on titanium alloy specimens with gauge length salt-coated, noting cracking, time dependency of susceptibility degree, etc 19 p3379 A66-35656

Stress corrosion cracking of titanium alloy in long duration and high temperature tests, using salt coating of specimens 19 p3379 A66-35657

Stress corrosion tests on specimens of titanium alloy in contact with sodium chloride, noting crack formation and effect of argon 19 p3379 A66-35658

Separation of gaseous, liquid and solid reaction products generated by hot salt corrosion of titanium, noting gas diffusion effect on cracking 19 p3379 A66-35659

Thermally induced circumferential-longitudinal cracking of refractory metal inserts in solid propellant rocket engine nozzles 19 p3385 A66-36153

Formation of cleavage crack in crystalline solid, examining crack stability by study of equilibrium dislocation distribution in terms of operative stresses 19 p3475 A66-36728

High strength weldable Al alloys with good cryogenic toughness, stress-corrosion cracking resistance and tensile strength 20 p3582 A66-37091

Stress corrosion cracking of titanium alloy in sodium chloride 20 p3584 A66-37619

Crack initiation and propagation formula through fatigue process applied to interface problems, noting creep 20 p3671 A66-38105

Photomicrographs of pressure crack figures on silicon single crystals at room temperature 21 p3803 A66-39291

Double linear damage rule used in conjunction with crack initiation and propagation equations, applied to cumulative fatigue damage 22 p3989 A66-40116

Gas tungsten arc and electron beam welding for iron-base, nickel-base and cobalt-base alloys, noting use of weld filler metal to avoid cracking 22 p3924 A66-40263

Welding capacity of high-strength alloys of Al-Zn-Mg-Cu system, noting welding techniques, composition effect on mechanical properties and remedies for cracking in welds 22 p3928 A66-40882

Laser beam effect on hydrodynamic bearings, discussing microcracks and critical energy, explaining breakdowns 23 p4078 A66-41409

Stress intensity factors for single-edge cracks in rectangular sheets with end rotations, reducing stress distribution to Riemann-Hilbert problem 24 p4286 A66-42161

Stress-strain analysis of critical load-induced crack formation near elliptic or circular hole 24 p4290 A66-42438

**CRACK PROPAGATION**

Fatigue crack propagation in airframe materials under axial narrow and broadband random loading 01 p0148 A66-10139

Propagation of fatigue cracks in tensioned plate subjected to acoustic loads 01 p0148 A66-10140

Approximate stress intensity factor for embedded elliptical crack in plate subjected to uniaxial tension perpendicular to crack surface 01 p0152 A66-10377

Brittle fracture paths completely predictable and those predictable after initial random propagation 01 p0152 A66-10378

Stress field about axial crack in pressurized cylindrical shell 01 p0152 A66-10379

Stress criterion for crack growth obtained by testing aluminum sheets with transverse

machined cracks 01 p0156 A66-10919  
Crack initiation and propagation in aluminum sheets, noting ductile fracture and load limit for design 01 p0156 A66-10920  
Quantitative analysis of stress level, material characteristics or temperature level at which fracture occurs, using electron microscope 01 p0088 A66-10962  
Constant load rupture test of susceptibility of Ni-Co-Mo maraging steel to delayed hydrogen cracking 03 p0381 A66-12541  
Fracture of brittle bodies with cracks subjected to tension and compression 03 p0441 A66-13291  
Critical loads causing brittle-rupture equilibrium cracks that develop near elliptical holes in bodies that remain elastic up to fracture 03 p0441 A66-13298  
Crack propagation in tungsten single crystals with preexisting microcracks and prestraining at various temperatures 04 p0536 A66-14308  
Load cycle prediction for crack initiation and propagation in notched fatigue specimens 06 p0961 A66-15936  
Initiation and propagation of fatigue crack with reference to fish-eye pattern in ball bearing steel 06 p0965 A66-16489  
Crack propagation in quasi-brittle solid deformed by external load, using thermodynamic laws 06 p0965 A66-16491  
Brittle fracture in ceramic materials, noting Griffith theory on crack propagation, plastic deformation occurrence, stress distribution effect, etc 07 p1054 A66-18499  
Limiting equilibrium state of round infinite plate with circular arc-shaped cracks subject to plane tensile loads 08 p1305 A66-18596  
Research trends of commercial beryllium as affected by physical and alloy properties 08 p1238 A66-18853  
Stress-corrosion failure in metal alloys, discussing surface and elastic energy, adsorption, crack propagation, pits and tunneling 08 p1241 A66-19601  
Oxygen and water vapor effects on propagation of fatigue cracks in aluminum alloy sheets 10 p1614 A66-21338  
Griffith theory of brittle fracture and dependence on stress and load 10 p1614 A66-21339  
Crack opening displacement approach to fracture mechanics in yielding materials 11 p1782 A66-22693  
Field equations of elasticity theory used to solve problem of penny-shaped crack opened by unidirectional displacement in plane 12 p1969 A66-24531  
Prediction of fatigue failure of structure subjected to sinusoidal stress cycles of different amplitude and mean value [ASME PAPER 65-MET-3] 12 p1970 A66-24555  
Evaluation of model of strain hardening in fatigue with crack propagation occurring by plastic flow away from crack tip during tensile part of cycle 12 p1898 A66-24971  
Thermoplastics behavior under cyclic stress, noting failure under crack propagation or temperature due to damping capacity 13 p2112 A66-25306  
Results of crack propagation tests on polymethylmethacrylate flexed at various frequencies under cyclic loading 13 p2112 A66-25308  
Naval Ordnance Laboratory /NOL/ multiaxial fatigue test for failure mechanisms in fiber-reinforced composite materials involving cyclic stress under controlled environmental conditions 13 p2113 A66-25312  
Propagation of brittle cracks in body under compression, discussing theory of resistance of brittle bodies to compression 13 p2196 A66-25629  
Fracture surfaces of metals and alloys examined, using optical and electron microscopy, noting fracture mechanisms during crack initiation and propagation 13 p2108 A66-25768  
Production techniques for fissures in weld-deposited and wrought Ni-Cr-Fe alloy fatigue specimens and fissure effect on fatigue strength 13 p2110 A66-26017  
Equilibrium cracks in half-space and elastic layer with two rigid clamp supports 13 p2201 A66-26403

Limiting equilibrium of plate weakened by system of cracks along straight line at angle to tensile force 13 p2201 A66-26404  
Slip bands in thin plates with rectilinear cuts under tension 13 p2201 A66-26408  
Critical load under uniaxial tension for thin infinite plates with holes weakened by cracks 13 p2202 A66-26415  
Inhomogeneous elastic half-spaces examined for circular crack in plane of contact and perpendicular tensile forces, using Griffith fracture theory 13 p2203 A66-26421  
Critical load of infinite plane under tension weakened by crack evaluated by Griffith fracture theory 13 p2203 A66-26422  
Approximation method for determining limit and breaking load for infinite brittle body weakened by plane crack, noting crack propagation 13 p2203 A66-26423  
Fatigue crack propagation in low-alloy heat-treated notched steels with high yield strength [ASME PAPER 66-MET-2] 14 p2311 A66-26970  
Low cycle fatigue crack propagation characteristics of high strength steels, noting technique for life estimation of structure by numerical integration [ASME PAPER 66-MET-3] 14 p2312 A66-26971  
Fatigue crack initiation and propagation, using ultrasonic test instruments 15 p2610 A66-29316  
Low endurance fatigue properties of steel plate 15 p2615 A66-29805  
Creep fatigue, thermal cycling, vibration control, transient thermal response control, structural loads and hot part reliability relating to long-life jet engine failure [SAE PAPER 660311] 15 p2572 A66-29836  
Brittle materials failure theory for cases where presence of plane deformation or plane stressed state is assumed, using Griffith theory 16 p2822 A66-31510  
Crack formation and cleavage surfaces treated via variational principle 16 p2727 A66-31529  
Interfaces between fatigue, creep and fracture, discussing separation of fatigue process into crack initiation and crack propagation 16 p2823 A66-31711  
Growth of symmetrical plane cracks in axial symmetry and plain strain 17 p3018 A66-31927  
Photoelastic and stress quenching techniques, showing change in stress distribution with crack propagation 17 p3026 A66-32595  
Metal fatigue under randomly distributed stress noting crack propagation, computer solution of integral recurrence relations, etc 17 p3029 A66-32790  
Stress level for crack initiation and propagation and delayed failures in stainless steel used for bolts 17 p2941 A66-33442  
Stress calculation for infinite strip containing straight semiinfinite crack when clamped boundaries are displaced normal to crack 18 p3248 A66-33583  
Transverse displacement of circular plate containing radial crack examined, using small deflection theory 18 p3249 A66-33597  
Air and aqueous environments effect on mode of fracture in titanium alloys during low cycle fatigue 18 p3122 A66-33749  
Propagation of stacking faults in fcc metals, noting effect of frictional force in cutting through attractive tree and subsequent dipole formation 18 p3258 A66-34631  
Susceptibility of titanium alloys to elevated-temperature static and dynamic sea-salt stress cracking, noting operative mechanism 19 p3377 A66-35648  
Design and testing of crack-notched specimens for determination of resistance of materials to unstable opening-mode crack extension under plane strain conditions 19 p3473 A66-35805  
Singular integral equations with constant coefficients solved by Jacobi polynomials and applied to problems in fluid dynamics, crack propagation, plane elastic theory, etc 19 p3393 A66-36836  
Crack propagation, damage and fatigue fracture in plane rods with transverse cut under single step and multistep axial

load 20 p3666 A66-37307  
Metastable dislocation crack transformation into polygonal walls of edge dislocations caused by diffusion over crack surface 20 p3669 A66-37551  
Electric potential method used to study slow crack growth in center-notched plate specimens 20 p3670 A66-37794  
Stress wave, deformation and fracture caused by liquid impact, noting analogy with solid and explosive impact and loading fracture formation, propagation, etc 20 p3588 A66-37803  
Stress distribution at vertex of rapidly propagating crack in celluloid sheet of 3 mm thickness studied by polarization technique 20 p3672 A66-38114  
Plastic strain distribution near axisymmetric slit in ideally elastoplastic material described by Dugdale model 20 p3673 A66-38269  
Thin film transmission electron microscopic analysis of stress corrosion of heat-treated aluminum 21 p3749 A66-38471  
Stainless steel and aluminum alloy fracture behavior under static load and low temperatures, noting crack propagation, stress and crack-length relation, etc 21 p3830 A66-39195  
Fatigue fracture and crack propagation in ordered alloys due to plastic flow 22 p3989 A66-39891  
Double linear damage rule used in conjunction with crack initiation and propagation equations, applied to cumulative fatigue damage 22 p3989 A66-40116  
Brittle-fracture propagation tests, obtaining relations among crack propagation speed, dynamic-stress distribution, test temperature and applied stress 22 p3994 A66-40435  
Residual stress, crack propagation and fatigue fracture mechanisms in Al alloy sheets with fatigue cracks, for use in wing panels [ICAS PAPER 66-34] 23 p4137 A66-41007  
K values for crack propagation rates obtained from fatigue experiments on metals, noting correlation with tensile properties of metals 23 p4082 A66-41865  
Griffith type crack propagation due to localized thermal stress at holes, cavities, penny-shaped cracks and inclusions disturbing uniform heat flow 23 p4146 A66-41993  
Rivet attached stringer effect on stress concentration in thin elastic sheet with crack solved, using computer calculations 24 p4285 A66-42143  
Stress intensity factors, strains and rotation in infinite eccentrically cracked strip under uniform tensile stress applied at infinity 24 p4286 A66-42157  
Griffith and bond fracture with singular stresses near crack point examined via numerical analysis 24 p4288 A66-42276  
**CRASH**  
Crash and ballistic protective flight helmets, noting use of improved energy dissipating materials 17 p2863 A66-32146  
**CRASH INJURY**  
Structural design of transport aircraft to reduce fatalities, analyzing protective shell to withstand ground impact load and fuel containment [AIAA PAPER 65-773] 03 p0434 A66-12592  
Results of aircraft accidents in terms of injury and death in-flight, on impact, after impact and during escape 10 p1495 A66-22141  
Flight accident casualties, pathological changes in bodies of victims of Comet 4C SA-R7 accident in Italy 14 p2229 A66-26812  
Medical inquest of Britannia 312 crash near Innsbruck 19 p3294 A66-36441  
Air Force pathologist role in accident investigation, noting crash injuries 19 p3294 A66-36443  
**CRATER**  
SA LUNAR CRATER  
SA METEORITIC CRATER  
SA METEOROID CRATER  
Age of Martian craters investigated, based on asteroid collision and certain spatial distribution 01 p0136 A66-10439  
Lunar Lake depression explained by cryptovolcanic activity or meteorite impact 03 p0365 A66-12721  
Permanent angular displacement about vertical axis and ejecta-induced impulse

associated with Sedan crater formation 08 p1292 A66-19260  
 Age of Bosumtwi crater area, Ghana, determined by mass spectrometry of rubidium, strontium and strontium isotopic composition, compared to Ivory Coast tektite age 10 p1608 A66-21741  
 Craters on Mars from Mariner IV pictures, showing no evidence of primeval crater and analyzing aeolian erosion 16 p2800 A66-30629  
 Crestone crater morphology indicates that it is not meteoritic or cometary in origin 18 p3106 A66-34462  
 Martian surface markings, brightness along optical equator, crater erosion, asteroid collision and yellow dust clouds 22 p3981 A66-40520

## CRATERING

## SA HYPERVELOCITY CRATERING

Comparison of cratering on Earth and Moon, resulting from high velocity impact of solid objects upon planetary masses 12 p1949 A66-24199  
 Hypothesis that Luna IX rocket exhaust during soft landing caused formation of shallow crater visible in Ranger VII lunar probe photographs 15 p2593 A66-28681

## CREATIVITY

General purpose computers for solution of problems in creative design 01 p0033 A66-10863

## CREEP

## SA DEFORMATION

## SA DUCTILITY

## SA PLASTIC FLOW

## SA SHEAR CREEP

## SA STEADY STATE CREEP

## SA TENSILE CREEP

Measurement of creep rate complex stress time relations for copper under loading conditions at 250 degrees C 06 p0897 A66-16949

Approximate solution method for unsteady creep of shells within framework of theory of aging 07 p1146 A66-18254

Membrane creep and plastic deformation of annular flat plate bounded by concentric circles and subjected to evenly distributed pressure 12 p1958 A66-23710

Vaporization and creep rupture behavior of type 316 stainless steel 18 p3123 A66-33755  
 Mechanical construction materials behavior, discussing application of creep and plasticity laws 20 p3666 A66-36951

Shell stability in Euler formulation, taking into account actual redistribution of stresses that results from initial deflection and creep, noting buckling of closed cylindrical shell under axial compression 21 p3829 A66-38978

Grain boundary cavity growth in Al-Cu alloy during compressive creep testing 22 p3935 A66-40291

Creep relaxation effect on high strain fatigue in chromium and molybdenum steels 23 p4139 A66-41699

## CREEP ANALYSIS

Generalized rheological models with varying relaxation time 01 p0159 A66-11179  
 Stability of thin walled cylindrical dural shells under creep during compression and bending 02 p0297 A66-11396

Vacuum creep study of mechanical behavior of solution-hardened alloy of niobium containing tantalum, tungsten and molybdenum from 980 to 1370 degrees C 03 p0380 A66-12491

Practical data processing of stress rupture results for steels with elevated operating temperatures, tentative procedure proposed and applied 03 p0384 A66-13161

Parametric formulas for extrapolating creep and stress-rupture data for high temperature steels 03 p0439 A66-13165

Vibrational creep of polymer materials when small dynamic component resulting from heating of material due to energy dissipation of oscillations is imposed on static load 04 p0538 A66-14426

Creep damage in metal, discussing future creep rupture life, exposure, mechanical properties and heat treatment for removing damage 04 p0537 A66-14466

Norton-Hoff creep parameters by cold working tests and relaxation tests 05 p0771 A66-14534

Stress effect on negative creep in chromium-nickel-titanium steels, noting

temperature effect and specific volume change 05 p0699 A66-14684

Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12]

05 p0703 A66-15686  
 Dimensionless parameter reliability analysis, deriving system reliability functions as applied to mechanical creep [ASME PAPER 65-WA/MET-6]

05 p0780 A66-15689  
 Elasto-creeping circular membrane, obtaining nonlinear solution for axisymmetric circular elastic creep problem 07 p1142 A66-17263

Deflections and stresses of shallow shell under creep conditions, reducing problem to system of two nonlinear integro-differential equations 07 p1143 A66-17628

Contact pressure between two bodies with two contact sections in the theory of creep 07 p1146 A66-18255

Creep problem of thin shallow shells in terms of viscoelastic theory, considering isotropic homogeneous and orthotropic quasi-homogeneous materials 08 p1311 A66-19340

Creep properties of EP-376 steel under slowly varying loads 08 p1241 A66-19590

Creep motion and hydromagnetics of ellipsoid moving in cross field 09 p1408 A66-20580

Nonlinear creep and recovery behavior of polypropylene fibers and hereditary functionals describing nonlinear viscoelastic behavior 09 p1393 A66-20663

High-temperature plastic deformation of single crystals, noting creep and dislocation 10 p1613 A66-21244

Creep analysis of close-coiled helical springs 10 p1613 A66-21319

High temperature creep measurement in helical spring 11 p1781 A66-22692

Creep behavior in Ni-Fe alloys at high temperatures, using one composition inside ordered regions and another 11 p1717 A66-22993

Diffusivity, elastic modulus and stacking fault energy effect on high temperature creep behavior of alpha brasses 11 p1717 A66-22996

Properties of moving dislocations in unstabilized creep at various temperatures analyzed by kinetic equations in Akulov theory 11 p1784 A66-23323

Vibrocreep mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 12 p1958 A66-23665

Circumferential creep strain of cylinders subjected to internal pressure 12 p1959 A66-23797

Russian monograph covering theory of elasticity, plasticity and creep 12 p1960 A66-23898

Creep laws in terms of generalized stress-strain rates formulated, noting secondary deformation, Tresca criterion and associated flow rule 12 p1963 A66-24037

Stress concentration in T tails of turbine blades by photoelasticity and photocreep 12 p1966 A66-24064

Axisymmetric creep of circular cylindrical shells taking into account axial forces 12 p1968 A66-24347

Dimensionless parameter reliability analysis, deriving system reliability functions as applied to mechanical creep [ASME PAPER 65-WA/MET-6]

12 p1970 A66-24540  
 Prior creep exposure on 1400 degrees F strength of Inco 713 cast nickel-base alloy, discussing microstructural change effects on mechanical properties [ASME PAPER 65-WA/MET-12]

12 p1896 A66-24542  
 Diffusion creep rate of thin foil of pure polycrystalline material 12 p1971 A66-24925

Buckling of rod with initial deflection as sinusoidal half-wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep 13 p2206 A66-26457

Effect of temperature on cyclic minimum creep rate and other phenomena associated with cycle dependent deformation from 77.4

to 295 degrees K [ASME PAPER 66-MET-7]

14 p2395 A66-26975  
 ASTM-ASME Joint Committee report on high temperature properties of stainless steels such as stress-temperature, yield and rupture curves, etc 14 p2313 A66-27229

Lateral creep deflection vs time relations in nonuniform thermal environments for linear polymer column described as combination of Maxwell and Voigt elements 14 p2396 A66-27355

Elastic analog for geometrically nonlinear membrane undergoing creep 14 p2396 A66-27381

Elastic analog applicability to geometrically nonlinear creep theory of circular membranes 14 p2397 A66-27390

Matrix methods for stress and deformation analysis for structures subject to plasticity and creep 14 p2402 A66-27887

Andrade creep law for metals, based on Davis law modified for variable temperature 15 p2611 A66-29420

Tensile and compressive creep behavior deduced from deflection measurements in creep bending tests on beams of trapezoidal cross section 15 p2614 A66-29666

Second-order effects in dissipative solids and their accumulation in causing rapid acceleration of tensile metal creeps 16 p2814 A66-30529

Creep and stress relaxation as function of slope of master curve in transition region 16 p2818 A66-31068

Interfaces between fatigue, creep and fracture, discussing separation of fatigue process into crack initiation and crack propagation 16 p2823 A66-31711

Creep behavior of selected polypropylene monofilament under axial loading 17 p3029 A66-32789

Nonlinear theoretical derivation of creep equations for three-dimensional processes in polymers, based on Boltzmann-Volterra creep heredity concept using stress-strain summation 17 p2943 A66-32807

Stress concentration in nonlinear creep of long thin cylindrical shell loaded at one edge by symmetrical radial shear and bending moment 18 p3248 A66-33578

Existence and uniqueness of solution in viscoelasticity theory for aging materials, considering four boundary value problems for body subjected to finite deformations 18 p3255 A66-34393

Strain-energy exposition of creep deflection theory and Ritz-Rayleigh method prediction of creep deformations of laterally loaded circular plates 18 p3256 A66-34561

Stress effects on plane creeping Newtonian flows of incompressible second-order fluids 18 p3103 A66-34929

Finite creep equations derived for circular sandwich plate under lateral pressure, considering bending moments and tensile forces 19 p3472 A66-35392

Time dependence of dislocation density in single crystal MgO undergoing plastic deformation at elevated temperatures 19 p3387 A66-35421

Hereditary theory based on stress and temperature superposition principle applied to metal creep 19 p3473 A66-35754

Creep testing of glass fiber reinforced thin plastic plates and beams under torsion and bending 19 p3473 A66-35756

Creep analysis of high temperature niobium alloys in very high vacuum 19 p3385 A66-36155

Oscillation of oscillator with elastically hereditary and weakly nonlinear characteristics, applying operational method to analysis in terms of hereditary creep theory 19 p3476 A66-36840

Tensile, creep and stress-strain behavior of high nitrogen content stainless steel quenched alloy at cryogenic temperatures 20 p3583 A66-37093

Real-order exponential function and application to describing creep process and to extrapolate time-to-rupture 20 p3669 A66-37539

Plane nonlinear creep of free boundaries in incompressible isotropic viscous fluid body 20 p3669 A66-37543

Creep design reliability criteria for creep-rupture and critical creep-strain modes of

structural element failure, both singularly and combined or bimodally 20 p3571 A66-37941

Nonsteady state zero-moment creep in shells of revolution with clamped edges under internal pressure, finding change range in stresses in time 21 p3826 A66-38612

Creep analysis at variable temperatures, noting creep rate and strain, transformed time hypothesis, temperature gradient effect, etc 21 p3826 A66-38615

Book on strength of turbine disks, analyzing material properties, design and operating conditions 21 p3743 A66-38948

Vibrational creep phenomenon occurring when small dynamic loads are superposed on static loads in thin wall steel tube 21 p3830 A66-38983

Vibrocreep mechanism resulting from polymeric material heating under vibrating load, noting increase of creep rate and structural changes 22 p3988 A66-39709

Creep analysis of stress-strain-time relation in metal with complex loading 23 p4136 A66-40998

Creep rate of polycrystalline thorium dioxide for high temperatures and pressures, examining intergranular voids formed by growth and coalescence of pores along grain boundaries 23 p4082 A66-41772

Generalized strain and transition concepts for elastic-plastic deformation creep and relaxation 23 p4144 A66-41973

Creep testing of tubular copper samples under combined tension and torsion with constant and variable loads 23 p4083 A66-41976

Steady state creep analysis of shell loads by uniform pressure for simply supported and clamped edges 23 p4145 A66-41977

Microscopic strain rate equation interpreting macroscopic creep, stress-strain and impact test results 24 p4288 A66-42274

Vibrational creep of Al alloy at normal temperature, noting plastic deformation magnitudes creep limit equations, etc 24 p4228 A66-42864

**CREEP BUCKLING**

Creep buckling, examining two-hinged H-section long column under distributed axial load and effect on buckling time, column deflection and numerical results of example 03 p0436 A66-12720

Beam deflection in creep bending for statically determinate and indeterminate cases [ASME PAPER 64-WA/MET-9] 06 p0961 A66-16208

Axisymmetric creep in cylindrical shells, noting creep buckling collapse after high temperature compression loading [AIAA PAPER 66-123] 08 p1308 A66-19002

Extensive creep deformation of thin zero-moment shell of revolution under action of internal and axial load 12 p1966 A66-24059

Creep buckling of columns under axially nonuniform temperature distribution 12 p1969 A66-24364

Creep buckling of column subjected to arbitrary temperature distribution along column, considering aluminum alloy 14 p2403 A66-27971

Creep buckling of column with nonuniform vertical temperature distribution 14 p2408 A66-28344

Instability of nonlinearly viscoelastic column under finite compression, noting boundary conditions, application to buckling problem, types of stability loss, etc 15 p2615 A66-29720

Creep bending of circular plate with temperature gradients, using iterative technique 16 p2813 A66-30269

Boundary value problems in secondary creep of circular thin shells under axisymmetric loading, giving solutions for deformation rates and stress resultants 17 p3030 A66-32891

Creep buckling of long curved sandwich panel 18 p3259 A66-35014

Load level as stability loss condition for bulging of elastoplastic rod in presence of creep 19 p3473 A66-35753

Calibration test for photorheological method of stress analysis in plastically flowing body under plastic work or creep deformation 20 p3671 A66-38101

Variational theorems for creep of shallow cylindrical shells, noting buckling and snap-through of square cylindrical panel compressed along generatrix 21 p3829 A66-38977

Stability theory methods for small elastoplastic deformations generalized to include creep effects in cylindrical shells compressed at ends 24 p4292 A66-42885

**CREEP DIAGRAM**

Sample deformation measuring device for short duration heat resistance tests 07 p1148 A66-18390

Forced oscillations of elastohereditary systems, using Rabotnov functions as kernels of integral operators, permitting description of creep curves for materials 08 p1307 A66-18884

Graphical solution to Garofalo equations describing first-and second-stage creep data 18 p3252 A66-33731

Initial nonsteady, steady and accelerated alloy creep test data surveyed and compared with phenomenological theory 19 p3473 A66-35757

Crack initiation and propagation formula through fatigue process applied to interface problems, noting creep 20 p3671 A66-38105

Strain-time curve of silver containing aligned tungsten wires at high temperatures, noting reduction of creep rate of matrix 22 p3935 A66-40200

**CREEP RESISTANCE**

Strength and heat resistance of alloys, particularly low alloy steels 01 p0084 A66-10286

Stress and temperature effects on nickel creep strength after prestressing at 4.2 and 300 degrees K 03 p0383 A66-13126

Brittle creep susceptibility of heat resistant chromium steels reduced by proper thermal treatment 03 p0384 A66-13162

Thermal contact resistance between uniformly loaded thin plates in vacuum, noting hysteresis test for effect of creep [ASME PAPER 65-HT-16] 05 p0783 A66-14740

Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 05 p0703 A66-15685

Thorium dioxide strengthened nickel and nickel molybdenum alloys, discussing production via selective reduction, strength, creep rupture, stability and ductility characteristics 06 p0893 A66-15943

Ultrahigh-vacuum creep behavior of columbium and tantalum alloys at high temperature and over long period 06 p0894 A66-16069

Dilute tungsten rhenium alloys, determining ductility parameters, fabrication, tensile properties and creep behavior 06 p0894 A66-16070

Polyimide resins for extreme environments, discussing chemical structure, application, electrical, thermal and mechanical properties, radiation resistance, etc 06 p0899 A66-16292

Extensometer system and specimen alignment fixture for cylindrical or flat creep specimens 09 p1465 A66-19949

Alloy steel fracture resistance, describing creep strain effect on gas turbine engine alloys [ASME PAPER 65-WA/MET-13] 12 p1896 A66-24535

Scattering mechanical properties of ternary alloy creep resistant steel, emphasizing effect of heat treatment on microstructure [ASME PAPER 66-GT-112] 14 p2312 A66-27006

Temperature and creep aftereffect in high purity crystalline cadmium 15 p2523 A66-29600

Creep fatigue, thermal cycling, vibration control, transient thermal response control, structural loads and hot part reliability relating to long-life jet engine failure [SAE PAPER 660311] 15 p2572 A66-29836

Oxide-base cermets prepared by infiltration with silver and silver alloys, noting dispersion strengthening, bend creep, impact loading, etc, for gas-turbine application 16 p2730 A66-30250

Estimation of creep in Ti-Al-V alloys by high temperature bending method 16 p2724 A66-31237

Structural changes effect on creep resistance of heat resistant alloys 16 p2728 A66-31801

Creep tests on titanium alloy specimens with gauge length salt-coated, noting cracking, time dependency of susceptibility degree, etc 19 p3379 A66-35656

Creep-rupture strength and metallurgical properties of refractory Mo at 4000 degrees F 19 p3385 A66-36156

Out-of-pile thermionic power system using inert gas for heat transfer from reactor to converter, noting creep-rupture problem of materials 23 p4023 A66-41767

Cold-drawing effect on creep behavior of nickel-aluminum alloy at various temperatures through changes in fracture, precipitates and structure 24 p4227 A66-42309

Regenerative heat treatment for increasing creep life of high temperature alloys used in turbines 24 p4227 A66-42508

**CREEP TESTING MACHINE**

Creep tests to verify validity of coincident axis and constancy of volume postulates of Alcoa 1100-0 aluminum alloy 06 p0968 A66-17178

High temperature extensometer using linear variable differential transformer 07 p1030 A66-17230

Creep testing apparatus for metals, with automatic recording of longitudinal and transverse deformations at high temperatures 11 p1780 A66-22600

Apparatus for determining dynamic compressibility, creep behavior and viscoelastic properties of polymers 13 p2115 A66-26115

Creep compliance testing apparatus for surface penetration of low modulus viscoelastic plate by 1/4-inch steel sphere 13 p2115 A66-26288

Compressive creep in thermoplastic materials measured, using simple test cell apparatus 14 p2319 A66-28483

Program controlled device for applying tensile force and torque to thin walled tubular specimen during analysis of creep under stress 21 p3827 A66-38618

S ASTRONAUT

S FLYING PERSONNEL

S PILOT

S SPACECREW

**CRITICAL FREQUENCY**

Computer program for average values of critical frequency of F-2 layer and deviation 02 p0224 A66-12125

Correlation dependence of F-2 layer on solar wave energy entering Earth atmosphere 04 p0515 A66-13850

Comparison of diurnal variations of ionization level in F region at geographically and geomagnetically conjugate stations in Arctic and Antarctic 04 p0516 A66-13851

Critical frequency of F-2 layer at Huancayo and variation with magnetic activity at different epochs of solar activity 04 p0517 A66-14378

Transmission band and critical frequencies calculation for straight waveguides of stepped cross section 06 p0838 A66-15884

Variation in dispersion and asymmetry of F-2 layer critical frequencies, plotting particular secular variations 06 p0950 A66-16593

Harmonic analysis of diurnal changes in critical frequencies of F-2 layer as function of season and solar activity 08 p1285 A66-19777

Simplified calculation of eigenvalues of double-ridge and single-ridge waveguides from which critical frequency and wavelength are determined 11 p1656 A66-22738

Turbulence-excited atmospheric velocity, critical frequency of atmosphere, solar atmospheric power spectrum of acoustic field velocity correlation, solar convection zone, etc 11 p1772 A66-22777

Circular ring loaded by constant direction forces used to illustrate kinetic instability of elastic system under random time-dependent forces 12 p1960 A66-23950

Satellite data indicates correlations between cosmic ray variations and radiation intensity of radiation belts and related phenomena 12 p1941 A66-24170

Statistical distribution of monthly median noon critical frequency of F-2 layer from ionospheric stations at mid-latitudes, auroral regions and at polar cap 12 p1870 A66-24286

Ionospheric station simultaneous observations of sporadic E layer critical frequency variations 13 p2073 A66-26236

Lunar tidal variations in monthly median noon critical frequency in American zone during low solar activity 14 p2285 A66-27727

Computer program for average values of critical frequency of F-2 layer and deviation 14 p2287 A66-28083

Critical ionization frequencies in F-2 layer in near-polar region observed at Northern Hemisphere high latitude 15 p2487 A66-29107

Spectrum analysis of critical frequency of F-2 layer 16 p2692 A66-30330

Day-to-day variations in F-2 critical frequency 16 p2693 A66-30339

Anomalous behavior in correlating maximum electron density dependence on solar zenith distance and asymmetry in critical frequency for E layer 17 p2919 A66-32881

Contribution to dependence of variation of unperturbed ionospheric F-2 critical frequencies on season and solar activity 18 p3105 A66-34097

Phase characteristics and amplitude of correcting device ensuring closed loop mechanical system stability at critical frequency 18 p3092 A66-34995

Harmonic analysis of diurnal changes in critical frequencies of F-2 layer as function of season and solar activity 21 p3809 A66-38773

Simultaneous long term ionospheric variation in midday averages of critical frequency E and F-2 at Washington, D.C. before and after increased geomagnetic activity 22 p3914 A66-40560

Simplified calculation of eigenvalues of double-ridge and single-ridge waveguides from which critical frequency and wavelength are determined 23 p4045 A66-41476

**CRITICAL LOADING**

Efficiency of fail-safe and safe-life designs as design guideposts for static and fatigue loadings 01 p0076 A66-10065

Critical loads for anisotropic plates of various configurations and boundary conditions, detailing stability of rectangular plate and orientation of axes 01 p0154 A66-10477

Critical load of ellipsoidal end faces of cylindrical reservoir assuming deformation beyond critical load is axisymmetric 01 p0155 A66-10657

Discrete critical points of perfect structural system and three branching points in general theory of elastic stability 03 p0434 A66-12370

Critical loads causing brittle-rupture equilibrium cracks that develop near elliptical holes in bodies that remain elastic up to fracture 03 p0441 A66-13298

Equilibrium stability of rod beyond elastic limit 04 p0590 A66-14161

Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 05 p0777 A66-15439

Critical combinations of uniform pressures and concentrated loads at apex acting on shallow spherical shells determined, deriving basic differential equation [ASME PAPER 65-WA/APM-27] 05 p0778 A66-15448

Effect of torsional and lateral restraints on elastic critical load of centrally loaded simply supported beam buckling laterally 06 p0966 A66-16613

Collapse of pressurized axially stiffened thin cylinder 06 p0967 A66-16933

Elastic critical load of centrally loaded simply-supported beam which buckles laterally out of plane derived by Airy integral functions 07 p1144 A66-18049

Edge conditions effect on elastic stability of cylindrical shells extended to additional combinations of boundary conditions, considering cylinders under axial compression 08 p1310 A66-19144

Stability of thin-walled conical shells under

axially symmetric loading determined from nonlinear shell theory 10 p1614 A66-21382

Nonconservative loading on linear two-degree of freedom elastic system, discussing damping effects on equilibrium stability [ASME PAPER 65-WA/APM-17] 12 p1961 A66-23983

Critical load of ellipsoidal end faces of cylindrical reservoir, assuming deformation beyond critical load is axisymmetric 12 p1963 A66-24015

Linear creep stability of orthotropic shells, considering shear creep and lateral buckling, determining critical loads and noting errors 13 p2113 A66-25913

Critical load under uniaxial tension for thin infinite plates with holes weakened by cracks 13 p2202 A66-26415

Critical load of infinite plane under tension weakened by crack evaluated by Griffith fracture theory 13 p2203 A66-26422

Axisymmetric form of stability loss of cylindrical shell under effect of load suddenly applied along generatrix, considering inertia forces and obtaining differential equations 13 p2206 A66-26456

Imperfections and edge restraint effect on buckling of axially compressed cylinders 14 p2404 A66-27988

Destabilization of linear system with N degrees of freedom without damping subjected to nonconservative forces 15 p2609 A66-29251

Collapse loading of rotationally symmetric cylindrical shell 15 p2609 A66-29253

Critical load determination via trial and error method and transfer and stiffness matrices 17 p3023 A66-32309

Approximation method for checking stability of compression members in rigid-joint space truss or stability against out-of-plane buckling of compression members in rigid-joint plane truss 19 p3475 A66-36489

Critical buckling load at middle plane of variable-rigidity plate 21 p3832 A66-39376

Critical combinations of uniform pressures and concentrated loads at apex acting on shallow spherical shells determined, deriving basic differential equation [ASME PAPER 65-WA/AMP-27] 24 p4285 A66-42149

Stress-strain analysis of critical load-induced crack formation near elliptic or circular hole 24 p4290 A66-42438

Critical loading and stability of three-layer sloped asymmetric shells beyond elastic limit for arbitrary stress-strain diagram 24 p4290 A66-42442

**CRITICAL PATH ANALYSIS**

Reflection coefficient and critical length determination for unstable convective modes in weakly homogeneous plasmas 10 p1567 A66-21819

**CRITICAL POINT**

Electrical impurity effect on critical temperature in superconductor 03 p0413 A66-13193

Electron-phonon interaction for calculation of critical temperature for ordinary and anomalous superconductors 04 p0568 A66-14347

Paramagnetic impurity effect on critical temperature of superconductor for two-band model 05 p0738 A66-15346

Liquid-gas coexistence curve shape near critical point, allowing for volume and temperature deviations and for mathematical singularities 08 p1316 A66-18796

Magnetic and resistive superconducting transitions on bulk samples of indium-lead alloys in alpha-phase region, considering results relative to Glag theory 09 p1423 A66-20067

Asymptotic expansions of double and multiple integrals occurring in diffraction theory, using stationary phase method 10 p1550 A66-21850

Superconductivity variation in tantalum noting dependence of critical current, transition temperature and magnetic field on impurity concentration 12 p1927 A66-23856

Numerical solution of problem of supersonic flow at angle of attack past arbitrarily smooth conical bodies 12 p1798 A66-24441

Neutron irradiation effect on superconductive properties of tin and indium foils at low temperatures, noting

decrease of critical temperature and field 14 p2364 A66-27641

Critical conditions of waveguide with dielectric bushing for case of nonsymmetrical waves 14 p2259 A66-28161

Electron-phonon interaction for calculation of critical temperature for ordinary and anomalous superconductors 14 p2368 A66-28243

Betti numbers shown to be equal to binomial coefficients of torus, determining minimal set of van Hove critical points 15 p2559 A66-28624

Correlations between Lennard-Jones potential parameters and critical and boiling point constants of 28 nonpolar and 17 polar gases 15 p2618 A66-29718

Paramagnetic impurity effect on critical temperature of superconductor for two-band model 15 p2569 A66-29985

Semiautomatic potentiometer measurement of nitrogen specific heat at small intervals, noting applicability of logarithmic law for other temperature ranges 16 p2829 A66-31168

Critical temperatures and critical magnetic fields determined for superposed normal and superconducting films, noting dependence on metal thickness 19 p3443 A66-36003

Critical temperature of several bulk dilute solid solutions of transition metals in Al, Zn, In and Sn, examining effect of transition-metal impurities 21 p3796 A66-38556

Time dependent Ising-model description of binary liquid mixture near critical temperature 22 p3947 A66-39922

**CRITICAL PRESSURE**

Critical combinations of uniform pressures and concentrated loads at apex acting on shallow spherical shells determined, deriving basic differential equation [ASME PAPER 65-WA/APM-27] 05 p0778 A66-15448

Critical flow rate, critical pressure ratio and critical mass flow of dissipative adiabatic nozzle and pipeflow of ideal gas 16 p2690 A66-31635

Wall thickness requirement for cylindrical shell stability under critical radial compression derived by generalized power series 20 p3673 A66-38271

Computer analysis of cylindrical shell stability under uniform external pressure and critical pressure determination for various boundary conditions 21 p3829 A66-38979

Critical combinations of uniform pressures and concentrated loads at apex acting on shallow spherical shells determined, deriving basic differential equation [ASME PAPER 65-WA/AMP-27] 24 p4285 A66-42149

**CRITICAL REYNOLDS NUMBER**

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 17 p2914 A66-33260

Critical Reynolds number for pulsating Poiseuille flow determined by studying stability under harmonically and nonharmonically varying pressure gradient [ASME PAPER 66-FE-5] 24 p4195 A66-42578

**CRITICAL SPEED**

Effect on critical speed of thin rotating disk produced by rigid circular inclusion welded at center 19 p3363 A66-35591

**CRITICAL STRESS**

Semizero-moment shell with one edge braced by elastic support with small rigidity for deformation out of plane, noting magnitude of critical stress 04 p0588 A66-13566

Bubnov-Galerkin method extended to solution of any system of equations not associated with variational principles 08 p1306 A66-18605

Axisymmetric loss of static stability of closed circular cylindrical shell subject to longitudinal compressive stresses 08 p1312 A66-19430

Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 10 p1613 A66-21238

Breaking stresses in two connected elastic half-spaces determined with aid of Griffith-

- Sneddon criterion 12 p1968 A66-24349  
Effect of random distribution of point-like obstacles on dislocation movement analyzed, proving existence of critical applied stress, deriving structure of work-hardened crystal 12 p1971 A66-24924  
Melting practice, sheet thickness and thermal and mechanical treatments effect on critical stress intensity parameter and ductility of 18-nickel maraging steel 13 p2108 A66-25772  
Stability of three-layer shells or plates beyond proportionality limit, obtaining critical stress 16 p2817 A66-31054  
Critical stress, stability loss and load carrying capacity of axially compressed thin walled aluminum alloy rods 16 p2819 A66-31142  
Cleavage characteristics of copper plate under explosive load determined and interpreted, taking finite failure time into account 19 p3474 A66-35861  
Classical critical stress values for buckling of thin walled circular cylindrical shells in axial compression as function of edge conditions 23 p4143 A66-41965
- CROCCO METHOD**  
Group of transforms derived for functional in which Euler equation coincides with Crocco equation describing plane vortex gas streams 04 p0512 A66-14437  
Dorodnitsyn approximate solution method applied to Crocco forms of first and second order incompressible two-dimensional boundary layer equations 05 p0665 A66-15776
- CROSS CORRELATION**  
Transfer functions of cantilever beam and clamped-edge square plate determined by cross-correlation methods 01 p0148 A66-10136  
Wiener kernels of nonlinear system based on cross-correlation techniques 02 p0207 A66-11789  
Envelope polarity coincidence cross-correlator for detection and identification problems involving weak wideband microwave signals 05 p0646 A66-14613  
Frequency response function of lightly damped single-degree of freedom system estimated from truncated measurement of cross-correlation function of white noise excitation and response 05 p0781 A66-15788  
Cross correlation and autocorrelation functions of nonstationary signals based on optimal approximation of ensemble correlation function for one pair of signals 10 p1517 A66-21694  
VHF ionospheric radio signal cross correlation coefficients determined, using pulse counting techniques 10 p1505 A66-21731  
Cross correlation radar system for mapping of target distribution 12 p1813 A66-23789  
Cross correlation measurements of oscillator frequency stability and thermal noise and application to atomic hydrogen maser 12 p1835 A66-24128  
Power response of two-element interference frequency correlation interferometer to point source of broadband random noise 12 p1840 A66-24626  
Noise suppression, signal reception, and polarization measurement in cross correlated antennas as function of dipoles imbedded in random field, surrounding noise field and coherency matrix of cross correlation function 13 p2044 A66-26746  
Combined frequency and space correlation of wave fields scattered by rough surfaces where conditions of applicability of Kirchhoff approximation hold 14 p2236 A66-27144  
Cross correlation of satellite signals through slab containing small anisotropic irregularities 14 p2237 A66-27398  
Spatial cross-correlation analyses between radial velocity and continuum brightness fluctuations of solar disk center spectrograms 17 p2996 A66-31919  
Coherent optical system for simplifying signal processing from antenna arrays by simultaneous beam forming and cross correlation 18 p3069 A66-34248  
Noise characteristics at integrator input in nonstationary regime 19 p3311 A66-35297  
Pseudorandom binary signals as perturbation signals in simultaneous multi-input cross correlation method of obtaining linearized impulse response of system 19 p3307 A66-35730  
Ionospheric drift and radio wave dispersion determined from selective fading records and symmetry of cross correlation functions, using Fourier transforms 22 p3916 A66-40807
- CROSS COUPLING**  
Synthesis method for linear time-varying systems, discussing integral formulation and approximation functions 05 p0654 A66-14609  
Digital cross multiplication used in cross coupling and off-leveling errors in gravity measurements at sea 09 p1369 A66-19874  
Cross coupling effects in first order theories of ship motion used in measurement of gravity at sea 09 p1369 A66-19875  
State-variable feedback decoupling of multivariable linear plants with cross coupling between various input-output pairs 13 p2053 A66-26083  
Short circuited crossguide coupling used to stop oscillation of reflex klystrons and convert them into stable millimeter wave amplifiers 14 p2248 A66-27058  
Combined effect of horizontal and vertical accelerations on gravimeter readings mounted on gyroplatform or in Cardan suspension 14 p2297 A66-28111  
Gain, impedance and scan angle variation in polarization of phased radar antenna arrays constructed with hybrid-fed crossed dipole radiating elements 15 p2456 A66-28586  
Time domain method of relating cross coupling between transmission lines of multilayer structure to geometry in design of high speed digital systems 18 p3090 A66-34071  
Static stability of rolling motion of aircraft for given aileron angle when inertia cross-coupling is present, with numerical solution of nonlinear equations 22 p3848 A66-40493  
Combined effect of horizontal and vertical accelerations on gravimeter readings mounted on gyroplatform or in Cardan suspension 24 p4212 A66-42699
- CROSS LINKING**  
Equivalent transfer function of linear two-channel system of automatic control, discussing system stability dependence on cross links 20 p3537 A66-36891  
Prior gamma irradiation effect on thermal volatilization of vinyl and vinylidene fluoride polymers 20 p3587 A66-37311
- CROSS RELAXATION**  
Paramagnetic resonance spectra shift due to temperature change in cross-relaxation rutile maser 16 p2718 A66-30820  
Spectral hole burning and cross relaxation effects on steady state gain saturation of laser amplifier with inhomogeneously broadened linewidth 22 p3931 A66-40098
- CROSS SECTION**  
S ABSORPTION CROSS SECTION  
S IONIZATION CROSS SECTION  
S NEUTRON CROSS SECTION  
S RADAR CROSS SECTION  
S SCATTERING CROSS SECTION
- CROSSED FIELD**  
Laser action at 5401 angstroms in pure neon pulsed high voltage discharge 01 p0081 A66-10353  
Theory of interband magnetodispersion effects in crossed field semiconductors, obtaining expressions for Faraday and Voigt effects 02 p0272 A66-11711  
Plasma velocity field determined from glow discharge in crossed fields propagating along rectangular channel, two walls being dielectrics and other two electrodes 02 p0268 A66-11786  
Current, potential electron and atom temperature distributions between anode and cathode in low pressure crossed-field plasma accelerator 03 p0416 A66-12784  
Two-dimensional flow of inviscid nonheat-conducting gas with variable conductivity in crossed constant electric and arbitrary magnetic fields 04 p0557 A66-14422  
Fine structure of cut-off characteristic, particularly influence of emission current density in crossed-field thermionic converter 05 p0616 A66-15541  
Radiation induced during electron passage through magnetic field can be intensified and made nonrelativistic by superimposed electrostatic field 07 p1044 A66-18261  
Creep motion and hydromagnetics of ellipsoid moving in cross field 09 p1408 A66-20580  
Radiation induced during electron passage through magnetic field can be intensified and made nonrelativistic by superimposed electrostatic field 09 p1387 A66-20905  
Coherent radiation effect on stability of crossed field electron beam, noting raising of potential of space vehicle 10 p1564 A66-21544  
Plasma behavior in crossed stationary electric and magnetic fields, examining field dependence of ion velocity and ion and electron temperature 10 p1566 A66-21704  
Laminar MGD boundary layer on conducting surface in crossed electric and magnetic fields for flow core of constant temperature 11 p1745 A66-22590  
Very low phase velocity wave propagating in one direction in semiconductors in presence of crossed DC electric and magnetic fields 12 p1928 A66-24151  
Plasma acceleration in crossed magnetic and electric fields 13 p2153 A66-26520  
Electron beam analyzer for determining crossed field space charge beam analyzer 15 p2549 A66-28719  
Repetitive plasma breakdown in flat electrode accelerator, causing relatively low plasma velocity 16 p2757 A66-30107  
Interband optical absorption in germanium in crossed electric and magnetic fields, noting band perturbation theory, differential spectra, Stark broadening, experimental techniques, etc 16 p2776 A66-30736  
Self-similar solutions of two-dimensional laminar flow of incompressible electroconductive fluid in channel in crossed electric and magnetic fields, using Jacobi elliptic integrals 17 p2971 A66-32866  
Formation process of rotating plasma in homopolar-type short coaxial-electrode system in hydrogen, nitrogen or argon discharge 17 p2972 A66-32973  
Anomalous electron diffusion and ion acceleration measured in steady state low-density weakly-turbulent plasma subjected to crossed E and B fields 18 p3149 A66-34913  
Crossed-field electron beam stability for arbitrary values of Q /ratio of plasma frequency to cyclotron frequency/ 20 p3606 A66-38404  
Faraday and Voigt and dispersive magneto-optic effects in semiconductors in crossed field due to energy band transitions 21 p3800 A66-38995  
Generator of plasma with supercritical rotational velocity in crossed electric and magnetic fields 21 p3789 A66-39063  
Absorption coefficient of light in semiconductors in crossed electric and magnetic fields, examining conditions for Franz-Keldysh effect occurring in magnetic field 24 p4256 A66-42524
- CROSSED FIELD AMPLIFIER**  
Klystrons, cross field devices and traveling-wave tubes, including design and application 07 p1011 A66-18269  
Traveling wave HF crossed field photomultiplier with helical output circuit for electron multiplication at microwave modulation rates 24 p4182 A66-42567
- CROSSED FIELD GUN**  
Modified split-folded waveguide slow-wave structure for crossed field tubes that permits use of fundamental backward or first forward-wave harmonics over wide bandwidths 04 p0498 A66-14038  
MGD DC crossed field plasma accelerator capable of operating on LF AC current 08 p1262 A66-18829
- CRUSADER AIRCRAFT**  
S F-8 AIRCRAFT
- CRYOGENIC EQUIPMENT**  
SA REFRIGERATING EQUIPMENT  
Two-phase flow and heat transfer for boiling liquid nitrogen in horizontal tubes 01 p0165 A66-10909  
Cryogenic problems in temperature and level sensing discussing thermocouples, resistance sensors, vapor and gas bulb thermometers and level gauges and probes 01 p0070 A66-10955  
Equilibrium conditions for whole complex cryogenic cycle analyzed by means of Claude-Heyland cycle 05 p0786 A66-14900  
Aerodynamic analysis of cryogenic radial-inflow turbines, noting optimum velocity distribution

September 1964 09 p1413 A66-20004  
Magnetocaloric effects in high-field  
superconductor, noting magnetic field-  
induced temperature variation effects on  
thermally isolated superconducting alloy  
specimen 09 p1420 A66-20051  
Strain measurements in cryogenic  
container, noting preparation of specimen  
surface, installation of gauges,  
etc 09 p1466 A66-20185  
Practical Philips cycle for low temperature  
refrigeration, noting equal coefficient of  
performance to that of ideal Carnot cycle  
under isothermal conditions 09 p1472 A66-20879  
Vacuum equipment selection for thin film  
processing line, comparing diffusion and ion-  
pumped evaporation systems 13 p2040 A66-25843  
Cooler for semiconductor lasers and  
photodetectors using low temperature  
gas 13 p2104 A66-26559  
Radiation efficiency of short whip antenna  
with loading coil cooled to 77 degrees K and  
4.2 degrees K at approximately 20 mc  
frequency 14 p2257 A66-27925  
Refrigerated mass spectrometer inlet  
serving also as low temperature reactor and  
rough separative device for compounds  
stable only at very low  
temperatures 16 p2645 A66-30420  
Convective heat transfer to and low  
gravity heating of liquids contained in  
rotating cryogenic fuel tanks in orbit  
[AIAA PAPER 66-432] 16 p2826 A66-30521  
Cryoelectronic integrated circuits utilizing  
superconducting storage and switching  
devices 16 p2665 A66-31417  
Irradiation system for experiments with  
Plum Brook Reactor in nuclear rocket  
program, noting cryogenic system, dynamic  
testing, etc 17 p2956 A66-32045  
Closed cycle helium refrigerator noting  
thermodynamic cycle, equipment  
arrangement and cost estimate for space  
simulator and wind tunnel application  
closed 20 p3541 A66-37070  
Cryogenic design of aluminum, titanium  
and steel alloys subjected to uniaxial, 1-to-1  
biaxial and 2-to-1 biaxial stress  
states 20 p3583 A66-37094  
Thin insulating Teflon film bonding to  
internal surface of space cryopanel for  
increased heat transfer and faster  
cooling 20 p3677 A66-37100  
Gas sorption and desorption processes at  
low pressures, discussing molecular  
adherence to cold solid surfaces, adsorption  
mechanism of isotherms, vacuum generation  
via cryotrapping effect,  
etc 20 p3605 A66-38088  
Gas flow equations for multilayer  
insulation systems for both continuum and  
free molecular flow regimes of interest in  
cryogenic space vehicle design  
[AICE PREPRINT 22A] 22 p3897 A66-39888  
Low temperature system for thermal  
conductivity measurements using Ge and Pt  
resistance thermometers and He exchange  
gas switch 24 p4215 A66-43207

**CRYOGENIC FLUID**

Control valve design for cryogenic fluids,  
galling, seizing and stress accumulation and  
material-valve  
compatibility 12 p1885 A66-24380  
Dynamic instability in undamped bellows  
face seals operating in cryogenic  
environment with torsional oscillation and  
diametrical rocking as primary motion  
[ASLE PAPER 66AM 2CE] 16 p2711 A66-30408

Radiant energy transport within cryogenic  
condensates extended to case of explicitly  
varying condensate depths and wider  
substrate temperature  
range 16 p2830 A66-31712  
Design and performance of vacuum-  
insulated pipe used to transfer cryogenic  
fluids in space program 20 p3541 A66-37069  
Cryogenic system used to remove heat  
from space simulator solar radiation

source 20 p3541 A66-37071  
Low temperature experimental apparatus  
for density determination of cryogenic  
liquids and mixtures under atmospheric and  
subatmospheric pressure 20 p3601 A66-37082  
Data correlations on forced-convective heat  
transfer to cryogenic fluids by nucleate,  
film and transition region  
boiling 20 p3677 A66-37098  
Convective heat transfer to cryogenic  
nitrogen and methane from cylindrical  
surface by nucleate-and film-boiling at high  
pressures and large temperature  
differences 20 p3677 A66-37099  
Laminar, turbulent and transition heat-  
transfer domain analysis of cryogenic fluids  
in variable reduced-gravity environment,  
with applications to space cryogen  
storage 20 p3677 A66-37103  
Dimensional and experimental analyses of  
helium bubble motion in liquid  
nitrogen 20 p3545 A66-37104  
True-mass cryogenic flowmeter for liquid  
oxygen, hydrogen and nitrogen with liquid-  
helium compatibility 21 p3740 A66-39426  
Adhesively bonded joints withstand severe  
thermal shock and have excellent bonding  
with high strength structural alloys in  
cryogenic liquids 22 p3937 A66-39778  
Cryogenic fuels evaluated for operational  
safety in space environment simulation  
laboratory /SESL/ 22 p3891 A66-40235

**CRYOGENIC MAGNET**

VGL-2 cryogenic magnetic trap, filling with  
hydrogen plasma 19 p3428 A66-36580  
High field liquid-neon-cooled  
superconducting electromagnet for cryogenic  
solid state research 20 p3601 A66-37106

**CRYOGENIC PROPELLANT**

Spaceflight application of cryogenic  
techniques including cooling magnets, noise  
reduction in parametric amplifiers and  
quantum-electronic, superconductive and IR  
sensing devices 01 p0130 A66-10789  
Model simulating energy distribution  
process /thermal stratification/ within liquid  
hydrogen stored aboard moving rocket to  
avoid pump cavitation  
[AIAA PAPER 64-426] 08 p1279 A66-18809  
Two-phase flow of evaporating cryogen in  
condensing binary mixture related to Gibbs  
potentials 08 p1318 A66-19153  
Large launch vehicle cryogenic propellant  
logistics including storage and production  
capacity optimization, cost and heat loss  
analyses by computer simulation  
[AIAA PAPER 65-259] 16 p2789 A66-30900  
Detonability of cryogenic oxidizers,  
discussing modified continuous wire  
technique analysis of detonation properties  
of trioxigen difluoride 16 p2790 A66-31194  
Propellant tanking computer system for  
monitoring and controlling Saturn IB and  
Saturn V vehicles  
[SAE PAPER 660454] 17 p2904 A66-33162  
Liquid hydrogen-oxygen cryogenic  
propulsion stages, examining structural  
material and configuration of propellant  
tank and thermal flow  
effects 18 p3246 A66-34007  
U.S. space program impact on cryogenic  
industry 20 p3624 A66-37060  
Cryogenic propellant boiloff losses in long  
duration space storage elimination by  
mechanical reliquefier, considering lunar,  
Earth-orbit and deep space application for  
hydrogen and oxygen 20 p3625 A66-37079  
Cryogenic propellant program for Saturn  
applications, discussing stringent purity  
requirements and magnitude of  
applications 20 p3541 A66-37080

**CRYOGENIC STORAGE**

Cryogenically cooled superconducting  
electromagnet design, construction and  
testing 06 p0907 A66-15935  
Tanks for cryogenic fluids on space  
vehicles noting structure, insulation,  
manufacturing techniques, materials,  
construction, etc 06 p0887 A66-17069  
Superconducting continuous film store  
evaluated, noting switching thresholds and  
functional dependence of disturb pulse  
sequences on film parameters 10 p1509 A66-21416  
Liquid hydrogen tank level in space  
measured by applying known impulse and  
determining resulting acceleration of

container 11 p1706 A66-22957  
Lightweight inflatable shadow shields for  
cryogenic space vehicles and performance in  
conjunction with  
superinsulation 16 p2810 A66-30899  
Space vehicle containers, discussing  
prolonged storage of cryogenic liquids,  
insulation requirements, container  
configuration and design, etc  
[SAE PAPER 660460] 17 p3017 A66-33165  
Test for space storability of liquid  
propellants by suitably coating storage tanks  
[AIAA PAPER 65-534] 19 p3448 A66-35613  
Weight and size optimization of flight type  
cryogenic storage supply system of oxygen  
and hydrogen for fuel cell operation and life  
support in manned  
spacecraft 19 p3292 A66-36233  
Shingle attachment of multilayer insulation  
to cryogenic flight tanks 20 p3674 A66-37061  
Lightweight superinsulation testing for  
cryogenic tank  
application 20 p3675 A66-37063  
Transient gas-flow process in multilayer  
insulation systems during evacuation  
predicted by equations in conjunction with  
measured permeabilities and diffusion  
coefficients 20 p3675 A66-37065  
Convection effect in helium charged  
insulation with partially foam-filled  
honeycomb core 20 p3675 A66-37066  
Thermal conductivity of gas-charged  
cryogenic powder  
insulation 20 p3675 A66-37067  
Saturn S-IV and S-IVB liquid hydrogen  
tank internal insulation, using polyurethane  
foam reinforced with fiberglass  
threads 20 p3675 A66-37068  
Simplifying large cryogenic research  
tankage temperature measurement methods  
including thermocouples, resistance  
thermometers, semiconductors, piezoelectric  
probes and combinations  
thereof 20 p3556 A66-37072  
Thermal analysis and weight optimization  
of low-heat-leak storage tanks, particularly  
aspects important to designers of propellant  
tanks for long-term lunar  
storage 20 p3676 A66-37078  
Lightweight titanium and inconel pressure  
vessel for Apollo cryogenic hydrogen and  
oxygen storage systems 20 p3541 A66-37092  
Childdown rate and equilibrium heat-leak  
storage loss measurements in liquid  
hydrogen storage dewars 20 p3541 A66-37101  
Laminar, turbulent and transition heat-  
transfer domain analysis of cryogenic fluids  
in variable reduced-gravity environment,  
with applications to space cryogen  
storage 20 p3677 A66-37103  
Multilayer insulating material thermal-  
mechanical environmental tests for use as  
heat shields in cryogenic storage tanks  
[AICE PREPRINT 22F] 22 p3997 A66-39889  
Liquid hydrogen tank insulation  
constructed of honeycomb core containing  
polyurethane foam for S-II  
booster 22 p3997 A66-39892  
Aircraft materials and structures for  
extreme ranges of velocity and  
temperature 22 p3990 A66-40120  
Life support systems for crew comfort and  
safety, considering thermal and radiation  
environmental control, carbon dioxide  
removal, cryogenic gas storage,  
etc 22 p3857 A66-40129

**CRYOGENICS**

SA COOLING  
SA NERNST HEAT THEOREM  
SA REFRIGERATION

Time-dependent temperature distribution  
and interface location of phase change of  
one-component systems in  
container 01 p0164 A66-10901  
Cold wall space simulating installation and  
technique for cooling wall with liquid  
nitrogen 02 p0216 A66-11895  
Materials at cryogenic temperatures  
discussing thermal lattice effects, specific  
heat, electrical and thermal conductivity,  
thermal expansion and mechanical  
properties 04 p0534 A66-13371  
Heat and mass transfer rates compared  
with correlations for frost formation on  
vertical plate in free convection  
[ASME PAPER 65-HT-32] 04 p0595 A66-13391  
Properties of neutron star at absolute zero  
temperature, discussing ground state,

particle models and energy spectrum 05 p0760 A66-14894  
 Mass spectrometer measurements of oxygen fluorides at cryogenic temperatures 06 p0821 A66-16156  
 Experimental apparatus for studying temperature dependence of electrical properties of semiconductors at low temperature 08 p1221 A66-18705  
 Platinum resistance thermometers with interchangeable characteristics for liquid hydrogen measurements, discussing standardization and calibration 08 p1226 A66-19598  
 Book on theory and measuring techniques for electrical resistance of metals at low temperatures and cryogenics 09 p1388 A66-19976  
 Discharge in germanium thin films at liquid helium temperatures, noting electrostatic ionization of impurities and shock-ionization region expansion 09 p1412 A66-19990  
 Superconducting transition temperature of SnTe samples 09 p1423 A66-20071  
 Yield strength dependence on normal to cryogenic temperatures of high strength alloys [ASME PAPER 65-PROD-14] 11 p1715 A66-22475  
 Operating characteristics of electrodeless MHD converter with primary winding cryogenically-cooled, comparing performance with one having conventional winding 12 p1803 A66-23749  
 Improvement of mechanical properties of structural adhesives and composite materials at cryogenic temperatures 12 p1899 A66-24385  
 Magnetic diffusivity measurement for cylinder of type II Nb-Zr superconductor at 4.2 degrees K, using magnetoresistance probe 14 p2350 A66-26878  
 Uniaxial permalloy film anisotropy at cryogenic temperatures and magnetization characteristics 14 p2355 A66-26914  
 Cryogenic resistance spot welding of refractory metals and conventional aerospace materials [ASTME PAPER AD66-111] 14 p2299 A66-26950  
 Reinforced plastics measured for thermal conductivity, specific heat and thermal expansion at cryogenic temperature [AIAA PAPER 65-423] 14 p2318 A66-27891  
 Electron gas electroconductivity relaxation time and energy loss in n-type InSb at cryogenic temperatures 15 p2558 A66-28611  
 Near UV effects on thermal control surfaces at cryogenic temperature 17 p3035 A66-32749  
 Materials behavior at cryogenic temperatures - ASTM meeting, Lafayette, Indiana, June 1965 19 p3380 A66-35845  
 Serrated yielding by metals during tension tests at temperatures near absolute zero 19 p3380 A66-35846  
 Factors affecting fracture characteristics of metals at cryogenic temperatures and fracture mechanics for predicting performance of defect-containing structures 19 p3380 A66-35847  
 Martensitic transformations in ferrous and nonferrous alloys, discussing kinetic and structural characteristics 19 p3380 A66-35848  
 Specific heat and thermal conductivity of metals at cryogenic temperatures 19 p3381 A66-35849  
 Absorption line between 220 and 550 mu in transmission spectra of ruby at liquid nitrogen and helium temperatures 19 p3446 A66-36342  
 Cryogenic engineering, Volume II - Conference, William Marsh Rice University, Houston, August 1965 20 p3599 A66-37059  
 Reinforced plastic materials evaluated as potential low temperature structural insulators 20 p3676 A66-37084  
 Room and cryogenic temperature mechanical properties and microstructure of electroformed nickel 20 p3582 A66-37090  
 High strength weldable Al alloys with good cryogenic toughness, stress-corrosion cracking resistance and tensile strength 20 p3582 A66-37091  
 Tensile, creep and stress-strain behavior of high nitrogen content stainless steel quenched alloy at cryogenic

temperatures 20 p3583 A66-37093  
 Cryogenic temperature effects on mechanical properties of high strength glass-reinforced plastic resins 20 p3587 A66-37095  
 Combined nuclear radiation damage and cryogenic temperature effects on tensile and shear properties of materials in outer space 20 p3583 A66-37096  
 Kapitza papers, Volume 2, 1938-1964 20 p3603 A66-37833  
 Superconducting magnets, economics, size, weight and application as devices in cryogenic environment [ASME PAPER 66-MD-22] 21 p3741 A66-38479  
 Kjeldas absorption edge in cryogenic potassium for shear magnetoacoustic wave propagation in spherical metallic Fermi surface with spin density wave ground state 21 p3800 A66-38991  
 Stainless steel and aluminum alloy fracture behavior under static load and low temperatures, noting crack propagation, stress and crack-length relation, etc 21 p3830 A66-39195  
 Fatigue fracture and crack propagation in ordered alloys due to plastic flow 22 p3989 A66-39891  
 Cell model of attractive interactions between helium atoms and effect on solid-superfluid transition in He 4 at absolute zero 23 p4090 A66-41368  
 Specific heat measurements and cryogenic thermodynamic properties of single crystal V in mixed state under 12 different magnetic fields 23 p4080 A66-41372  
 Book on low temperature techniques and common cryogenic systems 24 p4238 A66-43161  
**CRYOPUMPING**  
 Dynamic measurements of speed of pumping by activated charcoal cooled to liquid nitrogen temperatures to evaluate cryosorption 02 p0261 A66-11591  
 Spherical cryopumped chamber with test object analyzed for pumping speeds determined with gauges located in various positions, with equations relating these speeds to chamber geometry and cryopump efficiency 04 p0528 A66-14465  
 Gas capture coefficient prediction for cryopumping based on critical velocity model in space chamber simulator 10 p1520 A66-21937  
 Simulated space vacuum environment by cryosorption pumping 12 p1858 A66-24709  
 Reduction of thick boundary layers in low density wind tunnel by applying suction to nozzle, using high-speed cryopump 16 p2673 A66-30381  
 Rarefied supersonic flow condensation on cold flat plate, noting capture coefficients, shock wave behavior, etc 16 p2825 A66-30383  
 Cryosorption panels consisting of molecular sieve adsorbents bonded to refrigerated aluminum plates for pumping hydrogen at 20 degrees K 17 p2957 A66-31978  
 Energy transport within cryodeposit layer subjected to thermal radiation 20 p3676 A66-37085  
 Electrically cryopumped system for liquid helium transfer continuously at low flow rates 20 p3542 A66-37105  
 Cryopump uses and selection of coolants 21 p3697 A66-38810  
 Molecular beam chamber for cryopumping studies and capture coefficient data 22 p3890 A66-40223  
 Pumpdown characteristics and incident flux rates of ultrahigh vacuum research facility 22 p3890 A66-40224  
**CRYOSORPTION**  
 Dynamic measurements of speed of pumping by activated charcoal cooled to liquid nitrogen temperatures to evaluate cryosorption 02 p0261 A66-11591  
 Simulated space vacuum environment by cryosorption pumping 12 p1858 A66-24709  
 Cryosorption panels consisting of molecular sieve adsorbents bonded to refrigerated aluminum plates for pumping hydrogen at 20 degrees K 17 p2957 A66-31978  
**CRYOSTAT**  
**SA TEMPERATURE CONTROL**  
 Combined cryostat/oven and specimen transfer device for tensile testing, noting

design, operation and results 11 p1683 A66-22699  
 Electric contact effect and transition temperature measurement in superconducting Cu-Pb double layer films at low temperatures, using He 3 cryostat 16 p2772 A66-30322  
**CRYOTRON**  
 Cryotron-type DC to AC voltage converter and measurements of cryotron circuits 04 p0494 A66-13755  
 Cryotron-type DC to AC voltage converter and measurements of cryotron circuits 15 p2454 A66-28552  
**CRYSTAL**  
**SA BODY CENTERED CUBIC /BCC/ CRYSTAL**  
**SA CUBIC CRYSTAL**  
**SA IONIC CRYSTAL**  
**SA METAL CRYSTAL**  
**SA PIEZOELECTRIC CRYSTAL**  
**SA POLYCRYSTAL**  
**SA SINGLE CRYSTAL**  
**SA YTTRIUM-ALUMINUM GARNET /YAG/ CRYSTAL**  
**SA YTTRIUM-IRON GARNET /YIG/ CRYSTAL**  
 Specific heat, thermal expansion and conductivity and electrical conductivity of nearly perfect crystalline materials 07 p1109 A66-18497  
 Quartz crystal units and quartz crystal-controlled oscillators, discussing vibrator characteristics, trapped energy, aging, motional modes, etc 12 p1834 A66-24121  
 Load capacitance method for measurement of quartz crystal parameters 12 p1845 A66-24855  
 Current oscillation observations in photoconductive cadmium sulfide crystal 17 p2987 A66-33317  
**CRYSTAL DISLOCATION**  
 Slip-induced fracture of polycrystalline Cr, Mo and W and bcc transition metals V, Fe, Nb and Ta 01 p0085 A66-10376  
 Strain ratio measurements from uniaxial tension tests predicting metal sheet performance during pressing, considering crystal deformation 01 p0086 A66-10411  
 Prismatic slip in polycrystalline titanium diboride subjected to high hydrostatic pressure at room temperature 01 p0086 A66-10489  
 Determination methods for various types of dislocation in germanium lattice and influence on physical properties of germanium 02 p0276 A66-12066  
 Three-stage hardening in tantalum single crystals deformed in tension over limited range of orientations, temperatures and strain rates 02 p0246 A66-12194  
 Fracture micromechanisms of materials having regular crystalline structure, considering mechanical strength, atomic imperfections, dislocation interactions, and crack growth 03 p0382 A66-13000  
 Stable dislocation structures obtained by high and low temperature and precrystallization thermomechanical treatment 03 p0385 A66-13172  
 Tungsten crystal deformation and fracture analyzed as orientation function, noting tensile tests and stress-strain curves 03 p0385 A66-13208  
 Total nonelastic strain recovery of copper single crystals after small prestrains, discussing parameters 04 p0535 A66-13400  
 Macroscopic plastic strain rate relation with configuration and velocity distribution of dislocations in monocrystals with single active glide system, noting yield stress 04 p0535 A66-13731  
 Detailed account of dislocation loops according to continuum theory 04 p0590 A66-14164  
 Internal friction measurements for studying mechanical properties due to crystal dislocations 05 p0698 A66-14550  
 Four elastic constants of Laval, Raman and Viswanathan theories dynamically measured in connection with behavior data on cubic crystals 05 p0781 A66-15736  
 Contrast of dislocation near Si surface in anomalous transmission X-ray topographs 06 p0927 A66-16760  
 Four-lobed rosette stress patterns in X-ray topography of silicon bombarded by electron beam 06 p0928 A66-16761

Recombination radiation of n-type germanium with various dislocation densities, emphasizing mechanism of radiative transitions 07 p1096 A66-17324

Generation modes of dislocations in ordered alloys from Frank-Read sources 07 p1049 A66-17486

Elastic interaction energy of two infinitesimal dislocation loops in transversely isotropic medium estimated from fundamental elasticity tensor 07 p1144 A66-18044

Brittle fracture in ceramic materials, noting Griffith theory on crack propagation, plastic deformation occurrence, stress distribution effect, etc 07 p1054 A66-18499

Large dislocation loops on basal plane and rows of prismatic dislocation loops in quenched magnesium specimens 07 p1052 A66-18513

Binding energy between oxygen atom and dislocation in tantalum by measuring critical temperature at which discontinuous yield disappears on heating 07 p1052 A66-18514

Stacking faults and Burger vector dislocations in twin crystals of beryllium observed by electron microscopy 08 p1235 A66-18651

Transmission electron microscopy structural analysis of dislocations in stress-corrosion cracking of 7075 aluminum alloy 08 p1236 A66-18761

Deformation of polycrystalline MgO at elevated temperatures, with stress-strain curves for five types 08 p1243 A66-18773

Dependence of lifetime on dislocation density in vacuum-zone purified silicon single crystals 08 p1272 A66-19242

Dislocation interaction with coherent ordered zones, noting onset of plastic deformations in alloys 08 p1240 A66-19250

Interaction of dislocations with coherent ordered zones, discussing results of electron transmission and tensile test experiments 08 p1240 A66-19251

Effect of conditions of fabrication of alloyed contacts between semiconductors and metals on dislocation structure of these contacts 08 p1274 A66-19315

Stress-corrosion failure in metal alloys, discussing surface and elastic energy, adsorption, crack propagation, pits and tunneling 08 p1241 A66-19601

Dependence of expansion ratio on impurity concentration for silicon samples differing in impurity and dislocation content 09 p1412 A66-19991

Pile-up of dislocations in front of twin bands formed in crystal as result of elastic twinning 09 p1391 A66-20866

Molybdenum single crystal dislocation redistribution and subgrain boundaries formation during annealing at high temperatures 09 p1391 A66-20873

High-temperature plastic deformation of single crystals, noting creep and dislocation 10 p1613 A66-21244

Anomalous diffusion of boron parallel and perpendicular to dislocation arrays in grain boundary contained in silicon 10 p1574 A66-21356

Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 10 p1546 A66-21505

New parameter, dimensionless fraction of particle volume irreversibly dislocated by plastic deformation during compression, permits calculation of powder compression process and constants 10 p1540 A66-21507

Electrical properties of dislocations in artificially produced bicrystals 10 p1582 A66-21902

Spin resonance of donor electron in Ge and anisotropic line width in relation to dislocation stress 11 p1750 A66-22463

Chemical etching revealing dislocations produced by indentation on single crystals of silicon, measuring edge dislocation velocities at various shear stresses and high temperatures, determining activation energy 11 p1750 A66-22492

Effect of plastic bending on indium antimonide electrical properties, measuring crystal dislocations, Hall coefficient, etc 11 p1751 A66-22698

High-temperature deformation of magnesia

single crystals with  $\langle 110 \rangle$  tensile axis, favoring slip on systems with oblique vectors, related to observations on  $\langle 001 \rangle$  crystals 12 p1898 A66-23564

Germanium specimens with various dislocation densities quenched from high temperatures to introduce vacancies, contamination by copper atom diffusion, finding activation energy 12 p1930 A66-24801

Surface pit formation in aluminum, discussing effects of vacuum, quenching high temperature and repeated cycling 12 p1897 A66-24921

Effect of random distribution of point-like obstacles on dislocation movement analyzed, proving existence of critical applied stress, deriving structure of work-hardened crystal 12 p1971 A66-24924

Critical analysis of Hirsch linear strain hardening theory, discussing decrease of dislocation cluster radius 12 p1898 A66-24926

Plastic flow peculiarities analysis based on X-ray diffraction effects obtained by deforming single crystal molybdenum of various orientations 12 p1898 A66-25026

Plastic deformation of single crystals of titanium carbide with cube orientation in compression from 900 to 1250 degrees C 13 p1206 A66-25059

Immobile dislocation network of high density in Campo del Cielo observed by thin-film transmission electron microscopy 13 p1277 A66-25136

Transmission electron microscopic observations on preexisting dislocation as sinks for neutron-irradiation-induced point defects and dislocation reaction to subsequent deformation 13 p1207 A66-25586

Aging behavior of explosively deformed 2219 Al investigated by transmission electron microscopy 13 p2086 A66-25775

Mechanism of plastic deformation in crystalline bodies, discussing static and dynamic frictional forces in relation to dislocation structure of bodies in contact 13 p1210 A66-25887

Johnston-Gilman concept of yielding and plastic flow and strain rate effect on dynamic dislocation 13 p1297 A66-26106

Low-temperature internal friction peaks in germanium and oxygen-doped and pure silicon crystals 13 p1270 A66-26586

Amplitude probability density of random stationary signal potential and variation of free carriers in germanium semiconductor at near-ambient temperature 13 p1270 A66-26758

Domain boundaries and superdislocations of structure of Alnico V by thin film electron transmission microscopy 14 p2311 A66-26882

Diffusion of indium along sessile dislocation in silicon crystal 14 p2356 A66-27070

Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 14 p2357 A66-27071

Vacuum deposited films of titanium dioxide examined, using electron microscopy and diffraction methods, noting crystal dislocation due to electron beam irradiation 14 p2359 A66-27133

Aging of aluminum alloy after quenching and strain hardening, noting Vickers hardness tests, tensile tests, precipitation phases, shearing effect, etc [PST PAPER 423] 14 p2315 A66-27468

Estimate of energy dissipation in metals, using continuous distribution of oscillating dislocations joined with Zener thermoelastic effects 14 p2315 A66-27658

Fracture mechanics, discussing crystal structure defects, particular dislocation, hardening, lattice vacancies, interstitials, etc 14 p2316 A66-27770

Effect of external forces on state of stress and dislocation density in continuous medium 14 p2402 A66-27937

Opening of parallel cracks by applied tensile stress in terms of dislocation distribution theory 14 p2408 A66-28389

Stresses and coupled-stresses generated by dislocation in isotropic media treated in terms of boundary value problem for Cosserat medium 14 p2409 A66-28468

Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation

curve 15 p2557 A66-28562

Transient and steady state photoconductivity in plastically bent germanium, noting logarithmic decay of photocurrent and logarithmic lux-ampere characteristics 15 p2558 A66-28608

Multiplication of moving dislocation in work-hardening of crystal 15 p2559 A66-28631

Acceptor nature of dislocations in p-type germanium 15 p2560 A66-28636

Electron microscope investigation of dislocation effect on stress corrosion cracking in aluminum alloy 15 p2523 A66-29418

Nonmetric connections in quasi-static plastic-elastic deformation of crystalline solid with continuous distribution of dislocations and extra-matter 16 p2746 A66-30532

Stability of two coplanar wedge-shaped cracks, showing under what conditions interaction effects are important 16 p2814 A66-30533

Schrodinger equation in semiconductor with N atoms containing dislocation, vacancy or other defect, noting phase shift and local charge neutrality 16 p2775 A66-30730

Dislocations and precipitates in GaAs injection lasers revealed by new A-B etchant 16 p2718 A66-31071

Mechanical behavior of polycrystalline iron and single crystal molybdenum in compression over various strain rate ranges, noting temperature role 16 p2724 A66-31264

LF internal friction of beryllium, noting strain amplitude dependency variation with temperature and purity, obtaining activation energies 16 p2724 A66-31265

Modes of elastic wave propagation and orientation dependence of dislocation damping in aluminum 16 p2821 A66-31452

Ultrasonic attenuation changes due to dislocation formation during yielding of magnesium, molybdenum and LiF 16 p2726 A66-31458

Annealing of lightly deformed columbium single crystals with parallel twins or parallel and intersecting twins 16 p2726 A66-31461

Dangling bonds and dislocations in semiconductors, noting existence of core charge dependent localized state in gap caused by local decrease in atom density 17 p2985 A66-33155

Dislocation distribution and crack propagation due to stress corrosion 17 p2942 A66-33444

Austenite-martensite interface dislocations in stainless steel shown as probable pinned Shockley partials 18 p3123 A66-33927

Chemical etchants for In As noting functions, rate dependence on bromine in methanol, p-n junction delineation, etc 19 p3434 A66-35349

Indentation damage and subsequent annealing effect on etch-polished Ge surfaces at room temperature examined with optical microscope, using interference contrast techniques 19 p3434 A66-35401

Time dependence of dislocation density in single crystal MgO undergoing plastic deformation at elevated temperatures 19 p3387 A66-35421

Chemical sectioning of p-type surface layers on silicon, presenting electrical and X-ray measurements of boron-induced defect distribution 19 p3436 A66-35424

Intrinsic dislocations in diffused silicon p-n junctions and effect on transient processes 19 p3437 A66-35455

Interstitial dislocation loops in beryllium oxide irradiated at high temperatures 19 p3398 A66-35495

Separation centers and dislocations during diffusion of Zn into GaAs at high temperatures, analyzing photographs of p-n junctions 19 p3445 A66-36339

Dislocation motion in silicon crystals measured by Lang X-ray technique, noting dislocation nucleation and growth with increasing stress below macroscopic yield stress 19 p3447 A66-36725

Dislocation dipoles produced by ionic bombardment of thin gold films, noting that during annealing dipoles can condense to form only one dipole 19 p3447 A66-36726

Tension and compression tests on single and polycrystalline niobium, examining twinning, slip and catastrophic

- flow 19 p3387 A66-36727
- Formation of cleavage crack in crystalline solid, examining crack stability by study of equilibrium dislocation distribution in terms of operative stresses 19 p3475 A66-36728
- Dislocation-induced relaxation in silicon single crystals by measuring internal friction and Youngs modulus at temperatures from 77 to 300 degrees K 20 p3618 A66-37561
- Chemical etch pitting techniques, determining dislocations in crystal structure caused by liquid droplet impacts, calculating stress distribution due to collision 20 p3547 A66-37806
- Fabrication methods for lithium drifted surface barrier silicon detectors, discussing lithium diffusion, stain etching, preparation for and final etch 20 p3535 A66-38417
- Photomicrographs of pressure crack figures on silicon single crystals at room temperature 21 p3803 A66-39291
- Electron energy spectrum of silicon, examining effect of screw dislocations parallel to crystallographic direction 21 p3803 A66-39296
- Crystal dislocation distribution effect on low temperature electrical transport properties in plastically deformed metals 21 p3753 A66-39587
- Silicon dioxide complexes and deposition of excess oxygen at dislocations and structural defects, examining creation of microplasma breakdown of silicon p-n junctions 22 p3965 A66-40320
- Dislocation structure in single crystal indium antimonide and gallium arsenide studied by X-ray diffraction 22 p3966 A66-40829
- Electron microscope investigation of dislocation structure of silicon single crystals after compressive deformation at various stages of deformation curve 23 p4112 A66-41283
- Changes in fine structure of powdered copper during compression, determining dislocation density and disorientation angles, noting plastic deformation cause as packing defect occurrence 23 p4081 A66-41526
- Microscopic strain rate equation interpreting macroscopic creep, stress-strain and impact test results 24 p4288 A66-42274
- Generation-recombination noise and lifetime measured using photoconductive decay in n-and p-type Ge samples doped with shallow impurities 24 p4253 A66-42357
- Dislocation arrangement and twin fault formation by quenching and tempering in titanium-tantalum alloy investigated by internal friction measurement and microscopy 24 p4228 A66-42511
- CRYSTAL FILTER**
- Bandwidth expansion of crystal filters by spacing frequency response characteristics in relay circuit at suitable distances from each other 03 p0342 A66-12895
- Ten-element band pass filter section and derivatives with classification of image-impedance functions 11 p1669 A66-23113
- Quartz crystal active filters noting design and operation of multiresonator filters 19 p3312 A66-35337
- CRYSTAL GROWTH**
- Germanium fiber single crystal growth, properties and application 01 p0116 A66-10207
- Growth of single crystal gold films in ultrahigh vacuum on clean vacuum-cleaved salt surfaces 01 p0117 A66-10242
- Thin metal film growth under applied electric field 01 p0118 A66-10246
- Crystal chemistry of nonmetallic materials prepared under moderate or high pressure and recovered and retained under ambient conditions 01 p0090 A66-10292
- Growth of ice crystals freely falling in atmosphere and form when produced by cloud element coagulation analyzed, using low pressure chamber 01 p0097 A66-11105
- Cubic beta-silicon carbide films grown on single crystal silicon substrates by heating in presence of graphite in argon atmosphere 02 p0275 A66-11871
- Ruby laser crystals grown by flame-fusion, flux and Czochralski method examined for perfection by X-ray topography and double-crystal rocking curves 04 p0529 A66-13744
- Recrystallization of bismuth films by controlled melting and resolidification 05 p0732 A66-14668
- Tungsten as thermionic emitter prepared by hydrogen reduction of tungsten fluoride, noting resistance to grain growth and properties 05 p0714 A66-15593
- Growth of absorption bands of natural and synthetic calcium fluoride crystals irradiated with protons from cyclotron at Tomsk Institute 05 p0741 A66-15857
- Yttrium effect on recrystallization and grain growth of tantalum 07 p1052 A66-18350
- Apparatus for fluoridation of hydroxyl and oxygen contaminated fluoride compounds, obtaining optically clear crystals with no Tyndall scattering for laser application 07 p1047 A66-18488
- Kinetics of reactions in iodide method of growing epitaxial germanium layers 08 p1268 A66-18797
- Epitaxial silicon layer crystal growth at low temperatures by sublimation through thin alloy zones 08 p1271 A66-19224
- Segregation processes and coefficients of effective distribution and diffusion during solidification of doped tellurium 08 p1272 A66-19247
- Crystallization kinetics of tri-alpha-naphthyl benzene in large temperature range, noting transition in morphology, crystal growth rate and viscosity 08 p1179 A66-19595
- Deposition kinetics of solid phases on electrodes of second kind, noting conditions affecting crystal growth and lattice formation 08 p1171 A66-19648
- Temperature oscillations in molten metals and relation to growth striae in melt-grown crystals 10 p1572 A66-21167
- Light emission associated with growth defects from reverse biased gallium phosphide p-n junctions 10 p1577 A66-21556
- Growth and properties of n and p type beta-silicon carbide crystals grown from pure or doped carbon-saturated silicon melts 10 p1577 A66-21563
- Floating zone technique for preparing high purity GaAs crystals for CW microwave devices 10 p1516 A66-22099
- Epitaxial growing of iron, nickel and cobalt single crystal films on sodium chloride crystals by spraying at 200 degrees C 11 p1753 A66-22805
- Electric current heating method to obtain high purity silicon epitaxial films 11 p1757 A66-23281
- Sandwich method in closed system for growing semiconductor germanium epitaxial films 11 p1757 A66-23282
- Vanadium oxide single crystal growth by flame solution and fusion, noting burner construction, crystal structure and techniques 12 p1899 A66-23565
- Doping techniques for epitaxial growth of silicon and germanium layers 12 p1832 A66-23933
- Epitaxial deposition of silicon by sublimation process at 750 degrees C, using ultrathin alloy zone crystallization 12 p1846 A66-24912
- Residual gas influence on orientation of vapor deposited NaCl crystals 13 p2159 A66-25068
- Epitaxial vapor growth of germanium from germanium iodide with hydrogen and argon atmosphere, examining various growth parameters 13 p2161 A66-25193
- Radial solution growth of GaAs single crystal layers and analysis of photoluminescence spectrum 13 p2164 A66-25488
- Moving deposition zone technique for controlling nucleation and growth of silicon films on hexagonal silicon carbide substrates 13 p2164 A66-25491
- Microscopic and electron diffractational structural analysis of epitaxial growth of PbTe by sublimation on split surface of NaCl at 150 degrees C in vacuum 13 p2170 A66-26757
- High energy Alnico alloys, discussing crystal growth, anisotropy, recrystallization, etc 14 p2311 A66-26883
- Growth kinetics and structure of evaporated tin thin films on amorphous carbon film, noting three stages after nucleation, archipelago, labyrinth and closing 14 p2359 A66-27102
- Green emission lines from solution-grown p-n junctions in GaP diodes doped with shallow donors and acceptors 14 p2251 A66-27231
- Fluorescent lifetimes of neodymium, ytterbium and samarium incorporated in ordered perovskite-type compounds determined, noting crystal structure potential for laser emission 14 p2367 A66-27976
- Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 15 p2557 A66-28563
- Chromium doped ruby whiskers grown by vapor phase reaction, determining chromium concentrations, noting whisker growth morphologies 15 p2561 A66-28706
- Single crystal germanium films grown on molybdenum or tungsten substrates, using electron beam zone melting process 15 p2563 A66-28726
- Concave-convex growth spirals due to screw dislocation in nickel bromide 15 p2563 A66-28730
- Fabricating perfect dendritic germanium crystals with required resistivity and dislocation density 15 p2569 A66-29787
- Growth of single crystals of rare-earth fluorides for laser application, using hydrogen fluoride atmosphere, noting ion exchange purification 16 p2779 A66-31082
- Epitaxial growth configurations of single-crystal potassium bromide on sodium chloride, using gold decoration method, showing effect of crystal orientation on growth rate 16 p2780 A66-31213
- Germanium single crystal whisker formation by iodide method of selective epitaxial growth 16 p2781 A66-31405
- X-ray diffraction analysis of single crystal silicon film grown on several natural faces of BeO by thermal decomposition of silane and hydrogen reduction of silicon tetrachloride 16 p2782 A66-31420
- Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259
- Ice crystal size during expansion of humid air in supersonic nozzle 17 p2948 A66-32417
- Lanthanum oxide as crystal growth modifier, noting habit modifications, optical quality, etc 17 p2982 A66-33060
- Growth of single crystal and polycrystalline thin films of magnesium aluminum oxide and magnesium iron oxide, discussing techniques employed, results, etc 17 p2982 A66-33061
- Phase relations in cobalt niobate-cobalt tantalate system noting structural characteristics, solubility, phase transitions, etc 17 p2940 A66-33062
- Effect of equilibrium crystal seeds on supercooled polyethylene melt and o-xylene solution of polyethylene of same chemical nature 17 p2944 A66-33466
- Particle growth during coalescence of fine phases of metallic alloys 18 p3123 A66-34403
- Secondary mode of nucleation during sublimation growth of nickel bromide, noting formation mechanism 19 p3434 A66-35405
- Distribution of edge-type dislocations in GaAs grown from solution by traveling solvent method determined, using etching techniques 19 p3437 A66-35432
- Yttrium vanadate crystals grown and processed for optical purposes 19 p3373 A66-35434
- Hydrogen reduction techniques and layer quality measurement methods for epitaxial growth of silicon and germanium crystals 19 p3437 A66-35473
- Hexagonal crystal structure growth of CdTe thin film 19 p3438 A66-35480
- Crystal growth of rare earth tungsten bronzes using electrolytic reduction of fused mixture of rare earth tungstate and tungsten trioxide 19 p3381 A66-36037
- Measurements on physical and laser properties of vapor-grown ruby single crystals prepared by epitaxial growth 19 p3375 A66-36081
- Monograph on synthesis and properties of refractory semiconducting materials having large forbidden bandwidth and prepared from element of groups III and V 19 p3448 A66-36731
- Crystal growth, diffusion and fabrication of

gallium arsenide-phosphide junction lasers with low threshold current  
densities 20 p3577 A66-37401

Starting concentration, surface distribution of additive in alumina powder, trajectory distance and growth rate in Verneuil growth of ruby crystals 21 p3795 A66-38527

Transmission electron microscopic analysis of initial epitaxial growth stage of evaporated Au films on NaCl cleavage surfaces 21 p3798 A66-38758

Direct measurement of dispersion properties of cadmium sulfide and CdS-CdSe crystals, using Obreimov-Fresnel diffraction method, growing crystals by synthesis 21 p3799 A66-38926

Experimental molecular beam study of nucleation process in chemical-vapor growth of epitaxial silicon films 21 p3805 A66-39588

Temperature gradient-induced GaAs crystal inhomogeneity effects on electric properties 22 p3959 A66-39742

Burnout of additives for flame fusion growth of crystal 22 p3931 A66-39920

Thermal growth and deposition of silica films by silicon tetrafluoride hydrolysis 22 p3962 A66-40048

Charge distribution in thermally grown silicon dioxide and silicon n-type inversion layer 22 p3962 A66-40087

Epitaxial germanium films on gallium arsenide substrate by vacuum evaporation, considering surface preparation 22 p3963 A66-40106

Current characteristics of solution and vapor grown p-n Ge-Si and Ge-GaAs heterojunctions as function of voltage and temperature 22 p3968 A66-40963

Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 23 p4112 A66-41284

Potassium tantalum niobite crystal growth noting methods applied, potassium oxide evaporation and tantalum absorption rate 23 p4115 A66-41773

Transitions between phases and states of crystallographic order in films, noting conditions for preferential nucleation and analogies between two-and three-dimensional phase diagrams 24 p4251 A66-42305

Alloyed semiconductor heterojunction metallurgy and physics, noting processes of interface alloying, solution growth and vapor transport-interface alloy 24 p4252 A66-42348

MOS transistor structures with enhancement mode of operation, discussing fabrication processes via V-C characteristics, temperature effects on performance, etc 24 p4181 A66-42389

Effects of isothermal decomposition of gamma ray irradiated orthorhombic crystals of ammonium perchlorate 24 p4170 A66-42421

Heterogeneous formation of seed crystals on wettable and nonwettable condensation nucleus in supercooled water droplets 24 p4234 A66-42756

## CRYSTAL LATTICE

Friction and wear of hexagonal metals and alloys as related to crystal structure and lattice parameters in vacuum [ASLE PREPRINT 65-LC-18]

Transition temperature, critical fields, electrical resistivities and crystalline structures of technetium-tungsten alloys 03 p0411 A66-13142

Lattice and grain boundary self-diffusion coefficients of radioactive nickel 63 into high purity nickel measured over temperature range 650-475 degrees C 04 p0535 A66-13746

Energy accommodation coefficients calculated for gas particles interacting with cubic crystal lattice 04 p0548 A66-14142

Thermodynamic changes in crystal lattice on electron states of semiconductors 05 p0737 A66-15116

Radiation damage to crystalline lattices by energetic particles, discussing consequences on physical behavior of solids, particularly ceramics 05 p0738 A66-15471

Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional oscillations of samples, noting role of internal friction 05 p0740 A66-15822

X-ray diffraction method for measuring

thermal expansion coefficient of germanium, silicon, indium antimonide and gallium arsenide 06 p0930 A66-17047

Effectiveness of measurements of X-ray diffraction intensities as probe of lattice defects introduced in perfect germanium crystals by energetic particle irradiation 06 p0933 A66-17121

Strain field calculation from linearized elasticity theory for vacancies and divacancies in diamond structure valence crystals 06 p0938 A66-17147

Quantum mechanical discussion of electron structure of crystal lattice of semiconductor as contributor to thermodynamic behavior of impurities 07 p1097 A66-17472

Imperfection formation in epitaxial gold films, observing crystal-lattice dislocations due to rotation and displacement misfits between neighboring islands of deposit film 07 p1110 A66-18517

Dielectric properties and lattice parameter dependence on temperature from X-ray studies of rubidium-potassium nitrate mixed crystals 08 p1269 A66-19008

Resonance Raman effect in crystals, discussing spontaneous and simulated scattering efficiency 08 p1259 A66-19233

Spatial dispersion of long-wave optical oscillations of lattice in polar semiconductor 08 p1276 A66-19610

Free energy calculations and crystallographic properties of vortex line lattices in type II semiconductor for square and triangular lattices in given magnetic field 09 p1421 A66-20058

Anisotropy of Snoek relaxation measured for oxygen and nitrogen in niobium 10 p1576 A66-21554

Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 10 p1587 A66-22148

Hall effect in alloyed crystals of n-type indium antimonide 10 p1589 A66-22165

Integral equations describing multiple neutron Bragg reflections in mosaic crystal 11 p1742 A66-23409

X-ray stress analysis of externally-loaded polycrystal lattice strains and residual lattice strains due to internal macro- and microstresses 12 p1957 A66-23629

Crystallization of certain aluminosilicate and gallosilicate glasses of stoichiometric composition, discussing anionic network 12 p1900 A66-24861

Maximum efficiency of power converters, using ferroelectric and nonferroelectric pyroelectrics 13 p1997 A66-25036

UV absorption and excitation spectrum of ruby and sapphire, noting structure and polarization effects, quantum efficiency, etc 13 p2162 A66-25378

Lattice parameters and constant measured in gadolinium-yttrium alloy dihydrides, using X-ray diffraction techniques 13 p2162 A66-25382

Surface orientation effect on twin accommodation in hcp metal magnesium and relation to twin boundary movement 13 p2107 A66-25585

Optical linewidth study of energy transfer between impurity ions and homogeneous broadening and lineshape changes in optical transitions 13 p2098 A66-26176

Strong electron-phonon interaction which couples electron to lattice motion in F center of alkali halide crystal by measuring temperature dependence of F center absorption and emission bands 15 p2559 A66-28629

Electron energy losses in diamond, noting correlation between plasma excitation energy and interband transition energies 15 p2564 A66-28876

Optical color center bands in amethyst quartz containing ferric ions after irradiation 16 p2767 A66-30123

Two oxycarbide phases in zirconium-carbon-oxygen compositions found in zirconia-carbon mixtures at high temperatures, giving X-ray diffraction patterns indexed as fcc at various lattice parameters 16 p2729 A66-30246

Friction and wear of hexagonal metals and alloys as related to crystal structure and lattice parameters in vacuum [ASLE PREPRINT 65-LC-18]

16 p2713 A66-30568

Intervalley scattering in III-V semiconductors, noting relation to Gunn effect, scattering in GaAs by longitudinal optic phonons, in InP by longitudinal acoustic phonons 16 p2776 A66-30733

Harmonic approximation of infinite crystal dynamics problem, noting collisional case and action of external force on atoms 16 p2820 A66-31169

Molybdenum films prepared by sputtering onto oxidized silicon substrates, analyzing resistivity, lattice parameter, orientation and grain size as function of substrate temperature and bias 16 p2783 A66-31424

Noise characteristics of solid state, X-band microwave sources, using VHF crystal oscillator, amplifier and varactor multiplier 17 p2893 A66-32924

Spatial dispersion of long-wave optical oscillations of lattice in polar semiconductor 17 p2983 A66-33124

Hardness and lattice parameter increase effect on oxidation temperature of internally oxidized Ag-Mg and Ag-Al alloys 18 p3122 A66-33750

Uniaxial stress effect on two-phonon lattice absorption bands of silicon 18 p3154 A66-33920

Dielectric constant variation in silicon single crystals, noting frequency dependence of dielectric loss, conductivity and temperature effects 19 p3436 A66-35423

Twin boundary effect on measurements of phonon momentum propagating through Ge bicrystal p-layers at liquid nitrogen temperatures 19 p3438 A66-35482

Plastic deformation effect on heat conduction of crystal lattice of sodium and potassium chlorides single crystals 19 p3440 A66-35762

Hall effect in alloyed crystals of n-type indium antimonide 19 p3441 A66-35779

Nickel aluminide structure, examining arrangement of Ti, Cr and W in lattice via X-ray spectroscopy 19 p3381 A66-35928

Effect of binding on distribution in angle of charged particles having suffered scattering with lattice atoms 19 p3403 A66-36172

Exchange interaction between f-electrons and s-electrons in atomic shells of crystal lattice of rare-earth metals, examining calculation methods for Hamiltonian of s-f exchange 20 p3617 A66-37476

Thermal conductivity of lanthanum and monochalcogenides, noting role and temperature dependence of crystal-lattice conductivity 20 p3617 A66-37556

Yield strength anisotropy due to preferred orientation estimated by Taylor model, considering cold rolled aluminum 20 p3585 A66-37784

Equilibrium diagram and existence corroboration of Ti-Rh alloy 20 p3586 A66-38093

Vacuum thermionic work function for well-outgassed polycrystalline surfaces, noting techniques for accurate measurement of current, area and temperature values 20 p3587 A66-38401

X-radiation alignment of quartz crystals for generation and detection of reverberating acoustic echoes at liquid-helium temperatures 20 p3624 A66-38409

Impurity atom behavior in diatomic InSb and GaSb crystal lattices analyzed, using nuclear gamma resonance, measuring absolute values of f, chemical displacements and line widths 21 p3799 A66-38922

Enumerating neighbors of atom in diamond-like lattices 21 p3805 A66-39584

Ruby laser-induced effect of pulsed pressure on KDP crystal surface and thermal bulk effect on excitation of ultrasonic oscillation in crystal 22 p3932 A66-40318

Vibration modes frequencies of lead telluride propagating in certain symmetric direction determined by inelastic neutron scattering 22 p3966 A66-40405

Elastic constants and interatomic interaction parameters of niobium alloyed with tantalum, titanium and vanadium 22 p3936 A66-40788

Lithium transformation by plastic deformation from bcc to fcc lattice analyzed by measuring damping of free torsional

oscillations of samples, noting role of internal friction 23 p4113 A66-41387  
Coupled ODE sets describing continuum wave propagation in discrete structures with and without dispersion or linearity 23 p4096 A66-41939  
Laue reflection method of X-ray diffraction, determining single crystal orientation 24 p4255 A66-42506

# CRYSTAL OPTICS

Light reflection by planes perpendicular to c axis in zinc sulfide crystals containing stacking faults 04 p0567 A66-14337  
Spatial structure for second harmonic generated in anisotropic medium by finite-aperture light beam 08 p1233 A66-18969  
Temperature dependence of optical birefringence on single crystals of lead zirconate-titanate solid solution measured, noting they are optically negative 08 p1269 A66-19006  
Crystal-Diffusion Spectra-International Colloquium, Paris, July 1965 08 p1233 A66-19231  
Excited ruby crystal phosphorescence noting spectral range, duration, electron excitation mechanism and upper wavelength limit 08 p1234 A66-19667  
Optical signal reception, considering use of HF subcarrier superimposed on light signal and bias-sensitive crystal detector for mixing process between subcarrier and local oscillator, deriving signal to noise ratios 09 p1346 A66-20567  
Nonlinear optical effects of third order in crystals, specifically in Hamiltonian of system containing electrons, nuclei and radiation field 09 p1387 A66-20928  
Excited ruby crystal phosphorescence noting spectral range, duration, electron excitation mechanism and upper wavelength limit 10 p1543 A66-21834  
Light beam deflection due to linear temperature gradients across electro-optic modulator crystals 11 p1737 A66-23431  
Electron beam pumped lasers, discussing energy dissipation in fast electrons passing through crystal, laser semiconductor characteristics, etc 11 p1715 A66-23433  
Absolute measurement of optical rectification coefficient in ammonium dihydrogen phosphate 12 p1912 A66-23715  
Electro-optic device with nonreciprocal properties which does not depend on Faraday magneto-optic effect 12 p1837 A66-24313  
Ruby laser experiment yielding giant pulses by separating mirrors from crystals 13 p2092 A66-25684  
Elliptic cavity design for solid state lasers, discussing multiple reflections, absorption coefficient, refraction losses, etc 13 p2092 A66-25998  
Monte Carlo technique to determine total energy and energy distribution in laser crystal due to optical pumping 13 p2093 A66-26028  
Raman diffusion spectra from crystals excited by gas laser 13 p2104 A66-26345  
UV absorption and dispersion of cadmium sulfide crystals and energy band structure 14 p2356 A66-27064  
Vector synchronism and second-harmonic light generation in focused beams 14 p2307 A66-27191  
Crystal motion effect on time behavior of laser generation mode, using high speed photography and oscillograms 15 p2518 A66-29725  
Physics of luminescent ionic crystal - Conference, Lvov, Ukrainian SSR, January-February 1964 15 p2568 A66-29728  
Impurity absorption of LiF crystals in vacuum UV 15 p2568 A66-29729  
Second harmonic generation /SHG/ by focused laser beams in nonlinear crystals 15 p2519 A66-29816  
Lattice vibrational properties of hexagonal CdSe 16 p2778 A66-31075  
Possible stabilization of AgCl crystals against solar radiation effects by addition of Cu, Ni, Zn, Cs, S or Hg 18 p3157 A66-34549  
Semiconductor technology advances in laser-energy conversion, light detection and TV transmission 20 p3534 A66-38413  
Second harmonic generation in laser crystals by Gaussian beams of finite aperture 22 p3929 A66-39657

Gallium arsenide crystal properties for use in optical filter 22 p3959 A66-39773  
UV absorption and dispersion of cadmium sulfide crystals and energy band structure 22 p3966 A66-40823  
Precision polishing technique for optical and microwave acoustical surfaces with overall flatness of one-eighth wavelength of light and parallel to 6 inches 23 p4067 A66-41248  
Single crystal wurtzite CdS luminescence as function of exciting intensity, noting shift of overlapping band structure of green-edge emission indicative of electron-hole recombination 24 p4219 A66-42250  
Surface pinned layer-like field inhomogeneities in cadmium sulfide, investigating visibility of field layer by corresponding shift of absorption edge, using Franz-Keldysh effect 24 p4254 A66-42427  
GaAs crystal as electro-optic modulator at 10.6 microns due to small carrier absorption, freedom from interband transitions and high resistivity 24 p4222 A66-42553  
Miller phenomenological rule for computing nonlinear susceptibility, determining magnitude by geometrical factor 24 p4223 A66-42568  
Split angle, total internal reflection and Wollaston prism-digital light deflection techniques 24 p4174 A66-42815  
Vector synchronism and second-harmonic light generation in focused beams 24 p4226 A66-43089

Domain characteristics and crystal property effects in materials and configurations for Gunn effect devices 01 p0041 A66-10571  
Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 01 p0091 A66-10771  
X-ray analysis of neutron irradiated quartz crystals at various temperatures, showing atomic displacements 01 p0124 A66-10772  
Laser crystals prepared economically by splitting along cleavage planes 01 p0084 A66-11046  
Present status of titanium research and development noting electronic structure, dislocation theory and alloy theory 02 p0242 A66-11525  
Nucelite, ceramic-metal composite with high mechanical strength and abrasion resistance noting crystal structure, application, properties, etc 02 p0244 A66-11742  
Crystalline structure on fatigue noting changes of body-centred metals and face-centred and hexagonal metals 02 p0245 A66-11948  
Crystal structure of hexamethylenetetramine hexahydrate determined using X-ray analysis, noting hydrogen bonding in crystalline state 03 p0330 A66-12338  
Effect of surface state of cadmium sulfide on fundamental absorption edge and fine structure obtained from gaseous phase in inert atmosphere 03 p0407 A66-12405  
Jahn-Teller effect in excited 4-T-2 state of trivalent Cr ions in ruby, discussing unilateral elastic strain effect splitting of pure electronic line 597 nm in U band 03 p0410 A66-12941  
X-ray single crystal diffraction technique determination of structure of pyridinium dicyanomethylide 04 p0472 A66-13364  
Transport effects in semimetals and narrow-gap semiconductors including nonlinear, thermomagnetic and superconductive effects and tunneling 04 p0559 A66-13451  
Thin surface films covering structure, nucleation, growth and epitaxy observation techniques such as electron and X-ray diffraction field emission, field ion microscopy, etc 04 p0559 A66-13452  
Crystal structure of porphine determined

by X-ray diffraction analysis 04 p0473 A66-13642  
Crystal structure of ammonium tricyanomethide determined by X-ray diffraction 04 p0474 A66-13833  
Hall effect of bismuth evaporated films, discussing structural dependence of sign and magnitude, effects of pathlength, impurities, gas adsorption and experimental techniques 05 p0729 A66-14510  
Impurity concentration fluctuations in silicon crystals, discussing striation visualization technique and Czochralski method 05 p0729 A66-14512  
Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 05 p0731 A66-14656  
Oxygen alloyed gallium arsenide, explaining anomalous mobility distribution in crystals during fusion in presence of oxygen 05 p0731 A66-14658  
Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 05 p0731 A66-14661  
Chromium nickel steel hardening as result of martensitic transformation and aging 05 p0701 A66-14861  
Anomalous scatter and energy loss of ions penetrating crystalline semiconductors 05 p0737 A66-15303  
Crystalline structure of simplest lanthanum and samarium silicates 05 p0702 A66-15337  
Semiconductor crystals, discussing dispersion property changes due to pulsed ruby laser radiation 05 p0697 A66-15354  
Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/APM-9] 05 p0776 A66-15431  
Output characteristics of thermionic converter and improvement of performance by using emitter surfaces with particular crystallographic orientation 05 p0617 A66-15553  
Evaluation of absolute free energy of rigid-disk system at very high compression 05 p0740 A66-15772  
Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 05 p0704 A66-15820  
Crystal and molecular structure of chlorotetraammine /sulfur dioxide/ ruthenium chloride 06 p0820 A66-15939  
Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 06 p0896 A66-16539  
Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 06 p0924 A66-16540  
Pendellosung fringes in elastically deformed silicon, observing X-ray wavefield beam interference upon superimposition on crystal exit surface 07 p1098 A66-17815  
Diamond-like semiconductors in glassy state, investigating structure and characteristics of cadmium-germanium-arsenide 07 p1106 A66-18383  
Ductility in polycrystalline single phase ceramics, noting behavior at room and high temperature of single crystal structure, dislocation, etc 07 p1054 A66-18498  
Oxidation products of thin foils of titanium carbide, noting epitaxial growth relationship between titanium carbide, transient oxides and titanium oxide 07 p1052 A66-18512  
Diffuse X-ray scattering in crystal structure of Ni-Be and Cu-Be alloys during first stage of aging due to anisotropic monoclinic lattice distortions 08 p1235 A66-18589  
Beryllium ductility in fabrication as affected by single crystal slip and fracture and improvement by grain control 08 p1238 A66-18851  
Beryllium oxide properties, fabrication and application 08 p1243 A66-18852  
Martensitic transformation in titanium alloys containing eutectoid-forming elements, noting elastic properties, shear modulus, etc 08 p1239 A66-18906  
Crystal structure and allotropic

transformation of cobalt and thermal, thermodynamic, electrical and magnetic properties 08 p1240 A66-18961

Heterojunction preparation by vacuum evaporation, describing epitaxial deposition of germanium on gallium arsenide substrate 08 p1270 A66-19058

Relation of compressibility with cohesive energy and molecular volume for dielectric solids, noting confirmation of relation for 45 crystalline compounds 08 p1244 A66-19254

Electrical capacity of galvanic cell and crystal habit and surface property effects on porous cadmium hydroxide electrode electrochemical properties 08 p1171 A66-19644

Built-in surface charge on thermally oxidized silicon as function of exposed crystal face orientation 09 p1411 A66-19929

Orientation effect on zinc diffusion rate in p-n junctions, using gallium arsenide single crystals as initial material 09 p1412 A66-19996

Anisotropy of balanced photoelectromagnetic emf in p-type germanium sample in which normal to illuminated surface coincides with crystallographic axis 09 p1413 A66-20002

Ceramic and graphite fibers and whiskers, Air Force sponsored monograph 09 p1392 A66-20475

Phase recrystallization effect on structure and mechanical properties of cast monophasic titanium alloys 09 p1389 A66-20614

Semiconductor crystals, discussing dispersion property changes due to pulsed ruby laser radiation 09 p1387 A66-20895

Structural anisotropy coefficients of crystallization in carbon-graphite materials from X-ray and linear expansion data 10 p1548 A66-21240

Vapor etching of gallium arsenide crystals with hydrogen chloride, noting usefulness in pretreatment for epitaxial substrates 10 p1575 A66-21358

Mechanical and micromechanical behavior of bulk polycrystalline boron, emphasizing fracture stress and microstrain behavior relation to materials response 10 p1548 A66-21727

Barium titanate transition front structure, noting similarity to ferroelectric and nonferroelectric crystal structure 10 p1582 A66-21881

Transition front movements in barium titanate, noting dependence of velocity on rate of heating and thermal gradients 10 p1582 A66-21882

Metal structure analysis in terms of elementary electron and ion particles 10 p1547 A66-22054

Structures and crystallization processes of semiconductor vanadium phosphate glasses of various composition, using electron paramagnetic resonance 11 p1720 A66-22282

X-ray analysis of neutron irradiated quartz crystals at various temperatures, showing atomic displacements 11 p1749 A66-22283

Energy band structure via reflection spectra of crystals of ternary zinc compound containing elements of Periodic Groups II, IV and V 11 p1750 A66-22342

Nucleation during pulse remagnetization of thin films, showing domain structure of formation, growth of nuclei, etc 11 p1752 A66-22797

Quasi-equilibrium states during pulse remagnetization of thin ferromagnetic films, discussing domain structure 11 p1752 A66-22798

Changes in domain structure of cobalt films as function of substrate temperature during sputtering and transformation from poly- to single-crystal structure 11 p1753 A66-22803

Domain structure of single-crystal epitaxial iron films as function of perfection of crystalline structure, using Lorentzian electron microscopy, noting two-axis anisotropy 11 p1753 A66-22806

Crystalline structure and magnetic properties of single-crystal films of iron-nickel alloys, for application as memory elements of computers 11 p1753 A66-22807

Domain structure and reverse magnetization of single crystal nickel films 11 p1754 A66-22816

Laser crystals prepared economically by

splitting along cleavage planes 11 p1714 A66-23293

Zeta phase in tantalum-carbon system, noting diffusionless transformation of carbon-deficient lattice under compressive stress 12 p1892 A66-23566

Microstructure viewed on several different successive parallel planes simultaneously, using multiple positive or negative transparencies, obtaining three-dimensional photomicrograph 12 p1892 A66-23626

Optical absorption and dielectric loss measurements in KCl doped SrCl sub 2 single crystals, determining involvement of impurity vacancy dipolar complexes in optical conversion of F centers to Z centers 12 p1926 A66-23718

Jump conductivity of lightly doped p-germanium single crystals, noting Hall coefficient temperature dependence and specific resistance with low donor and acceptor concentrations 12 p1927 A66-23724

Superheating of linear high polymer polyethylene crystals, evaluating time dependence of melting, differential thermal analysis and calorimeter techniques 12 p1899 A66-23937

Age hardening response correlated with structural observations of iron-nickel-cobalt alloys 12 p1895 A66-24374

Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 12 p1930 A66-24461

Polarization of particle counters, noting distortion of internal fields through pre-irradiation spatial polarization 12 p1883 A66-24788

High temperature crystallization processes and physicochemical properties of lithium aluminosilicate glass 12 p1900 A66-24859

Sequence of crystallization during heat treatment of ternary system of lithium aluminosilicate glasses 12 p1900 A66-24860

Chemical durability of lithium silicate glass as result of crystallization 12 p1901 A66-24864

Grain boundary role in high temperature fracture behavior of magnesite, noting temperature and orientation dependence of shear strength 12 p1897 A66-24920

Aging effect on structure of cobalt alloys annealed at 1200 degrees C suggests formation of laminar regions 12 p1898 A66-25030

Threshold energy for avalanche multiplication in semiconductors obtained from energy band structure and crystal momentum conservation in ionization process 13 p2157 A66-25035

Length changes in electron irradiated high purity germanium at liquid helium and nitrogen temperatures, noting large initial expansion 13 p2157 A66-25047

Partial dislocation detection in silicon, using scanning electron beam technique 13 p2159 A66-25069

Photoelectric properties and relaxation time of polycrystalline layers of cadmium sulfide are highly dependent on substrate temperature 13 p2160 A66-25097

Hot wire-drawn beryllium recrystallization analyzed by hardness measurement and micrography, noting dependence on initial deformation 13 p2107 A66-25358

Iron selenides of nickel arsenide structure analyzed, noting dependence of semiconductor characteristics on iron gap arrangements 13 p2164 A66-25471

Transmission electron microscopy determination of structure and morphology of oxide films during Ti oxidation initial stages 13 p2107 A66-25584

Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587

Cadmium sulfide single crystal preparation by zone sublimation method, analyzing structure via X-ray diffraction and obtaining photosensitivity curves 13 p2165 A66-25680

X-ray analysis of molybdenum-nickel-silicon ternary crystal structure 13 p2108 A66-25683

Photoconductivity and optical transmission of cadmium-indium-telluride, noting temperature dependence 13 p2165 A66-25685

Effect of crystalline state and structural orientation of polymer on endurance of couplings with polytetrafluoroethylene components, analyzing dry friction and wear

on interfaces 13 p2113 A66-25912

Cadmium sulfide and cadmium selenide, discussing optical absorption, energy band structure, effective band-masses and composition changes of crystals in polarized light 13 p2167 A66-25931

Oxygen alloyed gallium arsenide, explaining anomalous mobility distribution in crystals during fusion in presence of oxygen 13 p2167 A66-25933

Cadmium sulfide and cadmium selenide recombination centers, discussing temperature dependence of electron capture cross sections 13 p2168 A66-25936

Morphology and structure of gallium arsenide crystals containing germanium core grown by iodine transport process in closed tube 13 p2170 A66-26587

Fine-grain structure effect on microwave power absorption thresholds of ferrimagnetic garnets and spinels 14 p2350 A66-26880

Texture and anisotropic age hardening to improve mechanical properties of AlMgSi alloys 14 p2313 A66-27011

Properties of hydrothermally grown single crystals of tetragonal lead monoxide, with contacts applied by metal evaporation 14 p2359 A66-27099

Growth kinetics and structure of evaporated tin thin films on amorphous carbon film, noting three stages after nucleation, archipelago, labyrinth and closing 14 p2359 A66-27102

Semiconductor properties of reduced barium titanate analyzed by electron spin resonance measurements at various temperatures 14 p2359 A66-27132

Chemical and physical properties of samarium dicarbide, prepared by heating samarium sesquioxide with graphite, using X-ray analysis, hydrolytic studies, etc, noting structure 14 p2362 A66-27465

Hypothesis that system sodium fluoride-yttrium trifluoride serves as model for each of binary systems of rare earth trifluorides SmF3 to LuF3 with sodium fluoride 14 p2315 A66-27466

Fluorescent lifetimes of neodymium, ytterbium and samarium incorporated in ordered perovskite-type compounds determined, noting crystal structure potential for laser emission 14 p2367 A66-27976

Electron spin resonance of gamma irradiated single crystal of barbituric acid dihydrate, noting formation and Hamiltonian parameters of free radicals 14 p2367 A66-27979

Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 15 p2558 A66-28565

Martensitic transformation of Ni-Fe alloy from fcc to bcc lattice, noting stress produced by chemical free energy difference between austenite and martensite structure 15 p2520 A66-28649

Cleavage behavior of solid solution alloy Ta-Mo, noting electric resistivity, tensile properties, lattice parameters, diffraction coefficients, etc 15 p2520 A66-28650

Anisotropic vector functions of vector argument connected with crystal symmetry 15 p2526 A66-28951

Electron spin resonance saturation causing sharp decrease of DC resistance for reduced rutile crystals 15 p2567 A66-29401

Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 15 p2524 A66-29986

Exciton absorption lines and long wave intrinsic edges of single-crystal CdSe and CdS at low temperatures 15 p2569 A66-29987

Magnetic and structural properties of monoferrite films prepared by cathode sputtering, noting electron diffraction and micrograph patterns of films, crystal structure, etc 16 p2774 A66-30690

Effect of annealing in magnetic field on structural and magnetic properties of thin films prepared from nickel alloy 16 p2774 A66-30695

Temperature dependence of domain structure of thin ferromagnetic films prepared by thermal evaporation in vacuum 16 p2774 A66-30696

Temperature dependences of coercive force, hysteresis loops and domain structure of thin iron-gadolinium alloy films 16 p2774 A66-30698

Domain structure and hysteresis loops of thin iron-gadolinium films of different thicknesses 16 p2775 A66-30699

Lattice distortions and field gradients in alkali halide solutions, noting discrepancy in calculation of electric field gradients 16 p2775 A66-30731

Interband optical absorption in germanium in crossed electric and magnetic fields, noting band perturbation theory, differential spectra, Stark broadening, experimental techniques, etc 16 p2776 A66-30736

Thermal conductivity of polytetrafluoroethylene, noting temperature effect, crystal structure, etc 16 p2730 A66-30854

Silicon, quartz and germanium single crystal density determined via hydrostatic weighing method 16 p2777 A66-30933

Dependence of magnetostriction coefficient for diamagnetic materials on change of Fermi surface with momentum and deformation parameter 16 p2777 A66-31035

Statistical effects during generation of second harmonic in optically transparent crystals, noting coefficient of correlation between harmonic and fundamental radiation power of solid state laser 16 p2747 A66-31167

Nozzle guide vanes of ZrS-6K alloy in thermal stress induction of surface layer crystal structure changes 16 p2727 A66-31531

Semiconductor lasers with high power efficiency obtained via electron beam excitation on crystals of mixed cadmium-sulfide-selenide alloy 16 p2720 A66-31533

Epitaxial growth of single crystal, impurity free metal films using clean alkali halide surfaces in ultrahigh vacuum 16 p2784 A66-31534

Vapor growth of Ge on Ge, GaAs and Si substrates, noting preparation methods, characteristics, etc 16 p2786 A66-31686

Transverse reluctance of bismuth telluride in pulsed magnetic fields revealing fine structure of Shubnikov-De Haas oscillations interpreted as spin-splitting of Landau levels 16 p2786 A66-31695

Electron mobility in p-type indium antimonide, noting entrainment of minority carriers by majority 16 p2789 A66-31784

Epitaxial growth techniques for silicon and germanium, discussing hydrogen reduction methods, doping and impurity control, etc 17 p2976 A66-32259

Doping and firing atmosphere effects on electric resistivity of polycrystalline barium titanate, noting oxidation of small grain and positive temperature coefficient effect on large grain 17 p2978 A66-32404

Epitaxial growth of semiconductors in isothermal system approaching thermodynamic equilibrium, noting growth parameters, activation energy, etc 17 p2886 A66-32495

Electric field influence on thin metal film growth inducing coalescence of three-dimensional island-like structure 17 p2979 A66-32632

Element distribution in cermet alloys of W-Ni-Fe system determined by X-ray spectral analysis 17 p2940 A66-32848

Phase relations in cobalt niobate-cobalt tantalate system noting structural characteristics, solubility, phase transitions, etc 17 p2940 A66-33062

Gamma irradiation effects on minority carrier lifetime in germanium, noting temperature effect 17 p2987 A66-33321

Recrystallization of Ge and Si thin films and structural changes due to electron bombardment and thermal annealing 17 p2988 A66-33456

Curve equation describing ray surface cutting by arbitrary plane of symmetry in crystals 17 p2989 A66-33486

Three-dimensional X-ray diffraction data to determine structure of crystal of potassium barium hexanitrocobaltate, discussing Jahn-Teller effect 17 p2871 A66-33489

Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems

## [ASME PAPER 65-WA/AMP-9]

Necessary and sufficient conditions for existence of direct and inverse piezoelectric effect in crystals and textures 18 p3153 A66-33629

Cadmium sulfide thin films as ultrasonic transducers, obtaining mixed or pure vibration modes via crystalline axis orientation 18 p3111 A66-34085

Structural chemistry of boron and compounds analyzed by X-rays, examining effects of increasing boron-to-metal ratio on boron-containing crystal structure 18 p3064 A66-34388

CW He-Ne laser measurement of light scattering in crystals noting laser output, performance and crystal imperfections 19 p3373 A66-35402

Orientation effect in GaAs injection lasers, noting emission characteristics and structural spectra 19 p3373 A66-35404

Magnetic properties and structure of ferromagnetic films obtained on single-crystal sodium chloride substrates heated to various temperatures during spray coating 19 p3438 A66-35497

Martensitic transformations in ferrous and nonferrous alloys, discussing kinetic and structural characteristics 19 p3380 A66-35848

Structural anisotropy coefficients of crystallization in carbon-graphite materials from X-ray and linear expansion data 19 p3388 A66-35863

Absorption spectra of pure and isotopic impurity crystals of naphthalene in region of first electronic and vibrational/vibron/transition 19 p3402 A66-36067

Crystal performance and mechanical noise reduction in pressure transducer in shock tube flow 20 p3558 A66-37423

Humidity effect on ferroelectric properties of barium titanate with tantalum oxide admixture, noting growth of dielectric constant and crystal polarization 20 p3617 A66-37553

Hyperfine structure of p-n junction phase boundaries in silicon according to electron microscopy data 20 p3620 A66-37693

X-ray analysis of crystal structure relationships among transition elements in binary and ternary aluminide alloys 20 p3586 A66-38092

Second-harmonic generation by focused laser beams based on experiments using He-Ne gas laser, noting SHG should be strongly peaked when focus is at either of crystal surfaces 21 p3746 A66-38554

X-ray analysis of lattice structure of terbium crystals at 120 to 300 degrees K 21 p3803 A66-39304

Existence of twins in single crystalline films of barium titanate, obtaining electron diffraction patterns 21 p3805 A66-39581

Optical spectrum of normal excitons in deformed and nondeformed n-type Ge single crystal layers for four orientations 22 p3964 A66-40306

Phase and chemical compositions of structural components forming in iron-nickel-chromium alloys with aluminum and titanium content 22 p3936 A66-40787

Heat resistance of coarse- and fine-grained D20 aluminum alloy 22 p3936 A66-40878

Angular variation of position of energy loss maxima in indium 23 p4110 A66-41180

Sectorial structure effect on current carrier concentration of germanium doped indium antimonide single crystals 23 p4112 A66-41286

Physical factors determining hardening of nimonic type alloy with high niobium content, discussing formation of intermetallic phase 23 p4080 A66-41385

Temperature homogenization effect on structure of industrial aluminum, determining mechanical properties dependency on Fe/Si ratio 23 p4081 A66-41403

Effect of manganese and zirconium additions on recrystallization temperature and grain size of aluminum alloys 23 p4081 A66-41404

Radiation, molecular orientation, crystallinity and molecular weight influences on thermoconductivity of high polymers 23 p4083 A66-41551

Zn diffusion effect on uniformly Mn-doped

GaAs wafer showing via radiotracer technique changes in impurity concentration profile 24 p4250 A66-42255

Deep /1-10 micron/ penetration of ion implanted donors in silicon, measuring density profiles via C-V method and parameter of penetrating tail section 24 p4250 A66-42256

Cs-Sb film thickness measurement method in various compositions and relation between thickness and composition 24 p4251 A66-42301

Anisotropic thermoelectric power in semiconductors as result of combined phonon and impurity scattering or in presence of carrier with anisotropic effective mass 24 p4252 A66-42352

Optical properties and energy structure parameters calculation for CdS-CdTe crystals 24 p4253 A66-42362

Magnetostriction of yttrium terbium ferrite garnets, noting absence of correlation between temperature dependences of magnetostriction and magnetization for high Tb content 24 p4256 A66-42518

Divergent-beam diffraction geometry for interpretation of Kossel diffraction patterns in space group assignment lattice parameters and structure factor evaluation 24 p4239 A66-43169

Diffusion process of plasticity in metals, noting Frenkel vacancy mechanism 01 p0158 A66-11018

Combined effect of carbon impurity atoms and neutron radiation on structure of molybdenum studied by transmission electron microscopy 02 p0246 A66-12193

Equivalence of stress and electron-irradiation induced defects in degenerate p-n germanium junctions as indicated in similar voltage-anneal characteristics 04 p0562 A66-13751

Ultrapurification discussing definition, purification techniques, analytical techniques /e.g. emission and mass spectroscopy/ and role in biochemistry, metals and materials 04 p0474 A66-13867

Radiative recombination in silicon containing structural defects in lattice 04 p0569 A66-14353

German text on electronic semiconductors introducing physics of rectifiers and transistors 04 p0570 A66-14458

Boundary layer thickness responsible for anomalous lattice distortions of colloidal barium titanate 04 p0571 A66-14492

Anelasticity and relaxation time in metals and nonmetals, particularly as manifested by internal friction peak as function of frequency or temperature in study of crystalline material defects 05 p0772 A66-14548

Radiation damage of p-type silicon investigated by Hall effect, noting dislocation density and annealing behavior 05 p0735 A66-14963

Possible processes of non-radiative decay of excitons on ionized donors and acceptors in semiconducting and dielectric crystals 05 p0737 A66-15160

Radiation damage to crystalline lattices by energetic particles, discussing consequences on physical behavior of solids, particularly ceramics 05 p0738 A66-15471

Austenitic chromium-nickel-manganese steel, describing temperature effects on crystal structure and experimental techniques 05 p0704 A66-15819

Isochronal annealing from 80 to 360 degrees K of defects induced by 45-meV electrons in floating zone and pulled n-type silicon 05 p0742 A66-15873

Potential correction effect on ground states of P and ionic-S impurities in silicon discussed in terms of cavity model 06 p0930 A66-17051

Metastable defect annealing in germanium by bombardment with short pulse of high-energy electrons from Van de Graaff generator 06 p0932 A66-17115

Length change, X-ray lattice parameter, small angle X-ray scattering, electron microscopy and thermal conductivity measurements related to radiation-induced

defects in semiconductors 06 p0933 A66-17117  
 Diffusion of Li and Cu in GaAs crystals indicates reaction involving divacancies in donor-doped and undoped 06 p0935 A66-17132  
 Influence of defects introduced during fast neutron irradiation on electronic behavior of SiC, examining reasons for deterioration of SiC semiconductor 06 p0936 A66-17137  
 Point defect mobility and annealing in irradiated germanium and silicon by electron or gamma ray irradiation 06 p0937 A66-17140  
 Drift mobility of radiation induced defects in silicon between zero and 120 degrees C 06 p0937 A66-17141  
 Nature and mobility of point defects present in silicon at high temperature and interactions between them 06 p0937 A66-17142  
 Electronic states of single defects in diamond calculated by comparing electronic states of single vacancies and single interstitial carbon atoms 06 p0938 A66-17148  
 Anisotropy of electron displacement energy in silicon specimens by measuring changes in net carrier concentration caused by steady monoenergetic electron irradiations 06 p0939 A66-17152  
 Isolated vacancy interstitial pairs produced in ZnSe lattice by electron bombardment at low temperature 06 p0939 A66-17153  
 Nature and yield of photon and neutron induced defects in semiconductors determined from changes in electrical properties 06 p0939 A66-17154  
 Characteristics and properties of defects induced in silicon and germanium by 10-to 60-mev electrons and 20-to 130-mev protons 06 p0939 A66-17155  
 Oxide ceramics fabrication, with particular attention to microstructure 07 p1053 A66-18296  
 Diffraction contrast analysis, using transmission electron microscope, of two-dimensional defects present in mechanically damaged silicon after annealing 07 p1109 A66-18516  
 Imperfection formation in epitaxial gold films, observing crystal-lattice dislocations due to rotation and displacement misfits between neighboring islands of deposit film 07 p1110 A66-18517  
 Semiconductor microinhomogeneities detected by device using fluctuations of impurity concentrations during process of crystal growth 08 p1223 A66-19287  
 Influence of crystal-lattice defects on Young's modulus and damping constant of aluminum 09 p1388 A66-19980  
 Effect of electric field and crystalline dimensions on position of optical absorption edge in cadmium sulfide thin films obtained by vacuum deposition 09 p1412 A66-19995  
 Impurity-photoconductivity spectra of silicon single crystals containing lithium and arsenic impurities 09 p1413 A66-19999  
 Structure defects in silicon crystals which cause X-ray double images studied, using X-ray diffraction topography and etching technique 10 p1574 A66-21347  
 X-ray analysis of zinc diffusion induced defects in gallium 10 p1576 A66-21547  
 Boron filament tensile and flexural strength affected by surface and internal flaws with chemical polishing 10 p1548 A66-21728  
 IR absorption spectra of oxygen-defect complexes in irradiated silicon 10 p1581 A66-21737  
 Scanning electron microscope observation of electrical leakage paths due to crystal defects in silicon diodes 11 p1668 A66-23028  
 Localized enhanced diffusion in vacancy model to explain Emitter Dip Effect (EDE) in n-p-n silicon transistor 11 p1871 A66-23350  
 Oxidation rate and heat treatment effect on density of states of silicon surface potential in silicon-silicon dioxide system 12 p1932 A66-24825  
 Defect analysis by device sectioning, noting techniques, application in crystallography, electronics, etc 12 p1845 A66-24849  
 Annealing of deformed sodium, noting activation energy distribution annealing kinetics, etc 12 p1897 A66-24923  
 Defects in gallium arsenide crystals studied

by internal friction with measurements showing damping peak at 140 degrees C 13 p2157 A66-25045  
 Microstructure of epitaxial germanium films deposited on calcium fluoride substrates, noting parameters of deposition 13 p2158 A66-25063  
 Plastic deformation effects on preaged aluminum-copper alloy structure subjected to 40-75 percent compression 13 p2110 A66-25965  
 Donor impurity effect on direct-indirect transition in gallium arsenic phosphide, particularly at low temperature 13 p2170 A66-26590  
 Vacancies and agglomeration effect on integral characteristics of anomalous X-ray transmission 14 p2357 A66-27077  
 Self-compensation in electric conductivity and other properties of binary semiconductor with temperature variations 14 p2357 A66-27079  
 Dislocation-free Si crystal defects produced by fast neutron bombardment 14 p2359 A66-27092  
 Fracture mechanics, discussing crystal structure defects, particular dislocation, hardening, lattice vacancies, interstitials, etc 14 p2316 A66-27770  
 Thermal expansion coefficient of doped germanium, noting correlation between impurity used and coefficient variation 14 p2368 A66-28244  
 Radiative recombination in silicon containing structural defects in lattice 14 p2368 A66-28251  
 Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 15 p2557 A66-28560  
 Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 15 p2557 A66-28563  
 Heat treatment effect on photoelectric properties of silicon with electron-induced structural defects 15 p2560 A66-28668  
 Optical inhomogeneities in n-type gallium arsenide crystals containing growth axis examined in transmission, using IR image converter, noting band gap changes 15 p2562 A66-28720  
 X-ray study of component atomic scattering and structural defects for titanium and carbide atoms in titanium carbide 15 p2520 A66-28754  
 Ion bombardment damage of molybdenum sulfide lattice studied by transmission electron microscopy, noting broadening of extinction contours and dislocation lines 15 p2567 A66-29404  
 Ionized electron centers in irradiated lithium fluoride crystals investigated by observing emission and absorption spectra 15 p2568 A66-29641  
 Magnetostriction, negative anisotropy and chainlike domain walls along line defects in thin permalloy films 16 p2776 A66-30803  
 Arsenic overpressure, obtained by including metallic arsenic along with gallium arsenide, depresses defect concentration identifying primary defect species as arsenic monovacancies 16 p2779 A66-31086  
 Copper and Armco iron structural defects during cyclic deformation studied by electron-microscope and optical-microscope techniques 16 p2727 A66-31528  
 Photo-Hall effect and photoconductivity on compensated p-InSb at low temperatures, examining temperature dependence of carrier mobility 16 p2788 A66-31773  
 Mossbauer effect and optical analog in five different recombination centers of silicon 16 p2789 A66-31785  
 Superheating crystallization of ethylene-propylene and ethylene-butene-1 copolymers and extended chain morphology 17 p2943 A66-32557  
 Structural defects in epitaxial films noting nucleation mechanism, stacking faults, growth defects, etc 17 p2985 A66-33157  
 Scanning electron microscope to examine crystal mosaic structures and lasing properties of gallium arsenide laser diodes 17 p2937 A66-33300  
 Polycrystalline nickel aluminide lightly deformed at 77, 298 and 900 degrees K exhibit fine slip band structure with mostly screw dislocations 18 p3121 A66-33747

Radiation damage in solids including crystal lattice defects, thermal migration, channeling and focusing effects, etc 18 p3155 A66-34136  
 Base drive and internal structural irregularities of transistor effect on internal current distribution and second breakdown characteristics of device 19 p3312 A66-35343  
 Planar and needle-like defects in natural quartz examined via X-ray diffraction, noting composition and diffraction contrast when observed from different Bragg planes 19 p3434 A66-35403  
 Dispersion degree of coherent scattering regions, microdeformation and packing defects probability in fcc metals determined, using approximation method 19 p3438 A66-35496  
 Factors affecting fracture characteristics of metals at cryogenic temperatures and fracture mechanics for predicting performance of defect-containing structures 19 p3380 A66-35847  
 Structural defects in infiltrated tungsten matrices related to process procedures 19 p3382 A66-36122  
 Gamma irradiation from Co 60 effect on indium antimonide, determining defect formation on dose and limiting position of Fermi level for n-and p-type material 20 p3617 A66-37552  
 Germanium damage due to low energy He, Ne, Ar and Kr ion bombardment 20 p3623 A66-38392  
 Fast-neutron irradiation effects on photoconductivity spectra and induced crystal structure defects for n-and p-type gallium arsenide single crystals 20 p3624 A66-38415  
 Relation between electrical properties and structural features of gold-and antimony-doped germanium single crystals, noting abrupt decrease in mobility 21 p3799 A66-38928  
 Steady state donor-acceptor recombination rate and effects on diode current and injection electroluminescence, using Shockley-Read-Hall semiconductor phenomenological model 21 p3800 A66-38993  
 Isochronal and isothermal stage II recovery in high energy electron irradiated n-type InSb semiconductor, based on Hall coefficient and electroconductivity 21 p3800 A66-38994  
 Heat treatment of silicon at high temperatures leads to donor centers affecting electric and photoelectric properties 21 p3802 A66-39157  
 IR radiation absorption in imperfect ionic crystals 21 p3802 A66-39158  
 Cyclotron resonance study of electron scattering by thermal acceptors in quenched Ge 21 p3805 A66-39567  
 Inhomogeneities in silicon crystal prisms studied by method of photoelectric conductivity 22 p3961 A66-39998  
 Imperfection of silicon dioxide layers caused by dust particles during thermal oxidation of silicon, measuring breakdown voltage 22 p3961 A66-39999  
 Diffusion process involving formation and subsequent migration of series of parallel shear planes within crystal for higher oxides of niobium, tungsten, molybdenum and titanium 22 p3934 A66-40011  
 Neutron irradiation-induced defects in vapor deposited niobium stannide and effects on current-carrying capacity 22 p3962 A66-40083  
 Self-compensation in electric conductivity and other properties of binary semiconductor with temperature variations 22 p3967 A66-40835  
 Dislocation-free Si crystal defects produced by fast neutron bombardment 22 p3967 A66-40848  
 Electron diffraction study of structural defects in cubic phases in epitaxial tantalum oxide thin films 23 p4112 A66-41281  
 Structural defects arising during growth and heat treatment of CdS single crystals studied, using anomalous transmission of X-rays 23 p4112 A66-41284  
 Crystal defects and performance in ruby laser, measuring coherence function of light and output energy and crystal homogeneity 23 p4077 A66-41291  
 Autoradiography used to determine

dislocation density in germanium, silicon and copper single crystals, with aid of tagged atoms 24 p4257 A66-42535

**CRYSTAL SURFACE**

Light effect on surface conductivity of gold-alloyed germanium with clean surface 01 p0125 A66-10776

Quantum-mechanical properties derived for isolated donor atom located on surface of dielectric crystal, noting hydrogenic wave function with planar nodes 02 p0271 A66-11484

Optical field effect in analyzing band structure and surface physics of silicon, noting reflectance 04 p0560 A66-13723

Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface impurities 04 p0569 A66-14354

Effect of sample geometry on frequency of helicon waves in lead telluride at low temperature 07 p1101 A66-18201

Contact-making process in cadmium sulfide crystals, examining influence on plasma electron efficiency in glow discharge work 08 p1272 A66-19243

Work function of A and B faces of /111/ surface of gallium arsenide in dry and humid media 08 p1274 A66-19317

Potential distribution at germanium-electrolyte interface in iodide ion solutions 08 p1278 A66-19824

Electron microscope observation of active centers at surface of semiconductor crystals, applying to p-type Si single crystals 09 p1412 A66-19989

Extrinsic and intrinsic surface states and photoelectronic properties of insulating CdS crystals 09 p1427 A66-20256

Rapid cooling induced stress leads to separation between tin and germanium, creating pure germanium surface at plane of separation 09 p1427 A66-20366

Contact potential difference measurements between aged polycrystalline tungsten foil and polished single crystal disk and work function calculation for /110/ oriented surface 10 p1582 A66-21888

Light effect on surface conductivity of gold-alloyed germanium with clean surface 11 p1749 A66-22288

Semiconductor surface physics, with emphasis on FET electrical surface phenomena 11 p1759 A66-23462

Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface impurities 14 p2368 A66-28252

Diffraction pattern study of titanium single-crystal surface 15 p2566 A66-29389

Momentum and energy accommodation for hypervelocity gas particles on crystal surface, using Lennard Jones potential and approximating lattice by system of independent forced harmonic oscillators 16 p2752 A66-30388

Pulse field effect technique investigation of electrical properties of surface states on practical Si surfaces with various surface 16 p2781 A66-31356

Electric conductivity of CdS single crystals in atmosphere, dry air, oxygen, water vapor, carbon dioxide and in transverse electric field 16 p2786 A66-31730

Vacuum thermal decomposition of InSb and GaSb surfaces, noting evaporation rates 20 p3624 A66-38411

MOS work function difference effect on surface charge density and orientation calculations for Si-silicon dioxide interfaces 22 p3962 A66-40050

Oxide film surface effect on electrophysical characteristics of Ge surface, noting potential changes and recombination rate 22 p3965 A66-40313

Adhesion force of silicates in ultrahigh vacuum as function of load force, temperature, surface roughness and crystal orientation 23 p4131 A66-41848

Electron correlation analysis method applied to interelectronic repulsion effect on localized electrons near ideal surface of seminfinit diamond-like crystal 24 p4252 A66-42349

**CRYSTALLIZATION**

**SA RECRYSTALLIZATION**

Equations describing crystallization process in low level clouds as function of ice crystal

penetration from upper clouds or from artificial seeding 02 p0254 A66-12023

Sliding friction measurements of some layer lattice compounds in ultrahigh vacuum [ASLE PREPRINT 65-LC-19] 02 p0237 A66-12251

Welding units using ultrasonic vibrations to improve crystalline structure of welds produced by automatic submerged-arc welding process 03 p0375 A66-13122

Crystallization kinetics in supercooled cloud under natural conditions 11 p1725 A66-22196

Mechanical properties of lithium silicate glasses at different stages of crystallization and relation to microstructure 12 p1900 A66-24862

Crystallization sequences in alkali aluminogermanate glass 14 p2318 A66-26947

Sliding friction measurements of some layer lattice compounds in ultrahigh vacuum [ASLE PREPRINT 65-LC-19] 16 p2713 A66-30569

Changes in massive amorphous boron filaments by heat treatments under reduced pressures and in presence of inert gases 17 p2943 A66-32852

**CRYSTALLOGRAPHY**

Laser crystals prepared economically by splitting along cleavage planes 01 p0084 A66-11046

Possible materials for second harmonic generation and laser action discussing centrosymmetric and piezoelectric crystals and single crystal plate with alternate layers of noncentrosymmetric composition 03 p0378 A66-12940

Vacuum and low temperature X-ray camera for structural analysis of oxidized materials 04 p0518 A66-13490

Molecular configuration of bis /ortho-dodecacarborane/ determined by three-dimensional X-ray crystallography 06 p0822 A66-16631

Implementation of Kossel line technique of crystallographic analysis and lattice parameter measurement in study of lattice defects in semiconductor crystals 06 p0935 A66-17133

Resistance-grown pyrolytic graphite in crystallographic, thermal and electrical measurements 08 p1244 A66-19223

Holography, X-ray crystallography and correspondence between optical image synthesis and heavy atom technique 11 p1707 A66-23194

Laser crystals prepared economically by splitting along cleavage planes 11 p1714 A66-23293

Betti numbers shown to be equal to binomial coefficients of torus, determining minimal set of van Hove critical points 15 p2559 A66-28624

Static uniaxial compression effect measurement along /100/, /110/ and /111/ on electroreflectance spectrum of gallium arsenide, using electrolyte technique 16 p2777 A66-30951

Crystallographic polarity dependent rectification in ZnS single crystals 18 p3153 A66-33610

**CUBANE**

Thermodynamic properties and appearance potentials of cubane 10 p1495 A66-21166

**CUBIC CRYSTAL**

**SA BODY CENTERED CUBIC /BCC/ CRYSTAL**

**SA FACE CENTERED CUBIC /FCC/ CRYSTAL**

**SA GRUNEISEN CONSTANT**

Energy accommodation coefficients calculated for gas particles interacting with cubic crystal lattice 04 p0548 A66-14142

Four elastic constants of Laval, Raman and Viswanathan theories dynamically measured in connection with behavior data on cubic crystals 05 p0781 A66-15736

Cubic transition-metal carbides and binding mechanism 13 p2166 A66-25835

Longitudinal Hall effect for two-band conduction and tensor relaxation times in cubic crystals 14 p2363 A66-27577

Phenomenological theory of longitudinal Hall effect in cubic crystals, assuming anisotropic dispersion law and tensorial relaxation time 20 p3618 A66-37560

**CUBIC EQUATION**

Cubic equations solved by tables compiled by Shumiagaskii and Herbert, Richards and Arsham 01 p0093 A66-10408

Approximate solution of cubic equation with real roots and applications in mechanics 17 p2947 A66-33328

**CULTURE TECHNIQUE**

Growth rate of microorganisms when rate changes with time, using continuous culture technique 02 p0183 A66-12016

Microbial contaminants evaluation for sterility in interiors of spacecraft, noting culturing technique 19 p3287 A66-35575

**CUMULUS CLOUD**

Hydrothermodynamic equations for calculating velocity, temperature and pressure fields and water content for model of stationary axisymmetric cumulus cloud 04 p0540 A66-13414

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 04 p0542 A66-14306

Numerical experiment where conditionally unstable environment was present for study of cumulus-like circulations developed from initial state 06 p0905 A66-16267

Cumulus modification experiment using station network, radiosonde and pilot balloon stations, cameras, radar data, etc 06 p0905 A66-16268

Numerical study of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17370

Stereo pairs taken at one-and two-minute intervals in photogrammetry of initiation of cumulus clouds over mountainous terrain 07 p1062 A66-17371

Probability of clear lines-of-sight estimated from sunshine and cloud cover observation 08 p1248 A66-19386

Cumulus cloud simulation by dropping solid piece of carbon dioxide into hot water 08 p1248 A66-19388

Cumulus to cumulonimbus convection over mountains and dissipation of stratus and sea fog when moving inland, using Tiros photographs 11 p1728 A66-22321

Conventional rawin, pibal and surface wind data compared with photoreconnaissance data, showing cumulus population and patterns over Florida 14 p2325 A66-26927

Entrainment problem, convective clouds and atmospheric thermal convection 14 p2325 A66-27280

Cumuli above sea in spite of stable layer between sea surface and cloud boundary, noting condensation around salt particles penetrating ascending thermals 14 p2327 A66-28219

Nonstationary models of cumuli and thermals in stratified atmosphere 18 p3130 A66-34606

**CURARE**

**S ALKALOID**

**CURIE TEMPERATURE**

Specific heat of gadolinium near Curie point, discussing measuring procedure and line drawing of calorimetric setup 01 p0118 A66-10252

Uniform compression effect on Curie temperature of ferromagnetic compound EuO 01 p0118 A66-10254

Spin wave instabilities in ferrite using parallel pumping and spin wave absorption near Curie temperature 01 p0121 A66-10539

Anomalous thermal expansion above and below Curie point as function of temperature in gadolinium single crystal 02 p0274 A66-11725

Curie temperature, static dielectric constant and electro-optic coefficient of large single crystals of barium titanate 03 p0411 A66-13007

Behavior of Ising model of ferromagnet in nonzero magnetic field, using high temperature series 04 p0563 A66-13815

Polycrystalline barium titanate ceramic with nonlinear resistance-temperature characteristic that rises steeply at ferroelectric Curie point 07 p1100 A66-18156

Ferroelectric properties of trissarcosine calcium chloride including dielectric measurement, Curie temperature region, etc 08 p1270 A66-19009

Magnetocrystal anisotropy of hexagonal ferromagnetic substances in neighborhood of Curie point 08 p1273 A66-19249  
 Uniform compression effect on Curie temperature of ferromagnetic compound EuO 13 p2168 A66-25971  
 Change in heat capacity at Curie point for ferrites 14 p2369 A66-28331  
 Flame spraying method for conversion of pure barium titanate into glass, noting dielectric Curie temperature 15 p2524 A66-29665  
 Kinetic energy causing anomalous increase in thermoelectric power in semiconducting p-type iron-chromium sulfide near Curie temperature 21 p3803 A66-39261

## CURING

## SA AGING

Curing problems of highly exothermic propellants investigated using mathematical models, detailing heat conduction and thermal properties 22 p3968 A66-39868

## CURRENT

S AIR CURRENT  
 S BEAM CURRENT  
 S CONVECTION CURRENT  
 S EARTH CURRENT  
 S EDDY CURRENT  
 S ELECTRIC CURRENT  
 S ION CURRENT  
 S IONOSPHERIC CURRENT  
 S LINE CURRENT  
 S RING CURRENT  
 S THERMAL CURRENT  
 S THRESHOLD CURRENT

## CURRENT AMPLIFIER

Pulsing technique enhances gain of silicon planar transistor low-current amplifiers 03 p0343 A66-13014  
 Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 06 p0860 A66-17196  
 High impedance semiconductor DC amplifier for use as measuring amplifier or operational amplifier 08 p1194 A66-19279  
 Electron processes in p-n-p-m transistor, relating capacitor current and emitter current and current amplification factor and emitter current 09 p1358 A66-20812  
 Backward-current amplification for transistors and effect on elements of Giacoletto equivalent circuit diagram 11 p1669 A66-23102  
 Mathematical approximation for alpha of drift transistors derived in terms of equivalent dominant pole and excess phase 11 p1671 A66-23245  
 Current amplification factor of filamentary transistor with intrinsic-conductance semiconductor base 14 p2255 A66-27751  
 Current amplification factors of micropower silicon planar transistors in low current common-base and common-emitter circuits 19 p3315 A66-35554

## CURRENT DENSITY

Release of persistent current energy by local heat injection and propagation through Nb-Zr wires 01 p0116 A66-10238  
 Microwave radiation and surface patterns formed during application of high currents and magnetic fields to n-InSb 01 p0117 A66-10244  
 Screening field and specific heat of superconductivity of sintered niobium stannide at temperatures above 4.2 degrees K 01 p0117 A66-10245  
 Current-current and current-density correlation functions for longitudinal oscillations of plasma in uniform magnetic field 01 p0109 A66-10319  
 Thermomagnetic current density in semiconductors and metals with temperature gradient 01 p0125 A66-10779  
 Germanium Esaki diode characteristics with aging, noting change in excess current after forward bias application 02 p0198 A66-11522  
 Palladium-hydrogen diffusion electrode noting current densities 04 p0460 A66-14034  
 Fluctuation-dissipation theorems for relating noise current power spectrum to first and third order conductivity tensors in thermal equilibrium and pumped Raman-active media 04 p0532 A66-14310  
 Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface

impurities 04 p0569 A66-14354  
 Effects of variable ionic mobility on current collection by cylindrical body and of fringing electric field on sheath size, noting role of diffusion phenomenon 05 p0722 A66-14724  
 Third harmonic component of current density in plasma in presence of electric and magnetic fields, analyzing generation and propagation of third harmonic of electromagnetic wave in magnetoplasma 05 p0724 A66-15188  
 Current and power gain of noble gas filled converter as affected by auxiliary emitter position to electrode and geometry 05 p0618 A66-15560  
 Cylindrical receiving and scattering antennas, determining current from admittance, charge distribution and near field for incident plane wave 06 p0827 A66-16036  
 Current-convective and flute instabilities of spatially inhomogeneous current in plasma, noting effect of current density and temperature 06 p0914 A66-16140  
 Electron temperature spectroscopy for atmospheric argon plasmas, sodium vapor seeded at high temperatures, noting relationship with current density 06 p0915 A66-16178  
 Porous gas-diffusion electrodes analyzed by using four different models, comparing resulting current density-polarization characteristics 07 p0990 A66-17239  
 Electrical and electroluminescent properties of GaAs diodes at voltages below onset of negative resistance 07 p1042 A66-17330  
 Excitation of semiconductor lasers by beam of fast electrons, discussing work of Shockley, Popov, Keldysh and Krokhin 07 p1043 A66-17337  
 Polarization and Alfvén wave attenuation in Doppler-like change in transverse wave velocity when drift current is passed parallel to magnetic field in solid-bismuth plasma 07 p1102 A66-18209  
 Electrode potentials and efficiency, noting significance, types and associated equations 07 p0996 A66-18468  
 Kinetic effects in fuel cells, discussing declining efficiency with increasing output, slow electron transfer effects, concentration polarization, etc 07 p0996 A66-18469  
 Miniature Rogowski coil probes for direct measurement of current density distributions in transient plasmas 07 p1037 A66-18494  
 Current driven instabilities slowed down by increasing electron-ion collisions in configurations with sheared magnetic fields 08 p1260 A66-18539  
 Time dependent variations in current carrier density and pulse behavior of drift transistor 08 p1188 A66-18625  
 Transit time effects in space-charge-limited silicon microwave diode 08 p1188 A66-18652  
 Two-dimensional distribution of carriers in semiconductor space charge region with current flow 08 p1267 A66-18654  
 Charging current density, electrolyte concentration and temperature during charge effects on porous cadmium electrodes in nickel cadmium cells 08 p1171 A66-19645  
 Zinc-silver oxide battery for extreme temperatures, noting electrode utilization efficiencies as function of current density 08 p1173 A66-19662  
 Saturation currents of silicon multichannel field effect transistors 09 p1350 A66-19914  
 /MUCH-FET/  
 Hall effect in germanium telluride samples with various current carrier concentrations at temperatures up to 500 degrees C 09 p1413 A66-20000  
 Tunneling density of states for superconductor in tunneling junction and carrying current at zero temperature 09 p1418 A66-20035  
 High current-carrying capacity and flux trapping in homogeneous alloy single crystal type II superconductors 09 p1421 A66-20057  
 Current density distribution in MPD arc jet exhaust measured, using Hall effect sensors [AIAA PAPER 66-116] 09 p1433 A66-20089  
 Breakdown of theta pinch in helium at

high initial densities without preionization 09 p1408 A66-20422  
 Magnetic and electric field and current density distributions in propagating current sheet [AIAA PAPER 66-200] 10 p1563 A66-21442  
 Superconductivity of composite of fine niobium wire in copper, measuring critical temperature, transverse magnetic field, current density, etc 10 p1575 A66-21535  
 Perturbation technique solution for MHD flow in closed regions with symmetric flow properties and axial boundary conditions 10 p1563 A66-21543  
 Digital computer solutions to rigorous linear equations system for current density by enforcing boundary conditions at discrete points in scattering body 10 p1497 A66-21589  
 Thermomagnetic current density in semiconductors and metals with temperature gradient 11 p1749 A66-22291  
 Electron-phonon coupling in piezoelectric semiconductors, obtaining electric field and current density vectors for application to ultrasonic amplification 11 p1750 A66-22401  
 Electron beam machines for thermal milling, noting factors influencing size of heat affected zones such as current density, lens aberration, temperature rise, etc 11 p1710 A66-22700  
 Integral equations describing multiple neutron Bragg reflections in mosaic crystal 11 p1742 A66-23409  
 Transference numbers in ionized gases, contrasting current flow in electrolytes with steady state current flow in weakly ionized gases 12 p1920 A66-24097  
 Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 12 p1929 A66-24456  
 Steady state structure and LF modes of infinitely long finite thickness cylindrical sheet of relativistic electrons in applied external field 12 p1873 A66-24576  
 Perturbation theory determination of third harmonic current density generated in plasma by AC field for velocity-dependent plasma 12 p1924 A66-24593  
 Boltzmann transfer equation for electrons and generation of nonlinear second harmonic of current density in inhomogeneous plasma 12 p1924 A66-24806  
 Current saturation in CdS crystals 12 p1931 A66-24814  
 Potential sweep method for organic and adsorption analyses, showing relation between galvanostatic and fast potential sweep transients, noting mathematical analysis of current-potential transients 12 p1812 A66-25000  
 Schottky and Langmuir laws verification by thermionic emission of lithium aluminosilicate with respect to current limitation caused by space charge 13 p2163 A66-25436  
 Irradiation effects by fast neutrons and gammas on collector cut-off current and base current at low current densities analyzed on silicon planar transistors 13 p2032 A66-25486  
 Current density in slightly ionized gas for arbitrary collision cross section 13 p2150 A66-26274  
 Nonlinear generation of sum and difference frequency components in current density in plasma due to two alternating electric fields 13 p2156 A66-26681  
 Gunn effect involving current oscillations higher than 1000 mc in GaAs crystal under applied electric field 14 p2355 A66-26920  
 Current dependence of recombination radiation intensity in gallium antimonide, determining radiation spectral distribution at low temperature 14 p2358 A66-27089  
 Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 14 p2340 A66-27148  
 Effect of liquation inhomogeneity on superconducting properties of ternary alloy, noting enhancement of critical current density in wire prepared from this alloy 14 p2314 A66-27367  
 Zirconium-niobium alloy analyzed by oxide replica technique, noting superconductivity and tunnel effect, determining relation

between superconductivity current critical density and sample structural characteristics 14 p2314 A66-27368

Current oscillations in germanium and silicon connected to compensated semiconductor, noting surface impurities 14 p2368 A66-28252

Electric current density in semiconductor, noting harmonic mixing of microwaves by warm electrons in germanium 15 p2564 A66-28875

Current-convective and flute instabilities of spatially inhomogeneous current in plasma, noting effect of current density and temperature 15 p2556 A66-29870

Effect of temperature gradient at surface of metal on thermionic emission current 16 p2778 A66-31079

Laser cavity output optimization for maximum external quantum efficiency showing dependence on length and reflectivity for given current density 16 p2720 A66-31535

Origin of polarization of radiation from GaAs diodes, noting intensity dependence on current density and effect of anisotropic electron velocity 16 p2667 A66-31770

Undepleted current carrier effect on characteristics of inverse p-n junction 17 p2976 A66-32069

Electron velocity distribution in ionized gas under alternating electric field as function of density, temperature, etc, including effects of recombination, ionization, etc 17 p2960 A66-32426

Electric current density in ionizing discharge layer determined, using multifluid equations of conservation of momentum and gas mass 17 p2967 A66-32435

Axially symmetric or two-dimensional electrode system with emitting surface, discussing convergence and accuracy criteria of iteration methods 17 p2887 A66-32700

Harmonic series solution for electromagnetic scattering by unidirectionally conducting helical sheath when incident field is E-polarized 18 p3065 A66-33530

Nonlinear generation of combination frequencies due to strong uniform parallel electric fields in homogeneous plasma 18 p3142 A66-33918

Equation explaining polarization of solid electrolyte cell with silver plate anode, noting role of current density 18 p3056 A66-34903

Electron-phonon interaction current density, thermodynamic Green function and other electromagnetic properties of superconductors, using Froehlich-Hamilton model 19 p3438 A66-35481

Ionosphere as anisotropic dissipative medium where charged particles random thermal motion acts as thermal radiation source, noting relation between driven AC conduction current density and applied AC electric field intensity 19 p3352 A66-36630

Langmuir current-density limit derived for differing axial and radial electron beam temperatures in high-resolution image devices 20 p3524 A66-36899

Crystal growth, diffusion and fabrication of gallium arsenide-phosphide junction lasers with low threshold current densities 20 p3577 A66-37401

Space charge wave equation and impedance and stability of electron diodes, using Nyquist analysis and transit time and RF beam current 20 p3528 A66-37489

Cathode current density distribution, beam minimum radius and location and electrode current interception, using computer techniques on electron guns 20 p3528 A66-37490

Recombination radiation from Ga-Sb p-n junctions, noting spectral composition as function of current density and impurity concentration 20 p3618 A66-37563

Radiative recombination in gallium arsenide p-n junctions for weak currents, obtaining relation between emission spectra and current-voltage characteristics of diodes 20 p3619 A66-37688

Electron beams from duoplasmatron using hollow cathode arc, noting current density distributions 20 p3606 A66-38406

Optical coupling using gallium arsenide

laser for variation of frequency of diode emission through small change in current density 21 p3746 A66-38920

Radiation intensity dependence for various spectral bands of diffused gallium arsenide p-n junctions on current density 21 p3798 A66-38921

Kadomtsev current-convective instability and damping as affected by current density, wave frequency, resistivity gradient and azimuthal wave number 21 p3791 A66-39178

Current density, electron mobility, magnetoresistance, negative resistance and impact-ionization-produced solid state magnetoplasma oscillations in InSb single crystal semiconductor at high electric and magnetic fields 21 p3805 A66-39568

Recombination radiation from GaAs p-n junctions with and without Fabry-Perot resonator, noting parameter dependence on current density 22 p3932 A66-40314

Atmospheric electric field change compensation during measuring air-Earth ionic conduction and electron precipitation current densities 22 p3920 A66-40804

Current dependence of recombination radiation intensity in gallium antimonide, determining radiation spectral distribution at low temperature 22 p3967 A66-40845

Analytical expression derived for current density of arc moving extinguishing chute by force of external magnetic field 23 p4099 A66-41057

Structure effect on superconducting properties of eutectic alloys solidified under variety of growth conditions, discussing interphase boundary, current density and residual strain 24 p4250 A66-42296

Current transducer for measuring current pulses in kiloampere range and suitable for laser research applications 24 p4213 A66-42820

Localization conditions of high power linear HF discharge at low gas pressure, achieving localization of current and plasma density in magnetic field by using diaphragms 24 p4244 A66-42968

**CURRENT DISTRIBUTION**

Current and voltage distribution over length of HF discharge in helium-neon laser 01 p0082 A66-10704

Effect of currents, distributed over envelope surface formed by revolution of magnetic dipole force line about its axis, on cosmic ray cut-off 02 p0284 A66-12128

Current distribution instability elimination by HF power transistor sets prepared by microelectronic techniques 03 p0341 A66-12522

Linear antennas and characteristics regarding maximum power, directivity, height, sleeve and conical dipoles and current distribution 04 p0491 A66-13402

Current-voltage characteristics of long diodes calculated by dividing diode base into three regions 04 p0495 A66-13767

Gallium arsenide p-n junction laser diode covering injection current distribution, density and emission spectra variation 05 p0692 A66-14659

Plane electromagnetic wave scattering at rectangular conducting strips, examining front end backscattering and current distribution measurements 05 p0649 A66-15121

Current exchange between electrodes and working fluid in open-cycle MHD generators 05 p0625 A66-15814

Concentric ring antenna arrays with low sidelobes, estimating currents from Fourier-Bessel series 06 p0825 A66-16017

Current distribution for cylindrical dipole of infinite length immersed in homogeneous lossless magnetolonic anisotropic ionosphere 06 p0827 A66-16033

Electromagnetic field in current-carrying region, discussing existence criteria of improper integrals 06 p0908 A66-16130

Current distribution on L-band loop antenna composed of four quarter-circular sections 06 p0850 A66-16446

Instabilities of current and potential distribution in n-type GaAs and InP in electric field of several thousand v/cm 07 p1104 A66-18221

Open circuit voltage, inner resistance, Hall voltage and tensorial conductivity for

Faraday generator, using conformal mapping for single pair of electrodes 07 p0993 A66-18309

Electric current passage through multivalley n-germanium semiconductor plates, noting nonuniform electron distribution 08 p1273 A66-19275

Antenna radiation shows relationship to tangential component of electric field intensity along antenna 08 p1197 A66-19606

Kliatskin objections and improvements concerning integral equation describing current distribution in rectilinear antenna 08 p1197 A66-19607

Line width of semiconductor laser 08 p1234 A66-19613

Refined field effect transistors noting current, gate voltage and transconductance of proposed structures 09 p1350 A66-19918

Fredholm integral equation system for magnetic currents induced on wedge under impedance boundary condition 09 p1344 A66-20441

Morphological analysis of daily variability of geomagnetic field regular daily changes, noting current systems in polar and nonpolar regions 10 p1526 A66-21126

Current distribution along circular loop antenna, obtaining backscattering patterns as function of rotation angle 10 p1510 A66-21592

Scattering technique for measuring surface current density on cylindrical obstacles 10 p1502 A66-21637

Neutral point between two parallel line currents in highly conductive plasma, noting topological flux change and relation to solar flares 10 p1565 A66-21683

[AIAA PAPER 66-152] Current saturation from negative resistance and domain trapping in n-type gallium arsenide crystal 10 p1586 A66-22096

Current distribution and input impedance of infinite cylindrical antenna in anisotropic plasma, treating it as boundary value problem 11 p1661 A66-22396

Tube shaped and solid cylinder antennas compared, calculating surface current distribution and radiation patterns 11 p1662 A66-22543

Current distribution and input resistance of T-type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 11 p1666 A66-22719

Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 11 p1751 A66-22733

Axial current distribution in exhaust of magnetic annular arc, examining effect of entrainment on thrust measurement [AIAA PAPER 66-198] 11 p1761 A66-23084

Current and voltage distribution over length of HF discharge in helium-neon laser 11 p1714 A66-23309

Superconducting film stability under current, noting metastable state near transition point via potential analysis 12 p1930 A66-24787

Reverse current across collector-base junction in transistor 12 p1844 A66-24822

Electrode size effects on performance of infinitely long MHD power generation duct calculated by conformal mapping, analyzing gas Hall parameter, electrode-insulator length ratio, etc 13 p2000 A66-25735

Gallium arsenide p-n junction laser diode, injection current distribution, density and emission spectra variation 13 p2092 A66-25934

Distribution of current and associated field in coaxial plasma gun, noting plasmoid formation from drift 13 p2153 A66-26521

End effects in steady state MHD J x B accelerator, noting voltage and current distribution and eddy-current geometry 14 p2342 A66-27430

Microplasma breakdown in high voltage avalanche rectifiers, considering leakage current and junction impurity dislocation migration 14 p2363 A66-27583

Theoretical gains and current distribution in supergain endfire antenna arrays 14 p2256 A66-27922

Mutual impedance between two rectilinear and parallel top-loaded elements of directional antenna when elements have nonzero current at ends 14 p2257 A66-27924

Effect of currents, distributed over envelope surface formed by revolution of magnetic dipole force line about axis, on cosmic ray cut-off 14 p2377 A66-28085

Stationary phase technique synthesis of continuous linear antenna and integral equation for determining radiation pattern 14 p2259 A66-28158

Instability of current distribution related to problem of reliability in transistor electronics 15 p2468 A66-29915

Delay time and current transients occurring when thyristor is switched on by control-current pulse 15 p2468 A66-29918

Induction drag of long cylindrical satellites and Alfvén waves emitted from them determining potential and current distribution and effect on energy loss [AIAA PAPER 66-478] 16 p2799 A66-30523

O-shaped magnetic systems using unsaturated steel magnetic circuit to produce strong uniform magnetic fields for MHD machines 16 p2637 A66-31375

Frequency converters using traveling wave and backward wave tubes, noting current-wave amplitude distribution, velocity and voltage 16 p2666 A66-31550

Antenna synthesis of prescribed configuration requiring minimum current 16 p2666 A66-31555

Integral equations of current derived for TM and TE waves in excited inhomogeneous impedance band in half-plane 17 p2885 A66-32246

Two-dimensional excitation problem of circular cylinder with surface impedance varying over cylinder circumference 17 p2874 A66-32247

Infinite helical sheath antenna driven by ring delta-function generator analyzed, using Fourier transform, noting decomposition of current distribution 17 p2886 A66-32388

Line width of semiconductor laser 17 p2936 A66-33127

Local pressure effect on changes of forward current and stored charge of germanium p-n and p-s-n structures explained by change of energy gap 18 p3153 A66-33759

Cylinder magnetization in axisymmetric magnetic field, noting calculation of critical current in conductor 18 p3155 A66-34160

Kilatskin objections and improvements concerning integral equation describing current distribution in rectilinear antenna 18 p3087 A66-34963

Force-free magnetic fields generated by orthogonal current systems in unbounded conducting fluid 18 p3151 A66-35032

Base drive and internal structural irregularities of transistor effect on internal current distribution and second breakdown characteristics of device 19 p3312 A66-35343

LF common-base current transfer ratio for hot electron transport in semiconductor-metal-semiconductor point-contact-transistor structures measured as function of metal film thickness and temperature 19 p3435 A66-35410

Spatial distribution of acoustoelectric field in photoconductive CdS measurement under conditions of current saturation, determining carrier drift mobility 19 p3435 A66-35415

Normalized self and mutual admittances of two identical bare circular loop antennas in air or conducting medium evaluated, obtaining single integral equation for current distribution 19 p3321 A66-36405

Chaplygin equation solution translating current function and velocity potential from physical into hodograph plane 19 p3342 A66-36474

Two-dimensional problem of current distribution on surface of permeable electrodes adjacent to flow of conducting medium under Hall effect 20 p3611 A66-38110

Broken symmetry densities within current algebra arising in magnetic moment ratio, renormalization constants and unitary symmetry correction 20 p3606 A66-38293

Field conditions for optimal current distribution in superconducting coil 21 p3804 A66-39391

Radial current density distribution in homopolar, noting deviation of magnetic field and nature of current distribution

around anode 22 p3953 A66-39757

Experimental results of VLF dipole tests on Greenland ice cap including measurements of self-impedance, amplitude current distributions, relative efficiency and complex conductivity 22 p3874 A66-39942

Current-carrier scattering anisotropy dependence on antimony impurity concentration in n-Ge established, using measurements on Hall effect and conductivity 22 p3965 A66-40321

Pinch phenomena and current distribution in coaxial plasma gun 23 p4101 A66-41295

Current distribution and input resistance of T type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 23 p4045 A66-41457

Space-charge-limited current in solid for field depletion of filled traps, noting current voltage characteristics 23 p4113 A66-41471

Modified Fock function for current distribution in penumbra and shadow region of plane electromagnetic wave incident upon convex cylinder, with application to backscattering 23 p4040 A66-41637

Radiation characteristics of filament with triangular current distribution situated along axis of magnetized plasma column, noting guided and space waves excited by filament 24 p4240 A66-42291

**CURRENT SHEET**

Detection of ionized gas front passage and differentiating it from current sheet in magnetically driven shock tube 07 p1020 A66-17956

Current sheet formation on plasma magnetospheric boundary at hyperbolic null point, noting possible connection with solar flare mechanism 07 p1138 A66-18082

Radiation resistance of linear current strip of finite width immersed in uniaxially anisotropic plasma 09 p1408 A66-20370

Magnetic and electric field and current density distributions in propagating current sheet [AIAA PAPER 66-200] 10 p1563 A66-21442

Distant-field antenna model of current sheet array used to approximate ultimate decay of mutual coupling in planar array antenna 14 p2257 A66-27926

Large-dimensional inverse pinch discharge study of impulsive plasma acceleration, gas dynamics and stability of unrestrained current sheet [AIAA PAPER 66-482] 18 p3141 A66-33655

Electron-ion current partitioning effects efficiency of pulsed plasma accelerators due to viscous drag caused by ions carrying current to cathode [AIAA PAPER 65-335] 18 p3147 A66-34586

**CURRENT STABILIZER**

Integrated current limiter design using transistor circuits, pn-pn switches or field effect transistors 02 p0204 A66-11935

Gunn effect n-type GaAs diode phase locked to stable frequency by injecting CW signal into circuit along with video pulse 06 p0925 A66-16671

Improved stability of field emission current at microwave frequencies in weak vacuum 06 p0854 A66-16758

Frequency synchronization of Gunn effect oscillators, frequency locking subharmonic generation, passive frequency stabilization, etc 10 p1516 A66-22095

Compound diode-transistor structure with current gain invariant with temperature 24 p4183 A66-42629

Nb-Zr strip superconductor for stabilization of critical current anisotropy and coil degradation in magnets 24 p4186 A66-43176

**CURTISS-WRIGHT MILITARY AIRCRAFT S X-19 AIRCRAFT**

**CURVE**

S HILL CURVE

S ZERO FORCE CURVE

**CURVED BEAM**

Stressed state of curved rod of rectangular cross section subject to bending, shearing, tension and compression determined from theory of elasticity 01 p0155 A66-10740

Equations of plastic interaction curves for cross section of beam subject to uniaxial stress and under simultaneous bending moment and normal force, using power

series 03 p0442 A66-13306

Out of plane free vibrations of uniform circular ring on elastic and torsional foundations producing restraints 24 p4287 A66-42165

**CURVED PANEL**

Variational formulation of equilibrium stability of nonlinear elastic circular cylindrical panel under radial stress 18 p3251 A66-33704

Creep buckling of long curved sandwich panel 18 p3259 A66-35014

**CURVED SURFACE**

Falkner-Skan similar solutions for effects of longitudinal surface curvature on incompressible laminar boundary layer flows 03 p0355 A66-12786

Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 04 p0512 A66-14220

Stability criterion for flow in interspace between two parallel arbitrarily curved walls 07 p0980 A66-17482

Formulas for angular resilience of curvilinear surfaces of concave or convex planforms 07 p1038 A66-18060

Equations for nonshallow thin shells of arbitrary shape and variable rigidity with continuous smooth curvature 08 p1315 A66-19731

Solving supersonic laminar boundary layer separation by velocity profile and energy momentum concept, noting application to wedges and curved surfaces [ASME PAPER 65-APMW-19] 10 p1523 A66-21469

Lunar and planetary terrain roughness in terms of curvature statistics, based on Ranger VII and Bonita Lava Flow contour map analysis [AIAA PAPER 65-389] 10 p1610 A66-21955

Curvature effect on stress distribution for thin walled circular cylindrical shell with small aperture 11 p1779 A66-22237

Unsteady interaction between blunt bodies and shock wave, comparing reflected shock wave velocity decrease for plane spherically blunted cylinders 16 p2685 A66-30788

Mathematical representation of latitude-longitude point pairs for intersection of figure of Earth and plane defined by central ray of signal scattered between communications sites 18 p3068 A66-33908

Photometry of flux from surface and representation as Fourier series of time dependence of received reflected flux for torse of convex curvature 20 p3556 A66-36937

Cavitational flow past curvilinear arc constructed according to Ryabushinskii scheme 20 p3548 A66-38116

Self-preserving flow in outer part of two-dimensional curved turbulent wall jet for constant ratio of jet thickness to wall radius of curvature 22 p3844 A66-40489

Stress concentration around curvilinear holes in plate, discussing plane problem of elasticity theory and shell theory 23 p4143 A66-41960

**CUT-OFF**

Cut-off frequency in UHF transistors at high collector currents due to transition region boundary displacement 14 p2248 A66-27048

Cut-off wavelength of transverse electrostatic wave mode in ridged rectangular waveguide of arbitrary aspect ratio 14 p2257 A66-27951

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Vector potential function solution to Maxwell-Minkowski equations describing cut-off phenomena for EM wave propagation in wave guide filled with homogeneous isotropic lossless moving medium 22 p3862 A66-39783

**CUT-OUT**

Photoelastic stress-concentration measurements in variously-reinforced circularly shaped cut-outs under uniaxial tension, three-dimensional effects and validity of neglecting bending stiffness 23 p4141 A66-41949

CUTTING

Selecting proper cutting tool for machining high-strength steels and alloys 08 p1229 A66-18689  
Defect analysis by device sectioning, noting techniques, application in crystallography, electronics, etc 12 p1845 A66-24849  
Durability of cutting tool alloys for producing porous cermet ball bearings, noting effect of pearlite in cermets 17 p2930 A66-32850

CW RADAR

S CONTINUOUS WAVE /CW/ RADAR

CYANATE

S ISOCYANATE

CYANIDE

Laser transition in vibrational state of ground electronic state of CN from rotational level 8 to 7 with population inversion as result 02 p0240 A66-11451  
Oscillator strength of CN violet system from shock layer by time-of-flight scanning spectrometer 03 p0393 A66-13152  
Total number of cyanide molecules and diatomic carbon free radicals and density distribution in head of Arend-Roland 1957 III comet 17 p3010 A66-33381  
Values of Morse potential for interaction of atoms in diatomic molecules carbon, CO and CN 21 p3775 A66-39072

CYANINE DYE

Desensitizer pinacryptol green effect on photographic and photoelectric properties of emulsion layers 05 p0678 A66-15157  
Stoichiometry of reaction of cyanine dye with diverse polyionic macromolecules 06 p0821 A66-16157  
Biological macromolecule detection using thiacarbocyanine dye and observation of absorption spectra changes 15 p2441 A66-29962  
Dissociation and reassociation reactions of hemocyanin mixtures analyzed by electron microscopy, noting original molecular structures 18 p3060 A66-34459  
Phthalocyanine crystal phase change effect on electric conductivity 22 p3860 A66-39921  
Stimulated emission of polymethine dyes upon pumping with Q-switched laser, noting wavelength parameters and oscillation 24 p4219 A66-42247  
Saturable dyes noting mode selection properties and absorption spectra in bleached state 24 p4220 A66-42253  
Absorber concentration effect on pulsed laser system noting performance characteristics, threshold energy, pumping dynamics and time parameters 24 p4220 A66-42254

CYANO COMPOUND

X-ray single crystal diffraction technique determination of structure of pyridinium dicyanomethylide 04 p0472 A66-13364  
Preparation and physical properties of polytricyanoethylene /TCNE/ copper chelate film, noting electric conductivity and heat treatment effect 10 p1574 A66-21348  
Series of tricyanomethyl compounds prepared in refluxing acetonitrile by alkylating potassium tricyanomethanide with alkyl iodides, alkyl, propargyl and benzyl bromides 23 p4117 A66-41229

CYANOGEN

IR and UV absorption spectra of free radical CN observed following photolysis of matrix isolated cyanogen nitride 04 p0473 A66-13644  
Kinetics of CN radicals association generated by shocking cyanogen-argon mixtures at high temperatures in reflected shock region of expansion wave 12 p1811 A66-23615  
Cosmic black body radiation at 2.6 mm wavelength from 2.7 to 3.4 degrees K, noting CN molecules 16 p2793 A66-30199  
Cosmic microwave radiation from observations of interstellar CN rotational temperature, rotational excitation by H I region H atoms and excitation by slow electrons and slow protons in H II region 16 p2793 A66-30200

CYBERNETICS

SA HUMAN ENGINEERING

Cybernetics methods suited to complex systems associated with bioastronautics 01 p0021 A66-10807  
Effect of delayed feedback in respiratory disease analyzed for behavioral cybernetic

theory, using computer-controlled delay 02 p0186 A66-11648  
Cybernetics role in space flight including control circuits for guidance and electronic equipment automation and development 04 p0469 A66-13495  
Classifying capacity of learning matrix used in cybernetics, discussing principle and application to weather forecasting and speech recognition 04 p0489 A66-13509  
Russian monograph on algorithm of machine search for logical natural derivation of investigated formulas from initial formulas via propositional calculus 07 p1004 A66-18464  
Adaptation theory concepts, examining threshold learning process, Markov chain, learning wave, feedback adaptivity, etc 11 p1647 A66-22299  
Infinite automata theory and structural logical design of digital machines 11 p1659 A66-22707  
Minimizing number of states of automaton with consideration of transition 11 p1676 A66-22708  
Abstract automata analysis based on solution of system of equations in algebra of events 11 p1676 A66-22709  
Probabilistic automata as generalization of deterministic and nondeterministic finite model, theorems and concept of definiteness 12 p1853 A66-24338  
Automatic control, systems science, cybernetics, biomedical engineering, human factors - IEEE International Convention, New York, March 1966 12 p1854 A66-24634  
Biological cybernetics applied to physiological studies during space flight, examining mathematical modeling, biological control and statistical dynamics techniques 15 p2444 A66-29460

CYCLE

S BRAYTON CYCLE  
S CLOSED CYCLE

S REGENERATIVE CYCLE  
S SOLAR CYCLE  
S STRESS CYCLE  
S SUNSPOT CYCLE

CYCLIC ACCELERATOR

Focused laser as accelerating cavity for cyclic particle accelerator 01 p0080 A66-10328

CYCLIC HYDROCARBON

SA ANTHRACENE

Synthesis of 1-methyl-3, 5-diphenylthiabenzenes 1-oxide suggests possibility of ylide-like character although ylene-like is not discounted 03 p0330 A66-13088  
Rates and activation parameters determined from nuclear magnetic resonance spectra for degenerate isomerizations of disubstituted benzofurazan oxides 05 p0629 A66-15155  
Heat of combustion of tricarbonylcyclopentadienylmanganese 08 p1279 A66-18798  
Methylcyclohexane dehydrogenation over platinum-alumina in absence of excess hydrogen, yielding toluene and hydrogen 11 p1650 A66-23122  
Mass spectrometric fragmentation behavior of N-n-propyl and N-n-butyl pyrrolidone and N-alkyl succinimides subsequent to electron impact 11 p1651 A66-23412  
Isolation and identification of biogenic steranes and pentacyclic triterpanes in Eocene shale 12 p1805 A66-23539  
Cyclomethylenetrinitramine-hexamethylphosphortriamide complex preparation 20 p3627 A66-38416

CYCLIC LOAD  
Optimal surface damping in two-layered cantilever for random periodic loading decreasing in symmetrical cycle 01 p0160 A66-11180  
Cyclic edge loading effect on circular reinforced cylindrical shells 04 p0589 A66-14147  
Asymptotic integration of thin elastic shell equations for design of shells of revolution subject to effect of cyclic edge loads 04 p0590 A66-14149  
Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/APM-9]

05 p0776 A66-15431  
Plastic strain fatigue in air and vacuum, discussing strain-life relation for ductile materials and cold reweldment of fractures in vacuum [ASME PAPER 65-MET-5]

Two-parametric classification of load cycles on construction elements connected with fatigue limit tests and service life 06 p0895 A66-16203  
Plastic deformations for cyclically alternating loads, determining cycle number at which fracture occurs 06 p0965 A66-16484  
Effect of structure and volume cold-working related to structural factors on notched samples of steels subjected to cyclic stresses 07 p1048 A66-17441  
Healing of defects in steel accumulated during cyclic overloading 07 p1048 A66-17442  
Extension of Coffin formula for cyclic strength in finite regions of plastic deformation for symmetric strain cycles 07 p1143 A66-17856  
Analytical derivation of formula relating plastic deformation per cycle and number of cycles to failure for metals 07 p1050 A66-18062  
Loading frequency effects on fatigue strength of 45 and E1612 steel specimens at room temperature 07 p1147 A66-18385  
Thermomechanical response studies of solid propellants subjected to cyclic and random loading [AIAA PAPER 65-160] 10 p1590 A66-21776  
Fatigue life of aircraft gas turbine compressor disks subjected to cyclic loading 11 p1710 A66-22691  
Linear cycle set factorization, showing that uniqueness of canonical procedure is incorrect and introducing new cycle division algorithm 11 p1679 A66-23247  
Results of crack propagation tests on polymethylmethacrylate flexed at various frequencies under cyclic loading 13 p2112 A66-25308  
Soviet monograph on elastic and plastic deformation mechanism, describing stress-strain state of materials, cyclic, variable and reversed load effects, etc 13 p2206 A66-26464  
Effect of temperature on cyclic minimum creep rate and other phenomena associated with cycle dependent deformation from 77.4 to 295 degrees K [ASME PAPER 66-MET-7] 14 p2395 A66-26975

Cyclic strain fatigue tests and fatigue failure curve for age-hardened nickel based alloy K-Monel [ASME PAPER 66-MET-9] 14 p2312 A66-26977

Cyclic plastic stresses at notch roots in aluminum alloy sheet specimens under constant-amplitude repeated tension and reversed loading 17 p3023 A66-32074  
Behavior of aggregate under moderate loads with plastic deformation occurring in favorably oriented crystals on single active slip systems [ASME PAPER 65-WA/AMP-9] 18 p3248 A66-33584

Fatigue curve for one type of loading determined from stress variation during cyclic deformation and fatigue curve from other type of load application 18 p3254 A66-34231

Variable load theorem applied to alternating cyclic loads problem, based on equations of small elastoplastic deformations 21 p3830 A66-38984

Cyclically moving loads causing resonance in elastic rods, strings and torsional members having fixed ends 23 p4141 A66-41922

Time dependent stress distribution in elastoplastic cyclic deformation, emphasizing cycle hardened stainless steels 23 p4144 A66-41971

Damping mechanisms and phenomenology in materials 23 p4145 A66-41985

CYCLING

S THERMAL CYCLING

CYCLOHEXANE

Sedimentation rates of metallic particles in cyclohexane medium measured by light absorption 01 p0069 A66-10750  
Selective feedback and saturation mechanisms of Raman lasers using

secondary Raman lines, emphasizing  
cyclohexane 20 p3579 A66-37777

# CYCLONE SA ANTICYCLONE

Magnetic storm accompanied by Forbush  
decreases taking into account atmospheric  
temperature, noting cyclonic storm  
origin 02 p0282 A66-11338

Cosmic radiation variations during passage  
of cyclones agree with theory for  
meteorological effects based on two-meson  
scheme 02 p0282 A66-11339

Energy conversion from available potential  
to kinetic broken into spectral components  
permitting analysis in vicinity of  
extratropical cyclone 04 p0541 A66-13665

MHD model of cyclone, considering motion  
of type of rotating ideal compressible  
conducting fluid 08 p1213 A66-19023

Radiostrontium ratios in precipitation from  
two extratropical cyclones containing  
nuclear debris of different  
ages 23 p4124 A66-41844

# CYCLOPROPANE

Rate constants for atomic and molecular  
hydrogen ion transfer from tri- and tetra-  
atomic carbon paraffins to propylene and  
cyclopropane molecular  
ions 22 p3861 A66-40905

# CYCLOTRON

## SA ION CYCLOTRON

Cyclotron radius, magnetospheric boundary  
and Debye length scaling parameters for  
magnetospheric cavity arising from solar  
wind-induced geomagnetic storm and  
visibility of quasi-Van Allen  
belts 14 p2269 A66-27124

External injection of ions into cyclotron,  
examining case of injection of beam in  
median plane of magnet 14 p2347 A66-28310

# CYCLOTRON FREQUENCY

Dispersion characteristics of  
perpendicularly-propagating cyclotron  
harmonic wave modes in  
plasma 01 p0025 A66-10518

Cyclotron heating of electrons creating  
plasma at HF field 01 p0115 A66-11108

Space and time dependence of decaying  
resonant oscillations excited in collisionless  
plasma by infinitesimally small pulsed  
dipole 05 p0721 A66-14714

Anisotropy of scattering in tellurium,  
correlating cyclotron frequency data and  
galvanomagnetic  
measurements 05 p0738 A66-15353

Instability of plasma with spatially  
inhomogeneous current at frequencies above  
ion-cyclotron frequency, noting electron  
charge convection and wave-particle  
interaction 06 p0914 A66-16141

Cyclotron harmonic amplification of wave  
propagation in electron beams and plasmas  
with internal motions in presence of static  
magnetic field 06 p0920 A66-17013

Microwave radiation from high voltage  
plasma with oscillating electrons and  
resulting cyclotron frequency  
harmonics 08 p1264 A66-19180

Anisotropy of scattering in tellurium,  
correlating cyclotron frequency data and  
galvanomagnetic  
measurements 09 p1431 A66-20894

Coupling impedance of thin hollow electron  
beam injected into magnetic field and  
rippling at cyclotron frequency in cylindrical  
waveguide carrying E<sub>01</sub>  
mode 11 p1661 A66-22395

Longitudinal plasma oscillations excited in  
warm plasma column at microwave  
frequencies in presence of magnetic field,  
manifest themselves as absorption peaks  
near harmonics of electron cyclotron  
frequency 11 p1748 A66-23395

Plasma density drops developing when  
injecting plasma into trap with combined  
field, noting rise of HF field and  
acceleration of fraction of plasma ions with  
each drop 13 p2137 A66-25104

High refractive index at electron cyclotron  
harmonics from nonrelativistic plasma  
immersed in external magnetic  
field 13 p2145 A66-25728

Collisional effects in region of electron  
cyclotron frequency on electromagnetic  
wave propagation in  
plasma 13 p2147 A66-25752

Excitation of Alfvén waves in semimetal  
plasma at low temperature, noting wave

propagation below plasma or cyclotron  
frequency in magnetic  
field 14 p2363 A66-27516

Calculation of electromagnetic field within  
two-dimensional plasma sheath with static  
magnetic field, noting effect of electron-  
cyclotron frequency on refractive index of  
medium 15 p2549 A66-28707

Multivelocity stream effects and efficiency  
of slow-cyclotron wave amplifiers, noting  
electron velocity spread which decreases  
predicted efficiency 15 p2467 A66-29711

Instability of plasma with spatially  
inhomogeneous current at frequencies above  
ion-cyclotron frequency, noting electron  
charge convection and wave-particle  
interaction 15 p2556 A66-29871

Plasma density drops developing when  
injecting plasma into trap with combined  
field, noting rise of HF field and  
acceleration of fraction of plasma ions with  
each drop 16 p2758 A66-30283

Quasi-linear theory of plasma cyclotron  
instability for one-dimensional oscillation  
spectrum, noting energy of interaction with  
electromagnetic field, ion velocities,  
etc 16 p2762 A66-31172

HF flute unstable oscillations occurring  
when low temperature plasma is added to  
high temperature one, finding frequency and  
growth rate are of order of cyclotron  
harmonic frequency 17 p2966 A66-32423

Proton trajectories in static dipole  
magnetic field, noting effects in radiation  
belt proton pitch angle oscillation at  
cyclotron frequency, etc 17 p2993 A66-32519

Electron-cyclotron heating of plasma via  
high power oscillator, noting experimental  
setup and characteristics 18 p3151 A66-35068

Particle concentration and luminescence  
intensity correlation with electron cyclotron  
frequency in stationary SHF argon discharge  
in magnetic field 18 p3152 A66-35080

Drift instabilities calculated in beta limit,  
examining influence on electron cyclotron  
harmonic waves, Larmor radius flute,  
structure of infinite plasma in magnetic  
field, etc 19 p3418 A66-36535

Crossed-field electron beam stability for  
arbitrary values of Q /ratio of plasma  
frequency to cyclotron  
frequency/ 20 p3606 A66-38404

Linearly polarized incident electromagnetic  
waves propagated along static magnetic field  
through plasma in region of electron  
cyclotron frequency, noting wave modes  
behavior 24 p4242 A66-42400

# CYCLOTRON RADIATION

Plasma waves propagating transverse to  
uniform external magnetic field discussing  
electron motion, wavelength magnitude,  
frequencies and application of  
results 03 p0406 A66-13358

Growth of absorption bands of natural and  
synthetic calcium fluoride crystals irradiated  
with protons from cyclotron at Tomsk  
Institute 05 p0741 A66-15857

Anomalous bremsstrahlung and anomalous  
cyclotron radio emission from partially  
ionized gases in 20 to 1000 mc  
range 08 p1263 A66-19015

Excitation of backward Doppler shifted  
cyclotron radiation in magnetoactive plasma  
by electron stream 16 p2761 A66-30921

Cyclotron harmonic radiation from rare gas  
discharge in magnetic  
field 16 p2764 A66-31351

Harmonic generation in microwave  
emission from InSb, attributing resonance  
type radiation to stimulated cyclotron  
radiation and plasma wave  
excitation 17 p2978 A66-32410

Radio noise bursts from Jupiter at  
decimeter wavelengths noting Cerenkov  
emission, Doppler-shifter cyclotron emission  
and escaped-whistler  
models 18 p3225 A66-33550

Growth rate of forward-sublimous-mode  
electromagnetic wave excited in helical  
stream-plasma used to calculate Jupiter  
decametric emission 19 p3463 A66-35924

Power flow of cyclotron modes propagating  
in waveguide filled with cold collisionless  
axially magnetized plasma studied by  
Brillouin diagram 20 p3612 A66-38398

Dispersion equation for cyclotron  
electromagnetic waves for magnetoactive  
plasma injected with charged  
particles 16 p2762 A66-31173

particles 24 p4245 A66-43016

# CYCLOTRON RESONANCE

Interaction of electromagnetic fields with  
very hot plasmas using electron cyclotron  
resonance, noting microwave  
properties 01 p0026 A66-10545

Cyclotron instability dependence on  
nonmonotonic ion distribution function of  
plasma with cyclotron  
resonance 03 p0396 A66-12289

Gyroresonant interaction of electron and  
proton beam with electromagnetic waves in  
magnetosphere 03 p0419 A66-12675

Interaction of energetic electrons with  
bounded electromagnetic waves near  
cyclotron resonance, noting plasma  
diagnostics, maser and gain  
mechanism 04 p0530 A66-13953

Relationship between cyclotron resonance  
and interaction among current carriers in  
semiconductors 04 p0564 A66-14256

Cyclotron resonance in Azbel-Kaner  
geometry in n- and p-type lead telluride,  
examining anisotropy of absorption under  
anomalous skin effect  
conditions 07 p1102 A66-18205

Interaction of helicons with cyclotron  
resonance of single particles, other helicons,  
phonons, optical phonons and  
magneton 07 p1102 A66-18207

Twelve distinct mass series identified and  
mass values determined as function of  
orientation of magnetic field in Fermi  
surface of zinc at cyclotron  
resonance 10 p1581 A66-21735

Identification of mass series and mass  
values in Fermi surface of cadmium at  
cyclotron resonance compared with results  
for zinc 10 p1581 A66-21736

Plasma frequency determined by  
microwave bridge measurement of cut-off  
effect of plasma near electron cyclotron  
resonance 10 p1536 A66-21863

Generation of echo at cyclotron resonance  
in plasma provides means of measuring and  
displaying relaxation  
processes 11 p1748 A66-23393

Experiments on ion cyclotron heating of  
plasma generated by Joule heating in  
Heliotron-B 12 p1919 A66-23851

Cyclotron instabilities in hydromagnetic  
waves in magnetosphere as possible origin  
of geomagnetic micropulsations, stressing  
ion resonance mode of waves relevant to hm  
whistlers 12 p1874 A66-24842

Effect of nonlinearities on electron  
cyclotron resonance, stressing determination  
of maximum velocity of plasma under  
cyclotron resonance  
conditions 13 p2143 A66-25711

Dielectric tensor in relativistic Vlasov  
plasma in electron cyclotron harmonic  
resonance region 13 p2155 A66-26676

Relativistic plasma wave dispersion in  
cyclotron harmonic resonance  
regions 13 p2155 A66-26677

Electron cyclotron resonance plasma  
thruster for spacecraft electric propulsion  
systems 14 p2374 A66-27520

X-band electron-cyclotron resonance plasma  
accelerator 14 p2344 A66-27967

HF magnetic fields within homogeneous  
plasma sheath measured as function of  
plasma parameters and perpendicularly  
superimposed static magnetic field, noting  
resonance of electron cyclotron  
wave 15 p2549 A66-28708

Electron cyclotron resonance plasma  
accelerator design for thruster application  
and measuring techniques  
[AIAA PAPER 65-301] 15 p2572 A66-29277

HF heating of dense plasma by resonance  
excitation of cyclotron-type ion waves and  
fast magnetoacoustic  
waves 16 p2756 A66-30095

Alouette I satellite data on extraordinary  
wave resonance trace propagation along  
ionospheric magnetic field-aligned  
waveguide 16 p2697 A66-31001

Alouette I topside sounder ionograms of  
electron cyclotron harmonic resonance and  
frequency variation 16 p2697 A66-31003

Quasi-linear approximation of Cerenkov  
and cyclotron damping of electromagnetic  
waves in magnetoactive plasma, considering  
collisions of wave-absorbing resonance  
particles with plasma  
particles 16 p2762 A66-31173

- Cyclotron resonance excitation of upper level of gas-ion laser 17 p2933 A66-31937
- Steady state resonance absorption of electromagnetic wave and cyclotron heating of low-density plasma 17 p2965 A66-32321
- Alouette satellite observation of ionospheric cyclotron resonance, obtaining plasma frequency at particular height 17 p2920 A66-33085
- Magnetic beach effect on RF power transfer to ion-cyclotron waves in hydrogen and deuterium plasmas 18 p3146 A66-34463
- Semiconductor cyclotron resonance during application of constant electric field, determining carrier distribution function 19 p3437 A66-35460
- RF propagation and absorption calorimetric measurements in magnetoplasma near electron cyclotron resonance, noting power conversion 19 p3305 A66-36420
- Acceleration, reflection and accumulation of plasma by gradients of HF and static magnetic fields at electron cyclotron resonance 19 p3426 A66-36567
- Ion cyclotron resonance heating and trapping and adiabatic compression of plasma in QP machine 19 p3431 A66-36590
- Ion cyclotron resonance heating applied to C stellarator plasma formed by ohmic heating, noting Alfvén wave generation by Stix coil 19 p3432 A66-36594
- Second-harmonic electron cyclotron resonance in hydrogen plasma from HF ion source with inductive coupling situated in transverse magnetic field 20 p3607 A66-37407

- Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 12 p1956 A66-23583
- Dynamic response of cylindrical shell subjected to time-varying load treated by explicit and implicit method of timewise integration 12 p1956 A66-23584
- Dynamic stability of cylindrical shell subjected to uniform radial pressure 12 p1956 A66-23585
- Dynamic buckling of imperfection sensitive models, specifically cylindrical shells under axial compression 12 p1957 A66-23590
- Critical impact load under which axisymmetric deformation of perfect elastic isotropic cylindrical shell becomes unstable determined, using deflection theory 12 p1959 A66-23746
- Dynamic transient response of cylindrical shell to internal pressure pulse generated by blast wave 12 p1959 A66-23799
- Linear small deflection theory and statistical analysis in dynamic buckling of thin cylindrical shell under axial impact [ASME PAPER 65-APMW-17]

Self-equilibrating bending of complete circular cylindrical shells described by first harmonic terms of Fourier series for displacement components 12 p1961 A66-23980

Creep laws in terms of generalized stress-strain rates formulated, noting secondary deformation, Tresca criterion and associated flow rule 12 p1963 A66-24037

Bending of cylindrical shell clamped at one end and reinforced by elastic ring at free end, with vertical forces uniformly distributed acting over ring 12 p1964 A66-24044

Natural oscillation frequency of smooth cylindrical shells representing combustion chambers, diffusors, etc, analyzing effect of static loads 12 p1964 A66-24045

Rarefying of dense frequency spectrum of shell-shaped elements of aircraft engines by corrugating shell surface, determining natural oscillation modes and frequencies 12 p1964 A66-24046

Approximate determination of flexural vibrations of shells of revolution with vibrations involving appearance of nodal lines along generatrix and meridional directions 12 p1964 A66-24047

Effect on long shell of circumferential and uniformly distributed load /due to explosion/ at constant rate along shell 12 p1964 A66-24048

Initial deflection effect on stability of rib-reinforced cylindrical shells under axial compression 12 p1967 A66-24109

Concentrated forces and bending moments effect on shallow cylindrical shell 12 p1967 A66-24113

Nonsymmetric strain response of simply-supported cylindrical shells to localized impact loads expressed as step, ramp and sawtooth functions and rectangular impulse 12 p1972 A66-25007

Effect of external or internal static pressure on natural frequencies of unstiffened, cross-stiffened and sandwich cylindrical shells 13 p2194 A66-25142

Stress state of weakly curved cylindrical shell analyzed, finding biharmonic function from given boundary value of partial derivatives 13 p2197 A66-25853

Stress concentration at circular hole in orthotropic cylindrical shell, using coordinates system and Bubnov-Galerkin method 13 p2206 A66-26455

Axisymmetric form of stability loss of cylindrical shell under effect of load suddenly applied along generatrix, considering inertia forces and obtaining differential equations 13 p2206 A66-26456

Oscillations of cylindrical orthotropic three-layer shell having ideal fluid flow at variable rate, establishing parametric resonance and determining limits of shell motion instability regions 13 p2206 A66-26461

Mathematical and numerical determinations of aerodynamic forces on harmonically oscillating cylindrical shell under subsonic and supersonic speeds and comparison with slender body theory results 14 p2218 A66-27405

Algorithm for analyzing transient stress waves generated in cylindrical shell by application of impulsive dynamic loads 14 p2399 A66-27609

Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 14 p2400 A66-27684

Thermal stresses in finite cylinder with prescribed temperature distribution on curved lateral surface and with ends in contact with smooth insulating plates 14 p2400 A66-27725

Response of thin cylindrical monopole antenna to DC pulse excitation computed, using Fourier transforms, noting correlation between empirical and theoretical values 14 p2255 A66-27906

Imperfections and edge restraint effect on buckling of axially compressed cylinders 14 p2404 A66-27988

Longitudinal stiffeners eccentricity /one-sidedness/ effect on buckling strength of axially compressed cylinders 14 p2404 A66-27989

Filament overwrapped metallic cylindrical

pressure vessels show greater efficiency ratio and buckling strength 14 p2405 A66-27992

Axially loaded cylindrical structures analyzed for optimum weight construction consistent with cost constraint, emphasizing beryllium-aluminum alloys 14 p2406 A66-28023

Flutter of circular cylindrical isotropic shells 14 p2408 A66-28187

Stress analysis of cylindrical shell with reinforced and nonreinforced circular, square and rectangular cuts under tensile and torsional loads, using photoelastic coatings 15 p2607 A66-28765

Stability of cylindrical nonlinearly elastic shell under axial loads applied to shell ends 15 p2607 A66-28766

Parametric oscillations of cylindrical shell filled with liquid of variable depth 15 p2607 A66-28768

Small oscillations produced by combined action of stationary and harmonic forces in nonlinearly elastic cylindrical shell of rectangular planform 15 p2607 A66-28769

Asymptotic solutions of boundary value problems for elastic semiinfinite circular cylindrical shells by removing restriction of slow circumferential variation 15 p2609 A66-29239

Collapse loading of rotationally symmetric cylindrical shell 15 p2609 A66-29253

Supersonic flutter of circular cylindrical shells subjected to internal pressure and axial compression [AIAA PAPER 65-407] 15 p2610 A66-29281

Oscillatory pressures in idealized annular boundary layer apply to panel flutter of circular cylindrical shell in supersonic flow 15 p2610 A66-29282

Stiffener eccentricity and end moment effect on stability of cylindrical panel in axial compression 15 p2610 A66-29283

Buckling characteristics of eccentrically stiffened cylindrical shells under hydrostatic pressure loading and vibration, buckling and flutter characteristics of stiffened flat plates [AIAA PAPER 65-370] 15 p2610 A66-29285

Energy method for analysis of lowest mode symmetrical buckling of thin shell shallow spherical caps and cylindrical arches under blast loading 15 p2610 A66-29291

Stability analysis of elastic axially compressed orthotropic glass-fiber-reinforced-plastic cylindrical shell with linear heredity properties 15 p2611 A66-29341

Cylindrical thin shells with axial stringers under axial compression 15 p2614 A66-29636

Linearized unsteady supersonic potential flow theory formulation of boundary value problem of aerodynamic forces on oscillating cylinder and comparison with two-dimensional quasi-steady and slender body approximations 16 p2628 A66-30259

Bending stresses in cylindrical shell with rigid circular inclusion examined under axial tension and internal pressure [AIAA PAPER 66-525] 16 p2813 A66-30526

Optimum design of pressurized multicell cylindrical shell, noting antislosh capacity and possibility for single pass welding 16 p2816 A66-30909

Natural oscillations of three-layer circular cylindrical shells with freely supported and clamped edges 16 p2818 A66-31056

Torsion of reinforced cylindrical shell with long rectangular cutout 16 p2818 A66-31057

Equilibrium equations for closed circular cylindrical rib-reinforced shells under arbitrary loading 16 p2819 A66-31138

Liquid sloshing effect on axisymmetric vibrations of liquid-filled cylindrical shell 16 p2819 A66-31139

Linearized unsteady nonequilibrium flows produced by unsteady motion of thin foil or circular cylindrical shell in incompressible gas 16 p2687 A66-31288

Self-excited vibrations of infinitely long cylindrical shell, situated in flow of supersonic ideal gas, obtaining motion equations and analyzing stability conditions 16 p2820 A66-31333

Weight savings derived from use of contrasting ring, stringer and wall materials in J-stiffened axially compressed cylinders [AIAA PAPER 66-508] 16 p2821 A66-31480

Linearized theoretical motion equations for orthotropic cylindrical sandwich shells under initial stress, considering free

vibrations 16 p2822 A66-31490

Stressed state of cylindrical shell made of coiled glass fibers 16 p2822 A66-31625

Improved Donnell equations for concentrated load of circular cylindrical shell 16 p2823 A66-31717

Cylindrical thin shells under pressure, axial load and torque, determining plastic yield curves 17 p3021 A66-32006

Axially symmetric dynamic response of infinite, circular cylindrical shell to moving pressure load 17 p3021 A66-32009

Heterogeneity effect on multilayer composite cylindrical shell stability under axial compression 17 p3025 A66-32454

Linearized theory of free-vibratory motion of cylindrical sandwich shells under state of initial stress 17 p3025 A66-32455

Longitudinal and circumferential inertial effects on dynamic response of cylindrical shell to time-varying loads 17 p3025 A66-32470

Drag on cylinders of various height mounted on flat plate, noting dependence of compression region length on cylinder diameter during analysis of boundary layer separation phenomena 17 p2909 A66-32493

Free convective heat transfer in horizontal cylindrical interlayer with heat emitting element 17 p3034 A66-32560

Variational principle applied to formulation of stability equations of shallow shells subjected to creep 17 p3026 A66-32594

Accuracy of approximations using shell equations for predicting dynamic behavior of thin cylindrical shells, with exact solutions form Flugge shell equation [AIAA PAPER 66-447] 17 p3028 A66-32759

Propagation of elastic waves in thin cylindrical shell in terms of exact three-dimensional elastic theory 17 p3028 A66-32788

Oscillations and stability of cylindrical shell in gas flow, taking into account inertia forces 17 p3029 A66-32804

Boundary value problems in secondary creep of circular thin shells under axisymmetric loading, giving solutions for deformation rates and stress resultants 17 p3030 A66-32891

Variation equation for steady state creep applied to semimomentless cylindrical shell 17 p3030 A66-32935

Thin circular cylindrical shell behavior in axial compression, noting buckling under stress, boundary condition detail effects, etc 17 p3031 A66-33064

Donnell-type nonlinear theory for instability of cylindrical shell subjected to axisymmetric moving loads with constant velocity [ASME PAPER 65-APMW-35] 18 p3248 A66-33574

Stress concentration in nonlinear creep of long thin cylindrical shell loaded at one edge by symmetrical radial shear and bending moment 18 p3248 A66-33578

Constant external or internal pressurization effects on circular cylindrical shell under nearly uniform radial impulse 18 p3249 A66-33604

Transcendental equation describing discrete reinforcing network effect on vibrations of reinforced cylindrical shell 18 p3252 A66-33708

Solutions for large plastic deformations of cylindrical membrane shells under internal pressure 18 p3252 A66-33764

Bending characteristics of tapered cylindrical shells, discussing edge and internal influence coefficients 18 p3253 A66-33806

Theory of beams on elastic foundation used for approximate analysis of cylindrical shells with sufficient number of axial ribs 18 p3254 A66-33827

Nearly inextensional deformations of cylindrical shells, noting bending theory 18 p3256 A66-34489

Elastic stability of thin walled circular cylindrical shells in torsion, applying Galerkin method to Donnell equations for critical stresses 18 p3258 A66-34648

Forced motions of hollow cylinder encased in thin elastic shell and subjected to time-harmonic pressure at inner surface of cylinder 18 p3259 A66-35026

Thermal conductivity measurements for

hydrogen via coaxial cylindrical cell noting temperature, pressure effects, residual and conductivity values 19 p3479 A66-36290

TE wave scattering by dielectric cylinder of arbitrary cross section shape, including effects of surface wave excitation and mutual interaction 19 p3304 A66-36408

Plastic deformation in hollow metal cylinder by rapidly varying axial magnetic field, calculating time dependence assuming substance is rigid and plastic 19 p3475 A66-36602

Finite deflection and stability equations for circular cylindrical shells stiffened in longitudinal and circumferential direction 19 p3475 A66-36636

Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure 20 p3665 A66-36911

In-plane stiffness matrices for composite cylinders of filament winding determined by internal pressure, axial tension and torsion tests 20 p3666 A66-37440

Cylindrical shells strengthened by stringers and formers calculated, using double trigonometric series 20 p3670 A66-37672

Wall thickness requirement for cylindrical shell stability under critical radial compression derived by generalized power series 20 p3673 A66-38271

Stress analysis of elastic cylindrical shell perforated by rectangular cut-out and governed by Donnell equation 20 p3673 A66-38272

Thermal buckling modification in large deflection equations for thin shallow cylindrical shell 20 p3673 A66-38274

Elastic stability of cylindrical shells reinforced by one or two frames and subjected to external radial pressure, noting inertia moment about skin line and frame bending stiffness optimization 21 p3828 A66-38703

Beam column supported by linear rotational and extensional springs representing elasticity of test rig, used in analog study of thermal buckling behavior of thin cylindrical shells 21 p3828 A66-38706

Stability of structurally anisotropic circular cylindrical shell under nonuniform compression 21 p3829 A66-38976

Variational theorems for creep of shallow cylindrical shells, noting buckling and snap-through of square cylindrical panel compressed along generatrix 21 p3829 A66-38977

Shell stability in Euler formulation, taking into account actual redistribution of stresses that results from initial deflection and creep, noting buckling of closed cylindrical shell under axial compression 21 p3829 A66-38978

Computer analysis of cylindrical shell stability under uniform external pressure and critical pressure determination for various boundary conditions 21 p3829 A66-38979

Axisymmetrical deformation of multilayer circular sandwich cylindrical shells, deriving governing differential equations by variational theorem 21 p3831 A66-39272

Aerodynamic resistance of cylindrical rotor determined, using method based on formulas for resistance factors of cylindrical surfaces and rotor encasement 21 p3739 A66-39328

Steady state response of damped cylindrical sandwich shell under radially symmetric time harmonic pressure [ASME PAPER 65-WA/UNT-1] 21 p3832 A66-39530

Nonlinear differential equations for cylindrically anisotropic plates, noting errors of Wolmir method 22 p3988 A66-39698

Aeroelastic stability of infinite long cylinder with outer surface exposed to inviscid flow 22 p3992 A66-40338

Postbuckled equilibrium configurations of axially compressed circular cylindrical shell determined from large deflection theory and principle of stationary potential energy 22 p3993 A66-40340

Eccentricity effect on magnitude of discontinuity stresses in unsymmetrically loaded shells of revolution, discussing results of numerical calculations 22 p3993 A66-40366

Cylindrical shell analysis for short segments of shells of revolution with

axisymmetric edge-loading and variable wall thickness, using matrix method 22 p3994 A66-40369

Progressive plastic buckling of cylindrical shells under axial compressive load, noting nonsymmetric patterns 22 p3994 A66-40432

Influence coefficients for semiinfinite and infinite circular cylindrical elastic shell subject to self-equilibrating edge loads 22 p3995 A66-40451

Characteristic equation for linear flutter problem of elastic cylindrical shell immersed in gas flow, discussing energy radiation, traveling wave propagation and discontinuity problem 22 p3995 A66-40510

Axisymmetric dynamic response of ring supported cylinder to time dependent loads, discussing boundary conditions and differential equations of motions [AIAA PAPER 66-83] 23 p4138 A66-41106

Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 23 p4138 A66-41107

Correct conductance and susceptance of infinite cylindrical antenna determined via asymptotic evaluation of parametric integrals 23 p4047 A66-41636

Longitudinal and tangential local and strip loads effect on magnitude of forces, moments and displacements in circular cylindrical shell 23 p4139 A66-41788

Energy method application to buckling of axially compressed cylindrical shells with ring-stiffened edges, noting upper and lower bounds and critical rigidity ratio 23 p4140 A66-41912

Stress distribution and displacements in neighborhood of circular hole in cylindrical shell subjected to load such as torsion or axial compression 23 p4142 A66-41959

Large deflection postbuckling analysis of thin walled oval cylinders under axial compression 23 p4143 A66-41961

Postbuckling behavior of circular cylindrical shell locally buckled under axial compression 23 p4143 A66-41964

Classical critical stress values for buckling of thin walled circular cylindrical shells in axial compression as function of edge conditions 23 p4143 A66-41965

Structural dynamics of axisymmetric deformation of semiinfinite plastic cylindrical shell under concentrated ring impact 23 p4147 A66-41999

Elastodynamic buckling of circular cylindrical shells, unstiffened and longitudinal stringers-stiffened 23 p4147 A66-42000

Plastic theory of structures for collapse under highly localized loading 24 p4286 A66-42152

Applied mechanics - U.S. National Congress, University of Minnesota, Minneapolis, June 1966 24 p4287 A66-42265

Prestressed circular membrane shell subjected to uniform radial line load, determining stresses and displacements from material properties, internal pressure and original size 24 p4288 A66-42272

Longitudinal and torsional plastic wave propagation in thin walled tube, governed by four quasi-linear symmetric hyperbolic PDEs of first order with two distinct wave speeds 24 p4288 A66-42277

Membrane stresses in frustum connecting two cylindrical shells with parallel axes 24 p4289 A66-42287

Stability analysis of thin two-layer shell in Gaussian coordinates with moment initially zero, including applications to stability of circular cylindrical shell 24 p4290 A66-42441

Stress concentration near circular cut in unbounded plane plate and reinforced by thin walled infinitely long cylindrical shell under tension applied at infinity 24 p4290 A66-42445

Improved central tube configuration to optimize design of pressurization multicell cylindrical shell, comparing structural efficiency with other shells 24 p4291 A66-42794

Stability theory methods for small elastoplastic deformations generalized to include creep effects in cylindrical shells compressed at ends 24 p4292 A66-42885

## CYLINDRICAL TANK

Critical load of ellipsoidal end faces of cylindrical reservoir assuming deformation beyond critical load is axisymmetric 01 p0155 A66-10657

Mechanical model for representing moment of inertia and fuel sloshing in baffled cylindrical missile tanks 08 p1205 A66-18834

Damping of liquid oscillations in cylindrical tanks, determining rigid and flexible baffle loss coefficients, baffle efficiency and maximum bending stress [AIAA PAPER 66-97] 08 p1207 A66-19000

Critical load of ellipsoidal end faces of cylindrical reservoir, assuming deformation beyond critical load is axisymmetric 12 p1963 A66-24015

Mixed flow of two gases through coaxial cylindrical tubes separated by perforated plate 14 p2273 A66-26782

Design of composite structures of minimum weight, using flat-bottomed cylindrical tank, noting continuity condition of radial bending moment of plate and shell 14 p2395 A66-27174

Space vehicle containers, discussing prolonged storage of cryogenic liquids, insulation requirements, container configuration and design, etc [SAE PAPER 660460] 17 p3017 A66-33165

Outflow of liquid from cylindrical tank through central outlet for cases where effect of gravity is small, noting distortion of liquid surface [AICE PREPRINT 17D] 22 p3897 A66-39885

## CYLINDRICAL WAVE

Spherical and cylindrical implosive waves and system of generating detonation wave that converges to given focus 03 p0445 A66-13131

Plasma resonance of cylindrical plasma in absence of magnetic field noting conductivity kernel, scattering of radiation, nonuniformity of plasma sheath and Landau damping 04 p0474 A66-13425

Nonsteady cylindrical waves propagating in cold rarefied plasma situated in strong magnetic field 04 p0557 A66-14430

Effective excitation of radial cylindrical surface waves using Green function for excitation of impedance cylinder resting on impedance plane 06 p0823 A66-15882

Dissipative effects in converging cylindrical symmetric shock wave, considering ion and electron heat conductivity, ion viscosity and energy exchange 07 p1025 A66-18180

Imploding cylindrical shock wave production through imploding detonation waves in oxygen-acetylene mixtures, using Chapman-Jouguet theory 08 p1204 A66-18523

Neutral point between two parallel line currents in highly conductive plasma, noting topological flux change and relation to solar flares [AIAA PAPER 66-152] 10 p1565 A66-21683

Variation of critical energy for direct initiation of cylindrical detonation waves as function mixture composition and initial pressure 10 p1622 A66-21830

Oscillation frequency and attenuation factor for long cylindrical waves in viscous fluid 14 p2278 A66-28068

Conservation equations for cylindrical blast and radiation effect on shock layer profiles of blast wave 16 p2686 A66-31114

Symmetrical stress wave propagation in thin plate with small, circular hole at center, noting boundary conditions and solutions via Laplace transforms and by method of characteristics 17 p3022 A66-32012

Gravitational theory based on solar observations, noting connection between gravitational eigenvalues, planetary orbit spacing and connection with cylindrical wave functions 18 p3104 A66-33757

Behavioral equations derived for caustic that envelops locally-plane cylindrical wave incident on plane surface of layered plasma wedge 19 p3296 A66-35305

Plasma convergence, structure and heating by collisionless cylindrical shock waves, discussing wave front 19 p3424 A66-36560

Propagation constants of quasi-transverse electric modes measurement in cylindrical waveguide partially filled with anisotropic plasma 20 p3525 A66-37116

Cylindrical and spherical waves propagation in weakly inhomogeneous plasma treated by

- geometrical optics, noting caustic surfaces 22 p3951 A66-39648
- Stress wave propagation analysis using exploding wire and hollow cylinder together with measurement of loading condition and response 22 p3992 A66-40203
- Energy accumulation of spherical and cylindrical shock waves in inhomogeneous gas 22 p3901 A66-40690
- Parabolic cylindrical waveguide formed by intersection of two confocal parabolic metal surfaces, determining eigenvalues of wave functions subject to boundary conditions yielding TE and TM modes 23 p4047 A66-41587
- CYSTEAMINE**
- Cystamine hydrochloride, strychnine nitrate and hexobarbital injections effect on mice subjected to vibration, noting vibration effect on swimming 15 p2431 A66-28740
- CYTIDYLIC ACID**
- Thermal condensation of cytidylic acid from mononucleotides in presence of polyphosphoric acid 17 p2852 A66-32096
- CYTCHROME**
- Molecular nitrogen photofixation relation to electron-donor respiratory system, activity of hydrogenase and dehydrogenases and photosynthesis 13 p2010 A66-25893
- Repetitions in polypeptide sequence of cytochromes 18 p3059 A66-34196
- CYTOGENESIS**
- S BIOLOGICAL CELL**
- CYTOLOGY**
- Physical state of water in living cell and model systems such as collagen and wool 11 p1645 A66-22989
- Intracellular water structure and mechanisms of cellular transport, examining plasma and intracellular membranes 11 p1645 A66-22991
- Effect of combined action of accelerations, vibration and radiation of nuclei of bone marrow cells in mice 15 p2437 A66-29478
- CZECHOSLOVAKIA**
- Czechoslovakian space research including satellite observation, radio emissions, solar activity, Doppler effect measurement, radiation hazards, etc 15 p2601 A66-29912
- Comparison of Czechoslovakian human engineering standards for control pushbuttons with U.S. standards 22 p3859 A66-40861
- D**
- D-1 SATELLITE**
- CNES D-1 satellite using Diamant launcher for study of launch systems and space environment 01 p0142 A66-10360
- D-1, D-2 and D-3 Diamant satellites developed by CNES 10 p1610 A66-21252
- D-1A satellite by Diamant for evaluating long-term performance of instrumentation, solar cell studies and geodetic experiments 10 p1612 A66-21959
- D-1 satellite thermal control while in orbit featuring heating resistance and controllable power supply, noting simulated test program 10 p1612 A66-21960
- Hammarig firing range facilities and planned launch of D-1A geodesic satellite 11 p1687 A66-23378
- French D-1 satellite, design, attitude stabilization, solar power supply, telemetry, etc 14 p2390 A66-26804
- Design, instrumentation, performance capabilities and program of D-1 satellites 16 p2812 A66-31684
- FR-1 and D-1 satellites, discussing construction principles, development, tests and supervision of CNES 18 p3094 A66-33979
- Charged particle effect in Van Allen zone on short circuit currents of photovoltaic cells on D-1A satellite 18 p3053 A66-33980
- Mobile control of FR-1 and D-1 satellites and application to integration, tests and checkout at launching 18 p3094 A66-33981
- Automatic control equipment for FR-1 and D-1 satellites 18 p3246 A66-33985
- D-1, D-2 and FR-1 satellites in French space program 24 p4296 A66-42697
- D LAYER**
- Minimum ionospheric electron density needed for radio reflection in D layer 01 p0031 A66-11037
- D-region atmospheric processes such as electron attachment, photo and other detachment processes, recombination and neutralization as studied in laboratory 03 p0362 A66-12640
- LF propagation and probe experiment yielding profile of ionospheric D region, discussing experimental techniques, computations, RF impedance probes and formulas for ionospheric data 03 p0334 A66-12643
- Electron density and collision frequency in lower D region measured by rocket sounding 03 p0366 A66-12879
- Recombination coefficient and electron production rate in lower D region during solar flare 04 p0574 A66-13444
- Response of D-region absorption of cosmic noise to passage of totality during eclipse of May 30, 1965 recorded in New Zealand 05 p0668 A66-14798
- Electron distribution in quiet D region derived from rocket measurements of wavefield generated by LF ground transmitter 05 p0670 A66-14949
- Electron energy loss rate for D region determined by Maxwellian velocity distribution of thermal component brought about by collisions with molecular nitrogen involving rotational transition 05 p0672 A66-15021
- Lower ionospheric characteristics determined by VLF radio waves propagated over long distances by multiple reflections between Earth and D region 09 p1370 A66-19973
- Electron production, density and absorption in D region as effected by X-radiation 09 p1373 A66-20484
- Motion of D region under daytime conditions 09 p1374 A66-20485
- Effect of Soviet atmospheric nuclear explosions on D and F-2 ionospheric layers, particularly observing enhancement of atmospheric noise 10 p1600 A66-22058
- Onset patterns of PCA analysis using corrected geomagnetic coordinates, with results analyzed through solar cosmic radiation, Earth magnetosphere structure and D region 12 p1944 A66-24470
- D-region electron distribution, collision frequency and amplitudes of partially reflected waves 13 p2075 A66-26739
- Plasma due to high-altitude nuclear explosion and effect on radar propagation 14 p2237 A66-27510
- Ionospheric D-region electron distributions in middle latitudes deduced from reflection of long radio waves 15 p2489 A66-29631
- Ionospheric absorption effects in D and E layers, noting refraction role and effective collision frequency 15 p2493 A66-30036
- Electron density in E- and D-regions above Kjeller, Norway, from rocket measurements of absorption and height of reflection of radio waves 16 p2692 A66-30332
- Lyman alpha ionization of nitric oxide and ion molecule reactions accounting for ionic nitric oxide content of D and E regions 16 p2694 A66-30705
- Variations in electron density with reflection of long waves in D region 17 p2918 A66-32878
- Altitude variations of frequencies and electron density with reflection in D region 17 p2919 A66-32879
- Height distribution of electron density accounting for behavior of LF and VLF radio wave propagation during sudden ionospheric disturbance /SID/ 17 p2922 A66-33349
- Nitric oxide distribution in lower ionosphere calculated from reaction coefficients and mass spectrometric measurements of density 17 p2922 A66-33354
- First-order correction to Hough theory for measuring ion density in D region, especially those involving heat transfer and compressibility 18 p3107 A66-34523
- Positive ion composition in lower ionosphere, particularly D region, considering sources for water ions, stratification of metallic ions, etc 19 p3350 A66-36354
- Comparison of magnitude of collision frequency of electrons in D and E regions obtained by satellites, rockets, etc, with cross sections measured in laboratory 19 p3352 A66-36627
- Negative ion associative detachment reaction with atomic oxygen in determination of nighttime D region electron density profiles at high latitudes 22 p3905 A66-39945
- Faraday rotation experiment for determination of electron density and collision frequency observations in arctic D region 22 p3905 A66-39946
- Gerdien-condenser rocketborne probe used to measure ion densities in D region of atmosphere 22 p3905 A66-39947
- Collision frequency in E and D regions of ionosphere for electrons and neutral molecules 22 p3906 A66-39948
- Electron density profile measurements in auroral zone D layer during quiet ionospheric conditions, using partial reflection method 22 p3906 A66-39951
- Electron density and collision frequency profiles for D region obtained through simultaneous measurement of radio wave phase and amplitude interaction 22 p3906 A66-39953
- Electron density measurements in D layer obtained, using LF radio wave propagating into ionosphere and rocketborne receivers 22 p3906 A66-39955
- Ion mass spectrometry of D layer, using magnetic fields and cyclotron resonance principle 22 p3907 A66-39956
- Electron density profiles in D layer measured through Doppler shift on VLF signal propagating from ground up and received by rocket 22 p3907 A66-39957
- Number densities of ions and electrons in D region measured, using Arcas rocket 22 p3907 A66-39958
- Long VLF path propagation measurements, determining characteristics of lower ionosphere, noting role of phase and amplitude variations during solar flares 22 p3907 A66-39959
- Ionospheric cross modulation analysis by computer-oriented simulation process, noting D region electron density and collision frequency profiles 23 p4041 A66-41641
- Ionization level of D region at middle geomagnetic latitudes as affected by fast proton flux 24 p4265 A66-42757
- Differential absorption and Faraday rotation in D region, using closed loop feedback system and two signals of different frequencies 24 p4205 A66-43218
- D-LINE**
- SA SODIUM D-LINE**
- Factors determining line reversal temperature of flame with realistic temperature cross section explained by calculation of sodium D-line contours 17 p3038 A66-33324
- DACRON**
- SA NYLON**
- DAEMO**
- S DATA ADAPTIVE EVALUATOR AND MONITOR /DAEMO/**
- DAMAGE**
- SA IMPACT DAMAGE**
- SA METEORITIC DAMAGE**
- SA PROTON DAMAGE**
- Damaged depth in germanium thin films induced by bombardment with low energy argon ions measured, using differences in sputtering yield for given energy 15 p2561 A66-28705
- Damage thresholds for various glasses exposed to laser pulses, emphasizing internal damage 15 p2524 A66-28732
- Double linear damage rule used in conjunction with crack initiation and propagation equations, applied to cumulative fatigue damage 22 p3989 A66-40116
- DAMPER**
- SA VIBRATION DAMPER**
- Stabilization system of gravity gradient test satellite and effect on damping time and steady state accuracy, noting attitude data and solar effect 21 p3819 A66-38858
- Attitude errors of inertia coupled gravity gradient satellite with solar radiation pressure as dominant disturbance, noting slot problems in stabilized package accommodating damper motion 21 p3820 A66-38861
- Control of magnetic hysteresis mechanism, increasing damping torque for use in

- gravity-oriented satellite stabilization 21 p3820 A66-38862
- Periodic symmetric two-impacts-per-cycle motion of impact damper solved, determining asymptotically stable regions 24 p4216 A66-42146

- Radio telemetry for acquisition of Circadian rhythm data on ambulatory animal, including deep body temperature, heart rate, locomotor activity and oviposition 22 p3856 A66-39792
- Multichannel computer controlled Mobile Micrometeorological Observation System, automatic data acquisition, processing and recording system for observational analyses of turbulence of atmospheric boundary layer 22 p3943 A66-40427
- Laser technique acquisition of data on exploding-wire phenomena in explosion model, supersonic model and ablation model 23 p4091 A66-41701
- Optimal correlation of tracking data

determining Surveyor I location 23 p4129 A66-41780

Biomedical monitoring systems for crews during rest and during dynamic stress testing 24 p4167 A66-42451

Pegasus meteorite-detecting satellite design and performance and data on meteorites 24 p4283 A66-42741

**DATA ADAPTIVE EVALUATOR AND MONITOR /DAEMO/**

Adaptive data management analyzer for evaluating data compression techniques 04 p0489 A66-13620

**DATA ANALYSIS**

Dynamic data /waveforms/ analysis comparing analog with digital methods for speed, costs, flexibility, reliability, etc [SAE PAPER 650818] 01 p0033 A66-10480

Basic techniques for studying random data and distinguishing it from deterministic data [SAE PAPER 650825] 01 p0033 A66-10826

Research, development, test and operation simulating devices used in aircraft construction supply real time data, considering human factor, costs, etc 01 p0054 A66-10871

Data analysis and estimation of probability of finding sought magnitude within experimental error limits 02 p0261 A66-11810

Discrepancies in data concerning aurora type sporadic ionization in E region obtained by various high latitude stations 02 p0225 A66-12136

European Space Technology Center including upper-atmosphere scientific experiments, instrumentation, satellite control, data analysis, etc 03 p0352 A66-12481

Data analysis from film of framing camera with rotating mirrors, using frame edges as reference lines, calculating necessary corrections 05 p0677 A66-14863

Input initiation energy and potential impact energies available under processing conditions, interpreting test data 05 p0787 A66-15138

Doppler radar accuracy investigation, noting wide distribution of systematic error 07 p1064 A66-17668

Data analysis of experiments with open-cycle supersonic EGD generator for application as power source and comparison with mathematical model 07 p0993 A66-18314

Data compendium on neutral composition of atmosphere at altitudes from 100 to 200 km, noting nitrogen and oxygen concentration values from optical and mass spectroscopic studies 09 p1376 A66-20991

Data systems requirement for geographic research, noting use of orbiting sensors to obtain information on terrain, vegetation, human and animal activities, etc 10 p1532 A66-21522

Data analysis of pre-SC field intensity increases and receivable time of WWV signal at Hiraiso, Japan, and Canadian stations for 50 geomagnetic storms 12 p1872 A66-24471

DATAN, curve fitting process to approximate data and elimination of problems for programming engineer by data analysis 13 p2028 A66-26325

Machinability data for hard-to-machine materials, noting cost reductions, tool holder test program, cutting fluids, fixtures, producibility, etc [ASTME PAPER MM66-178] 14 p2300 A66-26958

Discrepancies in data concerning aurora type sporadic ionization in E region obtained by various high latitude stations 14 p2287 A66-28092

Tabular data on magnetic storms and on geomagnetic and solar data furnished by Swiss Federal Observatory 16 p2801 A66-30726

Orbital elements for Telstar communications satellites, using angle only and/or angle range data time as input information 16 p2723 A66-30898

Reevaluation of data and equations used in calculation of air viscosity coefficient and application to wind tunnel experiments 16 p2685 A66-30911

Explorer XVIII plasma flux measurement data analysis, plasma detector, map of transition zone between magnetosphere and solar wind and associated energy spectra 18 p3168 A66-34351

Amplitude analysis and statistical implications of random data analysis applied to evaluation of random signals 18 p3135 A66-34498

Solar particle propagation in magnetic fields revealing anisotropies in proton flux analyzed from Pioneer VI space probe data 18 p3170 A66-34536

Data on energy and angular distribution of high energy muons, noting detector and structural bursts 18 p3220 A66-35193

Displays of navigation data showing horizontal situation against moving map, noting use of standard charts, provision for permanent record, etc 19 p3398 A66-36733

Apollo Spacecraft Test Data Evaluation System, noting functions, operation and performance 20 p3662 A66-37247

Systems producing germanide phases noting phase diagrams of germanides of s-elements, ds-elements, fds-elements and sp-elements 20 p3616 A66-37415

Naval weapons A-7A maintainability requirement effect on management and design and analysis of early flight test data 20 p3496 A66-37920

Rocket instrumentation for galactic X-ray observation, noting scintillation counter, proportional counter and GM counter 20 p3636 A66-38237

Data statistical analysis of solar radio bursts over wide frequency range and relation to solar flares 21 p3815 A66-39372

Computer simulation experiments design for industrial systems, considering variance techniques, multiple ranking procedures, sequential sampling and spectral analysis 22 p3870 A66-40132

Statistically designed experiments in wind tunnel test programs dealing with exhaust nozzles, discussing data analysis techniques [AIAA PAPER 66-742] 23 p4052 A66-41326

Electronic reliability - IEEE Conference, New York, May 1966 24 p4178 A66-42087

Data analysis on probability papers for gamma, normal and Weibull /including exponential/ distributions 24 p4230 A66-42088

**DATA COMPRESSOR**

Redundancy reduction techniques for data compression and adaptive telemetry for aerospace application 01 p0032 A66-11131

Adaptive data management analyzer for evaluating data compression techniques 04 p0489 A66-13620

On-line computer-based aids for investigating effect of sensor data preprocessing and information compression procedures on data transmission bandwidth and reliability 19 p3307 A66-35686

Video data compression by redundancy techniques, using a posteriori curve fitting techniques to adaptively change effective resolution as function of picture detail 20 p3557 A66-37203

Data compression for TV transmission from space, using improved gray scale /IGS/ and coarse-fine PCM systems 20 p3561 A66-38262

Adaptive telemetry applied to data compression, analyzing redundancy reduction, adaptive sampling, data reconstruction, etc 21 p3708 A66-39480

Digital filtering system comprising only few integrated circuits and using addressshift register combination, compared with analog devices 23 p4067 A66-41168

Data compression feasibility for data transmission from unmanned spacecraft in deep space 24 p4282 A66-42682

**DATA CONTROL SYSTEM**

Flow of data and control information from apparatus to computer and use of microprogrammed controller 12 p1827 A66-23829

Evaluation of total square integrals arising in minimization problems of discrete data systems not requiring expansion of determinant for solution 12 p1850 A66-24265

Instrumentation simulation, discussing data system simulator facility, noting application for telemetry and instrumentation design 20 p3542 A66-37248

Logical processing units and interconnection networks design noting reliability, fault diagnosis, computer coordination of data and control processes, etc 22 p3871 A66-40728

Optimum pulse transfer functions for multivariable digital ergodic stochastic

processes 23 p4051 A66-41853

**DATA CONVERSION**

High data rate SHF communication receiver for demodulating analog or digital information, noting components 13 p2023 A66-25656

Navigational information conversion from digital readout to pictorial display 16 p2743 A66-30670

**DATA CONVERTER**

One-way microelectronic airborne digital data converter intended for use in automatic carrier landings 06 p0824 A66-15969

Data converter system for conditioning, recovery and display of aircraft position and altitude data permitting real time surveillance by ground observer 16 p2651 A66-30564

Real time cardiorespiratory rate monitor for data converter on Gemini space program 19 p3288 A66-35703

**DATA CORRELATION**

Adaptation of linear classifier without data repeating and behavior of classifier parameters 04 p0490 A66-13622

Standardization of machining criteria for aerospace materials, compiling data about tool design, planning, manufacturing, costs, etc, on simple form [ASTME PREPRINT MM66-714] 12 p1887 A66-24418

Time correlated burst retransmission PACM telemetry system, memory requirements, data time delay and bandwidth utilization efficiency 14 p2244 A66-28431

Correlation of simultaneous optical and radio auroral data showing that radio wave scattering belt includes visual auroral belt 16 p2692 A66-30329

Data correlations on forced-convective heat transfer to cryogenic fluids by nucleate, film and transition region boiling 20 p3677 A66-37098

**DATA HANDLING SYSTEM**

**SA SCIENTIFIC DATA CONDITIONING SYSTEM**

Standard Navy Maintenance and Material Management System /3M System/ detailing aviation portion of maintenance data collection program 01 p0033 A66-10118

Data control constant-bandwidth frequency system and tricom system discussed as examples of better methods of taking advantage of communication frequency spectrum 04 p0480 A66-13727

Data handling and dissemination program noting storage, retrieval, cost, automatic methods, avoidance of redundant information, etc [ISA PREPRINT 1.7-1-65] 05 p0638 A66-15515

Saturn V diphas data modem, describing computer system for prelaunch checkout 06 p0868 A66-15989

Stabilization, communication, data handling and power subsystem requirements for AOSO [AIAA PAPER 64-333] 08 p1303 A66-18817

Spaceflight data handling with emphasis on data compaction techniques based on weighted-information theory, Karhunen-Loeve theory, area recording and transmission procedure 08 p1187 A66-19536

Advanced Data Management computer programming to provide generalized routines for functions common to large class of command and management problems 10 p1623 A66-22050

Launch vehicle, spacecraft, command and data station and data utilization for meteorological satellite systems, satellite stabilization and orbit types 11 p1777 A66-22306

Digital data handling method for air traffic control system employing plan position indicators and video correlator for radar video signal analysis 11 p1732 A66-22899

Semi-automatic data system for Model C stellerator, noting oscilloscope/camera modifications 16 p2706 A66-30829

Palletized cargo systems, transit time reduction and ground support system data handling and documentation 17 p2846 A66-32844

Binary synchronous communication in additive non-Gaussian noise, discussing optimal nonlinear detector for digital data

transmission through non-Gaussian channels 18 p3067 A66-33901  
 Satellite instrumentation, discussing data handling systems, cosmic ray detection, signal and information processing, etc 20 p3556 A66-36963  
 Visual displays to aid pilot to fly, monitor and control power plant, navigational and other equipment and communicate with ATC ground stations 20 p3508 A66-36996  
 Automation of air traffic control, discussing radar, data handling and data communication 20 p3595 A66-37003  
 Data management system synthesis for acquisition, processing and transmission of data aboard manned spacecraft 20 p3514 A66-37209  
 Apollo Spacecraft Test Data Evaluation System, noting functions, operation and performance 20 p3662 A66-37247

## DATA LINK

Feedback control system in design of delta-modulation data transmission system 05 p0654 A66-14610  
 Laser communications link security against interception, examining frequency bandwidth for minimum SNR 06 p0891 A66-16650  
 Link design and transmission rates for entry and surface measurements during space exploration to Mars 13 p2021 A66-25249  
 Direct and relay link communication from Martian surface station 13 p2021 A66-25250  
 Cost and performance comparison of satellites, relay links, waveguides and lasers, showing line-of-sight microwave relay is best wideband data transmission medium 14 p2238 A66-27667  
 Computer optimization of baseband design of angle-modulated unified carrier space-ground communication link 19 p3299 A66-35664  
 Automated improvement of design /AID/ computer using nonlinear programming techniques to solve optimization problems 19 p3308 A66-35872  
 Extravehicular activities interface with data recording system and economical recovery of optimum quantity of data 19 p3291 A66-35967  
 Early Bird satellite project using proven designs in spacecraft, launch vehicle and Earth stations to provide reliable microwave link between North America and Europe for TV and telephone 22 p3865 A66-40068

## DATA PROCESSING

SA AUTOMATIC DATA PROCESSING SYSTEM  
 SA COMPUTER PROGRAM  
 SA INFORMATION  
 SA INFORMATION PROCESSING  
 SA SCIENTIFIC DATA CONDITIONING SYSTEM  
 SA VOICE DATA PROCESSING SYSTEM  
 Pulse code modulation /PCM/ for telemetry and communication between Gemini spacecraft Agena D satellite and ground stations for data processing and display 01 p0031 A66-10938  
 Data automation system /DAS/ on Mariner IV Mars probe involving real and nonreal time for experiments during cruise and encounter flights 01 p0034 A66-11119  
 Processing technique for scientific data telemetered to Earth from Mariner IV Mars probe 01 p0034 A66-11121  
 Spectral measurement of solar simulator sources using polarization interferometer spectrometer 02 p0226 A66-11219  
 Analog-to-digital conversion system for automatic meteorological data collection and transmitting system 02 p0251 A66-11259  
 Linear filtering concepts in imaging and optical data processing systems, including three-dimensional photography obtained by wave front reconstruction 02 p0240 A66-11453  
 Development in U.S. of laser application with table including government supported programs in photography, data processing, radar, etc 02 p0240 A66-11455  
 System of data processing in real time applicable to digital computer Univac 418 02 p0193 A66-11600  
 Autonomous spacecraft navigation system with data processed by optimal filtering from star/local vertical observation 02 p0255 A66-11630  
 Navigation system for supersonic transport

considering central digital computer with data processing systems with feedback 02 p0256 A66-11898  
 Numerical objective analysis for stratospheric constant pressure data at various levels 02 p0254 A66-11983  
 Computer processing of data obtained from panoramic vertical sounding of ionosphere to separate reliable portions of height-frequency characteristic from total 02 p0224 A66-12122  
 Optical data processing techniques considering storage, manipulation, holography and pattern recognition using matched filters 03 p0378 A66-12997  
 Practical data processing of stress rupture results for steels with elevated operating temperatures, tentative procedure proposed and applied 03 p0384 A66-13161  
 FM telemetry digitizing system operating on-line in real time environment results in automatic data processing 04 p0489 A66-13600  
 Content addressable memory systems promise increased computational capability for Army data processing 04 p0490 A66-13686  
 Control system 465L used by Strategic Air Command noting automated functions, data processing, integration of human and electronic elements, etc 04 p0507 A66-13687  
 Optimum satellite search equipment and procedure consisting of preliminary search and data processing 04 p0482 A66-13970  
 Data processing procedures of Apollo onboard navigation system for determination of position and velocity 05 p0712 A66-14640  
 Resampled data systems and error between output of second sampler and input signal to first sampler [ISA PREPRINT 1.12-3-65] 05 p0635 A66-15504  
 Processing satellite data at Goddard Center noting Tiros IR data, cloud pictures and Imp measurements 06 p0837 A66-15933  
 Spacecraft crew monitoring system for evaluating performance capabilities and physiological state 06 p0818 A66-16241  
 Functional requirements for computer navigational system for Concorde aircraft 07 p1065 A66-17672  
 Approximation for function calculated in N points randomly selected in region D 07 p1061 A66-18509  
 Fluid logic elements and amplifiers for data processing, signal amplification and guidance and control 08 p1199 A66-18698  
 Processing signal information from digital rate gyros and accelerometers in analytic, gimballess inertial platform 08 p1253 A66-19530  
 Multistage extremum searching process leading to development of dynamic programming system, discussing application 09 p1362 A66-20628  
 ESRO/ELDO Space Documentation Service, describing system characteristics, NASA agreement, indexing and search strategy 09 p1473 A66-20658  
 Thermospheric wind velocities computed from satellite orbital data 09 p1376 A66-20992  
 Radio telescope techniques applied to astronomy, noting data processing and antenna receiving systems including masers, parametric amplifiers, etc 10 p1602 A66-21064  
 Parallelism incorporated in large computers for increasing computational power, including internally overlapped and uniform and multiple instruction 10 p1506 A66-21212  
 Telemetering and data processing systems and sensor equipment of Mariner IV including TV camera, magnetometer, ion chamber, plasma probe, etc 11 p1778 A66-23115  
 Digitized spark chamber for balloon and satellite gamma ray astronomy, noting detector array, high voltage system and data acquisition and handling systems 12 p1877 A66-23687  
 Automatic handling of information by analog recording on magnetic tape for control, monitoring and maintenance of aircraft 12 p1880 A66-23817  
 Hybrid computer methodology and electronic data processing applied to quality evaluation of test operations 12 p1828 A66-23837  
 Data processing centers integration through ground and satellite

telecommunications networks for global information network [AIAA PAPER 66-331] 12 p1824 A66-24798  
 Deep space network /DSN/ for navigational and communications support to NASA lunar and planetary space programs 13 p2021 A66-25248  
 Ground system design, data processing, digital command and digital-human interface in flight operations problems for unmanned spacecraft on planetary exploration mission 13 p2190 A66-25257  
 Lower bounds on computation times of certain input-output transformations and tradeoff relation between computation time and dimensionality of Turing machine tapes 13 p2027 A66-25802  
 Data processing approach for management control of aircraft manufacture [SAE PAPER 660205] 13 p2211 A66-26391  
 Operations of CNES station network including work program, controlling development and data collection and verification received from satellites 14 p2270 A66-27551  
 Moire data recording and processing techniques in thermal strain fields at high temperatures, comparing experimental data with elasticity theory 14 p2400 A66-27768  
 Computer processing of data obtained from panoramic vertical sounding of ionosphere to separate reliable portions of height-frequency characteristic from total 14 p2287 A66-28081  
 Optimal scientific satellite PFM encoding system circuit design and digital data processing 14 p2244 A66-28429  
 Automatic air traffic control development in France 15 p2534 A66-29126  
 Experimental data concerning electron, photon and muon components of extensive air showers, noting scintillation counters, Geiger-Muller counters, muon detectors, etc 15 p2579 A66-29522  
 Soviet book on physiological methods in astronautics including collection, transmission and procession of medical information from long space flights 15 p2445 A66-29734  
 Updating of air cargo documentation permitting intransit control and orderly accumulation of statistical information, noting forms and teletype machines 15 p2621 A66-29800  
 Effect of modifying digital filter weights derived on least squares error basis through multiplication by certain weighting functions 16 p2659 A66-30535  
 Apollo/Saturn S-II telemetry data processing systems 16 p2652 A66-30567  
 Launching range facilities of Diamant rocket including equipment, radars, interferometers, telemetry, data processing, etc 16 p2682 A66-31233  
 Additive noise effect on SNR of decoded data, noting quantization and error role on noise composition 17 p2873 A66-31966  
 Data processing techniques for analyzing turbulence records and for estimating response of aircraft to atmospheric turbulence 17 p2843 A66-32329  
 Meteor velocity determination via diffraction method, noting instrumental errors, recording and data processing techniques, etc 17 p3000 A66-32340  
 Optimal control theory in design of aerodynamic shapes, flight paths, guidance and control logic, data processing logic, etc 17 p2950 A66-32682  
 Computer controlled digital display techniques for direct editing of research data 17 p2877 A66-32943  
 Manual methods of entering navigational data on cards for input into computer 17 p2956 A66-33447  
 Automation in flight safety, noting role of radar, flight control system reliability, data processing system used, etc 17 p2848 A66-33485  
 Improved processing of moire data by use of numerical and optical filters to eliminate noise in moire patterns 18 p3134 A66-33716  
 Capabilities of Lunar Television Image Converter system used for digital processing of Ranger and Mariner pictures 18 p3113 A66-34496  
 Flight data recording and processing system using magnetic tape for digitally

computing airborne data on flight testing of VTOL aircraft 18 p3073 A66-34679

Electronic data on electromagnetic core structure of extensive air showers 18 p3211 A66-35130

Independent research management 19 p3480 A66-35534

Data processing of PFM telemetry whereby resolution of frequency measurements is dependent upon SNR, for application to satellite parameters 19 p3301 A66-35696

Implementation and individual units design for DATA-CORE telemetry processing system utilized in data acquisition and processing from Saturn/Apollo 19 p3307 A66-35708

Microminiaturization in automatic control equipment and digital computers - Symposium, International Federation of Automatic Control and International Federation for Information Processing, Munich, October 1965 19 p3322 A66-36806

Core-memory-programmed telemetry system for aerospace vehicle with application capability for deep-space probes, orbiting spacecraft or avionics data systems 20 p3513 A66-37199

Processing of satellite observations obtained within INTEROBS program dealing with atmospheric density determination and calculation of satellite orbital elements 20 p3518 A66-37847

Systems tests coverage for data processing system 20 p3523 A66-37950

Semiautomatic mechanical system for evaluation of rocket booster test stand oscillograms 20 p3561 A66-38065

Horizon sensor data processing with compensation for statistical properties of errors, noting application of optimal filtering theory 21 p3766 A66-38882

Integrated navigation system /INS/ using stellar inertial subsystem with optimum data processing 21 p3767 A66-38891

Space modulation systems characteristics, considering data flow rate, spacecraft weight and power, antenna gain, noise figure, etc 21 p3706 A66-39477

Digital computer processing of Tiros, Nimbus and Essa vidicon cloud pictures for machine nephanalyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055

Automatic processing of VLF data from FR-1 satellite 22 p3870 A66-40164

Algorithm construction for processing of telemetry data in determination of space vehicle trajectories, applying dynamic filtering method 22 p3980 A66-40463

Data processing of signal reception from Soviet satellites indicates radio signals scintillation caused by diffraction of waves from ionospheric nonuniformities 22 p3866 A66-40467

Japanese air traffic control using real time computer data processing 22 p3945 A66-40617

Advanced spaceborne computer concepts - WESCON, Los Angeles, August 1966 22 p3870 A66-40725

On board computer simultaneously processing spaceborne data including life support, energy management, human performance control, etc 22 p3871 A66-40726

Associative memory organizational approaches for onboard data processing of spacecraft 22 p3871 A66-40727

Pattern recognition computer operating under automatic control and stored program control for data transfers, system operation, man-machine interface and display operations 23 p4041 A66-41056

Digital TV spectrometer for measuring optical radiation from reentry vehicles, using IR vidicon and magnetic recording for data processing 23 p4069 A66-41665

Diurnal variation of ionospheric irregularities, using differential Doppler method for analysis of data transmitted by Beacon satellite 24 p4200 A66-42596

Ground radar systems for missile defense providing faster data processing, sensor location optimization, computer control, etc 24 p4175 A66-42953

Literature survey of content-addressable and associative memory systems, noting hardware, logical operations, speed, cost, etc 24 p4177 A66-43184

## DATA PROCESSOR

Low cost airborne fixed-point data processor designed to operate with nondestructive readout instructions, constant memory and separate destructive-readout memory 08 p1184 A66-19522

Universal programming languages and processors, survey and new concepts 12 p1826 A66-23825

Associative parallel processor using word and bit logic and sequential-state-transformation mode, with application to picture processing and pattern recognition 12 p1827 A66-23830

Lockheed multiprocessor simulation system /LOMUSS I/, data processing system for computer design and analysis 12 p1827 A66-23832

Real time ground computer for Athena system and input/output data requirements in multiprocessing jobs 12 p1827 A66-23836

System approach and requirements of particular switching system of Automated Patching System /Aps/ for use on Atlantic Missile Range /AMR/ 12 p1818 A66-24596

Microminiaturized R-11 digital computer for real time computational requirements in radar data processing, fire and command control, automatic navigation, checkout, etc 21 p3707 A66-38675

Packaging monolithic integrated circuits in UNIVAC 1824 Aerospace Computer Central Processor 22 p3878 A66-40714

## DATA READOUT SYSTEM

Solid state camera system consisting of monolithic phototransistor mosaic sensor and molecular digital readout system 06 p0878 A66-15975

Graphical method by which small local users of meteorological satellite pictures can identify geographical position of features in image [AIAA PAPER 66-439] 16 p2708 A66-31467

Logic and operation principle of model of recording device for high speed readout of digital and alphabetic information from digital computer 17 p2928 A66-33494

Transfluxor program store for airborne digital computer, noting wiring pattern, economics, read amplifier, etc 18 p3072 A66-33562

Visual write-erase-nonstore and electrical readout accurate tracking display storage tube operating on principle of secondary electron emission charging of thin film dielectric 22 p3927 A66-40287

## DATA RECORDER

### SA WEATHER DATA RECORDER

Portable shock and environmental recording system 16 p2703 A66-30482

Photographic data recorder noting simultaneous event and data recording capability 22 p3917 A66-39994

Critical Data Recorder /CDR/, small autonomous instrumentation package to be carried aboard space vehicle and furnish data on series of maneuvers 24 p4212 A66-42684

## DATA RECORDING

Silicon avalanche light sources for photographic data recording 05 p0677 A66-14831

Automatic potentiometer for recording data of cosmic ray intensity obtained by neutron monitor 06 p0881 A66-16603

High data rate radar cross section measurement system for high angular precision and direct digital recording on magnetic tape 10 p1501 A66-21621

Optical techniques for satellite tracking and star identification, describing ASTRO II theodolite with photoelectric data recording 12 p1883 A66-24933

Data interpretation from ballistic and space missiles using telemetry, analog signal variation, voltage conversion systems, etc 13 p2022 A66-25494

Coherent light recording/reproducing techniques based on Debye theory of coherent light source focusing 13 p2091 A66-25541

Plasma diagnostics in terms of response times, noting conversion of phase frequency deviations of probing signal, data recording for plasma in motion and expression for waveguide frequency 14 p2298 A66-28472

Collection of information and

announcements pertaining to rocket and satellite launchings including objectives, stations, data exchange, etc 15 p2600 A66-29902

Data recording and information transfer for defects in aircraft 16 p2715 A66-31200

Data recording and telemetry system for sounding rocket, noting operation and testing results 19 p3307 A66-35680

Extravehicular activities interface with data recording system and economical recovery of optimum quantity of data 19 p3291 A66-35967

FM data systems noting design, error analysis, applications to data recording and transmission, etc 21 p3708 A66-39478

High impedance electrode technique for large-scale flight physiological data collection, emphasizing skin preparation 22 p3856 A66-39790

Automatic, multichannel system for data recording and processing obtained in studies of ionospheric structural inhomogeneities, containing magnetic-tape memory and device for digital tape memory and device for digital computer input 22 p3920 A66-40772

Medico-biological methods based on data recording on board rockets and spacecraft and telemetering information to Earth 24 p4169 A66-43141

## DATA REDUCTION

Calibration procedures and statistical analysis for error reduction in ballistic camera lead-screw type comparator 02 p0228 A66-11380

Functional characteristics of Navy Doppler tracking system and satellites used for geodesy, noting data reduction procedures and system tests 04 p0514 A66-13610

Concise numerical technique for reduction of data from thin platinum film heat transfer resistance thermometer 12 p1876 A66-23608

Servo tester with automatic data acquisition and reduction /STADAR/, discussing design and operational capability in Apollo program 13 p2027 A66-25661

Modeling and data reduction techniques for obtaining spectrum signatures of low gain LF airborne antennas 13 p2044 A66-26747

Improved gray scale and coarse-fine PCM systems for digital television bandwidth reduction, considering spacecraft application 14 p2235 A66-27036

Optimization of data acquisition and reduction systems generated by random vibration, considering dynamic ranges 16 p2655 A66-30447

Economical method of reduction of environmentally obtained shock data 16 p2703 A66-30483

Digital data compression techniques applicable in spacecraft television systems, emphasizing bandwidth reduction techniques 16 p2653 A66-30891

Downrange radar and optical data reduction used for evaluation of ejection velocities of ballistic missile penetration aids at deployment [AIAA PAPER 66-405] 16 p2804 A66-31464

Automatic reduction of recorded flight data from balloons equipped with radiation detectors and SPARMO telemetry 17 p2926 A66-33148

Large aperture millimeter wave antenna for high resolution tracking measurements and real-time data reduction 18 p3084 A66-34303

Effect of 49-, 64- and 100-term expansion of geomagnetic field on reduction of omnidirectional proton counting rate data 18 p3108 A66-34532

LEM Data Reduction System that performs concurrent data processing and telemetry conversion on computer time-shared arrangement 19 p3299 A66-35662

Data reduction techniques for vacuum measurements by mass spectrometry, emphasizing matrix algebra techniques 22 p3918 A66-40234

## DATA RETRIEVAL

### SA INFORMATION RETRIEVAL

Environmental testing, spacecraft configuration, data retrieval and flight simulation in OAO 08 p1203 A66-19517

## DATA SMOOTHING

Maximally reliable exponential prediction

equations for data rate limited tracking servomechanisms 08 p1183 A66-18931  
 Computational data smoothing by minimum mean square error  
 estimation 10 p1550 A66-21839  
 Smoothing recorded tracings of cosmic ray detector 11 p1704 A66-22403  
 Buffer storage in digital radar smoothing irregular output data flow, noting decreasing bandwidth requirements 11 p1654 A66-22656  
 Deterministic type waveform analysis techniques for noisy repetitive transient functions, noting application to hybrid computer processing of exercise ECGs 12 p1810 A66-24233  
 Optimal filter in solution of linear mean square estimation problem when process statistics are undefined 12 p1848 A66-24249  
 Mathematical model for geomagnetic field for 1965 given by internal and external spherical harmonic coefficients 16 p2695 A66-30718  
 Construction method for rms-optimal digital smoothing devices, noting case of astatic systems 16 p2670 A66-30768  
 Best straight line calculated by least squares method 16 p2736 A66-31007  
 Convolution product theory applied to smoothing neutron monitor data of daily variations in cosmic ray intensity 18 p3186 A66-34808  
 Stress-strain distribution of sharp corners effect on surface of elastic body, examining mathematical difficulties in application of Lamé equation and boundary data smoothing 23 p4135 A66-40991

## DATA STORAGE

## SA MAGNETIC TAPE

## SA MEMORY STORAGE UNIT

Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 04 p0484 A66-14058  
 Static and dynamic characteristics of four-layer semiconductor switches as components of binary storage circuits 09 p1356 A66-20627  
 Probability distribution data analysis in real time, using delay-line time-compression storage as information source in analog and digital form 12 p1825 A66-23760  
 Two sufficient conditions for monotonic variation of signal to noise ratio of optimal filter during storage of video pulse 17 p2873 A66-32224

## DATA TRANSMISSION

## SA COMPUTER

## SA PULSE TRANSMISSION SYSTEM

## SA REDUNDANCY ENCODING

Insertion of 2 bits of specific code into frame of digital data of burst-error-correcting code for synchronism recovery 02 p0190 A66-11524  
 Maximizing flow from source to sink in lossy communication net in which flow through edge is attenuated 02 p0208 A66-11905  
 Book on channel construction for data transmission using phase-shift keying, considering relative phase telegraphy and noting subassemblies, noise effect, etc 03 p0336 A66-13285  
 Binary pulse sequence conversion to pseudoternary codes for data transmission 04 p0474 A66-13423  
 Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 04 p0479 A66-13615  
 Redundant data omission for reducing transmission bandwidth, associated noise vulnerability and optimum prefiltering 04 p0490 A66-13623  
 Synthesis of optimum discrete system for continuous information transmission, using statistical theory of estimates 04 p0482 A66-13971  
 Principles of data communication reviewing digital systems, modulation methods and spectral shaping of data signals to achieve maximum noise tolerance 05 p0633 A66-14991  
 Limitations of communication system transmitting data from analog source obtained, using theorem in Shannon paper on information theory 06 p0828 A66-16115  
 DECTRA long range navigational aid, DECTRA airborne receiver and Omnitrac computer 07 p1068 A66-17702  
 Time division method of multiple access to

military communications satellite by several ground stations 08 p1180 A66-18713  
 Optimization of transmitted signal and receiving filter for data transmission system with fixed channel and detection process 08 p1183 A66-18932  
 Noise rejection properties of nonmemory discrete-data transmission systems employing information feedback, decision feedback or combined 08 p1183 A66-19096  
 Optimum number of phase-quantization steps in phase-shift keying communications system for maximum data transmission rate, using binary integration method 08 p1183 A66-19097  
 Analog message transmission by optimum angle modulation system and rate distortion function deriving mean square error 09 p1360 A66-19923  
 Data pulsed transmission over electron-injection laser communication system, using continuous waves 09 p1385 A66-19934  
 Upper and lower estimates derived for Shannon reliability of information transfer in channel that is symmetrical with respect to input 09 p1397 A66-20648  
 Telemetric technique based on data modulation and coding for satellite data transfer, stressing noise suppression, operation flexibility, error correction, etc 11 p1651 A66-22366  
 Data transmission by continuously-radiating power source moving away from receiver and fluctuation noise of uniform frequency spectrum 11 p1654 A66-22633  
 Algorithm for data transmission system automatic adaptive equalization, employing change of settings during transmission in response to variation in transmission channel characteristics 11 p1656 A66-23088  
 Principle of distributed reception of information 12 p1847 A66-23737  
 Salient hardware, software, and operational features of machine for automatic graphics interface to computer /MAGIC/ operating display system 12 p1827 A66-23835  
 Brillouin principle, formulated positively to express information amount in terms of physical entropy, applied to information transmission by electromagnetic field using thermodynamics, noting quantum mechanical expressions 12 p1817 A66-24337  
 Wire and data communication - IEEE International Convention, New York, March 1966 12 p1818 A66-24594  
 Items affecting information transmitted from payload landed on remote planet to Earth via communications satellite including orbit, transmission policy and orbit injection error effect on communication capability [AIAA PAPER 66-314] 12 p1823 A66-24780  
 Social and legal questions posed by development of large-scale information grids [AIAA PAPER 66-318] 12 p1824 A66-24789  
 Asymmetric instability and charge motion in metal-silicon oxide-silicon structures 12 p1932 A66-24823  
 Optimum realizable transmitter waveforms for high-speed data transmission, noting application to low pass filter channel 13 p2019 A66-25146  
 Phase coherent digital M-ary transmission with binary waves through Gaussian channel 13 p2022 A66-25554  
 Shannon model for capacity of time-continuous and time-discrete Gaussian channel with inputs perturbed by independent noise random variable 13 p2024 A66-25938  
 Residual error probability for cyclic binary code data transmission on symmetrically random noise channels 14 p2245 A66-26795  
 Book on modulation as applied to information transmission, discussing mathematical background, linear modulation systems, FM, PM, etc 14 p2239 A66-27718  
 Error detection techniques for maximizing average rate of information transmitted through burst error channel 14 p2243 A66-28346  
 Real-time telemetry data system for linking remote tracking stations with central station near Cape Kennedy 14 p2243 A66-28348  
 Time correlated burst retransmission PACM telemetry system, memory requirements, data time delay and

bandwidth utilization 14 p2244 A66-28431  
 efficiency  
 Noise stability for wideband analog methods of information transmission based on analysis of probability distribution density, using normal rms error and anomalous error 15 p2451 A66-29119  
 probability  
 Transmission and information processing rate of human visual system 15 p2435 A66-29450  
 Binary block codes simultaneously correcting additive and synchronization errors in data transmission systems 15 p2452 A66-29660  
 Properties of Mars atmosphere analyzed by ejected capsule from spacecraft, noting communications system 16 p2650 A66-30556  
 Functioning period of remote control systems in sporadic data transmission determined using mathematical methods of queueing theory 16 p2669 A66-30766  
 Analog communication over randomly time varying channels 16 p2654 A66-31331  
 Automatic control systems with carrier frequency information transmission channel, deriving transfer functions 16 p2672 A66-31552  
 Improvements to be realized through use of single channel black coded communication system 17 p2873 A66-31967  
 Closed circuit television applied to data transfer in air traffic control, discussing accident prevention and information provision to aircraft 17 p2874 A66-32356  
 Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost 17 p2878 A66-33122  
 Analog form data transmission via FM compared to digital form via phase shift keying, noting accuracy, power and bandwidth required, output signal to noise ratios, etc 18 p3067 A66-33902  
 Antisolar astronomical probe data transmission system requiring large high-gain antenna for transmission at 40 AU 19 p3300 A66-35669  
 Design of Apollo project lunar-based telemetry system for transmitting experiment data to Earth for one year 19 p3300 A66-35671  
 Instrumentation of bending moments on large space boosters, discussing ground wind restrictions, telemetry system used, data transmission link, etc 19 p3356 A66-35678  
 Integration of spacecraft tracking, telemetry and command systems using frequency multiplex subcarriers and angle modulated RF signal 19 p3300 A66-35681  
 On-line computer-based aids for investigating effect of sensor data preprocessing and information compression procedures on data transmission bandwidth and reliability 19 p3307 A66-35686  
 Phase comparison telemetry consisting of passive VHF receivers and CW transmitters for satellite detection 19 p3301 A66-35692  
 Adaptive on-off communication system for binary data transmission over noisy channel of unknown attenuation 19 p3302 A66-35709  
 Relationships among space activity, space law and intellectual property, i.e., copyright and patent law 19 p3484 A66-36223  
 Periodic burst technique for real-time retransmission of data from multiple asynchronous PCM telemetry links, providing accurate determination of individual sample time 20 p3513 A66-37200  
 Reliability design requirements for Data Transmission System for Jupiter Precursor Spacecraft 20 p3513 A66-37208  
 IBM 7094 programmed in FORTRAN IV used to determine sidebands in FM with complex periodic modulation functions 20 p3522 A66-37212  
 In-flight stress measurements on coaxial counterrotating helicopter blades, using semiconductor strain gauge with HF telemetric data transmitters 20 p3668 A66-37504  
 Noise effect on synthesis of discrete systems with and without feedback channel for transmitting continuous messages, using binary signal and criterion of minimum rms error 20 p3538 A66-37745  
 Communication design techniques for coding set of discrete memoryless channels

where transmitter and receiver have no knowledge of channels 21 p3705 A66-39144

Threshold signals and optimal modulation parameters of analog methods of transmitting information under conditions of ideal reception 21 p3705 A66-39253

FM data systems noting design, error analysis, applications to data recording and transmission, etc 21 p3708 A66-39478

Single-sideband FM for data transmission on vibration and acoustic measurements, noting SNR performance, transmission link, etc 21 p3706 A66-39479

Unmanned space vehicle on board measurements and data transmission to ground station, examining temperature and propellant measuring 21 p3741 A66-39631

Space vehicle telemetric data transmission by FM, PCM, frequency multiplex, etc 21 p3717 A66-39633

Modulation and demodulation for probabilistic coding, noting error chances and interrelations affecting performance of communications system 21 p3707 A66-39636

Plurality-count diversity combiner for fading M-ary transmission, noting nonbinary alphabets with plurality count combining for transmission of binary data 22 p3865 A66-40069

Principle of distributed reception of information 22 p3865 A66-40080

Electronic navigation system for marine applications, using communications satellite as data relay link 22 p3945 A66-40324

Narrow laser beam pointing technique in deep space-to-earth data transmission for reduction in error sources 22 p3867 A66-40496

Information and failure warnings monitoring by flight crew during autopilot operation, particularly during very low visibility landing [ICAS PAPER 66-17] 22 p3945 A66-40671

Spacecraft and Earth-terminal antennas for interplanetary communication via high power information transmission 22 p3881 A66-40748

Midpath airplane interference to digital transmission in tropospheric radio, considering scattering of radiant energy by atmospheric layers 23 p4040 A66-41594

Lasers applied to logic, memory, input-output and data transmission-linkages parts of computers 24 p4225 A66-42804

**DATING**

**SA RADIOACTIVE DATING**

Stellar evolution and evolutionary sequences, use of high speed computer methods and application to age determination of stars 09 p1448 A66-20098

Neutron activation analysis of K-Ar age for Barwell, England olive-hypersthene chondrite of December, 1965 16 p2807 A66-31760

**DAZZLE PROJECT**

**S RADAR TRACKING**

**DC**

**S DIRECT CURRENT /DC/**

**DC-8 AIRCRAFT**

**S DOUGLAS DC-8 AIRCRAFT**

**DC-9 AIRCRAFT**

**S DOUGLAS DC-9 AIRCRAFT**

**DCS**

**S DEFENSE COMMUNICATIONS SYSTEM /DCS/**

**DE HAVILLAND DH-121 AIRCRAFT**

Cockpit display correction methods used in design of Trident aircraft 03 p0328 A66-12882

Design trends in landing gear for medium- and short-range jet transports 07 p0987 A66-17286

Design criteria and operational performance of Doppler-driven map display device installed on Trident aircraft 07 p1077 A66-17802

Automatic landing development in autopilot and autoflares for Trident aircraft 10 p1553 A66-21362

Automatic landing system on trident aircraft 18 p3131 A66-33560

**DE HAVILLAND DH-125 AIRCRAFT**

HS 125 twin-jet 500-mph executive aircraft, construction, pressurization, maintenance, etc 13 p1995 A66-26282

Design, development and structural testing of DH 125 executive jet aircraft

[SAE PAPER 660216] 13 p1996 A66-26393

**DE HAVILLAND DHC-5 AIRCRAFT**

Hydraulic system of De Havilland Buffalo tactical aircraft is self-sufficient 10 p1486 A66-22033

**DE LAVAL NOZZLE**

Steady state irrotational flow of perfect gas in plane and axisymmetric Laval nozzles 01 p0008 A66-11015

Design considerations, materials and problems of De Laval nozzle as applied to liquid and solid propellant rocket engines 07 p1040 A66-18306

Inviscid flow of compressible conducting gas with aligned magnetic field through axially symmetric Laval nozzle in various transition regions 11 p1636 A66-23256

Discharge rate of multicomponent gas mixtures through de Laval nozzle from chamber containing adsorbent bed 12 p1979 A66-24587

Gas rate control of given Laval nozzle when asymptotic gas flow of unvariable type is maintained continuously near nozzle center 14 p2221 A66-28281

Expansion of supersonic flow of air with suspended solid particles during passage through Laval nozzle 14 p2279 A66-28325

Spray ejector operating in pulse rather than steady state regime, noting capability and formation of de Laval nozzle 19 p3450 A66-36603

**DEAD RECKONING**

Accuracy of navigation techniques for North Atlantic flights evaluated, based on Loran A and Doppler/GM compass automatic dead reckoning system 07 p1072 A66-17760

**DEAFNESS**

**SA HEARING LOSS**

Noise and vibration causing acoustic fatigue leading to deafness of aircrew 06 p0811 A66-16065

**DEBRIS**

**S RADIOACTIVE DEBRIS**

**S SPACE DEBRIS**

**DEBYE FUNCTION**

Diagrammatic method to obtain Helmholtz free energy of classical electron gas used to derive pair distribution function beyond Debye-Huckel result 02 p0266 A66-11478

Wing broadening in plasma of hydrogen Lyman-alpha line by local electron and quasi-static ion fields calculated, considering impact theory of electron collisions, quadrupole and dipole interactions and existent asymmetries 03 p0405 A66-13138

Complex Wentzel-Kramer-Brillouin phase integral method and low density universal instability caused by finite Debye length 07 p1088 A66-17957

Cyclotron radius, magnetospheric boundary and Debye length scaling parameters for magnetospheric cavity arising from solar wind-induced geomagnetic storm and visibility of quasi-Van Allen belts 14 p2269 A66-27124

Cross sections for sticking electrons to spherical charged particles, considering Debye screening distance of Coulomb force field 16 p2754 A66-31158

Atomic energy levels in plasma, considering energy spectrum of hydrogen-like atom in plasma, based on cut-off Coulomb potential model 20 p3607 A66-37373

**DEBYE TEMPERATURE**

Correlation expressing reduced coefficient of thermal expansion as function of reduced Debye temperature for metallic solids used for predicting coefficient at any temperature 14 p2411 A66-27375

Functional interdependence of four distinctly different parameters represented by gamma in study of thermodynamical relations for shock waves 24 p4193 A66-42270

**DECABORANE**

Friedel-Crafts methylation of decaborane, determining reactant parameters and relationship of decaborane conversion and alkylate composition 05 p0629 A66-14541

Chemistry of decaborane and structure and reactivity of stable derivatives 11 p1649 A66-22947

**DECAY**

**S DEGRADATION**

**S NEUTRON DECAY**

**S ORBIT DECAY**

**S PARTICLE DECAY**

**S PLASMA DECAY**

**S RADIOACTIVE DECAY**

**DECAY RATE**

Mean lives of 3s, 3d, 4s, 4p and 4d states in hydrogen and relative initial radiation intensities 07 p1083 A66-18420

Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 08 p1179 A66-19482

Directional intensity and decay time of scintillations from anthracene and p-terphenyl single crystals under alpha particle bombardment 11 p1750 A66-22465

Bounds for decay times of pendulum damper vibrating in plane containing spin axis of space vehicle [AIAA PAPER 64-658] 12 p1954 A66-24693

Electron density and temperature in decaying hydrogen plasma determined, using monochromator 13 p2145 A66-25730

Rate of dissociative electron capture by heavy molecular ions developed in semiclassical formalism 13 p2136 A66-26271

Helium-neon laser afterglow and metastable helium atoms under long pulse excitation 14 p2307 A66-27335

Spatial distribution and time decay of intensities of geomagnetically trapped electrons from high altitude nuclear burst 20 p3643 A66-38339

Spatial distribution of trapped particles measured by Explorer XV satellite, noting decay time constants and energies 20 p3643 A66-38340

Contraction to improve isotropy of grid-generated turbulence 22 p3899 A66-40381

Generation-recombination noise and lifetime measured using photoconductive decay in n-and p-type Ge samples doped with shallow impurities 24 p4253 A66-42357

**DECELERATION**

**SA ACCELERATION**

**SA IMPACT DECELERATION**

Aerodynamic spacecraft deceleration systems examined by hydraulic analogy, noting Mach number effects on flow disturbances 04 p0507 A66-13533

Ion recombination effects on inhomogeneous cylinder deceleration in rarefied plasma 04 p0551 A66-13858

Parachute operation at high Mach numbers and dynamic pressures for reentry vehicle deceleration [AIAA PAPER 66-24] 07 p0989 A66-17888

Cardiac arrhythmias occurring during positive and negative acceleration 09 p1335 A66-20532

Deceleration of body in rarefied plasma owing to interaction with neutral and charged particles and electromagnetic fields 09 p1465 A66-21016

Computer system for control of deceleration of electrodynamic shaker during vibration test 16 p2678 A66-30465

Spacecraft longitudinal and lateral stability along reentry trajectory during deceleration period determined, using equations of motion 17 p2846 A66-32897

Plasma oscillation theory of nonlinear deceleration effect and thermal conversion of electron beams upon passage through plasma 17 p2974 A66-33284

Atmospheric reentry trajectory of space vehicle at orbital velocities and constant lift-drag ratio 18 p3244 A66-33879

Aerodynamic deceleration systems - AIAA Conference, Houston, September 1966 22 p3848 A66-40589

Limiting initial deceleration forces generated by supersonic decelerators, noting that decelerators deployed in wake region of body result in divergent wake and drag force reduction 22 p3845 A66-40595

Aerodynamic deceleration from high Mach number for ALARR project, noting rocket stage collision and deceleration systems 22 p3987 A66-40609

**DECELERATOR**

**SA ACCELERATOR**

**SA PARACHUTE**

First-stage decelerator and stabilization balloon system for payload recovery for Mach 4 and 10 flight 04 p0585 A66-13531

Interaction between hypersonic wake flow and aerodynamic deployable decelerator, predicting pressure and heat transfer of decelerator 22 p3846 A66-40605

Super- and hypersonic first-stage

- decelerators for stabilization and initial deceleration for final recovery device, noting Ballute and reefed ribbon canopy types, testing, fabrication, etc 22 p3850 A66-40606
- Dynamic characteristics of rotary wing decelerator and recovery system obtained, using frequency oscillation technique [AIAA PAPER 66-733] 22 p3893 A66-40624
- DECIMAL-TO-BINARY CONVERSION**
- S BINARY-TO-DECIMAL CONVERSION**
- DECISION ELEMENT**
- Adaptive method for synthesis of circuit of majority decision elements which realizes given logical function 14 p2268 A66-28043
- DECISION MAKING**
- Systems effectiveness through design function management, noting necessity of decision guide activities 11 p1789 A66-23441
- Asymmetric instability and charge motion in metal-silicon oxide-silicon structures 12 p1932 A66-24823
- General family of two-stage chain sampling inspection plans 15 p2506 A66-28789
- Optimum algorithm derived for making binary decisions in decision systems of hierarchic structure 15 p2469 A66-29054
- Air traffic controller performance in detecting possible conflicts among aircraft 15 p2534 A66-29125
- Images of automatic recognition system for two-dimensional patterns move in rapid nonstop manner across stationary scanning unit composed of bank of photodiodes 21 p3705 A66-39145
- Digital computer programming to evaluate designs until optimality is found in aerospace structures 22 p3922 A66-40023
- DECISION THEORY**
- SA STATISTICAL DECISION THEORY**
- Evaluation of alternatives which involve risk-taking decisions under numerous uncertainties for planning and system selection 01 p0167 A66-10050
- Operational readiness, decision-making technique for management taking into account reliability, maintainability and safety 01 p0167 A66-10051
- Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 01 p0051 A66-10734
- Zero-crossing data and decision-making procedures used by computer in recognition of vowels 03 p0338 A66-13020
- Classification of unknown observations into one of two categories when decision boundary is determined from independent samples in each category 06 p0833 A66-16660
- Optimal control by random sequences, dynamic programming and Wald sequential analysis 09 p1362 A66-20644
- Signal detectability in elicited observing rate and decision processes in vigilance 11 p1646 A66-23373
- Vigilance performance in observing light flashes analyzed for effect of noise and signal rate 11 p1646 A66-23375
- Decision theory and dynamic programming applied to problems concerning cost and weight minimization in structural engineering 13 p2207 A66-26699
- Search theory extremal problems, considering theorems in terms of maximum principle for finding optimal strategy 24 p4232 A66-42750
- DECODER**
- Pulse operated miniature RF switch for space use and design from command decoder 03 p0348 A66-13343
- DECODING**
- Parallel decoding for discrete channel with statistically independent noise 02 p0189 A66-11404
- Optimum message decoding in communication systems with pulse code modulation, using minimum square-error criterion 04 p0489 A66-14415
- Adaptive decoding technique for analyzing information-carrying signals in order to control signal to noise ratio during transmission time of single compound signal 20 p3522 A66-37384
- Generalized minimum distance decoding that permits likelihood information to be used, yielding same probability of error as maximum likelihood decoding 21 p3703 A66-39137
- Communication possibility over memoryless channel with computational iterative decoding scheme that is asymptotically complex 21 p3704 A66-39141
- DECOMMUTATOR**
- Computer design of programmable decommutator for multiformat PCM telemetry data 14 p2246 A66-28432
- DECOMPOSITION**
- SA ABLATION**
- SA DEGENERATION**
- SA DEGRADATION**
- SA DISSOCIATION**
- SA ELECTROLYSIS**
- SA HYDROLYSIS**
- SA PHOTODECOMPOSITION**
- SA PHOTOLYSIS**
- SA PROPELLANT DECOMPOSITION**
- SA THERMAL DECOMPOSITION**
- Decomposition of large-scale mathematical problems in nonlinear programming 13 p2117 A66-25350
- Chemical kinetics of borane and diborane compounds, decomposition rates and molecular dissociation energy 15 p2447 A66-29237
- Radiation induced chemical decomposition in inorganic solids such as alkali metals and metallic sulfates 23 p4111 A66-41212
- DECOMPRESSION**
- SA COMPRESSION**
- SA EXPLOSIVE DECOMPRESSION**
- Explosive decompression effects on respiratory system, considering pressurized suits operating at high altitudes 06 p0816 A66-16063
- Effect of sudden intense noise and near vacuum decompression on cardiac rate of anesthetized and unanesthetized dogs 19 p3286 A66-36380
- Rapid decompression and exposure of fresh foods to near vacuum conditions 22 p3856 A66-39789
- DECOMPRESSION SICKNESS**
- Decompression sickness noting caisson and subatmospheric disease effects, symptoms, causes and prevention 10 p1488 A66-22109
- Physiological factors in decompression sickness, noting recompression, plasma replacement, etc 16 p2638 A66-30624
- Simulated orbital flights with extravehicular activities, determining incidence and severity of flyers bends due to decompression and exercise 17 p2856 A66-32148
- Task interruption and performance decrement of active pilots and flight crew personnel following rapid decompression 18 p3061 A66-33782
- Rapid decompression effects on dogs and subhuman primates, studying physical and physiological responses after loss of consciousness and recompression effects 19 p3285 A66-35839
- Physical and chemical variables of space cabin environment and effect on human body, discussing oxygen toxicity, decompression sickness, fire and blast hazards and radio protection 19 p3292 A66-36232
- Residual pathologic changes in central nervous system of dog following rapid decompression to 1 mm Hg 19 p3286 A66-36381
- DECONTAMINATION**
- SA CONTAMINATION**
- Biological burden estimation of Mars probes and capsules and various fabrication and decontamination procedures 13 p2014 A66-25287
- Microbiological decontamination of lunar spacecraft during mechanical integration and assembly 22 p3857 A66-40044
- DEEP SPACE**
- Proposal of epiatmosphere as term for outer space, noting advantages and disadvantages of terms space, upper space, cosmic space, etc 19 p3484 A66-36225
- DEEP SPACE INSTRUMENTATION FACILITY /DSIF/**
- Mission profile, operations facilities and science subsystem of Mariner IV 01 p0144 A66-11110
- Deep space tracking stations, discussing digital computers for monitoring functions such as real time measure, station performance, failure detection, etc [ISA PREPRINT 1.11-1-65]
- 05 p0635 A66-15498
- Antisolar astronomical probe data transmission system requiring large high-gain antenna for transmission at 40 AU 19 p3300 A66-35689
- Mission-dependent Deep Space Instrumentation Facility equipment designed in support of Pioneer spacecraft program including command encoder, computer buffer and demodulator synchronizer 19 p3315 A66-35670
- Narrow laser beam pointing technique in deep space-to-earth data transmission for reduction in error 22 p3867 A66-40496
- Deep space payloads, booster probes, sensors and communication systems for missions from Jupiter to Pluto 24 p4281 A66-42678
- Data compression feasibility for data transmission from unmanned spacecraft in deep space 24 p4282 A66-42682
- DEFECT**
- S CRYSTAL STRUCTURE DEFECT**
- S FLAW**
- S INHOMOGENEITY**
- S POINT DEFECT**
- DEFENSE**
- SA AIR DEFENSE SYSTEM**
- SA MILITARY TECHNOLOGY**
- SA MISSILE DEFENSE**
- SA SPACE SURVEILLANCE SYSTEM**
- Flexibility in strategic retaliatory weapons offered by bombers and missiles, discussing defense capability offered by SAC 08 p1322 A66-18558
- Polaris nuclear powered submarine defense capability, noting mobility advantages and command communications system 08 p1322 A66-18559
- U.S. military and strategic posture in aerospace, discussing intelligence and defense systems, strike capabilities and support programs 09 p1472 A66-20170
- DEFENSE COMMUNICATIONS SYSTEM /DCS/**
- Military communications satellite system noting radio frequency, TWT amplifier, synchronous altitude, etc 05 p0633 A66-15170
- [AIAA PAPER 65-323]
- Defense Communication Satellite Program for reliable worldwide military communications 08 p1179 A66-18569
- Satellite providing optimum communications to military users, noting gyroscopic stabilization of antennas, major characteristics, etc 12 p1955 A66-24740
- [AIAA PAPER 66-267]
- Characteristics and performance of synchronous satellite military communication system 12 p1859 A66-24741
- [AIAA PAPER 66-268]
- Initial Defense Communications Satellite Project /IDCSP/, current status, objectives and subsystems 12 p1820 A66-24742
- [AIAA PAPER 66-269]
- Military communications satellite developments, describing worldwide network of ground stations and 15 to 22 satellites in near-synchronous equatorial orbit 14 p2243 A66-28362
- Unclassified information concerning military communication satellite system 16 p2655 A66-31650
- U.S. strategic missile and air defense, noting Nike-X system 24 p4297 A66-42950
- DEFENSE INDUSTRY**
- Development management and cost control in British defense 07 p1156 A66-17487
- Defense equipment reliability noting specifications, field data collection, control plan, etc 12 p1833 A66-24083
- Defense Materials System control of copper, aluminum and steel and proposed program for readiness and contingency planning of external resources for aerospace industry [SAE PAPER 660286] 14 p2416 A66-27297
- DEFLAGRATION**
- Detonations in gaseous mixtures and in condensed phase, examining effects of pressure, temperature and confinement on normal detonation 12 p1980 A66-24932
- Pressure deflagration limit of high energy solid propellants increased to super atmospheric pressures by composition changes

[AIAA PAPER 66-679] 18 p3163 A66-34226  
Laboratory burners used as experimental  
analogs of actual propellant deflagration  
process, examining dependence of composite  
solid propellant deflagration on mixture  
ratio

[WSCJ 66-25] 18 p3161 A66-34417  
Solid propellant ignition, discussing  
deflagration wave propagation along gas-  
solid grain surface, flux equilibrium  
equation, etc

[AIAA PAPER 66-668] 18 p3165 A66-34441  
Propellant deflagration control for  
interaction between fluid dynamic  
disturbance and propellant combustion  
reaction 22 p3969 A66-39874  
Deflagration of hydrazine perchlorate in  
pure state and with fuel and catalyst  
additives 23 p4117 A66-41225

**DEFLECTION**  
**SA FLOW DEFLECTION**  
Large deflection analysis of circular ring  
plates under uniform transverse force along  
inner edge 02 p0298 A66-11584  
Rationalized method for beam deflection  
under concentrated loading 02 p0299 A66-11796  
Large deflection analysis of elliptical plate  
of lenticular section subjected to uniform  
temperature gradient through thickness  
03 p0440 A66-13271  
Monograph on Levy method for deflection  
of loaded simply-supported infinite plate  
strip, introducing class of real functions  
04 p0589 A66-14011  
Permanent deformations in circular plates  
subjected to uniformly distributed impulses  
compared with predictions of bending  
theory of rigid-plastic plates 11 p1781 A66-22612  
Deflection of structural members in  
Haystack antenna calculated, using framed  
structure analysis /FRAN/ program,  
obtaining improved grid analogy 15 p2614 A66-29616  
Tensile and compressive creep behavior  
deduced from deflection measurements in  
creep bending tests on beams of trapezoidal  
cross section 15 p2614 A66-29666  
Deflection of uniformly loaded circular  
plate supported at discrete points equally  
spaced along circumference of concentric  
circle 16 p2820 A66-31274  
Starting friction and kinetic friction of  
PTFE fabric-lined spherical bearings and  
deflection and permanent set under static  
loading 17 p2929 A66-31932  
Von Karman plate equations specialized to  
describe large symmetric deflections of  
circular membranes 17 p3020 A66-31999  
Dynamic characteristics of built-up plates  
analyzed with modified Reissner principle,  
obtaining natural frequencies and mode  
shapes 17 p3022 A66-32011  
Large deflections of symmetrically loaded  
shallow membrane shells of revolution,  
considering existence of boundary layer  
near edges and using asymptotic  
analysis 17 p3025 A66-32480  
Transverse displacement of circular plate  
containing radial crack examined, using  
small deflection theory 18 p3249 A66-33597  
Light deflection technique for transient  
shock wave detection by phototube  
activation based on Snell law 19 p3357 A66-35811  
Shell stability in Euler formulation, taking  
into account actual redistribution of stresses  
that results from initial deflection and  
creep, noting buckling of closed cylindrical  
shell under axial compression 21 p3829 A66-38978  
Deflection surface of structural net of any  
arbitrary shape determined by considering  
net to be portion of larger net with zero  
deflections along boundaries 21 p3833 A66-39538  
Deflection analysis of temperature  
gradient-induced buckling, curling and  
bending in thin unsupported plate with  
variable thickness 23 p4146 A66-41996  
Successive approximation analysis of large  
deflections of elastoplastic shell under  
bending deformation and load carrying  
capacity 24 p4290 A66-42440  
Linear elastic small deflection theory of  
natural frequencies of vibration of  
rectangular sandwich honeycomb plate with

mass attachment 24 p4292 A66-43046

**DEFLECTOR**  
Optical beam deflection technique using  
interferometer cavity illuminated by gas  
laser beam 15 p2512 A66-28689

**SA THERMAL DEGRADATION**  
Focused laser coherent radiation-induced  
degradation of solid methylene and gas  
chromatographic analysis of reaction  
products 17 p2933 A66-31870  
Feasibility of doping techniques for  
eliminating extraterrestrial solar degradation  
of ZnO used as pigment for spacecraft  
thermal control surfaces 17 p2938 A66-31961  
Electric contact design factors for shock  
vibration environments 24 p4186 A66-43058

**DEGREE OF FREEDOM**  
**SA MULTIPLE-DEGREE-OF-FREEDOM  
SYSTEM**  
Parameter and matrix solution techniques  
for analyzing forced vibrations response of  
damped multidegree of freedom systems  
[AIAA PAPER 65-786] 03 p0438 A66-13070  
Nonlinear spring-mass system with many  
degrees of freedom subjected to periodic  
exciting forces, deducing steady state forced  
vibrations equal to forcing function  
[ASME PAPER 65-APMW-30] 04 p0593 A66-14230  
Response to multiple random excitation of  
system with multiple degrees of freedom,  
connecting spectral density matrix of  
generalized coordinates with corresponding  
generalized forces 12 p1972 A66-25004  
Control problems in operation of transport  
aircraft noting degrees of freedom,  
computer aid, human factor, etc 13 p2047 A66-25497  
Excitation of vibrational degrees of  
freedom in molecular collision from  
vibrational relaxation data and molecular  
beam elastic scattering experiments 16 p2755 A66-31588  
Adiabatic invariants and third integrals of  
motion in periodic potentials in periodically  
time-dependent Hamiltonian systems of n  
degrees of freedom 17 p2945 A66-32292  
Force resonance oscillations of one degree  
of freedom system with randomly time  
varying natural frequency 17 p2959 A66-32802  
Nonlinear spring-mass system with many  
degrees of freedom subjected to periodic  
exciting forces, deducing steady state forced  
vibrations equal to forcing function  
[ASME PAPER 66-APMW-30] 18 p3249 A66-33591  
Approximate method for determining  
damping factors of mechanical oscillatory  
systems with many degrees of freedom  
described by linear differential equations of  
n-th order with constant coefficients 21 p3770 A66-38971  
Amplitude friction effect in single degree  
of freedom vibrating system by developing  
amplitude into approximate trigonometric  
series 22 p3917 A66-39669  
Theorem concerning use of instantaneous  
axis of rotation for simplification of small  
oscillation equation of angular  
momentum 22 p3992 A66-40300  
Optimization of VTOL control concepts  
with and without stabilization compared  
with six degree of freedom motion  
simulator, noting system failure effects and  
nonlinear concepts 22 p3851 A66-40675  
Stability conditions for system with two  
degrees of freedom, considering effect of  
inertial and resistance forces on inertialess  
body 23 p4137 A66-41001  
Gust design procedures based on power  
spectral techniques, considering atmospheric  
turbulence with aircraft as rigid body with  
single degree of freedom [ICAS PAPER 66-11] 23 p4017 A66-42073

**DEHYDRATION**  
Heat stress and minimal dehydration effect  
upon human tolerance to positive  
acceleration 03 p0326 A66-12353  
Effects, singly and in combination, of heat,  
exercise and hypohydration upon voluntary

dehydration in four acclimated physically-fit young men 06 p0812 A66-16533  
Quantitative coulometric analyses of water yield for thermal dehydration of solids, using electrolytic hygrometer cell 07 p1036 A66-18490  
Effects of chronic hypohydration on responses to tests of bodily functions, defining set points and mechanisms involved in changes in work performance 09 p1337 A66-20528

## DEHYDROGENATION

## SA HYDROGENATION

Comparison methods for relationship among enzymes that are same but belong to different organisms 04 p0460 A66-13367  
Catalytic dehydrogenation of hydrocarbons over chromia-alumina catalyst in absence of added hydrogen to determine heat sink capability 11 p1650 A66-23119  
Methylcyclohexane dehydrogenation over platinum-alumina in absence of excess hydrogen, yielding toluene and hydrogen 11 p1650 A66-23122

## DEICING SYSTEM

Temperature distribution of propeller heated by electric antifixer, with solutions for heater and propeller surface 09 p1328 A66-20753  
Beagle B.206 S aircraft power plant, vacuum system, air conditioning system, fire protection, hydraulics, fuel, oxygen, rain protection and deicing equipment 22 p3970 A66-39688

## DEIONIZATION

## S IONIZATION

## DELAY

## S TIME DELAY

## DELAY LINE

Delay characteristics of round and square magnetized rods of yttrium-iron garnet /YIG/ crystals compared 01 p0120 A66-10522  
Design of wideband microwave delay line using piezoelectric semiconductor transducers with acoustic gain 01 p0038 A66-10523  
Effectiveness of oscillatory circuits and delay lines for self-synchronization of polyphase multivibrators 01 p0045 A66-10992  
Effect of delayed feedback in respiratory disease analyzed for behavioral cybernetic theory, using computer-controlled delay 02 p0186 A66-11648  
Radar-pulse correlation system for discriminating between close targets at long range 02 p0191 A66-11801  
Compression of linear FM S-band pulses in axially magnetized yttrium-iron-garnet delay line 02 p0192 A66-11883  
Ultrasonic delay lines operating below 100 megacycles, particularly dispersive lines suitable for radar pulse compression systems 03 p0331 A66-12411  
Microwave acoustic delay lines made practical by low-loss propagation of microwave phonons at room temperature in single crystals 03 p0331 A66-12412  
Spin wave generation in nonuniform magnetic fields with application to magnetic delay lines 03 p0332 A66-12417  
Continuously tunable microwave delay equalizer consisting of 3-db directional coupler and two equal resonators 03 p0344 A66-13023  
Serrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 04 p0499 A66-14052  
Synthesis of circuits containing delay lines, considering storage elements for pulsed signals 04 p0499 A66-14053  
Sweep indicator as radar feedback filter, noting double delay 04 p0501 A66-14126  
Optical ultrasonic delay lines as correlators and variable code matched filters to achieve large time-bandwidth products and high data rates 05 p0631 A66-14821  
Yttrium iron garnet /YIG/ delay line application to radar range and amplitude calibrator, altitude simulator, microwave memory and electronically steerable antenna array 06 p0842 A66-15983  
Pure spin and spin-acoustic delay modes of single crystal YIG 06 p0847 A66-16104  
Automation of equalizer consisting of delay

line with adjustable taps 06 p0831 A66-16343  
Ultrasonic delay lines, operational principles, characteristics and basic structure of traveling wave devices for communication 06 p0831 A66-16365  
Helix frequency-scanning delay line design and characteristics 06 p0849 A66-16396  
GaAs diffusion-layer transducer for VHF acoustic delay line 06 p0852 A66-16639  
Properties of helical delay line used to feed frequency scanned X-band array, noting role of ball bearing inserted in helix 06 p0854 A66-16686  
Pulse code modulation coder, using delay line as coding network 08 p1186 A66-19744  
Phase correcting circuit construction using delay line cut into adder feedback circuit 09 p1360 A66-20295  
Fluid amplifier analysis predictions for prime-element conceptual models and jet amplifier dynamic effects 09 p1333 A66-20327  
Performance and wave growth of type-M transverse-field tubes in broad delay system 09 p1352 A66-20356  
Automatic time-domain equalizer consisting of delay line with adjustable taps 10 p1503 A66-21649  
Effectiveness of oscillatory circuits and delay lines for self-synchronization of polyphase multivibrators 10 p1510 A66-21668  
Steady state oscillations in hunting system, using nonlinear amplifier and artificial delay line 11 p1681 A66-23415  
Probability distribution data analysis in real time, using delay-line time-compression storage as information source in analog and digital form 12 p1825 A66-23760  
Materials for acoustic and magnetic microwave delay lines, discussing thin film piezoelectric transducers and magnetoelastic mode of microwave propagation 13 p2165 A66-25519  
Controlled-delay circuit with flip-flop oscillators for alignment of random pulse sequences 14 p2264 A66-27207  
Reflections effect on accuracy of measuring ultrasonic group delay time during amplitude and FM by sinusoidal voltage 14 p2236 A66-27249  
Propagation and amplification of helical waves in germanium bar solid state plasma in magnetic field parallel to bar current at room temperature 14 p2363 A66-27519  
Approximation of variable time delays and design of constant and variable delay circuits, noting simulation of delays in automatic control systems by computers 14 p2266 A66-27528  
Nonsteady coordinates of linear delay system determined from observable linear combination of phase coordinates 14 p2267 A66-27671  
Serrodyne frequency conversion determined, using sawtoothed FM of microwave oscillator and subsequent conversion with delay line in sawtoothed phase modulation, calculating phase distortion 17 p2884 A66-32218  
Synthesis of circuits containing delay lines, considering storage elements for pulsed signals 17 p2884 A66-32219  
Acoustic-array microwave grating quartz transducer creates variable delay characteristic with frequency 18 p3075 A66-33608  
Properties and performance capabilities of solid state delay lines composed of materials such as quartz, sapphire and YIG having low loss acoustic propagation 19 p3319 A66-36032  
Single-wave approximation of fields of cylindrical delay system with basic E-type wave propagating at variable phase velocity 20 p3515 A66-37381  
Rake system equipment for tropospheric scatter, noting delay-resolution capabilities and circuit stability 22 p3865 A66-40067  
Delay devices for pulse compression radar - IEE Conference, London, February 1966 23 p4033 A66-41013  
Pulse compression filter synthesis using ultrasonic delay lines 23 p4034 A66-41019  
Pulsed compression network for linear FM signals using short circuited delay line and with sweep frequency corresponding to output response peak 23 p4034 A66-41020  
Inhomogeneously filled waveguides containing dielectric used as microwave delay line for pulse compression

radar 23 p4035 A66-41021  
Cascaded hybrid rings as idealized model of wideband dispersive system in stripline 23 p4035 A66-41021  
Synthesis of prescribed frequency/group delay characteristics, using passive microwave components 23 p4035 A66-41021  
Insertion loss and delay characteristics vs frequency of one-port ferrimagnetic yttrium iron garnet delay line for pulse compressor at microwave frequencies 23 p4035 A66-41021  
Delay-line content-addressed memory with information retrieval by word association 24 p4177 A66-43183

## DELAY LOCK

## SA PHASE LOCK

Performance of delay-lock discriminator nonlinear feedback device for continuous tracking of delay difference between two correlated waveforms 06 p0842 A66-15979  
Binary delay-lock tracking-loop performance for various RF implementations 18 p3069 A66-34252  
DELTA FUNCTION  
Infinite helical sheath antenna driven by ring delta-function generator analyzed, using Fourier transform, noting decomposition of current distribution 17 p2886 A66-32388  
Asymptotic inequalities to determine phase volume within given boundaries with aid of Gibbs canonical distribution 21 p3756 A66-38738  
Frequency characteristic and transient delta function of plant, using algorithm based on correlation functions 24 p4188 A66-42483

## DELTA MODULATION

Feedback control system in design of delta-modulation data transmission system 05 p0654 A66-14614  
Delta modulation compared to other systems of pulse modulation, technologically and economically, noting analysis of dynamics to which input signal is subjected 09 p1346 A66-20564  
Random and burst channel error affects output signal-to-noise ratio of delta modulation system 13 p2019 A66-25145  
Asynchronous delta-modulation system with coded pulse generation according to certain change in amplitude 13 p2030 A66-25208  
Statistical characteristics derived for delta pulse-code modulation system, in which coded quantity represents difference between two sampled signal values 15 p2452 A66-29887  
Time frequency coded pulse communication systems, noting pulse-position, pulse-code and delta modulation, signal coding, etc 16 p2647 A66-30520  
Delta modulation pictorial encoding systems analyzed to determine parameters for image communication application 19 p3299 A66-35665  
Parameter evaluation of delta modulation encoding techniques for image communication applications by computer simulation 20 p3513 A66-37201

## DELTA WING

Nature and magnitude of turbulent boundary layer pressure fluctuations over two-dimensional surfaces and narrow delta wings 01 p0005 A66-10124  
Linearized supersonic theory for favorable thickness distributions and drag reduction for wings in supersonic flow [AIAA PAPER 65-716] 03 p0314 A66-12542  
Subsonic flow near trailing edge of low aspect ratio delta wing 04 p0454 A66-13518  
Aerodynamic characteristics of fixed-geometry double delta wing SST, noting low speed handling improvement due to vortex flow [AIAA PAPER 64-591] 05 p0610 A66-15069  
Delta wing vortex breakdown in terms of theory of stability of spiraling flows 07 p0979 A66-17478  
Pressure distribution and heat transfer for laminar boundary layer flow over highly swept blunt delta wings in hypersonic free stream [AIAA PAPER 66-130] 08 p1162 A66-18953  
Angle of attack, leading edge sweep and thickness effects on hypersonic flow field of slender delta wing 08 p1164 A66-19135  
Airport suitability for delta wing commercial supersonic transport, discussing noise objectives 09 p1365 A66-20698

Griffon 02 delta-winged aircraft with composite air breathing turbofanjet engine, noting achievements and prospects 11 p1761 A66-23248

Inviscid hypersonic flow over compression side of delta wing of moderate aspect ratio 12 p1796 A66-23605

Pressure distribution over slender delta wing, considering thickness effect 12 p1796 A66-23606

Lockheed supersonic air transport design development 13 p1995 A66-25758

Double-delta supersonic air transport low-speed operational characteristics, noting wind tunnel tests and design parameters 13 p1991 A66-25760

Pressure distribution along wing and body of wing-body combination 14 p2221 A66-28185

Operation and maintenance of Lockheed L-2000 double delta SST aircraft with high thrust engine and large delta wings, designed to meet civil aviation requirements [SAE PAPER 660295] 15 p2427 A66-29832

Three-dimensional flow separation of plane boundary layer caused by half delta wing on flat plate using Cooke small cross-flow method and Maskell separation criterion [AIAA PAPER 66-428] 16 p2631 A66-31465

Three-dimensional boundary layer flow over windward side of flat delta wing in hypersonic flow at moderate angle of attack, examining viscous-inviscid interaction [AIAA PAPER 66-492] 16 p2631 A66-31477

Delta and ogee planforms with nose planes, both with and without stabilizers 17 p2837 A66-31988

Flow along free border of conical vortex sheet above delta wing and rolling-up conically from apex 17 p2837 A66-32274

Vortex sheets rolling-up along leading edges of delta wings, comparison with slender body theory and conical flow 17 p2837 A66-32275

Coherent conical vortex sheet formation theory in two-dimensional and three-dimensional vortex filaments 17 p2906 A66-32276

Gap size effect on pressure and aerodynamic heating over flap of blunt delta wing in hypersonic flow [AIAA PAPER 66-408] 17 p2840 A66-32747

Parametric study of subsonic characteristics of low-aspect-ratio delta wings, noting role of airfoil thickness and free vortices above wing surface [AIAA PAPER 66-429] 17 p2841 A66-32754

Oblique shock wave formal determination of aerodynamic forces and pressure distribution on delta wings in supersonic or moderately hypersonic flow 21 p3695 A66-39602

Theory of wings with curved leading edges in supersonic flow, including delta wings with straight leading edges in case where motion is conical 23 p4008 A66-41379

Approximate second-order supersonic delta wing theory taking into account second-order differential equation via approximate particular integral 23 p4011 A66-41897

Inviscid hypersonic flow past flat wings at large angle of attack analyzed, using homogeneous layer concept of shock layer theory 23 p4013 A66-42014

Friction and turbulent heat transfer as function of Reynolds number applied to missile rounded-off forebody, delta wings, etc, using boundary layer equations 23 p4151 A66-42056

**DEMODULATION**

Yttrium iron garnet filters, noting envelope limiting characteristics for submegacycle range modulating frequencies and response parameters 06 p0845 A66-16089

Method of time domain analysis of nonlinear hybrid systems with first or fractional order data extrapolation 06 p0866 A66-16963

Linear demodulation of AM electromagnetic wave propagating through dispersive medium 06 p0836 A66-17033

Method of demodulating frequency-modulated wave train compared to method for time-modulated wave 09 p1344 A66-20400

High data rate SHF communication receiver for demodulating analog or digital information, noting

components 13 p2023 A66-25656

Optimal demodulation of analog-type signal transmitted through randomly fading channel, assuming additive Gaussian noise and using vector space approach 15 p2474 A66-29379

Measurement of physical quantity converted to form of AC signal, noting ripple-free circuit and several clamping arrangements 21 p3709 A66-38606

Continuous nonlinear recursive filtering based on Markov processes and state-variable concepts for application to optimum analog demodulation 22 p3868 A66-40717

**DEMODULATOR**

SA PHASE DEMODULATOR

SA PHASE LOCK DEMODULATOR

Low-threshold FM demodulator with bandwidth subdivision 09 p1346 A66-20560

Equivalent transfer function determined for quadrupole inserted between ideal modulator and demodulator from frequency characteristics 17 p2928 A66-33492

Mission-dependent Deep Space Instrumentation Facility equipment designed in support of Pioneer spacecraft program including command encoder, computer buffer and demodulator synchronizer 19 p3315 A66-35670

**DENMARK**

Danish space program, emphasizing polar ionosphere and high energy primary cosmic radiation studies 15 p2601 A66-29936

**DENSITOMETER**

SA GRAVIMETER

SA MICRODENSITOMETER

Video densitometer to extract data from video display, specifically densitocardiogram 06 p0819 A66-16851

Jovian phase variations and limb-darkening of surface detail examined by scanning isodensitometer 08 p1293 A66-19266

Flat plate in hypersonic flow analysis in shock tunnel, obtaining surface pressure, using electron beam densitometer 11 p1634 A66-22931

Scanning-electron-beam densitometer for measuring density distributions in rarefied gas flow 14 p2298 A66-28342

**DENSITY**

SA ATMOSPHERIC DENSITY

SA CURRENT DENSITY

SA ELECTRON DENSITY

SA ENERGY DENSITY

SA FLUX DENSITY

SA GAS DENSITY

SA ION DENSITY

SA MAGNETOSPHERIC ELECTRON DENSITY

SA MAGNETOSPHERIC ION DENSITY

SA METEORITE DENSITY

SA OPTICAL DENSITY

SA PACKING DENSITY

SA PHOTON DENSITY

SA PLASMA DENSITY

SA POWER DENSITY

SA PROBABILITY DENSITY

SA PROTON DENSITY

SA SPACE DENSITY

Liquid oxygen density as function of temperature and pressure 08 p1280 A66-19428

Spin-free transition density matrices, using permutation group algebra 15 p2547 A66-29620

Density, viscosity, surface tension, vapor pressure and vapor liquid equilibria data of liquid ozone-fluorine mixtures considered as Newtonian fluids 23 p4119 A66-41244

**DENSITY DISTRIBUTION**

Density distribution before sphere in low density hypersonic gas flow measured with electron beam densitometer 01 p0059 A66-10635

Flow visualization technique by thin high-energy electron beam moved with respect to flow 02 p0215 A66-11550

Dispersion relation of density waves in low pressure arc discharges 02 p0269 A66-11953

Distribution of high plasma density along semiconductor rod, noting surface recombination rate and assuming existence of high level injection at one end of rod 06 p0923 A66-16176

Electromagnetic wave propagation through semiconductor with nonuniform density distribution in transverse magnetic fields 06 p0923 A66-16177

Plasma convective instability, discussing

effect of axial density gradient on weakly ionized state 06 p0917 A66-16516

Potential and charge density distributions derived for stationary charged sphere and charged body moving through plasma 08 p1261 A66-18744

Radar echo effects of satellite disturbance in plasma medium, noting electron and positive ion density distribution 08 p1302 A66-18755

Nonsteady expansion of gas into vacuum in analysis of asymptotic solutions of Sedov 08 p1210 A66-19574

Non-Einsteinian gravitation, noting that expression for invariant density of free Lagrange gravitational field holds only for slowly varying weak fields 09 p1403 A66-20769

Plasma convective instability, discussing effect of axial density gradient on weakly ionized state 09 p1409 A66-20897

Spectral distribution of light scattered by density fluctuations in dense monatomic one-component fluid 09 p1404 A66-20960

Note on paper discussing lunar shape and internal structure in connection with inhomogeneity of density distribution, showing incompatibility of hypothesis with measurements 10 p1605 A66-21210

Spatial density distribution of cold plasma probed by electromagnetic field 10 p1570 A66-22005

Initial one-dimensional density discontinuity propagation in terms of mean free time between collisions 11 p1689 A66-22905

Density variation in Ar shock waves during translational adjustment for Mach 5 to 10 velocity range, using electron beam techniques 11 p1691 A66-22915

Shock front density distributions in Ar and He determined in shock tube, using electron beam attenuation 11 p1691 A66-22916

Plasma density distribution determined from microwave beam refraction as function of angle of incidence 12 p1922 A66-24217

Atmospheric environment effects on Saturn IB launch vehicle design, showing density profiles for various altitudes and listing extremes of thermodynamic variables at specific altitudes 12 p1906 A66-24479

Multivariate statistical analysis of wind sounding data, applying high degree of correlation between two wind parameters and empirical density function [AIAA PAPER 66-353] 12 p1907 A66-24489

Carbon dioxide relaxation processes in shock waves, measuring density variation, vibrational energy, relaxation time, shock density profile, etc 13 p2061 A66-25161

Second optical harmonic generation equations for steady state laser derived from density matrix 13 p2092 A66-25682

He-Ne laser homodyne spectrometer observation of broadening of spectral profile of light scattered from carbon dioxide near critical temperature and density due to density fluctuations 13 p2133 A66-26168

Plasma wave propagation and decay processes studied from profiles of plasma density in cylindrical metal vessel and results compared to Stark effect and framing camera photographic results 13 p2149 A66-26240

Plasmoid propagation in field-free space, discussing thermal expansion, velocity distribution, charged particle density distribution, energy distribution in absence of thermodynamic equilibrium, etc 13 p2154 A66-26528

Acceleration potential method for solving linear problems of wing hydrodynamics above interface between fluids differing in density, for arbitrary Froude number 13 p2067 A66-26530

Low aspect ratio wing moving above interface of two fluids of different density, replacing value of velocity potential by value obtained at large distance downstream from wing 13 p2068 A66-26539

Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 14 p2360 A66-27190

Non-Einsteinian gravitation, noting that expression for invariant density of free Lagrange gravitational field holds only for

slowly varying weak fields 14 p2334 A66-27304

Density ratio and transmission probability across conical converging diffuser in free-molecule flow with selected range of speed ratios, using Monte-Carlo method 14 p2219 A66-27416

Distribution and variation of atmospheric density over thermosphere, including auroral region, noting wind motion and high altitude circulation 14 p2382 A66-27618

Density variation observed from satellites in upper atmosphere 14 p2284 A66-27619

Density distribution in exosphere, particularly Maxwellian velocity distribution disturbed by light particle escape 14 p2284 A66-27620

Mean time to failure within given time boundaries and for continuous failure density evaluated via Weibull density function 15 p2526 A66-28806

Energy spectrum of primary photoelectron, using data from atmospheric density distribution, fluxes of solar XUV radiations and absorption and ionization cross sections 15 p2574 A66-28906

Bounds on density fluctuations and electrostatic oscillation spectrum for homogeneous collisionless plasma according to Maxwell-Vlasov equation 15 p2554 A66-29749

Equation for conditional overshoot density of normal stationary process in centralized and positional centralized control, noting error estimate 16 p2669 A66-30767

Spherical semipassive probe for density/altitude and pressure/altitude profile of planetary atmospheres, notably Mars and Venus 16 p2801 A66-30889

Performance of short supersonic nozzles producing expansion and density jumps in flow, noting efficiency in obtaining maximum driving effect 16 p2630 A66-31303

Exact determination of electron density distribution in finite anisotropic plasma by integral equation relating tangential electric field and HF plasma current 16 p2767 A66-31691

State density for highly doped semiconductor in magnetic field, obtaining results at near Fermi level energies and at bottom of conduction band 16 p2788 A66-31779

Coherence conditions effects on electromagnetic field density operators and photon density distribution in single excited mode 17 p2957 A66-31975

Solar corpuscular stream density distribution and trail curvature, noting space angle of ejection and flight trajectory 17 p2992 A66-32336

Surface wave propagation along plasma column noting discharge tube properties, density distribution variation with magnetic field, attenuation due to collisional losses, etc 17 p2970 A66-32651

Elastic model for evaluating stresses in Earth induced by density variations or topographic irregularities 17 p2921 A66-33226

Total number of cyanide molecules and diatomic carbon free radicals and density distribution in head of Arend-Roland 1957 III comet 17 p3010 A66-33381

Density field calculation for collisionless expansion of moving cylindrical gas cloud, with Maxwellian random velocity distribution superimposed on uniform initial velocity 18 p3103 A66-34933

Hydrogen density in coaxial plasma injector prior to application of high voltage to electrodes, noting experimental setup and results 18 p3151 A66-35072

Plasma stabilization mechanism for electron beam caused density variation, noting use of nonlinear effects 18 p3152 A66-35082

Transition region of pulse spectrum from EAS particle density recordings by Cerenkov and scintillation detectors 18 p3207 A66-35110

High energy nuclear active particles in EAS discussing lateral and zenith angle distribution energy spectrum, anisotropy, etc 18 p3207 A66-35111

Photoproduction, lateral density distribution, energy spectrum and muon component fluctuations in electron photon cascades 18 p3208 A66-35114

Barometric effect and density spectrum of photon-initiated EAS muons 18 p3208 A66-35115

EAS mu component fluctuations in density distribution and reception spectrum recorded, using hodograph detectors 18 p3208 A66-35116

Component composition and photonuclear interactions of photon-initiated EAS 18 p3209 A66-35121

Cloud chamber EAS density spectrum measurements at 2285 m 18 p3210 A66-35124

Altitude variation of EAS particle density and primary energy/nucleon spectra measured with proportional counters 18 p3210 A66-35125

Altitude distribution of combinations of meridional gradients of pressure, temperature and density 19 p3393 A66-35394

Spatial density distribution of cold plasma probed by electromagnetic field 19 p3407 A66-36089

Divergence of third-order term in density expansion of quantum-mechanical transport coefficients analogous to that for classical systems 19 p3401 A66-36173

Thermal radiation of nonhomogeneous plasma sheath, obtaining radiation intensity formula via fluctuation theory 19 p3409 A66-36281

Aspa device designed for study of composition, energy and density distributions produced when plasma blob is injected into mirror trap with adiabatic plasma compression 19 p3423 A66-36550

Cathode current density distribution, beam minimum radius and location and electrode current interception, using computer techniques on electron guns 20 p3528 A66-37490

Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555

Trapped electrons from Russian high altitude nuclear detonation examined, noting energy spectrum and mirror point density distribution 20 p3643 A66-38342

Lunar models of figure, density distribution and gravity field from Earth telescope data 21 p3812 A66-38822

Density distribution and shock wave profile of rarefied gas slip flows past blunt bodies determined, using multibeam interferometer 21 p3724 A66-38903

Photometry, polarization, structural peculiarities and density distribution of solar corona 21 p3813 A66-39121

Interferometric measurement of density distributions in shock layer of nonequilibrium flow field around cone 21 p3694 A66-39168

Radial current density distribution in homopolar, noting deviation of magnetic field and nature of current distribution around anode 22 p3953 A66-39757

Seasonal, diurnal and latitudinal variations of electron density distributions in topside of ionosphere as revealed by Alouette I satellite 22 p3909 A66-39974

LF wave propagation in inhomogeneous plasma column, deriving normal mode of expansion and perturbed dispersion curves 22 p3955 A66-40047

Plasma density distribution determined from microwave beam refraction as function of angle of incidence 22 p3957 A66-40581

Gas ionization by fast electron beam directed along waveguide leading to longitudinal distribution of secondary electron concentration 22 p3958 A66-40938

External control of radial distribution of plasma density for magnetoplasma stabilization against helical instability 23 p4103 A66-41486

One-dimensional approximation analysis of excess carrier density distribution in illuminated semiconductor and radiative recombination effects 23 p4115 A66-41857

Resistance network analog method determination of carrier density distribution and charge constant in p-n junction for two-dimensional axisymmetric case 23 p4115 A66-41858

Neutrino energy losses from vibrating neutron stars, noting density profiles 23 p4131 A66-41863

Combination of probability density functions for system error analysis, using convolution or transformation methods 24 p4189 A66-42827

Density fluctuations of penetrating particles in extensive air showers at various distances from shower axis 24 p4268 A66-42916

Superconductivity model with exact solution, determining energy levels, ground state energy, excitation spectrum, density variations, etc 24 p4259 A66-43088

### DENSITY MEASUREMENT

#### SA X-RAY DENSITY MEASUREMENT

Gas laser interferometers for plasma low electron density measurement 01 p0069 A66-10856

Densification rates for tungsten powder compacts sintered in hydrogen/bromine atmospheres compared with those sintered in hydrogen alone at high temperatures 03 p0385 A66-13207

Gravitational potential gradient for body consisting of positive or negative masses with known density extremum value and known or unknown volumes 04 p0514 A66-13449

Mach-Zehnder interferometer for visualization and analysis of density changes in gases, liquids and solids 04 p0520 A66-13762

Instrumentation techniques for new type of gas density measuring system using light scattered from laser beam as measured quantity 05 p0698 A66-15794

Pressure, density, temperature and wind measurements in mesosphere resulted from rocket soundings to determine structure 07 p1027 A66-17361

Schlieren color photography with tri-color filter, identifying small density gradient 07 p1018 A66-17614

Densities of binary mixtures of fused alkali nitrates with alkaline earth nitrates measured by manometric densitometer and expressed as linear function of temperature 08 p1177 A66-18617

Tunneling measurements on density of states of type II semiconductor films near upper critical fields 09 p1422 A66-20060

Coaxial capacitor for measuring density of fluids in both liquid and gaseous phase over wide range of temperatures and pressures 11 p1707 A66-22961

Dissociation rate of nitrogen behind strong shock waves in nitrogen-argon mixtures determined, using time-resolved interferometric measurements of gas density 12 p1861 A66-23616

Ballistic wind and density predictions, measuring wind and D-value at 500 mb, calculating missile response to atmospheric effects [AIAA PAPER 66-359] 12 p1906 A66-24478

Design and construction of probe measuring density of neutral atoms in quiescent alkali metal magnetoplasma, noting vacuum system, electric circuitry, etc 12 p1884 A66-24984

Density of six niobium spheres which are intended for use as rotors in superconducting gyroscope 13 p2106 A66-25072

Disturbance of thermal equilibrium of weakly ionized cesium contact plasma due to wall losses measured by Langmuir probe 13 p2137 A66-25117

Electromagnetic wave propagation near missiles during hypersonic atmospheric reentry and computer program for determination of dissociated and ionized particle density in nonequilibrium nitrogen-plasma flow 13 p2150 A66-26374

Falling sphere, solar XUV radiation absorption and pressure gauge mass spectrometry for density measurements of thermosphere, comparing results and noting discrepancies 14 p2284 A66-27615

Scanning-electron-beam densitometer for measuring density distributions in rarefied gas flow 14 p2298 A66-28342

Resonance probe for plasma density measurements consisting of vacuum cylinder, noting eigenfrequency 15 p2497 A66-28711

Densities of wrought aluminum alloys computed from rule of mixtures and metallurgical phenomena and compared with

- observed densities 15 p2522 A66-29075
- Shock transition in multihead spin structure of self-sustaining gaseous detonations in oxyacetylene mixtures, including interferometric and schlieren photographic density, temperature and pressure measurements 15 p2618 A66-29607
- Shock wave thicknesses and density ratios measured in helium, argon and nitrogen, using electron beam fluorescence method at various Mach numbers in wind tunnel 15 p2480 A66-29736
- Measurement of simple and central moments of one-dimensional density function applied to pattern recognition 15 p2475 A66-29864
- High resolution density data from radar observations of low altitude, polar orbiting satellites reveal longitudinal and geomagnetic variation, noting regression analysis 15 p2497 A66-30085
- Electrical discharge probe for transient density measurements in rarefied gas flow, noting density range, flow velocity, etc 16 p2701 A66-30380
- Absolute deuterium density by energetic deuterium beam probing of plasma 16 p2759 A66-30425
- Rocket borne ionospheric direct sounding instruments to measure ion and electron density, electron temperature, thermal electron energy distribution and space electric potential versus rocket potential 16 p2705 A66-30819
- Silicon, quartz and germanium single crystal density determined via hydrostatic weighting method 16 p2777 A66-30933
- High latitude density regime in upper stratosphere inferred from Arctic and Antarctic observations 17 p2922 A66-33343
- Equidensitometric photographic isophotometry of comets and other luminous objects 17 p3011 A66-33385
- Atmospheric density measurements for altitudes up to 74 km from X-15 flights using stagnation pressure method [AIAA PAPER 66-441] 18 p3104 A66-33646
- Falling sphere experiment instrumentation for aerospace density determination including sensor, transit-time accelerometer and telemetry system 19 p3356 A66-35672
- Resistance and frequency response range of sheath surrounding electrostatic probe floating in tenuous plasma 19 p3357 A66-35808
- Density of lithium, sodium and potassium up to 1600 degrees C, using pycnometer method, showing dependence of density on temperature 20 p3582 A66-36979
- Low temperature experimental apparatus for density determination of cryogenic liquids and mixtures under atmospheric and subatmospheric pressure 20 p3601 A66-37082
- Carbon dioxide flow density in wake of shock wave front 21 p3726 A66-39091
- Plasma decay technique to measure density in discharge tubes compared to value obtained by Langmuir probe 21 p3792 A66-39182
- Vapor condensation effects on wind tunnel measurements, noting relation between air-moisture and flow field, shock wave intensity increase and density measurements on circular airfoils 22 p3843 A66-39697
- Electron beam density measurements, discussing effect of elevated rotational and vibrational temperatures 22 p3918 A66-40365
- Number densities and composition of upper atmosphere determined by rocketborne mass spectrometers, estimating temperature variation with altitude 22 p3913 A66-40553
- Deep /1-10 micron/ penetration of ion implanted donors in silicon, measuring density profiles via C-V method and parameter of penetrating tail section 24 p4250 A66-42256
- DEOXYRIBONUCLEIC ACID /DNA/**
- UV radiation effect on viscosity and optical density of DNA solutions from calf thymus and rat spleen 01 p0018 A66-11193
- Space radiation of solar and cosmic origin and biological effects, examining DNA structure and radiation induced changes 04 p0463 A66-13897
- Characteristics, fine structure and mode of functioning of bacterial cell and artificial synthesis possibility 11 p1644 A66-22713
- Amino acid genetic code in which long sequences in DNA spell out instructions transcribed into RNA and subsequently into proteins 11 p1644 A66-22714
- Cosmic and UV radiation effects on breakdown of DNA and production of tumors in mice 13 p2008 A66-25642
- Radiation damage in deoxyribonucleoproteids at molecular and supermolecular levels 13 p2010 A66-26228
- Biochemical mutation, DNA, RNA and microorganisms infecting wing tanks of jet aircraft 13 p2011 A66-26546
- Resistance transfer factor episome analyzed by measuring inactivation by cobalt gamma radiation, phosphorus and tritium, suggesting existence of DNA 14 p2228 A66-27308
- DNA synthesis in cultured mammalian cells stimulated by UV light, using radioautography and density gradient centrifugation 19 p3287 A66-36436
- Physical properties of DNA-dependent RNA polymerase from *Escherichia coli* 20 p3505 A66-37054
- Ribonuclease effect on polymerase activity in *Azotobacter vinelandii* used to verify theory that RNA polymerase is inhibited by RNA produced in reaction 20 p3510 A66-37790
- Statistical mechanics DNA molecular model, noting bonding free energy between adenine-thymine and guanine-cytosine base pairs 21 p3699 A66-38530
- Nonrandomness in base sequences of DNA 21 p3702 A66-38542
- DEPENDENT VARIABLE**
- Control feel application to aircraft controls, noting man-machine system configurations, anthropometric and physical factors, sensory motor requirements, etc 17 p2869 A66-33446
- DEPOLARIZER**
- Depolarization of cosmic radio emission due to dispersion of Faraday rotation of plane of polarization of radio waves 09 p1441 A66-20334
- DEPOSITION**
- SA ELECTRODEPOSITION
- SA EPITAXIAL DEPOSITION
- SA SEDIMENT
- SA VACUUM DEPOSITION
- SA VAPOR DEPOSITION
- Varying deposition and firing conditions effect on range of detection of chemically deposited lead sulfide IR detector cells 03 p0407 A66-12332
- Oxidation resistant pack cementation coatings for refractory metal complex structures 19 p3370 A66-36140
- DEPRESSANT**
- Halides used as burning rate depressants on combustion stability of polyurethane/ammonium perchlorate base propellants, examining acoustic instability 23 p4119 A66-41435
- DEPRIVATION**
- S CONFINEMENT
- S SENSORY DEPRIVATION
- S SLEEP DEPRIVATION
- S STARVATION
- DEPTH PERCEPTION**
- SA STEREOSCOPIC VISION
- Simulated 3-D display techniques, considering application to television, air-traffic control, scene synthesis, radar target data and signal analysis 11 p1707 A66-22960
- Schoen hypothesis concerning image arrival time at cortex, depth values, retinal input, stereopsis, etc 17 p2862 A66-33089
- DERIVATIVE**
- S NEWCOMB DERIVATIVE
- DESCENT TRAJECTORY**
- Glider reentry descent trajectories from near Earth orbit calculated, emphasizing landing accuracy and mechanical and thermal stresses 04 p0584 A66-13525
- DESCRIPTIVE GEOMETRY**
- Mayor-Mises method for solution of kinematic and kinetostatic problems of three-dimensional mechanisms [ASME PAPER 66-MD-2] 21 p3741 A66-38475
- DESERT**
- Ecological patterns of microorganisms in desert soils 15 p2441 A66-29960
- DESIGN**
- S AIRCRAFT DESIGN
- S AMPLIFIER DESIGN
- S COMPUTER DESIGN
- S ENGINE DESIGN
- S EQUIPMENT SPECIFICATIONS
- S EXPERIMENT DESIGN
- S HELICOPTER DESIGN
- S LENS DESIGN
- S LOGICAL DESIGN
- S REACTOR DESIGN
- S SPACECRAFT DESIGN
- S STRUCTURAL DESIGN
- S SYSTEMS DESIGN
- DESORPTION**
- Alkali-ion desorption energies measured on polycrystalline refractory metals at low surface coverage by electron work function 02 p0263 A66-11483
- Evolution of gases from cometary nuclei by sublimation or desorption 17 p3009 A66-33372
- DESPINNING**
- Electronically despun switched antenna using variable phase shifters to control phase of incident power to circular array of elements [AIAA PAPER 66-302] 12 p1844 A66-24769
- Implementation of electronically despun satellite antenna system considering limits of impracticability because of excessive weight, control power, etc [AIAA PAPER 66-325] 12 p1844 A66-24795
- Electronically despun antenna and electronically controlled phase shifters to increase transmitter output power for spin-stabilized communication satellites 23 p4036 A66-41142
- DESTRUCTIVE TESTING**
- SA NONDESTRUCTIVE TESTING
- Instantaneous strength determinations for exponential failure distribution are ineffective in assessing underlying failure rate 03 p0342 A66-12899
- Destructive and nondestructive testing of fiber composite materials 05 p0773 A66-14815
- High speed tensile testing of materials under destructive loads at high strain rates 13 p2197 A66-26107
- Elastic and plastic deformation of polycrystalline metals exposed to ultrasonic load and high temperatures 15 p2523 A66-29601
- DETECTION**
- SA AIRCRAFT DETECTION
- SA CORRELATION DETECTION
- SA ERROR DETECTING CODE
- SA FLAW DETECTION
- SA INSPECTION
- SA SEQUENTIAL DETECTION
- SA SIGNAL DETECTION
- SA WAVE DETECTION
- Detection of arrival of He driver gas in test section of shock tunnel 17 p2903 A66-32474
- DETECTOR**
- SA ELECTRON DETECTOR
- SA INDICATOR
- SA INFRARED DETECTOR
- SA LIFE DETECTOR
- SA MOISTURE DETECTOR
- SA NEUTRON DETECTOR
- SA PARTICLE DETECTOR
- SA PHASE DETECTOR
- SA PHOTODETECTOR
- SA RADAR DETECTOR
- SA RADIATION DETECTOR
- SA SIGNAL DETECTOR
- SA SILICON RADIATION DETECTOR
- SA SYNCHRONOUS DETECTOR
- Crystal Hall detectors prepared by gluing thin indium antimonide wafer on rectangular parallelepiped ferrite base 01 p0045 A66-11031
- DETERMINANT**
- Commutable matrices, decomposing determinant of general solution of AX equals XB into linear factors 04 p0539 A66-13869
- Commutable matrices, decomposing determinant of general solution of AX equals XB into linear factors 12 p1903 A66-24025
- Evaluation of total square integrals arising in minimization problems of discrete data systems not requiring expansion of determinant for solution 12 p1850 A66-24265
- Multidimensional matrix algebra and determinant operations [PST PAPER NT-148] 14 p2324 A66-27837
- Matrix algebra, discussing factorization, determinants, eigenvalues, polynomials,

inequalities, etc 17 p2945 A66-31869  
Theoretical interpretation of expansions in nonzero determinants formed from vertex and circuit matrices 20 p3539 A66-38283

**DETONABLE GAS MIXTURE**  
Liquid surface instability caused by sliding detonation and shock waves of gas mixture 01 p0060 A66-11192  
Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 08 p1179 A66-19482  
Hydrodynamic theory relating velocity decrement and curvature of gaseous detonation to conditions at explosive inert interface [AIAA PAPER 65-39] 10 p1621 A66-21777  
Detonations in gaseous mixtures and in condensed phase, examining effects of pressure, temperature and confinement on normal detonation 12 p1980 A66-24932  
Detonation limits for binary mixtures of tetramethylsilane with oxygen, analyzing factors controlling transition from detonation to deflagration, noting condensation effects 13 p2209 A66-26303  
Detonation in gaseous mixtures and in condensed phase, reviewing aerodynamic theory 15 p2617 A66-29315  
Wall heat transfer behind plane detonation wave moving past flat plate into stationary hydrogen-oxygen mixture 17 p3033 A66-32461  
Explosion of gas mixtures noting preparation, ignition sources, equipment, detonation waves of spherical volumes, etc 21 p3834 A66-38534

**DETONATION**  
**SA EXPLOSION**  
**SA FIRING**  
Gas combustion and detonation instability 04 p0597 A66-13901  
Simple rotating drum streak camera covering principle, design, construction and application 04 p0520 A66-13940  
Performance of impact machines for testing explosive sensitivity to impact [CI PAPER WSCI-65-33] 05 p0787 A66-15137  
Theoretical detonation characteristics of ammonium perchlorate-polyurethane solid composite propellants 05 p0744 A66-15781  
Gas combustion and detonation instability 17 p3033 A66-32064  
Numerical solution of time dependent equations of one-dimensional reactive flow for idealized one-reaction detonation 17 p2908 A66-32418  
Water vapor effects on detonation reaction of H sub 2 - O sub 2 17 p3034 A66-32467  
Particle velocity in detonating gases determined by MHD principle 17 p3035 A66-32634  
Detonations in explosive gaseous mixtures and detonations in condensed phase, discussing three-dimensional vibratory phenomena, wall effects and transition between deflagration and detonation 17 p3036 A66-32846  
Limiting factors of detonation in heterogeneous systems, using one-dimensional model 18 p3265 A66-34552  
Electroexplosive devices in aerospace vehicles in two classes, propellants and high explosives, noting methods for controlling detonation desired effects 20 p3625 A66-37159  
Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, giving theoretical foundations /Part I/ 23 p4091 A66-41859  
Megaton and decamegaton dynamic pressure production by blast-type compression of thick walled pipe with core subjected to internal implosion, for case of graphite core /Part II/ 23 p4091 A66-41860

**DETONATION WAVE**  
Stability of plane stationary detonation wave, using detonation model of ideal perfect gas flowing in pipe at constant supersonic velocity 02 p0217 A66-11391  
Detonation theory of heterogeneous fuel mixture 02 p0217 A66-11402  
Microwave technique using oscilloscope that provides displacement-time trace of initiating shock wave as it grows to detonation in explosive 03 p0369 A66-12795  
Spherical and cylindrical implosive waves

and system of generating detonation wave that converges to given focus 03 p0445 A66-13131  
Gas temperature behind detonation front in acetylene-oxygen mixture measured by time-base photometry of hydrogen beta and gamma spectral lines 04 p0598 A66-14433  
Shock sensitivity and high-low detonation regimes in thin explosive films studied by highly instrumented two-dimensional analog of card-gap test 05 p0787 A66-15136  
[CI PAPER WSCI-65-29] 05 p0787 A66-15136  
Detonation and decompression research, comparing biological effects of explosive decompression and detonation 06 p0811 A66-16067  
Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-induced combustion 06 p0969 A66-16256  
[AIAA PAPER 66-109] 06 p0969 A66-16256  
Flame generation of pressure waves and wave-combustion front interactions in detonation processes treated by nonsteady gas dynamics 07 p1155 A66-18118  
Imploding cylindrical shock wave production through imploding detonation waves in oxygen-acetylene mixtures, using Chapman-Jouguet theory 08 p1204 A66-18523  
Onset of retonation, laser technology and high repetition-high resolution schlieren stroboscopic wave phenomena 08 p1318 A66-19200  
records 08 p1318 A66-19200  
One-dimensional CJ detonation existence as self-sustaining phenomenon 08 p1208 A66-19203  
Explosive wave propagation during cylindrical and plane explosions in ideal electrically conducting gas, taking account of counterpressure and magnetic field 08 p1208 A66-19372  
Nonequilibrium chemical reaction effect on decay in spontaneous explosion for reactive expelled gas and inert expelling gas 08 p1179 A66-19482  
Orifice effect on detonation wave propagation in tube, noting flame formation and detonation regeneration 10 p1523 A66-21792  
Variation of critical energy for direct initiation of cylindrical detonation waves as function mixture composition and initial pressure 10 p1622 A66-21830  
Plane shock wave compressions of cylindrical and wedge-shaped specimens used to obtain shock Hugoniot of two unreacted, composite and double-base aluminized propellants 12 p1934 A66-23589  
Chemical relaxation effects in nozzle flow by measuring high temperatures created by detonation waves in shock tube, using hydrocarbon mixtures 12 p1977 A66-23748  
Shock wave from explosion of laminar charges in air, water and vacuum 14 p2298 A66-26788  
Elastoplastic properties of copper, aluminum alloys and brass under explosive load, noting increased temperature effect on elastoplastic wave parameters 14 p2314 A66-27370  
Accelerator for jets formed by shaped charges, using principles of detonation waves 14 p2329 A66-27475  
Structure and development of detonation waves in gaseous media 14 p2399 A66-27557  
Small disturbances and effect on processes of fast combustion of inflammable compressible mixture 14 p2374 A66-27690  
Shock transition in multihead spin structure of self-sustaining gaseous detonations in oxyacetylene mixtures, including interferometric and schlieren photographic density, temperature and pressure measurements 15 p2618 A66-29607  
Ionized gas flow rate behind detonation wave used with Chapman-Jouguet condition to determine speed of sound in reaction products 16 p2687 A66-31160  
Energy release effects on unsteady gas flow in explosion 16 p2689 A66-31484  
Low velocity detonation in powder explosives 17 p3036 A66-32829  
Flow properties behind spherical detonation wave in Taylor and Zeldovich solution 17 p2913 A66-33071  
Heterogeneous detonations, discussing polydisperse and monodisperse spray detonations and liquid fuel film shock-

induced combustion [AIAA PAPER 66-109] 17 p3037 A66-33237  
Feasibility of rocket motor using detonation wave rotating in annular combustion chamber wherein propellant is injected continuously and expelled through annular nozzle 18 p3162 A66-33807  
Explosive wave propagation during cylindrical and plane explosions in ideal electrically conducting gas, taking account of counterpressure and magnetic field 18 p3099 A66-34171  
Approximate closed solutions for detonation velocity and pressure of condensed explosives 18 p3265 A66-34581  
Mach detonation wave formation conditions, noting magnitude of shock pressures in metals and possibility of obtaining steady state wave patterns 18 p3266 A66-34629  
Ideal detonation wave and Chapman-Jouguet condition, considering plane permanent and shock waves 18 p3266 A66-34721  
Continuous emission spectrum of detonation wave in nitromethane between 3800 and 8000 angstroms 19 p3477 A66-35747  
Stability limits of quasi-cylindrical diverging detonations in propane-oxygen-nitrogen mixtures 20 p3679 A66-37819  
Explosion of gas mixtures noting preparation, ignition sources, equipment, detonation waves of spherical volumes, etc 21 p3834 A66-38534  
Thermodynamic calculation of explosive properties of peracetic acid, using data from detonation wave to establish safe limits for use of acid 21 p3834 A66-38535  
Stability of one-dimensional steady detonations for periodic disturbances of small transverse wavelength 21 p3727 A66-39171  
Synchronized shadow photochronographic investigation of wire explosion shock waves in air 21 p3772 A66-39302  
Implosion experiment, discussing methods for detonation and shock wave propagation phase calculation 21 p3837 A66-39503  
Stability problem of plane steady detonation wave in ideal gas 22 p3898 A66-40156  
Detonation wave formation in flowing hydrogen-oxygen and methane-oxygen mixtures, noting induction distances and turbulence levels 23 p4057 A66-41888  
Detonation initiation behind reflected shock waves in hydrogen-oxygen-argon mixtures, noting reaction wave propagation 23 p4057 A66-41889  
Detonability of hydrogen-oxygen mixtures in large vessels at low initial pressures, using strong and weak igniters 23 p4120 A66-41890

**DETONATOR**  
Detonability of cryogenic oxydizers, discussing modified continuous wire technique analysis of detonation properties of trioxxygen difluoride 16 p2790 A66-31194

**DEUTERIUM**  
**SA HYDROGEN**  
Stable elementary particle detection of mass greater than that of proton in hydrogen, deuterium and atmospheric air samples, using mass spectrometer 01 p0060 A66-10251  
Differences in spherical intermolecular potentials of hydrogen and deuterium determined from reanalysis of second-virial-coefficient data 08 p1258 A66-18940  
Photolysis of water at 1470 angstroms in absence and presence of ethylene 09 p1338 A66-20679  
Stable elementary particle detection of mass greater than that of proton in hydrogen, deuterium and atmospheric air samples, using mass spectrometer 13 p2131 A66-25968  
Stimulated emission spectroscopy of hydrogen, nitrogen, oxygen and deuterium diatomic gases in 0.8 to 8 micron region 13 p2102 A66-26205  
Deuterium isotope effect on thresholds of europium chelate lasers, noting solvent thermal effects 13 p2105 A66-26598  
Vibrational relaxation times of deuterium in argon and krypton determined at high temperatures by shock heating gas mixtures in shock tube 13 p2136 A66-26662  
Solar wind deuterium detector and charge

- spectrum analyzer for Sunblazer probe of corona transmission 14 p2295 A66-27701
- properties 14 p2295 A66-27701
- Low temperature transport properties of hydrogen, deuterium and HD, noting quantal phase shift, intermolecular potentials, etc 14 p2414 A66-27973
- Photochemical decomposition of carbon suboxide and spectroscopic observation of carbon atom reactions with nitrogen, hydrogen and deuterium at 4.2 degrees K 14 p2233 A66-27975
- Tandem column gas-liquid chromatography labeling technique for mass spectrometry, noting ketones exchange and data on deuterium and oxygen 15 p2446 A66-28872
- compounds 15 p2446 A66-28872
- Absorption of solar neutrinos in deuterium 16 p2792 A66-30144
- Distorted wave calculation from rotational excitation of molecular hydrogen and molecular deuterium in thermal collisions with atomic hydrogen, presenting angular distributions, cross sections, etc 19 p3403 A66-36329
- Plasma production by firing giant pulse laser at solid deuterium pellet /ice/, noting strong anisotropy in plasma outburst 19 p3432 A66-36595
- Homogeneous isotopic exchange reaction between hydrogen and deuterium in single-pulse shock tube with excess argon 22 p3860 A66-40902
- Methane/deuterium exchange reaction rate measured in shock tube, using vibrational excitation mechanism to explain data 22 p3860 A66-40903
- Charge exchange cross sections for argon ions incident on hydrogen and deuterium measured over energy range of 30 to 1000 ev, taking into account ion-molecule reactions 23 p4098 A66-41267
- DEUTERIUM OXIDE**
- Isotopic exchange reactions of difluoramine with deuterium oxide and trifluoroacetic acid at low temperatures studied by NMR techniques 23 p4118 A66-41231
- DEUTERIUM PLASMA**
- Strong collisionless shock wave excitation in deuterium plasma 08 p1266 A66-19479
- Energy transfer equations for fully ionized /deuterium/ plasma including dominant and nondominant terms 13 p2143 A66-25713
- Deuterium plasma jet injection into simple biconical cusped magnetic field, noting ion energy transfer to electrons and plasma potential variations 15 p2554 A66-29748
- Absolute deuterium density by energetic deuterium beam probing of plasma 16 p2759 A66-30425
- Quantitative measurement of electron correlation spectrum for deuterium plasma in thermal equilibrium 17 p2963 A66-31885
- Plasma ion and electron temperature measurement via forward scattering spectrum of deuterium plasma 18 p3146 A66-34235
- Plasma heating and confinement in magnetic well, using deuterium plasma jet obtained by induction gun, measuring lifetimes 19 p3412 A66-36499
- Deuterium plasma containment and stability in theta pinch configuration using megajoule capacitor banks, studying density, temperature and radial distribution 19 p3413 A66-36505
- Aspa device designed for study of composition, energy and density distributions produced when plasma blob is injected into mirror trap with adiabatic plasma compression 19 p3423 A66-36550
- Electron density, temperature and other related electromagnetic effects of deuterium plasma focus formed by coaxial electrode discharge as result of Z 19 p3425 A66-36561
- pinch 19 p3425 A66-36561
- Phenomena associated with buildup of noncylindrical focused Z 19 p3425 A66-36562
- pinch 19 p3425 A66-36562
- Biconical cusp injection of dense hydrogen and deuterium plasmas by plasma gun 19 p3425 A66-36563
- Ruby laser light scattering measurements of electron and ion temperatures of hydrogen and deuterium plasmas produced in theta pinch devices 24 p4222 A66-42558
- DEUTERON**
- Plasma beam action on tritiated titanium and high energy deuteron detection in mixed-field accelerator 17 p2972 A66-32953
- DEVIATION**
- S ABERRATION
- S ECCENTRICITY
- S PHASE DEVIATION
- S STANDARD DEVIATION
- DEVICE**
- S CARTRIDGE ACTUATED DEVICE
- S COMMUNICATIONS DEVICE
- S CONTROL DEVICE
- S ELECTROEXPLOSIVE DEVICE
- S ELECTROMECHANICAL DEVICE
- S ERROR CORRECTING DEVICE
- S EXPLOSIVE DEVICE
- S FEEDING DEVICE
- S HEAT REJECTION DEVICE
- S HIGH TEMPERATURE PLASMA DEVICE
- S INSTRUMENT
- S LANDING DEVICE
- S LAUNCHING DEVICE
- S LIFT DEVICE
- S PROPELLANT ACTUATED DEVICE
- S RECOVERY DEVICE
- S RELEASE DEVICE
- S RESISTANCE DEVICE
- S SAFETY DEVICE
- S SAMPLING DEVICE
- S SCANNING DEVICE
- S SEMICONDUCTOR DEVICE
- S SOLID STATE DEVICE
- S STORAGE DEVICE
- S SUN TRACKER DEVICE
- S WARNING DEVICE
- DEWAR SYSTEM**
- Chilldown rate and equilibrium heat-leak storage loss measurements in liquid hydrogen storage dewars 20 p3541 A66-37101
- DH-121 AIRCRAFT**
- S DE HAVILLAND DH-121 AIRCRAFT
- DH-125 AIRCRAFT**
- S DE HAVILLAND DH-125 AIRCRAFT
- DIAGNOSIS**
- SA FUNCTION TEST
- Diagnostic standards for primary glaucoma in pilots, noting use of instrument tonometry and problems connected with sudden incapacitation 06 p0814 A66-16832
- German Air Force functional tests for early diagnosis of cardiovascular disease among aircrew, also discussing therapy 16 p2640 A66-31133
- DIAGRAM**
- S BENDING DIAGRAM
- S CONSTITUTIONAL DIAGRAM
- S CREEP DIAGRAM
- S ENTHALPY-ENTROPY DIAGRAM
- S EQUILIBRIUM DIAGRAM
- S EUTECTIC DIAGRAM
- S FATIGUE DIAGRAM
- S FEYNMAN DIAGRAM
- S GRAPH
- S HERTZSPRUNG-RUSSELL DIAGRAM
- S MOLLIER DIAGRAM
- S PHASE DIAGRAM
- S STRESS-STRAIN DIAGRAM
- DIAMAGNETISM**
- Dependence of magnetostriction coefficient for diamagnetic materials on change of Fermi surface with momentum and deformation parameter 16 p2777 A66-31035
- Diamagnetic properties of plasma described by extended field equations suggest existence of steady state inductive power transfer between plasma and magnetic fields 18 p3145 A66-34108
- Calculating magnetic shielding constants of diatomic HF molecules, based on gauge-invariant atomic orbitals 22 p3950 A66-39919
- DIAMANT LAUNCH VEHICLE**
- French Diamant satellite launching rocket noting design, performance, stages, propellants, instrumentation, etc 02 p0295 A66-11672
- French satellite-carrying Diamant rocket describing design, developmental testing and operating characteristics 05 p0770 A66-15201
- Design and reliability of Diamant launch vehicle 10 p1610 A66-21253
- Design and development of Diamant launch vehicle, discussing prelaunch testing 10 p1610 A66-21254
- Performance of Diamant launch vehicle including orbital considerations for planned projects 10 p1610 A66-21255
- Design and development of first liquid-fueled stage of Diamant launch vehicle 10 p1611 A66-21256
- Third stage and protective housing of Diamant launch vehicle 10 p1611 A66-21257
- Equipment located between Diamant second-stage propulsion unit and jettisonable rear skirt of third stage including antennas, auxiliary rockets, attitude changing apparatus, control and guidance, etc 10 p1518 A66-21258
- Solid propellant second stage of Diamant launch vehicle with steerable nozzles 10 p1611 A66-21259
- Diamant satellite launcher, development, launching and future 12 p1953 A66-23743
- French space program, flight tests of Diamant class rockets and A-1 satellite 12 p1981 A66-23804
- Steel for construction of propellant tank and skin of Diamant rocket 12 p1885 A66-23866
- Launching range facilities of Diamant rocket including equipment, radars, interferometers, telemetry, data processing, etc 16 p2682 A66-31233
- First two launchings of French Diamant satellite 17 p3016 A66-32378
- Diamant French satellite launching examining combustion stability during ignition, vibrations, chemical reactions between oxidizer and pressure feed system, etc 17 p3017 A66-33236
- French A1 satellite design and development, examining telecommunications equipment and monitoring diamant launcher performance 19 p3470 A66-36270
- DIAMINE**
- S ETHYLENEDIAMINE
- DIAMOND**
- SA METEORITIC DIAMOND
- Crystal chemistry of nonmetallic materials prepared under moderate or high pressure and recovered and retained under ambient conditions 01 p0090 A66-10292
- IR absorption spectra of aluminum and boron doped semiconducting synthetic diamonds 03 p0411 A66-13145
- Correlation between strength of induced optical absorption G band and strength of features in electron spin resonance spectrum in electron irradiated diamonds 06 p0934 A66-17125
- Electronic states of single defects in diamond calculated by comparing electronic states of single vacancies and single interstitial carbon atoms 06 p0938 A66-17148
- Uniaxial and hydrostatic pressure effect on absorption edge spectrum and edge excitation spectrum for visible luminescence diamond 07 p1095 A66-17320
- Ionization currents in diamond exposed to pulsed excitation and to applied pulsed electric field 10 p1586 A66-22144
- Electron energy losses in diamond, noting correlation between plasma excitation energy and interband transition energies 15 p2564 A66-28876
- Ionization currents in diamond exposed to pulsed excitation and to applied pulsed electric field 19 p3440 A66-35758
- Fine structure in direct absorption edge of cleaved type IIA diamond determined from reflectance data obtained from 5.5 to 11.5 ev at room and liquid-nitrogen temperatures 20 p3622 A66-38248
- Jahn-Teller shift reorientation in Ni impurity centers of diamond and rise of C-N pair EPR spectrum with temperature 22 p3964 A66-40307
- DIAPHRAGM**
- Thin metal diaphragms in shock tubes, discussing bursting characteristics and petalling behavior [ASME PAPER 65-WA/MET-16]
- 05 p0661 A66-15683
- Bursting shock tube diaphragms electrically, using two piezoelectric gauges 06 p0869 A66-16947
- Diaphragm-shaped external electrode used to define shape of plasma column in Tokamak machines, noting ways of maintaining plasma column equilibrium 13 p2148 A66-25755
- Annular diaphragms to produce turbulent flow in tubes 16 p2828 A66-31065
- Miniaturized piezoresistive transducer pressure diaphragm for experimental stress analysis 20 p3559 A66-37501

## DIATOMIC GAS

Vibrationally excited molecular hydrogen effect on mean 04 p0549 A66-14311

Ground state energy of charged Bose gas obtained from pair Hamiltonian and Green functions 11 p1741 A66-23392

Stimulated emission spectroscopy of hydrogen, nitrogen, oxygen and deuterium diatomic gases in 0.8 to 8 micron region 13 p2102 A66-26205

Dislocation rate magnitudes and relative collision frequencies influencing relaxation profiles in diatomic gases 14 p2274 A66-27447

Diatomic gas flow past blunt bodies, noting effect of oscillation and dissociation relaxation on mean 16 p2627 A66-30100

Quantum mechanical potential energy curve of lowest normal state of diatomic helium computed in valence bond scheme, using 17-term wave function of Slater orbitals 16 p2749 A66-30112

Numerical solution for complete Navier-Stokes equations for one-dimensional time-dependent propagation of compressible viscous thermally conducting diatomic gas, including presence of traveling shock wave 18 p3102 A66-34918

Recombination rate of diatomic gases determined from Mach number of supersonic nozzle outlet 21 p3694 A66-39090

Surface catalyticity and Reynolds number effects on nonequilibrium hypersonic stagnation flow of air or diatomic gas on highly cooled blunt body 22 p3847 A66-40919

**DIATOMIC MOLECULE**

Lifetime of radiative dissociation of excited molecular hydrogen 01 p0108 A66-10311

Potential energy curves for bound states of diatomic molecules from spectroscopic constants, using Rydberg-Klein-Rees method 01 p0108 A66-10600

Partial wave calculation of diatomic divalent molecular /HeH/ ion 04 p0547 A66-13643

Vibrational excitation cross sections of diatomic molecules calculated, using Born approximation by including polarization interaction between incident electron and molecule 06 p0912 A66-16630

Correlation energy effect on dissociation and binding energies of diatomic and polyatomic molecules 07 p1000 A66-18343

Motion yielding transition probabilities between low-lying vibrational levels of diatomic molecules 11 p1738 A66-22878

Dissociation rate of diatomic molecular fluorine 16 p2646 A66-30863

Thermal dissociation of molecular fluorine in inert gas from 1650 to 2700 degrees K in shock tube coupled to time-of-flight mass spectrometer 18 p3139 A66-34501

Electronic energy for ground state of one-electron diatomic molecule near united atom 18 p3140 A66-34512

Initial rotation effect upon vibrational excitation of diatomic molecules studied in two-dimensional collisions shows that with higher rotational energies it is increasingly difficult to excite 19 p3404 A66-36802

Sudden approximation applied to rotational transition probabilities and inelastic total cross sections for scattering of homonuclear diatomic molecules by atoms 21 p3774 A66-38526

Values of Morse potential for interaction of atoms in diatomic molecules carbon, CO and CN 21 p3775 A66-39072

Curves of attractive potential energy in diatomic molecules, noting calculations for Li-Li interactions in power series form 21 p3775 A66-39074

Absorption cross section of electron systems in bands of diatomic molecules calculated, noting effects of temperature variation 21 p3775 A66-39077

Coupled equations for open-channel components of wave function derived in total-angular-momentum representation in Feshbach approach to scattering theory for rigid rotator and atom 22 p3950 A66-39914

Dissociation energies of GaF, InF and TlF measured by high temperature mass-spectrometric techniques, noting possibility

of potential maxima in excited states 22 p3859 A66-39917

Calculating magnetic shielding constants of diatomic HF molecules, based on gauge-invariant atomic orbitals 22 p3950 A66-39919

Behavior of wave function for system of charged particles near coalescence of any two of them, noting electron-nucleus cusp conditions for diatomic molecules 22 p3861 A66-40904

Perturbation theory of heteronuclear diatomic molecules based on isoelectronic homonuclear molecules applied to carbon monoxide and nitrogen 23 p4032 A66-41646

## DIBORANE

Dichloroborane synthesized in quantitative yields by thermal hydrogenation of boron trichloride 05 p0629 A66-14540

Molecular orbitals of diborane using SCF-LCAO method, considering all electrons of molecule, calculating all integrals, with basis functions being Gaussian 06 p0940 A66-16123

Chemical kinetics of borane and diborane compounds, decomposition rates and molecular dissociation energy 15 p2447 A66-29237

Mass spectrometric analysis of contents of flow reactor in which diborane at low pressure was pyrolyzed, varying temperature, flow time, surfaces, etc 17 p2871 A66-32853

## DIBORIDE

Tungsten diboride preparation and structure 08 p1235 A66-18636

## DICKE TYPE RADIOMETER

Nomograms for radiometer sensitivity, predetection and postdetection gains and detector-output voltage used to accelerate Dicke radiometer design 11 p1666 A66-22689

Radiometric measurements of atmospheric absorption at 600 gc/s by DICKE type superheterodyne receiver, using harmonic mixing 15 p2450 A66-28999

## DICTIONARY

Dictionary of mathematical terms in English, French, Russian, German and Armenian, with English terms in alphabetical order 04 p0540 A66-14003

Russian-English Aerospace Dictionary 05 p0794 A66-15326

Chinese-English/English-Chinese astronomical and astrophysical dictionary 12 p1949 A66-24200

Dictionary of semiconductor physics and electronics, English-German, German-English 22 p3871 A66-39701

## DIE

Formulas for angular resilience of curvilinear surfaces of concave or convex planforms 07 p1038 A66-18060

Casting of plastic-ceramic dies 08 p1229 A66-18687

Contact process of linearly viscoelastic axisymmetric die, for case of noncommutative operators 15 p2611 A66-29342

Die holddown surface shape for complex forging 15 p2510 A66-29780

Hot drape forming of torus and semitoroidal bulkhead segments from aluminum alloys [SAE PAPER 660290] 15 p2511 A66-29831

Electrochemical machining techniques, noting PERA die-sinking system 20 p3562 A66-37426

Die friction effects on plane stress and plane strain in plastic bending of steel and titanium alloy beams 21 p3745 A66-39528

## DIELECTRIC CONSTANT

Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 01 p0118 A66-10259

Microwave permeability and permittivity measurement, knowing resonant frequency of unperturbed cavity and distribution of electric and magnetic field 01 p0025 A66-10527

Automatic measuring apparatus based on resonant cavities for measuring permittivity and permeability of ferrites as function of temperature 01 p0068 A66-10558

Permittivity of dielectric formed from ground state instability of semimetal, considering Coulomb attraction between electrons and holes 01 p0125 A66-10774

Complex permittivity of low-loss liquids measured with magic tee and variable-length

cell 03 p0368 A66-12461

Curie temperature, static dielectric constant and electro-optic coefficient of large single crystals of barium titanate 03 p0411 A66-13007

Mode guiding and gain in junction laser due to dielectric sandwich confining wave propagation 04 p0530 A66-19352

Radiation from vertical magnetic dipole in inhomogeneous stratified media above horizontal conducting plane, noting Hertz potential as contour integral 04 p0483 A66-14047

Admittance of thin long linear antenna embedded in uniaxial medium and inclined at angle theta to axis of medium 06 p0848 A66-16274

Permittivity of barium titanate single crystals with laminar domain structure 06 p0926 A66-16711

Slow polarization processes of barium titanate in weak field 06 p0927 A66-16711

Classification of ions capable of replacing Ti in barium titanate 06 p0927 A66-16711

Permittivity of barium titanate ferroceramic materials determined by various methods 06 p0927 A66-16721

Dielectric losses and permittivity of vitreous semiconductor arsenic trisulfide with silver impurity 06 p0929 A66-16921

Dielectric constants of alkali and thallium halides determined for various temperatures and frequencies, showing results obtained on sodium chloride 07 p1108 A66-18411

LF electromagnetic wave excitation in electron-ion and electron-hole plasma situated in external electrical field 08 p1262 A66-18971

Discrete spectrum of electromagnetic waves caused by excitation of dielectric layer on ideally conducting plane in homogeneous absorbing plasma 09 p1344 A66-20351

Transition radiation relative to dispersion of dielectric permittivity for charged particle passing through boundary between two media 09 p1410 A66-20930

Dielectric constant of lossy dielectric sphere determined by utilizing C band radar cross section measurement 10 p1502 A66-21631

Optical and electrical constants of beta-rhombohedral boron 10 p1379 A66-21721

Turbulent fluctuation effect on dielectric properties of weakly turbulent plasma at LF and electron plasma frequency 10 p1567 A66-21811

Permittivity of dielectric formed from ground state instability of semimetal considering Coulomb attraction between electrons and holes 11 p1749 A66-22280

Solution of two first equations of BBGKY hierarchy, obtaining dielectric constant of plasma by using Guernsey solution, giving two-particles distribution function 11 p1744 A66-22441

Contribution of electron-electron correlations to longitudinal dielectric constant for case of one-component plasma noting resonance effect and formula for plasma oscillation damping 11 p1744 A66-22441

Tensor component of dielectric permittivity of isothermal plasma derived from kinetic equation, accounting for effect of magnetic field on collision between particles 11 p1745 A66-22581

Parasitic internal oscillations in laser crystal with dielectric rod caused by total reflection from generatrix of cylindrical sample 11 p1712 A66-22731

Self-oscillations of dielectric rods between two metallic plates 11 p1669 A66-23101

Constant electric field effect on transverse dielectric constant of semiconductor 12 p1926 A66-23714

Dielectric layers of alternating low and high dielectric constant used as filters in millimeter wave, IR and optical regions 12 p1831 A66-23906

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability ionization, longitudinal current effect etc 12 p1921 A66-24204

Complex longitudinal microwave magnetoconductivity and permittivity of n-type silicon at 77 degrees K, noting influence of DC magnetic

field 13 p2159 A66-25066  
 Capacitance transducer characteristics and applications as fuel gauge, level detector, interface detector, pressure and proximity sensors, etc 13 p2078 A66-25360  
 Electron-phonon interaction proportional to applied external electric field and sound amplification in semiconductors 13 p2168 A66-25976  
 Complex dielectric constants of lossy liquids measured by transmission measurements in X-band waveguide 13 p2082 A66-26342  
 Heavily doped semiconductor parameters determined from spectral behavior of coefficient of reflection and transmission 14 p2357 A66-27072  
 Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transitions 14 p2357 A66-27078  
 Photoionization of leucocarbols and leucocyanides of malachite green, crystal violet and sunset orange dissolved in straight chain alcohols and chlorinated hydrocarbons 14 p2232 A66-27374  
 Stannic oxide ceramic formation and dielectric constant and resistivity measurements and evaluations 14 p2362 A66-27499  
 Plane wave behavior, as deduced from Mathieu function, analyzed in permittivity modulated slab immersed in medium of arbitrary constant 14 p2240 A66-27913  
 Endfire effect in dielectric foam rods and mode control by varying dielectric constant of rod 14 p2256 A66-27921  
 Dielectric constant of gold-plated rectangular parallelepiped solid at hyperfrequencies determined via resonant frequency method 14 p2366 A66-27944  
 Dielectric measurements and optical observation of potassium dihydrogen phosphate /KDP/ crystal 14 p2367 A66-27945  
 Anodic oxide film growth on sputtered tantalum films in dilute sulfuric acid, noting ionic conductivity, dielectric constant and optical properties 15 p2562 A66-28718  
 Electromagnetic propagation in weakly ionized plasma, deriving electronic distribution function and dielectric permittivity tensor 15 p2552 A66-29331  
 Dielectric constant, permeability and conductivity of random media determining electric field, current, magnetic field, etc, assuming these quantities are time harmonic plane waves 15 p2451 A66-29619  
 Flute stabilization of hot electron plasma by cold plasma which contributes to dielectric coefficient 15 p2555 A66-29759  
 Coupling and synchronization of lasers, noting field amplitudes, delayed interaction and dielectric constant 15 p2519 A66-29885  
 Dielectric constant obtained by bound electron theory is not distinguished from one obtained by warm plasma theory when considering main resonance and related phenomena 16 p2758 A66-30277  
 Optical and magneto-optical phenomena in CdSnAs sub 2, discussing reflection and absorption spectrum, optical activity, double refraction, dielectric constant, etc 16 p2788 A66-31775  
 Electrical properties of SiO films, noting independence of dielectric constant on film thickness and dependence of conductivity on applied field 17 p2978 A66-32411  
 Dominant mode perturbation theory applied to treatment of influence of imperfect waveguide contact on measured complex permittivity of semiconductors 17 p2887 A66-32643  
 Optical thickness effect on monochromatic directional transmittance and emittance of isothermal dielectric surrounded by air 18 p3134 A66-33991  
 Dielectric constant variation in silicon single crystals, noting frequency dependence of dielectric loss, conductivity and temperature effects 19 p3436 A66-35423  
 Alfven waves in bismuth for propagation along magnetic field, noting dielectric constant variation with frequency, effect on real part of refractive index, relaxation time analysis, etc 19 p3443 A66-36006

Dielectric function for homogeneous plasma calculated, using fluctuation dissipation theorem 19 p3409 A66-36289  
 Scale model of submerged VLF antenna using lossy ceramic powder to model ice and snow for submarine communication, geophysics, etc 19 p3321 A66-36416  
 Electromagnetic field analysis, determining dispersion relationship of array of identical fibers, assuming surface wave modes of each fiber are excited 19 p3305 A66-36418  
 Optical properties and complex dielectric constants of transition metals 20 p3614 A66-37276  
 Humidity effect on ferroelectric properties of barium titanate with tantalum oxide admixture, noting growth of dielectric constant and crystal polarization 20 p3617 A66-37553  
 Frequency scanned antenna with dielectric loaded waveguide, discussing experimental results 20 p3531 A66-37729  
 Double-strip H-guide structure, examining field components, characteristic equation and attenuation coefficient for each mode 20 p3533 A66-38145  
 Radio wave propagation over Earth surface, determining conductivity and dielectric constant taking into account ground effect 21 p3706 A66-39514  
 Barium titanate rods as nonlinear element of S-band resonant cavity microwave parametric amplifier, noting variation of permittivity of rods with percentage of barium titanate 22 p3872 A66-39736  
 Far-field light emission mode pattern of GaAs diode injection lasers, dielectric gradient in inversion layer and refractive index in junction 22 p3930 A66-39743  
 Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization longitudinal current effect, etc 22 p3956 A66-40568  
 Heavily doped semiconductor parameters determined from spectral behavior of coefficient of reflection and transmission 22 p3966 A66-40830  
 Temperature dependence of dielectric permittivity and relative expansion of bismuth ferrite in large temperature intervals, detecting phase transition 22 p3967 A66-40834  
 Induced microwave absorption in carbon dioxide studied at frequency of 9260 mc/sec over temperature range from 270 to 500 degrees K and pressures as high as 95 atm 22 p3985 A66-40909  
 Parasitic internal oscillations in laser crystal with dielectric rod caused by total reflection from generatrix of cylindrical sample 23 p4078 A66-41477  
 Semiconductor conductivity in strong SHF electric fields, measuring dielectric constant and Fourier component 23 p4068 A66-41620  
 Electromagnetic wave scattering by stratified medium, noting Mathieu and Floquet type wave representation 24 p4171 A66-42292  
 Electrical properties and fabrication of zinc oxide-bismuth oxide low Q capacitor with high apparent dielectric constant over wide frequency range 24 p4180 A66-42311  
 Carbon disulfide traveling wave Kerr cells with identical microwave and dielectric constants, noting light modulator construction at microwave frequencies 24 p4185 A66-42814

# DIELECTRIC MATERIAL SA CERAMICS

Zinc selenide as highly refractory substance in dielectric mirror layers for laser resonators and interference filters 02 p0238 A66-11252  
 Dielectric filler performance of silicon carbide, microsilized glass sphere and titanium dioxide at microwave frequencies 02 p0247 A66-11285  
 High-reliability microwave printed circuits using copper-clad polyethylene dielectric materials 02 p0195 A66-11288  
 Dielectric organic polymers in microcircuit communications modules 02 p0195 A66-11289  
 Rigid polyurethane foam encapsulation of high-voltage aerospace electronic systems, noting vacuum effect 02 p0248 A66-11292  
 Transformation of metal into dielectric by application of magnetic field to shift band

boundaries 02 p0274 A66-11734  
 Electrometer using temperature-autostabilizing nonlinear dielectric element as receiver 02 p0230 A66-11815  
 Microwave propagation through metallic waveguides filled with dielectrics, using field theory, network theory, Rayleigh-Ritz procedure, reaction concept, etc 02 p0206 A66-12009  
 Steps for V-I characteristic of Josephson tunnel current interaction with electromagnetic field in dielectric superconductors 03 p0407 A66-12282  
 Reflection and transmission of electromagnetic waves by dielectric medium moving parallel to and perpendicular to interface, determining coefficients 04 p0481 A66-13739  
 Waveguide containing ferrite of ferrite-dielectric insert determined by applying eigenfunction method 04 p0499 A66-14051  
 Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 04 p0499 A66-14054  
 Impedance of dielectric oxide with uniformly distributed monoenergetic traps 04 p0501 A66-14253  
 Electrophoretic motion of dielectric particle determined from flow rate of liquid metals and semiconductors near infinite plane 05 p0733 A66-14688  
 Possible processes of non-radiative decay of excitons on ionized donors and acceptors in semiconducting and dielectric crystals 05 p0737 A66-15160  
 Steps for V-I characteristics of Josephson tunnel current interaction with electromagnetic field in dielectric superconductors 05 p0738 A66-15454  
 Dielectrics theory using average field approximation containing random concentration of ellipsoidal inclusion 06 p0908 A66-16027  
 Pole-zero analysis techniques for reflection coefficient of multiple-layer dielectric having complex permittivity 06 p0843 A66-16030  
 Long wavelength limit in scattering from homogeneous dielectric cylinder at oblique incidence 06 p0830 A66-16277  
 Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 06 p0924 A66-16518  
 Ionization under laser action extended to metals and dielectrics, noting influence on thresholds 06 p0893 A66-17065  
 Synthesis, X-ray studies and dielectric measurements of lead containing perovskites 07 p1092 A66-17220  
 Mirrors composed of multilayer stacks of dielectric films and attaining high reflectance over extended spectral range 07 p1079 A66-17290  
 Microstrip transmission on semiconductor dielectrics provide high quality interconnection between microwave functions 07 p1007 A66-17505  
 Space-charge reduction of shot noise for space-charge-limited current in solid dielectric diode 07 p1097 A66-17737  
 Solution to problem of cylindrical cavity containing ferrite and dielectric specimens in hollow cylindrical form 07 p1009 A66-17927  
 Solid-dielectrically loaded strip transmission line techniques extended to Ku-band region 08 p1192 A66-18946  
 Electric properties of passive circuit thin film components in microelectronics, discussing resistors, capacitors and microcircuit interconnections on method of preparation 08 p1192 A66-18963  
 Dielectric properties and lattice parameter dependence on temperature from X-ray studies of rubidium-potassium nitrate mixed crystals 08 p1269 A66-19008  
 Relation of compressibility with cohesive energy and molecular volume for dielectric solids, noting confirmation of relation for 45 crystalline compounds 08 p1244 A66-19254  
 Coaxial, rectangular and bandpass waveguides containing ferrite and dielectric plates in E plane, obtaining transcendental equations, determining electromagnetic wave propagation 08 p1194 A66-19312  
 True heat capacity of solid heat-resistant

dielectric or conducting materials at high temperatures 09 p1470 A66-20141

Cerenkov radiation in circularly symmetrical waveguide filled with uniform dielectric in presence of flowing modulated electron stream 09 p1351 A66-20258

Optical absorption of metal films in region of transformation to dielectric, discussing valence and conduction band separation mechanism 09 p1431 A66-20899

Boundary value problem for wave propagation on cylindrical anisotropic dielectric rod solved for hybrid modes 10 p1496 A66-21307

Frequency and temperature effects on dielectric properties of calcium, strontium and barium fluorides 10 p1577 A66-21561

Total field measurement in all directions in near zone of metallic and dielectric spheres and cones 10 p1502 A66-21635

Radar cross section of flat base dielectric cones, noting parameters such as cone angle, size, wavelength, etc 10 p1503 A66-21646

Parameters of dielectric walls of various structures with optimal radio-engineering characteristics treated by graphical method 10 p1511 A66-21676

Temperature dependence of dielectric properties of antiferroelectrics of perovskite structure in SHF range 10 p1589 A66-22168

Polar vapor effects on dielectric properties of barium titanate single crystals with metal admixtures 11 p1749 A66-22292

Wide-angle impedance matching /WAIM/ method reducing variation of reflection coefficient with scan angle and polarization by dielectric sheet located in front of array antenna face 11 p1663 A66-22547

Dipolar resonances when axially uniform warm plasma column is subjected to transverse RF electric field 12 p1815 A66-23962

Stripline cavity resonator for low microwave frequency measurements of magnetic and dielectric properties of ferrites 12 p1881 A66-24156

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 12 p1930 A66-24459

Dielectric relaxation in thermally grown silicon dioxide films 12 p1932 A66-24828

Exact mathematical solution for elastic dielectrics in controllable states, noting Rivlin and Toupin theory, cuboid deformation into rectangular block, electric field effect, etc 12 p1933 A66-24961

RF sputtering of insulators, noting effects of auxiliary magnetic field, electrode size, oxygen concentration, substrate temperature and target material on thin dielectric film formation 13 p2157 A66-25039

Current voltage characteristics of dielectric films 13 p2157 A66-25040

Nonlinear dielectric laser light absorption by neutral gas resulting in avalanche breakdown of gas due to thermal ionization 13 p2090 A66-25425

Heavy ionizing particle path detection by thin dielectric sheets 13 p2084 A66-26561

Ghost modes in open microwave resonator waveguides containing dielectric slabs of rectangular geometry with anisotropic dielectric constant 14 p2246 A66-26796

Laser frequency tuning by dielectric material interaction to produce nonlinear effects 14 p2305 A66-26867

Damping constant of electromagnetic wave in plane parallel waveguide with ferrite resonant isolator, using perturbation theory, considering dielectric and magnetic losses 14 p2250 A66-27143

Directional monochromatic emittance of isothermal diathermanous coatings on various conductors [AIAA PAPER 65-119] 14 p2411 A66-27410

Dielectric diode induction effect demonstrated through equivalent circuit 14 p2252 A66-27491

Electromagnetic wave reflection and transmission coefficients for moving dielectric slab as function of velocity of medium 14 p2239 A66-27761

Mutual and self-impedance of linear antennas in interface between dielectric layers computed, noting cases of symmetric and antisymmetric excitations 14 p2256 A66-27914

Dielectric material position effect on characteristics of ladder line slow wave structure of TW masers 14 p2258 A66-27960

Critical conditions of waveguide with dielectric bushing for case of nonsymmetrical waves 14 p2259 A66-28161

Wide angle impedance matching /WAIM/ of planar array antenna by dielectric sheet for reduction of reflection coefficient variation with scan angle and polarization 15 p2456 A66-28587

Zero magnetic field millimeter maser using trivalent iron ion in host crystalline structure of rutile /titanium dioxide/ as active material 15 p2514 A66-29018

Quasi-optical iterated-dielectric-slab rectangular waveguide filters for millimeter and submillimeter wavelengths 15 p2462 A66-29022

MHD drag of dielectric oscillating sphere in incompressible conducting fluid with uniform magnetic field aligned along axis of oscillation 15 p2553 A66-29689

MHD boundary layer flow of incompressible conducting rotational fluids over infinite dielectric disk 16 p2765 A66-31403

Dielectric properties and thermostability of glow-discharge thin organic polymer films for electronic application 16 p2783 A66-31429

Reflection and refraction of light waves at boundary of nonlinear dielectric resonator and waveguide designs using multilayer dielectric 16 p2666 A66-31557

Synthesis, X-ray studies and dielectric measurements of lead containing perovskites 17 p2976 A66-31991

Waveguide containing ferrite of ferrite-dielectric insert determined by applying eigenfunction method 17 p2884 A66-32217

Static characteristics of field triode with gate separated from semiconductor by thin dielectric layer, considering regimes of concentration, depletion, etc 17 p2884 A66-32220

Dielectric-walled vacuum vessel for space simulation testing of plasma propulsion devices 17 p2903 A66-32487

Maxwell equation solution for source currents in unbounded magnetoionic medium with uniaxial dielectric tensor, using Fourier transform technique 17 p2959 A66-32962

Photoconductivity induced in uncolored sodium chloride and aluminum oxide single crystals by radiation from ruby laser 18 p3154 A66-33939

Continuous wave power ratings of strip transmission lines, noting temperature profile parameters, power limit curves, etc 18 p3077 A66-34062

Electrical measurements of stannic oxide in ceramic form, noting forming and firing of samples, dielectric dispersion, grain boundary capacitances, etc 18 p3155 A66-34197

Method for determining temperature dependence of heat conductivity of dielectric and semiconductor materials 18 p3159 A66-35054

Calculations of energy loss of relativistic charged particles in dielectric media compared with mass operator and perturbation theory calculations and with oxygen experiment 18 p3221 A66-35201

Dielectric fiber cylindrical surface waveguide with refractive index higher than surrounding region for energy transmission at optical frequencies 19 p3302 A66-35725

Temperature dependence of dielectric properties of antiferroelectrics of perovskite structure in SHF range 19 p3441 A66-35782

Thermometer for continuous temperature measurement of dielectrics and semiconductors in electromagnetic HF fields 19 p3358 A66-35836

Laser giant pulse damage to dielectric mirror coatings immersed in nitrobenzene solution 19 p3444 A66-36075

TE wave scattering by dielectric cylinder of arbitrary cross section shape, including effects of surface wave excitation and mutual interaction 19 p3304 A66-36408

Swept frequency measurement of water-drop diameter in spherical resonator, using dielectric materials 19 p3394 A66-36417

Radiated fields for plasma external to dielectric coating surrounding biconical

antenna, equivalent circuit developed for terminating impedance 19 p3305 A66-36422

Theoretical distribution of charges and potential in vicinity of metal-dielectric barrier in absence and presence of applied field 19 p3448 A66-36753

Secondary electron emission in zinc sulfide and magnesium fluoride thin dielectric films and semiconductor layers due to electric field stimulation 20 p3620 A66-37691

Extension of equivalence principle to take into account contribution to radiation of end point of dielectric rod in dielectric antennas 20 p3531 A66-37728

Electromagnetic wave emission excited by electron stream over diffraction grating lying on boundary of semiinfinite anisotropic dielectric 20 p3519 A66-37998

Thin dielectric film wave scattering, EM interaction responses and conductivity tensor 20 p3622 A66-38385

Reflection and transmission of EM waves by dispersive dielectric cold plasma 20 p3611 A66-38394

Horn transitions from empty waveguides to dielectric surface waveguides using telegraphers equations, determining launching horn shape with minimum reflection coefficient 21 p3711 A66-38836

Tunnel current dependence on magnetic field for two superconductors with thin dielectric interface 21 p3804 A66-39314

Natural frequency equations for TEM mode oscillations of coaxial resonator with moving dielectric material 21 p3713 A66-39321

Mathematical analysis of radiation from slotted magnetic line source on conducting cylindrically capped wedge covered by dielectric layer or plasma sheath 21 p3705 A66-39349

Dielectric loss tangent measurement in pyroelectric materials for EM radiation detectors and heat transfer sensors 21 p3740 A66-39386

Theoretical static I-V characteristics of surface gate dielectric triode and geometric factors influence on amplification factor at cut-off 22 p3872 A66-39746

Equations for ionized positive plasma column of gas discharge between infinite dielectric planes under oblique magnetic field with component in direction of external electric field 22 p3953 A66-39756

Bistatic radar method for determination of permeability and permittivity of material for smooth spherical target 22 p3863 A66-39941

Growth of plane acceleration discontinuities propagating into homogeneously deformed hyperelastic dielectric material in presence of magnetic field 22 p3948 A66-40136

Wide stop bandwidths from quasi-optical filters formed from iterations of dielectric slabs demonstrated at millimeter wavelengths 22 p3877 A66-40181

Optical thickness measurement of nonabsorbing dielectric film when it is inconvenient to apply overlay film to measure thickness by Fizeau fringe shift 22 p3968 A66-40889

Electrostatic oscillations in dielectric, semiconductor and plasma in presence and absence of external magnetic field 22 p3968 A66-40947

Effectiveness parameters of spherical shield electrode surrounding negative dielectric junction of insulator in high vacuum 23 p4042 A66-41040

Diffraction of electromagnetic waves at dielectric wedge, considering skin depth and internal problem 23 p4036 A66-41134

Narrow slot antennas covered with dielectric slabs of arbitrary thickness, examining design flexibility in application as radiating elements of waveguide 23 p4046 A66-41586

Radiation in magnetoplasmas, noting correctness of infinity catastrophe theory for dielectric radiation sources in magnetoionic media 23 p4105 A66-41632

Antenna radiation theory, noting reiteration of incorrectness of infinity catastrophe theory and application to oscillating dipole in uniaxial medium 23 p4047 A66-41633

Impedance of flat strip antenna embedded in planar dielectric slab surrounded by layers of compressible isotropic electron

plasma 23 p4047 A66-41639  
Transmission coefficient and tunnel current for trapezoidal potential barrier calculated as function of applied voltage 24 p4254 A66-42385  
Nonuniform thickness of dielectric films effect on capacitance and tunnel currents of elements with metal-insulator-metal structure 24 p4254 A66-42387  
Self-trapping of laser beam due to diffraction from dielectric waveguide arising from permittivity increase of birefringent beam 24 p4222 A66-42554  
Propagation and radiation of radio waves from dielectric coated prolate spheroidal core loop antenna surrounded by plasma sheath 24 p4184 A66-42745  
Electromagnetic propagation in slowly rotating anisotropic dielectric single band waveguide modulator 24 p4175 A66-42967  
Dielectric breakdown phenomena in evaporated silicon monoxide thin film, noting electron collision effect 24 p4260 A66-43106  
Evaporation system for fabrication of multilayer dielectric films for mirrors or filters, obtaining thickness variation reduction and simultaneous deposition 24 p4218 A66-43163  
**ELECTRIC PERMEABILITY**  
Fluctuations in energy absorbed within definite periods of time by plane-surface thermal emission sensors of arbitrary dielectric permeability 01 p0069 A66-10722  
Barium titanate single crystals at infrared frequencies investigated for polarization, effective permittivity and coercive field 06 p0926 A66-16713  
Reversing permittivity of barium titanate single crystals measured, using lithium chloride solution for electrodes 06 p0926 A66-16714  
Absorption and spontaneous and stimulated emission for homogeneous isotropic nonferromagnetic Maxwellian media at rest 07 p1081 A66-18037  
Optical absorption and dielectric loss measurements in KCl doped SrCl sub 2 single crystals, determining involvement of impurity vacancy dipolar complexes in optical conversion of F centers to Z centers 12 p1926 A66-23718  
Fluctuations in energy absorbed within definite periods of time by plane-surface thermal emission sensors of arbitrary dielectric permeability 20 p3560 A66-37660  
**ELECTRIC POLARIZATION**  
Microwave scattering by dielectric slabs of finite width and hollow wedge formed by two dielectric slabs 03 p0331 A66-12306  
Wideband polarizer in circular waveguide loaded with dielectric disks 07 p1006 A66-17503  
Ferroelectric properties of trisarcosine calcium chloride including dielectric measurement, Curie temperature region, etc 08 p1270 A66-19009  
Boundary surface roughness effect on polarization of thermal electromagnetic wave emission from dielectric medium 09 p1401 A66-20115  
**ELECTRICS**  
**SA SPARK GAP**  
Testing dielectrics by direct application of two high-voltage LF electrostatic generators with long-period sinusoidal waves 03 p0340 A66-12467  
Dielectric properties of noble gases afterglows following electrodeless discharge over signal frequency and pressure ranges 04 p0551 A66-13813  
Propagation characteristics of microwaves through dielectric loaded waveguides and imperfect waveguides filled with imperfect dielectrics 04 p0498 A66-14042  
Radiation characteristics of isolated circular optical waveguides supporting low-order dielectric waveguide modes for combinations of modes, wavelength, diameter and aperture 05 p0648 A66-14910  
Theory describing ionized gas plasma in which no physical contact may occur between measuring device and plasma 06 p0843 A66-16035  
Propagation in rectangular and circular cylindrical waveguide containing inhomogeneous dielectric varying linearly and quadratically 06 p0848 A66-16108

Propagation of microwaves through circular cylindrical metallic guide filled with two different dielectrics 06 p0857 A66-16951  
Dielectric loaded waveguides, defining surface, transverse and longitudinal impedances in analogy with circuit theory definition 08 p1200 A66-19121  
Propagation of acceleration and electromagnetic waves in homogeneously deformed uniformly polarized hyperelastic dielectric 08 p1271 A66-19228  
Low loss transmission medium for optical frequencies consisting of thin wall dielectric tube separating internal high density gas from external low density gas 08 p1235 A66-19839  
Superposition and geometrical optics techniques for approximations of radar cross section of nonconducting bodies 10 p1498 A66-21598  
Radiation characteristics of dielectric coated half-wave resonant slot antenna, examining effects of improper dielectric scaling 11 p1663 A66-22553  
Design and application of dry, dielectric and water-cooled dummy loads 12 p1829 A66-23537  
Maximum dielectric strength of thin evaporated silicon oxide films, calculating breakdown processes 12 p1933 A66-24830  
Radiant energy conversion using thin dielectric films in thermoelectrostatic cycle [AIAA PAPER 64-729] 13 p2006 A66-26639  
Dielectric tensor in relativistic Vlasov plasma in electron cyclotron harmonic resonance region 13 p2155 A66-26676  
Transmission power of dielectric waveguide 14 p2251 A66-27168  
Transcendental equation derived for approximate calculation of waveguide resonators containing dielectric 14 p2251 A66-27240  
Applicability region of Mott-Gurney square law for space-charge limited currents in dielectrics 14 p2266 A66-27574  
Dispersion characteristic of stub slow-wave structure, partially filled by dielectric, of traveling wave maser 14 p2310 A66-28291  
Dielectric guide structures /Dieguides/ used for increased gain/noise ratio in low noise antennas 15 p2456 A66-28588  
Flame spraying method for conversion of pure barium titanate into glass, noting dielectric Curie temperature 15 p2524 A66-29665  
Augmented Born approximation based on variational principles applied to electromagnetic scattering from inhomogeneous dielectric spheres of finite extent 18 p3071 A66-34452  
Disintegration of alkali halide single crystals, polymers and glasses under laser radiation, noting parameters of disintegration region 18 p3119 A66-34681  
Inhomogeneously filled waveguides containing dielectric used as microwave delay line for pulse compression 23 p4035 A66-41025  
Calculation method for optimum number of thin film elements on substrate of micromodule consisting of active and passive conducting, resisting and dielectric elements 24 p4257 A66-42536  
**DIENE**  
Conversion of 2-carboxy-3-keto-9-methyl-unsaturated hexahydronaphthalene into 5/7-fused products on irradiation in aqueous and nonaqueous media, observing photochemical rearrangements 24 p4170 A66-42314  
2-carboxy-3-keto-9-methyl hexahydronaphthalene converted in high yield into 5/7 fused products on irradiation in aqueous and nonaqueous media 24 p4171 A66-43101  
**DIET**  
**S NUTRITIONAL REQUIREMENT**  
**S STARVATION**  
**DIETHYL ETHER**  
X-ray radiation effect on electrical conductivity of liquid organic semiconductors obtained on diethyl ether base with halogen derivatives of benzene, methane, etc 13 p2160 A66-25096  
**DIFFERENCE EQUATION**  
Finite difference method solving Dirichlet problem for quasi-linear elliptic equation, with results applied to calculation of

magnetic field in nonlinear media 01 p0091 A66-10165  
Solution to linear difference and differential equation with variable coefficients 01 p0092 A66-10173  
Random error in finite difference approximation of stochastic nonlinear equations in theory of random signals and noise 01 p0093 A66-10381  
Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 01 p0094 A66-10654  
Nonlinear differential-difference equations of form  $Ly$  equals  $f(y)$  solved by using  $f(y)$  as power series in exponentials 03 p0387 A66-12614  
Nonsymmetric difference equations, examining convergence proofs 03 p0387 A66-12615  
Forced oscillations in nonlinear relay type control system predicted via periodic solutions to nonlinear difference equation 05 p0654 A66-14606  
Representation of analytical periodic Fourier transforms of difference operators by sum of squares 05 p0708 A66-15328  
Stability in small of two types of extremal systems with modulating action, using linear difference equation with periodic coefficients 07 p1013 A66-17429  
More general solution to difference equation  $y/x$  plus  $1/-y/x$  equals  $f/x$  than that derived by Euler 07 p1059 A66-17974  
Computational reduction of high speed memory requirements in solving optimization problems by dynamic programming and supersonic transport trajectory application 07 p1004 A66-17976  
Solutions in large for nonlinear hyperbolic systems of equations by difference approximation 07 p1059 A66-18032  
Fluctuations of electron numbers in general M-level system, using difference equation 08 p1279 A66-19837  
Plane nonlinear stationary problem of hill slope winds reduced to set of finite difference equations and solved by simple and matrix factorization combined with iteration by computer 09 p1398 A66-19885  
Invariant imbedding in transport process and theorems of uniqueness and existence for derived hyperbolic equation 09 p1393 A66-19906  
Asymptotic behavior, at plus infinity, of first order linear differential-difference-delay equation solutions, discussing asymptotic oscillatory number 10 p1549 A66-21224  
Conversion and uniqueness theorems and series convergence in difference equation theory 10 p1549 A66-21227  
Generalization of high accuracy alternating direction implicit /ADI/ method for solving wave equation in two space dimensions 10 p1550 A66-21845  
Difference scheme of integrated conservative type and equivalent semi-Lagrangian type for weather forecasting equation 11 p1725 A66-22195  
Existence of explicit stable difference scheme in correct Cauchy problem for linear systems of partial differential equations with constant coefficients 12 p1903 A66-24023  
Best linear unbiased /BLU/ estimator for large class of error correlation models 12 p1904 A66-24197  
Pseudorandom binary sequential digital simulation of feedback control systems subjected to random input signals 13 p2030 A66-25211  
Maximum principle for systems described by difference equations, justifying convexity assumptions for approximation of differential equations 13 p2116 A66-25344  
Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian white noise 13 p2053 A66-26086  
State-space analysis of discretely controlled systems with finite delays 14 p2266 A66-27589  
Passage of pulse signal through distributed RC circuit with nonlinear p-n junction capacitance 14 p2254 A66-27740  
Internal regime of waveguide-slot antennas with identical resonance radiator via

- difference equations 14 p2254 A66-27743  
 Difference equations arising when one-velocity kinetic equation is solved by characteristics method, estimating error 14 p2338 A66-28280  
 Points in interior and boundary of three-dimensional supersonic gas flow determined, using characteristic method, - deriving difference equations 14 p2278 A66-28284  
 Stability of nonlinear control systems, noting Hermitian matrix for linear system of ordinary differential equations and analogous problem for difference equations 15 p2525 A66-28513  
 Generalized maximum likelihood estimators with proof of asymptotic efficiency, considering Markov chain and stochastic difference equations 15 p2525 A66-28604  
 Synthesis of linear digital recursive filters, noting application to arbitrary amplitude frequency transfer function synthesis 15 p2475 A66-29772  
 Representation of analytical periodic Fourier transform of difference operators by sum of squares 16 p2735 A66-30966  
 Extension of problem of singular perturbation for linear scalar constant coefficient differential-difference equation with single retardation to several retardations, noting degenerate equation solution 16 p2737 A66-31230  
 Book on stability, oscillation and time lags in differential and differential-difference equations, discussing Liapunov stability theorem 16 p2739 A66-31754  
 Difference analog construction for second-order elliptic differential equation in case of rectangular network 19 p3389 A66-35935  
 Maximum principle in optimization of discrete time systems described by difference equations 20 p3536 A66-36857  
 Convergence of difference approximations in rectangular grids for general first-order quasi-linear hyperbolic initial value problems in two independent variables 20 p3590 A66-37526  
 Stress analysis of difference equations for bending and shear effects in elastic grids 21 p3832 A66-39536  
 Transformation of infinite Legendre sums into finite series of Legendre polynomials by transforming sum into integral leading to difference equations 22 p3995 A66-40458
- DIFFERENTIAL ALGEBRA**  
 Bellman functional equation derived for class of optimal control problems without using Taylor series expansion or mean value theorem of differential calculus 07 p1017 A66-18347  
 Deriving interpolatory type quadrature formula by inverting linear systems of differentiation formulas 09 p1395 A66-20622  
 Differential approximation linearization technique compared with Galerkin method 16 p2732 A66-30265  
 Numerical differentiation by differential quotients, interpolations, Richardson-Romberg algorithm and other methods, including analysis of approximation errors 16 p2658 A66-31347
- DIFFERENTIAL AMPLIFIER**  
**SA SEMICONDUCTOR DEVICE**  
 Integrated sense amplifier usable with most medium to high speed coincident current memory /CCM/ systems with only two power supplies and no external components 01 p0048 A66-11144  
 Linear integrated circuits discussing differential and operational amplifiers, development, use, capabilities, new techniques, special designs and reliability 03 p0347 A66-13340  
 Thermal instability analogous to thermal runaway occurring in differential transistor amplifiers 04 p0500 A66-14097  
 Integrated DC differential instrumentation amplifier discussing drift, gain and common-mode rejection 05 p0646 A66-14641  
 Molecularized FM-FM telemetry system for providing more reliable FM subcarrier oscillators with reduced size, weight and power dissipation 06 p0824 A66-15968  
 Solid state microelectronic differential amplifier as stable high gain and high input impedance amplifier 10 p1513 A66-21903  
 Periodically operating gate circuit with negative feedback for sampling in micro-and millisecond range 12 p1847 A66-24938
- Differential amplifiers using common-collector, isolated and lateral complementary transistor structures, including frequency response, phase shift, etc 13 p2036 A66-25532  
 Transfer function for quadrature modulation single band signal generating all-pass filter, using differential operational amplifier 14 p2253 A66-27586  
 Dual transistors for noise and drift reduction in differential direct-coupled amplifier design 14 p2262 A66-28376  
 Substrate layout and deposition of all thin film differential amplifier 17 p2882 A66-32112  
 Current-mode logic gates in building differential amplifier for memory-core readout 17 p2884 A66-32127  
 Approximation technique for flow graph that eliminates nonessential equivalent circuit elements, providing for derivation of most concise model with preassigned accuracy 18 p3092 A66-35040  
 Behavior of thermally coupled transistors in differential amplifier explained in terms of empirical equation for transistor current 19 p3317 A66-35726  
 Applicability of microelectronic technique to construction of integrated wideband amplifier consisting of symmetrical differential circuit and common-emitter circuit 19 p3323 A66-36818  
 Common-mode input voltage rejection in transistor differential amplifiers by increasing collector resistance and gain of differential stage 20 p3533 A66-38280
- DIFFERENTIAL ANALYZER**  
 Surveying transistorized differentiators and integrators, giving fundamental RC and equivalent circuits 01 p0045 A66-11022  
 Accurate light-weight self-contained low-cost inertial autonavigational system including gyroscopes, accelerometer and DYDAN computer 07 p1076 A66-17793  
 Microminiature Loran-C Receiver/Indicator for analog-to-digital conversion, using integrated circuit 10 p1555 A66-22047  
 Digital differential analyzer /DDA/ design for high speed solution of differential equations common in aerospace problems 12 p1828 A66-23841  
 Digital differential analyzer for on-line studies of dynamic systems 16 p2657 A66-31245  
 Waveform analysis of electronic repetitive differential analyzer solutions of nonlinear and linear systems and describing functions evaluation using vectormeter 21 p3739 A66-39275
- DIFFERENTIAL EQUATION**  
 SA BALANCE EQUATION  
 SA BERNOULLI EQUATION  
 SA BIHARMONIC EQUATION  
 SA DUFFING EQUATION  
 SA FALKNER-SKAN EQUATION  
 SA HILL EQUATION  
 SA LAPLACE EQUATION  
 SA MATHIEU FUNCTION  
 SA PARTIAL DIFFERENTIAL EQUATION  
 SA RAYLEIGH EQUATION  
 SA REYNOLDS EQUATION  
 SA RITZ AVERAGING METHOD  
 SA RUNGE-KUTTA INTEGRATION  
 Power series expansions as solutions to differential equations, using electronic computers 01 p0091 A66-10163  
 Approximate solution for differential equations, using algorithm applied to boundary value problem involving linear equation 01 p0091 A66-10164  
 Multidimensional homogeneous difference schemata solving eigenvalue problem with elliptic operator, noting differential equation coefficients and eigenfunction error estimate 01 p0092 A66-10166  
 Numerical solution to problems with spatial variables, using partial differential equations of gas dynamics 01 p0055 A66-10169  
 Solution to linear difference and differential equation with variable coefficients 01 p0092 A66-10173  
 Error estimates for some finite difference methods of solving ordinary linear differential equations 01 p0092 A66-10315  
 Charge trapped in electron or ion beams at pressures below breakdown determined from general integro-differential equation, using approximation 01 p0111 A66-10375  
 Qualitative-quantitative analysis of solutions of second order ordinary linear homogeneous differential equations and two derivatives 01 p0093 A66-10403  
 Volterra integral equation used in alpha operational method for solution of linear differential equations 01 p0093 A66-10404  
 Unsteady convective flow of electrically conducting fluid through vertical channel in magnetic field, using differential equations 01 p0111 A66-10426  
 Parametric dependence of almost periodic solutions to nonlinear differential equations with deviating argument 01 p0094 A66-10457  
 Linear differential equation solution/nonfluctuation and boundedness estimate in connection with integral inequalities 01 p0094 A66-10650  
 Asymptotic behavior of solution to system of differential equations with random limited coefficients 01 p0095 A66-10733  
 Flexible-wall tubes flattened by fluid when velocity reaches critical value, with differential equations describing effect of stability loss 01 p0158 A66-11035  
 Exact derivative method of integrating some differential equations of nonlinear vibrations 01 p0159 A66-11173  
 Ellipsoidal wave equation /differential equation with ellipsoidal coordinates/ solution expressed as Neumann series 02 p0249 A66-11579  
 Optimal rotation of plane of circular orbit by transverse thrust force, deriving differential equations for rotational maneuver 02 p0289 A66-11653  
 Motion equation for satellite with passive and semipassive attitude control using geomagnetic field, considering elliptical and circular orbits and involving differential equations 02 p0295 A66-11670  
 Liapunov function determining sufficient conditions for stability of autonomous functional differential equations with finite time lag 02 p0249 A66-11900  
 Rotation of rigid body force affected, using matrix equations, noting coordinate system and differential equation 02 p0290 A66-11989  
 Cauchy problem for infinite order linear differential equation 02 p0250 A66-12019  
 Mixed boundary value problem in bounded region for Navier-Stokes equations and discontinuity equation 02 p0219 A66-12101  
 Analysis of equation system for constructing regularizing algorithms for optimum control determination 02 p0209 A66-12103  
 Ordinary differential equations theory yielding hydrodynamics conditions of stability with respect to finite perturbations for plane stationary curvilinear flow of ideal fluid 02 p0219 A66-12104  
 Asymptotic particular solution for linear nonhomogeneous second-order ordinary differential equation with large parameter 02 p0250 A66-12149  
 Confining annular regions for solution trajectory of relaxation oscillations described by generalized Lienard equation 02 p0261 A66-12151  
 Stability problem of steady motions, using differential equations with time delay 02 p0262 A66-12167  
 Comparison lemma for determining uniqueness of solution to Cauchy problem for ordinary differential equations 02 p0251 A66-12243  
 Singular integro-differential equations with small parameter and corresponding degenerate equations 02 p0251 A66-12244  
 Existence of stable periodic solution of Lienard equation, using asymptotic methods 03 p0392 A66-12617  
 Integral inequalities related to nonoscillation theorems for differential equations 03 p0387 A66-12618  
 Time optimization problem involving dynamic programming, boundary value problem, differential equations and optimal control 03 p0349 A66-12687  
 Stability of solution to autonomous Lienard equation, using second Liapunov method 03 p0392 A66-12688  
 Plotting in phase space controllability region for unstable linear system of differential equations 03 p0350 A66-13043

Spectral functions of generalized second-order differential equations with boundary conditions at singular end 03 p0388 A66-13115

Transformation of equivalent nth order linear differential equations 03 p0388 A66-13154

Nonlinear differential equations describing RC oscillator determining frequency, stable amplitude and transient response 03 p0345 A66-13238

Axiomatic approach to control system theory as generalization of dynamic systems, noting weak and strong stability and Liapunov function 03 p0351 A66-13255

General dynamical system defined by coupling equation giving existence and uniqueness theorems 03 p0389 A66-13256

Stochastic differential equations specifying dynamical structure of filters generating posterior probability distribution when inputs are time functions 03 p0351 A66-13259

Stability of systems of n first-order real differential equations defined over finite time interval 03 p0389 A66-13262

Resonance modes in rods for analyzing coupled oscillations in sandwich plates including differential equations for oscillations 03 p0442 A66-13303

Zeros of solutions of second-order linear differential equation, discussing Sturm comparison theorem 04 p0538 A66-13363

Nonlinear time-variant phase-lock loop differential equation for arbitrary loop voltage-controlled oscillator sweep voltages used in aerospace tracking and communication systems 04 p0502 A66-13605

Eigenvalues of free vibration equation of simply supported beam with finite number of discrete masses, using differential equation 04 p0588 A66-13823

Quadratic form as Liapunov function for linear homogeneous vector differential equation with constant coefficient matrix 04 p0539 A66-13825

Refractive index obtained from equation describing electromagnetic wave propagation in ionosphere 04 p0481 A66-13826

Differential equations of automatic tracking systems reducible to equations with constant coefficients by introducing rotating coordinates 04 p0482 A66-13977

Controllability of nonlinear processes discussing qualitative and quantitative theory and geometric properties of set of attainability 04 p0505 A66-13993

Theory of differential equations discussing extremal problems for generalization of optimal control problem 04 p0505 A66-13994

Parametric response of elastic clamped-free column, noting agreement between theory and experiments for first three spatial and first four temporal modes 04 p0594 A66-14391

Computer algorithm determination of nonlinear system dynamics, using least squares method 05 p0636 A66-14605

Existence theorem for trajectories of orionator field satisfying measurability condition 05 p0707 A66-15032

Union of and estimates for trajectories of orionator fields 05 p0707 A66-15033

Transformation and equivalence of higher than second order homogeneous linear differential equations 05 p0708 A66-15153

Existence and uniqueness of weak solution to Dirichlet problem for elliptic differential equations in Sobolev spaces with special occupancy function 05 p0708 A66-15154

Book on asymptotic expansions in powers of small parameter applied to nonsteady oscillations in nonlinear systems with one or more degrees of freedom 05 p0776 A66-15327

Duality theorems derived for problem of periodic solutions of systems of higher order differential equations 05 p0709 A66-15340

Effective transformation and asymptotic behavior of class of nonlinear differential equations 05 p0709 A66-15343

Inverse eigenvalue problem for second-order differential equation with boundary dependence on parameter 05 p0709 A66-15359

Wave propagation in elastic-plastic half-space subject to von Mises yield condition, due to combined surface pressure and shear [ASME PAPER 65-WA/APM-11] 05 p0777 A66-15433

Asymptotic solutions of second-order

ordinary differential equations in region containing irregular singularity of rank one, with application to Whittaker functions 05 p0710 A66-15475

Asymptotic solutions of second-order differential equations having irregular singularity of arbitrary rank 05 p0710 A66-15476

I-V characteristics of thermionic converters with ohmic resistance, using differential equation with boundary conditions for local potential difference between emitter and collector 05 p0619 A66-15564

Integration of differential equations governing thermal performance of spacecraft radiator [ASME PAPER 65-WA/HT-45] 05 p0792 A66-15663

Axisymmetric dynamic response of ring supported cylinder to time dependent loads, discussing boundary conditions and differential equations of motions [AIAA PAPER 66-83] 06 p0962 A66-16265

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 06 p0862 A66-16522

Convex programming problems, developing parametric gradient method for approximate solution 06 p0838 A66-16526

Averaging systems of integrodifferential equations for small parameter and real n vector functions 06 p0902 A66-16535

Self-similarity of solutions to motion equations for relativistic gas possessing point symmetry and nonexistence of isotropic flow 06 p0954 A66-16538

Optimal control theory for nonlinear vector differential equations containing measures 06 p0863 A66-16620

Pseudo-convex functions, discussing existence criteria, properties and application 06 p0864 A66-16621

Optimum transfer function determination, using Liapunov method and superposition theorem 06 p0864 A66-16683

Cauchy problem at infinity for certain nonlinear systems of ordinary differential equations 06 p0903 A66-16704

Nonlinear differential equation stability, describing technique for Liapunov function construction 06 p0865 A66-16743

Vector equation  $F/X/$  equals zero solved by transforming nonlinear algebraic equation into nonlinear differential equation 06 p0865 A66-16746

Equilibrium properties of system of interacting molecules calculated from differential equation of state for real gas, employing classical and thermodynamic relations 06 p0912 A66-16841

Heat conductivity problems for two-and three-layer systems solved by splitting boundary conditions and dividing system into single layers 06 p0972 A66-16842

Linear time-invariant systems, noting relation between transient response duration and differential equation coefficients 06 p0867 A66-16990

Existence and uniqueness of almost-periodic solution of system of differential equations 06 p0904 A66-17057

Discrete simulation technique using electrical circuit for finite-difference approximation of initial differential equations, noting functional potentiometers 07 p1055 A66-17201

Topological property of torus to study ergodicity of integrals of systems of periodic differential equation in absence of cyclic solutions 07 p1055 A66-17243

Elasto-creeping circular membrane, obtaining nonlinear solution for axisymmetric circular elastic creep problem 07 p1142 A66-17263

Gas flow dissipation in transonic plane-symmetric nozzle, obtaining asymptotic solutions for flow parameter 07 p0979 A66-17264

Second-order linear partial differential equation transformed to normal form, obtaining invariant representation without Ricci calculus 07 p1055 A66-17301

Analytical construction of optimal controller for solution of system of Riccati differential equations 07 p1012 A66-17377

General variational problem for system described by differential equations in which

at least one control figures linearly 07 p1012 A66-17378

Reduction of nonlinear system of differential equations to integral equation of Hammerstein type 07 p1055 A66-17421

Optimal control for systems whose behavior is described by ordinary and differential equations set with initial and boundary conditions 07 p1013 A66-17426

Differential equations defining interaction of nonlinear oscillations in certain regions of parametric space where stable periodic solutions exist 07 p1079 A66-17447

Radiant transport with isotropic scattering, evaluating approximate solutions for reflection and transmission of parallel plane radiation 07 p1152 A66-17589

Cauchy and boundary value problem for second-order nonlinear ordinary differential equations 07 p1056 A66-17607

Popov-related stability results for feedback systems proved via bounded solutions for functional equations 07 p1015 A66-17756

Discontinuous system investigated, using oscillating circuit governed by second order differential equation 07 p1015 A66-17830

Resolving matrix of normal system of ordinary linear differential equations in complex independent variable for multiply connected fields 07 p1057 A66-17835

Boundary problems concerning linear integro-differential equations with caloric operator and delayed arguments 07 p1057 A66-17842

Integral curves described by nearly homogeneous differential equation and behavior in neighborhood of singular point 07 p1057 A66-17854

Stability of quiescent point of dynamic system with random disturbance 07 p1058 A66-17907

Solution of linear differential equations with quasi-periodic coefficients by method of accelerated convergence 07 p1058 A66-17908

Two-tangents method for numerical solution of Cauchy problem for system of ordinary differential equations 07 p1058 A66-17911

Asymptotic behavior of solutions of ordinary linear differential equations involving continuous complex valued functions 07 p1058 A66-17913

Existence of logarithm for nonsingular square matrix, uniqueness for linear ordinary differential equation systems, logarithms of operators and spectral mapping 07 p1058 A66-17966

Existence and uniqueness theorems for invariant-embedding nonlinear ODE systems for absorption loss rate satisfying Lipschitz condition 07 p1059 A66-17972

Existence and uniqueness of piecewise-continuous solution to two-dimensional linear first order hyperbolic system with discontinuous coefficients 07 p1060 A66-18100

Improving estimates of solutions of linear perturbed-motion equations of mechanical systems with variable coefficients 07 p1060 A66-18188

Continuation of certain classes of differentiable functions beyond limits of region 07 p1060 A66-18465

Polymeric material deformation under harmonically varying load action, noting steady state regime temperature distribution effects 08 p1243 A66-18879

Asymptotic solution of problem of thin spherical shell free vibration for axisymmetric and general cases 08 p1308 A66-18888

Reentry guidance by threshold network storage of precomputed optimum commands, using analogy of surface approximation problem in N plus one-dimensional space [AIAA PAPER 66-52] 08 p1249 A66-19898

Extrapolation and interpolation formulas for numerical solution of differential equation 08 p1245 A66-19167

Convergence of transformations of differential equations to normal form 08 p1245 A66-19370

Discreteness and continuity conditions for spectrum of self-adjoint operator generated by differential equations system 08 p1245 A66-19371

Analog computers used in modeling of heat conduction and diffusion processes for

Fourier differential equation 08 p1319 A66-19427

Geometrical optics method for differential equations of fourth order in applications to LF plasma oscillations 08 p1265 A66-19472

Boundary problems for differential and integro-differential equations 08 p1245 A66-19631

Uniform approximation by polynomial solutions for differential equation 08 p1245 A66-19633

One type of infinite-order differential equation with polynomial coefficients of increasing power 08 p1246 A66-19707

Two uniqueness theorems for periodic solutions of second order nonlinear differential equation describing oscillatory systems 08 p1246 A66-19709

Stability analysis of multiple controls, matrix analysis, symmetry and general oscillation equation 08 p1246 A66-19832

Perturbation method for approximating solutions of nonlinear differential systems with initial conditions 09 p1393 A66-19907

Change of variables for generalization of Konyukov second-order nonlinear differential equation, using Bernoulli and Riccati equations 09 p1393 A66-19917

Two types of boundedness for components of solutions of nonlinear autonomous systems 09 p1361 A66-20501

Convergence of numerical solutions of ODE initial value problems 09 p1394 A66-20616

Numerical solution of first order first-degree two-variable for ODE for self-adjusting nonpolynomial interpolant 09 p1395 A66-20617

Runge-Kutta fourth order formula used to obtain approximate solution to differential equations 09 p1395 A66-20618

Numerical integration of coupled first order ODE of greatly differing time constant 09 p1395 A66-20619

Power series drawbacks as tool in numerical solution of differential equations 09 p1395 A66-20620

Singular solutions in optimal control problems, treating singular control surface, flooding technique and allowable switching directions 09 p1362 A66-20653

Direct method of Liapunov used to study stability of ordinary differential equation by obtaining linear bounds on vector components 09 p1363 A66-20654

Floquet form of solution to system of linear differential equations with periodic parameters 09 p1363 A66-20798

Qualitative behavior and index of trajectories in neighborhood of isolated singularity of given form 09 p1363 A66-20799

Differential equations describing boundary conditions at front of change of aggregation state, computing temperature field 09 p1471 A66-20825

Text for senior undergraduates, using Fourier series and integral transforms to discuss standard differential equations of mathematical physics 09 p1397 A66-20917

Asymptotic behavior, at plus infinity, of first order linear differential-difference-delay equation solutions, discussing asymptotic oscillatory number 10 p1549 A66-21224

Analogy between systems of differential equations in vicinity of singular point 10 p1549 A66-21234

Hypergeometric solutions of second-order linear ordinary differential equation with n-regular singular points 10 p1550 A66-21305

Influence on stability of masses which are in relative motion with respect to projectile determined, noting engine thrust effect on attitude control system performance 10 p1611 A66-21386

Large deflections of spherical shells under concentrated loads, obtaining curves for axisymmetric deformations 10 p1616 A66-21493

Chaplygin asymptotic series solution method for differential equation systems 10 p1551 A66-21915

Theorems and corollaries describing bounds for quadratic Liapunov functions 10 p1551 A66-21918

Boundedness and uniform boundedness of nonhomogeneous systems, obtaining necessary and sufficient conditions for existence of solutions 10 p1551 A66-21920

Computational solution of functional differential equations, using successive approximations 10 p1551 A66-21922

Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 10 p1552 A66-21985

Transcendence and algebraic independence of values of E-functions representing solution to third-order linear differential equation 10 p1552 A66-21986

Optimum control processes in systems containing plants with distributed parameters described by ordinary or partial differential equations with initial and boundary conditions 11 p1674 A66-22356

Halley comet motion during return of 1910, obtaining orbits via differential correction procedures, including perturbation by all planets but Pluto 11 p1769 A66-22531

Liapunov first method and applicability to asymptotic stability of stationary points of nonlinear differential systems 11 p1721 A66-22641

Integral curves of particular ordinary differential equation containing singularity 11 p1721 A66-22642

Sufficient conditions for asymptotic dynamic stability of linear differential system with random retardation, using Liapunov function 11 p1736 A66-22643

Current distribution and input resistance of T-type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 11 p1666 A66-22719

Approximate solutions of second order differential equations for nonlinear electronic circuits with strong disturbance 11 p1676 A66-22735

Numerical solution to first geodesic problem of ellipsoid of rotation, using iterative application of Runge-Kutta method to differential equations of geodesic line 11 p1698 A66-22767

Global solutions of Cauchy problem for quasi-linear first-order differential equations in several space variables 11 p1722 A66-22895

Nonlinear servomechanism analyzed, using Fokker-Planck equation, discussing tracking failure 11 p1670 A66-23224

Tapered distributed RC networks with similar immittances examined for poles and zeros of two-port short circuit admittance parameters 11 p1678 A66-23241

Linear system dynamics, discussing time function vector space, spectral coefficients, orthonormal and transfer functions, parameter variation, Fourier approximation, etc 11 p1679 A66-23269

Modified phase-plane delta method for nonlinear system phase portrait 11 p1679 A66-23270

Liapunov function for case of stability with constantly acting disturbances in nonlinear spaces 11 p1723 A66-23316

Graphical-analytical method using successive approximations determines guided missile trajectory 11 p1734 A66-23344

Initial conditions determination in aircraft takeoff from mobile platform required for solution of differential equations of motions of gravity center 11 p1734 A66-23345

Limit cycles and global structure of integral curves of nonlinear system of differential equations in five-dimensional parameter space 11 p1724 A66-23364

First order wave function of helium due to one-and two-electron excitation determined by solving differential equations, noting contribution to second order energy 11 p1741 A66-23405

Stability and boundedness for solutions of class of complex differential systems obtained in terms of Liapunov-like functions 11 p1725 A66-23426

Approximate solution for differential equations and restrictive conditions with unbounded controls 11 p1681 A66-23454

Transformation of canonical system of differential equations with rapidly varying periodic coefficients into canonical system with constant coefficients 12 p1902 A66-23764

Estimates of solutions to second order differential equations generalized to include inequalities with Schwarz derivative numbers 12 p1902 A66-23768

Confidence ratio for Gaussian random processes satisfying certain linear differential equations 12 p1902 A66-2376

Stability of two-dimensional parallel flows using Orr-Sommerfeld equation and adjoint equation with asymptotic solution 12 p1861 A66-2380

Similar solution of differential equation for compressible laminar boundary layers in case of insulated walls 12 p1862 A66-2386

Monotonic two-point system for numerical integration of ordinary differential equations, for case of solutions of constant sign 12 p1902 A66-2390

Wave propagation in elastic-plastic half-space subject to von Mises yield condition due to combined surface pressure and shear [ASME PAPER 65-WA/APM-11] 12 p1961 A66-2398

Modified Ritz method for finding eigenvalues of certain nonlinear ordinary differential equations 12 p1914 A66-2400

Linear differential equation solution nonfluctuation and boundedness estimate in connection with integral inequalities 12 p1903 A66-2402

Cauchy problem for infinite order linear differential equation 12 p1903 A66-2402

Forced oscillations of coaxial multistage rotors, allowing for gyroscopic effect and rotating at different angular velocities determined by replacing differential equations with integral equations 12 p1964 A66-2405

Runge-Kutta type process of fourth, fifth and sixth orders of accuracy for numerical integration of transformed differential equations 12 p1904 A66-2418

Numerical integration of second order differential equations 12 p1904 A66-2418

Numerical integration of differential equation using exterior node quadrature formulas of Ionescu 12 p1904 A66-2419

Sufficient conditions for boundedness of solutions of nonlinear differential equation and oscillatory and asymptotically stable solutions 12 p1904 A66-2419

Boundary value problem solution constructed as expansion of particular solutions of Chaplygin equation in region bounded by parabolic line and two characteristics 12 p1904 A66-2424

Integration of equations determining location coordinates of moving object on terrestrial sphere 12 p1909 A66-2435

Deterministic optimal control, discussing Bellman dynamic programming method Pontryagin maximum principle, orbital transfer, interplanetary guidance, etc 12 p1854 A66-2463

Dynamic system stability, developments application and literature 12 p1854 A66-2463

Exact solution of ODE for plane wave diffraction on periodically rough surface after transmission through inhomogeneous layer 13 p2019 A66-2508

Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-2535

Stability criteria of trivial solution of rheolinear differential equation verified by calculating Liapunov function for nonlinear equations 13 p2117 A66-2539

Matrix solution of limit problems of linear system of ordinary differential equations 13 p2117 A66-2541

Existence of cycles as nonzero periodic solution to system of differential equation with one degree of freedom 13 p2117 A66-2541

Weak, strict and strict-weak Levi conditions defined in complex variables noting conditions for holomorphy and coincidence of functions 13 p2118 A66-2578

Nonlinear differential equations in theory of electrical oscillation 13 p2118 A66-2582

Averaging method for differential equations with retarded arguments 13 p2118 A66-2582

Necessary and insufficient conditions for well-posed Cauchy problems verified by Fourier analysis 13 p2118 A66-2582

Error bounds in phase-integral solution to differential equation with simple turning points 13 p2118 A66-2582

Error bounds of phase-integral method applied to wave-penetration problems 13 p2118 A66-2583

Asymptotically stable linear system  
controlled by scalar random  
input 13 p2048 A66-25849

Countable systems of differential  
equations, considering differential operator  
theory and infinite systems 13 p2119 A66-25850

Complex cycles of differential equations  
examined, deriving limit cycle of  
multiplicity, integration by quadrature,  
etc 13 p2119 A66-25851

Dynamic programming for stochastic  
systems applied in designing controller for  
transferring linear system from initial to  
final position in specified time  
interval 13 p2048 A66-25852

Equation for elliptical system in plane  
singly connected region, satisfying specified  
boundary condition 13 p2119 A66-25903

Existence and uniqueness of solution for  
first boundary value problem of system of  
specified mixed-type differential  
equations 13 p2119 A66-25905

Asymptotic solution of Cauchy problem for  
integro-differential equation with small  
parameter associated with  
derivative 13 p2119 A66-25908

Signal to noise ratio maximization using  
Pontryagin maximum principle, solving  
matched filter problem and designing signal  
with constrained energy and amplitude  
requirements 13 p2048 A66-25940

Approximate analytical solutions for  
distributed parameter networks with  
parameters as functions of spatial variable,  
using differential equation that reduces  
boundary value problem to Sturm-Liouville  
system 13 p2120 A66-26068

Bandlimited and approximately bandlimited  
signals by Fourier transforms of sampling  
function and prolate spheroidal wave  
function representing solutions of second  
order self-adjoint differential  
equations 13 p2120 A66-26077

Controllability of general class of nonlinear  
systems describable by nth order ODE with  
bounded state and control 13 p2052 A66-26079

Numerical integration methods requiring  
least computation time for truncation error  
when applied to ordinary differential  
equations, comparing Butcher with Runge-  
Kutta, Adams, etc 13 p2121 A66-26324

Diffusion-induced stress concentration near  
cavity, relating deformation diffusion and  
heat conduction via differential  
equations 13 p2203 A66-26426

Differential equilibrium equations for  
shallow shells of constant curvature under  
effect of concentrated load, using Fourier  
transform 13 p2205 A66-26440

Axisymmetric form of stability loss of  
cylindrical shell under effect of load  
suddenly applied along generatrix,  
considering inertia forces and obtaining  
differential equations 13 p2206 A66-26456

Decreasing secondary flows in spatial  
boundary layer on porous plate by boundary  
layer control /BLC/ through suction or  
blowing, using Prandtl partial differential  
equations 13 p2065 A66-26460

Text on dynamics of vibrations covering  
oscillations with variable and constant  
amplitude, damping, differential equations of  
motion, nonlinear oscillations, wave  
propagation in elastic solids, etc 13 p2207 A66-26573

Nonlinear ordinary differential equations  
applicable to damped oscillatory circuits  
with exploding wires, obtaining conservation  
law and approximate solutions by Picard  
method 13 p2129 A66-26667

Alfvén wave propagation in inhomogeneous  
magnetic fields satisfying  
magnetohydrostatic equation and allowing  
for electric currents solved, using  
differential equation 13 p2156 A66-26710

Heat transfer in Couette flow of radiating  
fluid with viscous dissipation, noting  
conduction coupling, effects of temperature  
level, profile, wall emission, fluid optical  
thickness, etc 13 p2210 A66-26718

First boundary value problem for nonlinear  
second order differential  
equations 14 p2320 A66-26942

Uniqueness of operator spectral function  
of self-adjoint boundary value problem  
involving second-order differential equation

with operator coefficients 14 p2320 A66-27158

Numerical-analytical method of obtaining  
periodic solutions to T  
systems 14 p2321 A66-27160

Green function of high degree of self-  
adjoint expansion of elliptic operator  
generated by differential expression is  
smooth inside domain and on smooth part of  
boundary 14 p2321 A66-27161

Twice continuously differentiable function  
satisfying nonlinear hyperbolic equation for  
certain initial conditions obtained, using  
averaging method 14 p2321 A66-27163

Polynomial solutions to system of  
differential equations in theory of  
elasticity 14 p2321 A66-27201

Small motion superposed on stationary  
slow deformation process of viscoelastic  
material with fading memory, based on  
Rivlin and Ericksen differential  
equation 14 p2397 A66-27384

Linear differential system for rendezvous  
with target in elliptical  
orbit 14 p2391 A66-27471

Solution of optimum filtering problems  
when input signals of automatic control  
system are described by different  
differential equations at successive time  
intervals 14 p2265 A66-27523

Coordination of integral and relay  
components in algorithms for adjusting  
control coefficients in model-reference self-  
adaptive control systems described by  
differential equations 14 p2266 A66-27526

Convergence of optimal control for  
denumerable system of differential  
equations treated by functional-space  
decomposition 14 p2267 A66-27672

Green matrix of periodic boundary value  
problem for system of linear differential  
equations 14 p2322 A66-27675

Existence of periodic solutions of  
differential equations in nonlinear mechanics  
[PST PAPER NT-147] 14 p2323 A66-27792

Linear differential equations for slowly  
rotating symmetrical satellite in circular  
orbit 14 p2392 A66-27879

Gyroscope motion on randomly shifting  
support described by linear inhomogeneous  
differential equation 14 p2297 A66-28064

Liapunov stability and instability in critical  
case of determining equation with even  
number of zero roots 14 p2336 A66-28065

Optimum control systems for plants  
described by ordinary nonlinear differential  
equations or differential equations with  
constant or variable delay 14 p2268 A66-28278

Estimation of proximity of solution for  
Cauchy problem of nonlinear differential  
equations, formulating six  
theorems 14 p2325 A66-28279

Asymptotic estimates of characteristic  
values of differential equation with periodic  
coefficients 15 p2524 A66-28507

Existence and stability of periodic motions  
in dynamic systems applied to analysis of  
uniformly asymptotically stable solutions of  
differential equations 15 p2525 A66-28508

Domains of attraction in large of periodic  
solutions of weakly nonlinear systems, using  
Liapunov function and differential  
equations 15 p2525 A66-28509

Existence, boundedness, decay and  
exponential decay of solutions of classes of  
nonlinear systems of differential equations,  
using suitable Liapunov  
functions 15 p2525 A66-28510

Linear normal form of system of real  
differential equation, noting disappearance  
of difference between Hartman and  
Sternberg hypotheses 15 p2525 A66-28511

Sufficient conditions for recurrence and  
positivity of diffusion process defined by  
stochastic differential equation, using  
Liapunov function 15 p2525 A66-28512

Stability of nonlinear control systems,  
noting Hermitian matrix for linear system of  
ordinary differential equations and  
analogous problem for difference  
equations 15 p2525 A66-28513

Numerical solution of nonlinear integro-  
differential boundary value problems with  
parabolic operators and retarded  
argument 15 p2525 A66-28519

Algorithms for numerical determination of  
asymptotically stable solutions for ordinary  
differential equations 15 p2526 A66-28734

Stability and existence of small periodic  
solutions of ordinary differential  
equations 15 p2526 A66-28735

Minimax problem for pursuit problem of  
two linearly controlled objects describable  
by identical differential  
equations 15 p2526 A66-28948

Expansion of arbitrary function of Mehler-  
Fok integral form in terms of spherical  
functions 15 p2526 A66-28952

Dynamic stability differential equations and  
stability and instability theorems derived  
from them 15 p2538 A66-29044

Parametrically analytic solution of infinite  
differential equation 15 p2527 A66-29047

Extension of dynamics to arbitrary systems  
of differential equations, proposing universal  
canonical structure generalizing Hamiltonian  
structure 15 p2539 A66-29145

Optimal control process for  
brachistochrone motion, discussing solution  
and inversion of synthesis  
problem 15 p2470 A66-29150

Asymptotic methods of nonlinear  
mechanics, involving averaging for  
differential equations, applied to motion  
equations of satellites and resonance in  
electric circuits 15 p2541 A66-29162

Periodic solutions of nonautonomous  
systems of ordinary differential equations  
and equations with delayed argument,  
examining new theoretical  
methods 15 p2527 A66-29164

Oscillating solutions of ordinary nonlinear  
nonautonomous differential equations, noting  
qualitative methods 15 p2527 A66-29168

Theory of differential equations with  
deviating argument, noting stability and  
periodic solutions 15 p2528 A66-29169

Stabilization of unstable two-point  
boundary value problems, noting field  
method for avoiding computer storage  
problems during integration of related  
differential equations 15 p2528 A66-29292

Existence theorem for nonlinear ODE  
system with continuous monotonic  
differential operators over Hilbert space and  
application to nonlinear network  
analysis 15 p2528 A66-29370

Stochastic extensions of techniques for  
using Liapunov second method in design and  
analysis of feedback controls, using  
differential equations 15 p2473 A66-29376

Differential equations describing elastic  
shells of revolution under physical  
nonlinearities, noting positive stresses in  
buckling zone 15 p2611 A66-29422

Evaluation of solution moduli of nonlinear  
contour problems pertaining to polyvibrant  
systems with delayed remainders and  
arguments 15 p2529 A66-29653

Approximate method, using power  
polynomials, for calculating distance  
between detached shock wave and  
profile 15 p2425 A66-29721

Plasma stability analysis, discussing low  
density fluid equations, variational principle  
and sufficiency condition at moderate  
densities, electric field effect,  
etc 15 p2554 A66-29746

Dynamic characteristics of automatic  
control plants determined, using term-by-  
term integration of differential  
equations 15 p2475 A66-29768

Linear initial value problems involving first  
order differential equations transformed  
into higher order systems and treated as  
boundary value problems, using numerical  
techniques 15 p2529 A66-29773

Multicategory pattern recognition, noting  
mathematical treatment, dimensional and  
correlational effects, etc 15 p2453 A66-29774

Stability of mean solution, probability  
solution and almost-everywhere solution to  
random parameter differential  
equation 15 p2529 A66-29854

Self-similarity of solutions to motion  
equations for relativistic gas possessing  
point symmetry and nonexistence of  
isentropic flow 15 p2603 A66-29978

Effective transformation and asymptotic  
behavior of class of nonlinear differential  
equations 15 p2530 A66-29979

Sandwich panel bending under thermal and  
mechanical loads, solving differential  
equations for temperature distribution,  
transverse load and uniform edge

compression with boundary conditions 16 p2812 A66-30218

Multidimensional generalized transport equations solutions and calculation by difference methods 16 p2732 A66-30240

Linear integral operators applied to singular differential equations and to computations of compressible fluid flows 16 p2683 A66-30241

Differential equation derived for cooling of infinite porous tube by gas injection through wall, determining wall temperature distribution 16 p2827 A66-30674

Unperturbed motion for follow-up systems in critical case of double zero root, noting stability and correspondence of root to solution of first approximation equation 16 p2733 A66-30738

Uniqueness and solution estimates to boundary value problems, noting solvability correlation with existence of Green function 16 p2733 A66-30739

Asymptotic behavior of solution to ordinary differential equation, noting transformation to nearly diagonal system of first order 16 p2733 A66-30741

Nonstationary problem of linear filtering in presence of additive noise solved by computer simulation 16 p2669 A66-30762

Transformation and equivalence of homogeneous linear differential equations of higher than second order, examining equivalence of regular equations with dimension 16 p2734 A66-30778

Approximate analysis of nonlinear systems similar to harmonic oscillators, using Chaplygin theory of differential inequalities 16 p2705 A66-30781

Existence theorem of recurrent solutions to differential equations defined in Banach space for dynamic and nondynamic systems 16 p2735 A66-30785

Controller analytical design for nonautonomous systems, deriving necessary and sufficient conditions for existence of optimum control 16 p2670 A66-30832

Convex programming problems, developing parametric gradient method for approximate solution 16 p2656 A66-30836

Duality theorems derived for problem of periodic solutions of systems of higher order differential equations 16 p2735 A66-30970

Averaging systems of integro-differential equations for small parameter and real  $n$  vector functions 16 p2736 A66-30973

Asymptotic behavior of solutions of ordinary linear differential equations involving continuous complex valued functions 16 p2736 A66-30976

Convergence of transformations of differential equations to normal form 16 p2736 A66-30977

Discreteness and continuity conditions for spectrum of self-adjoint operator generated by differential equations 16 p2736 A66-30979

Boundary problems for differential and integro-differential equations 16 p2736 A66-30980

Uniform approximation by polynomial solutions for differential equation 16 p2736 A66-30982

Numerical analysis of stress-strain rate of siphon bellows, using differential equations 16 p2820 A66-31145

Estimation of least distance between consecutive zeros of nontrivial solution of second order differential equation 16 p2737 A66-31228

Extension of problem of singular perturbation for linear scalar constant coefficient differential-difference equation with single retardation to several retardations, noting degenerate equation solution 16 p2737 A66-31230

Numerical problems in application of Urabe results in considering periodic nonlinear differential systems, obtaining Galerkin approximations 16 p2737 A66-31231

Analog computer technique for solving nonlinear ODE system 16 p2658 A66-31263

Volterra series analysis of aperiodic solutions to certain second order integrodifferential equations with nonlinear damping and nonlinear restoring force 16 p2737 A66-31334

Highly stable predictor-corrector methods

for solving systems of differential equations 16 p2658 A66-31348

Approximate analytical solution for pitching and rolling motion near resonance of sounding rocket, using nonlinear differential equation 16 p2811 A66-31470

[AIAA PAPER 66-463] Approximate substitution of ordinary dynamical systems for systems with retardation by increasing order of ordinary differential equations 16 p2748 A66-31505

Unsteady expansion of plane layer of ideal gas into vacuum for various laws and durations of energy release described by equations of gas dynamics 16 p2690 A66-31617

Periodic and quasi-periodic solutions to differential equations describing pulsed systems 16 p2738 A66-31709

Monograph on theory of ordinary delay differential equations and optimal control processes with time delay 16 p2673 A66-31749

Book on stability, oscillation and time lags in differential and differential-difference equations, discussing Liapunov stability theorem 16 p2739 A66-31754

Iteration methods for solution of integro-differential equations 17 p2945 A66-31807

Stability of constant solutions for second-order nonlinear differential equation which uses Hahn notations and definitions 17 p2945 A66-31837

High order Runge-Kutta formulas for systems of first and second order differential equations with small truncation error 17 p2945 A66-31877

Stochastic analysis of systems described by linear differential equations subject to random disturbances, noting application to variational behavior of optimal control systems 17 p2900 A66-32076

Propagation along rays or bicharacteristics for two equations with partial linear derivatives having two unknowns and coefficients which are indefinitely differentiable 17 p2945 A66-32280

Noise rejecting algorithms for ODE solutions with computer, using redundancy, placement of control and feedback techniques 17 p2877 A66-32569

Computer solution using Bubnov-Galerkin method to determine concentrated force effect on shallow spherical dome 17 p3026 A66-32601

Least squares method to solve linear integral and differential equations 17 p2947 A66-32608

Electron capture detector parameters in pulse sampling mode analyzed, noting kinetic processes, temperature effect, etc 17 p2961 A66-32660

Asymptotic methods of nonlinear mechanics applicable to nonlinear differential equations with random arguments 17 p2958 A66-32711

Boundedness of solutions to nearly differential equations with random arguments 17 p2947 A66-32712

Maximum error curves for Lanczos selected point method of polynomial solution to ordinary differential equations, using Chebyshev and Legendre functions 17 p2947 A66-32858

Textbook on differential equations with deviating arguments, covering existence theorems, linear equations, stability theory, boundary value problems, etc 17 p2947 A66-33188

Electromagnetic wave propagation in cylindrically stratified plasma, noting ODE describing transverse propagation of axial component 17 p2876 A66-33279

Solution method for use when linear combinations of given approximate solutions are used for representing exact solution of general ordinary linear homogeneous differential equation 18 p3125 A66-33627

Bending behavior of spherical shells through second-order differential equation with complex coefficients, noting effect of load 18 p3253 A66-33765

Bending behavior under lateral loads and stretching effects due to in-plane forces described by two uncoupled differential equations governing circular plates 18 p3253 A66-33803

Mathematical model for predicting strength and density of material from deceleration-

time history of instrumented impact probe 18 p3253 A66-33805

Thrust programming in central gravitational field, discussing reduction of Mayer-Bolza variational problem to boundary value problem for system of nonlinear differential equations 18 p3241 A66-33846

Sufficient conditions for boundedness of solutions of linear system of differential equations with variable coefficients 18 p3126 A66-33929

Discontinuity condition in optimal control problem, considering motion of points in  $n$ -dimensional space separated by hypersurface 18 p3126 A66-33930

Differential equation system describing nonsteady state motion of liquid in open channel 18 p3097 A66-33932

Approximation solution to plane bend problem in thin rod of variable rigidity 18 p3254 A66-33933

Minimal element determination for certain set related to interpolation of second-order linear ordinary differential equations 18 p3126 A66-33954

Improved Chaplygin solutions to ordinary differential equations 18 p3126 A66-33955

Infinite boundary value problem solution for third-order differential equations obtained in convergent series form 18 p3126 A66-33974

Differential inequality theorem for boundary value problem involving second-order differential equation 18 p3126 A66-33975

Topological classification of higher dimensional systems of ordinary differential equations by Liapunov functions 18 p3127 A66-33976

Existence, uniqueness and periodicity of solutions to boundary value problems for quasi-linear ODEs on topological space of continuous mappings 18 p3127 A66-34138

Heat transfer effectiveness-number of transfer unit relations determined, using differential equations to obtain temperature profile of each channel in exchanger 18 p3262 A66-34382

Square-integrable approximate solution to certain ordinary differential equations in particular function space 18 p3127 A66-34640

Solution for inhomogeneous differential linear equation in integral form obtained from Wronskian 18 p3128 A66-34701

Two physical-space and two spectral solutions of Burger equation which are exact, viscous and nonsteady 18 p3103 A66-34930

Poincare-Liapunov systems of ordinary differential equations, qualitatively investigating plane and rough systems, singular points, periodic solutions, etc 18 p3128 A66-34966

Dynamic systems described by nonlinear differential equations containing analytical functions for random initial conditions 18 p3091 A66-34984

Synthesizing time optimal control for plants described by linear differential equations with constant coefficients 18 p3092 A66-34993

Plotting in phase space controllability region for unstable linear system of differential equations 18 p3092 A66-35006

Quasi-periodic motion theory, discussing nonlinear oscillations and perturbation theory solution to differential equations 19 p3400 A66-35828

Michalov criterion for exponential polynomials, determining existence of zeros in right half-plane 19 p3388 A66-35829

Differential equations for deformations of nonuniform flat plates bent into cones 19 p3473 A66-35850

Monotonic stability of motion for neutral linear solution 19 p3400 A66-35932

Optimal control for stochastic differential equation system, noting existence and uniqueness of solution for coefficients satisfying Lipschitz condition 19 p3325 A66-35983

Solution of two-point boundary problems in optimal control syntheses in which sensitivity coefficients for differential equations satisfy jump conditions at discontinuity point 19 p3327 A66-36017

Functional derivative technique for designing self-adjusting control systems

having main part implemented by solving differential equations 19 p3328 A66-36021

Partial step integration equation for use with Adams or Adams-Bashforth method of integration of differential equations 19 p3309 A66-36045

Eigenvalue problems for systems of ordinary differential equations resolved computationally by use of quasi-linearization technique 19 p3310 A66-36046

Analogy between systems of differential equations in vicinity of singular point 19 p3389 A66-36181

Unilateral estimates under conditions of asymptotic stability of solutions to differential equations with unbounded operators 19 p3390 A66-36190

Transcendence and algebraic independence of values of E-functions representing solution to third-order linear differential equation 19 p3390 A66-36191

Homogeneous linear differential equations, examining stochastic processes for perturbations causing discontinuous solutions and for perturbations acting on entire bounded intervals 19 p3390 A66-36334

Liapunov second method and stability theory of autonomous and certain nonautonomous systems 19 p3391 A66-36438

Optimization analysis for axisymmetric rocket motor nozzle design based on assumptions for gas particle flow [AIAA PAPER 66-538] 19 p3277 A66-36598

Finite deflection and stability equations for circular cylindrical shells stiffened in longitudinal and circumferential direction 19 p3475 A66-36636

Propagation of spherically symmetric, cylindrically symmetric and plane waves examined via analytic perturbation method in solving gas dynamics equation for nonstationary compressible flow 19 p3443 A66-36638

Ordinary differential equations experimentally determined for describing performance of existing lumped-parameter time-invariant nonlinear physical systems 19 p3392 A66-36710

Optimal control and dynamics of class of hybrid state continuous time systems described by differential equations combined with multistable element 19 p3337 A66-36734

Richardson extrapolation applied to estimate accumulated truncation error for one-step method with variable step size for integrating system of ordinary differential equations 19 p3392 A66-36780

Optimum Runge-Kutta methods of orders 2, 3 and 4 for first-order differential equation with constrained minimum truncation error bounds 19 p3392 A66-36781

Step size for numerical solution of differential equation without violating stability region constraint 19 p3392 A66-36785

Relativity theory for solid-media model design, deriving equations of state and closed system of differential equations based on variational principle 19 p3401 A66-36832

Absence conditions for periodical trajectories in regions of possible existence 19 p3401 A66-36844

Transient processes in linear automatic control systems dependent on parameters which appear when differential equations of analyzing system are transformed by Laplace-Karson method 20 p3537 A66-36892

Optimal control analysis of system behavior described by linear stochastic differential equations 20 p3537 A66-36893

Subdominant solutions of linear differential equations calculated by numerical method 20 p3589 A66-36902

Asymptotic representation of systems of nonlinear differential equations, setting up lemmas and theorems 20 p3590 A66-37484

Mean value theorem for curves arising in solution of ordinary differential equation by series method 20 p3590 A66-37525

Quasi-periodic solutions of nonlinear ordinary differential equations containing parametric discontinuities 20 p3591 A66-37592

Ordinary nonlinear differential equation arising in theory of both axisymmetric and two-dimensional viscous jets falling under gravity 20 p3591 A66-37593

Linear homogeneous third-order differential equations, examining existence, uniqueness and asymptotic behavior of nontrivial nonoscillatory solutions and existence criteria for oscillatory solutions 20 p3591 A66-37608

Existence of unique periodic solution to first-order differential equation and nonautonomous system of two first-order differential equations 20 p3591 A66-37752

Class of nonlinear second-order differential equations with algebraic moving singular points, considering convergent series inversion and existence conditions 20 p3591 A66-37753

Solvability and methods of solution of boundary value problems noting uniqueness, potential theory application in solving polyharmonic equations and second-order equation 20 p3591 A66-37757

Rigorous solutions for loadings applied at apex of spherical shell, noting cases of concentrated radial and tangential force, concentrated moment about polar and planar axis, etc 20 p3670 A66-37761

Asymptotic solutions of differential equations of mass transfer with chemical reaction without assumptions concerning kinematics, showing existence of five regimes 20 p3679 A66-37789

One-dimensional inverse problem of scattering theory, noting differential equation reduction, determining traveling wave coefficient 20 p3519 A66-37993

Differential equations for quasi-homogeneous MHD flow of electrically conducting medium at low magnetic Reynolds numbers 20 p3611 A66-38109

Boundary value problems for Sturm-Liouville-type equation with asymptotic formula derived for eigenfunctions 20 p3592 A66-38420

Boundary value problems with natural boundary conditions solved by representing desired solution by finite sum 20 p3592 A66-38423

Exact solution of ODE for plane wave diffraction on periodically rough surface after transmission through inhomogeneous layer 21 p3702 A66-38514

Optimal control problem, considering system of linear differential equations subject to constraint 21 p3717 A66-38536

Functions equations with stochastic variables as initial values 21 p3755 A66-38539

Krylov-Bogoliubov method applied to linear differential equations, noting transcendental functions and error analysis 21 p3755 A66-38596

Block diagonalization theorem for linear ordinary differential equation systems and applications 21 p3755 A66-38597

Matrix quadratic equation solution derivation applied in finding steady state solutions of Riccati differential equations with constant coefficients 21 p3755 A66-38598

Envelope of parametric equations determined, using geometrical understanding for identification of singularities on envelope, noting relevance to Wankel engine design 21 p3755 A66-38599

Linear dynamic system synthesis from weighting patterns 21 p3717 A66-38600

Approximate method for solution of dynamic stability problem of shafts subjected to pulsating moment and constant axial force 21 p3743 A66-38621

Elliptic singular integro-differential operators on smooth compact manifold without and with boundary 21 p3756 A66-38626

Computer program for numerical solution of ODE systems, noting generation of symbolic solutions via Taylor series expansion 21 p3707 A66-38679

Stability and instability regions determined for third-order differential equation with periodic coefficients 21 p3756 A66-38741

Existence theorems of periodic solutions to integro-differential equation with delayed argument 21 p3756 A66-38742

Mathematical model of linear guidance law to dynamical system, noting reduction of two-point boundary value class error 21 p3765 A66-38870

Linearized motion equations for low-altitude flight pitching stability of aircraft with control surface 21 p3696 A66-38937

Approximate method for determining damping factors of mechanical oscillatory systems with many degrees of freedom described by linear differential equations of  $n$ -th order with constant coefficients 21 p3770 A66-38971

Differential inequality theorems applied to hyperbolic differential equation, discussing Riemann functions and sufficient conditions for characteristic and Cauchy problems for quasi-linear Bianchi equation 21 p3757 A66-39232

Existence conditions of solution to two-point boundary value problem for ordinary nonlinear any order differential equation 21 p3757 A66-39245

Generalized Rolle and Bernstein theorems applied to polynomial approximation of ordinary differential equations over compact linear space 21 p3758 A66-39259

Axisymmetrical deformation of multilayer circular sandwich cylindrical shells, deriving governing differential equations by variational theorem 21 p3831 A66-39272

Initial value problem solution variation linearized by simple transformation 21 p3758 A66-39273

Variation of functional determined on trajectories of differential equation systems with discontinuities, discussing application to optimal control problems 21 p3758 A66-39280

Differential equations of steady motions in perturbed nonlinear autonomous systems with one degree of freedom 21 p3772 A66-39299

Flight stability, discussing quasi-critical case in neighborhood of asymptotic stability boundary of autonomous systems and that of variable system parameters 21 p3696 A66-39594

Bending of anisotropic cylindrical bodies with curved axis under transverse force 21 p3833 A66-39595

Random acceleration theory using diffusion transformation of matrix equation into differential equation 22 p3947 A66-39664

Nonlinear differential equations for cylindrically anisotropic plates, noting errors of Wolmir method 22 p3988 A66-39698

Differential equations for stream functions of particle trajectories in unsteady three-dimensional flows in cylindrical and spherical coordinate systems 22 p3898 A66-40111

Novozhilov transformation of equation system for thin laminar shells 22 p3991 A66-40147

Effect of stiffening ribs on stressed-strained state of shallow symmetrically loaded conical shells, noting reduction of boundary value problem to integration of differential equations 22 p3991 A66-40150

Asymptotic formulas for approximate solutions of Cauchy problem by difference techniques, considering error of tabulated elements 22 p3939 A66-40154

Coupled-modal equations for arbitrary vibratory system, with example for longitudinal vibrations of bar 22 p3992 A66-40298

Algorithms for numerical determination of asymptotically stable solutions for ordinary differential equations 22 p3939 A66-40442

Stability and existence of small periodic solutions of ordinary differential equations 22 p3939 A66-40443

Existence theorem of recurrent solutions to differential equations defined in Banach space for dynamic and nondynamic systems 22 p3940 A66-40447

Dirichlet problem for elliptic system of differential equation which does not satisfy Lopatinskii condition where characteristic equation of system has simple roots 22 p3940 A66-40449

Decomposition of system of linear differential equations, using asymptotic techniques of Krylov and Bogoliubov 22 p3940 A66-40459

Liapunov function and Meyer-Kalman-Yakubovich lemma used to obtain frequency domain stability criteria for linear plant with both monotone increasing and odd monotone increasing nonlinear feedback functions 22 p3940 A66-40529

Maximum principle shown to be necessary and sufficient optimality condition for

dynamic programming method for condition of existence of regular synthesis 22 p3884 A66-40531

Book on numerical processes in differential equations including initial value and boundary value problems 22 p3941 A66-40620

Motion stability described by differential equations of perturbed motion 22 p3949 A66-40691

Taylor stability of time-dependent flow between two concentric circular cylinders, noting solution of differential equations for perturbations by Galerkin method 22 p3902 A66-40706

Generalization of differential equation of dynamo theory of geomagnetic variations to include unsteady dynamo effect in ionosphere 22 p3914 A66-40759

Stability of trivial solution to system of linear differential equation with distributed delay, determining majorant of solutions to Cauchy problems 22 p3941 A66-40797

Differential equations with delayed argument describing laws of motion and action of control elements upon motion in problem of trajectory with moving right hand terminus 22 p3941 A66-40800

Shell dynamical integral and integro-differential BVPs for linear deformable shells, examining reciprocity theorem and Kirchhoff-Love hypothesis 23 p4136 A66-40997

Periodic solutions of nonlinear differential systems, examining Galerkin procedure and method of averaging 23 p4084 A66-41054

Axisymmetric dynamic response of ring supported cylinder to time dependent loads, discussing boundary conditions and differential equations of motions [AIAA PAPER 66-83] 23 p4138 A66-41106

Successive approximation method for optimization of nonlinear systems of ordinary differential equations with limitations on phase coordinates 23 p4084 A66-41352

Automatic control system analysis via space-state method, using  $n$  first-order differential equation 23 p4049 A66-41399

Generalized function solution for ordinary differential equations 23 p4084 A66-41406

Current distribution and input resistance of  $T$  type, corner and bent tape vibrators powered by lumped electromotive force, using method of integro-differential equations 23 p4045 A66-41457

Approximate solutions of second-order differential equations for nonlinear electronic circuits with strong disturbance 23 p4049 A66-41473

Lienard type of differential equation for oscillatory system representing solution by Krylov-Bogolubov method, noting inverse problem 23 p4085 A66-41545

Trajectory stability of diffusion-type random Markov process described by Ito stochastic differential vector equations 23 p4085 A66-41554

One- and two-sided estimates for distances between two zero points of solution of nonlinear differential equation with slowly varying parameters, comparing solutions 23 p4090 A66-41563

Photoconductivity in homogeneous semiconductors when solution of second-order nonlinear differential equations with indivisible variables is obtained in elementary functions, noting light intensity effect 23 p4113 A66-41564

Impulse response of second-order time varying systems of differential equation obtained without knowledge of independent solutions of associated homogeneous equation 23 p4086 A66-41694

Numerical integration with aid of matrices for solving differential equations of structural mechanics 23 p4139 A66-41786

Approximate second-order supersonic delta wing theory taking into account second-order differential equation via approximate particular integral 23 p4011 A66-41897

Differential equations of linear theory of elastic shells derived under Kirchhoff-Love hypothesis with aid of static-geometric analog 23 p4142 A66-41956

Pressure-perturbation produced by supersonic aircraft near caustic, deriving differential equations 23 p4016 A66-42040

Existence of similar solutions for given

differential transonic equations for free stream Mach number of unity 23 p4014 A66-42049

System of differential equations describing stability of certain generalized processes in language of functional sets and distributions 24 p4230 A66-42214

Airy and Weber equations solutions and relationships in terms of exponential function in connection with hydrodynamic stability and Orr-Sommerfeld equation 24 p4193 A66-42284

Layer-like field inhomogeneities in homogeneous semiconductors occurring when conductivity decreases analyzed using Poisson and transport equations, obtaining stationary solutions for differential negative conductivity 24 p4254 A66-42424

Stability of periodic solution of nonlinear systems with coefficients dependent on amplitude and frequency 24 p4188 A66-42478

Harmonic linearization, estimating quality of oscillatory transients in nonsearching self-adjusting systems described by high order differential equations 24 p4188 A66-42480

Existence of solution of linear problems for ordinary differential equations 24 p4231 A66-42538

Book on asymptotic methods of integrating linear differential equations with varying coefficients, emphasizing equations for oscillatory processes 24 p4231 A66-42613

MOS equivalent circuit for small signal HF operation of insulated gate field effect transistor in pinch-off mode, using differential equation 24 p4183 A66-42638

Pressure, temperature, gas velocity, thrust and specific impulse of rocket combustion chambers determined, using differential equation and Runge-Kutta method 24 p4261 A66-42743

Asymptotic behavior of solution to system of differential equations with random limited coefficients 24 p4232 A66-42749

Quadratic Liapunov functional derivation for time-delay system 24 p4232 A66-42845

Oscillatory properties of linear matrix differential system, applying generalization of polar coordinate transformation to certain systems of second order 24 p4233 A66-43100

Three families of classical fifth-order Runge-Kutta formulas including Newton-Cotes, Legendre-Gauss and Lobatto and Randau types 24 p4233 A66-43206

### DIFFERENTIAL GEOMETRY

#### SA PROJECTIVE-DIFFERENTIAL GEOMETRY

Conditions of integrability for certain normal systems of equations with partial derivatives 04 p0538 A66-13469

Invariance of differential equation systems in real gas dynamics considered in affine space-time 07 p1022 A66-18104

Geometrical properties of partial differential equations with independent variables, using Cartan method 23 p4084 A66-41061

### DIFFERENTIAL INTERFEROMETRY

Holographic interferometry, advantages and operation 13 p2076 A66-25048

### DIFFERENTIAL OPERATOR

Error estimate in obtaining eigenvalues of linear self-adjoint differential operator of elliptical type by finite difference method 01 p0095 A66-11008

Stability of net method for elliptical problems investigated, using low variability of network operator 01 p0096 A66-11184

Spectral matrix of fourth-order differential operator on half-axis 02 p0250 A66-12107

Nonlinear differential-difference equations of form  $Ly$  equals  $f/y$  solved by using  $f/y$  as power series in exponentials 03 p0387 A66-12614

Poisson pseudokernel and pseudodifferential operators on manifold with boundary 05 p0708 A66-15093

Expansion in eigenfunctions of not self-conjugate boundary value problem for differential equation with singularity at zero 05 p0709 A66-15339

Traces on coordinated hyperplanes of elements of functional space 07 p1057 A66-17844

Regularization of ordinary differential operator trace in region of regular boundary conditions 07 p1057 A66-17855

Nonself-adjoint normal differential operators of second order 08 p1245 A66-19632

Projection operators applicable for rearrangement and exchange processes with full recoil effect for unified reaction theory of Feschbach 10 p1558 A66-21961

Linear ODEs in canonical form with aftereffect in functional space of continuous functions 11 p1676 A66-22644

Stability of net method for elliptical problems investigated, using low variability of network operator 12 p1903 A66-24017

Theorems associated with surface parabolic potentials 13 p2116 A66-25334

Countable systems of differential equations, considering differential operator theory and infinite systems 13 p2119 A66-25850

Second-order elliptical operator for  $m$ -dimensional Euclidian space with open region bounded by closed surface 13 p2120 A66-26010

Monograph on direct methods of qualitative spectral analysis of singular differential operators 14 p2319 A66-26873

Perturbation theorem for ordinary differential operators 14 p2321 A66-27626

Existence theorem for nonlinear ODE system with continuous monotonic differential operators over Hilbert space and application to nonlinear network analysis 15 p2528 A66-29370

Intermediate problems for eigenvalues involving self-adjoint differential operator 16 p2732 A66-30235

General boundary conditions for second-order ordinary differential operators 16 p2733 A66-30630

Analytic construction of skew derivative Green matrix for system of second order elliptic PDEs in many variables 16 p2734 A66-30749

Expansion in eigenfunctions of not self-conjugate boundary value problem for differential equation with singularity at zero 16 p2735 A66-30969

Nonself-adjoint normal differential operators of second order 16 p2736 A66-30981

Linear operators describing passage of wave beam through system of amplitude-phase converters forming quasi-optical waveguide or resonator 16 p2666 A66-31546

Discreteness conditions for spectrum of one-term differential operator, considering asymptotic distribution of eigenvalues 18 p3126 A66-33931

Graphical analysis of extremal control system stepwise adapted to process with extremal characteristic located between two first-order linear operators 19 p3324 A66-35582

Theorems associated with surface parabolic potentials 19 p3390 A66-36195

Estimation of Poisson kernels of elliptic operator with variable coefficients by using maximum principle and Fatou theorem 19 p3390 A66-36248

Discretization and differentiation of operators with commutativity proof and with application to Newton method 20 p3589 A66-36904

Eigenfunction expansion of analytic linear ordinary differential operators of boundary value problem with normalized irregular disintegrating boundary conditions 20 p3592 A66-38432

Interior regularity theorem for linear elliptic matrix differential operator 21 p3754 A66-38459

Local existence theorems for elliptic systems with linear matrix differential operator 21 p3754 A66-38460

Semiweak solutions of elliptic BVP, particularly generalized Dirichlet problem 21 p3754 A66-38461

Garding inequality and Green transformation applied to elliptic operators in eigenvalue problems 21 p3755 A66-38465

Single second-order oblique derivative problem with elliptic operator 24 p4232 A66-42830

Approximate differential operator replacing integral operator, taking ionization losses into account in electromagnetic cascade theory 24 p4269 A66-42923

### DIFFERENTIAL THERMAL ANALYSIS

#### DTA/

Superheating of linear high polymer

polyethylene crystals, evaluating time dependence of melting, differential thermal analysis and calorimeter 12 p1899 A66-23937

Heat transfer problems associated with thermal analysis, discussing influence of rate of heat transport on heat transfer process 14 p2412 A66-27494

Metallography, roentgenography and differential thermal analysis of composition temperature ranges of chromium-germanium phases 23 p4082 A66-41825

**DIFFRACTION**

SA ELECTRON DIFFRACTION

SA FRESNEL DIFFRACTION

SA LAUE DIFFRACTION

SA LIGHT TRANSMISSION

SA NEUTRON DIFFRACTION

SA PULSE DIFFRACTION

SA WAVE DIFFRACTION

SA X-RAY DIFFRACTION

Construction method for asymptotic series of given class of functions and application to diffraction theory 09 p1394 A66-20459

Asymptotic expansions of double and multiple integrals occurring in diffraction theory, using stationary phase method 10 p1550 A66-21850

**DIFFRACTION GRATING**

Automatic coordinating measuring equipment using Moire fringes used to record flight paths of rockets 01 p0070 A66-10914

Electro-optic diffraction grating for light beam modulation and diffraction 02 p0239 A66-11371

Coma-corrected, mono- and multifrequency diffraction reflector antennas, examining feed system, electronic scanner and aberrations 05 p0648 A66-14911

Rowland ghosts during movement of spectral lines in double diffraction monochromators and compensation in photoelectric spectrophotometry 05 p0681 A66-15214

Wave polarization change passing through grating 06 p0829 A66-16144

Reflection gratings as end plates in Fabry-Perot cavity, with characteristics of low absorption output coupling and wavelength-dependent alignment of end plates 09 p1385 A66-19930

Concentric circular grid method of testing for aberrations in image-forming optical system and comparison with Ronchi test 09 p1403 A66-20515

Radiated power from modulated electron beam passing near diffraction grating surface 10 p1557 A66-21567

Optical diffraction velocimeter, using backscattered laser light to measure relative velocity between light source and surface 11 p1706 A66-22958

Laser action on rotational line in carbon dioxide and nitrous oxide vibrational spectra in both P and R branches up to J values of over 50 11 p1714 A66-23357

Plane electromagnetic wave diffraction by narrow strip-grating, obtaining reflection coefficient via optical approximation method 13 p2021 A66-25395

Electromagnetic oscillation by monochromatic beam moving over diffraction grating lying on shielded dielectric 13 p2049 A66-26052

Littrow-type IR spectrometer with diffraction grating 14 p2292 A66-27322

Nonfocusing grazing incidence monochromator which utilizes planar gratings and collimating slit systems 14 p2293 A66-27326

Light transmission through optical diffraction lattice consisting of medium in EM field of laser beam 15 p2511 A66-28626

Wave polarization change passing through grating 15 p2452 A66-29874

Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 17 p2938 A66-33515

Acoustic-array microwave grating quartz transducer creates variable delay characteristic with frequency 18 p3075 A66-33608

Functional equation applied to wave

scattering by infinite grating of elliptic cylinders 19 p3304 A66-36409

Fourier series solution to electromagnetic wave diffraction on metallic gratings with anisotropic dielectric 20 p3512 A66-37148

Gain, efficiency, directivity and application of reflectors, considering use of passive repeaters for increased transmission efficiency 20 p3516 A66-37715

Electromagnetic wave emission excited by electron stream over diffraction grating lying on boundary of semiinfinite anisotropic dielectric 20 p3519 A66-37998

Optical properties of plane and aspherical diffraction gratings having unequal spacings of ruling, examining possible use in 50 to 500 angstrom wavelength 21 p3771 A66-39128

Pulse compression using diffraction gratings and frequency sweeps of 30 mc in quartz crystal ultrasonic transducer 23 p4034 A66-41017

Radiation control of ruby laser by diffraction modulator with traveling ultrasonic wave, noting computer solution of kinetic equations of population balance, radiation density, characteristic damping, etc 24 p4219 A66-42128

Diffraction gratings by recording laser-generated interference pattern on high resolution film as two-beam hologram 24 p4210 A66-42259

Diffraction of waves by transparent screen studied to determine what information about diffracting screen can be obtained by observing diffraction pattern 24 p4173 A66-42712

**DIFFRACTION PATH**

Radar localization deviations, examining infinitely-long conducting cylindrical obstacles 04 p0488 A66-14413

Multiple diffraction of microwaves over knife-edge obstacles, obtaining path loss 19 p3304 A66-36410

Microwave diffraction over natural obstacles, stressing variation of signal level in time, space and frequency and polarization dependence and depolarization 19 p3304 A66-36411

**DIFFRACTION PATTERN**

Laser with diffraction limited radiation pattern 01 p0082 A66-10450

Thermal, micrographic and X-ray diffraction techniques used for constitution diagram of ternary system tungsten-molybdenum-osmium at various high temperatures 03 p0385 A66-13209

Laser with diffraction limited radiation pattern 03 p0380 A66-13313

Discrete radio source scintillation, considering irregular diffraction pattern caused by ionospheric irregularities 04 p0575 A66-13380

Diffraction field determined for E-polarized plane wave incident normal to evenly spaced nonsymmetrical metallic grid 06 p0838 A66-15895

Temperature effect on diffraction curve profile for Bragg case using triple crystal spectrometer, observing intrinsic temperature effect due to thermal motion 06 p0923 A66-16186

Granularity and radial structure in circular Fraunhofer diffraction fringes produced by lycopodium powder scattering of monochromatic coherent light 06 p0891 A66-16443

Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 06 p0896 A66-16539

Short wave asymptotics of diffraction field at sphere for incident plane transverse waves 07 p1144 A66-18182

Diffraction contrast analysis, using transmission electron microscope, of two-dimensional defects present in mechanically damaged silicon after annealing 07 p1109 A66-18516

Multimode antennas, discussing mode and moder generation, radiation sum and difference pattern control, discontinuity reflections, monopulse antennas, etc 08 p1191 A66-18945

Small angle scattering technique with high resolution electron microscopy to determine columnar structure of thin vacuum condensed Pd films 10 p1573 A66-21247

Ground diffraction pattern caused by radio

wave reflection from F region, using array of three aerials 11 p1651 A66-22374

Diffraction by conducting cylinder solved by approximation method, using expanded series of diffraction field of cylinder with polygonal section 11 p1662 A66-22464

Optical resonator diffraction loss, noting laser oscillations in high loss arrangements, output beam power, field patterns, etc 13 p2090 A66-25195

Plane wave diffraction by infinitely conducting network representing diffracted electric field by Rayleigh expansion 13 p2021 A66-25457

Cross section method to solution of diffraction of electromagnetic wave at inhomogeneous sphere, using membrane function 14 p2239 A66-27736

Radiation characteristics of horn antennas analyzed, using edge diffraction theory, noting intensity at backlobe and far sidelobe 14 p2255 A66-27908

Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 15 p2557 A66-28564

Diffraction pattern study of titanium single-crystal surface 15 p2566 A66-29389

Anisotropic broadening of X-ray diffraction lines and increase in lattice perimeter resulting from neutron irradiation of beryllium oxide powder 15 p2524 A66-29986

Intensity distribution in Fraunhofer diffraction patterns of slit and apertures illuminated by partially coherent light 18 p3118 A66-33986

High energy measurement of neutron-proton elastic scattering, noting diffraction peak existence, differential cross section and secondary forward peak 18 p3166 A66-34163

Diffraction pattern analysis of fields generated by hoghorn-fed Cassegrain antenna operating in Fresnel zone 18 p3083 A66-34289

Optimum shape of feed patterns for paraboloidal antennas 18 p3083 A66-34293

Moire fringe precision angle transducer 19 p3355 A66-35502

Diffraction of electromagnetic plane by half-plane in uniaxially anisotropic medium solved in terms of Sommerfeld approximation 19 p3304 A66-36284

Ultrasonic light diffraction, deriving line intensity in form of quadratures with parametric dependence 20 p3601 A66-37147

Effect of emulsion thickness on optical characteristics of reconstructed images, noting sensitivity to incidence angle 20 p3558 A66-37287

Von Laue and Cowley diffraction theories of coherent diffuse X-ray scattering from random alloys, predicting diffuse intensity singularities at reciprocal lattice points 22 p3948 A66-40084

Production of thin copper and nickel ferrite films in inert gas plasma reveal spinel structure in electron diffraction patterns 23 p4112 A66-41285

Laser beams and resonators, discussing beam propagation in free space, geometrical optics application and resonator modes in view of aperture diffraction effects 24 p4225 A66-42806

Irregular diffraction analysis with ultrasonic waves, measuring air stream temperature fluctuations and velocity 24 p4176 A66-43020

Divergent-beam diffraction geometry for interpretation of Kossel diffraction patterns in space group assignment lattice parameters and structure factor evaluation 24 p4239 A66-43169

**DIFFRACTION PROPAGATION**

Diffraction losses of open resonator oscillations with plane mirrors as function of absorption band of mirror 02 p0241 A66-11772

Pendellosung fringes in elastically deformed silicon, observing X-ray wavefield beam interference upon superimposition on crystal exit surface 07 p1098 A66-17815

Diffraction velocimeter detecting and measuring transverse movement of surface by sensing light backscattered by it when laser illuminated 07 p1044 A66-18333

Random irregularities caused by mechanical distortion in lenses, reflectors or

diaphragms of optical beam waveguides and increases in diffraction  
 attenuation 09 p1345 A66-20491  
 Geometric diffraction theory to predict radar cross section of cones and disks 10 p1498 A66-21597  
 Propagation mode of harmonics and effects on reflection and transmission coefficient at plane grid 10 p1506 A66-22001  
 Fabry-Perot interferometer with mirrors in form of backed metal grid, noting changes in diffraction, reflection and transmission 11 p1704 A66-22348  
 Geometrical theory of diffraction applied to calculation of radiation pattern and impedance of monopole antenna 11 p1663 A66-22545  
 Multiple diffraction of circular or linear front acoustic wave at polygon apices 12 p1914 A66-24350  
 Phase reference beam of two-beam carrier frequency holography method used for polarization reference 12 p1883 A66-24561  
 Plane electromagnetic diffraction by wide aperture in conducting screen immersed in anisotropic medium 14 p2241 A66-27981  
 Diffraction by wide slit in uniaxially anisotropic plasma solved by multiple scattering technique 16 p2761 A66-31006  
 Propagation mode of harmonics and effects on reflection and transmission coefficient at plane grid 18 p3072 A66-34978

## DIFFRACTION TELESCOPE

Meteor velocity determination via diffraction method, noting instrumental errors, recording and data processing techniques, etc 17 p3000 A66-32340

## DIFFRACTOMETER

### SA PARTICLE SIZE

Direct measurement of dispersion properties of cadmium sulfide and CdS-CdSe crystals, using Obreimov-Fresnel diffraction method, growing crystals by synthesis 21 p3799 A66-38926

## DIFFUSION RADIATION

Angular dependence of radiation intensity scattered from plane diffuse surface illuminated by wideband collimated light 07 p1081 A66-18039  
 Stray radiation error reduction in spectral emittance measurements for diffusely reflecting materials 11 p1737 A66-23410  
 Thermal emittance and reflectance of diffuse-bottomed, specular-walled groove in solar radiant-flux environment [AIAA PAPER 66-459] 16 p2811 A66-31491  
 Shadowing effect and anomalous backscattered intensity in diffuse reflection from plane-parallel layer of random particles 18 p3068 A66-34014  
 Transfer efficiency of laser pumping cavities with diffusely reflecting wall determined, based on approximately isotropic nature of light inside cavity 19 p3372 A66-35379  
 Photometry of flux from surface and representation as Fourier series of time dependence of received reflected flux for torse of convex curvature 20 p3556 A66-36937  
 Radiant heat transfer between concentric spheres and coaxial cylinders, assuming isothermal inner surface to be diffuse emitter and outer surface to reflect specularly 22 p3998 A66-40030  
 Heat transfer from gray fin-tube radiators with numerical results for diffuse surfaces, noting fin and tube emissivities 22 p3998 A66-40037

## DIFFUSER

### SA MAGNETIC DIFFUSER

### SA NOZZLE

### SA SUPERSONIC DIFFUSER

### SA VANELESS DIFFUSER

Calculation of rotationally symmetrical turbulent boundary layer flow through straight diffusers 01 p0006 A66-10214  
 Convection heat transfer for turbulent flow in subsonic diffusers [ASME PAPER 65-HT-64] 05 p0605 A66-14765  
 Influence of inlet flow profile characteristics on diffuser static pressure efficiency, achieving pressure increase if flow has high decay rate 06 p0801 A66-16002  
 Flow regime data for wide range of conical diffuser geometries determined from clear plastic diffuser experiments 11 p1687 A66-22331  
 Radial diffuser using swirl-free

incompressible flow between narrowly spaced disks of radial channel and supply-pipe outlet [ASME PAPER 65-FE-12] 12 p1864 A66-24548  
 Density ratio and transmission probability across conical converging diffuser in free-molecule flow with selected range of speed ratios, using Monte-Carlo method 14 p2219 A66-27416  
 Conical vortex tunnel investigated for thermal efficiency and cold production 14 p2415 A66-28320  
 Flow loss in conical diffusers with boundary layer suction through single slit 16 p2629 A66-30813  
 Flow characteristics, design and performance data for subsonic two-dimensional straight centerline diffusers [ASME PAPER 66-FE-10] 17 p2915 A66-33264  
 Wall shape effects on flow regimes and performance in straight two-dimensional diffusers [ASME PAPER 66-FE-13] 17 p2915 A66-33267  
 Rotating vortex flow and transition phenomena in conical diffuser [AIAA PAPER 66-426] 18 p3046 A66-33643  
 Bell-shape diffuser for rotationally symmetrical flow 21 p3694 A66-38815  
 Velocity distribution for inlet flow in finite radial diffuser 21 p3731 A66-39591

## DIFFUSION

### SA AMBIPOLAR DIFFUSION

### SA ATMOSPHERIC DIFFUSION

### SA EDDY DIFFUSION

### SA ELECTRON DIFFUSION

### SA GASEOUS DIFFUSION

### SA IONIC DIFFUSION

### SA MOLECULAR DIFFUSION

### SA PARTICLE DIFFUSION

### SA PLASMA DIFFUSION

### SA SELF-DIFFUSION

### SA SPECIES DIFFUSION

### SA THERMAL DIFFUSION

### SA TURBULENT DIFFUSION

Optimum detection of diffusion process in white Gaussian noise, using continuous observation 02 p0190 A66-11405  
 Diffused aluminum coating for high temperature application 03 p0380 A66-12371  
 Asymptotic solution of Dirichlet problem for diffusion processes and small parameter in elliptic equations with discontinuous coefficients 03 p0388 A66-12925  
 Vacuum technique for obtaining thin layers of semiconductor material with varying impurity distribution across depth of layer 06 p0924 A66-16545  
 Resistor values in semiconductors calculated from diffusion parameters and vice versa 06 p0857 A66-16928  
 Diffusion technique preparation of GaP p-n junctions and relation of p-i-n junction electric field calculation to Baraff carrier ionization rate theory 07 p1108 A66-18415  
 Alloying technique through doped diffused layer for production of high speed silicon tunnel diodes for logic circuits and memory functions 08 p1188 A66-18653  
 Gold diffusion into silicon and formation of segregations in surface layers and crystal disturbances 08 p1268 A66-18661  
 Diffusion of selenium in cadmium telluride, using radioactive Se as tracer 10 p1574 A66-21353  
 Epitaxial, diffusion and photolithographic processes in manufacture of semiconductor component 10 p1514 A66-22056  
 Sufficient conditions for recurrence and positivity of diffusion process defined by stochastic differential equation, using Liapunov function 15 p2525 A66-28512  
 Diffusion saturation of industrial iron, molybdenum, Kh18N9T steel and ZhS6-K alloy with powdered beryllium mixture 15 p2520 A66-28538  
 Average diffusion cross section for elastic collisions of electrons with heavy particles, comparing calculated and measured values 15 p2551 A66-29225  
 Impurity conduction for arsenic diffused into p-type germanium and boron into n-type silicon 19 p3433 A66-35342  
 Diffusion process involving formation and subsequent migration of series of parallel shear planes within crystal for higher oxides of niobium, tungsten, molybdenum and titanium 22 p3934 A66-40011  
 Anodizing techniques used in diffusion

studies of TiCb system 24 p4228 A66-42616

## DIFFUSION BONDING

Roll reduction diffusion bonding for sandwich structures based on solid state diffusion process [SAE PAPER 650778] 05 p0687 A66-15006  
 Aluminum diffusion bonding for fabrication of Apollo cold plates, noting alternate bonding techniques [SAE PAPER 650779] 05 p0687 A66-15007  
 Rapid method for solid state diffusion bonding of aerospace sheet metal structures fabricated from refractory or dispersion hardened metals [SAE PAPER 650780] 05 p0688 A66-15008  
 Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 09 p1443 A66-20598  
 Joining of dissimilar metals such as molybdenum and tungsten by liquid-alloying diffusion-bonding method in which third metal is used for bonding at interface and removed by diffusion 19 p3367 A66-36116  
 Fabrication techniques for preparation of ion emitter modules requiring high-temperature leak-free bond between porous tungsten ionizer and refractory metal plenum chamber 19 p3368 A66-36118  
 Diffusion and regular model of motion of cosmic rays, noting dependence of applicability to cosmic ray fluxes on chemical composition 20 p3633 A66-38132  
 Strength of joints made in refractory metals using brazing, welding or diffusion bonding, noting role of coating 22 p3925 A66-40265  
 W-diffusion bonding in preparing segmented silicon-germanium-lead telluride thermoelements, noting properties 24 p4248 A66-42116  
 W-diffusion bonding of lead telluride base thermoelements with nonmagnetic electrodes 24 p4216 A66-42117  
 Thermal insulation and structural support for thermoelectric devices, discussing fabrication of diffusion bonded structures in conjunction with material selection 24 p4293 A66-42121  
 Tin and zinc diffusion from doped pyrolytic silicon oxide layers used to form base regions of planar n-p-n and p-n-p-GaAs transistors 24 p4254 A66-42384

## DIFFUSION COEFFICIENT

Diffusion of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 01 p0096 A66-10754  
 Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 01 p0124 A66-10768  
 Friction, diffusion, and electrical conductivity tensors obtained for plasma subjected to strong external magnetic field 01 p0114 A66-10961  
 Thermomechanical treatment and temperature on diffusion mobility and heat resistance of titanium alloys 03 p0384 A66-13170  
 Lattice and grain boundary self-diffusion coefficients of radioactive nickel 63 into high purity nickel measured over temperature range 650-475 degrees C 04 p0535 A66-13746  
 Diffusion coefficient of solar protons in steady state electromagnetic medium of interplanetary space increases with increase in proton momentum 04 p0574 A66-13839  
 Ambipolar diffusion and electron-ion recombination coefficients dependence on electron temperature in afterglow of neon plasmas 04 p0554 A66-14294  
 Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 04 p0568 A66-14349  
 Isotopic ratios and location of light primordial rare gases in stony meteorites and correlation with diffusion coefficients 04 p0580 A66-14482  
 Base diffusion profile arising from boron redistribution in oxide, noting useful approximation 05 p0732 A66-14671  
 Retardation of gallium and arsenic or phosphorus diffusion in silicon 05 p0736 A66-14976

Holographic information of photographic plate and diffusing object 05 p0678 A66-15105  
 Variation of interdiffusion coefficient with composition for niobium-vanadium alloys determined for various diffusion temperatures 05 p0702 A66-15467  
 Determining isothermal diffusion coefficients of gases under isobaric conditions 06 p0908 A66-16154  
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 06 p0970 A66-16345  
 Low temperature copper diffusion limits frequency range of cadmium sulfide shear mode diffusion layer 06 p0851 A66-16461  
 Heat transfer rate to stagnation point of catalytic surface placed in slow flow of dissociated oxygen from glow discharge tube and atom-molecule diffusion coefficient 06 p0822 A66-16632  
 Diffusion distribution of phosphorus in silicon at low surface concentration 06 p0928 A66-16893  
 High temperature oxidation of liquid yttrium and liquid lanthanides and their alloys with gold, obtaining parabolic diffusion-controlled rate constants 08 p1235 A66-18622  
 Heat capacity expression due to chemical reaction, relating composition variations and binary diffusion coefficient with Lewis number, presenting integral equation for system enthalpy 08 p1318 A66-19164  
 Electron diffusion coefficient estimated and compared with theory for case of infinite plane parallel plasma and constant electric field 08 p1264 A66-19226  
 Orientation effect on zinc diffusion rate in p-n junctions, using gallium arsenide single crystals as initial material 09 p1412 A66-19996  
 Tritium diffusion constants of stone meteorites and dependence on tritium production mechanism 09 p1456 A66-20421  
 Atmospheric structure in lower thermosphere, examining grenade clouds to determine density 09 p1375 A66-20892  
 Anomalous diffusion of boron parallel and perpendicular to dislocation arrays in grain boundary contained in silicon 10 p1574 A66-21356  
 Diffusion length dependence on energy of exciting photons for p-silicon and n-and p-germanium, using bevel-grind technique 10 p1578 A66-21666  
 Impurity atom diffusion through narrow diffusion mask opening determined by relaxation method 10 p1512 A66-21762  
 Order in equiatomic germanium silicon solid solution, using diffusion scattering of X-rays calculated by least squares method 11 p1748 A66-22279  
 Nonuniqueness of stationary solutions to system of equations in burning theory with piecewise invariable reaction rate and thermoconductivity and diffusion coefficients 11 p1785 A66-22340  
 Diffusion and propagation phenomena in air-water and water-steam emulsions in one-dimensional flow 12 p1973 A66-23524  
 Carbide formation from beta-titanium and graphite 12 p1895 A66-24377  
 Germanium specimens with various dislocation densities quenched from high temperatures to introduce vacancies, contamination by copper atom diffusion, finding activation energy 12 p1930 A66-24801  
 Diffusion coefficient measurement in fully ionized cesium plasma, using potassium plasma pulse launching techniques 13 p2155 A66-26680  
 Diffusion coefficient calculated for fluctuations due to flute instability in low pressure Penning discharge, using measured correlation times and flute amplitudes 13 p2156 A66-26688  
 Magnetic diffusivity measurement for cylinder of type II Nb-Zr superconductor at 4.2 degrees K, using magnetoresistance probe 14 p2350 A66-26878  
 Diffusion of indium along sessile dislocation in silicon crystal 14 p2356 A66-27070  
 Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum

deposition of heavy contaminant in turbulent atmosphere, approximating vertical wind profile and turbulent diffusion coefficient by power functions of height 14 p2358 A66-27087  
 Motion of slow positive potassium and nitrogen ions in nitrogen, measuring mobility and diffusion coefficients with apparatus whose characteristics are given 14 p2345 A66-28139  
 Motion of potassium ions in argon, using apparatus for simultaneous measurement of mobility and diffusion coefficients 14 p2345 A66-28140  
 Drift and diffusion of slow positive ions in hydrogen, using redesigned apparatus 14 p2345 A66-28141  
 Internal electric field induced by ionized particles and current carriers on impurity diffusion in semiconductors, noting diffusion and Poisson equation 14 p2368 A66-28246  
 Determining isothermal diffusion coefficients of gases under isobaric conditions 15 p2543 A66-29884  
 Isotope-dilution method in combination with chemical sectioning technique to determine self-diffusion in silicon 16 p2771 A66-30202  
 Atmospheric diffusion coefficients by measuring radial growth of chemiluminous trails deposited in upper atmosphere 16 p2695 A66-30712  
 Adiabatic deceleration effect on cosmic ray spectrum, noting particle momentum and energy change, diffusion coefficient independent of energy, etc 16 p2795 A66-30924  
 Atmospheric decay of rocket-released Li due to diffusion, wind and chemical reaction 16 p2697 A66-31008  
 Space charge polarization in glass films, discussing parameters of shift of capacitance-voltage characteristics, diffusion coefficient in metal-glass-silicon dioxide-silicon double-layer capacitor 16 p2779 A66-31089  
 Chapman-Enskog kinetic gas theory calculation of diffusion coefficient of binary gas mixture 17 p3035 A66-32694  
 Ambipolar potential in magnetoactive cold plasma applied to power generation and effects of electric field on diffusion coefficient 17 p2973 A66-32984  
 Rate of diffusion disintegration of metastable helium atoms in decaying helium plasma at very low temperatures, with excitation by electrodeless method 18 p3142 A66-33940  
 Elastic relaxation effect due to diffusion of interstitial hydrogen in tantalum and niobium 18 p3123 A66-34058  
 Diffusion of nickel in solid solution and two-phase alloys of nickel-titanium system 18 p3123 A66-34402  
 Transport properties of ionized monatomic gases, using Chapman-Enskog-Burnett approximation method for determination of thermal conductivity, diffusion coefficients and viscosity 18 p3149 A66-34927  
 Ionization and diffusion cross sections of Ca, Fe, Si and Mg atoms of disintegrated meteors 19 p3455 A66-35270  
 Stable domain propagation for case when electrons have field-independent diffusion coefficient and follow arbitrary static velocity field characteristic exhibiting negative resistivity 19 p3446 A66-36371  
 Periodic and height-dependent solutions for disturbances of concentrations of radon and thoron and decay products above Earth surface, considering turbulent diffusion and radioactive decay 19 p3453 A66-36385  
 Diffusion parameters of impurities from polycrystalline Si in hydrogen flux, noting formula for boundary conditions 19 p3321 A66-36457  
 Diffusion coefficients for transport of plasma across magnetic field calculated directly from motion of test particles 19 p3416 A66-36520  
 Low energy cosmic ray modulation relationship to observed interplanetary magnetic field irregularities in terms of diffusion, using space probes 19 p3454 A66-36765  
 Crystal growth, diffusion and fabrication of gallium arsenide-phosphide junction lasers

with low threshold current densities 20 p3577 A66-37401  
 Fatiguing at room temperature resulting in observable diffusion of silver into copper, using precipitation reaction to analyze influence of large number of vacancies 20 p3584 A66-37618  
 Chemical diffusion as affected by tungsten concentration in columbium-tungsten system measured, using couples prepared from polycrystalline pure metal 20 p3585 A66-37785  
 Sidereal diurnal variation of high-energy cosmic radiation, noting parameters of anisotropy coefficient, cosmic ray source distribution and air shower measurements 20 p3631 A66-37851  
 Integral-diffusion analysis of turbulent flow of incompressible liquid 20 p3548 A66-38111  
 Chemical equilibrium in nighttime ionosphere, estimating diffusion coefficients, noting role of transport processes 20 p3554 A66-38207  
 Diffusion coefficients in outer radiation belt, examining energy dependence on electric and magnetic disturbances contributing to transport of particles 20 p3641 A66-38327  
 Carrier motion equation in Gunn diode in terms of average drift velocity and diffusion coefficient 20 p3534 A66-38402  
 Electric field effect on donors diffusion into intrinsic semiconductor 21 p3799 A66-38927  
 Internal electric field effect on singly ionized acceptor or donor impurity diffusion in uniformly doped n-or p-type semiconductors 21 p3804 A66-39468  
 Nighttime F layer recombination and diffusion coefficients estimated from incoherent scatter measurements of electron densities and electron and ion temperatures 22 p3910 A66-39983  
 Effective diffusion cross section for meteor atoms in atmosphere, using Thomas-Fermi-Dirac and dumbbell molecule models 22 p3983 A66-40764  
 Initial radius of ionized meteor track, taking into account dependence of effective diffusion cross section of meteor atoms in atmosphere on relative velocity 22 p3984 A66-40765  
 Beryllium diffusion into gallium arsenide in /111/ plane with various electron concentrations through vacuum deposition 22 p3967 A66-40843  
 Quasi-linear theory to study turbulent diffusion of plasma caused by instabilities in oscillating discharge 23 p4100 A66-41140  
 Grain boundary self-diffusion coefficient variation with applied stress and production of lattice vacancies applied to cavity growth in high temperature fatigue of Mg 23 p4081 A66-41714  
 Integral ratios for calculating diffusion rate of magnetic field into wall-cooled plasma 23 p4106 A66-41716  
 Turbulent diffusion coefficient determined from vertical profiles of concentration of daughter products of radon 23 p4124 A66-41839  
**DIFFUSION EFFECT**  
**SA SURFACE DIFFUSION EFFECT**  
 Phosphorus diffusion production of p-type silicon for solar batteries 01 p0016 A66-11036  
 Phosphorus diffusion into silicon film and resultant defect structures 06 p0928 A66-16762  
 Built-in electric field effect on simultaneous diffusion of oppositely charged impurities in semiconductors 08 p1268 A66-18659  
 Manganese oxide effect on kinetics and mechanics of sintering of alumina powder compacts 08 p1243 A66-18774  
 Annealing and diffusion processes effect on lifetime of minority carriers in p-silicon used in production of rectifiers 08 p1272 A66-19245  
 Room temperature capacitance voltage characteristics and built-in diffusion voltages in n Ge-n Si double saturation heterojunction 09 p1411 A66-19912  
 Electrical properties, solubility and diffusion characteristics of gold in silicon, noting discrepancy between theoretical calculations and experimental measurements 09 p1432 A66-20975

Diffusivity, elastic modulus and stacking fault energy effect on high temperature creep behavior of alpha brasses 11 p1717 A66-22996

Localized enhanced diffusion in vacancy model to explain Emitter Dip Effect /EDE/ in p-n silicon transistor 11 p1671 A66-23350

Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 12 p1922 A66-24219

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 12 p1930 A66-24460

Gold or copper diffusion effect on breakdown and multiplication characteristics of high voltage silicon p-n junctions, noting presence and formation of microplasma 13 p2161 A66-25194

Zinc-antimonide with high and constant thermoelectric figure of merit obtained by solid phase diffusion 13 p2163 A66-25453

Diffusion-induced stress concentration near cavity, relating deformation diffusion and heat conduction via differential equations 13 p2203 A66-26426

Integrated circuit fabrication noting diffusion steps, temperature and time dependency, doping solid solubility, impurity distribution, etc 15 p2465 A66-29602

Occurrence of collisions between ionized and neutral particles based on analysis of spectrum diffused by E region 15 p2491 A66-30021

Ionospheric sounding using random diffusion of electromagnetic wave by ionospheric plasma with continuous wave through two separate antennas 16 p2653 A66-30953

Klystron transmitter for ionospheric diffusion soundings, noting method to obtain high stability in output power 16 p2661 A66-30954

Geometrical characteristics of framework and reflecting surface of ionospheric diffusion probe antenna, noting specifications on design, manufacture, erection, alignment and adjustment 16 p2662 A66-30956

Receiver of ionospheric diffusion probe noting radio telescope, low noise parametric amplifier, filters, signal detection, etc 16 p2662 A66-30957

Drift rate and precipitation of lithium ion in germanium as affected by resistivity, acceptors, carrier lifetime and copper diffusion 19 p3442 A66-35914

Separation centers and dislocations during diffusion of Zn into GaAs at high temperatures, analyzing photographs of p-n junctions 19 p3445 A66-36339

Antimony ionization in p-germanium single crystals, based on diffusion of Sb into Ge 20 p3620 A66-37692

Elementary gas phase reactions involving atoms and radicals by mass spectroscopic and diffusion cloud methods 21 p3702 A66-38472

Thermionic energy converter energy loss through resonance emission and excited atom diffusion, accounting for de-excitation at electrodes 22 p3957 A66-40583

Nonstationary convective diffusion flow toward moving droplet at small Reynolds number 22 p3902 A66-40816

**DIFFUSION ELECTRODE**

Palladium-hydrogen diffusion electrode noting current densities 04 p0460 A66-14034

Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 06 p0860 A66-17197

Apparatus for measurement of flow resistance of gas diffusion electrodes 07 p0990 A66-17233

Diffusion controlled mechanism for operation of nickel hydroxide electrode, analyzing corresponding boundary value problem and predicting electrochemical behavior 08 p1171 A66-19647

Hydrogen feeding through single-layer metallic porous electrode of fuel cell on open circuit 08 p1171 A66-19649

Hydrogen and oxygen ionization at three-phase boundary in alkaline solutions on smooth metals 08 p1171 A66-19650

Microporous metallic gas-diffusion electrodes in low temperature acid-

electrolyte fuel cells 08 p1172 A66-19651

Thermodynamic and kinetic effects of gas pressure on performance of fuel cell using one or two gas electrodes 08 p1172 A66-19654

Current voltage characteristics of four-layer structures with common diffusion p-n junction and two emitters 19 p3315 A66-35555

Photoresponse measurements of depletion capacitance and diffusion potential of GaP Schottky-Barrier diodes 20 p3534 A66-38390

**DIFFUSION FLAME**

Laminar diffusion flame occurring in mixing zone between undiluted fuel and undiluted oxidizer by process of molecular diffusion 03 p0443 A66-12489

Laminar flame speeds predicted by Spalding formulation in stoichiometric mixtures with nonnormal diffusion 03 p0443 A66-12490

Ammonium perchlorate spheres combustion in flowing gaseous fuel similar to conditions in solid rocket combustion, noting diffusion flame significance 03 p0414 A66-13225

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3] 05 p0789 A66-15628

Aerodynamic calculations for diffusion combustion in laminar boundary layer between two plane parallel conducting gas flows in transverse magnetic field 06 p0918 A66-16844

Axial temperature variation in turbulent buoyancy-controlled diffusion flame 08 p1319 A66-19202

Flame properties as function of flame gases 14 p2414 A66-28142

Diffusion combustion in laminar boundary layer between two plane-parallel co-current streams 14 p2416 A66-28485

Laminar and turbulent diffusion flame combustion mechanisms, stabilization, flame ionization, Bunsen burner, fuel gas jet eddy diffusion, etc 15 p2616 A66-29068

Stabilization of lifted diffusion flame in turbulent methane jet flow field and measurements of gas flow velocity, turbulence and gas composition 15 p2479 A66-29608

Opposed jet diffusion flames subjected to electrostatic fields, estimating volumetric heat release rate and mass flow behavior [ASME PAPER 65-WA/ENER-3] 16 p2825 A66-30341

Diffusion flame for stagnation mixing layer created by jet fuel injected into oxidant stream at stagnation region of blunt body 17 p3033 A66-32447

LF self-vibrations of laminar diffusion flames in axial mode at frequencies corresponding to fuel system natural frequencies [WSCI 66-30] 18 p3263 A66-34414

Kinetic factors in diffusion flames, noting fuel/oxidizer ratios, equilibrium in terms of flame geometry, burning of metallic elements, etc [WSCI 66-10] 18 p3263 A66-34419

Initial broadening of diffusion flame sheet caused by nonvanishing equilibrium constant determined, using method of inner and outer expansions 23 p4148 A66-41500

Initial air-side boundary layer effect on ignition of slot injected gaseous hydrogen by hot supersonic air stream [AIAA PAPER 66-644] 23 p4149 A66-41513

Counterflow diffusion flame in forward stagnation region of porous cylinder with uniformly ejecting fuel gas in analysis by flame sheet model and boundary layer approximation 24 p4294 A66-42542

**DIFFUSION THEORY**

Error in finite difference solution of diffusion equation with impulsive end condition 01 p0093 A66-10383

Diffusion process of plasticity in metals, noting Frenkel vacancy mechanism 01 p0158 A66-11018

Physical and mathematical models in combustion theory of Zeldovich, Franck and Kamenetski 03 p0444 A66-12702

Tracer diffusion measurements in beta titanium covering Arrhenius plots, monovacancy and divacancy diffusions and new data for Sc-46, Sn-113 and P-32 03 p0382 A66-12939

Temperature distribution in flow past sphere, discussing time dependent form of Boussinesq transformation 05 p0784 A66-14752

[ASME PAPER 65-HT-38]

Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 05 p0704 A66-15817

Ion composition model representing conditions at low temperatures, assuming that solar cycle variation ions are distributed according to diffusive equilibrium theory 06 p0876 A66-16611

Anomalous diffusion of some group III and group V impurities in silicon 08 p1268 A66-18657

Crystal-Diffusion Spectra-International Colloquium, Paris, July 1965 08 p1233 A66-19231

Transverse diffusion theory and static and HF conductivity of plasma in strong magnetic field 09 p1406 A66-19962

Pseudoshocks in pipe flow in supersonic compressors represented as diffusion process, noting application in cascade and rotor configuration 10 p1479 A66-21363

Anomalous diffusion and instabilities of argon plasma in strong magnetic field 10 p1564 A66-21568

Sufficient conditions for optimal stochastic control of diffusion processes governed by vector equations satisfying local Lipschitz conditions 11 p1682 A66-23459

Stochastic processes in microscale relativistic fluid mechanics, discussing Dirac fluid, Klein-Gordon equation, diffusion, quantum potential, spin fluids, etc 12 p1914 A66-24093

Effective diffusion cross section of ultrasonic and laser beam while acting on turbulent flow 13 p2062 A66-25404

Relativistic hydrothermodynamics in covariant form for simple viscous fluid, omitting infinite heat conduction velocity and instantaneous diffusion flux theory from treatment of Eckart 13 p2210 A66-26333

Oscillatory phenomenon in gaseous multicomponent diffusion, noting convection caused by density inversion 15 p2481 A66-29745

Electrostatic field gradient effect in semiconductors with diffused impurities investigated, using basic diffusion theory 17 p2980 A66-32645

Drift effect on diffusion spreading of plasma inhomogeneities in magnetic field, deriving expression for Fourier component potential and magnetic field perturbations 19 p3344 A66-35265

Hydrogen combustion in air above solid noncatalytic wall heated to 800 degrees C, examining diffusion equation for slow combustion and laminar boundary layer flow over noncatalytic wall 19 p3479 A66-36249

Schottky diffusion theory applied to calculation of coefficients of homogeneous positive column in neon, using Druyvesteyn electron-energy distribution 20 p3608 A66-37462

Liquid junction cell design, noting equation integration for ideal diffusion potential and salt effects potential for heteroionic junctions of uniform ionic strength and cation concentration 20 p3502 A66-38188

Diffuse boundary scattering as possible explanation for enhanced field effect in thin metallic films through polarization reversal of ferroelectric substrates 21 p3800 A66-38990

Local structure of continuous and diffusion Markov processes compared with aid of M functionals for stochastic integrals 21 p3757 A66-39246

Random acceleration theory using diffusion transformation of matrix equation into differential equation 22 p3947 A66-39664

Thermal transient characteristics of prolate spheroidal solid, using diffusion equation for heat conduction 22 p3998 A66-40034

Carbon diffusion into titanium and zirconium nitrides, noting carbide layer parabolic growth rate and experimental techniques 23 p4083 A66-41383

Trajectory stability of diffusion-type random Markov process described by Itô stochastic differential vector equations 23 p4085 A66-41554

Diffusion current in MOS transistors

- analyzed, using three-dimensional energy band diagrams 24 p4253 A66-42383
- DIFFUSION WAVE**
- Time dependent ambipolar diffusion waves, solving electron density equation 07 p1088 A66-17951
- Shock wave structure in ionized hydrogen, using Eddington approximation to solve Rankine-Hugoniot jump 08 p1204 A66-18522
- Diffusion spectrum modifications due to positive ions collision with neutral particles observed through ionospheric probe in E layer 19 p3346 A66-35590
- Backstreamed fluid analysis via gas chromatography, using polyphenyl ether as diffusion pump fluid 24 p4239 A66-43164
- DIFFUSION WELDING**
- Brazing and diffusion bonding of titanium alloys to similar and dissimilar materials in high vacuum or inert gas [SAE PAPER 650752] 05 p0687 A66-15001
- Vacuum diffusion welding of zirconium, niobium and tantalum carbides to high-melting niobium, tantalum, molybdenum and tungsten 06 p0887 A66-16696
- High remelt temperature brazing of Ta-10W honeycomb structures by brazing with pure titanium, using diffusion sink concept 13 p2109 A66-25774
- Argon arc and resistance diffusion /vacuum/ welding of Ti and Ti alloys and protective metallic coating deposition on welded parts 13 p2110 A66-26027
- Solid state welding and brazing for surface layer bonding 22 p3925 A66-40269
- DIFLUOROAMINE**
- High temperature kinetics of difluoroamino radical decomposition in excess argon studied behind incident shock waves 03 p0413 A66-12337
- Preparation of aluminum difluoramide from trimethylamine alane and difluoroamine 13 p2018 A66-26501
- Isotopic exchange reactions of difluoroamine with deuterium oxide and trifluoroacetic acid at low temperatures studied by NMR techniques 23 p4118 A66-41231
- Difluoroamine reactions with Lewis acids studied to establish existence of difluoroammonium compounds and to obtain new oxidizers containing difluoroamino groups 23 p4031 A66-41232
- Difluoroamine chemistry for understanding nature of N-F and N-X bonds, electron distributions and existence and stabilities of N-F radicals and ions 23 p4031 A66-41233
- Thermally initiated reaction between tert-butyl iodide and tetrafluorohydrazine provides synthetic route to tert-butyl difluoroamine 23 p4118 A66-41234
- DIGESTIVE SYSTEM**
- SA GASTROINTESTINAL SYSTEM**
- SA INTESTINE**
- Physiological reactions to long periods of weightlessness beyond operational possibilities 11 p1642 A66-22484
- Nitrogen, phosphorus and calcium determination from perchloric acid digestion, process includes sample collection, preparation, digestion and determination 17 p2870 A66-32143
- DIGITAL COMMAND SYSTEM**
- Practical component packaging system for compatible use of integrated and thin film circuits in spaceborne digital command and data handling equipment 04 p0492 A66-13465
- Ground system design, data processing, digital command and digital-human interface in flight operations problems for unmanned spacecraft on planetary exploration mission 13 p2190 A66-25257
- Triple modular redundancy /TMR/ computer organization used in digital computer design for Apollo Command Module 13 p2027 A66-25258
- High reliability digital test command system for use as part of prelaunch acceptance checkout equipment for Apollo program 15 p2460 A66-28989
- High speed microwave frequency synthesizer with digital control 17 p2897 A66-33438
- Space control system using digital SUBORDINATE OR logic blocks to add optimum response capability to maneuver commands 20 p3662 A66-37229
- Acceptance checkout system for checkout assistance to Apollo CSM and LEM facilities during countdown, discussing system configuration variability, composition and operation 20 p3543 A66-37579
- DIGITAL COMMUNICATIONS SYSTEM**
- Digitally coded frequency and pulse modulation with square wave, performing spectral analysis and measuring spectral response 01 p0030 A66-10875
- Error control systems in digital communications accomplished by adding constraints to digital alphabet through coding 04 p0481 A66-13766
- Computer determination of signaling alphabet required to ensure reliable digital communication in presence of additive Gaussian noise and interchannel interference 05 p0630 A66-14588
- Principles of data communication reviewing digital systems, modulation methods and spectral shaping of data signals to achieve maximum noise tolerance 05 p0633 A66-14991
- Logical design for phase-coherent and comma-free biorthogonal telemetry system less RF carrier 06 p0823 A66-15965
- Error control over wide frequency range through adaptive dynamic channel equalization system 06 p0825 A66-15987
- Signal optimization for digital communication system over channel characterized by rational transfer function and Gaussian noise having memory 06 p0829 A66-16192
- Learning-type signal processing receivers for binary communication channels with intersymbol interference 06 p0830 A66-16196
- Simultaneous measurement of multipath and Doppler spread in real time involving fading transmission media such as HF and troposcatter [IEEE PAPER CP 65-524] 06 p0830 A66-16336
- Error probability limitations caused by multipath and Doppler smear in Kathryn modem 06 p0831 A66-16339
- Digital range measurement used in design of instantaneous communications handover system for medium altitude multisatellite system 06 p0831 A66-16340
- Optimum threshold and associated error probability for detecting binary optical signals 06 p0833 A66-16663
- Multilevel narrow-band FM digital communication system using conventional modulators and demodulators 06 p0834 A66-16856
- Component characteristic determining conversion probability of input signal to output signal allowing for random dispersion of transmission characteristics of individual components 07 p1013 A66-17385
- Noise rejection properties of nonmemory discrete-data transmission systems employing information feedback, decision feedback or combined feedback 08 p1183 A66-19096
- Optimum number of phase-quantization steps in phase-shift keying communications system for maximum data transmission rate, using binary integration method 08 p1183 A66-19097
- Digital detector for automatic radar target identification, noting design, construction and operation 11 p1654 A66-22655
- Buffer storage in digital radar smoothing irregular output data flow, noting decreasing bandwidth requirements 11 p1654 A66-22656
- Digitalization of moving target indicator signals for adaptation of digital detectors to air surveillance radars 11 p1655 A66-22657
- Algorithm for data transmission system automatic adaptive equalization, employing change of settings during transmission in response to variation in transmission channel characteristics 11 p1656 A66-23088
- Digital and RF/linear circuits compared noting monolithic, hybrid and thin film circuit limitations, phase locked loop design, etc 12 p1830 A66-23756
- Satellite ground terminal design considerations using adaptive digital communications techniques, noting analog to digital conversion [AIAA PAPER 66-290] 12 p1822 A66-24760
- Asynchronous delta-modulation system with coded pulse generation according to certain change in amplitude 13 p2030 A66-25208
- Power spectra formula of digital FM signals for phase continuous and discontinuous cases, noting results of Anderson and Saltz 13 p2020 A66-25213
- Temperature stable high power C band digital many-phased-array-radar phase shifter 13 p2035 A66-25502
- Low power long-range digital communications system based on narrow bandwidth portable transmitter and fixed station receiver 15 p2450 A66-28972
- Analog form data transmission via FM compared to digital form via phase shift keying, noting accuracy, power and bandwidth required, output signal to noise ratios, etc 18 p3067 A66-33902
- Capabilities of Lunar Television Image Converter system used for digital processing of Ranger and Mariner pictures 18 p3113 A66-34496
- Automation of air traffic control, discussing radar, data handling and data communication 20 p3595 A66-37003
- Low error probabilities in binary communication systems estimated by statistics of bivariate extreme-value theory 20 p3514 A66-37211
- Space telecommunications techniques, examining reduction of all transmissions to digital type, using current theoretical coding methods and recurrent codes and block codes for error detection 20 p3516 A66-37432
- Aircraft and spacecraft digital systems including computers for production engineering, ground telemetry and communication with aerospace vehicle and onboard equipment for tracking, guidance and simulation of inflight conditions 21 p3709 A66-39629
- Digital filtering system comprising only few integrated circuits and using addressshift register combination, compared with analog devices 23 p4067 A66-41168
- DIGITAL COMPUTER**
- SA ANALOG COMPUTER**
- SA HYBRID COMPUTER**
- Spaceborne digital computers in reliability program, using failure data in design and evaluation 01 p0033 A66-10064
- Digital computer automated X-ray diffraction method to determine residual stress to improve processing reliability 01 p0033 A66-10102
- Digital computation desirability for flight control system 01 p0104 A66-10686
- System of data processing in real time applicable to digital computer Univac 418 02 p0193 A66-11600
- Computation of values for resistances shunting sections of tapped potentiometers from data using two alternative digital computer programs 02 p0200 A66-11884
- Analog, digital and hybrid computerized systems for investigating problems in aeronautics and astronautics 02 p0193 A66-11894
- Navigation system for supersonic transport considering central digital computer with data processing systems with feedback 02 p0256 A66-11898
- MCS 920M airborne digital computer design, production processes and microelectronic techniques 02 p0193 A66-11931
- Verdan digital computer operation in aircraft noting problems of reliability 02 p0194 A66-11965
- Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 02 p0224 A66-12124
- Two-stage tuned amplifier design with digital computer 03 p0337 A66-12495
- Mechanization of synchronous sequential machines with minimal shift registers, using algorithm 03 p0337 A66-12572
- Automatic evaluation of echo signals from circular-scan radar using learning system 04 p0543 A66-13497
- FM telemetry digitizing system operating on-line in real time environment results in automatic data processing 04 p0489 A66-13600
- Subsystem checkout in operation termed on-line checkout, noting use of digital computer with random noise signals and role of correlation and transfer functions 04 p0493 A66-13608
- Self-repairing digital computer, discussing switching mechanism activated diagnostic procedure and failed circuitry replacement 05 p0637 A66-14930

Parallel decomposition of linear three-terminal RC network 05 p0658 A66-15124  
Deep space tracking stations, discussing digital computers for monitoring functions such as real time measure, station performance, failure detection, etc [ISA PREPRINT 1.11-1-65] 05 p0635 A66-15498

Capabilities and limitations of digital computer steady state and transient heat transfer programs [ASME PAPER 65-WA/HT-48] 05 p0638 A66-15661

Digital and numerical method solution of transient heat flow problems 07 p1150 A66-17577

Navigation equipment for civil use based on miniature inertial platform, analog and digital computers, automatic chart display, etc 07 p1067 A66-17689

Airborne computer design free of navigational functions performed by humans, using Doppler equipment 07 p1067 A66-17692

Mechanization of navigational functions for supersonic aircraft within central airborne digital computer, comparing military experience with commercial requirements 07 p1067 A66-17693

Automatic realization of reactive ladder filters by digital computer, discussing classification and removal techniques, fundamental power equation and network functions 07 p1008 A66-17752

Computational reduction of high speed memory requirements in solving optimization problems by dynamic programming and supersonic transport trajectory application 07 p1004 A66-17976

Dynamic properties of contact thermal receivers investigated with aid of digital computer 07 p1035 A66-18092

Digital computer programming for design of cylindrical vessels 08 p1306 A66-18604

Digital computers to control automatic test equipment 08 p1187 A66-18741

Power supply system of OAO consisting of solar cells, energy storage device, power controller, etc, and simulation program via digital computer 08 p1168 A66-19493

Digital computers for aerospace guidance and control, including Gemini inertial guidance and B-70 aircraft navigation systems 08 p1187 A66-19597

Digital application of fluid amplifiers, examining greater precision, accuracy and reliability of digital systems compared to speed of digital systems 09 p1349 A66-20324

Digital counter synthesis for fixed base and periodic sequence-variable base counters with various feedback loops 09 p1361 A66-20606

Matrix inversion by rank annihilation, discussing memory storage requirements, overlapping input time with computing time, number of computations, etc 09 p1395 A66-20625

Digital systems research model design containing logic gates in integrated circuit packages 09 p1356 A66-20676

Flight management by digital computers, discussing central computer, system configurations, reliability, memory, input/output, computation rates 09 p1349 A66-20683

Concorde navigation system noting inertial platform, digital computer using integrated circuits and microminiaturization 09 p1401 A66-20685

Digital computer solutions to rigorous linear equations system for current density by enforcing boundary conditions at discrete points in scattering body 10 p1497 A66-21589

Mutual dependence of interconnection and noise immunity in transistORIZED digital computer circuitry 10 p1517 A66-21692

Device for automatically feeding experimental curve coordinates in large quantities into digital computer for high noise level photographic image 11 p1659 A66-22432

Variable threshold logic, integrated logic circuits which eliminate noise effects in digital equipment 11 p1676 A66-22685

Infinite automata theory and structural logical design of digital machines 11 p1659 A66-22707

Limit behavior of closed system of automata with random input 11 p1676 A66-22710

Book on analog, digital and hybrid analog-digital computers for random process studies 11 p1659 A66-22864

SCADS, programming system for simulation of combined analog-digital systems 11 p1659 A66-23109

Automatic control systems, discussing optimal and on-line adaptive control in electricity, nuclear research, steel industry, numerical problems, etc 11 p1679 A66-23272

Digital computer determination of equilibrium conductivity effect on MHD plasma engine performance 12 p1935 A66-23604

Universal programming languages and processors, survey and new concepts 12 p1826 A66-23825

Management problems of large aerospace computer installation, considering actual costs of change and aspects of turn-around problem 12 p1827 A66-23831

Integrated modular digital computer system for ICETRAN/ICES-FORTRAN/programming of engineering problems 12 p1827 A66-23833

Real time ground computer for Athena system and input/output data requirements in multiprocessing jobs 12 p1827 A66-23836

Digital differential analyzer/DDA/ design for high speed solution of differential equations common in aerospace problems 12 p1828 A66-23841

Self-diagnosable DX-1 computer design to achieve maximum operational availability 12 p1828 A66-23843

Matrix method for partial analysis of circuits, yielding algorithm for program for automatic digital computer 12 p1828 A66-24299

Comparison of frequency shift keyed and phase shift keyed pulse compression systems via digital computer simulation 12 p1819 A66-24602

Vibrational analysis, discussing spectrum analyzers, correlation and autocorrelation analysis and hybrid and digital computer applications 12 p1970 A66-24722

Parametric analysis, penalty-effectiveness tradeoff and system selection for communications satellites, using block digital computer synthesis with subroutines for operational requirements [AIAA PAPER 66-330] 12 p1824 A66-24797

Double stream instability in finite diameter beams analyzed by numerical experiments on digital computer, showing electron trapping as cause of RF current saturation 13 p2137 A66-25044

Digital computer automatic checkout equipment for Saturn spacecraft 13 p2057 A66-25260

Space digital computer reliability laboratory testing by failure data collection from prototype equipment 13 p2027 A66-25507

Test instrumentation for threshold sensitivity and noise bandwidth measurement of narrow band phase-locked receivers, employing statistical techniques 13 p2079 A66-25659

Design and fabrication of computer subsystems for Apollo guidance and navigation systems 13 p2027 A66-25781

Digital airborne computer for navigation problem solutions including inertial navigation, flight path, time-to-go and arrival time, etc 13 p2124 A66-25839

Numerical integration method for digital computer analysis of structural frameworks 13 p2198 A66-26223

Circulation distribution over rectangular wings, based on Chushkin algorithm and lifting surface equation calculated by digital computer 13 p2068 A66-26540

Digital computer automatic checkout equipment for maintenance of avionic systems 14 p2269 A66-27157

Microvariations of Earth electromagnetic field with results recorded on tape in digital pulse code form 14 p2287 A66-28082

Digital computer application as real time telemetry processor 16 p2651 A66-30565

Iteration method of general linear programming on digital computer, using penalty functions, compared to equilibrium problem of mechanical system 16 p2669 A66-30759

Test system for n-digit combinative comparison unit realizing special, previously described algorithm 16 p2656 A66-30765

Construction method for rms-optimal digital smoothing devices, noting case of astatic systems 16 p2670 A66-30768

Time shared general-purpose digital computer with hybrid linkage to analog consoles used for determination of static and dynamic performance characteristics of rocket engines, jet engines, V/STOL aircraft, etc 16 p2658 A66-31249

Maximum increase in system error due to computer round-off errors for closed loop linear sampled data system 17 p2900 A66-32075

X-Y plotter for analog computers, analog to digital converters and digital computers 17 p2925 A66-32313

Digital computer to decode digitized or sampled PCM waveform 17 p2875 A66-32502

Feedback control system digital computer design and analysis, including frequency-domain analysis, time-domain analysis, state-space simulation program, etc 17 p2877 A66-32778

Computer controlled digital display techniques for direct editing of research data 17 p2877 A66-32943

Monograph on digital computer solution of matrix problems of elastic system vibrations 17 p2877 A66-32987

Digital computer utilization to estimate sonic boom characteristics of complex airplane configuration 17 p2847 A66-33022

Series power switch for orientation and position computer of small lunar-orbit spacecraft designed to reduce weight and cost 17 p2878 A66-33122

Manual methods of entering navigational data on cards for input into computer 17 p2956 A66-33447

Human factor aspects of digital computer programming for simulator control, discussing application and operation 17 p2869 A66-33449

Logic and operation principle of model of recording device for high speed readout of digital and alphabetic information from digital computer 17 p2928 A66-33494

Transfluxor program store for airborne digital computer, noting wiring pattern, economics, read amplifier, etc 18 p3072 A66-33562

Antenna steering system using special digital computer and precision analog power servo drive 18 p3131 A66-33867

Digital guidance and control computer used in Apollo Guidance and Navigation System 18 p3073 A66-33874

Complex component design using man-computer system with graphic input/output devices, discussing application for digital computer circuit card design [SAE PAPER 660459] 18 p3116 A66-33897

Digitally computed tables of Chebyshev approximations of Laplace shift operator transfer function enabling analog simulation of time delay systems 18 p3090 A66-34069

Time domain method of relating cross coupling between transmission lines of multilayer structure to geometry in design of high speed digital systems 18 p3090 A66-34071

Stress and deflection determination in trusses with pin or rigid joints, using digital computer 18 p3255 A66-34275

Space-frame radome design and buckling analysis for wind and deadweight static load using digital computers 18 p3095 A66-34299

Digital multiplier with incremental computing system, noting series and parallel addition system and sequential multiplication with incremental values 18 p3073 A66-34495

Flight data recording and processing system using magnetic tape for digitally computing airborne data on flight testing of VTOL aircraft 18 p3073 A66-34679

TRW Systems MARCO 4418, small high-speed lightweight reliable digital computer, for use in manned space missions 19 p3306 A66-35503

Digital simulator program /MIMIC/, discussing operation, application to parallel systems and advantages over MIDAS system 19 p3306 A66-35535

Automated improvement of design /AID/

computer using nonlinear programming techniques to solve optimization problems 19 p3308 A66-35872

Extrapolation methods for numerical integration using digital computers, comparing convergence with conventional methods 19 p3310 A66-36650

Microminiaturization in automatic control equipment and digital computers Symposium, International Federation of Automatic Control and International Federation for Information Processing, Munich, October 1965 19 p3322 A66-36806

High-speed memory units for digital computer, discussing ferrite, semiconductor and thin magnetic or ducting film memories 19 p3322 A66-36814

Design of digital computer program of Monte Carlo variety for analyses of self-contained orbital navigation systems for satellites, including error source categories 20 p3595 A66-36871

Digital computers used in error calculation in calibration curves of turboengines and other pneumatic devices 20 p3555 A66-36923

Digital computer optimization program, determining minimum weight fuel cell primary power system for MOLAB 20 p3496 A66-37156

Instrumentation simulation, discussing data system simulator facility, noting application for telemetry and instrumentation design 20 p3542 A66-37248

Digital computer analysis of kinetic equations for CO burning in presence of hydrogen 20 p3679 A66-37702

Digital computer programmed optimization model of Earth-orbiting space station missions including reliability, maintainability and cost considerations 20 p3663 A66-37902

Digital computer program for solution of space-charge-flow problem applied to design of thrusters with variable thrust vector, analyzing two ion-thruster configurations with aid of computer 20 p3629 A66-38179

Design considerations for advanced digital beam steering computer through use of geometric optics 21 p3707 A66-38674

Microminiaturized R-11 digital computer for real time computational requirements in radar data processing, fire and command control, automatic navigation, checkout, etc 21 p3707 A66-38675

High-speed multiplication for R-11 microminiaturized digital computer, using modified form of Booth Algorithm 21 p3707 A66-38676

Second-order solution for strapped-down attitude computation compared with first-order solution 21 p3763 A66-38842

Integrated navigation system /INS/ using stellar inertial subsystem with optimum data processing 21 p3767 A66-38891

Optimization of two-way space frame with single column supports for minimum weight of steel by digital language programming techniques 21 p3833 A66-39539

Magnetic memory units and memory storage unit component design for digital computer 21 p3708 A66-39626

Aircraft and spacecraft digital systems including computers for production engineering, ground telemetry and communication with aerospace vehicle and onboard equipment for tracking, guidance and simulation of inflight conditions 21 p3709 A66-39629

Digital computer programming to evaluate designs until optimality is found in aerospace structures 22 p3922 A66-40023

Heat transfer equation solution for ablating solid, assuming exponential temperature profile with numerical solution on digital computer by Runge-Kutta method 22 p3998 A66-40035

Digital computer processing of Tiros, Nimbus and Essa vidicon cloud pictures for machine nephanalyses, discussing rectification orbital mosaics and calibration effects for future Essa flights 22 p3943 A66-40055

Alphanumeric generator for display of digital computer data on TV raster and storage in memory 22 p3927 A66-40290

Digital computer program for V/STOL aircraft static propeller characteristics and optimization, based on initial wake hypothesis and trailing vortex sheet

properties 22 p3843 A66-40294

DIVIC /digital variable increment computer/ for solving hyperbolic-navigation problems, examining computational algorithms 22 p3945 A66-40335

Digital computer program for static worst case design of diode transistor logic 22 p3870 A66-40396

Automatic, multichannel system for data recording and processing obtained in studies of ionospheric structural inhomogeneities, containing magnetic-tape memory and device for digital tape memory and device for digital computer input 22 p3920 A66-40772

Digital-computer controlled receiver functions and application 23 p4044 A66-41313

Automatic detection and correction of errors in digital computers by using residue arithmetic, whether caused by arithmetic operations or data transmission 23 p4042 A66-41602

Approximate solution to digital sequential least squares estimation of eigenstates of nonlinear processes 23 p4050 A66-41614

Numerical solution via digital computer of nonlinear transient heat conduction with phase changes 23 p4149 A66-41697

Digital computer program for handling algebraic expressions in complex numbers 23 p4042 A66-41739

Digital computer program for analysis and weight optimization of thermoelectric generators for space applications 24 p4161 A66-42119

Digital computer techniques for computation of lunar disturbing function 24 p4273 A66-42204

Airborne digital computers role in electronic warfare, navigation and guidance, considering weight, power supply, costs, etc 24 p4177 A66-42245

Functional analysis applied to optimum control by reduction of variational problem to finite dimensional analysis and calculation of algorithms for use with digital computer 24 p4231 A66-42470

Maximum probability criterion on output coordinates of system for selection of parameters of optimal nonlinear control system 24 p4188 A66-42477

# DIGITAL DATA

Dynamic data /waveforms/ analysis comparing analog with digital methods for speed, costs, flexibility, reliability, etc [SAE PAPER 650818] 01 p0033 A66-10480

Insertion of 2 bits of specific code into frame of digital data of burst-error-correcting code for synchronism recovery 02 p0190 A66-11524

Digital synchronization at information levels of words, cycles and subcycles 06 p0836 A66-17027

High data rate radar cross section measurement system for high angular precision and direct digital recording on magnetic tape 10 p1501 A66-21621

Properties of metallic recording media in terms of physical properties of medium and geometrical dimensions of recording system 13 p2082 A66-26295

Optimal scientific satellite PFM encoding system circuit design and digital data processing 14 p2244 A66-28429

Digital data compression techniques applicable in spacecraft television systems, emphasizing bandwidth reduction techniques 16 p2653 A66-30891

Binary synchronous communication in additive non-Gaussian noise, discussing optimal nonlinear detector for digital data transmission through non-Gaussian channels 18 p3067 A66-33901

Upper and lower bounds on binary error probability as function of signal to noise ratio for digital data systems operating over complex Gaussian fading channel 21 p3720 A66-39638

Optimum pulse transfer functions for multivariable digital ergodic stochastic processes 23 p4051 A66-41853

# DIGITAL INTEGRATOR

Optimum design and error analysis of digital integrators for discrete system simulation via quasi-linearization 12 p1828 A66-23840

Control algorithms for microminiaturized sampled data digital control 19 p3311 A66-36822

# DIGITAL NAVIGATION SYSTEM

A-NEW MOD 1 digitally controlled navigation system for antisubmarine warfare aircraft employing Univac CP-754-8 thin film computer 01 p0098 A66-10002

Microelectronic digital system for spacecraft stabilization and control 01 p0105 A66-10689

Digital IF amplifier for thin film radar receiver 02 p0202 A66-11917

Functional requirements for computer navigational system for Concorde aircraft 07 p1065 A66-17672

DECTRA long range navigational aid, DECTRA airborne receiver and Omnitrac computer 07 p1068 A66-17702

Flight testing of FAA-Lear Siegler receiver/converter airborne system with Loran-C hyperbolic navigation system 07 p1069 A66-17706

Two automatic astronomical navigation and tracking systems compared for accuracy and performance in civil aircraft 07 p1070 A66-17722

Accurate light-weight self-contained low-cost inertial autonavigational system including gyroscopes, accelerometer and DYDAN computer 07 p1076 A66-17793

AD560 Doppler Radar sensor and computer in Boeing 707-138 aircraft 07 p1076 A66-17794

Moving map displays for navigation information portrayal, advantages and requirements for subsonic and SST airliners 07 p1076 A66-17796

A-NEW MOD 1 digitally controlled navigation system for antisubmarine warfare aircraft employing Univac CP-754-8 thin film computer 13 p2124 A66-25596

ESG strapdown inertial navigation system based on double integration of acceleration and analysis of electronic gimballing-induced errors 13 p2124 A66-25653

Digital-mode FM CW laser ranging and tracking system using compound axis servomechanism 13 p2024 A66-25982

Digital guidance and control computer used in Apollo Guidance and Navigation System 18 p3073 A66-33874

# DIGITAL SIMULATION

Two analysis methods for sequential digital servomechanism 02 p0180 A66-11683

Digital computer simulation for control system design including electrical circuits, mechanical systems and chemical processes 03 p0337 A66-12375

Magnetically oriented satellite and angular motion damping by shorted-coil and hysteresis in digital computer simulation 03 p0430 A66-12666

Digital computer simulation for phase-locked loops used as narrow-band tracking filters in space communications and radar systems 05 p0652 A66-14590

Digital computer research program for reducing bandwidth schemes and quality for picture transmission 05 p0676 A66-14820

Air traffic control simulation system based on digital computer for Eurocontrol 06 p0870 A66-16953

Discrete simulation technique using electrical circuit for finite-difference approximation of initial differential equations, noting functional potentiometers 07 p1055 A66-17201

Power supply system of OAO consisting of solar cells, energy storage device, power controller, etc, and simulation program via digital computer 08 p1168 A66-19493

Digital simulation of magnetic hysteresis, using analytic approximation of magnetic curves by seventh degree polynomials 08 p1187 A66-19513

Algorithm to automatically ascertain admissible processing sequence for all-digital simulation of analog or analog-hybrid system 10 p1507 A66-21699

American Federation of Information Processing Societies, Joint Computer Conference, Las Vegas, November 1965 12 p1825 A66-23824

Digital simulation languages, discussing history, input format, effectiveness, programming error diagnostics, etc 12 p1826 A66-23826

New block diagram compiler for sampled data system simulation 12 p1826 A66-23827

Lockheed multiprocessor simulation system /LOMUSS I/, data processing system for

- computer design and analysis 12 p1827 A66-23832
- Optimum design and error analysis of digital integrators for discrete system simulation via quasi-linearization 12 p1828 A66-23840
- Queueing model digital simulation techniques used to determine reliability of stand-by system with maintenance station 12 p1834 A66-24085
- Discrete white noise used to generate discrete colored noise by means of difference equation 12 p1850 A66-24266
- Computer program for predicting satellite long-term orbit decay and digital simulation of atmosphere and reentry conditions [ATIA PAPER 66-357] 12 p1951 A66-24491
- Digital simulation of scheduling logistic support by helicopter, using Backtrack techniques 12 p1858 A66-24683
- Digital computer analytical method for simulation of worst shock conditions for subassembly shock testing 12 p1829 A66-24726
- Pseudorandom binary sequential digital simulation of feedback control systems subjected to random input signals 13 p2030 A66-25211
- COBLOC programming system for all-digital simulation of operation of large mode-controlled hybrid computers, noting inclusion of patchable logic simulation 13 p2028 A66-25805
- Digital computer simulation of sampled data communication system using Block Diagram Compiler, B /BLODIB/ 13 p2028 A66-25937
- PCM picture transmission, pseudorandom scanning, noise, bandwidth compression and digital simulation 15 p2450 A66-28785
- High precision attitude control system using pulse width modulation evaluated by hardware fabrication and digital computer simulation 15 p2606 A66-29651
- System analyst/model designer problems in digital simulation of large-scale system 16 p2657 A66-31246
- DSL/90 digital simulation program for IBM 7090 family of computers 16 p2658 A66-31247
- Two analysis methods for sequential digital servomechanism 18 p3053 A66-34009
- Digital simulator program /MIMIC/, discussing operation, application to parallel systems and advantages over MIDAS system 19 p3306 A66-35535
- Digital simulation of guidance and control of exoatmospheric interceptor missiles for study of parameter variations effect on overall mission effectiveness 20 p3596 A66-37230
- Instrumentation simulation, discussing data system simulator facility, noting application for telemetry and instrumentation design 20 p3542 A66-37248
- Symbolic programming digital computer techniques, hardware interfacing and system errors in simulation of lunar midcourse guidance and navigation systems 20 p3543 A66-37250
- Signal simulator for testing Loran A and Loran C airborne receivers in laboratory, using digital simulator circuits to test dynamic response of tracking circuits 23 p4088 A66-41253
- SESIAC, electronic machine for statistical simulation consisting of stochastic generator, containing no equations or tabulated functions, only random pulse sources and logic networks 23 p4053 A66-41604
- Digital simulation study of acquisition capabilities of phase-locked loop in presence of noise 23 p4050 A66-41616
- DIGITAL SPACECRAFT TELEVISION**
- Improved gray scale and coarse-fine PCM systems for digital television bandwidth reduction, considering spacecraft application 14 p2235 A66-27036
- Delta modulation pictorial encoding systems analyzed to determine parameters for image communication application 19 p3299 A66-35665
- Parameter evaluation of delta modulation encoding techniques for image communication applications by computer simulation 20 p3513 A66-37201
- Digital video system for measuring broadband spectral intensity of stars and coordinates onboard OAO 20 p3557 A66-37202
- Digital TV spectrometer for measuring optical radiation from reentry vehicles, using IR vidicon and magnetic recording for data processing 23 p4069 A66-41665
- Calibration problem of using vidicon for making radiometric and spectrometric measurements, examining application to digital TV spectrometer system 23 p4069 A66-41666
- Magnetic tape and photographic film recording from video output of digital TV spectrometer system 23 p4069 A66-41667
- DIGITAL TECHNIQUE**
- Digital computer calculation of characteristics of Earth gravitational field 01 p0062 A66-10693
- Transient process of nonlinear automatic system calculated by numerical digital computer method based on convolution integral 01 p0045 A66-11021
- Solid state camera system for aerospace application incorporating monolithic phototransistor mosaic sensor, molecular digital readout system, etc 04 p0519 A66-13631
- Digital electrometric device with automatic discrete compensation 05 p0680 A66-15211
- Rapid acquisition by sequential estimation /RASE/ technique for acquisition of pseudonoise 06 p0834 A66-16859
- Thin film microcircuit for digital systems 06 p0856 A66-16927
- Fluidic closed-loop digital position-speed servocontrol system without moving parts, using pulsed air 07 p0991 A66-17878
- Channel sample-and-hold PCM telemeter, system modules, multiplexer gate groups, analog-to-digital converter, etc 08 p1184 A66-19518
- Papers on fluidics, analyzing digital and fluid amplifier design 09 p1331 A66-20316
- Fluid mechanics, fluidic devices and systems, noting design, manufacturing techniques and application 09 p1332 A66-20317
- Digital computer recomputation of stability transition curves in Hill-Meissner equation 09 p1395 A66-20623
- Digital data handling method for air traffic control system employing plan position indicators and video correlator for radar video signal analysis 11 p1732 A66-22899
- Field effect transistors in digital circuits, FET transient behavior, transistor logic and switching circuitry 11 p1673 A66-23472
- Digital techniques for identification of discrete-time and continuous-time systems from noisy input and output sample sequences via determination of transfer function model parameters 12 p1854 A66-24638
- Yield and reliability of integrated electronic devices and electronic digital systems, using redundant components by triplicating voting circuits 12 p1846 A66-24914
- Phase coherent digital M-ary transmission with binary waves through Gaussian channel 13 p2022 A66-25554
- Smith subprotonospheric whistlers and digital computation of ion effects on whistler-mode ray tracing 14 p2282 A66-26858
- Electrohydraulic digital actuator design and conversion of discrete electric input signal in binary code to linear motion 14 p2227 A66-28366
- Digital computer calculation of characteristics of Earth gravitational field 15 p2483 A66-28554
- Digital approach to gas turbine engine control based on use of pulsewidth modulated information obtained with aid of simple circuits 15 p2571 A66-28858
- Digital measurement of differential Doppler effect using transposition of phase relation of two HF signals into audiofrequency band 15 p2453 A66-30070
- Pulse rebalancing of pendulum accelerometers for digital output requirements 16 p2706 A66-30882
- Digital differential analyzer for on-line studies of dynamic systems 16 p2657 A66-31245
- Psychophysiological study of compensatory tracking on digital altimeter display and on combined digital and scale-and-pointer display 17 p2869 A66-33448
- Level quantization effect in statistical analysis of closed-loop digital automation systems 18 p3089 A66-33736
- Digital optimal control of steerable antennas using radiation lobe geometry, dynamic programming and control strategy principles 18 p3081 A66-34269
- Optimizing procedures using Fortran II FAP programming on IBM 709/7090 computers, comparing eight known techniques 19 p3308 A66-35868
- State vector determination for digital optimal control of system characterized by matrix equation 19 p3339 A66-36746
- Digital testing techniques for analog systems, describing bomb computer set for Phantom F-4D aircraft 20 p3522 A66-37246
- Transient radiation response and permanent radiation damage in monolithic silicon-junction-transistorized integrated circuit 20 p3526 A66-37318
- General maintenance techniques for large digital controllers to achieve high order of system dependability 20 p3522 A66-37907
- Digital programming and topological optimal filter design incorporating nonideal lossy elements 20 p3533 A66-38281
- Photographic data recorder noting simultaneous event and data recording capability 22 p3917 A66-39994
- Complementary symmetry flip-flop and similar transistor micropower digital logic circuit design 23 p4048 A66-41144
- Cathode ray tube device for digital video processing of Ranger pictures 23 p4071 A66-41677
- DIGITAL-TO-ANALOG CONVERTER**
- High-accuracy digital circuits producing variable pulse delay measured by timing pulse 03 p0341 A66-12521
- Digital-to-analog differential conversion using differential pulse duration modulation 07 p1009 A66-17829
- DIGITAL TO VOICE TRANSLATOR /DIVOT/ S VOCODER**
- DIGITAL TRANSDUCER**
- Linear quartz crystal temperature sensing element for digital data presentation 02 p0228 A66-11516
- Microelectronic digital chronometer and frequency meter, noting design details and thin film circuits 02 p0231 A66-11916
- Design of nonreciprocal latching ferrite devices including single toroid digital waveguide phase shifter, cut-off switch, miniaturized slow wave phase shifter, etc 12 p1839 A66-24618
- Digitization system based on photoelectron counting for scanning spectrometer 13 p2084 A66-26750
- Digital transducers utilizing magnetic recording 16 p2704 A66-30539
- DIHEDRAL EFFECT**
- Stability of fast and slow attached shocks in stationary MHD flow around dihedral 07 p1089 A66-18105
- Problems of various subsonic gas jets of finite width around dihedral obstacle solved with Chaplygin hodographic method 16 p2627 A66-30207
- Spiral instability in STOL aircraft prevented by larger wing dihedral setting, noting permissible dihedral levels and tests 16 p2634 A66-31395
- DILATATIONAL WAVE**
- Unified approach to propagation of plane, cylindrical and spherical dilation waves in elastic media, using method of characteristics [ASME PAPER 65-WA/APM-21] 05 p0778 A66-15443
- Unified approach to propagation of plane, cylindrical and spherical dilation waves in elastic media, using method of characteristics [ASME PAPER 65-WA/APM-21] 12 p1961 A66-23987
- Dilatational wave resonance scattering of waterborne sound waves on hollow cylinder excited to oscillation by incident sound 14 p2401 A66-27863
- Reflection of time-harmonic plane dilatational or shear waves from rigid or stress-free boundary of arbitrary linearly viscoelastic half-space 18 p3136 A66-35025
- DILATOMETER**
- High temperature dilatometer for shrinkage measurements in sintering of powdered metal compacts 01 p0069 A66-10748

# DILUTION

Liquid nitrogen dilution effect on LOX impact sensitivity of selected materials 10 p1590 A66-21951

# DIMENSIONAL ANALYSIS

Optimization of nonlinear control system with random input using analog computer, automatic optimizer and dimensional analysis 02 p0207 A66-11791  
Generalized dimensional analysis applied to wind distribution in planetary boundary layer, using motion equations 02 p0223 A66-11981  
High energy nuclear interaction and particle structures covering meson, baryon, composition and dimensional analysis 05 p0749 A66-15351  
Matrix methods in dimensional analysis discussing algebraic, matrix and shortcut methods [ASME PAPER 65-WA/MD-20] 05 p0710 A66-15523  
Dimensioning and strength calculations - Conference, Budapest, October 1965 06 p0963 A66-16472  
Dimensionality theory for determining failure rate of aircraft components not in operation 11 p1637 A66-22862  
Current-voltage characteristics of electric arcs approximated by dimensionless criteria 11 p1747 A66-23312  
Dimensioning heat transfer in compact plate fin heat exchangers under nonuniform temperature variation and heat conductance 12 p1978 A66-24034  
Dimensioning varactor diode frequency multipliers used in HF transmitters 14 p2259 A66-28113  
Book on similarity theory and physical interpretation, examining boundary value problems, dimensional analysis, etc 16 p2739 A66-31751  
Dimensional analysis of temperature distribution within spherical particle during nonisothermal evaporation 17 p3033 A66-32449  
Self-similarity criteria in radiative flow for unsteady one-dimensional inviscid flow of perfect gas 17 p3034 A66-32471  
Dimensional and experimental analyses of helium bubble motion in liquid nitrogen 20 p3545 A66-37104  
Laminar forced convection heat transfer to gas from circular tube, achieving boundary condition of uniform heat flux 20 p3679 A66-37508  
MHD analysis of luminescence and widening of tail of Finsler 1937 V Comet passing through solar corpuscular stream containing frozen-in magnetic field 21 p3814 A66-39277  
Dimensional filtering in IR technology for background noise elimination, discussing Fourier analysis treatment of system 21 p3768 A66-39646  
Optimization of nonlinear control systems by means of Bellman equation and dimensional analysis minimizing integral square error 23 p4051 A66-41695

**DIMENSIONAL STABILITY**  
Probability theory to calculate technological deviations in dimensions effect on strength and rigidity of thin walled structures 11 p1782 A66-22858  
Static dimensional stability of nonlinear elastic continua reduced to linear shell theory 20 p3668 A66-37527

**DIMETHYL HYDRAZINE**  
Pathological and metabolic changes due to toxicity of unsymmetrical dimethyl hydrazine /UDMH/ 22 p3858 A66-40507

# DIODE

SA CESIUM DIODE  
SA JUNCTION DIODE  
SA P-I-N DIODE  
SA PARAMETRIC DIODE  
SA PHOTODIODE  
SA THERMIONIC DIODE  
SA TUNNEL DIODE  
SA VARACTOR DIODE  
SA ZENER DIODE  
Compensating temperature effects in systems using LDG type logarithmic germanium diode 01 p0035 A66-10205  
Microplasma and avalanche diode noise pulse rate determined by carrier generation within space charge layer of breakdown region 02 p0197 A66-11431

Silver bonded diode for parametric amplifiers improves performance when cooled at liquid nitrogen temperature 02 p0198 A66-11520  
Liquid element tantalum diode characteristics 03 p0345 A66-13103  
Circuitry of diode pump integrator used for generating mean voltage which is function of repetition rate of applied pulse train 03 p0345 A66-13241  
Properties of long forward-biased diodes operating in double-injection regime 03 p0346 A66-13318  
Current-voltage characteristics of gallium arsenide diode noting temperature effect on threshold voltage and breakdown current 03 p0346 A66-13323  
Current-voltage characteristics of long diodes calculated by dividing diode base into three regions 04 p0495 A66-13767  
Metal oxide semiconductor diodes as function of semiconductor parameters considering silicon, gallium arsenide, cadmium sulfide and indium arsenide 04 p0564 A66-14040  
Properties of silicon diodes with gold alloy bases, examining anomalies in V-I characteristics 04 p0499 A66-14055  
Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 04 p0499 A66-14060  
Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 04 p0499 A66-14061  
Q-factor of nonlinear capacitance microwave diodes determined from standing-wave ratio and phase difference for two bias voltages on diode, using passive linear quadrupole 04 p0499 A66-14062  
Methods for measuring and characterizing transistor and diode large signal parameters for use in automatic circuit analysis programs, noting radiation damage 05 p0648 A66-14848  
Correlating mean-to-surface flux ratio for highly enriched fuel rods of in-pile diodes of similar composition and geometry 05 p0620 A66-15567  
Active thin-film elements /diodes and transistors/, properties and deposition techniques 07 p1006 A66-17415  
Current-voltage characteristics of aluminum-aluminum oxide-gold diodes 08 p1188 A66-18641  
Electron transit time and impedance relation in rarefied plasma diode, considering electron and ion velocity straggling 08 p1193 A66-19193  
Piecewise linear circuit model for charge-storage or step recovery diode using conventional capacitance and resistance 09 p1350 A66-19920  
Frequency components of microwave-range oscillations from pulsed avalanche diodes of Read type driven to breakdown region 09 p1350 A66-19927  
Packageless diode fabricated by beam-lead process with no soldering or eutectic bonding 09 p1351 A66-20166  
Step-recovery diode multiplier circuit for high-order harmonic generation 09 p1359 A66-20919  
Noise suppression in solid state space charge limited diodes calculated, using open and short circuited output model 09 p1359 A66-20973  
Photovoltaic response of variously doped germanium-silicon diodes, confirming band diagram for germanium-silicon heterodiodes dominated by lattice mismatch interface states 09 p1360 A66-20978  
Worst case design of diode transistor logic inverters, considering resistor end-of-life tolerance, supply voltage variations and minimum beta of switching transistor 10 p1508 A66-21298  
Parallel-strip point-contact diode mount evaluated for video detection of millimeter waves 10 p1514 A66-21909  
Location of poles and zeros of small-signal RF impedance function of Read diode and how they affect oscillation and current tunability 10 p1516 A66-22100  
Negative-resistance avalanche diode with small space-charge layer width in small-signal admittance

measurements 10 p1516 A66-22101  
Indium antimonide diodes of various base thickness for high injection levels, results in graphical form applied to magnetic diode production 11 p1668 A66-22740  
Diode frequency converter parametric derivation incorporating capacitance of resistance converter and resistance of capacitance converter 11 p1667 A66-22794  
Computer analysis of translators using diode ring modulators and dimensioning of frequency dependent networks preceding and following modulating four-pole to obtain specific response in passband, minimizing spurious signal effect 11 p1670 A66-23197  
Miniaturized AM-diode signal detector in form of solid state circuit for frequencies in excess of 450 kc 12 p1830 A66-23735  
Diode and transistor response to ionizing radiation, describing generation of transients qualitatively and quantitatively 12 p1843 A66-24681  
Coaxial-mounted silicon point-contact diode /1 N 26/ as frequency converter for millimeter waves 12 p1846 A66-24857  
Period of constant reverse current occurring when limited-base diode is switched from forward to backward direction of current flow 13 p2028 A66-25094  
Electroluminescence and emission spectra of indium-alloyed diodes made from phosphorus doped p-type ZnTe biased in either forward or reverse direction at liquid nitrogen temperatures 13 p2029 A66-25184  
Hall reversal at negative resistance in forward biased p-Ge point contact diode 13 p2029 A66-25192  
Small-signal impedance of transferred-electron diodes, stable against domain formation 13 p2030 A66-25212  
Step-recovery diode in shunt configuration as frequency multiplier 13 p2030 A66-25215  
Exact solution, using Laplace transform, for problem of transient characteristic of semiconductor diode, challenging Nosov view 13 p2031 A66-25229  
Reversal of diode with delay between last direct pulse and first reversed pulse 13 p2031 A66-25230  
Charge measurements for transistors and diodes 13 p2040 A66-25817  
Transients in thin based semiconductor diodes to determine recombination rate on nonrectifying contact 13 p2041 A66-25942  
Improved performance in microwave Read diode oscillator with epitaxial silicon material and coaxial cavity 14 p2248 A66-27049  
Binary pulses in microwave band regenerated, using pulse regenerator with hysteresis characteristic of parametric oscillator employing variable capacitor diode 14 p2248 A66-27059  
Diodes, transistors, rectifiers and inverters application to control and instrumentation systems, providing phase changing, frequency stabilization, source voltage, etc 14 p2249 A66-27118  
Dielectric diode induction effect demonstrated through equivalent circuit 14 p2252 A66-27491  
Microwave oscillations in 4 to 31 gc/s frequency range from single Gunn diode 14 p2254 A66-27590  
Diode gate design, using bridge circuit to eliminate spurious gating signals 14 p2267 A66-27802  
Diode bridge variable attenuator used to overcome error signals and harmonic distortion in wide range AGC 14 p2267 A66-27805  
Properties of long forward-biased diodes operating in double-injection regime 14 p2260 A66-28292  
Parametric amplification in millimeter-wave range, detailing parametric amplifier with germanium epitaxial diodes for use in radiometers 14 p2260 A66-28296  
Current-voltage characteristics of gallium arsenide diode, noting temperature effect on threshold voltage and breakdown current 14 p2260 A66-28297  
Emission bands in electroluminescence from gallium arsenide diodes, noting intensity at high and low voltages and radiation and doping effect 15 p2562 A66-28714  
Backward diode application to microwave

circuit design, discussing characteristics of stripline mount with probe  
 detector 15 p2457 A66-28886  
 Controlled noise generation at high pulse rate with avalanche diodes, noting spectral voltage density and temperature coefficient 15 p2458 A66-28894  
 Conventional point-contact diodes and junction diodes with point-contact geometry, examining fabrication techniques and millimeter wave application 15 p2461 A66-29013  
 Equivalent circuit evaluation of theoretical potential and limitations of millimeter wave semiconductor diode detectors, mixers and frequency multipliers 15 p2461 A66-29015  
 Coupling efficiency evaluation in light emitting diodes 15 p2514 A66-29032  
 Capacitance variation of gold n-type gallium arsenide surface barrier diode when illuminated, applied to light detector, frequency modulation, etc 15 p2463 A66-29034  
 Complex zeros of exponential polynomial in study of stability criteria for collisionless plane vacuum diode of infinitely heavy ions in interelectrode space 15 p2464 A66-29244  
 Error estimation in diode function generator design 16 p2659 A66-30518  
 Transfer processes in steep p-n junction of long diodes with interval between forward and reverse bias 16 p2667 A66-31671  
 Electroluminescence of silicon carbide diodes 16 p2668 A66-31781  
 Secondary breakdown relaxation oscillations and I-V characteristics of point-contact n-type Ge diode 17 p2879 A66-31866  
 Passive frequency conversion utilizing nonlinear conductance, establishing lower bound for noise figure 17 p2881 A66-32060  
 Properties of silicon diodes with gold alloy bases, examining anomalies in V-I characteristics 17 p2885 A66-32221  
 Selective properties of gold-compensated silicon diodes, noting behavior in presence of bias currents and current voltage characteristics 17 p2885 A66-32226  
 Amplification and generation properties in gold-compensated silicon diodes, noting noise spectrum and harmonic oscillations 17 p2885 A66-32227  
 Q-factor of nonlinear capacitance microwave diodes determined from standing-wave ratio and phase difference for two bias voltages on diode, using passive linear quadrupole 17 p2885 A66-32228  
 Diode characteristics and application guidelines 17 p2888 A66-32782  
 Cesium ion tubes advantages over conventional tubes including ability to study electron-inertia effects 17 p2888 A66-32823  
 Germanium and silicon microwave transistor and mixer diode design for HF and low noise oscillators and amplifiers 17 p2891 A66-32912  
 Bonded backward diode fabrication and performance as microwave mixer and low-level detector 17 p2891 A66-32913  
 Resonant circuit behavior of Gunn diode, considering device as self-pumped parametric oscillator 18 p3078 A66-34086  
 Amplifier helping backward diodes as mixers and detectors in microwave systems 18 p3088 A66-35019  
 Book on analysis and design of transistor circuits including transistor parameters, emitter diode equivalent circuits, FET, amplifiers, noise, etc 18 p3089 A66-35238  
 Field and thermionic field emission responsible for excess currents in Schottky barriers formed on doped semiconductor 19 p3434 A66-35345  
 External quantum efficiency of tin doped GaAs electroluminescent diode, noting effect of zinc diffusion conditions 19 p3312 A66-35347  
 Transient processes in semiconductor diode with base having impurity concentration gradient 19 p3313 A66-35459  
 Silicon-on-sapphire batch-fabrication of computer logic and memories, describing SOS diode matrix 19 p3314 A66-35526  
 Linvill lumped models for graded semiconductor diodes considered through Beddoes notation 19 p3318 A66-35727  
 Efficiency limitation factors in radiative recombination in electroluminescent GaAs diodes, examining contribution of majority

and minority carriers injected into P region 19 p3319 A66-36264  
 Replacing heated tungsten filament and IR filter by GaAs electroluminescent diode without filter for IR illumination 19 p3320 A66-36266  
 I-V characteristic of p-n junction explained by band gap widening due to mechanical stress exerted by stylus, assuming Zener effect 19 p3323 A66-36823  
 Diode frequency converter parameter derivation incorporating capacitance of resistance converter and resistance of capacitance converter 20 p3525 A66-37131  
 Equilibrium photocurrents in silicon switching diodes from nondestructively measured electrical parameters 20 p3526 A66-37322  
 Space charge wave equation and impedance and stability of electron diodes, using Nyquist analysis and transit time and RF beam current 20 p3528 A66-37489  
 Effect of reduction of breakdown voltage by external illumination of oxide protected planar diode or by nonequilibrium carriers drifting in surface channel 20 p3528 A66-37493  
 Silicon variable capacitance diodes with high-voltage sensitivity produced by low-temperature epitaxial growth technique 20 p3528 A66-37494  
 Diode curve tracer for observing I-V characteristics of semiconductor junctions and diodes via pulse method 20 p3560 A66-37587  
 Photoreponse measurements of depletion capacitance and diffusion potential of GaP Schottky-Barrier diodes 20 p3534 A66-38390  
 Lampert double injection theory for CdS diodes with negative resistance I-V characteristic curve 20 p3535 A66-38435  
 Breakdown diodes in voltage stabilization, noting temperature effects, cascade switching, etc 21 p3710 A66-38748  
 Optical coupling using gallium arsenide laser for variation of frequency of diode emission through small change in current density 21 p3746 A66-38920  
 Recombination by tunneling in electroluminescent diodes to obtain line shape and light intensity in peak shift region 21 p3801 A66-38998  
 Parametric amplification at collector-base diode for microalloy graded-base transistor and normal mixing due to resistive nonlinearity at emitter 22 p3872 A66-39735  
 Thermal noise hypothesis applied rigorously to space charge limited diodes 22 p3872 A66-39747  
 Cesium-plasma diode effect dependence on material output of cathode in vacuum, plotting short circuit current vs vapor pressure, voltage distribution, etc 22 p3952 A66-39752  
 Dynamic characteristic theory of long diode with base containing impurity atoms producing deep energy levels in forbidden zone 22 p3873 A66-39826  
 Generation of oscillations in circuit which has long diode with base containing impurity atoms producing deep energy levels in forbidden zone 22 p3961 A66-39827  
 Miniaturized AM-diode signal detector in form of solid state circuit for frequencies in excess of 450 kc 22 p3875 A66-40078  
 Room temperature performance of GaAs laser diodes, using SCRs to achieve high pulse repetition rate 22 p3932 A66-40175  
 Noise measurement in field emission vacuum diodes, interpreting excess and shot noise spectrum in terms of work function 22 p3878 A66-40696  
 Field emission diode and triode with narrowly spaced electrodes, noting voltage and current characteristics 22 p3882 A66-40894  
 Conductance and capacitance of metal-insulator-semiconductor diodes or any two-terminal complex admittance plotted automatically as function of applied bias 22 p3882 A66-40897  
 Indium antimonide diodes of various base thickness for high injection levels results in graphical form applied to magnetic diode production 23 p4045 A66-41478  
 Volt-ampere characteristics of germanium and silicon diodes with p region formation by gold diffusion into n-type

material 23 p4046 A66-41566  
 Constant voltage avalanche breakdown state of gallium arsenide diodes after switching attributed to peak in hole generation rate 23 p4047 A66-41623  
 Proximity focused biplanar image converter diode for high speed photography, discussing basic geometries with respect to quantitative data gathering capabilities 23 p4070 A66-41673  
 Compound diode-transistor structure with current gain invariant with temperature 24 p4183 A66-42629  
 Multifunction monolithic thin film compatible diode-transistor logic circuits for data processing 24 p4178 A66-43187  
 Harmonic generation and detection in submillimeter wavelength region, emphasizing crystal point contact diode 24 p4176 A66-43191

**DIOL**  
**S GLYCOL**  
**DIOPHANTINE EQUATION**  
 Theoretical and machine aspects of ignoring singularity in approximate integration, relating uncertain cases to diophantine approximation 11 p1722 A66-22981  
 Book on ergodic problems in comparison theory and theory of diophantine, discussing residue distribution of polynomial of nth order modulo p, fractional parts of polynomial and exponential function 15 p2529 A66-29767

**DIOXIDE**  
**S CARBON DIOXIDE**  
**DIPLEXER**  
 Hybrid junction diplexer connecting transmitter and receiver to common antenna 22 p3873 A66-39784

**DIPOLE**  
**SA DIELECTRIC POLARIZATION**  
**SA ELECTRIC DIPOLE**  
**SA MAGNETIC DIPOLE**  
 LF solutions for dipoles in semiinfinite media found not to be valid for entire range of frequencies 06 p0826 A66-16032  
 Forbidden regions produced by two spatially separate point dipoles with parallel axes 14 p2361 A66-27412  
 Electron scattering by impurities in dipole form in semiconductors with anisotropic effective mass of current carriers, deriving formula for tensor of relaxation time 19 p3442 A66-35818  
 Sensitivity points method for linear systems based on structural interpretation of logarithmic sensitivity functions, introducing sensitivity dipole 19 p3327 A66-36015  
 Electromagnetic wave radiation from dipole source in thin plasma slab becoming weak outside plasma, considering total reflection 21 p3703 A66-38759  
 Polarization characteristic variations of HF signal received over short-range ionospheric path, noting phase measurement of elliptically polarized wave components, using receiving dipoles 22 p3864 A66-40065

**DIPOLE ANTENNA**  
 Electromagnetic field and radiation pattern of Hertzian electric dipole antenna in conical sheath 02 p0191 A66-11803  
 Linear antennas and characteristics regarding maximum power, directivity, height, sleeve and conical dipoles and current distribution 04 p0491 A66-13402  
 Log-periodic dipole antenna array and conical logarithmic spiral antenna design and performance 04 p0491 A66-13404  
 Admittance of short dipole antenna in ionosphere measured during rocket flights, deducing values of plasma frequency 05 p0669 A66-14945  
 Satellite Ariel II receiver for measuring cosmic radio noise, using dipole antenna 05 p0769 A66-15841  
 Cylindrical and truncated cone-type metallic dipole antennas for reception of VLF, examining theory of behavior in ionosphere 09 p1340 A66-19847  
 Design feasibility of dipole antenna for measuring electric fields at VLF from satellite moving through ionosphere 09 p1340 A66-19848  
 Plasma resonance excitation by small dipole antenna operating in pulsed mode in presence of and in absence of external

magnetic field 09 p1340 A66-19849  
 Ionospheric aerial impedance  
 measurements of wire dipole at frequency  
 of 60 kc and plasma electron and collision  
 frequency estimations 10 p1526 A66-21119  
 Variational method of computing radar  
 scattering cross sections to bistatic  
 scattering cross section for chaff  
 dipoles 10 p1503 A66-21643  
 Current distribution and input impedance  
 of infinite cylindrical antenna in anisotropic  
 plasma, treating it as boundary value  
 problem 11 p1661 A66-22396  
 Matrix analysis of scattering from  
 conjugate-matched antenna 11 p1662 A66-22541  
 Moderately superdirectional antenna with  
 directivity slightly greater than uniform-  
 current distribution of same size 11 p1664 A66-22560  
 Nonsteady radiation field of antenna  
 systems for arbitrary signals via Huygen-  
 Kirchhoff principle 11 p1670 A66-23225  
 Superdirective array of normal mode  
 helical dipoles 12 p1840 A66-24625  
 Explicit relation between mutual coupling  
 and radiation pattern of array antenna  
 evaluated via scattering formalism, based on  
 spherical modes 12 p1841 A66-24627  
 Bessel type lambda function for describing  
 properties of dipoles 12 p1841 A66-24630  
 Radiation due to axially oriented electric  
 dipole situated on axis of infinite cylindrical  
 column of insulating free space surrounded  
 by uniaxially anisotropic plasma 13 p2026 A66-26103  
 Noise suppression, signal reception, and  
 polarization measurement in cross correlated  
 antennas as function of dipoles imbedded in  
 random field, surrounding noise field and  
 coherency matrix of cross correlation  
 function 13 p2044 A66-26746  
 Radiation impedance of infinite planar  
 dipole array, phased for any angle of  
 radiation, calculated by Fourier series  
 expansion of field in plane waves 14 p2247 A66-26865  
 Plasma oscillation resonance phenomena of  
 ionospheric antenna excitation near lower  
 hybrid resonant frequency 14 p2340 A66-27127  
 Radiation characteristics of vertical dipole  
 in warm plasma, expressing vector potential  
 functions in Fourier integrals 14 p2240 A66-27916  
 Radiation from vertical dipole in warm  
 plasma determined by asymptotic series  
 expansion of integral solutions, noting  
 surface wave propagation, transformation  
 from acoustic to electromagnetic mode on  
 boundary, etc 14 p2240 A66-27917  
 Log periodic Yagi-Uda dipole antenna array  
 and extension of frequency bandwidth 14 p2256 A66-27920  
 Radiation of prescribed polarization from  
 cross-dipole antenna on aircraft carrier 15 p2447 A66-28570  
 Gain, impedance and scan angle variation  
 in polarization of phased radar antenna  
 arrays constructed with hybrid-fed crossed  
 dipole radiating elements 15 p2456 A66-28586  
 Operating principles and critical  
 dimensions of traveling wave slotted-  
 cylinder antenna with dipole elements 15 p2467 A66-29886  
 LF ionospheric measurement of  
 admittances of three orthogonal short  
 dipoles, noting impedance variation with  
 respect to frequency attitude and  
 voltage 15 p2493 A66-30038  
 Impedance measurement of 39.5 meter tip-  
 to-tip dipole antenna made during  
 ionospheric rocket flight 15 p2469 A66-30046  
 Rocket attitude determined by  
 simultaneous measurement of geomagnetic  
 field and electromagnetic field generated by  
 radio wave transmitted by rocket-mounted  
 dipole 16 p2810 A66-30958  
 Excitation of dipole wave in circular small  
 delay dielectric waveguide by sources with  
 amplitudes and phases variously distributed  
 over apertures 17 p2879 A66-31857  
 VLF dipole antenna impedance values,  
 magnetotonic and collision effects in  
 ionospheric magnetoplasma 17 p2874 A66-32386  
 Self and mutual admittance of coupled  
 dipoles in dissipative

medium 18 p3065 A66-33529  
 Antenna system for VLF radiowave  
 experiments in D region mounted on  
 Skylark rocket 19 p3321 A66-36621  
 Approximate solution for dipole radiator  
 field in space containing two conducting  
 long cylinders with parallel axes 20 p3512 A66-37146  
 Resistive and reactive components of  
 impedance of short dipole in lower  
 ionosphere 20 p3525 A66-37300  
 Input admittance, gain and noise  
 performance in dipole antennas with Esaki  
 diodes 20 p3531 A66-37731  
 Experimental results of VLF dipole tests  
 on Greenland ice cap including  
 measurements of self-impedance, amplitude  
 current distributions, relative efficiency and  
 complex conductivity 22 p3874 A66-39942  
 Borgnis U function applied to design of  
 electron tube having drift space between  
 collector and grid controlling current 22 p3876 A66-40173

# DIPOLE MOMENT

SA PYROELECTRICITY  
 Gravitational source dynamics, discussing  
 multipole structure, mass, linear momentum,  
 dipole moment and spin in axially  
 symmetric field 06 p0908 A66-16131  
 Gas adsorption on molecular sieves,  
 discussing separation caused by electrostatic  
 forces and electric fields 06 p0819 A66-16730  
 Critical Stormer pass points for quadrupole  
 field and double-ring-current field with  
 parallel or antiparallel dipole moments 09 p1404 A66-20085  
 Generalization of Keesom potential to  
 include quantum effects for adiabatic  
 interaction between two rotating dipolar  
 fields 09 p1405 A66-20677  
 Nitrogen analogs of sesquifulvalene,  
 calculating dipole moments of nitrogen  
 anhydride bases and pyridones via modified  
 Hueckel technique 11 p1651 A66-23411  
 Plasma effect on dipole magnetic field and  
 solar wind plasma-geomagnetic field  
 interaction 12 p1943 A66-24391  
 Atmospheric absorption in IR region,  
 noting effects of water vapor, ozone, carbon  
 dioxide and collision-induced dipole  
 moments 13 p2075 A66-26603  
 Dipole moment calculation for gas laser in  
 magnetic field 15 p2516 A66-29348  
 Limits to charge groups classified  
 according to structure and geometry into  
 linear dipole-type concentrated moments  
 analyzed, using generalized functions 16 p2823 A66-31713  
 Dipole phenomena in n-type GaAs caused  
 by field perturbations, showing conditions  
 for high and low field nucleation 17 p2983 A66-33106  
 Cosmic ray threshold rigidities examined,  
 discussing penumbral and threshold  
 perturbation effects produced by  
 superimposing external magnetic fields on  
 dipole model 18 p3096 A66-35227  
 Dipole moment calculation for gas laser in  
 magnetic field 20 p3576 A66-37353  
 Magnetospheric tail instabilities, auroral  
 electron acceleration and deformation due  
 to dipole magnetic field acceleration of  
 plasma particles 20 p3635 A66-38222  
 Perturbation theory of heteronuclear  
 diatomic molecules based on isoelectronic  
 homonuclear molecules applied to carbon  
 monoxide and nitrogen 23 p4032 A66-41646  
 Dipole moment of perchlorofluoride by  
 measuring absolute absorption maximum and  
 linewidth parameters in resonant  
 cavity 24 p4170 A66-43038  
 Spin-spin interaction energy for large  
 separations of two ground state hydrogen  
 atoms 24 p4239 A66-43040

# DIRAC EQUATION

Gravitational field interactions with Dirac  
 fields and electromagnetic fields studied in  
 framework of special relativity to find  
 possible C-, P-and T-violating effects 05 p0717 A66-15349  
 Stochastic processes in microscale  
 relativistic fluid mechanics, discussing Dirac  
 fluid, Klein-Gordon equation, diffusion,  
 quantum potential, spin fluids, etc 12 p1914 A66-24093  
 Dirac equation for spin-half particles in  
 curved space-time formulated by using  
 Cartan calculus, applied to treatment of

neutrinos in homogeneous nonisotropic  
 universes and plane wave geometries 12 p1905 A66-24563  
 Dirac delta function representation of  
 spark ignition, considering heat transfer  
 from reaction zone to fresh gas and flame  
 propagation 23 p4148 A66-41413  
 DIRECT CURRENT /DC/  
 SA ALTERNATING CURRENT /AC/  
 RF magnetic field effect, applied parallel  
 to external DC field, on Heisenberg  
 ferromagnet with dipolar coupling, using  
 Green function 01 p0122 A66-10579  
 DC and LF AC characteristics of silicon  
 transistor over collector current range 02 p0200 A66-11878  
 DC testers for integrated circuits  
 evaluated, emphasizing areas of application,  
 testing methods and operating characteristics 03 p0345 A66-13274  
 Aircraft and commercial application of  
 three-phase direct current resistance  
 welding, using silicon diodes 05 p0685 A66-14518  
 Thyristor equipped DC to DC regulated  
 power converter for voltage range between  
 43 and 300 v DC based on printed circuit  
 principle 06 p0857 A66-16966  
 Direct current voltage measuring and  
 recording system for laboratory use 07 p1036 A66-18486  
 Electrical properties of alpha ferric oxide  
 containing magnesium, noting temperature  
 effect, carrier concentration, conductivity  
 variations, etc 08 p1271 A66-19221  
 High impedance semiconductor DC  
 amplifier for use as measuring amplifier or  
 operational amplifier 08 p1194 A66-19279  
 Motor controllers for DC current supply  
 must be inverters of constant or variable  
 frequency 08 p1168 A66-19299  
 High efficiency lightweight DC-DC power  
 converter with step-width modulating  
 preregulator for use in Apollo Lunar  
 Excursion Module 08 p1169 A66-19496  
 Two operation modes of two-way DC  
 improved efficiency amplifier under active  
 loading 08 p1197 A66-19689  
 Phase controlled SCR circuit for variable  
 DC power application 08 p1199 A66-19807  
 Electromagnetic wave propagation in  
 plasma located in magnetic field of linear  
 direct current 10 p1506 A66-22003  
 Brushless motors of various types  
 described and compared in order of  
 increasing cost and complexity for  
 spacecraft application 11 p1640 A66-23174  
 Equivalent circuit for cycloconverter valid  
 for AC and DC outputs, noting data on  
 voltage drops 12 p1804 A66-24659  
 Precision DC potentiometer microwave test  
 set for coaxial or waveguide insertion loss  
 measurement 12 p1843 A66-24673  
 Direct current conduction of thin  
 evaporated silicon oxide films, noting  
 functional dependence on degree of  
 oxidation, composition, temperature and  
 adherence to Schottky emission law 13 p2157 A66-25034  
 DC-to-DC nondissipatively regulated  
 converter using inductive energy storage for  
 voltage transformation and regulation 13 p2001 A66-26297  
 Response of thin cylindrical monopole  
 antenna to DC pulse excitation computed,  
 using Fourier transforms, noting correlation  
 between empirical and theoretical  
 values 14 p2255 A66-27906  
 Very low DC voltage measurement using  
 chopper principle, based on resistance effect  
 and employing magnetically controlled  
 resistances 16 p2701 A66-30274  
 Model L/C water-cooled DC power supply  
 for short arc lamps, noting SCR  
 selection 16 p2635 A66-30495  
 Discrete transfer functions simulated on  
 analog computer by direct currents 16 p2656 A66-30584  
 Circuit with single externally driven  
 switch, operated at fundamental frequency  
 gives efficient conversion of DC to AC at  
 that frequency or any specified harmonic of  
 it 17 p2848 A66-31818  
 Optimum parameters for transformation of  
 output signal in highly sensitive DC  
 converter when SNR for required loading  
 source reaches maximum 17 p2887 A66-32703  
 Direct current volt-ampere characteristics

of junction gate germanium alloy FET, including field-dependent mobility effect and channel-height distribution 17 p2897 A66-33463

DC theory of unijunction transistor, calculating idealized one-dimensional model, neglecting diffusion currents but taking into account bulk recombination effects 18 p3076 A66-33934

Two operation modes of two-way DC improved efficiency amplifier under active loading 18 p3087 A66-34675

FM modulator with frequency response from DC to video while maintaining crystal stability, accommodating FM narrow-and wideband with single design 19 p3316 A66-35699

Electromagnetic wave propagation in plasma located in magnetic field of linear direct current 19 p3303 A66-36087

Plasma turbulent heating by direct current discharge in magnetic mirror trap, analyzing adiabatic compression 19 p3430 A66-36589

Brushless DC torque motor with unique position-sensing device based on variable magnetic reluctance 20 p3498 A66-37168

Circuitry of automatic surface tension measurement device 20 p3559 A66-37502

Vacuum pressure effect on separation distance for arcing of DC current between spacecraft material 21 p3771 A66-39214

Voltage control by means of Zener diode, transistor and variable-gain amplifier circuit 23 p4044 A66-41214

Thyristor circuit, basis for capacitive switching circuits, expressing switching capacitance by DC source 24 p4181 A66-42485

Precision DC potentiometer test for measuring microwave coaxial or waveguide insertion loss 24 p4182 A66-42577

Transistor theory approximation of DC and small signal I-V characteristics of p-n-p-n junction diodes and triodes 24 p4184 A66-42744

Basic considerations for DC to DC conversion networks, detailing relationship between characteristics of active resistor and maximum AC power generated by active element 24 p4189 A66-43180

**DIRECTION FINDER**

**S RADAR DIRECTION FINDER**

**S RADIO DIRECTION FINDER**

**DIRECTIONAL ANTENNA**

Directional properties of surface antennas with linear, squared and cubic phase distortions for symmetrical and asymmetrical amplitude distribution laws 01 p0035 A66-10220

Linear superdirectional antennas discussing directional properties and formulas for optimal directive gain 03 p0337 A66-13315

Design parameters of phase compensated circular arrays studied for synthesis of diametric-plane directional patterns having low sidelobes 04 p0498 A66-14043

Radiation field of single-filament logarithmic-elliptical helical antenna, assuming traveling wave along helix 04 p0501 A66-14408

Concentric ring antenna arrays with low sidelobes, estimating currents from Fourier-Bessel series 06 p0825 A66-16017

Recomputation of values of numerical approximation of integral in gain limitations of large antennas, considering sidelobe level 06 p0844 A66-16044

Symmetrical transverse electromagnetic-mode directional couplers, deriving formulas for functional parameters and insertion-loss function 06 p0844 A66-16083

TEM-mode coupled-transmission-line directional couplers, determining equal-ripple polynomials and tabulating parameters 06 p0844 A66-16084

Wideband annular-zone directional antenna, with individual radiators arranged in log-periodic concentrated groups on ring fed by conical line 08 p1190 A66-18682

Amplitude and phase direction-finding characteristics of monopulse automatic tracking system operating on sum-difference principle 08 p1190 A66-18911

Spatial radiation patterns of curved high-directivity antenna array as function of amplitude distribution and directivity 08 p1191 A66-18913

High-directional spherical antenna array,

determining shape of radiation pattern as function of orientation of individual antennas and amplitude distribution of excitation currents 08 p1197 A66-19608

Moderately superdirectional antenna with directivity slightly greater than uniform-current distribution of same size 11 p1664 A66-22560

Antenna theory, analyzing radio astronomical methods such as antenna axis, radiation pattern, gain, efficiency, etc 11 p1658 A66-23219

Nonsteady radiation field of antenna systems for arbitrary signals via Huygen-Kirchhoff principle 11 p1670 A66-23225

Superdirective array of normal mode helical dipoles 12 p1840 A66-24625

High directional antenna with variable aperture and signal processing after frequency conversion 14 p2251 A66-27237

Zonal reflectors creating fan-type radiation patterns possess structural parameters and electrical characteristics for use as high directional antennas 14 p2252 A66-27247

Mutual impedance between two rectilinear and parallel top-loaded elements of directional antenna when elements have nonzero current at ends 14 p2257 A66-27924

Linear superdirectional antennas, discussing directional properties and formulas for optimal directive gain stability 14 p2242 A66-28288

Amplitude and phase selection for maximization of directivity of scalar radiation point source 16 p2745 A66-30266

Coefficient of mutual correlation of noises for two-antenna phase-type direction finder 17 p2879 A66-31860

Directional properties of surface antennas with linear, squared and cubic phase distortions for symmetrical and asymmetrical amplitude distribution laws 17 p2880 A66-31903

High-directional spherical antenna array, determining shape of radiation pattern as function of orientation of individual antennas and amplitude distribution of excitation currents 18 p3088 A66-34964

Radio astronomy antenna theory, discussing antenna resolution, brightness distribution of celestial bodies, interferometer patterns, actual antennas, etc 20 p3530 A66-37721

Cathode ray oscillograph-directional antenna recordings of electromagnetic pulses from lightning discharges 20 p3553 A66-38081

Generalized method of calculating multielement antenna and feeder system 21 p3712 A66-39250

Waveguide directional couplers using inclined slots, considering broad-to-narrow cross and broadwall parallel guide configuration 22 p3878 A66-40546

**DIRECTIONAL CONTROL**

Effect of altitude and camera field-of-view at various degrees on geographic orientation and error in target position, using TV data 08 p1225 A66-19531

Pressure effect on cone caused by spike protruding at angles of attack may provide aerodynamic directional control at supersonic speed 16 p2629 A66-31117

**DIRECTIONAL STABILITY**

Flight experience with Ogee wing at low speed [AIAA PAPER 65-782] 03 p0318 A66-12556

Circular runway flight operations and increased directional stability [SAE PAPER 660283] 15 p2476 A66-29827

**DIRICHLET PROBLEM**

Finite difference method solving Dirichlet problem for quasi-linear elliptic equation, with results applied to calculation of magnetic field in nonlinear media 01 p0091 A66-10165

Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral equation 01 p0094 A66-10730

Straight lines method applied to Dirichlet and Neumann boundary value problem for certain nonself-adjoint two-dimensional second order elliptic equations 01 p0095 A66-11014

Representation of arbitrary functions in region of convergence through Dirichlet series expansion 01 p0096 A66-11185

Dirichlet series representation of arbitrary

analytical functions in convex region of convergence with complex exponent 01 p0096 A66-11186

Fragmen-Lindelof type theorems for second-order linear elliptic equation, examining Dirichlet problem solution in infinite region 02 p0250 A66-12100

Interior and exterior Dirichlet and Neumann problems for LF acoustic oscillations 02 p0261 A66-12153

Necessary and sufficient criteria for absolute minimum of multidimensional integrals, depending on arbitrary number of real functions of real variables and partial derivatives of arbitrary maximum order 03 p0387 A66-12686

Asymptotic solution of Dirichlet problem for diffusion processes and small parameter in elliptic equations with discontinuous coefficients 03 p0388 A66-12925

Bounds for Dirichlet energy integral in terms of arbitrary vector field 04 p0539 A66-13949

Existence and uniqueness of weak solution to Dirichlet problem for elliptic differential equations in Sobolev spaces with special occupancy function 05 p0708 A66-15154

Asymptotic error estimates in solving elliptic equations of fourth order by method of finite differences 05 p0710 A66-15477

Existence and uniqueness of solutions of certain boundary value problems for degenerate elliptic equations of second kind 07 p1056 A66-17596

Twin prime problem solution depends only upon nontrivial L-zeros of Dirichlet L-functions 07 p1057 A66-17861

Representation of arbitrary integral functions by Dirichlet series in entire plane, determining number of rays on which zeros must be located 07 p1058 A66-17912

Second approximation of compressible subsonic flow over given wing profile reduced to regular Dirichlet problem 07 p0981 A66-18110

Complex perturbing potentials of constant circulation around single wing profile treated by method based on Dirichlet problem 07 p0983 A66-18341

Series expansion solutions of Dirichlet and Poincare problems for systems of elliptical PDEs 09 p1397 A66-20934

Convergence of solutions of finite-difference analogs of equation satisfied by generalized axially symmetric potential 11 p1723 A66-22986

Representation of arbitrary functions in region of convergence through Dirichlet series expansion 12 p1903 A66-24018

Dirichlet series representation of arbitrary analytical functions in convex region of convergence with complex exponent 12 p1903 A66-24019

Extended Dirichlet problem for cross section of cylindrical shell, showing asymptotic solution is valid, approximation to Dirichlet integral applied to electrostatic problem of condenser and closed tubes torsion 12 p1968 A66-24196

Majorants of solutions of first boundary problem for second order linear elliptic equations 12 p1904 A66-24238

Maximized elliptic equations, Dirichlet problem, distance function solution, maximum principle, removable singularity, etc 12 p1905 A66-24401

Dirichlet problem for degenerating elliptical equations with nonlinear lowest terms 13 p2120 A66-26007

Dirichlet problem for elliptical system, showing solvability of inhomogeneous system with uniform boundary values for half-plane and circle cases 13 p2120 A66-26008

Dirichlet problem deviation from Bitsadze system with Noetherian properties, giving Hausdorff normal solvability conditions for inhomogeneous problem 13 p2120 A66-26009

Boundary value problems for minimal surface equation 14 p2320 A66-26943

Expansion of arbitrary function of Mehler-Fok integral form in terms of spherical functions 15 p2526 A66-28952

Complex flow-perturbing potential for Joukowski profile in incompressible fluid with parabolic velocity distribution, using Jacob first order approximation to solve Dirichlet problem 16 p2627 A66-30211

Convergence of discrete analogs of

Dirichlet problems for Poisson equation in two dimensions, describing finite difference method for producing

algorithms 16 p2731 A66-30235

Certain incorrect Dirichlet and Cauchy problems of potential theory for elliptic and parabolic equations 16 p2733 A66-30744

Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 16 p2734 A66-30784  
Representation of arbitrary integral functions by Dirichlet series in entire plane, determining number of rays on which zeros must be located 16 p2736 A66-30975

Axiomatic theory of Dirichlet problem applicable to nonlinear PDEs and to systems of PDEs 16 p2738 A66-31704

Exactness of majorants of Dirichlet problem solution and uniqueness conditions for linear elliptic equations 17 p2947 A66-32581

General maximum principle and removable singularities, discussing case of arbitrary linear set of positive linear measure for which principle does not hold 18 p3128 A66-34661

Accuracy analysis of variable-direction diagrams for numerical solutions to heat conductivity equations 19 p3478 A66-35937

Semiweak solutions of elliptic BVP, particularly generalized Dirichlet problem 21 p3754 A66-38461

Existence and uniqueness theorems for Dirichlet problem of second-order linear elliptic equation, Neumann BVP, mixed BVP and oblique derivative problem 21 p3754 A66-38462

General theory of stability of elastic equilibrium in three-dimensional system of orthogonal curvilinear coordinates 21 p3828 A66-38803

Maximum modulus theorem extended to highly elliptic systems 21 p3758 A66-39369

Normal solvability of Dirichlet problem for Bitsadze elliptic system, noting conditions under which homogeneous problem has nonzero regular solutions 22 p3940 A66-40446

Dirichlet problem for elliptic system of differential equation which does not satisfy Lopatinski condition where characteristic equation of system has simple roots 22 p3940 A66-40449

Dirichlet problem solved by probability density for Brownian particle, using Fredholm integral equation 24 p4232 A66-42748

Electromagnetic analog computer for solving Dirichlet and Neumann equations for half-space and associated geophysical problems 24 p4202 A66-42763

Geometrical theory governing flow over surface of convergent spillway 14 p2277 A66-27936

# DISCHARGE COEFFICIENT

Orifice constant discharge coefficient when Reynolds number drops below 10,000 achieved in series or parallel flow 01 p0059 A66-10958

Most probable discharge coefficient for ASME flow nozzles [ASME PAPER 65-WA/FM-1]

Discharge coefficient of quadrant-edge orifice and performance at very high Reynolds number [ASME PAPER 65-WA/FM-2]

Pressure index for predicting upstream nonnormal velocity distributions on orifice meters [ASME PAPER 65-WA/FM-3]

05 p0684 A66-15518

Book on flow measurement through pipes by square-edge orifice plate using corner tappings, including pipe layout, fluid density, temperature, pressure, orifice design, tables, graphs, etc 08 p1221 A66-18679

Relative effect of restrictive orifices, venturis or nozzles on measurement accuracy of fluid flow rates in pipes 11 p1703 A66-22207

Dynamic law for pressure variation in throttle chamber of hydraulic control booster, taking into account fluid compressibility and change in discharge coefficient 16 p2637 A66-31219

Quadrant edge orifice meter performance under cavitating conditions, noting discharge coefficient curves [ASME PAPER 66-FE-9]

Cavitation effect on discharge coefficient of standard flow nozzles [ASME PAPER 66-FE-12]

Extension of upper limit of Reynolds number for constant discharge coefficient of quadrant-edge orifice meter, noting performance in turbulent zone 21 p3724 A66-38819

Shock wave instability and mass flow accommodation for ribbon-type parachutes, noting canopy porosity and free stream Mach number 22 p3845 A66-40594

Unsteady air flow discharge coefficients compared for sharp-edged orifices with steady flow values 23 p4009 A66-41700

# DISCHARGE TUBE

SA ELECTRON TUBE

SA THYRATRON

Current and voltage distribution over length of HF discharge in helium-neon laser 01 p0082 A66-10704

Ionization potential of thulium obtained from hfs of thulium I, using discharge tube and Fabry-Perot etalon 03 p0393 A66-12322

Nonisothermic pulse discharge column in argon-cesium and helium-cesium systems with produced plasma studied for nonisothermic conductivity 03 p0398 A66-12508

Characteristics of Schuler tube with two anodes compared with one anode tube 04 p0492 A66-13472

Hydrodynamic acceleration of plasma in discharge tube into which energy is released in form of Joule heat 04 p0552 A66-14154

Precursor effects in T-tubes predominantly air-filled, using microwaves and photomultipliers, noting role of UV and plasma radiations 05 p0719 A66-14503

Heat transfer rate to stagnation point of catalytic surface placed in slow flow of dissociated oxygen from glow discharge tube and atom-molecule diffusion coefficient 06 p0822 A66-16632

Photoabsorption cross section of atomic hydrogen obtained by flowing molecular hydrogen through discharge tube 06 p0913 A66-17042

Transducers for exciting and detecting acoustic waves in discharge tube plasmas, discussing requirements, specifications and construction techniques 07 p1032 A66-17496

Potential striae determined in hollow cathode plasma 08 p1264 A66-19183

Electromagnetic behavior of shock waves and supersonic plasma fluxes generated in shock tubes, using cylindrical and conical discharge chambers 08 p1264 A66-19191

Discharge chamber with water-cooled metallic walls and HF induction 09 p1407 A66-20144

Statistical characteristics of delay time between ignition and discharge pulses of ISSh 100-3 spherical stroboscopic tube 09 p1353 A66-20363

Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 10 p1558 A66-21999

Low-pressure mercury vapor lamp for interferometric and spectrometric work, noting electrodes, main discharge tube, electrical circuit, etc 10 p1538 A66-22059

Current and voltage distribution over length of HF discharge in helium-neon laser 11 p1714 A66-23309

Characteristics of periodic fluctuations in voltage, current and luminous intensity of discharge through inert gases and mercury

vapor, using commercial discharge tubes 11 p1747 A66-23369

Arc discharge in cesium vapor within diode, noting plasma parameter distribution in electrode spacing during low, luminous and arc discharge phases 13 p2142 A66-25681

Magnetic probing of plasma column motion in cylindrical and toroidal discharge vessels 13 p2144 A66-25723

Helium-neon laser multibeam generation in gas discharge tube, using spherical mirrors and tapered plates 13 p2093 A66-26053

Velocities of incident and reflected shock wave colliding with plasmoid as affected by initial xenon pressure in induction discharge shock tube 13 p2153 A66-26525

Cataphoresis, moving striations and associated noise in He-Ne laser 13 p2105 A66-26591

Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube role 14 p2307 A66-27156

Microsecond pulsed discharges at short tube with wire electrodes containing helium gas at intermediate pressures 14 p2341 A66-27314

Radial amplification dependence over discharge cross section of He-Ne laser 15 p2515 A66-29208

Electromagnetic wave propagation in circular waveguide with axially-placed discharge tube 15 p2555 A66-29785

Simultaneous measurement of voltage, current, current derivative and X-ray output as function of time in low inductance flash X-ray discharge tube 16 p2706 A66-30935

Plasma-ion oscillations in drifted plasma effected in diode-type discharge tube by varying longitudinal magnetic field or cathode temperature 17 p2972 A66-32974

Radial amplification dependence over discharge cross section of He-Ne laser 17 p2936 A66-33057

Plasma sheath properties near discharge tube anode, noting relation of electron current distribution along discharge radius and ion energy spectrum to pressure 18 p3140 A66-34976

Alumina high temperature gas discharge tube for investigation of pulsed metal vapor laser oscillations 19 p3374 A66-35810

Low-inductance hydrogen gas discharge switch tube based on gas pressure-electrode spacing control of ionizing collisions 19 p3280 A66-35812

Conical electrode plasma source consisting of organic-glass discharge chamber with cylindrical electrode at apex, examining performance characteristics with pulsed gas admission 21 p3786 A66-39040

Plasma decay technique to measure density in discharge tubes compared to value obtained by Langmuir probe 21 p3792 A66-39182

Discharge chamber with water-cooled metallic walls and HF induction 21 p3793 A66-39415

Compact discharge lamp designed for continuous pumping of solid state laser, with integral mounts for crystals and enclosure providing cooling circuits for lamp and crystal 23 p4076 A66-41247

Effect of longitudinal magnetic field on output power of gas laser operating in IR spectrum, noting gas-mixture pressure in discharge tube 24 p4225 A66-42977

# DISCONTINUITY

SA SHOCK DISCONTINUITY

Mixed boundary value problem for second order hyperbolic equation with discontinuous coefficients having time derivatives 01 p0092 A66-10187

Discontinuous Liapunov functions applied to stability analysis of position-controlled system with symmetrically-controlled asynchronous motor 08 p1201 A66-19685

Mixed problem for general two-dimensional second-order hyperbolic equation with discontinuous coefficients solved by reduction to system of Volterra integral equations 16 p2734 A66-30747

General boundary value problems for general elliptic systems with discontinuous coefficients 16 p2735 A66-30965

Geometrical and kinematical conditions of compatibility associated with moving discontinuities in material

- media 17 p3032 A66-33501  
 Discontinuity condition in optimal control problem, considering motion of points in n-dimensional space separated by hypersurface 18 p3126 A66-33930  
 Numerical solution of problems on discontinuity at junction between homogeneous and inhomogeneous waveguides 18 p3078 A66-34094  
 Discontinuous Liapunov functions applied to stability analysis of position-controlled system with symmetrically-controlled asynchronous motor 18 p3091 A66-34671  
 Quasi-periodic solutions of nonlinear ordinary differential equations containing parametric discontinuities 20 p3591 A66-37592  
 Reflection of waves at discontinuity in refractive index gradient 22 p3866 A66-40453  
 Deformation of surface of removable wave front discontinuity in acoustically anisotropic medium with variable sound velocity 23 p4090 A66-41415  
 Stability analysis of discontinuous solution of gas dynamics PDEs for ideal fluid 23 p4055 A66-41559  
 Plasticity of bodies with abrupt surface discontinuities analyzed, based on mathematical theory of rigid-plastic nonhardenable bodies 24 p4291 A66-42736

## DISCRETE FUNCTION

- Sufficient conditions for signal reconstruction determined according to known values of that signal at discrete succession of points 04 p0483 A66-14047  
 Algorithm determining best approximation of bounded function in Chebyshev sense adapted to discrete case 04 p0540 A66-14167  
 Monitoring of discrete state discrete transition Markov source whose states are input letters to memoryless discrete noisy channel 06 p0860 A66-16189  
 Discrete simulation technique using electrical circuit for finite-difference approximation of initial differential equations, noting functional potentiometers 07 p1055 A66-17201  
 Optimal control and trajectory optimization in aperiodic discrete time functional systems 11 p1681 A66-23422  
 Directional convexity included in Halkin derivation of maximum principle, using topological and geometrical arguments related to optimal control theory 12 p1849 A66-24250  
 Digital techniques for identification of discrete-time and continuous-time systems from noisy input and output sample sequences via determination of transfer function model 12 p1854 A66-24638  
 State-space analysis of discretely controlled systems with finite delays 14 p2266 A66-27589  
 Discrete transfer functions simulated on analog computer by direct currents 16 p2656 A66-30584  
 Sufficient conditions for signal reconstruction determined according to known values of that signal at discrete succession of points 17 p2873 A66-32213  
 Discrete time signal estimation, noting minimum mean square error, minimax estimation, etc 18 p3068 A66-33905  
 Discreteness conditions for spectrum of one-term differential operator, considering asymptotic distribution of eigenvalues 18 p3126 A66-33931  
 Maximum principle in optimization of discrete time systems described by difference equations 20 p3536 A66-36857  
 Discretization and differentiation of operators with commutativity proof and with application to Newton method 20 p3589 A66-36904  
 Uniformly ergodic random processes with discrete parameters 20 p3592 A66-37816

## DISCRIMINATION

 S HEART DISEASE  
 S POLIOMYELITIS

## S RESPIRATORY DISEASE

## S VIRUS

## DISINTEGRATION

- Disintegration of alkali halide single crystals, polymers and glasses under laser radiation, noting parameters of disintegration region magnitude 18 p3119 A66-34681

## DISK

- SA LUNAR DISK  
 SA PLANETARY DISK  
 SA PLATE  
 SA ROTATING DISK  
 SA ROTOR DISK

- Pulsed pressure wave diffraction by disk at arbitrary angle 03 p0314 A66-12527  
 Amplitude distribution of ultrasonic vibrations of excited disk of barium titanate ceramic polarized perpendicularly to faces 04 p0559 A66-13471  
 Plane-strain and generalized plane-stress analysis of viscoelastic disk by comparing transient thermal stresses in disk and cylinder 04 p0591 A66-14204  
 MHD flow between torsionally oscillating disks in viscous conducting fluid subjected to uniform axial field 09 p1408 A66-20502  
 Stress-strain diagram of alloy and steel disk materials at high rates of straining and characteristic temperatures 12 p1965 A66-24054  
 Stability analysis for steady disk movement over rough horizontal plane, using Liapunov function method 16 p2715 A66-31616  
 Plane contact problem for circular ring and elastic or absolutely rigid disk, using method of successive approximations 18 p3252 A66-33710  
 Stress distribution of notched half-disk with uniform loading of bottom of notch 19 p3474 A66-36303  
 Static nodal patterns associated with normal modes of vibration disappear at large motion amplitudes due to occurrence of traveling wave component 19 p3474 A66-36344  
 Radial flow of incompressible viscous fluid between two parallel disks 20 p3548 A66-37990  
 Pressure distribution in laminar flow between parallel disks, noting inertia effects 21 p3729 A66-39439  
 Partition function for tunnel model of rigid disks evaluated in asymptotic limit of reduced volume, including close-packed value of closed systems area 22 p3949 A66-40913

## DISLOCATION

- SA CRYSTAL DISLOCATION  
 SA DISPLACEMENT  
 SA EDGE DISLOCATION  
 SA SCREW DISLOCATION

- Properties of moving dislocations in unstabilized creep at various temperatures analyzed by kinetic equations in Akulov theory 11 p1784 A66-23323  
 Dislocation problems of circular ring with simple type nonhomogeneity and of isotropic circular ring with thickness varying inversely with square of radial distance 14 p2397 A66-27392  
 Structural dislocation theory and structural distortion vector analysis 15 p2606 A66-28525

## DISPERSION

- SA MAGNETIC DISPERSION  
 SA PLASMA DISPERSION

- Dispersion of estimates of mathematical expectation and dispersion for connected meteorological time series 01 p0096 A66-10753  
 Semiconductor crystals, discussing dispersion property changes due to pulsed ruby laser radiation 05 p0697 A66-15354  
 Motion of particles of dispersed phase at inlet to sampling probe analyzed for application to two-phase medium flow 07 p1031 A66-17417  
 Semiconductor crystals, discussing dispersion property changes due to pulsed ruby laser radiation 09 p1387 A66-20895  
 Dispersion of estimates of mathematical expectation and dispersion for connected meteorological time series 14 p2326 A66-27852  
 Solution to dispersion equation of linearized Boltzmann equation in kinetic theory of rarefied gases, noting root behavior and distribution function

- structure 14 p2278 A66-28285  
 Dispersionless ballistics patterns of weapons analyzed as check on reported computer program 16 p2831 A66-31147  
 Radar return from perfectly reflecting target in presence of second medium, obtaining first approximation for return and accounting for multiple reflections and dispersion 17 p2876 A66-33104  
 Computational method for determination corridors of launch vehicle trajectory and impact dispersions [AIAA PAPER 66-483] 18 p3226 A66-33656  
 Direct measurement of dispersion properties of cadmium sulfide and CdS-CdSe crystals, using Obreilmov-Fresnel diffraction method, growing crystals by synthesis 21 p3799 A66-38926  
 Stability and surface tension of colloidal graphite dispersions in absence and presence of nonelectrolytes 21 p3754 A66-39150  
 Upper ionospheric electron density, electron gyrofrequency, ion density and ion gyrofrequency deduced from whistler-mode waves group index, energy distribution and dispersion curves 22 p3911 A66-39989  
 Optical dispersion and dispersion of birefringence, noting photoelastic methods and stress-strain optical coefficients 22 p3994 A66-40437  
 Ionospheric drift and radio wave dispersion determined from selective fading records and symmetry of cross correlation functions, using Fourier transforms 22 p3916 A66-40807  
 Dispersive device for pulse compression radar, discussing effect of signal departure from desired linear characteristics 23 p4033 A66-41014  
 Pulse compression using diffraction gratings and frequency sweeps of 30 mc in quartz crystal ultrasonic transducer 23 p4034 A66-41017  
 Random dispersive wave intensity detection and measurement in presence of noise 23 p4037 A66-41499  
 Rectangular terminal block in rectangular waveguide and dispersion equation for surface wave propagating along waveguide 23 p4046 A66-41516

## DISPERSION HARDENING

- Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 01 p0087 A66-10749  
 Properties of dispersion-hardened gold, copper and platinum alloys made by chemically and vapor plating metal onto particles of metal oxides 03 p0381 A66-12550  
 Dispersion hardening of titanium carbide by boron doping from critical resolved shear stress measurements 11 p1719 A66-23399  
 Texture and anisotropic age hardening to improve mechanical properties of AlMgSi alloys 14 p2313 A66-27011  
 Heat resistance in air of dispersion hardened nickel alloys containing certain oxides prepared by powder metallurgy methods 18 p3123 A66-33785  
 Deformation resistance and stability dependence of strain-induced distortions in nickel alloys on various aluminum oxide distributions 18 p3124 A66-34983  
 Metallurgical and design characteristics of dispersion strengthened metals as function of temperature [ASME PAPER 66-MD-88] 21 p3750 A66-38505  
 Refractory metals, noting precipitation and dispersion hardening, oxygen, nitrogen and hydrogen effect, machining, coating, etc 21 p3752 A66-39240  
 Cleaning and stabilization method for dispersion strengthened materials produced from mechanically produced blends of metals plus oxide powders 22 p3935 A66-40117  
 Alloy additions of Zr, Ta, Nb, Re, Mo and Hf tendency to interact with thorium oxide particles in tungsten base alloys during exposure to greater than 2000 degrees C 23 p4079 A66-41067

## DISPLACEMENT

## SA DISLOCATION

- Two-dimensional problem of thermoelasticity involving periodic thermal effects, using Parkus thermoelastic displacement potential 01 p0155 A66-10652

Strain-displacement relations for general shell providing standard for approximate theories checking 03 p0442 A66-13305

Self-equilibrating bending of complete circular cylindrical shells described by first harmonic terms of Fourier series for displacement components 12 p1962 A66-24004

Two-dimensional problem of thermoelasticity involving periodic thermal effects, using Parkus thermoelastic displacement potential 12 p1963 A66-24014

Calculating spatial frames by procedures derived from displacement method 14 p2409 A66-28458

Two-dimensional representation of relation between stresses, displacement vector and external load for two elastic equilibrium states 15 p2608 A66-28771

Derivation of basic equations describing stresses, moment stresses and displacement of rods without torsion 15 p2608 A66-28773

Feedback-free Hall effect transducers for mechanical displacement measurement 16 p2709 A66-31578

Reaction forces calculated for system of connected solid bodies of various composition during accomplishment of given motion 20 p3598 A66-36908

Matrix displacement method applied to anisotropic plate and shell theory, including parallelogram and triangular configurations under bending, membrane forces and shear strains 21 p3831 A66-39352

Stress and displacement field of plane heat source moving at constant speed through elastic medium 21 p3837 A66-39447

Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139

Displacement matrix analysis of three-dimensional anisotropic and inhomogeneous elastically deformable bodies represented as tetrahedral assemblies 23 p4146 A66-41989

**DISPLAY**

All-weather landing system for C-141 jet cargo transport using vertical navigation computer for military operations 01 p0101 A66-10035

Satellite position prediction and display /SPAD/ naval equipment that will predict, display and determine selected satellites 02 p0215 A66-11699

Aid to air navigation problem discussing reliability and accuracy, hybrid system, redundancy and credibility, display, operational environment and navigation technique 02 p0256 A66-11966

Landing task and pilot acceptance of displays for landing in reduced weather minimums [AIAA PAPER 65-722] 03 p0328 A66-12579

Cockpit display correction methods used in design of Trident aircraft 03 p0328 A66-12882

Human perceptual mechanism defined by psychological research and applied to aircraft cockpit display design 03 p0329 A66-12883

Head-up display /HUD/ developed for automatic landing in civil aircraft 03 p0329 A66-12884

Optimal control display relationships in general tracking including piloting and radar tracking operation 03 p0329 A66-13349

Fast time modeling technique for simulating predictor display for onboard orbital rendezvous 05 p0626 A66-14617

Six degree of freedom moving base simulator for testing orbital space rendezvous instrumentation 06 p0868 A66-15961

Continuous moving-scene display system for output of airborne mapping sensors such as radars, microwave radiometers and IR scanners 06 p0878 A66-15966

Video densitometer to extract data from video display, specifically densitodiagram 06 p0819 A66-16851

Automatic dynamic chart display, integrating navigation system as well as situation display and link with computer, for monitoring and updating self-contained

system 07 p1067 A66-17690

Charting for dynamic map displays preparatory to SST operations 07 p1068 A66-17705

Building blocks of pictorial navigation display for projection of servo-driven microfilm map onto rear projection screen 07 p1069 A66-17707

SST instrumentation problems, discussing reappraisal of flight deck display requirements 07 p1033 A66-17784

Head-Up Display superimposition of processed primary command or situation information for pilot eye strain reduction 07 p1076 A66-17795

Design criteria and operational performance of Doppler-driven map display device installed on Trident aircraft 07 p1077 A66-17802

Cockpit flight instrument display in integrated navigation system for SST, stressing smooth transition in handling from enroute navigation to terminal-area and approach procedures 07 p1078 A66-17810

CRT control display console models, console selection pointers, computer programming requirements, etc 07 p1003 A66-17879

Image, display and storage tube for scan conversion, digital storage and signal processing 07 p1036 A66-18270

Recognition of target on TV display as affected by target shape-smear and background clutter 08 p1226 A66-19532

Chart display methods of let-down type, roller type and optical projection for aircraft navigation 10 p1554 A66-21897

Computer controlled visual display 11 p1660 A66-22269

General purpose computers and cathode ray tube displays used in automation of air traffic control technical aids 11 p1732 A66-22900

Simulated 3-D display techniques, considering application to television, air-traffic control, scene synthesis, radar target data and signal analysis 11 p1707 A66-22960

Signal and response complexity effect on eighteen hours of visual monitoring digital display boxes 11 p1646 A66-23376

Utilization of magnetic deflection in display systems 12 p1829 A66-23536

Near-real time acquisition of aerial reconnaissance radar imagery from continuously moving and static displays 12 p1808 A66-23921

Added pilot work load imposed by additional commands in compensatory display reduces tracking performance in control of simulated terrain-following aircraft 12 p1808 A66-23922

Experimental testing effectiveness of sensor lines showing linkages between displays and controls 12 p1808 A66-23924

Faster group performance with large shared display indicates facilitating effect on group interaction process 12 p1808 A66-23926

Information assimilation from conspicuity coding of updated alphanumeric information, comparing relative effects of individual and group displays 12 p1809 A66-23927

Magnetic deflection for display systems offers improved design freedom and good frequency response 13 p2047 A66-25362

Charting for dynamic map displays preparatory to SST operations 13 p2125 A66-25869

Information display techniques for man-machine system 14 p2229 A66-26916

Man-machine systems involved in on-line man/ computer interaction, manned space systems, satellite communication and display systems 14 p2230 A66-27820

Schiphol Airport /Amsterdam/ analog computer installation for air traffic control and flight path calculations, with results displayed on automatic flight progress boards 15 p2534 A66-29311

Navigation displays for supersonic transports, discussing inductive reasoning, system performance verification, initial data verification, etc 15 p2535 A66-29625

Intensity display system similar to radar output, showing real time intensity and pattern variations created by solar lamp modules in testing of spacecraft systems in simulation facilities 16 p2680 A66-30497

Flight tests limitations, hi-fi simulation and other navigation display evaluation, detailing discontinuous simulator 16 p2743 A66-30668

Large screen real time projection display technique using Ne-He gas laser 16 p2708 A66-31412

Classification of display systems according to human sense perceptions 16 p2644 A66-31413

Target recognition performance, examining relative effect of size and smear or blur of display 17 p2864 A66-32155

British fixed-base aircraft cockpit simulator experiments, testing pilot performance when relying on windshield display as primary information source 17 p2865 A66-32182

Computer controlled digital display techniques for direct editing of research data 17 p2877 A66-32943

All-weather operations, head-up displays, long range navigational aids - Symposium, International Federation of Air Line Pilots Associations, Rotterdam, October 1965 17 p2951 A66-33198

Head-up display system as aid in bad-weather landing 17 p2951 A66-33199

Head-up display system design for civil aircraft including SST and current subsonic jets 17 p2952 A66-33200

Bendix microvision head-up display system all-weather landing aid 17 p2952 A66-33201

Head-up display systems, discussing state of the art and arguments in favor of their use 17 p2952 A66-33202

Blind landing equipment, discussing type 191 collimator unit tested on Caravelle aircraft 17 p2952 A66-33203

Head-up display used during transition from instrument to visual contact in Category II operations based on pilot sensitivity to movement and peripheral vision 17 p2953 A66-33210

All-weather operations, head up displays, long-range navigational aids - Conference, International Federation of Air Line Pilots Associations, Rotterdam, October 1965 17 p2953 A66-33212

Navigational display types and requirements for civil aircraft 17 p2956 A66-33223

Image related scanning systems for visual simulation display for space rendezvous and docking [AIAA PAPER 65-263] 18 p3093 A66-33788

Short time prediction display applicable to stabilization problems, discussing extrapolation and accelerated time scale methods 18 p3061 A66-33884

Cockpit displays associated with low altitude high-speed flight, emphasizing shift toward designing around man 19 p3287 A66-35508

Multisensor display requirements and approaches, using as example hypothetical two-man advanced tactical aircraft 19 p3396 A66-35512

On-line computer-based aids for investigating effect of sensor data preprocessing and information compression procedures on data transmission bandwidth and reliability 19 p3307 A66-35686

Displays of navigation data showing horizontal situation against moving map, noting use of standard charts, provision for permanent record, etc 19 p3398 A66-36733

Visual displays to aid pilot to fly, monitor and control power plant, navigational and other equipment and communicate with ATC ground stations 20 p3508 A66-36996

Para-Visual Detector, flight director display unit, considered by British European Airways 20 p3595 A66-37005

Mechanical prediction display to improve human behavior in control system 21 p3700 A66-38454

Information display - National Symposium, New York, September 1965 22 p3927 A66-40286

Visual write-erase-nonstore and electrical readout accurate tracking display storage tube operating on principle of secondary electron emission charging of thin film dielectric 22 p3927 A66-40287

Methodology for definition of space vehicle display system based on mission objectives and human factors 22 p3892 A66-40288

Holographic processes, uses and limitations, discussing coherent imaging, holographic

information storage and information display 22 p3918 A66-40292  
 Conductance and capacitance of metal-insulator-semiconductor diodes or any two-terminal complex admittance plotted automatically as function of applied bias 22 p3882 A66-40897  
 Pattern recognition computer operating under automatic control and stored program control for data transfers, system operation, man-machine interface and display operations 23 p4041 A66-41056  
 Head-up aircraft display systems using cathode ray tube 23 p4067 A66-41166  
 Simulator study of computing and displaying velocity in head-up display for low speed flight path control by pole track or velocity vector  
 [ICAS PAPER 66-16] 23 p4089 A66-41257

## DISSOCIATION

SA ELECTROLYSIS  
 SA GAS DISSOCIATION  
 SA MOLECULAR DISSOCIATION  
 SA PHOTODISSOCIATION  
 SA THERMAL DISSOCIATION  
 Experimental viscosity of dissociating system nitrogen tetroxide and nitrogen dioxide, obtaining force constants for Lennard-Jones potential having no effect on viscosity of gas mixture 06 p0823 A66-16635  
 Discrepancy between measured value of N-H bond dissociation energy in hydrazine and value suggested by other chemical evidence 07 p1000 A66-17463  
 Riometric data on ionospheric absorption applied to determination of dissociative recombination coefficient, noting atmospheric ionization by fragment gamma-radiation 22 p3973 A66-40468

## DISTANCE MEASURING EQUIPMENT

Microwave phase-measuring distance-determining system /SHIRAN/ enabling evaluation of slant ranges from airplane to four transponders located at ground control 02 p0227 A66-11378  
 Distance measurement by modulating linearly polarized light with respect to plane of polarization 04 p0546 A66-14393  
 Flight testing of distance measuring equipment for instrument landing system with results shown in histograms 07 p1067 A66-17691  
 Worldwide implementation of DME system feasible by removing unnecessary refinements from ground station design 07 p1068 A66-17696  
 Earth-Moon distance measurement using laser technique 09 p1453 A66-20129  
 Precise airborne geodetic survey system capable of measuring lines up to 900 nautical miles and determining nadir of aerial photographs to 24 ft 10 p1533 A66-22045  
 Measurement of distance to Moon by optical radar, discussing ruby laser/photomultiplier apparatus and procedure 16 p2647 A66-30291  
 Topocentric distance of geodetic satellite GEOS-A measured by laser telemetry from station 16 p2652 A66-30586  
 TACAN and DME navigation systems, discussing ground stations, airborne equipment and guidance 18 p3133 A66-34465  
 Generalized minimum distance decoding that permits likelihood information to be used, yielding same probability of error as maximum likelihood decoding 21 p3703 A66-39137

## DISTANCE PERCEPTION

S DEPTH PERCEPTION  
 S PERSPECTIVE

## DISTORTION

SA DEFORMATION  
 SA FLOW DISTORTION  
 SA SIGNAL DISTORTION  
 SA SURFACE DISTORTION  
 Extension of nonlinear distortion in common-emitter circuit to common-base circuit, cancelling emitter distortion and collector-loading distortion and presenting design chart independent of transistor type for CB circuit 13 p2030 A66-25217  
 Structural dislocation theory and structural distortion vector analysis 15 p2606 A66-28525

## DISTRIBUTION

S AMPLITUDE DISTRIBUTION  
 ANALYZER

S ANGULAR DISTRIBUTION

## DISTRIBUTION FUNCTION

SA CHAPMAN-ENSKOG METHOD  
 Linear oscillations in relativistic Maxwellian plasma, detailing dispersion relations in collisionless cold electron-beam system 01 p0110 A66-10326  
 Uniform shear motion in rarefied monatomic gases in finite space, discussing distribution function of intrinsic molecular velocity 01 p0108 A66-10472  
 Effect of incomplete and inaccurate optical information on particle size distribution function, considering transparency and scattering pattern 01 p0097 A66-10758  
 Inhomogeneity distribution in single crystal semiconductor considering specific resistance and carrier lifetime and using volume gradient photoelectromotive force values 01 p0124 A66-10763  
 Plasma decay by measuring phase variation and signal amplitude with interferometer, determining distribution function and recombination coefficient 01 p0115 A66-11056  
 Electron distribution function of homogeneous Lorentzian plasma calculated by successive approximation method 01 p0115 A66-11077  
 Diagrammatic method to obtain Helmholtz free energy of classical electron gas used to derive pair distribution function beyond Debye-Huckel result 02 p0266 A66-11478  
 Nonlinear equation for distribution function of particles in plasma in electromagnetic field 02 p0267 A66-11729  
 Measurement of one- and two-dimensional distribution functions of stochastic signals, examining single channel analyzers 02 p0230 A66-11811  
 Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 03 p0396 A66-12283  
 Cyclotron instability dependence on nonmonotonic ion distribution function of plasma with cyclotron resonance 03 p0396 A66-12289  
 Equation for singlet distribution function as quantum-mechanical analog of Boltzmann equation 03 p0391 A66-12340  
 Nonlinear oscillations of plasma behind formation front of charged particles 03 p0397 A66-12383  
 Fodor terminal-state problem solved on basis of distribution theory without using heuristic operators 03 p0388 A66-12703  
 Distribution theory used to remove apparent contradictions observed when applying Laplace transform to discontinuous functions 03 p0388 A66-12704

Collisionless electron plasma in uniform field possessing unperturbed distribution function for electrons not considered isotropic in plane of velocity space 03 p0401 A66-12963  
 Free photon path distribution during passage through thick plane-parallel light scattering layer 04 p0541 A66-13416  
 Stability of 3-axis stabilizing platform as function of distribution of gyro units 04 p0518 A66-13568  
 Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 04 p0517 A66-14046  
 Probability density and distribution functions associated with noise and signal plus noise in radar IF, after linear and square law detector, and after these detectors with subsequent video integration 04 p0485 A66-14115  
 High energy electron influence on electron distribution function and effect on spectra of nonthermal galactic and extragalactic radio sources 04 p0575 A66-14171  
 Impact ionization coefficient for electrons and holes in silicon determined from distribution function of hot carriers and shown to be weakly dependent on ionization cross section 04 p0565 A66-14262  
 Structure of solutions of chain of equations for deriving Boltzmann kinetic equation of gases 05 p0663 A66-15344  
 Ion direct heating in nonlinear absorption of transverse waves during scattering on plasma ions, noting equation for ion distribution function 05 p0727 A66-15455  
 Radial distribution function computed for classical particles interacting with Coulomb, shielded Coulomb and truncated Coulomb forces 06 p0908 A66-16120  
 Four conditions permitting fatigue limit obtained by Wohler curve to render consistent distribution function to mean value and deviation 06 p0965 A66-16485  
 Nonlinear stochastic system, determining distribution law for variables 06 p0862 A66-16524  
 Solution to Liouville equation, obtaining expression for singlet distribution function for system under arbitrary perturbation from equilibrium, leading to solution of linear Boltzmann equation 06 p0912 A66-16633  
 Interaction of semiconductor valence electrons with free radiation field 06 p0928 A66-16772  
 Comparison, by stochastic model, of property of distribution of centers of solar activity to form compact groups obeying differential rotation law 06 p0956 A66-17062  
 Distribution function of zeros in harmonic signals relation to frequency characteristic of latter undergoing maximum amplitude limitation 07 p1001 A66-17348  
 Angular moments of lateral-angular distribution functions in electromagnetic cascade theory calculated by method of moments 07 p1116 A66-17561  
 Effects of commensurability with mean motion of Jupiter upon distribution of mean motions of short-periodic comets 07 p1135 A66-17640  
 Phase velocity and growth coefficient of instability of plasma with discontinuous velocity distribution, noting role of ion distribution function 07 p1087 A66-17852  
 Stationary queue length Poisson distribution in single channel service system, considering reliability of device 07 p1003 A66-17862  
 Distribution function of semiconductor minority current carriers in presence of pronounced spatial inhomogeneity occurring in intensively absorbing films with intensive surface recombination 07 p1099 A66-17873  
 Partition function of hydrogen plasma derived classically and by quantum mechanics, obtaining Saha equation containing effective lowering of ionization potential 07 p1090 A66-18155  
 Anisotropy of microwave conductivity and absorption in semiconductors with hot carriers, studying distribution function of electrons 07 p1106 A66-18380  
 Magnetization using Hartree-Fock

approximation in terms of boson distribution for uniformly interacting spins 07 p1084 A66-18441

Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 08 p1265 A66-19375

Simple alternative derivation of conventional cluster expansion formula for matrix elements of identity and Hamiltonian for expectation value of energy of many-Fermion system 08 p1259 A66-19445

Classical statistical mechanics used to obtain expressions for density, distribution functions and other properties of fluid in equilibrium in potential 10 p1521 A66-21172

Distribution patterns of common stars in galactic plane according to spectral type, noting density gradients, main sequence, Hertzsprung-Russell diagram, etc 11 p1766 A66-22254

Inhomogeneity distribution in single crystal semiconductor, considering specific resistance and carrier lifetime by using volume gradient photoelectromotive force values 11 p1748 A66-22274

Solution of two first equations of BBGYK hierarchy, obtaining dielectric constant of plasma by using Guernsey solution, giving two-particles distribution function 11 p1744 A66-22445

Electrostatic waves in uniform plasma without collisions in linear approximation, presenting normal oscillation mode as model for damped and unstable waves 11 p1744 A66-22447

Matrix coefficient expression for film-type distributed-parameter RC circuit with arbitrary number of films and parameter distribution function 11 p1666 A66-22731

Shock structure calculations from kinetic theory, using ellipsoidal distribution function 11 p1690 A66-22912

Shock wave structure in binary gas mixtures that are monatomic and chemically inert, using Mott-Smith method 11 p1691 A66-22914

Discrete ordinate technique for solution of distribution function of linearized Boltzmann equation, with application to Couette flow 11 p1692 A66-22923

Breakdown regime of diffusion-controlled HF resonance gas discharge analyzed kinetically, solving Boltzmann equation for electron distribution function 11 p1740 A66-23081

Lagrangian for particular collisional models in fluid dynamics, considering fluctuation theory relations and stability in presence of external field 12 p1918 A66-23552

Propellant injection distribution effect on transverse modes of liquid rocket engine instability [AIAA PAPER 85-613] 12 p1977 A66-23587

N-dimensional two-sided Laplace transformation and n-dimensional Mellin transformation of distributions 12 p1904 A66-24194

Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 12 p1929 A66-24451

Far field simulation of antennas with complex aperture distribution functions 12 p1840 A66-24624

Granato-Luecke frequency dependent internal friction calculated for pinning point distributions after vibration at dislocation temperature 12 p1971 A66-24922

Correlation functions of amplitude and intensity fluctuation for laser model near threshold obtained by using distribution functions evaluated by Fokker-Planck equation, treating amplitude as random variable 12 p1892 A66-25018

Likelihood detection with multiple Markov process, by expressing statistics in distribution function terms 13 p2019 A66-25060

Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 13 p2139 A66-25335

Nonlinear oscillations of plasma behind formation front of charged

particles 13 p2139 A66-25388

Explicit approximate solution for distribution of constraints along wall of revolution assuming limiting equilibrium and for case of system with discontinuity line 13 p2195 A66-25443

Distribution, as function of azimuth, of static pressure and mass and heat transfer coefficients for case of interaction between detached shock wave on cylinder nose in hypersonic flow and turbulent boundary layer along wall 13 p1991 A66-25464

Plasma stability in magnetic field where disordered energy of particles may be liberated so as to cause collective evolution of plasma, using formalism describing particle diffusion, noting distribution function role 13 p2144 A66-25719

Microwave models of optical resonators, discussing correction of discrepancies resulting from approximations in measurements 13 p2093 A66-26006

Approximate analytical solutions for distributed parameter networks with parameters as functions of spatial variable, using differential equation that reduces boundary value problem to Sturm-Liouville system 13 p2120 A66-26068

Atmospheric distribution profiles of ozone noting formation, elimination, effect on terrestrial heat losses, UV absorption, etc 13 p2073 A66-26318

Equation of state in closed form obtained for gas composed of molecules with Lennard-Jones potential, noting compressibility factor and radial distribution function 13 p2018 A66-26446

Velocity gradient instability for monotone distribution function in guiding center plasma 13 p2154 A66-26670

Necessary conditions for stability of collisionless guiding center plasma, sufficient for stability of equilibrium configurations whose distribution functions are bell shaped 13 p2154 A66-26671

Constant current hot-wire anemometer determination of experimental time-amplitude distribution function of velocity in turbulent boundary layer 13 p2072 A66-26753

Integral equations for radial distribution functions in classical fluid 14 p2273 A66-26828

Particle distribution in low density collisionless plasma in vicinity of moving charged body smaller than Debye radius 14 p2284 A66-27556

Method of constructing particle distribution function for quasi-neutral plasma consisting of electrons and singly charged heavy ions 14 p2344 A66-27648

Estimate of energy dissipation in metals, using continuous distribution of oscillating dislocations joined with Zener thermoelastic effects 14 p2315 A66-27658

Effect of incomplete and inaccurate optical information on particle size distribution function, considering transparency and scattering pattern 14 p2326 A66-27857

Solution to dispersion equation of linearized Boltzmann equation in kinetic theory of rarefied gases, noting root behavior and distribution function structure 14 p2278 A66-28285

Fokker-Planck equation of wave propagation in medium with regular and random inhomogeneities, determining spatial angular distribution function of ray 14 p2245 A66-28474

Pearson universal random distribution generator, noting analysis of randomly chosen variables for unimodal underlying distribution 15 p2526 A66-28808

Exceedance theory application to reliability and quality control problems, noting tolerance limit and life test problem solutions 15 p2508 A66-28809

Instrument methods determining function and density of length distribution of random radio emissions 15 p2451 A66-29123

Rotational distribution function of flowing nitrogen in low density wind tunnel using electron beam fluorescence 15 p2481 A66-29737

Rotational energy distribution through shock waves in nitrogen measured, using electron beam fluorescence 15 p2481 A66-29738

Boltzmann equation for Pitot tube problem, using distribution function, deriving equations for rarefied gas flow in impact tube under hypersonic and adiabatic conditions 15 p2481 A66-29739

Magnetic effects on diffusion of ferromagnetic colloidal particles dispersed in current-carrying fluid medium, noting force effects on relaxation process 15 p2556 A66-29809

Structure of solutions of chain of equations for deriving Boltzmann kinetic equation of gases 15 p2482 A66-29972

Velocity distribution function of helium atom measured, using Doppler profile of helium line 16 p2701 A66-30377

Improved Monte Carlo method for calculating steady state monatomic rarefied-gas flows, using computer for calculating possibility of collision in given geometrical cell 16 p2753 A66-30787

Nonlinear stochastic system, determining distribution law for variables 16 p2670 A66-30834

Iterative solution to Krook-Boltzmann kinetic equation noting Navier-Stokes numerical solution, computation and analysis of distribution function within shock wave 16 p2685 A66-30945

Quasi-linear approximation of Cerenkov and cyclotron damping of electromagnetic waves in magnetoactive plasma, considering collisions of wave-absorbing resonance particles with plasma 16 p2762 A66-31173

Instability of nonlinear stationary oscillations of potential in electron-ion flows useful in distribution functions of ions and electrons 16 p2754 A66-31174

Secondary electron interaction with solid state plasma, noting energy distribution, Boltzmann equation solution, etc 16 p2789 A66-31783

Nonlinear effects in homogeneous Lorentz plasma, calculating anisotropies of electron distribution function 17 p2963 A66-31842

Lumped inertia force method for obtaining mode shape and corresponding natural frequencies 17 p3023 A66-32078

Statistical characteristics of fluctuations in radio emission of atmosphere producing turbulent pulsations and displacements of hydrometeorological formations in scan field of radiotelescope, noting distribution function 17 p2917 A66-32212

Plasma wave quasi-linear theory, noting nonlinear effect treatment via distribution function, electric field, Fourier component decay, etc 17 p2966 A66-32422

HF flute unstable oscillations occurring when low temperature plasma is added to high temperature one, finding frequency and growth rate are of order of cyclotron harmonic frequency 17 p2966 A66-32423

Convective excitation of ionic oscillations in plasma by inhomogeneous electron beam as result of spatial gradient of distribution function 17 p2968 A66-32537

Successive approximation solution to integral kinetic equation and corrections to moments of distribution function for viscous and rarefied gases 17 p2909 A66-32585

Distribution function, harmonic and statistical linearization methods applied to study forced oscillations in nonlinear oscillatory system 17 p2959 A66-32801

Distribution function and electron mobility in polar semiconductors for nonparabolic dispersion law 17 p2986 A66-33305

Nonlinear generation of combination frequencies due to strong uniform parallel electric fields in homogeneous plasma 18 p3142 A66-33918

Steady state distribution functions for photoexcited carriers in semiconductors bands determined by competition between intraband intercarrier collisions and recombination processes 18 p3154 A66-33919

Electrostatic stability of fully ionized non-Maxwellian electron-ion plasma 18 p3142 A66-33953

Kinetic equations, considering free and bound charges in weakly ionized hydrogen plasma, noting self-consistent approximation for second distribution function 18 p3146 A66-34177

Longitude dependence of distribution function of electrons for fixed value of

McIlwain parameter, using kinetic equation 18 p3197 A66-34873

Latitude distributions obtained for nucleonic and neutron components of cosmic radiation during flights from South Africa, compared with Northern Hemisphere distributions 18 p3197 A66-34878

Numerical calculations of lateral distribution, energy spectrum and heights of origin of muons in extensive air showers 18 p3211 A66-35135

Multiplicity distribution of secondary particles in photonuclear interactions of mesons, analyzing effect of intranuclear cascade 18 p3221 A66-35203

Interaction of semiconductor valence electrons with free radiation field 19 p3434 A66-35369

Silicon field effect device with AC/DC fields superimposed on gate terminals analyzed for determination of distribution of defect introduction rate with depth, especially near threshold energies 19 p3435 A66-35413

Semiconductor cyclotron resonance during application of constant electric field, determining carrier distribution function 19 p3437 A66-35460

Plateau formation mechanism for electron velocity distribution function during damping of monochromatic plasma waves 19 p3406 A66-35737

Solution of Boltzmann and rate equations for electron distribution function and state populations in nonequilibrium MHD plasmas 19 p3406 A66-35801

Exact solution of nonlinear relativistic equations of motion for electron in right circularly polarized wave propagating in whistler mode parallel to external magnetic field 19 p3303 A66-35998

Structure of hydromagnetic shockfront wherein electrostatic turbulence continuously develops, analyzed to aim at orders of magnitude for front width, electron and ion heating and magnitude of fluctuation excitation 19 p3408 A66-36278

Dipole scattering of electrons in germanium and silicon whose conduction-band structure is described by many-valley model, using distribution function and computing relaxation-time ratio 19 p3446 A66-36393

Stability of confined plasma in mirror machine depending on proper coordination of magnetic field geometry with particle distribution function 19 p3422 A66-36548

Residual gas analyzer determining qualitative distribution of gases in ultrahigh vacuums by using mass spectrometer for spatial simulation 19 p3360 A66-36614

Electron velocity distribution function in nonequilibrium plasma having spatial distribution governed by electron-electron and inelastic collisions 20 p3606 A66-36974

Distribution function for probability density of random process at output of multiplier acted upon by envelopes consisting of Gaussian noise and pulse signal 20 p3515 A66-37380

Electron energy distribution function obtained by Druyvesteyn analysis in low-current positive column neon discharge compared with theoretical distribution function 20 p3608 A66-37463

Magnetic field effect on energy distribution and slowing-down times of nonequilibrium carriers in semiconductors when excitation source creates electron-hole pairs 20 p3619 A66-37683

Statistical properties of amplitude and phase of output signal of electron beam quadrupole amplifier with superposition of regular signal plus Gaussian noise at input 20 p3519 A66-37997

Magnetic field, microscopic particle distribution function, plasma instabilities and wave-particle interactions of solar wind 20 p3632 A66-38061

Cloud and fog droplet spectra rearrangement due to external conditions calculated from distribution function of water content 20 p3594 A66-38374

Velocity distribution function of plasma in high intensity perturbation field, noting linear response for weak interaction and long wavelengths, connection formulae and

absorption of electromagnetic waves 21 p3777 A66-38760

Fokker-Planck equation applied to laser under influence of quantum fluctuations connected with dissipation, pumping and cavity thermal noise, noting distribution and correlation function 21 p3746 A66-38930

Solution to chain of kinetic gas equations, showing effect of fast reversible and slow irreversible processes on particle distribution function 21 p3771 A66-39248

Radar detection probability in presence of unknown parameters, covering pulse-to-pulse, partial and fully coherent cases 21 p3707 A66-39639

Nonsupervised sequential pattern recognition and classification, analyzing Bayes solution 21 p3720 A66-39640

Run-length encodings, determining explicit form of Huffman coding when applied to geometric distribution 21 p3758 A66-39643

Absolute stability of distributed control system with nonlinear elements of backlash type analyzed by distributed parameters method 22 p3883 A66-39660

Stabilization of drift instability in traps with magnetic field increasing toward plasma boundary, taking into account Taylor instabilities 22 p3952 A66-39712

Replacement of Poisson by Polya distribution in calculating laser intensity threshold necessary to induce ionization breakdown in gases 22 p3929 A66-39715

Field intensities and electron distribution functions in hollow cathode, graphs show potential distribution along cathode axis 22 p3953 A66-39758

Particle growth in rocket nozzle, particle size distribution, effect of channeling, determining increase of mass-median diameter of distribution 22 p3971 A66-40364

Randomly sampled random processes, discussing sampling time statistics and stationary point processes 22 p3885 A66-40869

Matrix coefficient expression for film type distributed parameter RC circuit with arbitrary number of films and parameter distribution function 23 p4045 A66-41469

Electrostatic probe in collisionless plasma wherein sheath joins region of ambipolar diffusion 23 p4104 A66-41494

Quasi-linear approximation for turbulent plasma obtained via Wiener-Hermite functional expansion for electric field and distribution function 23 p4104 A66-41504

Equilibrium distribution function of particles in phase space applicable to collisionless rarefied plasma confined by magnetic mirror, using first integrals of motion 24 p4242 A66-42399

## DISTURBANCE

## DISTURBANCE THEORY

Asymptotic solution of disturbance at large distance from source placed in flow of conducting compressible fluid in applied magnetic field 05 p0723 A66-15052

Periodic motions of simple pendulum excited by horizontal periodic disturbance 07 p1081 A66-18043

Small gap equations for Couette flow stability considering nonaxisymmetric disturbances, solving eigenvalue problem and noting role in instability of Taylor vortices 12 p1866 A66-24946

Evolution of plane switch-on and switch-off shocks in gas of finite electrical conductivity in presence of small nonlinear disturbances 12 p1866 A66-24950

Disturbance propagation in baroclinic atmosphere in presence of radiation and turbulent heat conduction 14 p2325 A66-27535

Effect of single or periodic disturbances on intermittency in pipe flow at various Reynolds numbers, noting relation of disturbance input frequency to output frequency of turbulent slugs 16 p2688 A66-31394

Bjerhammar gravimetric boundary value problem with gravity reduction defined by integral equation 19 p3345 A66-35393

Optimal control of time-varying linear systems subject to additive noises and load disturbances, based on exact plant equations 19 p3325 A66-35877

Multifactor Max-Rankine optimization technique evaluated from point of system performance, minimum mean square error, intrasystem interactions, etc 19 p3325 A66-35878

Steepest descent method extended to trajectory optimization problem for stochastically disturbed systems with application to Euler equation for white noise problem of reentering vehicle 19 p3388 A66-35879

Parameter optimization using steepest descent approximation for systems subject to worst bounded disturbance in order to provide performance index minimization 19 p3337 A66-36713

Wiener filtering theory for stationary ergodic inputs with known spectral densities and optimal control transfer functions of random-input nonlinear saturating systems with random unwanted disturbances 20 p3536 A66-36859

Parameter adaptation theory of quick-response self-adapting systems subject to parametric disturbance 20 p3536 A66-36884

Parabolic equations applied to nonlinear thermoconductivity and filtration, describing propagation of plane wave 24 p4230 A66-42219

Disturbance propagation in baroclinic atmosphere in presence of radiation and turbulent heat conduction 24 p2325 A66-42321

Chain code method of eliminating LF drift disturbance error in calculation of impulse-response function of time-invariant system 24 p4187 A66-42368

## DISTURBING FUNCTION

Disturbing function for satellite close to Earth or in resonance with Earth rotation 05 p0758 A66-14803

Resonance effects for satellites with nominally constant ground track 06 p0952 A66-15906

Soviet book on geodetic gravimetry including disturbing potential calculation methods based on Molodenskii integral equation 14 p2288 A66-28209

Digital computer techniques for computation of lunar disturbing function 24 p4273 A66-42204

## DIURESIS

Lower body negative pressure used to restore hydration after recumbency diuresis following bed rest 06 p0813 A66-16823

Combination of renal vasodilation and angiotensin infusion effect large changes in renal hemodynamics, excretion and reabsorption of sodium in anesthetized hypotensive dogs 20 p3507 A66-37607

## DIURETICS

Antidiuretic effect of positive Gz gradient acceleration 17 p2855 A66-32137

## DIURNAL RHYTHM

## S CIRCADIAN RHYTHM

## DIURNAL VARIATION

Auroral zone absorption, reporting periodic variation of sporadic E layer in Antarctica, considering magnetospheric time-of-flight spectrometer effect 01 p0061 A66-10497

Data from ion energy spectrometer mounted on Ariel I satellite indicating increased concentration of oxygen ions during afternoon at high altitudes 01 p0061 A66-10498

Electron concentration-distribution data for ten quiet days during spring 1958 in F-2 layer 01 p0063 A66-11027

Diurnal velocity variations of ionospheric wind in auroral zones and disturbance daily solar variation 01 p0064 A66-11161

Correlation of hydrogen emission and oxygen line in diffusive auroras and sporadic E layer 01 p0064 A66-11162

Relative position of solar disturbance daily variations mean flux system compared with auroral region of same period 01 p0065 A66-11169

Solar disturbance daily variations and behavior of horizontal perturbation vector based on magnetic observations at Soviet high latitude stations 01 p0065 A66-11170

Diurnal and seasonal variations in refractive index of atmosphere near Earth surface based on meteorological station data

- in Transbaikalian region 02 p0253 A66-11275
- Stellar-diurnal variation of cosmic rays during period 1958 through 1960, on basis of meson-activity data recorder by two crossed counter telescopes 02 p0281 A66-11335
- Lunar-diurnal variation of cosmic ray intensity based on observations of neutron and meson component 02 p0281 A66-11336
- Atmospheric source of diurnal variation of cosmic radiation whose properties undergo substantial variation 02 p0281 A66-11337
- Diurnal and nocturnal variations in cosmic radiation intensity during period of maximum solar activity 02 p0282 A66-11340
- Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 02 p0224 A66-12118
- Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray intensity 02 p0284 A66-12129
- Relation between irregular variations in magnetic field intensity with sporadic E region containing current system responsible for quiet solar diurnal variation 02 p0225 A66-12140
- Controlling instabilities in numerical representation of diurnal and geographic variation of ionospheric data 03 p0361 A66-12501
- Magnetic activity effect on F-2 region drifts and variation with time at low latitude station 03 p0361 A66-12633
- Upper limiting rigidity of solar diurnal variation of cosmic ray primaries in free space determined by neutron monitors at sea level and meson telescopes 03 p0423 A66-13178
- Geomagnetic relationship of daily variation of cosmic ray neutron intensity corrected for barometric pressure variation at various ground stations 03 p0423 A66-13360
- Sporadic E layer characteristics over Sofia and diurnal and seasonal variations in maximum and reflection frequencies 04 p0514 A66-13447
- Harmonic analysis of solar diurnal and semidiurnal variations of wind, pressure and temperature in stratosphere, comparing observed and wind-derived heights and temperature 04 p0515 A66-13672
- Diurnal solar variation in cosmic ray meson intensity recorded in southerly and northerly directions at high altitudes 04 p0574 A66-13840
- Comparison of diurnal variations of ionization level in F region at geographically and geomagnetically conjugate stations in Arctic and Antarctic 04 p0516 A66-13851
- Quiet diurnal solar variations and relation to ionospheric parameters 04 p0516 A66-13852
- Current system of solar disturbed diurnal variations of magnetic field at high latitudes in terms of dynamo theory, taking into account forward and Hall conductivities 04 p0516 A66-13854
- Diurnal variation of cosmic radiation of intermediate energies measured at Earth attributed to particle removal due to scattering by magnetic irregularities 04 p0575 A66-14181
- Thermal maps of Murray about Venus atmosphere statistically analyzed into solar effects, latitude variations and limb darkening 04 p0579 A66-14450
- F-layer behavior over Genoa-Monte Capellino noting diurnal and seasonal variation, solar activity, nighttime concentration, spread-F, ionospheric and geomagnetic perturbations 05 p0671 A66-14982
- Increased diurnal amplitude in density of thermosphere between 200 and 300 km for decreasing solar activity 05 p0671 A66-15019
- Day-to-day variability of terrestrial magnetic daily variation, establishing morphology of different types 05 p0673 A66-15042
- Airborne ionospheric probes on both sides of magnetic equator at low African latitudes during equinoctial and solstice periods, obtaining daily behavior of F layer 05 p0674 A66-15113
- Cosmic ray 27-day variations using periodograms, with measured data processed continuously from 1957 to 1964 05 p0753 A66-15393
- Stellar diurnal variation determined during reduced solar activity from crossed-telescope and neutron monitor data 05 p0754 A66-15396
- 27-day changes in solar diurnal variation from 1957 to 1958 based on neutron component data, noting modulation of cosmic ray anisotropy 05 p0754 A66-15402
- Least squares method to determine diurnal lunar tide fluctuations from observations of Pulkovo, Greenwich and Tokyo Time Services 06 p0954 A66-16426
- Azimuthal measurements of cosmic ray variations at Yakutsk, U.S.S.R. 06 p0949 A66-16584
- Soviet and other literature on diurnal variations of cosmic ray intensity used for analysis of electromagnetic conditions in outer space 06 p0949 A66-16587
- Cosmic ray intensity and geomagnetic field changes induced by electric current systems excited in ionosphere, noting seasonal changes in diurnal variations 06 p0950 A66-16596
- Spherical harmonic analysis of diurnal surface pressure oscillation indicates that it can be represented by wave traveling westward with Sun 07 p1027 A66-17224
- Solar modulation and geomagnetic effects on cosmic rays, noting daily variation and rigidity spectrum 07 p1122 A66-17990
- Intensity variations and effective primary spectrum for mesons observed at approximate 40 mwe underground at Hobart, Tasmania, Australia 07 p1122 A66-17991
- Cosmic ray modulation by interplanetary magnetic field indicated by dependence of secular, 27-day and diurnal variations on solar activity 07 p1124 A66-17999
- Frequency distributions of characteristics of daily variation of cosmic ray intensity with solar activity from 1958 to 1962 07 p1125 A66-18006
- Phase shift and amplitude computation for cosmic ray diurnal oscillation, using autocorrelation analysis methods 07 p1126 A66-18007
- Atmospheric diurnal variation investigated, using temperature controlled high-counting neutron and meson monitors 07 p1126 A66-18008
- Fluctuation of ratio of yearly average amplitudes of meson-to-neutron diurnal variation owing to variability of energy dependence of cosmic ray anisotropy 07 p1126 A66-18009
- Cosmic ray meson intensity diurnal variations measured, using neutron monitor and Geiger counter telescope 07 p1126 A66-18010
- Periodical and quasi-periodical cosmic ray variation according to data of worldwide network of stations, using crossed telescope 07 p1127 A66-18013
- Diurnal intensity time variation of cosmic ray neutrons compared with relative number of sunspots observed 07 p1127 A66-18014
- Cosmic ray diurnal variation near geomagnetic poles measured over declining phase of solar cycle, using neutron monitor data 07 p1127 A66-18015
- Temperature changes in entire atmosphere and effect on diurnal variation of meson component of cosmic rays 07 p1129 A66-18025
- Day-to-day changes in energy spectrum of daily variation of cosmic ray intensity at middle latitude and equator for IGY 07 p1131 A66-18236
- Spherical harmonic analysis of diurnal surface pressure oscillation 08 p1246 A66-18800
- Diurnal and semidiurnal variation of cosmic ray intensity investigated with aid of selective frequency filters 08 p1283 A66-19021
- Sporadic E layer at middle and low latitudes and relation to solar quiet daily variations in ionosphere 08 p1213 A66-19027
- Space-time distribution of perturbed solar diurnal variation at high latitudes during IGY 08 p1214 A66-19033
- Scintillation observations of satellite signals noting latitude, diurnal, seasonal and sunspot cycle variations 08 p1183 A66-19208
- Diurnal variations of strength and polarization of VHF signals from synchronous Early Bird satellite 08 p1185 A66-19537
- Solar diurnal and semidiurnal variations in neutron component of cosmic rays obtained from worldwide network from 1959 to 1962 08 p1285 A66-19775
- Harmonic analysis of diurnal changes in critical frequencies of F-2 layer as function of season and solar activity 08 p1285 A66-19777
- Spatial and time variations in ionospheric absorption at long wavelengths for small elevations of Sun and at nighttime 08 p1220 A66-19778
- Earth daily diurnal rotation rate variation, assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 08 p1220 A66-19787
- Solar diurnal variation data used to determine parameters of phase-amplitude modulation of periodic cosmic-ray variations 08 p1286 A66-19788
- Graph for system of currents of solar diurnal variation during IGY winter season, considering night and evening vorticity individually and using coordinate system 08 p1221 A66-19797
- Spectra of solar, diurnal and secular variations, relation to modulation of cosmic rays by interplanetary magnetic field 09 p1433 A66-20216
- Effect of atmospheric temperature changes on diurnal variation of meson component, using temperature coefficient and crossed telescopes methods 09 p1439 A66-20219
- Latitude variation of second harmonic of diurnal variation of cosmic rays, considering curvature of particle trajectories in geomagnetic field 09 p1439 A66-20222
- Diurnal variation of aurora zone geophysical disturbances, examining VLF phenomena including noise, aurora and ionospheric absorption 09 p1372 A66-20375
- Geomagnetic diurnal-variation in north polar region with corrected geomagnetic latitude 09 p1373 A66-20385
- Sidereal component of diurnal variation of cosmic ray intensity 09 p1442 A66-20461
- Diurnal variation of zodiacal light at north celestial pole measured at 5300 angstroms 09 p1374 A66-20891
- Energy spectrum of auroral zone X-rays, noting electron precipitation and diurnal pattern for occurrence of bremsstrahlung 10 p1599 A66-21145
- Integrated electron content of ionosphere determined from measurements of polarization angle received from Syncom III transmissions, presenting mean diurnal variation 10 p1528 A66-21148
- Harris and Priester model used to compute amplitude of diurnally varying component of horizontal pressure acceleration, showing increase with altitude 10 p1529 A66-21150
- Diurnal properties of horizontal geomagnetic micropulsation field in New Zealand, noting variation of period, field rotation and direction of oscillating vector 10 p1529 A66-21152
- Longitudinal asymmetry of trapped energetic electron intensities attributed to lowering of mirror points in South African anomaly 10 p1599 A66-21160
- Diurnal changes in total ionospheric electron content measured, using Randle Cliff antenna 10 p1530 A66-21162
- Diurnal variation of outer radiation belt of energetic trapped electrons and relationship to magnetic activity 10 p1600 A66-21163
- Variation of IR emission from Mars surface with Mars local time in terms of diurnal temperature variations, including atmosphere effect, results suggest low thermoconductivity 10 p1604 A66-21201
- Dependence of extent of noon bite-out on geographic and magnetic coordinates on worldwide basis, noting variation of distortion parameter for diurnal variation of F-2 layer 10 p1533 A66-22061
- Correlation coefficients for daily ranges of horizontal component of quiet day diurnal magnetic variation 11 p1695 A66-22370
- Noncyclic variation during magnetically quiet days, examining seasonal changes in geomagnetic field value at night during IGY 11 p1696 A66-22420
- Geographic distribution of solar daily variations of magnetic field during quiet days determined by coordinate

system 11 p1696 A66-22421

Solar diurnal and semidiurnal variations during Forbush decreases based on neutron recordings, noting near and distant source 11 p1762 A66-22427

Ozone photochemistry in atmosphere containing hydrogen, calculating equilibrium vertical distribution, rate of formation of hydroxyl, diurnal variation, etc 11 p1700 A66-23138

Upper atmospheric diurnal tide determined via sodium vapor trail measurements 11 p1701 A66-23146

Existence of significant latitudinal variation in density from 200 to 800 km 12 p1868 A66-23556

Cosmic ray variations analysis based on IGY and IGC data, discussing diurnal variations, cosmic ray burst, Forbush effect and existence of interplanetary magnetic field and of solar magnetic traps 12 p1940 A66-24161

Cosmic ray variations and solar corpuscular stream in interplanetary space during March 1958 magnetic storm 12 p1940 A66-24164

Stellar-diurnal variations in cosmic ray intensity, recording vertically falling particles with telescope and cross telescope 12 p1942 A66-24175

Anisotropy of weak cosmic ray bursts studied by examining diurnal variations for days with increased solar flare activity 12 p1942 A66-24178

Solar-diurnal cosmic-ray variations analyzed, showing that averaging observational data over worldwide network of stations leads to large errors 12 p1943 A66-24183

Corrections of sight-line velocities for Earth diurnal rotation and annual revolution in observations of Sun 12 p1949 A66-24246

Diurnal and seasonal altitude variations of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration 12 p1869 A66-24269

Fluctuations in diurnal variations of ionization of F-2 layer interfering with radio wave propagation determined by series expansion 12 p1869 A66-24270

Longitudinal variations of various characteristics of F-1 layer compared for periods of high and low solar activity 12 p1869 A66-24271

Vertical measurement of ionospheric absorption at continuously varying frequency, showing diurnal variation of absorption 12 p1870 A66-24289

Statistical-probability determination of lunar-solar daily and seasonal magnetic variations and geomagnetic effects 12 p1951 A66-24463

Contour maps of diurnal changes in magnetic elements provided by observatory tabulations of mean hourly values of mean monthly days 12 p1873 A66-24836

Lunar tidal effect on daily and monthly variation of polarized sky light 12 p1874 A66-24844

Mars atmosphere and ionosphere analyzed by measuring effect on radio occultation of planet, determining shape, atmosphere density profile, diurnal variations, etc 13 p2178 A66-25235

Meteorological rocket wind observations, noting diurnal oscillations and tidal characteristics 13 p2122 A66-26131

Solar radio observation at 600 mc frequency during 1961 at French station, noting flux density and solar daily variation 13 p2188 A66-26322

Correlation between amplitudes and phase angles of first two harmonics of monthly mean Sq and solar activity for period 1905-1960 14 p2376 A66-27395

Diurnal variation of average energy spectrum of auroral X-rays observed from balloon flights, assessing effect of atmospheric absorption 14 p2376 A66-27614

Density variation observed from satellites in upper atmosphere 14 p2284 A66-27619

Quiet solar diurnal variations of geomagnetic field at middle and low latitudes during IGY to determine coordinate system and equatorial electrojet 14 p2286 A66-28077

Autocorrelation functions of random processes, determining parameters and amplitude of diurnal variations in cosmic ray

intensity 14 p2377 A66-28086

Relation between irregular variations in magnetic field intensity with sporadic E region containing current system responsible for quiet solar diurnal variation 14 p2287 A66-28096

Measuring devices and observational methodology used in determining time variant and cyclic variations in cosmic ray occurrence 15 p2573 A66-28518

Solar system geometric effect in diurnal, annual and semiannual cosmic ray variations 15 p2575 A66-29082

Diurnal and seasonal variations of sporadic layer in auroral zone 15 p2487 A66-29098

Shape and location of diurnal bulge in upper atmosphere, analyzing density and temperature distribution at high latitude from satellite drag data 15 p2490 A66-29821

Winter anomaly of nondeviative ionospheric absorption of radio waves and relation to diurnal, seasonal, local and solar cycle variations 15 p2490 A66-29943

Diurnal and semidiurnal oscillations in atmospheric density, temperature, pressure and wind in subtropical Southern Hemisphere 15 p2491 A66-29964

Free sodium atom distribution in upper atmosphere related to diurnal and nocturnal variation 15 p2491 A66-30018

Rocket measurement of diurnal variation of ozone profiles above maximum concentration level 15 p2495 A66-30058

Lower atmospheric diurnal variations in air temperature, directional wind velocity and gradients during clear anticyclonic weather 16 p2742 A66-30774

Diurnal oscillation in zonal and meridional winds determined, using harmonic analysis on data obtained from meteorological rocket soundings 16 p2699 A66-31641

27-day cycle in diurnal variation of amplitude of meson component of cosmic radiation based on 20 years observation 16 p2795 A66-31692

Equatorial ionospheric drifts observed at Ibadan, Nigeria, during solar activity minimum, and relation to diurnal variation of sunspot cycle and drift velocity variations in E and F region 16 p2700 A66-31759

4-second summertime micropulsation band at College, Alaska 17 p2918 A66-32526

Diurnal variation of hydrogen atom concentration at base of exosphere, including effects of lateral flow of gas around Earth 17 p2919 A66-32996

Ionospheric electron content determined from satellite measurements, noting seasonal and diurnal variation of content and utilization of Faraday fading for measurements 17 p2920 A66-33069

Seasonal width and current intensity of equatorial electrojet at different longitudinal zones noting diurnal variations, electrojet parameters, etc 17 p2922 A66-33352

Lunar semidiurnal tides in ionosphere over Puerto Rico determined from electron density profiles for heights between 150 and 300 km 17 p2923 A66-33362

Atmospheric contribution to diurnal variation of cosmic ray meson intensity at Deep River, Canada 17 p2994 A66-33429

Contribution to dependence of variation of unperturbed ionospheric F-2 critical frequencies on season and solar activity 18 p3105 A66-34097

Vertical and horizontal structure of negative eigenvalue modes of diurnal atmospheric oscillation 18 p3107 A66-34524

Cosmic radiation, interplanetary magnetic field, solar proton propagation long-term /solar cycle/ modulation of intensity, Forbush effect and daily intensity variation 18 p3175 A66-34741

Sidereal time variation of cosmic rays explained by diffusion in galactic arm for colinear magnetic field and proximity of solar system 18 p3178 A66-34762

Solar and sidereal daily variations of cosmic ray intensity at depth of 60 mwe underground in London 18 p3178 A66-34763

Two-way sidereal anisotropy vs seasonal modulation of solar daily variation 18 p3178 A66-34764

Isolation of sidereal-diurnal variations in cosmic ray intensity 18 p3179 A66-34765

Diurnal component of solar daily variation recorded at low latitude station by east and

west pointing telescopes during periods of maximum and minimum solar activity 18 p3181 A66-34777

Cosmic ray anisotropy induced by solar wind and magnetic field irregularities 18 p3181 A66-34779

Solar diurnal variation of cosmic ray intensity and anisotropy in interplanetary space 18 p3181 A66-34781

Semidiurnal anisotropy of cosmic radiation observed from neutron monitor data treated by numerical filter techniques 18 p3182 A66-34783

Diurnal variation of cosmic radiation in Axford-Parker model of diurnal anisotropy, noting amplitude discrepancy with prediction 18 p3182 A66-34784

Diurnal variations of cosmic ray intensity by correlating phase difference and amplitude ratio of Zugspitze and Norikura neutron monitors 18 p3182 A66-34785

Local time of maximum in diurnal variation of cosmic ray neutron intensity and relative sunspot number 18 p3182 A66-34786

Solar-diurnal and semidiurnal variation in cosmic ray neutron component during last cycle of solar activity from 1957 to 1965 18 p3182 A66-34787

Parameters of solar diurnal variation determined from neutron monitor data from 1957 to 1958 18 p3183 A66-34788

Solar diurnal variation of nucleonic component of cosmic radiation from 1957 to 1962 18 p3183 A66-34789

27-day modulation of solar diurnal variation of cosmic ray neutron component 18 p3183 A66-34790

Spherical harmonic analysis to obtain latitude dependence of diurnal variations and changes with time during Forbush decrease 18 p3183 A66-34792

Convolution product theory applied to smoothing neutron monitor data of daily variations in cosmic ray intensity 18 p3186 A66-34808

First-order cosmic ray modulation, namely production by Sun, diurnal anisotropy, 11-yr cycle and Forbush decrease effect 18 p3186 A66-34810

Daily correction of meson diurnal variation for ground-level air temperature and barometric pressure effects 18 p3195 A66-34863

Energy spectrum of cosmic ray diurnal variation determined from IGY neutron monitor data by introducing upper energy cut-off parameter 18 p3195 A66-34864

Daily variations of cosmic ray distribution, examining effect of geomagnetic field, aperture, orientation and geographical position of counters 18 p3195 A66-34865

Simultaneous amplitude-phase modulation of periodic cosmic ray variations, examining properties of satellites produced by these variations for case of true waves 18 p3196 A66-34867

Effect of geomagnetic cavity field on cosmic ray threshold rigidity, using model of cavity field, finding cavity shape produces amplitude in diurnal variation of cosmic ray intensity 18 p3198 A66-34882

Solar radio activity in 1963, discussing daily flux density, mean variations, etc 19 p3458 A66-35467

Energy spectrum of auroral X-rays in range from 20 to 150 kev according to balloon measurements show remarkable diurnal variation 19 p3452 A66-35563

Turbulence coefficient and mean altitude of atmospheric boundary layer determined from diurnal temperature variations and wind profile 19 p3348 A66-35939

Ionospheric absorption measurement by A3 method in which field strength of distant CW transmitter is continuously recorded 19 p3351 A66-36359

Low and medium frequency absorption measurements at steep ionospheric incidence for demonstrating diurnal, annual and sunspot cycle changes in lower ionosphere 19 p3351 A66-36360

Diurnal and latitudinal variations in 6300 angstrom nightglow intensity determined along Pacific coast of South America, noting relation between location of antisolar point and equatorial midnight enhancement 19 p3352 A66-36628

CIRA 1965, COSPAR International Reference Atmosphere covering mean atmospheric structure variations from 30 to 100 km and from 120 to 800 km 19 p3352 A66-36796

Diurnal cosmic-ray anisotropy in studying temporal independence of small scale irregularities in interplanetary magnetic field 20 p3630 A66-37302

Meteorological rocket measurements of diurnal oscillations of pressure and density in upper stratosphere and lower mesosphere 20 p3551 A66-37515

Sidereal diurnal variation of high-energy cosmic radiation, noting parameters of anisotropy coefficient, cosmic ray source distribution and air shower measurements 20 p3631 A66-37851

Dynamical effects of liquid nucleus of Earth in diurnal terrestrial tides 20 p3553 A66-38068

Statistical analysis of diurnal variation in southern boundary of aurora, HF backscatter records and geomagnetic latitude of dayside aurora 20 p3553 A66-38193

Statistical analysis of storm-time variation and daily disturbance variation in geomagnetic storms 20 p3658 A66-38230

High energy trapped electrons in outer zone for 27-day, diurnal and storm time variations 20 p3639 A66-38317

Costing of parallel route systems for supersonic traffic, examining diurnal traffic patterns, sensitivities to fuel requirements, sonic bang avoidance and layout of track systems 21 p3761 A66-38453

Solar diurnal and semidiurnal variations in neutron component of cosmic rays obtained from worldwide network from 1959 to 1962 21 p3809 A66-38771

Harmonic analysis of diurnal changes in critical frequencies of F-2 layer as function of season and solar activity 21 p3809 A66-38773

Spatial and time variations in ionospheric absorption at long wavelengths for small elevations of Sun and at nighttime 21 p3732 A66-38774

Earth daily diurnal rotation rate variation, assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 21 p3733 A66-38783

Solar diurnal variation data used to determine parameters of phase-amplitude modulation of periodic cosmic-ray variations 21 p3809 A66-38784

Graph for system of currents of solar diurnal variation during IGY winter season, considering night and evening vorticity individually, using coordinate system 21 p3733 A66-38793

Winter variability of electron number density and collision frequency in lower ionosphere measured, using partial reflection method 22 p3906 A66-39950

Seasonal, diurnal and latitudinal variations of electron density distributions in topside of ionosphere as revealed by Alouette I satellite 22 p3909 A66-39974

Diurnal variation in electron densities and temperatures in F region above Puerto-Rico, using backscatter measurements 22 p3910 A66-39978

Latitudinal and diurnal variations of ionospheric electron content near auroral zone in winter from Faraday rotation data 22 p3911 A66-39985

Dependence of diurnal cosmic ray variations on angle which is proportional to shortest distance from Earth to axis of corpuscular stream 22 p3974 A66-40757

Diurnal variation in principal direction of E and H vectors of Petropavlosk-Kamchatka K index of geomagnetic field in horizon and planetary relation 22 p3914 A66-40769

Geomagnetic activity and Earth heliolatitude effect on diurnal variation of cosmic radiation, based on IGY neutron component observations 22 p3974 A66-40775

Diurnal variations in sporadic E layer parameters during solar cycle based on Moscow observations 22 p3915 A66-40781

Diurnal cyclic intensity variations of atmospheric radio noise at stations widely spaced over globe 22 p3915 A66-40782

Steady pearl type oscillations in terrestrial electromagnetic field, noting role of diurnal and seasonal variations 22 p3915 A66-40784

Measures of electron production and loss and scale height of F-1 layer during summer solar minimum 22 p3916 A66-40808

Enhanced activity in ionospheric E region at Cape Hallett and Campbell Island for information on diurnal variation and sunspot cycle changes of overhead and auroral activity 22 p3916 A66-40809

Diurnal heating of ozonosphere near stratopause level results in diurnal temperature variation of 15 degrees C and development of tidal circulation in stratospheric wind field 22 p3916 A66-40874

Time dependent behavior of temperature and density in monoconstituent atmosphere under diurnal photoheating and cooling by conduction, analyzing effect of atmosphere rotation eastward 23 p4064 A66-41678

Comparison of various geomagnetic variations associated with corpuscular precipitation at South Pole, noting day-night effect 23 p4064 A66-41688

Morning minimum of probability of existence of sporadic E layer and connection with time of sunrise 23 p4065 A66-41831

Anisotropy of cosmic rays in N-S direction determined by comparison of intensity variations observed in Arctic and Antarctic regions 24 p4263 A66-42464

Asymmetric ring current belt consisting of symmetric ring current and superimposed partial ring current system as explanation for low latitude disturbance daily variation 24 p4199 A66-42588

Diurnal behavior of topside and bottomside spread F at equatorial latitudes and association with geomagnetic activity 24 p4200 A66-42591

Diurnal variation of ionospheric irregularities, using differential Doppler method for analysis of data transmitted by Beacon satellite 24 p4200 A66-42596

Daily and seasonal variation of long distance propagation related to horizontal ionospheric gradients, particularly height of layer on wave path 24 p4174 A66-42739

Emergence and diurnal and seasonal fluctuations of sporadic E layer 24 p4201 A66-42759

Tidal circulation system induced by stratospheric wind field perturbations via diurnal ozonospheric heating 24 p4203 A66-42985

Distribution of active periods of magnetic disturbances during day and variation as affected by contact of solar magnetic flux with magnetosphere 24 p4204 A66-43151

Seasonal and diurnal fluctuation of radio wave in ionosphere in connection with fading process of reflected signal 24 p4204 A66-43155

**DIVERGENT NOZZLE**

**SA CONVERGENT-DIVERGENT NOZZLE**

Plane or axisymmetric hypersonic ideal gas flow in divergent nozzle with parabolic wall shape 14 p2221 A66-28056

Shock wave speed behind convergent and divergent ducts for different pressures and taper angles 17 p2913 A66-33072

Shock wave motion in tubes of diverging or converging cross sections 23 p4149 A66-41503

**DNA**

**S DEOXYRIBONUCLEIC ACID /DNA/**

**DO-31 AIRCRAFT**

**S DORNIER DO-31 AIRCRAFT**

**DOCKING**

Rendezvous with orbiting vehicle from launch to final docking including block diagram of homing system and techniques for matching velocities 03 p0433 A66-13284

Docking of logistics vehicle to space station investigated, using airbearing postimpact dynamic docking simulator 08 p1303 A66-18808

Full-scale prototype docking mechanism design and evaluation tests in rendezvous simulator 10 p1612 A66-21932

Rendezvous techniques and mission requirements involving space docking for transfer of personnel to and from manned space and lunar laboratories 16 p2812 A66-31683

**DODGE SATELLITE**

DODGE satellite will be capable of two- and three-axis gravity-gradient stabilization at near synchronous altitude, using moment-of-inertia distributions and libration

damping 21 p3820 A66-38860

**DOG**

Myocardiograph study of dogs leading to development of flight-rated vibrophonocardiographic system for monitoring cardiac dynamics in flight environment 17 p2924 A66-32191

**DOLPHIN**

Form and swimming characteristics of dolphin applied to design of high-speed commercial aircraft and VTOL aircraft 19 p3279 A66-36049

Dolphin body design for integrating resistance and propulsion mechanisms 19 p3279 A66-36050

**DOMAIN WALL MOTION**

High energy subdivided walls origin in silicon-iron suggested by reverse domain nucleation 10 p1582 A66-21887

Properties of high field domain in long samples of gallium arsenide, determining domain velocity and amplitude, using surface potential probe 10 p1584 A66-22074

Model technique calculation of electrostatic domains in two-valley /GaAs/ semiconductors 10 p1586 A66-22092

Coercive force for Bloch wall displacement of thin magnetic films coupled with stripe domain neon-iron films 11 p1758 A66-23359

Domain structure of partially oriented thin permalloy films analyzed through appearance of adjoining 180 degree walls of equal contrast and by electron microscopy 12 p1934 A66-25029

Approximate solution of micromagnetic equations for Neel-type domain wall in multiple films 14 p2351 A66-26887

Domain wall mobility effect on multilayer magnetic thin films consisting of permalloy layers separated by silicon oxide layers 14 p2351 A66-26888

Multilayer composite magnetic thin films used to constrain domain walls to localized region 14 p2351 A66-26889

Energy and width of domain walls in double films 14 p2351 A66-26891

Magnetostriction, negative anisotropy and chainlike domain walls along line defects in thin permalloy films 16 p2776 A66-30803

Nonuniform motion of high field domains in Gunn effect including steady and nonsteady state properties of formation stage 18 p3077 A66-34076

Field and charge density distributions in semiconductor with hot electrons, showing domain movement type oscillations due to stationary wave propagation 20 p3617 A66-37555

**DONNELL EQUATION**

Improved Donnell equations for concentrated load of circular cylindrical shell 16 p2823 A66-31717

Elastic stability of thin walled circular cylindrical shells in torsion, applying Galerkin method to Donnell equations for critical stresses 18 p3258 A66-34648

Comparison of characteristic roots arising from Fluegge and Donnell theories, when certain amount of axial prestress is imposed on circular cylinder 19 p3474 A66-36345

Stress analysis of elastic cylindrical shell perforated by rectangular cut-out and governed by Donnell equation 20 p3673 A66-38272

**DONOR**

Donor concentration in semiconductor at which hyperfine structure of spin absorption lines vanishes 04 p0564 A66-14250

Channel conductance measurements on silicon power rectifiers and midgap donor and acceptor detection on oxidized and lacquered rectifiers 08 p1189 A66-18664

Green emission lines from solution-grown p-n junctions in GaP diodes doped with shallow donors and acceptors 14 p2251 A66-27231

**DOPING**

Controlled phosphorus diffusion into silicon from phosphorus pentoxide vapor using red phosphorus as source, noting relations of resistivity-surface concentration to pressure temperature 02 p0275 A66-11872

Specific heat evidence for gapless superconductivity, examining experimental results on lanthanum doped with magnetic impurity gadolinium 09 p1420 A66-20053

Doping techniques for epitaxial growth of silicon and germanium

- layers 12 p1832 A66-23933  
Thermal expansion coefficient of doped germanium, noting correlation between impurity used and coefficient 14 p2368 A66-28244  
variation 14 p2368 A66-28244  
Controlled doping of germanium layers during evaporation, noting behavior differences for p-and n-type impurities and concentration dependence 19 p3434 A66-35344  
Photoluminescence measurements on silicon doped gallium arsenide for detection of compensation in shallow surface layers 19 p3436 A66-35430  
Electron conduction and phosphorus doping effects on room temperature and cryogenic electron spin resonance in n-type silicon 21 p3797 A66-38752  
Gold doping effects on recovery time of phosphorus, boron and arsenic impurity gaseous-diffused junction diodes and estimated gold recombination center densities 22 p3873 A66-39749  
IR absorption band growth and decay in spectra of oxygen-doped Si irradiated with fast neutron 22 p3962 A66-40085  
Neutron activation analysis of sodium dopant concentrations and distributions in lead telluride thermoelectric materials during couple operation in vacuum and argon atmosphere 24 p4247 A66-42109  
Ideal curves of metal oxide semiconductor capacity and surface potential computed for silicon and oxide thickness and doping as parameter 24 p4259 A66-43103
- DOPPLER EFFECT**  
**SA STELLAR DOPPLER SHIFT**  
Doppler effects of plasmas in semiconductors in microwave field, examining beat frequency relationship to plasma velocity 01 p0120 A66-10514  
Kinetic temperatures derived from Doppler width of airglow 5577 angstroms /OI/ line measured with Fabry-Perot interferometer 02 p0221 A66-11503  
Doppler shift and distortion of key-modulated signals in radio links with moving transmitter and receiver 02 p0191 A66-11751  
Errors in Doppler system determination of ground speed and improvement trends in wider application 02 p0258 A66-12044  
Velocity distribution in plasma jet by Doppler shift on spectral lines 03 p0403 A66-12972  
Functional characteristics of Navy Doppler tracking system and satellites used for geodesy, noting data reduction procedures and system tests 04 p0514 A66-13610  
Difference in Doppler shifts of radio waves emitted at various frequencies by satellite Elektron I radio station, plotting electron concentration dependence on altitude 04 p0515 A66-13837  
Frequency spectrum of large positive and negative Doppler shifts in VLF signals in whistler mode of propagation 04 p0517 A66-14182  
Line broadening from Stark effect and Doppler effect for plasma diagnostics 04 p0553 A66-14193  
Continuous recording of CW transmission frequency M.S.F. Rugby permits study of effects of traveling ionospheric disturbances on phase height of reflection levels of both magnetoionic components 04 p0488 A66-14379  
Doppler effect discussing relativistic form, transmission in dispersive media, broadening of spectral lines, black body radiation, rocket and satellite tracking, navigation and application 04 p0546 A66-14383  
Velocity measurements of electron front in electromagnetically generated T-tube shock waves made with microwave interferometer 04 p0558 A66-14479  
Evershed effect in inactive isolated symmetrical spot during passage across solar disk 05 p0758 A66-14773  
Electron density variation effect on Doppler shift of satellite signal reflections from ionization irregularities in ionosphere 05 p0634 A66-15265  
Simultaneous measurement of multipath and Doppler spread in real time involving fading transmission media such as HF and troposcatter [IEEE PAPER CP 65-524] 06 p0830 A66-16336  
Error probability limitations caused by multipath and Doppler smear in Kathryn modem 06 p0831 A66-16339
- Doppler broadened Cv spectral line from theta pinch and microscopic plasma velocities by reducing axial motion effect 07 p1086 A66-17654  
Doppler frequency shift and effect on single-sideband HF communication systems for supersonic transport 07 p1001 A66-17699  
Accuracy of Doppler navigational system obtained from ground information accumulated over 500 North Atlantic crossings 07 p1071 A66-17728  
Error of airborne Doppler navigation system 07 p1073 A66-17768  
Frequency-dependent ionospheric refraction effects on Doppler shift of satellite signals 08 p1181 A66-18714  
Artificial satellites detected by influences on ionosphere through 20-mc WWV bursts 08 p1181 A66-18750  
Doppler effects of injected carriers of semiconductor detected in microwave fields, used to measure semiconductor plasma drift velocity 08 p1270 A66-19060  
Thermal phase noise and VCO effects at ground receiver output of coherent two-way Doppler communication system 08 p1304 A66-19133  
Electro-optical attitude and velocity sensors for interplanetary navigation and stellar aberration and Doppler shift measurements 08 p1252 A66-19502  
Complex Doppler effect in dense cold magnetized plasma 09 p1343 A66-20339  
Accurate calibration of Doppler winds for use in computation of mesoscale wind fields 09 p1399 A66-20728  
Relation between height-time distribution of electron concentration and inhomogeneous formations of outer ionosphere 09 p1377 A66-21001  
Worldwide navigation system based on measurement of Doppler shift of stable signals transmitted from orbiting satellites, noting refraction, ship motion, air drag, timing, etc 10 p1554 A66-21512  
Doppler shift measurements using low resolution monochromator to determine mass motion in plasmas [AIAA PAPER 66-177] 11 p1735 A66-22213  
Curves of difference in Doppler shift in observations of transmitter of Elektron I satellite, noting fluctuations in electron concentration 11 p1762 A66-22409  
Critique of local ionospheric electron concentration determined by dispersion method with aid of satellite and new ionization maximum 11 p1697 A66-22428  
Substantiating possibility of determining local electron concentration by dispersion method with aid of satellites and new ionization maximum 11 p1697 A66-22429  
Observable properties of normal relativistic world models and steady state world model defined by parameters depending on cosmological constant and present mean density of universe 12 p1946 A66-23652  
Relative geodetic location by measurement of differential Doppler shift of radio signal 12 p1819 A66-24611  
Source function with large Doppler variable 13 p2174 A66-25481  
Wide angle Michelson interferometer for measuring Doppler temperature from width of 5577 angstrom atomic oxygen line in nightglow and aurora 13 p2128 A66-25799  
Spectral energy distribution and Doppler broadening of Rayleigh light scattered from hydrogen and argon gas at low density, using Fabry-Perot interferometer 13 p2133 A66-26169  
Optical- and IR-maser spectroscopy of inhomogeneously broadened resonances, using gas lasers 13 p2100 A66-26196  
Doppler frequency changes in vertically incident and reflecting sounding wave associated with geomagnetic disturbances yields information on ionospheric electric field 14 p2234 A66-26856  
Laser Doppler velocimeter for measuring localized flow velocities in liquids 14 p2306 A66-27053  
Spectral line broadening due to collisions in stimulated Raman effect 14 p2309 A66-27942  
Clear air turbulence detection with optical radar, using spectral analysis of backscattered Doppler-shifted light particle formation mapping via correlates of rough flying conditions 15 p2450 A66-28920  
CAT detection from Doppler shift in laser light backscattered from atmospheric aerosol 15 p2500 A66-28930  
Navy navigation satellite system developed by APL, using Doppler frequency measurements for navigation fix 15 p2536 A66-30001  
Beacon observations of differential Doppler and Faraday effects from analysis of signals emitted by Explorer XXII satellite 15 p2453 A66-30069  
Digital measurement of differential Doppler effect using transposition of phase relation of two HF signals into audiofrequency band 15 p2453 A66-30070  
Velocity distribution function of helium atom measured, using Doppler profile of helium line 16 p2701 A66-30377  
Total electron content of ionosphere in middle latitudes, noting results of satellite Doppler measurements, effect of solar radio noise flux, etc 16 p2694 A66-30706  
Altitude-time distribution of electron concentration, noting satellite measurements of ionospheric inhomogeneities and difference in Doppler shifts of coherent radio waves emitted by Electron I satellite 16 p2696 A66-30920  
Excitation of backward Doppler shifted cyclotron radiation in magnetoactive plasma by electron stream 16 p2761 A66-30921  
Doppler shift, velocity and line width measurements for mass motion in plasmas 17 p2925 A66-32488  
Upper atmospheric temperature measurement from Doppler line widths of atomic oxygen auroral and nightglow emission, using Michelson interferometer 17 p2919 A66-32993  
Frequency instability induced velocity error measurement in two-way coherent Doppler system 17 p2895 A66-33112  
Doppler navigation system accuracy improvement and evaluation of inertial navigator with steering computer 17 p2954 A66-33215  
Radio noise bursts from Jupiter at decimeter wavelengths noting Cerenkov emission, Doppler-shifter cyclotron emission and escaped-whistler models 18 p3225 A66-33550  
Doppler shift and high velocity mirror translation effects on mutual optical coherence function of gas laser Michelson interferometers 19 p3354 A66-35387  
Laser application for vibration measurement utilizing Doppler shift produced on wave reflected from surface vibrating normal to beam path 19 p3356 A66-35673  
Doppler shift measurements to investigate plasma rotation in theta pinch 19 p3414 A66-36512  
Total electron component of ionosphere column between satellite and Earth calculated, using differential Doppler effect 19 p3361 A66-36654  
Radio-observation station functions, observed satellite signals from beyond horizon and Doppler curve deformation 20 p3552 A66-37845  
Doppler effect on emission spectrum and energy of moving oscillator and intensity of surface wave excited by it 20 p3519 A66-37995  
Central Telecommunications Laboratory 882 P arithmetical airborne computer 20 p3523 A66-38013  
Two-dimensional time-space analysis of Doppler-effect-like phenomena in refraction and reflection of waves propagating through moving boundary between two media 21 p3706 A66-39574  
Ground state resonance, noting absence of Doppler broadening of signals in forward scattered light 22 p3931 A66-39810  
Quasi-stellar sources as local objects moving with velocities close to speed of light, noting transverse Doppler effect leads to expectation of fewer blue shifts than red shifts 22 p3981 A66-40484  
Doppler frequency shift for radio waves radiating coherently from satellite in ionosphere, considering electron concentration and angles of refraction 22 p3869 A66-40779  
Satellite application in geodetic surveys

and navigation, noting measurement and tracking techniques 22 p3915 A66-40786

Invariant imbedding and scattering of light in one-dimensional medium with moving boundary, noting relaxation of photon emission and Doppler frequency shift 23 p4087 A66-41540

Optical heterodyne receiver antenna properties, noting effective aperture of capture cross section vs directional tolerance and detection of doppler shifts in liquid scattered coherent light 24 p4174 A66-42809

**DOPPLER RADAR**

**SA PULSED DOPPLER SYSTEM**

Doppler radar for aerial navigation noting decoupling of transmitter from receiver, velocity measurement within frequency spectrum, etc 02 p0256 A66-11896

Doppler radar performance in air navigation noting calibration error, dispersion, hole-altitude phenomena, etc 02 p0256 A66-11897

Satellite-based Doppler navigation system 03 p0333 A66-12461

Doppler radar systems design, operating principles and performance characteristics 03 p0389 A66-12468

Mesoscale wind structure revealed by Doppler wind soundings taken in lower 4.5 km of atmosphere at 12-minute intervals in snowstorm 04 p0541 A66-13668

Increasing detectability of signal in noise or in other interference, noting effect and functions of radar filter, antenna scanning, pulse to pulse IF and video 04 p0486 A66-14124

Graphical comparison of Doppler-shift advantage for Chirp, Siebert and frequency hopping pulse-compression techniques 06 p0825 A66-15982

Reduction of high residual time sidelobes for phase-coded pulse compression radar systems and technique for increasing ratio of peak to residual amplitudes 06 p0833 A66-16666

Radar systems with rotating optical disks, describing optical correlation techniques 06 p0834 A66-16729

Characteristic distortion of Doppler curves and radio signals of artificial satellite from behind horizon 07 p1000 A66-17209

Doppler radar accuracy investigation, noting wide distribution of systematic error 07 p1064 A66-17668

Evaluation of four different types of Doppler radar as long range self-contained navigation aid 07 p1065 A66-17669

Serviceability and accuracy of dual Doppler installation on Boeing 707-320C aircraft 07 p1065 A66-17674

Effect of Doppler on navigation system accuracy during North Atlantic flights by Air Canada 07 p1065 A66-17677

Relationship between self-contained systems and fixing aids in light of recent subsonic jet and Doppler-system experience 07 p1066 A66-17679

Doppler equipment including planar-array antennas, varactor-multiplier sources, etc, evaluated for third generation Decca series 07 p1068 A66-17703

Up-dating of self-contained navigational aids such as Doppler, inertial and Doppler/inertial systems 07 p1070 A66-17717

Doppler-inertial system combination applied to avoid deterioration of navigational accuracy with time 07 p1070 A66-17719

MOA/BOAC Doppler/Loran A trials 1963-64, discussing navigational accuracy during transatlantic flights 07 p1072 A66-17759

Accuracy of navigation techniques for North Atlantic flights evaluated, based on Loran A and Doppler/GM compass automatic dead reckoning system 07 p1072 A66-17760

Self-contained Doppler Navigation System performance over three-year operation 07 p1074 A66-17776

Precision Doppler VOR installation in West Germany 07 p1075 A66-17781

AD560 Doppler Radar sensor and computer in Boeing 707-138 aircraft 07 p1076 A66-17794

Evaluation trials of Doppler-based primary navigation system as short-distance navigational aid 07 p1077 A66-17801

Evaluation of AD560 Doppler by Qantas, discussing ground-speed run-down problem,

radome design, along-track error and low-altitude accuracy over land and sea 07 p1078 A66-17811

Reduction of signal power in X-band CW aircraft radar echo 08 p1181 A66-18718

Dynamic Navigation System /Dynav/ for providing aircraft velocity and position-fixing information from VLF Doppler range rates 08 p1252 A66-19507

Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar [AIAA PAPER 66-40] 08 p1298 A66-19727

Detectability of signal in noise of range gated MTI radars, with or without pulse lengthening in conjunction with Doppler filtering 09 p1342 A66-19951

Height measurement from Doppler navigation, examining accuracy of pressure altimeter 09 p1381 A66-20429

RADINT rocket tracking station combines Doppler and interferometer techniques, eliminating need for three or four separate ground stations 09 p1355 A66-20588

Observations of vertical motion and particle size of growing thunderstorm moving overhead, using pulsed Doppler radar 10 p1552 A66-21277

Doppler radar techniques for velocity measurement, citing military and industrial application 11 p1707 A66-23061

Short term frequency stability affecting resolution and range of Doppler radar, noting system and circuit requirements when operating under severe vibration and acoustic environment 12 p1815 A66-24133

FM and AM noise spectra of low-noise microwave tubes, solid state klystrons and solid state chains 12 p1835 A66-24135

Clear air turbulence detection with laser Doppler optical radar [AIAA PAPER 66-374] 12 p1818 A66-24498

Doppler automatic air navigation systems, discussing basic principles, operational limitations, cost/payload factor and future development 13 p2123 A66-25200

Continuous measurement of ionospheric winds based on observation of meteor trails 13 p2072 A66-25449

Effect of Doppler on navigation system accuracy during North Atlantic flights by Air Canada 13 p2125 A66-25864

Random error of drift measurements using airborne Doppler radar from observed drift output during short flight over fixed course, calculating rms values 13 p2125 A66-26449

Germanium mixer diodes encapsulated in miniature double-ended construction, examining fabrication, performance and applications 17 p2892 A66-32921

Classical spectroscopic binary star orbit determination techniques to provide orbital elements for lunar satellite tracked by Earth-based Doppler radar 18 p3234 A66-34596

Radar-updated inertial navigation of continuously-powered space vehicle during deboost phase of flight prior to lunar landing 20 p3596 A66-37221

Doppler radar measurements of wind velocity horizontal components variation in rain and snow, calculating time correlation and structural functions for neutral and unstable stratifications 21 p3760 A66-39358

Programmed oscillators to control Doppler tracking radar systems for space communications and radar astronomy 22 p3862 A66-39731

Doppler radar applied to atmospheric precipitation processes, noting drop size distribution in widespread rain, height-time sections of vertical air motion and maximum particle velocity, etc 22 p3942 A66-39737

Electron density profiles in D layer measured through Doppler shift on VLF signal propagating from ground up and received by rocket 22 p3907 A66-39957

Radar partial coherence theory for clutter construction relationship to radar cross section, waveform coding, output signal, mutual coherence function and random noise 23 p4037 A66-41312

Doppler frequency-measuring tracking system in which tracking filter or retuned heterodyne is used for definition of signal with unknown frequency 23 p4038 A66-41524

Doppler radar tracking system

measurement of impact drag coefficients for several water entry configurations 24 p4191 A66-42188

Laser Doppler velocimeter for gas and liquid flow velocity measurement 24 p4211 A66-42557

Air motion probe via Doppler radar, noting calculation of speed, direction and application to wind variance analysis 24 p4234 A66-42989

Velocity characteristics of clear-air dot angle echoes determined via Doppler radar measurements 24 p4234 A66-42990

X-band low power pulse Doppler radar and S-band weather radar for meteorological applications 24 p4176 A66-43045

**DORNIER DO-31 AIRCRAFT**

DO-31 VTOL transport design, specifications and testing, using direct jet lift for takeoff and transition to conventional flight 07 p0986 A66-17270

Do-31 V/STOL transport aircraft design including engine, wings, speed, rate of climb, etc 21 p3696 A66-39540

Do 31 system test stand including cockpit with instruments, fuselage frame, wing structure, etc 24 p4192 A66-42488

**DORNIER PARAGLIDER ROCKET**

Hot water rockets covering principle, design, advantages, testing techniques and performance capabilities 05 p0659 A66-14677

**DOSAGE**

**S RADIATION DOSE**

**DOSIMETER**

Small lightweight ion chamber dosimeter for monitoring radiation exposure to spacecraft crew members 05 p0676 A66-14632

Radiation dosimeters for SNAP-10A flight test to measure reactor leakage radiations throughout SNAPSHOT Agena orbital vehicle 12 p1876 A66-23675

Transistorized portable UV dosimeter for use in medicine, climatology, physiotherapy, meteorology and stimulated plant growth study 20 p3562 A66-38436

Polymer degradation dosimeter of polyisobutylene in heptane noting viscosity range effects, concentration change and molecular weight 21 p3739 A66-39383

**DOSIMETRY**

Book on problems in dosimetry and radiation protection 05 p0627 A66-15117

**DOUBLE BASE PROPELLANT**

Cast-double-base propellant mechanical behavior and failure during slow cooling and rapid pressurization of case-bonded rocket motors [AIAA PAPER 65-161] 12 p1934 A66-24704

**DOUBLE RESONANCE**

Lifetimes of orientation and alignment of excited atomic states examined in level crossing and optical double resonance experiments employing polarized light 11 p1740 A66-22969

Nonequilibrium population buildup and detection for IR solid state lasers and IR-optical double resonance in lanthanum chloride crystal 13 p2098 A66-26177

7P terms of excited chromium configurations examined, using level crossing and double resonance spectroscopy, noting core polarization 13 p2135 A66-26267

Double barrier transmission resonance in metal thin film triode 15 p2563 A66-28731

**DOUBLE-SIDEBAND RADIO COMMUNICATION**

Statistical properties of output of double-sideband receiver when nonlinear mechanisms at input admit unwanted double-sideband signals with Gaussian modulation 05 p0630 A66-14593

Double sideband capacitance and resistance modulation of systems and calculation of noise and amplification factors 16 p2666 A66-31561

**DOUGLAS DC-8 AIRCRAFT**

Flight testing of Phillips vertical reference inertial navigator on DC-8 aircraft 07 p1069 A66-17708

Correlation between clear air turbulence and aircraft electrical activity, describing corona discharges from DC-8 tail antenna 15 p2426 A66-28922

Douglas DC-8 super sixty series effect on airport requirements including noise level, runway problems and traffic [SAE PAPER 660281] 15 p2427 A66-29825

## DOUGLAS DC-9 AIRCRAFT

- DC-9 reliability program emphasizing simplicity improved proven components rather than completely new equipment 01 p0010 A66-10088
- DC-9 maintainability, simplicity and commonality of design with emphasis on reliability 01 p0129 A66-10092
- DC-9 aerodynamic design features and control systems [AIAA PAPER 65-738] 03 p0320 A66-12731
- Optimum operational influence on design of DC-9 cockpit 07 p0988 A66-17704
- DC-9 Douglas short-and medium-range air transport, discussing takeoff field length, fuel capacity, payload and landing-field length 12 p1800 A66-23754
- DC-9 maintainability, simplicity and commonality of design with emphasis on reliability 13 p2173 A66-26231

## DOUGLAS MILITARY AIRCRAFT

## S A-4 AIRCRAFT

## DOWN-CONVERTER

- Detection scheme for millimeter and submillimeter waves, utilizing system of quantum energy levels to down-convert HF radiation to microwave frequency 15 p2462 A66-29019

## DOWNRANGE MEASUREMENT

- Selection and development of guidance station at Gove, Australia, noting access routes, logistics problems, etc 21 p3721 A66-38643

- Requirements, functions and equipment of down-range guidance station for ELDO program in Australia 21 p3721 A66-38644

## DOWNWASH

## SA GROUND EFFECT

## SA LIFT AUGMENTATION

## SA WAKE

- Downwash corrections for wings with arbitrary sweepback in open and closed circular wind tunnels with base plate 21 p3694 A66-38936
- Rotor downwash angle and tunnel geometry effect on maximum size rotor that can be tested in closed throat wind tunnel [AIAA PAPER 66-736] 22 p3893 A66-40626
- Downwash angles behind rectangular wings of small aspect ratio calculated at subsonic velocities according to nonlinear theory 23 p4010 A66-41781

## DRAG

- SA BOUNDARY LAYER
- SA ELECTROSTATIC DRAG
- SA FRICTION DRAG
- SA INTERFERENCE DRAG
- SA MINIMUM DRAG
- SA PRESSURE DRAG
- SA SATELLITE DRAG
- SA SKIN FRICTION DRAG
- SA SUPERSONIC DRAG
- SA VISCOUS DRAG
- SA WAKE
- SA WAVE DRAG

- Drag of body of revolution with blunt base substantially reduced by mounting disk behind body with smaller diameter than body 05 p0606 A66-15059

- Contraction of satellite orbits due to atmospheric drag, extending theory to atmosphere with day-to-night sinusoidal variation with air density 07 p1132 A66-17256
- Equations of motion for Earth satellite indicate greater significance for atmospheric resistance than gravitational effect 07 p1139 A66-18190

- Long lifetime orbits about Mars affected by atmospheric drag, solar gravitational perturbations, planetary oblateness and other perturbations [AIAA PAPER 66-35] 08 p1289 A66-18987

- Probability characteristics of parameters of oscillating ellipse for satellites whose chief source of perturbation is atmospheric drag 11 p1766 A66-22232

## DRAG BALANCE

## S LIFT-DRAG RATIO

## DRAG COEFFICIENT

## SA LIFT-DRAG RATIO

- Satellite drag coefficient reevaluated in consideration of recent data on gas-surface interaction and atmospheric composition 05 p0760 A66-14941
- Pressurization effect on fuselage drag of Boeing 720 jetliner based on boundary layer measurement 05 p0606 A66-15077
- Flight test determination of parasite drag

- area and required power of Kawasaki Bell KH-4 single-rotor

- helicopter 07 p0988 A66-17525

- Parachute operation at high Mach numbers and dynamic pressures for reentry vehicle deceleration

- [AIAA PAPER 66-24] 07 p0989 A66-17888

- Flow separation, wake configuration and droplet motion in purified systems shadowgraphically analyzed 10 p1524 A66-21808

- Molecular collision effect on transitional drag on cylinder traversing rarefied gas at hypersonic Mach numbers, discussing departure from free flow 11 p1632 A66-22920

- Modified first-collision model theory that agrees with experimental data on drag coefficient of cylindrical bodies in flow of rarefied gases 11 p1633 A66-22921

- Drag force anemometer utilizing semiconductor strain gauges for measuring horizontal wind speed and direction [AIAA PAPER 66-337] 12 p1882 A66-24482

- Terminal reentry and dynamics evaluation computer program for small particles, using point-mass calculation during initial phase and determining drag coefficient [AIAA PAPER 66-380] 12 p1951 A66-24505

- Drag coefficient of gas flow in circular tube at transonic velocity 13 p2065 A66-26485

- Drag coefficient of spherical satellites at various heights, based on gas-surface interactions and atmospheric composition 14 p2382 A66-27617

- Drag coefficients and absolute atmospheric densities at high altitudes calculated, using spin and orbital decays of Explorer VI satellite conjugated with models of surface particle interaction 15 p2489 A66-29818

- Motion equations and Pontryagin maximum principle applied to space vehicle reentry trajectory optimization through independent control of lift and drag 16 p2809 A66-30884

- Flexible and rigid hinged hydrofoils noting behavior of configurations lift, drag, power input coefficients, etc 17 p2910 A66-32662

- Vekua method to solve Oseen form of Navier-Stokes equation for incompressible viscous fluid flow 18 p3097 A66-33712

- Drag coefficient of turbulent flow of electrically conducting liquid metal in MHD channels of round cross section 19 p3407 A66-36098

- Frequency of wake shedding from circular cylinder in water flow with values above critical Reynolds number, noting eddy generation and drag coefficient dependence on cavitation number 20 p3548 A66-38012

- Distance/time records, drag coefficients and Reynolds numbers of single freely-falling drops of pentane, heptane and benzene burning in cold atmosphere 20 p3626 A66-38044

- Flight performances of special small rockets with no cross wind conditions, noting drag coefficient effect 23 p4133 A66-41441

- Doppler radar tracking system measurement of impact drag coefficients for several water entry configurations 24 p4191 A66-42188

- DRAG DEVICE
- S BALLUTE

- DRAG EFFECT
- Orbital mechanics, examining problems relating to patched conics, perigee determination, eccentricity of satellite orbits and drag effect 05 p0767 A66-15754

- Conservation laws involving mass, momentum and energy applied to asymptotic properties of hypersonic flow 09 p1327 A66-20266

- Analogy between impulsive flow over circular cylinders and flat plates, and separated flow about lifting bodies moving at high angles of attack in subsonic and supersonic range [AIAA PAPER 65-395] 12 p1795 A66-23575

- Gravity turn trajectories through atmosphere including drag effects 20 p3657 A66-38181

- MEASURED aerodynamic characteristics of cone-cylinder-cone model using magnetic balance system, discussing techniques, errors and data 03 p0315 A66-12773

- Mesoscale eddies in wake of islands

- describing properties, characteristic parameters via Karman vortex street pattern, drag theory and empirical observation 07 p1061 A66-17365

- Aerodynamic drag moment of gyromotor operating in air, comparing calculated and experimental data 09 p1379 A66-20306

- Comparison of theoretical and experimental results for cylinder and flat strip models in near free molecular flow 11 p1692 A66-22926

- Drag measurement for grid of wires in rarefied gas slip flow and transition flow 11 p1633 A66-22927

- Aerodynamic drag torque on rotating sphere in transition regime, noting dependence of gas inertia on Reynolds number 11 p1635 A66-22935

- MHD drag of dielectric oscillating sphere in incompressible conducting fluid with uniform magnetic field aligned along axis of oscillation 15 p2553 A66-29689

- Aerodynamic gaseous drag torque on electromagnetically suspended isolated sphere rotating at high Mach numbers in rarefied transition regime from continuum to free molecule flow 20 p3492 A66-37473

- Drag force of flexible wire connection between aircraft and ship models and axis about which they are rotating 21 p3832 A66-39458

- Hypersonic flow, discussing heat effect on flow parameters, shock and motion equations, drag increase, etc 22 p3897 A66-39699

- DRAG REDUCTION
- Drag reduction for sailplanes, investigating adoption of laminar foil section 01 p0008 A66-11097

- Drag reduction measurements on porous cylindrical bodies with blunt nose and tail sections, using area suction [AIAA PAPER 65-561] 02 p0175 A66-11564

- Linearized supersonic theory for favorable thickness distributions and drag reduction for wings in supersonic flow [AIAA PAPER 65-716] 03 p0314 A66-12542

- Drag of body of revolution with blunt base substantially reduced by mounting disk behind body with smaller diameter than body 05 p0606 A66-15059

- Drag reduction for gliders, noting role of planform and warping of wing 05 p0607 A66-15200

- Drag decrease in glider aircraft noting wing profile, flow laminarization /boundary layer control/, landing flaps, tail, etc 05 p0607 A66-15200

- Longitudinal and transversal contours minimizing drag of slender homothetic body in hypersonic flow with Newtonian pressure distribution and constant skin-friction coefficient 06 p0802 A66-16911

- Optimum nose form determination for minimum drag in free-molecule flow of asymmetric body 11 p1635 A66-22937

- Ring wings to develop beneficial aerodynamic interference effects at supersonic speeds 13 p1995 A66-25590

- Transition delay and skin friction drag reduction by considering boundary layer flow over flexible aerodynamic surface [AIAA PAPER 66-430] 16 p2688 A66-31466

- Reynolds equations for two-dimensional uniform turbulent shear flow of Reiner-Rivlin fluid suggest drag reduction 22 p3896 A66-39671

- Limiting initial deceleration forces generated by supersonic decelerators, noting that decelerators deployed in wake region of body result in divergent wake and drag force reduction 22 p3845 A66-40595

- Pressure effects of flexible walls on boundary layer transition in turbulent pipe inlet flow 24 p4195 A66-42859

- DRAWING
- S MECHANICAL DRAWING

- DRIFT
- SA GYROSCOPIC DRIFT
- SA IONOSPHERIC DRIFT
- SA YAW

- Static drift in epitaxial planar silicon transistor choppers 01 p0035 A66-10208

- Dual transistors for noise and drift reduction in differential direct-coupled amplifier design 14 p2262 A66-28376

- Zero-level drift errors in telemetry 17 p2873 A66-31965

Temperature behavior of transistor using as reference equivalent temperature-drift sources at input of idealized drift-free transistor 18 p3088 A66-35041

Drift effect on diffusion spreading of plasma inhomogeneities in magnetic field, deriving expression for Fourier component potential and magnetic field perturbations 19 p3344 A66-35265

Fabrication methods for lithium drifted surface barrier silicon detectors, discussing lithium diffusion, stain etching, preparation for and final etch 20 p3535 A66-38417

Drift cyclotron instability observed in toroidal plasma 23 p4109 A66-42064

Chain code method of eliminating LF drift disturbance error in calculation of impulse-response function of time-invariant system 24 p4187 A66-42368

**DRIFT RATE**

Nocturnal auroral drift in meridional direction 01 p0064 A66-11163

Measuring drift velocities of mixed nitrogen ion population in nitrogen gas, noting need of ionization condition control and ion mass analysis 04 p0547 A66-13714

Soviet report on ionospheric structure variations, drift magnitude, velocity and direction 05 p0674 A66-15226

Semiconductor with dependence of drift velocity on electric field and containing region of negative differential mobility 06 p0850 A66-16444

Wentzel-Kramer-Brillouin calculation of exact solution of universal instability and drift approximation problem 07 p1089 A66-17958

Polarization and Alfvén wave attenuation in Doppler-like change in transverse wave velocity when drift current is passed parallel to magnetic field in solid-bismuth plasma 07 p1102 A66-18209

Hall current and Hall drift velocity in single crystal indium antimonide under electric and magnetic field 07 p1103 A66-18214

Ionospheric inhomogeneity movements in E and F-2 regions and height variation of drift velocity 08 p1215 A66-19052

Doppler effects of injected carriers of semiconductor detected in microwave fields, used to measure semiconductor plasma drift velocity 08 p1270 A66-19060

Vortex lines in superconductors, noting free energy of pure superconducting metal in presence of currents and fields for slowly varying drift velocities 09 p1415 A66-20007

Electric discharges in gases analyzed in terms of ion and electron drift velocity and ionization coefficient 10 p1558 A66-22057

Inhomogeneities shape effect on drift rate in ionosphere under wind and electric field effect 11 p1696 A66-22413

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization, longitudinal current effect, etc 12 p1921 A66-24204

Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 12 p1921 A66-24209

Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 13 p2127 A66-25087

Partially ionized plasma drift across toroidal magnetic field arises from collision with neutral gas molecules 13 p2146 A66-25744

Random error of drift measurements using airborne Doppler radar from observed drift output during short flight over fixed course, calculating rms values 13 p2125 A66-26449

Free hole lifetimes greater than 50 microseconds in silver bromide above 200 degrees K and measurement of drift mobility 14 p2365 A66-27756

Temperatures, Lorentzian widths and drift velocities of excited neutral and ionic species in argon-ion laser, noting thermal equilibrium achievement 15 p2512 A66-28695

Ionic drift velocity peak function for two interconverting nitrogen ion species drifting in gas in electric field 15 p2550 A66-28756

Repetitive plasma breakdown in flat electrode accelerator, causing relatively low plasma velocity 16 p2757 A66-30107

Plasma-ion oscillations in drifted plasma effected in diode-type discharge tube by

varying longitudinal magnetic field or cathode temperature 17 p2972 A66-32974

Drift rate and precipitation of lithium ion in germanium as affected by resistivity, acceptors, carrier lifetime and copper diffusion 19 p3442 A66-35914

Optimum control theory applied to shipboard inertial navigation systems with position and azimuth errors because of gyroscope drift-rate fluctuations 20 p3595 A66-36873

Electron drift velocity, ionization and attachment coefficients in water vapor and dry air measured by recording short photoelectron pulses 20 p3605 A66-38095

Nonadiabatic and adiabatic acceleration and diffusion of particles trapped in Earth magnetic field, examining particle drift, trapping boundary, auroral substorms and bounce resonances 20 p3658 A66-38326

Carrier motion equation in Gunn diode in terms of average drift velocity and diffusion coefficient 20 p3534 A66-38402

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 20 p3612 A66-38430

Drift velocity of aerosol particle in field of sound wave distorted by second harmonic 21 p3769 A66-38512

Stabilization criteria for drift instabilities in inhomogeneous plasma with external electric field derived from drift wave frequency variation 21 p3777 A66-38963

Equations derived for thermal drift of MOS-FET operated at drain voltages beyond pinch-off voltage 22 p3872 A66-39722

Three-dimensional electric field wave equation for homogeneous gyrotropic compressible drifting plasma derived for case having magnetostatic field and drift velocities in arbitrary directions 22 p3865 A66-40099

Nonlinear theory on effect of drifting cone plasma instability on particle drift from adiabatic trap 22 p3955 A66-40191

Charged particle collisions effect on drift instability of low pressure plasma studies, using Landau collision integral as model collision integral 22 p3956 A66-40192

Kinetic oscillation of nonhomogeneous collision plasma, discussing drift instability, ionization longitudinal current effect, etc 22 p3956 A66-40568

Motion of charged particles in rotating and fixed magnetic fields, using drift approximation equations to determine field parameters 22 p3956 A66-40573

Fluid stratification in floated gyroscope, estimating drift rate as function of time, geometry and flotation mixture 23 p4066 A66-41102

Plasma jet motion in inhomogeneous transverse magnetic field, noting drift velocity 23 p4099 A66-41130

First-order Markovian gyro drift numerically evaluated and square root plotted vs interval and gyro correlation time 23 p4068 A66-41318

Plane homogeneous wave scattering by cylindrical plasma column with glass wall placed in vacuum, noting axial drift velocity and resonance peaks 23 p4101 A66-41366

Epitaxial growth techniques used to obtain graded layers for drift field structured solar cells on Si web 23 p4019 A66-41747

**DRILL**

Production process for gun-drilling of holes in beryllium, noting filtration techniques and clamping fixture [ASTME PAPER MR66-185] 14 p2300 A66-26959

Projected rotary-percussive drilling system for obtaining lunar surface samples within specified payload and size requirements, considering drive systems 18 p3094 A66-34139

**DRIVE**

SA GEAR

SA PROPELLER DRIVE

SA ROTARY DRIVE

Peak drive power requirements, optimum drive size and torque requirements for large aperture steerable tracking antenna 18 p3055 A66-34295

**DRUGUE PARACHUTE**

Brake parachutes for high speed aircraft, considering difficulties faced by parachute designer 02 p0178 A66-12014

Aircraft escape systems design criteria established using military accident statistics, noting drogue parachute and pilot sizes 22 p3850 A66-40610

**DRONE**

Drone aircraft onboard stabilization circuit design for control signal transmission and transient response irrespective of noise background 11 p1778 A66-23348

**DROP**

**SA LIQUID DROP**

Spherical drop in electric field with equilibrium maintained through balance between electric stress and variable pressure difference between inside and outside of drop, existing only if outside and inside fluids are in motion 13 p2129 A66-26302

**DROP SIZE**

Combined effect of turbulent gravitational and electrostatic coagulation on growth rate of cloud droplets estimated by two-layer model of process 01 p0096 A66-10658

Visible and IR radiation attenuation by artificial fogs found to depend on droplet size and distribution 01 p0097 A66-10860

Effects of drop formation on rate, duration and size of welding and quality of welds in submerged-arc welding 03 p0375 A66-13123

Microstructural fluctuation in low clouds, investigating cloud droplet spectra and fluctuation of absolute total concentration 05 p0712 A66-15115

Precipitation formation considering collision efficiency of different-size droplets, noting influence of gravitational and electric fields, space charge, atmospheric turbulence, etc 06 p0905 A66-16269

Homogeneous isotropic turbulence in atmosphere model showing accretion qualities for small droplets during diffusion dissociation 08 p1212 A66-18673

Mean droplet size and dispersion of atomized liquids in industrial air determined by microscopic slides and photomicrographs 13 p2066 A66-26489

Swept frequency measurement of water-drop diameter in spherical resonator, using dielectric materials 19 p3394 A66-36417

Airborne photoelectric device for registration of cloud drops 21 p3739 A66-39365

Doppler radar applied to atmospheric precipitation processes, noting drop size distribution in widespread rain, height-time sections of vertical air motion and maximum particle velocity, etc 22 p3942 A66-39737

Atomization of water drops by high speed airstreams, noting dependency on time 23 p4016 A66-42053

**DROP TEST**

Cavitation erosion research, examining correlation between drop impact erosion and constricted tube and vibratory cavitation erosion tests 20 p3588 A66-37814

Dropping heavy stores from low altitude aircraft, considering stability of store after leaving aircraft and rebound from impact with ground 22 p3850 A66-40616

**DROP-WEIGHT TESTER**

Drop-weight sensitivity of explosive liquids tested with impact apparatus, showing increase with temperature [CI PAPER WSCI-65-28] 05 p0788 A66-15139

Drop-weight impact sensitivity testing of explosives [CI PAPER WSCI-65-27] 05 p0788 A66-15140

Drop-weight testing procedures using Olin Mathieson tester, noting mounting [CI PAPER WSCI-65-31] 05 p0788 A66-15142

Fractures in high strength low-alloy steels, discussing formation of flat and slant regions, effect of rolling direction crack reinitiation, shearing forces, etc 21 p3751 A66-39191

Drop-weight tester/photographic apparatus for studying impact initiation-explosion process in nitroglycerin 23 p4119 A66-41243

**DROSOPHILA**

Biological experiments under flight conditions in Vostok spacecraft, noting reproduction of Drosophila melanogaster and effect of weightlessness and cosmic radiation on hereditary structures 15 p2436 A66-29465

**DRUG**

S ADRENERGICS

S ALKALOID

S ANTIBIOTICS  
S MOTION SICKNESS DRUG  
S PHARMACOLOGY  
**DRY CELL BATTERY**  
SA STORAGE BATTERY  
Substitution of solid electrolytes for conventional liquid electrolytes in dry cell can enhance battery miniaturization potential without sacrifice of shelf life 08 p1167 A66-18715  
**DRY FRICTION**  
Forced vibration in nonlinear system with Coulomb and combination friction 01 p0159 A66-11176  
Dependence of dry friction force for steady state rubbing of rubberlike body on surface of crystalline elastic body 08 p1244 A66-19474  
High temperature and vacuum effects on sliding friction and surface film formation between dry lubricated and nonlubricated pair combinations of metals, carbon and ceramics, noting SNAP reactor data [ASLE PREPRINT 65AM 6A1] 10 p1540 A66-22040  
Lubrication characteristics of dry unbonded and bonded molybdenum sulfide films for varying speed, load, humidity and metal substrate [ASLE PREPRINT 65AM 5C1] 14 p2302 A66-27773  
Forced oscillations of gyroscopic tachometer with dry friction analyzed by Zhelezov theorems 17 p2928 A66-33496  
Temperature effect on dry friction coefficient in titanium alloys 19 p3376 A66-35462  
**DRY HEAT**  
Microbial contamination control of space vehicles, noting dry heat sterilization requirements 16 p2642 A66-30496  
**DSIF**  
S DEEP SPACE INSTRUMENTATION FACILITY /DSIF/  
**DTA**  
S DIFFERENTIAL THERMAL ANALYSIS /DTA/  
**DUAL CONTROL PROBLEM**  
Optimal interplanetary guidance, discussing optimization of variable observation rate and correction schedule to achieve desired terminal accuracy 04 p0544 A66-13992  
Synthesizing dual control in absence of a priori information concerning unknown plant parameter 07 p1012 A66-17380  
Optimum dual system design for plant investigation and regime requirements 12 p1853 A66-24331  
Dual quadratic programming of dynamic response of frictionless mechanical system with one-sided constraints 13 p2117 A66-25347  
Dynamic optimization and minimizing kernel function for dual control problem 13 p2117 A66-25348  
Decomposition technique by which convex control programming problem, having coupled subsystem constraints, can be decomposed into smaller subproblems 13 p2117 A66-25349  
Combined optimization problem, equivalent to dual control problem, considering determination of optimal control policies for plant under random disturbances, using iterative equations 13 p2051 A66-26065  
Comparison of nonoptimum and optimum strategies in dual control of inertialess plants in presence of noise in feedback loop 16 p2669 A66-30757  
Duality theory of optimal control and resulting duality correspondence between formulation of optimal control and calculus of variations, noting decomposition algorithm 16 p2671 A66-31229  
Dual control of plant with random amplification factor as Bayesian problem 18 p3089 A66-33738  
**DUCT**  
S ACOUSTIC DUCT  
S AIR DUCT  
S ORIFICE  
**DUCTED BODY**  
Elastic and plastic behavior of ideal materials with mechanical and thermal properties of ductile structural metals 24 p4288 A66-42275  
**DUCTED FAN**  
Acoustical fatigue study of propeller duct

designed for minimum weight to maintain specified thrust-to-weight ratio 01 p0150 A66-10155  
Ducted axial flow fan noise generation and noise spectrum 10 p1483 A66-21743  
Size and position effect, baffle effect and wake and pressure interaction effect of upstream stator on ducted axial flow fan noise 10 p1483 A66-21746  
Low speed aerodynamic loading on finite-bladed ducted propeller at zero incidence 22 p3844 A66-40394  
**DUCTED FAN ENGINE**  
Bypass engine development from conventional gas turbine to ducted-fan and aft-fan engine, noting principle of afterburning 14 p2373 A66-27014  
Ducted propeller aerodynamics in forward flight with shroud load determination 20 p3492 A66-37572  
**DUCTED FLOW**  
Thermodynamic process within combustion chamber of propulsive duct, examining potential with reference to feedback and spark discharge 11 p1761 A66-23251  
Aerodynamic characteristics of compressor entry ducts under natural and simulated conditions 13 p1992 A66-26491  
Laminar ducted flow of viscous electrically conducting fluid under uniform arbitrarily oriented magnetic field for rectangular duct with nonconducting walls 14 p2342 A66-27407  
Inverse problem of nonequilibrium dissociation and vibrational relaxation of diatomic duct flow 14 p2219 A66-27428  
Marine propellers and ducted propeller propulsive devices 16 p2688 A66-31328  
Temperature profiles and Nusselt numbers for heat transfer to MHD laminar Hartmann flow in thermal entrance region of flat duct 22 p4000 A66-40920  
Heat transfer in entrance section in rectangular duct for incompressible fluid in laminar pulsating flow with periodic pressure gradient 23 p4148 A66-41216  
**DUCTILITY**  
SA CREEP  
SA PLASTICITY  
Mechanical properties of alloys with aging martensite 05 p0701 A66-14860  
Ductile behavior of brittle material during erosive cutting [ASME PAPER 65-WA/PROD-7] 05 p0690 A66-15634  
Dilute tungsten rhenium alloys, determining ductility parameters, fabrication, tensile properties and creep behavior 06 p0894 A66-16070  
Small titanium additions effect on strength, impact ductility and structure of low-carbon low-alloy steel 06 p0895 A66-16228  
Four-point loading bend test on specimen of full plate thickness with sharp notch to 20 percent depth, with ductility criterion as fully plastic angle of bend before fracture 06 p0965 A66-16492  
Ductility in polycrystalline single phase ceramics, noting behavior at room and high temperature of single crystal structure, dislocation, etc 07 p1054 A66-18498  
Beryllium ductility in fabrication as affected by single crystal slip and fracture and improvement by grain control 08 p1238 A66-18851  
Rational compression curves and plastic deformation mechanism of cast and drawn polycrystalline beryllium 13 p2106 A66-25356  
Quenching and slow-cooling effects on ductile-brittle bend-transition temperature of chromium wire 13 p2107 A66-25587  
Ductility and production techniques of cross rolled beryllium sheet [SAE PAPER 660291] 14 p2313 A66-27287  
Ductility enhancement of tungsten by rhenium addition due to modification of grain boundary precipitate morphology 16 p2722 A66-30222  
Carbon content effect on brittle-to-ductile transition temperatures of molybdenum studied in search for high toughness propulsion system 19 p3382 A66-36106  
Welding and postheat treatment effects on bend ductility transition temperature and strength of second-generation niobium-base alloys 19 p3368 A66-36124  
Weldability of nearly 100 tantalum binary or ternary solid solution alloys and

dispersion-strengthened alloys, using room temperature bend ductility as criterion 19 p3368 A66-36125  
Mechanical properties, optical microstructure and thin foil electron microstructure of commercial pure titanium plate investigated for cause of ductility deterioration 24 p4229 A66-43105  
**DUFFING EQUATION**  
SA PROBABILITY  
Amplitude of subharmonic vibrations of even order and frequency limits of excitation for systems described by Duffing equation 01 p0159 A66-11177  
Steady states of mechanical system using perturbation method, assuming primary and secondary oscillators are tuned to single pulse, each involving Duffing type nonlinearity 04 p0545 A66-14169  
Forced solutions for Van der Pol-Duffing equation in first harmonic approximation 13 p2129 A66-26337  
**DUMBELL SPACE PROBE**  
Dumbbell librations of satellites in elliptic orbits of small eccentricity determined via WKB approximation 24 p4272 A66-42158  
**DUMMY LOAD**  
Design and application of dry, dielectric and water-cooled dummy loads 12 p1829 A66-23537  
**DUOPLASMATRON**  
Noble gas ion beams produced by duo-plasmatron magnetically analyzed while varying gas pressure in source 01 p0114 A66-10850  
Duoplasmatron with electrostatic lens decreasing ion energy while focusing ions for maximum density parallel beam 01 p0114 A66-10851  
Diagnostic work on ion sources in Germany including electrostatic drive research, duoplasmatron and porosity of tungsten emitter [DGR PAPER 66-005] 13 p2059 A66-26492  
Electrostatic ion drives technology problems, considering conversion efficiency, thrust, reliability, high voltage, mass per unit thrust, etc 17 p2991 A66-33231  
Electrostatic ion drives technology problems, discussing gaseous discharge ion sources, duoplasmatron and electron bombardment ion generator 17 p2991 A66-33234  
Electron beams from duoplasmatron using hollow cathode arc, noting current density distributions 20 p3606 A66-38406  
**DUPLEXER**  
Two basic semiconductor limiters design and performance as microwave duplexing devices 14 p2253 A66-27529  
**DUST**  
SA COSMIC DUST  
SA INTERPLANETARY DUST  
SA LUNAR DUST  
SA METEOR DUST CLOUD  
SA METEORITIC DUST  
SA TERRESTRIAL DUST BELT  
SA ZODIACAL DUST CLOUD  
Dust particles in laser cavity observed for angular stabilization and constant velocities 13 p2105 A66-26594  
Shock and ionization fronts propagation in gas-dust medium 14 p2380 A66-27255  
Metal erosion by airborne quartz dust particles, using energy values as function of material, dust size, temperature, etc, influenced by surface layer of material 16 p2813 A66-30442  
Dust cloud formation by thermal convection in Martian atmosphere 16 p2802 A66-30925  
Shock wave propagation in gas-dust medium, examining motion and velocities of gas and dust at distance approaching infinity 20 p3647 A66-37034  
**DUST COLLECTOR**  
High altitude balloon top collections of cosmic dust shows evidence of absence of crystal structure in particles 15 p2604 A66-30065  
Dust flux in upper atmosphere and on polar ice sheets 16 p2696 A66-30931  
**DYADIC**  
General relativistic dyadic formalism applied to metrics of rigid bodies moving in Einstein space of uniform space-time curvature 17 p2958 A66-32294

## DYE

- SA CYANINE DYE  
 SA METHYLENE BLUE  
 Selective saturation of organic dyes by monochromatic light for high speed switches and optical pulse amplifier 04 p0533 A66-14329  
 Photoeffect sensitization in n-and p-type semiconductors by dyes having n-or p-type photoconductivity 08 p1179 A66-19640  
 Photoionization of leucocarbinals and leucocyanides of malachite green, crystal violet and sunset orange dissolved in straight chain alcohols and chlorinated hydrocarbons 14 p2232 A66-27374  
 Blood flow measurement by indicators by taking samples in situ-dyes, thermodilution, krypton 85 14 p2230 A66-27552  
 Hole burning in bleachable absorbers used as laser Q-spoiler 15 p2517 A66-29387  
 Reversible bleachable dye-solutions for expander elements in laser 15 p2517 A66-29388  
 Q-switched ruby laser output increased by use of saturable dye solution in laser cavity 20 p3576 A66-37290

## DYNAMIC CONTROL

- Dynamic system motion control analyzed by nth order system of nonlinear differential equations 03 p0392 A66-12528  
 Solving method for dynamic equation system describing controlled object element having distributed relationships 04 p0502 A66-13493  
 Charting for dynamic map displays preparatory to SST operations 07 p1068 A66-17705  
 Dynamic Navigation System /Dynav/ for providing aircraft velocity and position-fixing information from VLF Doppler range rates 08 p1252 A66-19507  
 Optimization of terminal state of controlled system when equations of motion contain derivatives of control parameters 11 p1674 A66-22350  
 Dynamic characteristics of human operator in tracking system under spaceflight conditions onboard Voskhod II spacecraft 11 p1648 A66-23047  
 Systems design of automatic dynamic control for piloted aircraft, discussing stability, accuracy, response and behavior to external perturbations 12 p1803 A66-24090  
 Charting for dynamic map displays preparatory to SST operations 13 p2125 A66-25869  
 Electronic predictor instruments for dynamic control and simulation and possible application to lunar spaceship 13 p2048 A66-25896  
 Markov parametric algorithm for effective construction of minimal realizations of linear state-variable finite-dimensional dynamical systems from input-output data 13 p2053 A66-26084  
 Systems analysis, discussing mathematical model formulation and control 15 p2472 A66-29369  
 Matrix formulation of output controllability conditions for dynamic systems 16 p2673 A66-31587  
 Mathematical analysis of axioms that provide local definition of generalized control systems 17 p2898 A66-31868  
 Acquisition phase of attitude control function of space vehicle, using noisy measurements on one state 20 p3658 A66-36867  
 Optimal averaging theories of controls of dynamic systems 22 p3885 A66-40683

## DYNAMIC LOAD

- Aircraft crash loads and motion prediction by set of equations with results correlated by experiments on Lockheed 1649A and Curtiss C-46 01 p0009 A66-10071  
 Matrix analysis of response of geometrically nonlinear structures to prescribed dynamic loading and effects of thermomechanical midplane preload in prediction of natural frequencies and mode shapes 01 p0148 A66-10135  
 Analytical landing simulation to analyze dynamic loads and aircraft response, particularly high sink speed landing gear [SAE PAPER 650845] 01 p0011 A66-10835  
 Characteristics of partially clamped corrugated membrane, investigating effect of forces of clamping

- friction 01 p0160 A66-11182  
 Dynamic indentation of metals with conical projectiles and dynamic tip flattening of projectiles, noting inertia and strain rate effect 02 p0243 A66-11691  
 Behavior of materials under dynamic loading - ASME Colloquium, Chicago, November 1965 02 p0299 A66-11849  
 Plastic deformation of metals under wide range in strain rate 02 p0245 A66-11852  
 Structural dynamics of XC-142A tilt-wing VTOL aircraft including flutter, vibration, environmental acoustics, etc [AIAA PAPER 65-790] 03 p0318 A66-12559  
 Stress distribution measurement by vibration method, applying hand-held extensometer place by place on surface of structure subjected to dynamic load of finite amplitude [AIAA PAPER 65-785] 03 p0438 A66-13069  
 Integrated circuit testing noting dynamic test system capabilities 04 p0491 A66-13385  
 Structural dynamic load and instability problems in launch vehicles and spacecraft in lunar exploration emphasizing reliability, crew safety and mission success 04 p0585 A66-13549  
 Design analysis related to structures using materials exhibiting inelastic responses, noting deformation analysis for operational loads and instability analysis for structural failure 06 p0963 A66-16473  
 Metal powder behavior during dynamic and static pressing by energy release of high explosives 07 p1038 A66-18160  
 Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 08 p1308 A66-18996  
 High precision transient measurement of submicrosecond response of shock-loaded materials by instrumentation techniques and target alignment 08 p1226 A66-19694  
 Axisymmetric wave motion in thin walled elastic spherical shell under normal load uniformly distributed over small segment 08 p1315 A66-19763  
 Photoelastic measurement of dynamic stresses and loading of structures, examining impact stress phenomena, stress waves, vibrations, stress distribution, etc 08 p1316 A66-19805  
 Displacement bound theorems for work hardening continua subjected to impulsive loading in inelastic continua 11 p1781 A66-22610  
 Dynamic stability of cylindrical shell subjected to uniform radial pressure 12 p1956 A66-23585  
 Uniqueness theorem for dynamically loaded rigid-plastic and rigid-viscoplastic idealizations of deformable bodies 12 p1962 A66-23999  
 Motion equation for plastic deformation of simply supported beam under impulsive loading 13 p2198 A66-26113  
 Dynamic snap-through buckling of shallow spherical caps of elastic material 14 p2406 A66-27998  
 Structural design load prediction and data collected verification of methods and magnitude by Minuteman flight testing 14 p2392 A66-28000  
 Dynamic elastic deflections of shallow circular arch under dynamic pressure loading, solving nonlinear integro-differential motion equation by Galerkin method 15 p2610 A66-29284  
 Ballistic pendulum technique to measure permanent plastic deformation of shallow circular arches subject to explosive impulse loading [AIAA PAPER 65-408] 15 p2610 A66-29294  
 Response of aerospace structures to in-flight dynamic loads in HF range 16 p2813 A66-30446  
 Flight Load Survey program, written in Fortran IV, for accurate and rapid sounding of wind-induced loads on aerospace launch vehicle [AIAA PAPER 66-470] 16 p2811 A66-31473  
 Steady-state and dynamic characteristics of full circular bearing and centrally loaded arc bearing presented in design charts for turbulent lubrication analysis [ASME PAPER 66-LUBS-4] 17 p2931 A66-33178  
 Mechanical reliability research and

- development for space systems, noting effect of random dynamic loading, fatigue damage, etc 20 p3573 A66-37959  
 Inelastic buckling of rod with initial slight sinusoidal deflection subjected to short-term longitudinal compressive dynamic load 20 p3672 A66-38268  
 Dynamic buckling of circular cylindrical aluminum shells subjected to axial blast loads [AIAA PAPER 66-82] 21 p3828 A66-38728  
 Prediction characteristics of separated turbulent boundary layers in compression corners used to determine aerodynamic heating distributions and dynamic loading of supersonic vehicles 21 p3724 A66-38730  
 Vibrational creep phenomenon occurring when small dynamic loads are superposed on static loads in thin wall steel tube 21 p3830 A66-38983  
 Calculating method for parachute opening forces, system velocity, cloth pressure loading and filling time for horizontal and vertical deployment conditions 22 p3844 A66-40590  
 Steady and dynamic loads on tandem rotor, controls and airframe flight tested with Army helicopter, using automatic data processing [AIAA PAPER 66-735] 23 p4008 A66-41324  
 Energy method applied in determining upper bounds on displacements due to static and dynamic loading 24 p4288 A66-42273
- DYNAMIC MODEL**  
 Dynamic model of multistable elements noting synchrotron and spectrotron 03 p0344 A66-13046  
 Expected rigidity spectrum of variations in framework of dynamic piston model of Forbush effect 09 p1438 A66-20213  
 Numerical dynamic predictor for control systems disturbed by random noise, discussing Fokker-Planck equation, Crank-Nicolson difference model, etc 11 p1680 A66-23279  
 Orientation control of orbital astronomical observatory examined, using dynamic model consisting of three independent subsystems, each with one degree of freedom 12 p1829 A66-24318  
 Existence theorem of recurrent solutions to differential equations defined in Banach space for dynamic and nondynamic systems 16 p2735 A66-30785  
 Dynamic model of multistable elements, noting synchrotron and spectrotron 18 p3088 A66-35009  
 Dynamic system parameters substituting integral equation for differential equation of motion, noting application to nonlinear, differential and PDE systems 19 p3325 A66-35987  
 Experiments and model for adaptation of human controllers to sudden changes in plant dynamics in time-invariant situations 20 p3508 A66-36860  
 Mathematical model of linear guidance law to dynamical system, noting reduction of two-point boundary value class error 21 p3765 A66-38870  
 Existence theorem of recurrent solutions to differential equations defined in Banach space for dynamic and nondynamic systems 22 p3940 A66-40447  
 Nonlinearity and time variability dynamic models of human operators in manual control systems 23 p4029 A66-41574
- DYNAMIC MODULUS**  
 Stress-strain behavior of tungsten fiber-reinforced copper composites, discussing room-temperature tensile and dynamic-modulus tests 05 p0702 A66-15324  
 Oxygen content effect on recovery of cold worked tantalum investigated by measuring Snoek damping, electric resistivity and dynamic E modulus 11 p1717 A66-22997  
 Ultrahigh-speed photographic recording of dynamic stress-optic patterns in high photoelastic modulus materials 20 p3670 A66-37741
- DYNAMIC PRESSURE**  
 Dynamic behavior of aircrew breathing equipment considering cyclic flow response tests, stability problems, measurement techniques and human respiratory impedance 03 p0329 A66-13350  
 Fracture time for thin spherical shells subjected to internal blast

loading 04 p0586 A66-13411  
 Piston pressure gauge performance characteristics, calculating piston velocity and work and presenting viscosity coefficients for glycerine and oils 04 p0519 A66-13757  
 Dynamic environmental influences on man during space flight covering force fields, inertial forces due to acceleration and methods of protection 04 p0466 A66-14074  
 Resistance strain gauge measuring propagating dynamic strains, noting independence of waveform, effect of gauge length, time and amplitude errors, etc 13 p2198 A66-26225  
 Stress wave propagation in inhomogeneous rod applied to measurement of dynamic overpressure on moving vehicle subjected to sudden intense blast  
 loading 14 p2409 A66-28398  
 High-explosive driven shock tubes, as sources of short duration high-pressure supersonic pulses, applied in accelerating large objects 16 p2674 A66-30423  
 Control of pneumatic tire tread design parameters to limit or delay hydrodynamic pressure buildup 18 p3052 A66-34199  
 Ballistic reentry vehicle recovery via low speed water impact or air snatch after vehicle has flown unperturbed trajectory down to altitude of maximum dynamic pressure 22 p3986 A66-40597  
 Compressive strain rate testing of Al, Ti, pyrolytic graphite, lucite and micarta, noting techniques and results 24 p4227 A66-42138

**DYNAMIC PROGRAMMING**  
 Optimum control and stability of processes described by system of partial differential equations 01 p0051 A66-10705  
 State assignment effect on sequential circuit reliability represented by Markov chain, using iterative assignment method with dynamic programming 02 p0207 A66-11521  
 Time optimization problem involving dynamic programming, boundary value problem, differential equations and optimal control 03 p0349 A66-12687  
 Dynamic programming applied to numerical solution of optimization problems of flight mechanics 04 p0584 A66-13523  
 Bayes risk function of sequential games, discussing recurrence formula, decision rule and approximate computational method in pattern recognition problems 05 p0639 A66-15838  
 Accurate light-weight self-contained low-cost inertial autonavigational system including gyroscopes, accelerometer and DYDAN computer 07 p1076 A66-17793  
 Computational reduction of high speed memory requirements in solving optimization problems by dynamic programming and supersonic transport trajectory application 07 p1004 A66-17976  
 Optimum processes in systems with distributed parameters described by partial differential equations 08 p1202 A66-19710  
 Stochastic optimal control problem solution by dynamic programming and relation to interplanetary guidance 09 p1360 A66-19908  
 Dynamic programming in linear vector system and application in switching system 09 p1393 A66-19909  
 Dynamic programming approach to nonparametric problem in calculus of variations 09 p1394 A66-20131  
 Multistage extremum searching process leading to development of dynamic programming system, discussing application 09 p1362 A66-20628  
 Optimal control by random sequences, dynamic programming and Wald sequential analysis 09 p1362 A66-20644  
 Existence of optimal stationary policy in Markov decision process in study of asymptotic behavior of recurrence relations in dynamic programming 09 p1397 A66-20646  
 Dynamic programming applied to satellite intercept and rendezvous problems 09 p1362 A66-20651  
 Optimum control and stability of processes described by system of partial differential equations 11 p1675 A66-22617  
 Algorithm for optimal parameter choice in reliability control of complex systems, based on dynamic programming 11 p1675 A66-22623  
 Nonlinear circuit theory, discussing

invariant imbedding, dynamic programming and quasi-linearization 11 p1675 A66-22629  
 Black box analysis from input and output and estimation of subsystem switching by combination of differential approximation, quasi-linearization and dynamic programming technique 11 p1660 A66-23186  
 Dynamic programming method for approximate solution of gliding flight and minimum time to climb problems in boundary value theory 11 p1778 A66-23349  
 Manned space flight program management noting system efficiency, cost factors, reliability and performance reports based on Apollo project 11 p1789 A66-23437  
 Systems effectiveness through design function management, noting necessity of decision guide activities 11 p1789 A66-23441  
 Past and future of cost effectiveness, noting actions needed to implement growth 11 p1790 A66-23446  
 Monograph on continuous maximum principle covering design and control of industrial and process engineering systems, dynamic programming, process optimization, etc 12 p1901 A66-23534  
 Discrete-sample curve fitting using Chebyshev polynomials and approximate determination of optimal trajectories via dynamic programming 12 p1850 A66-24257  
 Deterministic optimal control, discussing Bellman dynamic programming method, Pontryagin maximum principle, orbital transfer, interplanetary guidance, etc 12 p1854 A66-24635  
 Adaptive utilization of communication satellite systems optimizing dynamic traffic handling of combined ground and satellite communications complex, noting network configurations 12 p1822 A66-24764  
 [AIAA PAPER 66-295] 12 p1822 A66-24764  
 Programming and control - International Conference, Air Force Academy, Colorado Springs, April 1965 13 p2046 A66-25339  
 Optimal control system geometry, discussing properties of interior points of limiting surfaces, maximum principle and separability concept 13 p2046 A66-25340  
 Duplex method applied to nonlinear programming by linearization of expressions with lambda algorithm and determining optimum point 13 p2046 A66-25345  
 Dual quadratic programming of dynamic response of frictionless mechanical system with one-sided constraints 13 p2117 A66-25347  
 Mathematical programming methods for solving nonlinear state-constrained discrete optimal control problems 13 p2047 A66-25352  
 Dynamic programming for stochastic systems applied in designing controller for transferring linear system from initial to final position in specified time interval 13 p2048 A66-25852  
 Dynamic programming recursive estimation of modal trajectory for nonlinear non-Gaussian noise and comparison with Bayesian estimation and case of Gaussian white noise 13 p2053 A66-26086  
 Synthesis of automatic control system for tracking random moving coordinate solved by dynamic programming methods 13 p2055 A66-26467  
 Decision theory and dynamic programming applied to problems concerning cost and weight minimization in structural engineering 13 p2207 A66-26699  
 Linear dynamic programming for unrestricted control, noting discrete phase function and unrestricted nonclassical function 14 p2266 A66-27591  
 Dynamic programming design of invariant multiloop feedback autostabilizers and matrix-Ricatti equation 14 p2268 A66-28184  
 Field theory, variational calculus, dynamic programming and Pontryagin maximum principle approaches to plasma optimal controllability 15 p2548 A66-28520  
 Liapunov method and dynamic programming of stability of motion of variable mass point in Oxyz coordinate reference system, allowing for Earth rotation effects 15 p2538 A66-29046  
 Dynamic system stability, control and observation, noting optimal system synthesis, application of functional analysis, Liapunov function and dynamic programming 15 p2470 A66-29149

Dynamic programming for optimum design of sampled data control systems 15 p2474 A66-29628  
 Three models of constrained preview control with successive target values of nonuniform importance 16 p2644 A66-31272  
 Text on relation between dynamic programming and variational calculus, noting application to Mayer problem, optimization and stochastic processes, etc 16 p2739 A66-31750  
 Dynamic programming applied to synthesis of linear optimal or suboptimal multivariable control systems in which control-signal vector depends only on certain prescribed state variables 17 p2901 A66-32291  
 Russian research dealing with optimal control functions of spacecraft powered by low thrust rocket engines 18 p3228 A66-33883  
 Adaptive subfield method for solution of variational problems by dynamic programming, applicable to pinpoint problem 19 p3310 A66-36651  
 Most likely trajectory estimation for dynamic system as observed through noisy measurement system, using iterative equation based on dynamic programming 19 p3334 A66-36682  
 Optimal control of dynamic systems with minimax type performance index, discussing application of proposed method of solution 19 p3334 A66-36686  
 Linear continuous time stochastic optimal control process, obtaining optimum performance achievable as function of total effort at initiation of optimization period 19 p3335 A66-36694  
 Optimal feedback control of linear discrete-time stochastic system with quadratic performance measure for bounded input 19 p3335 A66-36695  
 Liapunov method synthesis of time variable nonlinear multivariable systems, deriving simplified control law for tracking of linear noninteracting model 19 p3335 A66-36697  
 Optimization of time dependent systems in dynamic programming, using forward and backward algorithm 19 p3391 A66-36700  
 Dynamic programming for optimal algorithm for external control in presence of noise at system input and output 20 p3538 A66-37746  
 Reliability-maintainability cost tradeoff via dynamic and linear programming, discussing states, alternatives within states, transition rates and expected costs 20 p3568 A66-37911  
 Book on variational methods in control engineering covering optimal processes based on maximum principle, variational calculus and dynamic programming 20 p3539 A66-37985  
 Synthesis of control device for class of nonlinear sampled data system, obtaining processes with minimum control time 21 p3719 A66-39286  
 Computer simulation techniques, including stochastic phenomena and computer-computer applications performance evaluation 21 p3708 A66-39432  
 Linear dynamic programming for unrestricted control, noting discrete phase function and unrestricted nonclassical function 22 p3884 A66-40440  
 Maximum principle shown to be necessary and sufficient optimality condition for dynamic programming method for condition of existence of regular synthesis 22 p3884 A66-40531  
 Rational and optimal programming of electronic computers, noting application to structural mechanical problems 23 p4137 A66-41005  
 Recognition and prediction systems, developing criteria for resolvable arguments 23 p4041 A66-41395

**DYNAMIC PROPERTY**  
 Frequency dependence of dynamic properties of semiconductor small area ohmic contacts in volt-ampere characteristic regions when constant current and sinusoidal pulses are applied 06 p0838 A66-15893  
 Gravitational source dynamics, discussing multipole structure, mass, linear momentum, dipole moment and spin in axially symmetric field 06 p0908 A66-16131  
 Dynamic properties of contact thermal

- receivers investigated with aid of digital computer 07 p1035 A66-18092
- Effect of relay response time on dynamic properties of automatic system incorporating linear group and relay element with pure delay 14 p2264 A66-27358
- Dynamic characteristics of automatic control plants determined, using term-by-term integration of differential equations 15 p2475 A66-29768
- Dynamics of speed optimum control system with asynchronous two-cycle activating motor 15 p2475 A66-29990
- Synthesis problem of optimum dynamic characteristics of multivariate linear control systems with random input signals 16 p2668 A66-30752
- Dynamic characteristics of built-up plates analyzed with modified Reissner principle, obtaining natural frequencies and mode shapes 17 p3022 A66-32011
- Dynamic characteristics of unsteady feedback control system during normal operation, ascertaining signal correlation and cross correlation functions 18 p3091 A66-34987
- Missile and rocket launching with static instability, deriving approximate solution for equations of longitudinal accelerated motion 19 p3470 A66-36083
- Amplifying elements ensuring required dynamic properties of resolving amplifier without calculating entire amplifier circuitry 21 p3712 A66-39252
- DYNAMIC RESPONSE**
- Dynamic responses of panel shells and complete equipment packages to acoustic inputs to improve fabrication techniques of flight structures 01 p0149 A66-10142

- Stability of linear stochastic distributed parameter dynamical systems by differential integral equations [ASME PAPER 65-WA/APM-12] 05 p0717 A66-15434
- Stability concepts of physically realistic dynamical systems which are mathematically consistent, based on Liapunov, Poincare and Lagrange principles 06 p0953 A66-16077
- Linear dynamical systems with weak coupling solved approximately, noting examples and definition 06 p0862 A66-16362
- Roller-bearing design noting reliability requirements via Palmgren-Lundberg formula 06 p0886 A66-16481
- Abiation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 07 p1141 A66-17896
- Stability of quiescent point of dynamic system with random disturbance 07 p1058 A66-17907
- Dynamic stability conditions of self-acting gas lubricated journal bearings 07 p1039 A66-18231
- Stability of motion of spherically symmetric mass of compressible gas with constant space density in absence of gravitational field 08 p1298 A66-19483
- Stellar stability in region of pure hydrostatic equilibrium and local instabilities arising from superadiabatic temperature gradients or differential rotation 09 p1448 A66-20097
- Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638
- Stability of symmetrical elastic rotor in journal bearings with flexible damped supports [ASME PAPER 65-APMW-8] 10 p1539 A66-21488
- Mathematical stabilization theory for dynamic systems from Liapunov motion stability theory and theory of games 11 p1736 A66-22639
- Sufficient conditions for asymptotic dynamic stability of linear differential system with random retardation, using Liapunov function 11 p1736 A66-22643
- Young theory for rotor blade dynamic stability 11 p1638 A66-23262
- Liapunov second method applied to interconnected differential systems 11 p1682 A66-23456
- Second order dynamical systems with time lag, negative damping coefficient and/or negative spring constant, employing Pontryagin results [ASME PAPER 65-APMW-11] 12 p1913 A66-23981
- Stability criteria for second order dynamical systems with time lag [ASME PAPER 65-APMW-12] 12 p1913 A66-23982
- Stability of linear stochastic distributed parameter dynamical systems by differential integral equations [ASME PAPER 65-WA/APM-12] 12 p1914 A66-23989
- Steady state harmonic and combination response of nonlinear dynamic vibration absorber tuned to two forcing frequencies 12 p1962 A66-24001
- Dynamic stabilization of direct discharge in magnetic field 12 p1922 A66-24215
- Quasi-optimal minimum-time controllers for high-order dynamic systems obtained by least-squares fitting points on optimal switching surface 12 p1849 A66-24253
- Probabilistic stability of random processes with distributed parameters 12 p1904 A66-24340
- Inviscid equilibrium gas stability characteristics for pointed and spherically blunt bodies in unsteady supersonic flight in Mars atmosphere 13 p2191 A66-25275
- Peripheral jet ground effect machine /GEM/ stability in pitch and roll 13 p1995 A66-25591
- Trajectory prediction for moving stochastic systems 13 p2028 A66-26476
- Dynamic instability in large of elastic body

with given initial velocity and displacement, noting example of curved beam subjected to impulsive loads 14 p2408 A66-28387

Existence and stability of periodic motions in dynamic systems applied to analysis of uniformly asymptotically stable solutions of differential equations 15 p2525 A66-28508

Sufficient conditions for recurrence and positivity of diffusion process defined by stochastic differential equation, using Liapunov function 15 p2525 A66-28512

Dynamic system constructed in three-dimensional space with trajectory stable stationary point, showing construction of analogous example in any space of odd dimensionality 15 p2536 A66-28641

Singular characteristics of dynamic systems with steady state motion, noting effect of constantly acting small perturbations 15 p2537 A66-28950

Liapunov stability of motion of heavy rigid body with fixed point moving along spherical surface 15 p2537 A66-28966

Dynamic stability differential equations and stability and instability theorems derived from them 15 p2538 A66-29044

Relation between exact and approximate solutions to equations of dynamics within finite time interval, noting stability of systems with many degrees of freedom 15 p2539 A66-29146

Steady and unsteady perturbed motion effect on solid body containing cavity filled with liquid in analyzing dynamic stability of mechanical systems 15 p2539 A66-29152

Differential equations for motion stability of systems with time delay solved, using Liapunov function 15 p2540 A66-29156

Hooke law analysis of dynamic stability of closed circular cylindrical anisotropic shell compressed by longitudinal force 15 p2609 A66-29196

Behavior, properties and related concepts of control systems, noting attainability function 15 p2472 A66-29373

Prolongations and prolongational limit sets of point useful in analysis of stability and recurrence for dynamical systems 15 p2473 A66-29374

Static and dynamic stability and operation of air cushion vehicles, emphasizing advantages of flexible skirts 16 p2633 A66-30312

Dynamic instability in undamped bellows face seals operating in cryogenic environment with torsional oscillation and diametrical rocking as primary motion [ASLE PAPER 66AM 2CE] 16 p2711 A66-30408

Spiral instability in STOL aircraft prevented by larger wing dihedral setting, noting permissible dihedral levels and tests 16 p2634 A66-31395

Dynamical attitude equations for rotational motion of set of  $n$  rigid bodies interconnected by dissipative elastic joints and subjected to arbitrary forces and torques 17 p3001 A66-32345

Dynamic Antiresonant Vibration Isolator noting design, operation and capability of passively isolating VLF vibrations with high static stiffness 17 p2929 A66-32738

Mathematical problems arising in theory of optimal control in regular dynamic systems 17 p2903 A66-33096

Dynamic systems described by nonlinear differential equations containing analytical functions for random initial conditions 18 p3091 A66-34984

Theoretical and experimental analysis of Korotkoff sounds at diastole which are interpreted as dynamic instability induced by application of pressure cuff 19 p3286 A66-36431

Dynamic stabilization of plasma column by HF magnetic field 19 p3424 A66-36557

Parameter adjustment model reference adaptive control of nuclear rocket engine, noting design parameters, system performance, propellant savings estimates and dynamic stability 19 p3398 A66-36699

Gravitational contraction of stars of one solar mass examined, using Henyey method for calculating stellar evolutionary tracks 19 p3467 A66-36791

Dynamic instability of longitudinal and transverse oscillations of rod, emphasizing

fluctuation having property of white noise with unit spectral density 20 p3670 A66-37680

LF combustion oscillation analyzed by theory of dynamical stability of closed feedback loop 20 p3681 A66-38103

Continuous group and infinitesimal transformation in linear dynamic system application, considering linear network 20 p3539 A66-38148

Dynamic instability in linear vibrating system when linked to unlimited energy reservoir 21 p3825 A66-38577

Approximate method for solution of dynamic stability problem of shafts subjected to pulsating moment and constant axial force 21 p3743 A66-38621

Control of magnetic hysteresis mechanism, increasing damping torque for use in gravity-oriented satellite stabilization 21 p3820 A66-38862

Radio astronomy satellite with extendible antennas achieves gravity gradient stabilization while receiving electromagnetic radiation, analyzing dynamic behavior and effect of passive damper 21 p3820 A66-38863

Stability problems of solid body with liquid filler, noting small partial damping of liquid 21 p3770 A66-38972

Dynamical system stability examined using direct method of Liapunov, noting application to periodic solutions 21 p3718 A66-39104

Dynamic stability and transonic flow response to arbitrary perturbations of solar and stellar winds in steady state 21 p3810 A66-39556

Lateral vibration of rotating bar with circular cross section under simultaneous axial force and torque, noting eigenvalue equations and damping effects 21 p3833 A66-39598

Movchan theorem for stability of continuous systems, considering example of vibrating string and derivation of stability criterion for nonlinear elasticity 22 p3990 A66-40134

Hamilton principle, motion equations, natural boundary conditions and constitutive relations for finite deformation of one-dimensional curved elastica and radial motion and stability of circular ring 22 p3990 A66-40138

Static and dynamic stability and operation of air cushion vehicles, emphasizing advantages of flexible skirts 22 p3848 A66-40393

Dynamic stabilization of direct discharge in magnetic field 22 p3957 A66-40579

Three-dimensional parachute dynamic stability theory 22 p3845 A66-40593

Loads on bodies in wakes resulting from crossflow at submerged body or from wake translation over submerged body, noting dynamic instability 22 p3846 A66-40607

Dynamic characteristics of rotary wing decelerator and recovery system obtained, using frequency oscillation technique [AIAA PAPER 66-733] 22 p3893 A66-40624

Dynamic stability and aerodynamic damping derivative of Apollo launch escape vehicle, using wind tunnel tests [AIAA PAPER 66-757] 22 p3895 A66-40651

Wind tunnel free-flight testing of reentry vehicle dynamics, noting capability for simultaneous two-dimensional viewing of model trajectories [AIAA PAPER 66-774] 22 p3895 A66-40654

Time lag effect on dynamic stability determined, using wind tunnel tests with 10 degree cone as test body simulating ablation process by gas injection into boundary layer [AIAA PAPER 66-757] 23 p4008 A66-41330

Transcendental case of dynamical asymptotic stability of motion of autonomous system with one zero 23 p4090 A66-41553

Trajectory stability of diffusion-type random Markov process described by Ito stochastic differential vector equations 23 p4085 A66-41554

Nonlinear damping effectiveness in stabilizing time delayed systems compared to linear damping 23 p4091 A66-41692

Ablation effects on static and dynamic stability of reentry vehicle [AIAA PAPER 66-51] 24 p4283 A66-42770

Nondeviated absorption of radio waves in intermediate region between E and F layers 01 p0031 A66-11051  
E-layer disturbances caused by particles impinging upon atmosphere during auroras noting ionization, X-rays and electrical conductivities 03 p0365 A66-12858  
Magnetoionic splitting of radio signal in E and F layers, comparing calculated and theoretical gyrofrequency values 04 p0482 A66-13861  
Dense sporadic E cloud effects on high latitude HF backscatter observation 05 p0667 A66-14792  
Electrostatic field from E region and effect on motion of electrons trapped in magnetosphere 07 p1027 A66-17252  
Ionospheric E region inhomogeneity investigated by photographic recordings of reflected signal fading 08 p1214 A66-19049  
Short wave radio transmission and reception, examining masking by E region, focusing and attenuation due to scattering at ionospheric and other nonuniformities 08 p1186 A66-19780  
Measurement of horizontal ionospheric drifts in E and F regions over magnetic equator 11 p1696 A66-22381  
Changes in current kinetic theory of NO-O reaction, based on observation of release of nitric oxide in E region 11 p1703 A66-23494  
Diurnal and seasonal altitude variations of E and F layers analyzed for geomagnetic activity from rocket measurement of electron concentration 12 p1869 A66-24269  
Spectrum analysis of nondiurnal E layer variation at Washington, D.C., show relationship of 27-day variations of sunspot number and E layer critical frequency 12 p1874 A66-24845  
Unique ionospheric electron density distribution from ionograms from valley between E and F region 14 p2283 A66-27126  
Cellular circulation in ionospheric E region 14 p2289 A66-28333  
E layer ionization and characteristic number as affected by solar X radiation in 44-60 angstrom range 15 p2487 A66-29097  
Occurrence of collisions between ionized and neutral particles based on analysis of spectrum diffused by E region 15 p2491 A66-30021  
Atomic ions of meteoric origin indicated as source of midlatitude E region in IQSY rocket measurement 15 p2492 A66-30033  
Ionospheric absorption effects in D and E layers, noting refraction role and effective collision frequency 15 p2493 A66-30036  
Ion composition and effective recombination coefficient variation of ionosphere in study of X and UV radiation ionization of E layer 15 p2495 A66-30059  
Effect of meteor activity on fading of radiowave reflected from E region 16 p2692 A66-30331  
Electron density in E-and D-regions above Kjeller, Norway, from rocket measurements of absorption and height of reflection of radio waves 16 p2692 A66-30332  
Lyman alpha ionization of nitric oxide and ion molecule reactions accounting for ionic nitric oxide content of D and E regions 16 p2694 A66-30705  
Equatorial ionospheric drifts observed at Ibadan, Nigeria, during solar activity minimum, and relation to diurnal variation of sunspot cycle and drift velocity variations in E and F region 16 p2700 A66-31759  
Dependence of electron density in E layer on Sun zenith distance, based on new

ionospheric data and ionization neutralization phenomena 17 p2919 A66-32880  
Anomalous behavior in correlating maximum electron density dependence on solar zenith distance and asymmetry in critical frequency for E layer 17 p2919 A66-32881  
Relation between optical and electrical properties of interplanetary dust in upper atmosphere and comparison with twilight-optical and ionospheric parameters 18 p3105 A66-33961  
Diffusion spectrum modifications due to positive ions collision with neutral particles observed through ionospheric probe in E layer 19 p3346 A66-35590  
Electron injection and E-layer buildup in Astron device theoretically studied by one-dimensional model, using Green functions for self-electric and self-magnetic fields 19 p3423 A66-36552  
Comparison of magnitude of collision frequency of electrons in D and E regions obtained by satellites, rockets, etc, with cross sections measured in laboratory 19 p3352 A66-36627  
E-layer critical frequency variations conditioned by solar zenith angle, taking account of transport, gradient and time variations of height scale 21 p3732 A66-38664  
Short wave radio transmission and reception, examining masking by E region, focusing and attenuation due to scattering at ionospheric and other nonuniformities 21 p3703 A66-38776  
Collision frequency in E and D regions of ionosphere for electrons and neutral molecules 22 p3906 A66-39948  
E layer properties noting role of pressure, temperature, composition and recombination coefficient when varying with height and time 22 p3907 A66-39960  
Simultaneous long term ionospheric variation in midday averages of critical frequency E and F-2 at Washington, D.C. before and after increased geomagnetic activity 22 p3914 A66-40560  
Relation between diurnal, seasonal and cyclic variations of stratifications in E layer and fine structure of sporadic E layer and E-2 layer 22 p3914 A66-40761  
Enhanced activity in ionospheric E region at Cape Hallett and Campbell Island for information on diurnal variation and sunspot cycle changes of overhead and auroral activity 22 p3916 A66-40809  
Rocket observation of upper atmospheric wind around ionospheric E layer by sodium release method, noting cloud drift 24 p4199 A66-42466

Speech communications effects and temporary threshold shift reduction characteristics of British-made earplugs under quiet and high intensity impulsive noise backgrounds 24 p4168 A66-42857

**EARDRUM**

Otitic barotrauma caused by difference between atmospheric pressure and middle ear cavity pressure arising during flight, compression chamber tests, etc, and leading to deafness 10 p1488 A66-22107

**EARLY BIRD SATELLITE**

Spin-stabilization system for attitude and orbit control of synchronous Syncom and Early Bird satellites 01 p0145 A66-11133  
Early Bird satellite structures and test problems 01 p0145 A66-11134  
Early Bird satellite technology including design parameters, structure, power supply, control system and test program 06 p0958 A66-15921  
Traffic needs of communications satellites including random-passing, station-keeping /phased-passing/ and geostationary satellites 06 p0959 A66-16495  
Diurnal variations of strength and polarization of VHF signals from synchronous Early Bird satellite 08 p1185 A66-19537  
Receiving equipment for Early Bird satellite at Fucino, Italy 09 p1354 A66-20559  
Commercial communications satellite for random, phased and synchronous medium altitude, noting design, specifications and operation 11 p1777 A66-22454  
Early bird hydrogen peroxide control system maneuvers to place satellite into final stationary position [AIAA PAPER 66-262] 12 p1954 A66-24736  
Effective radiated power receiving sensitivity, bandwidth and nonlinear performance of Early Bird satellite [AIAA PAPER 66-263] 12 p1820 A66-24737  
Performance of Early Bird communications satellite and associated ground stations [AIAA PAPER 66-264] 12 p1820 A66-24738  
International Telecommunications Satellite /INTELSAT/ Consortium and COMSAT participation in program [AIAA PAPER 66-332] 12 p1982 A66-24799  
Latitudinal variations of ionospheric irregularities studied via synchronous and 1000 km satellites, noting Early Bird data, scintillation index graphs, radio star signals, etc 15 p2496 A66-30071  
Global TV communications systems utilizing Telstar and Early Bird 17 p2875 A66-32900  
Early Bird satellite project using proven designs in spacecraft, launch vehicle and Earth stations to provide reliable microwave link between North America and Europe for TV and telephone 22 p3865 A66-40068

**EARLY WARNING SYSTEM**

**SA BALLISTIC MISSILE EARLY WARNING SYSTEM /BMEWS/**  
Effective early warning system to enable pilot to cope with clear air turbulence /CAT/ 14 p2326 A66-27819  
Turbulent refractivity spectrum and optimization of airborne radar CAT detectors 22 p3944 A66-40429

**EARTH**

Color and light intensity gradient of residual light scattered and refracted into umbra of Earth shadow measured during lunar eclipse 17 p2999 A66-32068  
Source distributions of UV and X-ray emission in corona and chromosphere determined from flight of spacecraft-borne instruments into Earth shadow 17 p3001 A66-32465  
Water vapor mass below upper limit of Earth cloud cover estimated through Earth brightness measurements 21 p3735 A66-39360

**EARTH ALBEDO**

Effectiveness of albedo and Earth radiation simulation, examining fixed chamber and fixed vehicle techniques 02 p0211 A66-11216  
Basic hypothesis concerning Earth radiation belts origin, discussing neutron albedo and effects of interaction between plasma and magnetic field 02 p0283 A66-11808  
Terrestrial albedo of 40 to 190 kev X-rays measured, using directional detectors at balloon altitude 03 p0419 A66-12683  
Viewing geometry in interpretation of reflected solar radiation data from Tiros IV 04 p0515 A66-13673  
Spectral albedo of deep body of water from 4800 to 6100 angstroms by Sobolev approximate method 05 p0674 A66-15418  
Neutron albedo measurements on polar orbiting satellites 07 p1120 A66-17981  
Neutron albedo flux at 45 degree geomagnetic latitude 07 p1121 A66-17982  
Survey of U.S. and U.S.S.R. literature on processes responsible for composition and spatial distribution of radiation

- belts 08 p1285 A66-19774  
 Height dependence of albedo in Earth upper atmosphere, calculating total quantity of neutral hydrogen in 11 p1699 A66-23044  
 ionosphere  
 Solar and sky radiation and short wave albedo measured at altitudes approaching 20,000 ft in high Himalayas 11 p1765 A66-23384  
 Rocket-borne neutron detector measurements of neutron albedo and intensities at various geomagnetic latitudes 18 p3199 A66-34887  
 Earth albedo estimation, backscattered interplanetary radiation and resonance scattering of dayglow 20 p3553 A66-38194  
 Survey of U.S. and U.S.S.R. literature on processes responsible for composition and spatial distribution of radiation belts 21 p3809 A66-38770

## EARTH ATMOSPHERE

## SA IONOSPHERE

## SA LOWER ATMOSPHERE

## SA MID-LATITUDE ATMOSPHERE

## SA TROPOSPHERE

- Earth atmosphere, discussing properties of high altitude neutral atmosphere combined with measurement of solar output variations 05 p0675 A66-15743  
 Manned orbiting astronomical observatories would enable astronomer astronauts to erect large sensors in space and avoid atmospheric effects 13 p2192 A66-25689  
 Book on methods in computational physics including numerical simulation of Earth atmosphere, computation of propeller design and stellar evolution, etc 16 p2735 A66-30942  
 Thermal synthesis of amino acids from methane-ammonia-water mixture passing through Earth-crust materials 17 p2851 A66-32089  
 Thermal escape of neutral hydrogen and distribution in Earth thermosphere, noting collision in transition regions 20 p3549 A66-37292  
 Low altitude measurements of trapped electrons, noting energy spectrum and longitudinal variations of electrons, including instrumentation 20 p3638 A66-38307  
 Mechanism for connection between seismic Earth and solar activity on atmosphere and lithosphere of Earth 22 p3914 A66-40767

## EARTH CORE

- Dynamo origin of geomagnetic field, involving creation of toroidal and polar fields by nonuniform rotation 08 p1215 A66-19117  
 Toroidal fields in Earth fluid metallic core brought to surface, causing changes with time in geomagnetic field 09 p1369 A66-19877  
 Phase-change hypothesis of structure of Earth, describing liquid core as product of static pressure crushing outer electron shell in solid mantle material 09 p1375 A66-20945

## EARTH CRUST

- Probability models for Earth crustal structure applying potential field separation technique, noting role of gravitational field and Wiener filtration theory 01 p0061 A66-10479  
 Lonar Lake depression explained by cryptovolcanic activity or meteorite impact 03 p0365 A66-12721  
 Gravitational field and crust of Earth related to Earth shape 05 p0675 A66-15748  
 Viscous fluid model estimates of crustal thickness and free-air anomaly compared with measured free-air anomalies and seismic depths of Puerto Rico trench and mid-Atlantic rise 06 p0877 A66-16786  
 Relative isotopic abundance of potassium 40 in terrestrial and meteoritic samples 11 p1770 A66-22572  
 Probability models for Earth crustal structure, applying potential field separation technique, noting role of gravitational field and Wiener filtration theory 12 p1868 A66-23877  
 Electrical conductivity of Earth interior from data concerning annual geomagnetic variations for all years of solar cycle 15 p2487 A66-29101  
 Book on structural geology and tectonics for undergraduates 16 p2692 A66-30267  
 Velocity reversals in Earth crust and low velocity zone of upper lithosphere 18 p3104 A66-33913  
 Crestone crater morphology indicates that

- it is not meteoritic or cometary in origin 18 p3106 A66-34462  
 Mechanism for connection between seismic Earth and solar activity on atmosphere and lithosphere of Earth 22 p3914 A66-40767  
 Optimum filter for separation of principal geomagnetic field and magnetic field associated with Earth thin magnetoactive crust layer 22 p3915 A66-40785

## EARTH CURRENT

## SA GEOELECTRICITY

- Continental structure and drift from convection currents in Earth mantle indicate depth of several hundred kilometers 03 p0360 A66-12378  
 Convection pattern changes in Earth mantle and continental drift as evidence of cold origin of Earth 03 p0361 A66-12379  
 VLF radio wave propagation in Earth ionosphere waveguide assuming finite ground conductivity 04 p0475 A66-13429  
 Terrestrial electrical currents discussing Soviet studies on short-period fluctuations of terrestrial electromagnetic field in Arctic and Antarctic region 05 p0674 A66-15225  
 Fine structure of magnetic storm discussing prestorm, initial stage and climax of fluctuations of Pc I and Pi I 07 p1027 A66-17308  
 Natural electromagnetic field of Earth microvariational peculiarities 07 p1027 A66-17309  
 Correlation relations between cosmic ray neutron intensity, horizontal magnetic field strength, critical wave frequency and terrestrial currents 08 p1283 A66-18706  
 Threadlike equatorial current ring and effect on geomagnetic cut-off rigidity of directed cosmic radiation 12 p1941 A66-24172  
 Effect of equatorial current ring distributed over globe on geomagnetic cut-off rigidity of cosmic rays 12 p1941 A66-24173  
 Earth electrical conductivity, determined from data concerning northern and vertical components of cyclic geomagnetic variations, suggests increases with depth 12 p1871 A66-24297  
 Natural telluric currents in Arctic Ocean and relation to geomagnetic variation observed on drifting station 15 p2488 A66-29113

## EARTH MANTLE

- Velocity and density perturbation of Earth mantle in inversion of eigenperiods 05 p0673 A66-15046  
 Concept of melting within Earth, effect on thermal model of Earth and differentiation of radioactive materials within Earth 09 p1370 A66-19878  
 Phase-change hypothesis of structure of Earth, describing liquid core as product of static pressure crushing outer electron shell in solid mantle material 09 p1375 A66-20945  
 Celestial body size, composition and impact induced changes in Earth rotation from mantle data 10 p1531 A66-21286  
 Review of experimental capabilities for reaching pressure and temperature conditions prevailing in Earth mantle and core, including bibliography 17 p2918 A66-32661

## EARTH-MARS RENDEZVOUS TRAJECTORY

- Venus swingby used to decelerate manned spacecraft returning from Mars 10 p1609 A66-21928  
 Six midcourse guidance techniques, noting Earth-Mars and Earth-Venus trajectory with small and large injection error 13 p2123 A66-25252

## EARTH-MOON SYSTEM

- Zodiacal light position considering ecliptic, based on photoelectric observation 01 p0061 A66-10275  
 Solar influence on libration point satellite motion for 2500 days in vicinity of Earth-Moon system [AIAA PAPER 65-88] 02 p0288 A66-11556  
 Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 03 p0427 A66-12920  
 Approximate value of mass of Moon calculated, using noncalculus derivation of Newton modification of Kepler third law 08 p1296 A66-19380  
 Earth-Moon distance measurement using laser technique 09 p1453 A66-20129  
 Design tolerances in construction and

- operation of dual-field mechanical simulator for satellite orbits 09 p1364 A66-20589  
 Variation of Earth-Moon distance and inclination angle of orbital planes during period of tidal evolution 14 p2380 A66-27269  
 Possible origin of lunar maria, suggesting they may be scars of mechanical damage wrought on lunar hemisphere by disruptive tides of Earth 14 p2384 A66-27900  
 Variation in Earth-Moon distance as result of meteoritic impact 15 p2597 A66-29261  
 Stability of spacecraft motion in Earth-Moon system near equilateral libration point 16 p2810 A66-31252  
 Spacecraft mission to libration centers of Earth-Moon system for collecting meteoroids and photographic program carried out for establishing presence of material at centers 18 p3236 A66-34955  
 Libration point motion in restricted four-body problem and stable trajectory determination for Earth-Moon-Sun system, noting effect of initial configurations of system [AIAA PAPER 65-684] 19 p3461 A66-35891  
 Lunar origin, tidal evolution of Earth-Moon system, thermal background of lunar interior, figure and composition of Moon and radial density profile 20 p3647 A66-37038  
 Terrestrial penumbra density variation with solar activity during lunar eclipses in 11-year cycle 22 p3976 A66-39857  
 Lunar orbit evolution caused by tidal friction in Earth and Moon interiors 22 p3985 A66-40956

## EARTH-MOON TRAJECTORY

- Nonplanar trajectory originating near Earth and passing close to Moon in restricted three-body problem 08 p1292 A66-19146  
 Space probes and Earth-Moon libration points 13 p2186 A66-26012  
 Earth Moon trajectories with consecutive collisions treated, using Birkhoff transformation in planar restricted three-body problem [AIAA PAPER 65-86] 14 p2381 A66-27422  
 Cisunar libration point as place of departure, rendezvous and parking for lunar operation 14 p2390 A66-28450  
 Radiation environment in near Earth space and effect on humans during space flight to Moon 15 p2435 A66-29454  
 Three-body problem of cisunar space flight, noting effect of solar gravitational field on spacecraft trajectory 16 p2804 A66-31332  
 Earth shadow enlargement during lunar eclipse, noting contacts of lunar formations with shadow 17 p3000 A66-32341  
 Accuracy requirements for two-way spacecraft Earth-Moon orbit trajectory are greater for minimum initial velocity and in lunar proximity, considering solar gravity perturbation effect 19 p3460 A66-35721  
 Periodic motion of artificial satellite around Earth and Moon 19 p3464 A66-36369  
 Iterative guidance mode with application to three-dimensional upper stage vacuum flight 21 p3768 A66-38897

## EARTH MOTION

- Review of current knowledge and techniques for stabilizing test pads for high precision inertial guidance and control components 01 p0051 A66-10028  
 Annual motion of poles of Earth consisting of solid shell and liquid core, considering annual motion of inertia pole due to air mass displacements 08 p1220 A66-19456  
 Weak latitudinal waves observed by Orlov method at three midlatitude stations from 1924 to 1930 10 p1530 A66-21260  
 Nutation constant for absolutely solid Earth from recent astronomical unit and lunar mass measurements 12 p1867 A66-23513  
 Secular motion of Earth pole from 1900 to 1958 measured via harmonic analysis, noting rate and distance 12 p1868 A66-23669  
 Ancient solar eclipses analyzed, determining secular decrease in angular velocity of Earth by computation based on ephemeris time and astronomical constants 17 p2999 A66-32067  
 Annual motion of poles of Earth consisting of solid shell and liquid core, considering annual motion of inertia pole due to air mass displacements 18 p3106 A66-34485  
 Elastic dissipation of Earth torsional modes estimated by generalized elastodynamic

- equation 18 p3108 A66-34734
- Nutation constant for absolutely solid Earth from recent astronomical unit and lunar mass measurements 20 p3549 A66-37027
- EARTH ORBIT**
- Lunar inequality on time of perihelion passages of Earth 04 p0576 A66-13461
- Earth satellite elliptical orbit intersection point with Earth shadow determined by exact solution of fourth-power algebraic equation with respect to  $\tan$  E/2 17 p2995 A66-31848
- EARTH ORBITAL RENDEZVOUS /EOR/**
- Gemini VII star sightings analyzed, using handheld space sextant in Gemini VI, discussing effect of bias, timing, angle measurement and trajectory errors 21 p3767 A66-38893
- EARTH RADIATION**
- S TERRESTRIAL RADIATION**
- EARTH ROTATION**
- Corrections for apparent drift rate of free ideal directional gyroscope due to Earth rotation 02 p0290 A66-11986
- Time observations and variation of rotation speed of Earth 03 p0366 A66-13009
- Migration of north and south poles by angular displacement of Earth mass, explaining geographical distribution of flora and fauna, past and present 05 p0667 A66-14730
- Spherical harmonic analysis of diurnal surface pressure oscillation indicates that it can be represented by wave traveling westward with Sun 07 p1027 A66-17224
- Excitation and damping of polar motion treated as series of stochastic process in determination of damping coefficients and constants 07 p1028 A66-17420
- Coincidence of long-term variation of Chandler period of motion for Earth pole and solar activity cycles 07 p1028 A66-17524
- Fluctuations since 1956 in period of Earth rotation obtained in universal atomic time with photographic zenith tube at Neuchatel Observatory 07 p1135 A66-17633
- Earth daily diurnal rotation rate variation, assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 08 p1220 A66-19787
- Maximum ballistic rocket trajectory range in view of Earth rotational and curvature effects 11 p1734 A66-23346
- Corrections of sight-line velocities for Earth diurnal rotation and annual revolution in observations of Sun 12 p1949 A66-24246
- Liapunov method and dynamic programming of stability of motion of variable mass point in Oxyz coordinate reference system, allowing for Earth rotation effects 15 p2538 A66-29046
- Average rotational speed of upper atmosphere above 200 km evaluated from changes in orbital inclinations of 13 satellites 15 p2496 A66-30082
- Atomic maser clocks rotation with Earth, deriving formula for relative drift at widely separated localities arising from local gravitational potentials 16 p2745 A66-30187
- Random variation of Earth rotation relation to amplitude of free nutation 16 p2693 A66-30589
- Internal measurement of latitude, radius vectors and other geophysical properties from center of mass of astronomical system to space vehicle 16 p2698 A66-31386
- Transformation of tesseral harmonics under rotation in elementary and self-contained method 17 p2921 A66-33225
- Equatorward motions of auroras 17 p2923 A66-33356
- Solar activity and irregular variations in Earth rotational rate 19 p3345 A66-35272
- Epheermal georotational variations from deviations in quartz oscillator clocks of Paris and Greenwich observatories 19 p3351 A66-36370
- Iterative method for extracting annual and Chandlerian terms of variation of Earth rotation from experimental data of universal time 20 p3550 A66-37410
- Earth daily diurnal rotation rate variation, assuming solar corpuscular flux composition of plasmoids possessing quasi-force-free magnetic fields 21 p3733 A66-38783
- Time dependent behavior of temperature and density in monoconstituent atmosphere under diurnal photoheating and cooling by conduction, analyzing effect of atmosphere rotation eastward 23 p4064 A66-41678
- Lunar tidal variations, georotational velocity and calculation of Love number 24 p4198 A66-42246
- NASA Biosatellite Program exploring dynamic space flight effects on terrestrial organisms and Earth diurnal rotation effect on biological rhythm 24 p4168 A66-42675
- EARTH SHAPE**
- Modifying spherical harmonic analysis of surface geomagnetic field to account for Earth oblateness by two methods 01 p0061 A66-10615
- Refinement of theory for determining figure and size of Earth from observations of artificial satellites 01 p0062 A66-10692
- Orbits of artificial satellites for suitable variables, noting oblate shape of Earth and air resistance 02 p0285 A66-11256
- Uniform worldwide spatial triangulation grid for measuring Earth radius 03 p0361 A66-12532
- Comments on Volland paper about analytical model of Earth-ionosphere waveguide supposedly agreeing with Austin radio transmission formula 05 p0632 A66-14840
- Gravitational field and crust of Earth related to Earth shape 05 p0675 A66-15748
- Closed-form coordinate perturbations of elliptic orbits due to Earth oblateness, discussing four methods of deriving expressions 06 p0956 A66-16910
- Shape and gravitational field of Earth calculated by using N homogeneous incompressible fluid shells to represent distribution of terrestrial mass 07 p1028 A66-17422
- Effect of Earth oblateness on lifetime of satellite in time-varying atmospheric density [AIAA PAPER 66-63] 07 p1139 A66-18451
- Classical problem of diffraction of radio waves around spherical Earth 11 p1652 A66-22462
- Dynamic model of equilibrium figure of Earth, taking into account surface cooling and lunar gravitational effect 11 p1698 A66-22652
- Data on satellite orbits used for Earth figure, upper atmosphere density, solar radiation, etc. 12 p1868 A66-23637
- Flows and fractures as types of deformation occurring on Earth under huge loads of ice suggested by isostatic compensation of Antarctica, Arctic basin and glaciated region in North America 12 p1875 A66-24894
- Equations for translatory motion of lifting body moving at hypersonic speed, considering Earth sphericity, noting effect of centrifugal forces 13 p2193 A66-26448
- Minimum time-of-flight aircraft trajectory between two points with account of Earth sphericity 13 p2125 A66-26481
- Mass calculation for absorbing gases such as water vapor, carbon dioxide and ozone along oblique paths between two arbitrary points in atmosphere, considering vertical distribution, refraction and Earth curvature 14 p2284 A66-27541
- Horizon profile of Earth calculated from solutions of plane-parallel Rayleigh scattering atmosphere 14 p2328 A66-27880
- Effect of slope and curvature of Earth surface on disturbing potential, using Molodenskii integral equation, obtaining deflection of vertical, disturbing potential and Stokes constant 14 p2288 A66-28210
- Numerical integration principle in calculation of disturbing potential verified, using conical Earth model 14 p2288 A66-28211
- Refinement of theory for determining figure and size of Earth from observations of artificial satellites 15 p2483 A66-28553
- Flat Earth approximation of LF propagation theory 18 p3072 A66-34711
- Spheroidal-type seismogram study of wave generation, propagation, dispersion and attenuation in realistic spherical Earth models, especially Gutenberg-Bullen A-prime model 20 p3550 A66-37433
- IAU system of geocentric astronomical constants for ellipsoid Earth 20 p3653 A66-37762
- Upper wind evaluation by pilot and radiosonde balloon radar tracking for flat Earth and effects of Earth curvature 22 p3943 A66-40428
- Earth shape, moment of inertia and gravitational field determined from two nonlinear integral equations for potential of rotating incompressible fluid 23 p4063 A66-41202
- Mass calculation for absorbing gases such as water vapor, carbon dioxide and ozone along oblique paths between two arbitrary points in atmosphere, considering vertical distribution, refraction and Earth curvature 24 p4198 A66-42326
- Orbital plane precession due to ellipsoidal shape of Earth, discussing effect on meteorological and geodetic satellites 24 p4279 A66-42963
- EARTH SURFACE**
- Soviet, Swedish and Norwegian data on solar activity and barometric pressure, showing corpuscular flux effect on barometric pressure even at Earth surface 01 p0060 A66-10272
- Evaporation as molecular diffusion from large rough surface into random-lived internal scale turbulent eddies 02 p0223 A66-11960
- Climatic conditions at Earth surface, relation to long-term planetary trends in atmospheric circulation 05 p0712 A66-15221
- Airborne measurement of microwave emission from Earth surface and atmosphere for potential application of radiometry to weather satellite reconnaissance 05 p0675 A66-15765
- Reducing values of potential magnetic or gravitational field observed on Earth surface with weak profile to values on single horizontal plane in lower half-space 06 p0876 A66-16417
- Spectral distribution of direct sunlight at Earth surface at sea level, as function of air mass and concentration of aerosol, ozone and water vapor 09 p1375 A66-20962
- Nimbus I IR scanning radiometry for nocturnal imagery of clouds and other data, IR spectral returns and relation to image gray scale 10 p1531 A66-21519
- Effects of long-wave radiation exchange near Earth surface, extrapolating air temperature measurements to ground to estimate surface temperature, obtaining equivalent black body temperature of ground 11 p1702 A66-23155
- Twelve monthly world maps of daily means of total solar radiation incident on horizontal surface 11 p1702 A66-23156
- Compensated coordinates of artificial Earth satellites from synchronous observations at two given points on Earth surface 12 p1824 A66-24875
- Concentration distribution at Earth surface associated with precipitation of cloud of interacting particles forming dust source, due to turbulent scattering in time and space 13 p2122 A66-26248
- Accuracy of measuring method of vertical gradient of gravity force from gravity anomalies, using Numerov formula and Earth models 14 p2288 A66-28214
- Radar cross section of Earth surfaces as affected by wavelength, with reference to probing lunar surfaces 15 p2448 A66-28572
- VLF radio wave propagation in model Earth ionosphere waveguide with finite surface impedance and arbitrary height 15 p2449 A66-28598
- Soil investigation and geological map preparation from aerial photographs 15 p2505 A66-30014
- Aerial photography of Earth surface, discussing application in Earth and life sciences 17 p2925 A66-32609
- Earth surfaces reflecting and polarizing properties in aerial reconnaissance 17 p2918 A66-32611
- Gravity anomalies of unsurveyed areas of Earth surface and influence on satellite orbit perturbations 17 p2921 A66-33196
- Elastic model for evaluating stresses in Earth induced by density variations or topographic irregularities 17 p2921 A66-33226
- Formulas for extraterrestrial potential, anomalous gravity force gradient on Earth topographic surface, deflections of vertical, etc. 20 p3549 A66-37043
- Radio wave propagation over Earth surface, determining conductivity and dielectric constant taking into account ground

- effect 21 p3706 A66-39514  
Concentration distribution at Earth surface associated with precipitation of cloud of interacting particles forming dust source, due to turbulent scattering in time and space 22 p3942 A66-39710  
Airborne spectrozonal telephotometer used in calculation of photographic brightness coefficient of Earth surface 22 p3919 A66-40621  
Magnetic field of ring current on Earth surface according to observations during IGY 22 p3914 A66-40768  
Two-dimensional purely elastic Earth model used to study elastic equilibrium configuration between density and topographic surface irregularities 23 p4063 A66-41391
- EARTHQUAKE**  
**SA SEISMIC WAVE**  
Long-period acoustic-gravity waves launched into F region by Alaskan earthquake of March 28, 1964 08 p1219 A66-19418  
Conversion factor determination for gravity changes during Alaska earthquake, using LaCoste-Romberg geodetic meter 09 p1369 A66-19872
- EBERT SPECTROMETER**  
Mathematical design and development of balloon-borne UV Ebert-Fastie spectrometer with Sekera-type polarimeter 02 p0233 A66-12212  
Three-meter Ebert grating spectrometer with mock interferometer attachment 14 p2294 A66-27497
- EBULLITION**  
**S BOILING**
- ECCENTRICITY**  
Orbital eccentricity of balloon satellites Echo I, Echo II and Explorer XIX, discussing influence of solar radiation pressure 14 p2383 A66-27824  
Longitudinal stiffeners eccentricity /one-sidedness/ effect on buckling strength of axially compressed cylinders 14 p2404 A66-27989  
Conventional two-body orbit equations for eccentricity near unity 18 p3227 A66-33829  
Ring stringer eccentricity effects on structural optimization of stiffened axially compressed cylinders 20 p3672 A66-38166  
Eccentricity effect on magnitude of discontinuity stresses in unsymmetrically loaded shells of revolution, discussing results of numerical calculations 22 p3993 A66-40366
- ECHO**  
**SA ANECHOIC CHAMBER**  
**SA AURORAL ECHO**  
**SA LUNAR ECHO**  
**SA RADAR ECHO**  
**SA RADIO ECHO**  
Generation of echo at cyclotron resonance in plasma provides means of measuring and displaying relaxation processes 11 p1748 A66-23393  
Propagation paths between hemispheres followed by usual and unusual whistlers, giving rise to series of echoes 20 p3553 A66-38077
- ECHO I SATELLITE**  
Space communications antennas, discussing ground to space systems, satellite relay methods, etc 05 p0651 A66-15839  
Photoelectric photometry of rotation of Echo I and II satellites, discussing duration, variation with time and direction of rotation relative to revolution 11 p1769 A66-22477  
Method of closing directions used in adjustment of satellite triangulations performed on basis of results of synchronous observations of Echo I during spring of 1963 20 p3552 A66-37842  
Results of applying tetrahedron method for synchronous observations of Echo I made during May and June 1963 20 p3518 A66-37843  
Azimuth of line between Potsdam and Bucharest from Echo I satellite photographs 22 p3903 A66-39694
- ECHO II SATELLITE**  
Echo II program to launch passive communications satellite that will maintain spherical shape and surface smoothness after loss of inflatable pressure 01 p0145 A66-11122  
Full scale ground inflation tests to evaluate structural and RF backscatter characteristics of Echo II prototype spheres as function of their internal pressures 01 p0055 A66-11123  
Echo II TV system to observe deployment, inflation and injection into orbit 01 p0073 A66-11124  
Radio beacon telemetry system for measuring orbital performance of Echo II satellite, including internal pressure and skin temperature 01 p0032 A66-11125  
Experiments with Echo II satellite to determine its capability as passive communications device and study shape and surface as function of time 01 p0032 A66-11126  
Photographs of passage of Echo II into Earth shadow to determine aerosoles and atmospheric ozone height distribution 03 p0427 A66-12924  
Communication experiments with Echo II during first year in orbit, discussing reflected signals 04 p0478 A66-13594  
Radio communication between U.S.S.R. and Great Britain via passive Earth satellite Echo II and Moon signal reflection 07 p1001 A66-17345  
Photoelectric photometry of rotation of Echo I and II satellites, discussing duration, variation with time and direction of rotation relative to revolution 11 p1769 A66-22477  
Photographs of passage of Echo II into Earth shadow to determine aerosoles and atmospheric ozone height distribution 14 p2380 A66-27273  
Day-to-night and semiannual variations in exospheric density during low solar activity from observations of Echo II orbital period changes 15 p2497 A66-30084  
Photoelectric photometry of Echo II satellite and graphs of light curves giving light intensity logarithm as function of time 22 p3863 A66-39856
- ECHO PROJECT**  
Echo project objectives and results 01 p0145 A66-11127
- ECHO SATELLITE**  
Geodetic determinations from photoelectric observations of occultation of stars by satellites 03 p0428 A66-13030  
Simulation of satellite magnetic stabilization system in airbearing facility, using coils-only magnetic torquing for attitude orientation 08 p1203 A66-19514  
Forecasts of periods of brilliant visibility for satellites Echo I and II in 1966, especially for latitude of Belgium 13 p2026 A66-26321  
Photoelectric photometer used for tracking entry of artificial satellites into shadow of Earth 20 p3518 A66-37839
- ECLIPSE**  
**SA LUNAR ECLIPSE**  
**SA SOLAR ECLIPSE**  
Possible atmosphere detection on J-II and J-III satellites revealed by excess brightness on eclipse reappearance 10 p1604 A66-21202  
Mars atmospheric density determined from photoelectric measurements of eclipses of Phobos 15 p2604 A66-30049
- ECLIPSING BINARY STAR**  
Astronomical yearbook of Cracow Observatory covering ephemerides of 787 eclipsing binaries, Lagrangian points, precession coefficients, etc 11 p1768 A66-22333  
Photoelectric observations and orbital solutions of BV 267, obtaining new light elements, system light change and orbital solutions 11 p1769 A66-22533  
Photoelectric observations and orbital solutions of BV 342, obtaining light element and light curve data 11 p1769 A66-22534  
Brightness curves used to determine geometrical and physical parameters of eclipsing binary systems containing component with extended spherical atmosphere 20 p3647 A66-37031  
Tabulation of photoelectric spectrophotometric observations of eclipsing system RX Arietis 24 p4273 A66-42206  
Tabulation of photoelectric spectrophotometric observations of eclipsing system UV Leonis 24 p4273 A66-42207
- ECOLOGICAL SYSTEM**  
**S CLOSED ECOLOGICAL SYSTEM**
- ECOLOGY**  
Ecological patterns of microorganisms in desert soils 15 p2441 A66-29960
- ECONOMICS**  
Economic feasibility of all-rocket approach to reusable launch system, comparing various classes of launch vehicles, noting need for payload recovery [SAE PAPER 650802] 01 p0144 A66-10817  
Price determining factors considered in integrated circuit amplifier for AM receiver 02 p0203 A66-11925  
Runway design by assessing capacity, delay of operations, costs, etc, using mathematical models 03 p0352 A66-12706  
French aerospace industry, relationship to French economy, annual expenditures 1958 to 1964 and aircraft exports 05 p0794 A66-15189  
Government research and development inventions 06 p0972 A66-16076  
Interaction of pilot capabilities and economic factors on future air transport, noting problems with SST, V/STOL, Mach 6 transport craft, etc 07 p1156 A66-17611  
Operational problems and costs of staged solid-propellant rocket vehicles for atmosphere only, noting aerodynamic stabilization, spin motors, stage separation, jet plume, etc 07 p1140 A66-17612  
Contractor performance on cost type contracts evaluated by comparing actual and allocated costs, using NASA PERT facilities 08 p1322 A66-19460  
European and U.S. space transport models characteristics, noting possible cooperation because of costs 09 p1473 A66-20552  
U.S. nuclear rocket propulsion program costs, technology and application, noting empirical law of space nuclear program economics 11 p1734 A66-23078  
U.S. SST in competition with other SST and economic effect on airlines and U.S. economy 13 p1995 A66-25765  
Defense Materials System control of copper, aluminum and steel and proposed program for readiness and contingency planning of external resources for aerospace industry [SAE PAPER 660286] 14 p2416 A66-27297  
Economic effects of turbulence on airline operations, considering costs on temporary grounding for repairs, passenger injuries, information dissemination on turbulence, etc 15 p2618 A66-28916  
Coordinated air-surface transportation microeconomic analysis 15 p2620 A66-29796  
Factors to be considered in capital equipment and facilities for environmental testing, including management planning, work load reorientation, etc 16 p2831 A66-30441  
Transport aircraft economics of load factor and wasted seat problem 17 p2846 A66-32795  
Practical cost reduction possibilities within aerospace industry 18 p3268 A66-33947  
Economics of Ownership structure and cost effectiveness in microelectronic systems 20 p3684 A66-37904  
Management planning and profit and loss in systems design 20 p3685 A66-37918  
Economics of airport facilities and operations, noting safety and regularity problems 20 p3687 A66-38016  
Economics of various orbital boosters from completely expendable to completely recoverable vehicles, noting concept of cost-optimum vehicle 23 p4133 A66-41775  
Generalized system for project control and evaluation, considering cost, time, performance and reliability 23 p4152 A66-41777  
Hypersonic transport /HST/ evaluation noting problems in aerodynamics, economics, structures, propulsion systems, etc 24 p4159 A66-42236  
Airborne digital computers role in electronic warfare, navigation and guidance, considering weight, power supply, costs, etc 24 p4177 A66-42245
- EDDY CURRENT**  
Equation of velocity distribution of fluid in duct, evaluating effect of eddy activity on second derivative 02 p0218 A66-11759  
Tensorial character of eddy viscosity coefficient in incompressible turbulent flow 03 p0358 A66-13099  
Viscous flow eddy behavior near sharp corner, considering outer boundary conditions and stream

- function 07 p1023 A66-18115
- Viscous structure of separated eddy bounded by circular streamline and eddy in square cavity driven by moving boundary at top 08 p1166 A66-19819
- Temporal spectra of atmospheric angular momentum transfer from wind data at various tropospheric and lower stratospheric levels 11 p1697 A66-22566
- Flow parameters of incompressible ideal fluid in axisymmetric curvilinear channel, obtaining and solving nonlinear differential equation 12 p1863 A66-24243
- End effects in steady state MHD J x B accelerator, noting voltage and current distribution and eddy-current geometry 14 p2342 A66-27430
- Refractory metal tubing inspection using ultrasonic and pulsed-eddy-current methods in conjunction with X radiography 15 p2509 A66-29317
- Eddy current nondestructive test instrument for measuring magnetic permeability, electric conductivity and thickness of materials 16 p2701 A66-30320
- Scattering of electromagnetic waves in plasma, noting effect of eddy current fluctuations 16 p2654 A66-31179
- Eddy current damping effect on satellite attitude stability 17 p3016 A66-32481
- Various heat treat tempers of 2014 Al alloy and corresponding values of eddy current 17 p2940 A66-33099
- Finite amplitude disturbances in baroclinic atmosphere, considering interaction with zonal current and effect of upward eddy transport upon time change of mean static stability 21 p3759 A66-39205
- Physical principles of phase sensitive eddy-current method of detecting surface cracks in metal products 24 p4218 A66-42898
- Phase-sensitive eddy current method of detecting surface cracks in metal products, examining construction and operating principles of flaw detector 24 p4218 A66-42899
- Wind and temperature profiles for constant flux atmospheric boundary layer in lapse stratification implying relation between eddy transfer coefficient ratio and stability parameter 24 p4202 A66-42982
- Stress, eddy viscosity and viscous dissipation estimations in jet stream obtained during Project TOPCAT in Australia, using aircraft soundings 24 p4234 A66-42984
- EDDY DIFFUSION**
- Eddy conductivity, eddy viscosity and dimensionless ratio of diffusivity for mercury flowing in tube 01 p0164 A66-10904
- Karman vortex street pattern of mesoscale eddies in wake of islands [AIAA PAPER 65-16] 02 p0221 A66-11548
- Evaporation as molecular diffusion from large rough surface into random-lived internal scale turbulent eddies 02 p0223 A66-11960
- Mesoscale eddies in wake of islands describing properties, characteristic parameters via Karman vortex street pattern, drag theory and empirical observation 07 p1061 A66-17365
- Large-eddy energy equilibrium hypothesis leading to relationship between mean rate of shear strain and Reynolds shear stress involving scale of large eddies 08 p1212 A66-19817
- Ablation particulate dispersion in atmosphere estimation by calculating particle deposit concentration at Earth surface [AIAA PAPER 66-379] 12 p1951 A66-24504
- Evolution of scalar quantity spectrum in statistically stationary isotropic turbulent velocity field determined by closure approximation theory 12 p1865 A66-24583
- Lateral covariance, longitudinal eddy length-scale and vorticity-transfer-adaptation hypothesis of two-dimensional jet turbulence theory 13 p2064 A66-26123
- Effective early warning system to enable pilot to cope with clear air turbulence /CAT/ 14 p2326 A66-27819
- Average rate of eddy mixing obtained from some eddy transport problems in thermosphere, noting molecular diffusion 15 p2490 A66-29945
- Large-and small-scale atmospheric eddy velocities and scale lengths estimated, noting eddy Reynolds number ascertained from dispersion of chemical contaminants 16 p2696 A66-30927
- Atmospheric circulation and eddy diffusion based on thermal structure, oxygen transport continuity and sodium trail spreading in thermosphere 19 p3347 A66-35645
- Physical structure of upper atmosphere given by pressure and density scale heights and mean molecular mass due to diffusion 19 p3349 A66-36348
- EDGE**
- S LEADING EDGE
- S TRAILING EDGE
- EDGE DISLOCATION**
- Spectral responses of photoconductivity in plastically deformed germanium at liquid nitrogen temperature 02 p0274 A66-11720
- Couple-stresses in dislocated solids and effect in classical elasticity 04 p0594 A66-14292
- Opening of parallel cracks by applied tensile stress in terms of dislocation distribution theory 14 p2408 A66-28389
- Linearized theory of coupled stress elasticity and stress distributions around simple edge and screw dislocations 15 p2609 A66-29241
- Distribution of edge-type dislocations in GaAs grown from solution by traveling solvent method determined, using etching techniques 19 p3437 A66-35432
- Metastable dislocation crack transformation into polygonal walls of edge dislocations caused by diffusion over crack surface 20 p3669 A66-37551
- EDGE LOADING**
- Large deflection analysis of circular ring plates under uniform transverse force along inner edge 02 p0298 A66-11584
- Transverse shear displacements for orthotropic plate of constant thickness determined by iterative method 03 p0439 A66-13153
- Cyclic edge loading effect on circular reinforced cylindrical shells 04 p0589 A66-14147
- Asymptotic integration of thin elastic shell equations for design of shells of revolution subject to effect of cyclic edge loads 04 p0590 A66-14149
- Influence of edge displacements on vertical deflection of semiinfinite isotropic elastic plate 06 p0966 A66-16502
- Equilibrium equations in displacements for circular cylindrical shells reinforced by longitudinal and transverse ribs under arbitrary surface and edge loads 08 p1312 A66-19434
- Simplified calculation of axisymmetric bending of annular three-layer plates with lightweight filler by use of initial parameter method 08 p1313 A66-19437
- Edge effect in case of finite pipe under arbitrary axisymmetrical load, determining radial displacement 11 p1782 A66-22851
- Semiinfinite rectangular plate with two opposite edges clamped 12 p1962 A66-23997
- Stressed state of isotropic elastic medium with two circular holes solved, using approximation method for concentrated loads 13 p2202 A66-26417
- Imperfections and edge restraint effect on buckling of axially compressed cylinders 14 p2404 A66-27988
- Edge load solution for conical shells 14 p2408 A66-28133
- Complex variable method to solve problem of circular elastic plate elastically restrained at edge and subjected to arbitrary concentrated force 17 p3020 A66-32000
- Longitudinal bending of elastic truncated conical shell subjected to edge loads 17 p3020 A66-32001
- Dynamic elastic response of inner and outer edges of ring to distributed impact loads 18 p3247 A66-33570
- Stress concentration in nonlinear creep of long thin cylindrical shell loaded at one edge by symmetrical radial shear and bending moment 18 p3248 A66-33578
- Bending characteristics of tapered cylindrical shells, discussing edge and internal influence coefficients 18 p3253 A66-33806
- Postbuckling behavior of clamped infinite flat strip under action of shearing forces analyzed based on von Karman equations 20 p3669 A66-37531
- Elastoplastic bending of thin annular plates with free inner edge, based on Mises yield condition and Hencky stress-strain relation 20 p3671 A66-38102
- Stress-distribution in wedge-shaped plate with stiffener on one of edges loaded by axial force, reduced to difference equation solution for shear-stress transform along stiffened edge 21 p3832 A66-39460
- Influence coefficients for semiinfinite and infinite circular cylindrical elastic shell subject to self-equilibrating edge loads 22 p3995 A66-40451
- Energy method application to buckling of axially compressed cylindrical shells with ring-stiffened edges, noting upper and lower bounds and critical rigidity ratio 23 p4140 A66-41912
- Classical critical stress values for buckling of thin walled circular cylindrical shells in axial compression as function of edge conditions 23 p4143 A66-41965
- EDUCATION**
- Safety education, management process and aerospace accidents 01 p0169 A66-10073
- Astronautics education for RAF and USAF officers 06 p0972 A66-15920
- Postgraduate aviation and space medicine course at University of Rome 06 p0972 A66-16054

 Rate of effusion for gas flow through orifice and application to fluorine gas dissociation energy 11 p1688 A66-22880  
 Vapor composition, evaporation rate and vapor pressure above chromium carbides determined by effusion method combined with mass spectrometry 14 p2310 A66-26791
- EIGENFUNCTION**  
 Eigenfunction expansions of convenient fourth order equation constructed examining convergence, method for summing various associated series and solution of boundary value plate problems 01 p0154 A66-10484  
 Waveguide containing ferrite of ferrite-dielectric insert determined by applying eigenfunction method 04 p0499 A66-14051  
 Expansion in eigenfunctions of not self-conjugate boundary value problem for differential equation with singularity at zero 05 p0709 A66-15339  
 Indirect method of estimating Green kernels, eigenvalues and eigenfunctions of operators related to elliptic problems 07 p1059 A66-18031  
 Green function-eigenvalue relationship on closed smooth boundary of open dimensional region 09 p1394 A66-20265  
 Free transverse vibrations of parabolic membranes, obtaining eigenvalues and eigenfunctions for Dirichlet conditions [ASME PAPER 65-AV-1] 11 p1780 A66-22472  
 Algorithm for computer eigenfunction solution of boundary value problem involving partial differential equations for stress functions of semimomentless cylindrical shells 11 p1782 A66-22856  
 Eigenfunction expansions and scattering theory for free-space wave equation in exterior region 12 p1912 A66-23563  
 Steady finite-amplitude motions existing for range of Taylor number, with values of Rayleigh number smaller than critical value required for overstability 12 p1866 A66-24948  
 Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 14 p2381 A66-27534  
 Model potential consisting of Coulomb potential and linear terms in electric field potential, obtaining eigenfunctions of model and deriving optical absorption coefficient for electric field excitons 16 p2775 A66-30729  
 Expansion in eigenfunctions of not self-conjugate boundary value problem for differential equation with singularity at zero 16 p2735 A66-30969  
 Waveguide containing ferrite of ferrite-dielectric insert determined by applying eigenfunction method 17 p2884 A66-32217  
 Perturbation-like theory for case when available starting wave function is not eigenfunction of unperturbed Hamiltonian 18 p3135 A66-34511  
 Boundary value problems for Sturm-Liouville-type equation with asymptotic formula derived for eigenfunctions 20 p3592 A66-38420  
 Eigenfunction expansion of analytic linear ordinary differential operators of boundary value problem with normalized irregular disintegrating boundary conditions 20 p3592 A66-38432  
 Multiplicative and spectral properties of nonnegative space matrices 21 p3756 A66-38740  
 Linearized potential theory for forced vibration of continuous self-exciting plate on hinged support in supersonic flow, investigating parametric resonance frequencies relation to coupling of eigenfunctions 22 p3995 A66-40508  
 Integral equation solution through Jacobi polynomials employed as eigenfunctions of certain operators 22 p3941 A66-40798  
 Eigenfunctions of full dislocation solution of cut annulus in plane elastostatics 23 p4144 A66-41970  
 Characteristic operator of Markov process on smooth manifold 24 p4230 A66-42210  
 Exact solution for eigenfrequencies of cylindrical microwave cavity partially filled with magnetized plasma 24 p4240 A66-42303  
 Numerical calculation of periods of natural oscillations and corresponding eigenfunctions of planetary atmospheres as function of planets rotational speed 24 p4273 A66-42320  
 Benard convection between free bounding surfaces for ranges of Rayleigh and Prandtl numbers achieving steady state with motion of single large cell, evaluating eigenfunction amplitudes 24 p4293 A66-42409
- EIGENVALUE**  
 Asymptotically accurate estimates of Bubnov-Galerkin method error in eigenvalue problem as applied to boundary value problem 01 p0091 A66-10162  
 Multidimensional homogeneous difference schemata solving eigenvalue problem with elliptic operator, noting differential equation coefficients and eigenfunction error estimate 01 p0092 A66-10166  
 Eigenvalues, considering losses, of modes propagating by successive reflections in infinite slab of magnetized ferrite 01 p0121 A66-10530  
 General mode structure and eigenvalues of cavities containing ferrite magnetized in axial direction 01 p0027 A66-10547  
 Error estimate in obtaining eigenvalues of linear self-adjoint differential operator of elliptical type by finite difference method 01 p0095 A66-11008  
 Spectral theory applied to elliptical boundary value problem with eigenvalue parameters 02 p0251 A66-12229  
 Nonlinear buckling of rectangular plates emphasizing calculations of thrust magnitude for boundary value problem, Von Karman equations, etc 03 p0435 A66-12612  
 Elliptic eigenvalue for reentrant region to determine vibration modes of membrane 03 p0387 A66-12620  
 Eigenvalues and norms arising in flow description represented by perturbations of Blasius solution 03 p0356 A66-12810  
 Resonances below inelastic threshold of electron hydrogen scattering using Feshbach projection-operator technique, converting to eigenvalue problem for projected Hamiltonian 04 p0547 A66-13711  
 Eigenvalues of free vibration equation of simply supported beam with finite number of discrete masses, using differential equation 04 p0588 A66-13823  
 Nonlinear eigenvalue problem for equilibrium state of rotating rod solved by perturbation procedures and Leray-Schauder degree theory 04 p0589 A66-13948  
 Inverse eigenvalue problem for second-order differential equation with boundary dependence on parameter 05 p0709 A66-15359  
 Calculation of singular values and pseudoinverse of matrix 05 p0710 A66-15474  
 Bracketing theorem applied in partitioning technique for solving Schroedinger equation to determine upper and lower bounds to energy eigenvalues, ground and excited states 06 p0911 A66-16168  
 Lower bounds to energy eigenvalues for rigid rotator in electric field /Stark effect/ 06 p0911 A66-16168  
 Sensitivity of eigenvalue to changes in matrix calculated by formula used to investigate control systems 06 p0867 A66-16976  
 Indirect method of estimating Green kernels, eigenvalues and eigenfunctions of operators related to elliptic problems 07 p1059 A66-18031  
 Analogy between eigenvalues for fluid convection and flow stability extended to rotating cylinders with corresponding temperature distribution for given angular velocities 08 p1212 A66-19821  
 Sturm-Liouville series expansion of Bessel functions and Bessel differential equation eigenvalue function 09 p1394 A66-20578  
 Eigenvalues of vibrating homogeneous membrane 09 p1396 A66-20631  
 Direct method of Liapunov used to study stability of ordinary differential equation by obtaining linear bounds on vector components 09 p1363 A66-20654  
 Heuristical method solving zeros of complex function, transcendental or algebraic, of complex variable, applicable to computation of eigenvalues of general matrix 10 p1548 A66-21214  
 Real roots of eigenvalue problem in cylindrical harmonics 10 p1550 A66-21306  
 Eigenvalues of integral equations in laser resonant cavities 10 p1542 A66-21343  
 Real eigenvalues of complex matrices, using Hermitian matrix relations 10 p1551 A66-21926  
 Calculation technique for eigenfrequencies of parallelepiped-shaped flexural mode vibrators with natural frequencies incalculable from elementary theory 11 p1705 A66-22651  
 Simplified calculation of eigenvalues of double-ridge and single-ridge waveguides from which critical frequency and wavelength are determined 11 p1656 A66-22738  
 Amplitude calculation of forced mass vibrations in damped linear mechanical system from column matrices of oscillation modes of eigenfrequencies 11 p1783 A66-23018  
 Maximum-minimum theory of eigenvalues applied to stability in Navier-Stokes equation and to incompressible elastic body vibration 11 p1694 A66-23183  
 Perturbation method approximation of eigenvalue and eigenfunction of fundamental wave propagating in H-plane bend of rectangular waveguide 12 p1815 A66-23958  
 Eigensolutions for laminar flow in porous two-dimensional channel subject to certain boundary conditions 12 p1862 A66-23994  
 Modified Ritz method for finding eigenvalues of certain nonlinear ordinary differential equations 12 p1914 A66-24003  
 State variable approach for analysis of linear multivariable system with multiple eigenvalues 12 p1849 A66-24255  
 Steady state alternating current analysis of RLC networks by computing eigenvalues and eigenvectors of corresponding matrix of coefficients 12 p1856 A66-24652  
 Small gap equations for Couette flow stability considering nonaxisymmetric disturbances, solving eigenvalue problem and noting role in instability of Taylor vortices 12 p1866 A66-24946  
 Rate of change of eigenvalues of lambda matrix and use in flutter investigation 12 p1972 A66-24978  
 Flute instability of beta and neutral plasma contained in mirror machine, considering particle motion for solution of Vlasov equation, obtaining eigenvalue equation for potential of flute-like perturbation 13 p2146 A66-25742  
 Averaging method for differential equations with retarded arguments 13 p2118 A66-25827  
 Distribution of complex eigenvalues of

three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 13 p2026 A66-26249

Eigenvalue density in vibration of elastic plates and shells, noting concentration of points for natural frequencies and influence of rotational inertia and shear strain 14 p2398 A66-27455

Eigenvalues of truncated cones of revolution with degenerate poles and various rigidities and geometries 14 p2400 A66-27686

Asymptotic estimates of characteristic values of differential equation with periodic coefficients 15 p2524 A66-28507

Convergence rate of method of least squares and some approximate Galerkin type methods in eigenvalue problems 15 p2526 A66-28696

Eigenvalues design method for nonuniformly spaced arrays that will approximate any required radiation pattern 15 p2463 A66-29026

Imaginary eigenvalue existence and zeros of modified Bessel function 15 p2528 A66-29243

Intermediate problems for eigenvalues involving self-adjoint differential operator 16 p2732 A66-30239

Stability of idealized laminar boundary flow, determining phase velocity, amplification rate and wave number of all disturbances 16 p2686 A66-30948

Shape and stability of liquid-gas interface in annular tank in force field determined by numerical integration of boundary value problem and eigenvalue [AIAA PAPER 66-425] 16 p2689 A66-31488

Sturm-Liouville eigenvalues calculated by phase function 16 p2738 A66-31715

Eigenvalue bounds for vibrating rhombical membranes 16 p2824 A66-31718

Matrix algebra, discussing factorization, determinants, eigenvalues, polynomials, inequalities, etc 17 p2945 A66-31869

Rational approximations for lower natural frequencies of uniform beam with concentrated mass or rotary inertia obtained by expanding eigenvalue equation into power series 18 p3249 A66-33599

Sensitivity of eigenvalue to changes in matrix, noting development of computational formula 18 p3127 A66-34077

Vertical and horizontal structure of negative eigenvalue modes of diurnal atmospheric oscillation 18 p3107 A66-34524

Eigenvalue problems for systems of ordinary differential equations resolved computationally by use of quasi-linearization technique 19 p3310 A66-36046

Iterative approximation method for solution of proper elements /eigenvalue/ of Sturm-Liouville equation 19 p3392 A66-36783

Application of Rayleigh principle to obtain sharp upper bounds for increase of first eigenvalue of membrane submitted to parallel and equidistant rectilinear constraints 20 p3669 A66-37544

Linear elliptic partial differential systems, eigenvalue and boundary value problems - Johns Hopkins University, Lectures, March-May 1965 21 p3754 A66-38457

Garding inequality and Green transformation applied to elliptic operators in eigenvalue problems 21 p3755 A66-38465

Algorithms for digital computation of vectors and eigenvalues of matrix 21 p3823 A66-38564

Eigenvalue problems with monotonic operators and error estimation for operator equations with continuous homogeneous operators in semilordered normalized vector space 21 p3757 A66-38942

Distribution of complex eigenvalues of three-dimensional Schroedinger equation, showing location of poles of scattering matrix and role of wave function 22 p3947 A66-39708

Eigenvalue problem for Laplace operator for two-dimensional region with boundary composed of piecewise-analytical simple closed curves solved by finite difference method 22 p3938 A66-39901

Variational methods for approximating perturbation effect on nondegenerate eigenvalue extended to degenerate case 23 p4084 A66-41390

Geometrical theory of unitary equivalence of matrices indicating successive calculation of numerical invariants 23 p4084 A66-41407

Simplified calculation of eigenvalues of double-ridge and single-ridge waveguides from which critical frequency and wavelength are determined 23 p4045 A66-41476

Orthogonality condition for eigenvalue problem of out-of-plane twist-bending vibrations of elastic ring for various sets of boundary conditions 23 p4139 A66-41693

Eigenvalue problem associated with dynamic instability of geostrophic wind 23 p4066 A66-42042

**EIGENVECTOR**

Pseudo-inverse concept extended to Hilbert space unbounded operators with arbitrary range 01 p0092 A66-10179

Two-level atom interaction with multimode gas laser cavity, obtaining stationary state and solving unique eigenvalue in special cases 12 p1891 A66-24568

Perturbation theory analyses of network matrix eigenvectors and natural frequencies 20 p3539 A66-38282

**EINSTEIN EQUATION**

**SA RELATIVITY THEORY**

Einstein gravitational equation applied to galaxies and quasars, using spherical model with spherically symmetric distribution of matter 01 p0138 A66-11033

Two general integrals of Einstein equations serviceable for obtaining certain physical quantities which are independent of choice of coordinate system 02 p0291 A66-12183

Equation of motion in relativistic gravitation theory 05 p0715 A66-14529

Exact solutions to Einstein field equations 05 p0715 A66-14532

Bianchi identity role in obtaining motion equations without infinite self-action terms in general relativity 05 p0715 A66-14893

Motion of charged finite mass in gravitational field 06 p0908 A66-16162

Einstein equations for vortical and nonvortical gravitational fields applied with relativistic approximation to Newtonian gravitational field 08 p1256 A66-19272

Non-Einsteinian gravitation, noting that expression for invariant density of free Lagrange gravitational field holds only for slowly varying weak fields 09 p1403 A66-20769

Charged particle motion determined by gravitational-electromagnetic field properties with motion equations following from integrability condition of field equations 11 p1735 A66-22343

Cosmological effects in anisotropic inhomogeneous cosmological models including Riemannian geometry, light propagation, gravitational field, etc 11 p1772 A66-22778

Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 12 p1915 A66-24889

Energy-momentum density of gravitational field according to Ozsvath-Schuecking rigorous solution to Einstein field equations 12 p1915 A66-24994

Spatially homogeneous anisotropic irrotational solutions of Einstein field equations for cosmological dust source 14 p2330 A66-27019

Philosophical problems of Einstein theory of gravitation and relativistic cosmology - All-Union Conference, Kiev, Ukrainian SSR, May 1964 14 p2331 A66-27208

Quantum gravitation theory, discussing difficulties of covariance of general relativity and nonlinearity of Einstein equation 14 p2332 A66-27215

Non-Einsteinian gravitation, noting that expression for invariant density of free Lagrange gravitational field holds only for slowly varying weak fields 14 p2334 A66-27304

Einstein spaces with gravitational wave 15 p2537 A66-28672

Covariant treatment of solutions of Einstein field equations representing pure gravitational radiation propagating in fluid and electromagnetic media 15 p2542 A66-29621

Motion of charged nongravitating test

particle in Einstein gravitational theory 15 p2542 A66-29655

Einstein field equations for perfect fluid, coupled to frozen-in magnetic field, in high-density limit of gravitational collapse 17 p2997 A66-31973

General relativistic dyadic formalism applied to metrics of rigid bodies moving in Einstein space of uniform space-time curvature 17 p2958 A66-32294

Stationary dust-filled cosmological solution of Einstein field equations with zero lambda and without closed timelike lines 19 p3463 A66-36169

Gravitational waves in presence of electromagnetic field, deriving Einstein-Maxwell equations 20 p3550 A66-37308

Singularities in universe, discussing properties of space-time continuum, matter and Einstein equations for strong fields 21 p3771 A66-39265

Singularities in closed universes, discussing closed solutions to Einstein equations and inevitability of singularity, based on Hawking theorem 21 p3771 A66-39266

General relativity theory, examining Schwarzschild surface which allows matter and light to pass through in one direction only 21 p3774 A66-39532

Rotating masses effect on inertial frames, analyzing stress energy tensor and Schwarzschild geometry 22 p3979 A66-40113

Freely falling point mass problem solutions for Einsteinian free space equations that also satisfy Newtonian equations in suitable coordinate system 23 p4090 A66-41096

Einsteinian gravitation equations stated in terms of three-dimensional tensor analysis as applied in conformal space 23 p4091 A66-41834

New gravitation theory, noting role of Einstein equations following conformal transformation 24 p4237 A66-42540

Einstein gravitation theory relation to general and special relativity, space time, unified four-dimensional continuum metric and chronogeometric theories 24 p4238 A66-43015

**EJECTION**

**SA PARACHUTING**

Downrange radar and optical data reduction used for evaluation of ejection velocities of ballistic missile penetration aids at deployment [AIAA PAPER 66-405] 16 p2804 A66-31464

Meteorite impact and ejection mechanism of tektites, examining large distances traveled by tektites 17 p3007 A66-33283

Convergence of axes of plane-parallel jets due to reciprocal ejection effect, analyzing deformation of jet, rarefaction coefficient for air between jets, etc 20 p3544 A66-36918

Rescuing men and equipment in space by manned rescue craft, unmanned craft, personal ejection capsules, etc 20 p3665 A66-38254

**EJECTION INJURY**

Causes of compression fractures of spine during large number of USAF ejections 03 p0327 A66-12361

Statistical analysis of vertebral fracture in U.S. Navy during 1959-1963 period 16 p2644 A66-31132

Emergency escape experiments using ejection seats noting rate of successful escapes, pilot injuries, minimum terrain clearance, etc 18 p3063 A66-34409

Fracture mechanism of traumatic lesion caused by seat-ejection or bail-out from F-104 G aircraft and worsened by ground impact 22 p3858 A66-40503

**EJECTION SEAT**

LW-2 Escape System for high V/STOL aircraft and outstanding recovery capabilities 06 p0806 A66-16819

Mechanical and physiological factors involved in design, testing and operation of ejection seats, examining effects of short duration acceleration 10 p1493 A66-22126

Ejection seat spin rate tests to determine temporary incapacitation possibilities 11 p1647 A66-22576

Emergency escape experiments using ejection seats noting rate of successful escapes, pilot injuries, minimum terrain clearance, etc 18 p3063 A66-34409

Fracture mechanism of traumatic lesion caused by seat-ejection or bail-out from F-

104 G aircraft and worsened by ground impact 22 p3858 A66-40503  
 Aircraft escape systems design criteria established using military accident statistics, noting drogue parachute and pilot sizes 22 p3850 A66-40610

**EJECTION TRAINING**  
**SA PILOT TRAINING**  
 Air Training Command ejection experience from 1962 to 1964 09 p1337 A66-20526

**EJECTOR**  
**SA JET PUMP**  
 Design charts for determining ejector characteristics for optimum performance of jet pump systems [ASME PAPER 65-WA/FE-32] 05 p0691 A66-15709  
 Optimum design parameters for water ejectors [ASME PAPER 65-WA/FE-31] 05 p0691 A66-15710  
 One-dimensional analysis used by Hope and Segars invalid for ejector with supersonic primary stream 18 p3100 A66-34604  
 Spray ejector operating in pulse rather than steady state regime, noting capability and formation of de Laval nozzle 19 p3450 A66-36603  
 Equation for calculating entrainment ratio of ejectors as function of velocity numbers of two frictionless one-dimensional streams flowing side by side in pressure equilibrium 22 p3899 A66-40371

**EKMAN LAYER**  
 Axisymmetric convection between two rotating disks, noting secondary flow and viscous effects of Ekman layers 12 p1980 A66-24941  
 Instability of laminar Ekman boundary layer, obtaining critical values of Reynolds numbers, perturbation growth rates and equilibrium finite amplitude solutions 24 p4197 A66-42980  
 Stability of two-dimensional boundary layer flow in rotating tank with small inflow analyzed, using perturbation theory 24 p4197 A66-42981

**ELASTIC BAR**  
 Four types of axisymmetric distribution of stresses and displacements in infinitely long rod of circular cross section with discontinuous boundary conditions 01 p0155 A66-10713  
 Central maximum loading by transverse impact on beams independent of boundary conditions calculated by simplified integral and verified by measurements 03 p0433 A66-12315  
 Equivalent networks for transversely vibrating bars under various end conditions 03 p0437 A66-12820  
 Waves in bars of mechanically unstable materials discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 05 p0778 A66-15444  
 Transfer matrices of vibrating thin-walled open profile bars under forced, coupled bending and torsional stresses 08 p1311 A66-19342  
 Stress concentration and distribution in statically loaded tension bar with U-shaped grooves studied photoelastically 08 p1315 A66-19804  
 Free vibrations of initially straight elastic bar with free-free or clamped-free ends, undergoing inextensional motion, neglecting shearing effects and rotatory inertia 10 p1616 A66-21484  
 Laplace transform solution for small time used as complement to problem of one-dimensional propagation of stress pulse in bar with continuously nonhomogeneous elastic modulus 10 p1617 A66-21498  
 Torsion in orthotropic rod of rectangular cross section and tubular cylindrically anisotropic rod, with variable elastic moduli 12 p1966 A66-24060  
 Longitudinal oscillation frequency of rod with one end fixed and other end carrying rigid load 12 p1966 A66-24065  
 Stability of rod compressed by follow-up force created by compressed air discharge 14 p2396 A66-27179  
 Unstabilized rod buckling from impact load with longitudinal compression wave reflection 15 p2607 A66-28736

Geometrical dispersion effect on propagation of longitudinal harmonic stress waves in prestressed elastic viscoplastic bars 16 p2813 A66-30264  
 Saint Venant principle applied to dynamics of bars regarding boundary conditions and reliability problems 16 p2822 A66-31508  
 Uniformly accelerated motion stability of thin elastic bar subjected to servo force at one end 16 p2822 A66-31524  
 Waves in bars of mechanically unstable materials, discussing differential equation of motion, jump conditions, wave velocity and application to annealed aluminum [ASME PAPER 65-WA/APM-22] 18 p3247 A66-33571  
 Beam column supported by linear rotational and extensional springs representing elasticity of test rig, used in analog study of thermal buckling behavior of thin cylindrical shells 21 p3828 A66-38706  
 Optimum cross section design for thin walled bar under combined torsion and bending 21 p3832 A66-39377  
 Longitudinal, torsional and flexural free vibration of elastic slender bar of variable cross section with nonhomogeneous properties 22 p3992 A66-40299  
 Transient response characteristics of bonded strain gauges obtained by measuring elastic step wave produced in steel bar 22 p3919 A66-40436  
 Cyclically moving loads causing resonance in elastic rods, strings and torsional members having fixed ends 23 p4141 A66-41922  
 Rational one-dimensional theory of wave propagation and vibrations in elastic bars with rectangular cross section 24 p4284 A66-42137  
 Torsion of elastic rectangular bar with similarly distributed external tangential loads applied at both ends 24 p4289 A66-42436  
 Stability of rod compressed by follow-up force created by compressed air discharge 24 p4290 A66-42725

**ELASTIC BENDING**  
 Circle theorem of displacement field in elastically supported circular plate in pure bending 01 p0154 A66-10503  
 Intermediate stages of wave-type bending process in elastic plate investigated by system of approximate methods 01 p0157 A66-10983  
 Central maximum loading by transverse impact on beams independent of boundary conditions calculated by simplified integral and verified by measurements 03 p0433 A66-12315  
 Elastoplastic bending of rigid plates under transverse loading noting compressibility 03 p0441 A66-13292  
 Settling of multilayer foundation subject to normal load 03 p0441 A66-13294  
 Flexure center and semicircular cross section for shear stress distribution 04 p0586 A66-13409  
 Errors in approximation equations for dynamic bending of cylindrical rod 08 p1308 A66-18889  
 Elastic bending of isotropic plate supported by doubly periodic system of point supports under doubly periodic transverse load 08 p1311 A66-19373  
 Flexure of semiinfinite nonsymmetric three-layer plate under steady transverse compression, using state equation to determine load values impairing equilibrium of plate 09 p1468 A66-20760  
 Bending of slightly curved solid viscoelastic rod of circular cross section under effect of quasi-static and dynamic radial forces 10 p1613 A66-21324  
 Iterative procedure to obtain numerical solutions of von Karman equations for rectangular plates with finite deflections 10 p1615 A66-21477  
 Optimum study of anticlastic deformations of elastic strips with tapered edges, using Newton-Raphson iteration method 11 p1780 A66-22328  
 Bending of cylindrical shell clamped at one end and reinforced by elastic ring at free end, with vertical forces uniformly distributed acting over ring 12 p1964 A66-24044  
 Elastic bending of anisotropic plates with

stresses represented by Legendre polynomial series 12 p1968 A66-24346  
 Von Karman equations for axisymmetric nonlinear bending circular plates 12 p1969 A66-24363  
 Results of crack propagation tests on polymethylmethacrylate flexed at various frequencies under cyclic loading 13 p2112 A66-25308  
 Photoelastic intensity variations in glass beam following impact of steel ball, registering values pointwise 13 p2198 A66-26300  
 Plate deflection in own plane under moments applied to ends using elasticity theory, deriving relation between stress tensor and stress function 13 p2205 A66-26452  
 Central deflection of simply supported centrally loaded rhombic plate with formula depending on first coefficient obtained in mapping of rhombus 14 p2409 A66-28397  
 Flexure of thin elastic plate clamped to rigid columns, determining functions of complex variable 15 p2613 A66-29433  
 Tensile and compressive creep behavior deduced from deflection measurements in creep bending tests on beams of trapezoidal cross section 15 p2614 A66-29666  
 Torsion analysis of thin walled profile of bisymmetrical cross section subjected to finite twist 15 p2615 A66-29722  
 Lagrangian multiplier method applied to mixed boundary value problems such as stresses due to temperature changes in semiinfinite slab 15 p2615 A66-29733  
 Book on bending theories of sandwich plates including use of Fourier series, stress-strain state, trigonometry, deflection theory, etc 16 p2818 A66-31100  
 Boundary perturbation solution of stress concentration around curved hole in thin plate under elastic bending 16 p2819 A66-31140  
 Flexural vibration of uniform shafts treated by impedance techniques and traveling-wave concepts 17 p3022 A66-32015  
 Elastic bending of isotropic plate supported by doubly periodic system of point supports under doubly periodic transverse load 18 p3254 A66-34183  
 Subharmonic vibrations during resonant testing of thin walled beams for coupled torsional and bending vibrations 18 p3256 A66-34559  
 Elementary effects method solution of fourth-order PDEs for bending and vibration of elastic plates 20 p3671 A66-37989  
 Bending of nonorthotropic clamped plates solved, using small parameter method 21 p3826 A66-38610  
 Resonance machine design for producing torsion and bending, ensuring equality of dynamic amplification factors 21 p3827 A66-38619  
 Stress analysis of difference equations for bending and shear effects in elastic grids 21 p3832 A66-39536  
 Bending of isotropic thin plate in moment theory of elasticity, noting Kirchhoff-Love hypothesis from which relations for bending moment torque and shear force are obtained 22 p3991 A66-40151  
 Out of plane free vibrations of uniform circular ring on elastic and torsional foundations producing restraints 24 p4287 A66-42165  
 Axisymmetric bending problem of idealized elastic rigidly-plastic two-layer circular plates, deriving exact mathematically strict solutions and uniqueness conditions 24 p4290 A66-42443

**ELASTIC BODY**  
 Stress function for linear viscoelastic problems where body shape, boundary condition type or both vary with time 02 p0298 A66-11576  
 Stress distribution in vicinity of infinite row of collinear Griffith cracks in elastic body calculated for internal pressure distribution 02 p0298 A66-11577  
 Photoelastic experiment by birefringent coating method to determine stress analysis applicable for any elastic body 02 p0298 A66-11583  
 Plane-strain problems for which classical theory predicts singular stress concentrations in elastic

- solid 03 p0438 A66-13093
- Stress and deformation state in infinite solid corner of elastic body limited by three planes 03 p0442 A66-13304
- Small radial vibrations of homogeneous isotropic prestressed sphere 04 p0591 A66-14207
- Stress distribution in semiinfinite elastic media with different properties bonded along plane and containing concentric ring-shaped cavities, using Green function [ASME PAPER 65-WA/APM-2] 05 p0776 A66-15426
- Parametric response of elastic columns discussing longitudinal inertia effects, analytic stability criteria and results [ASME PAPER 65-WA/APM-13] 05 p0777 A66-15435
- Cylindrically symmetric tension field covering strain gradient effects on potential energy of elastic body [ASME PAPER 65-WA/APM-14] 05 p0777 A66-15436
- Transient wave diffraction problem solution, discussing response of elastic solid to harmonic incident pulse [ASME PAPER 65-WA/APM-16] 05 p0777 A66-15438
- Dynamic reciprocal theorem for sinusoidal oscillation of elastic medium treated as extension of static reciprocal theorem of Betti and Rayleigh, using continuum mechanics [ASME PAPER 65-WA/MD-21] 05 p0779 A66-15524
- Approximate solution method for unsteady creep of shells within framework of theory of aging 07 p1146 A66-18254
- Dependence of dry friction force for steady state rubbing of rubberlike body on surface of crystalline elastic body 08 p1244 A66-19474
- Front and zone of fractures originating in brittle elastic body under influence of high pressure arising on wall of cavity within body 08 p1313 A66-19475
- Dynamic stability of circular elastic rods, noting iteration method analysis of nonlinear coupling effect between axial force and curvature in forced in-plane vibrations 09 p1467 A66-20638
- Stress distribution in semiinfinite elastic media with different properties bonded along plane and containing concentric ring-shaped cavities, using Green function [ASME PAPER 65-WA/APM-2] 10 p1615 A66-21479
- Elastic strip and elastic annulus Differential-difference equations, using Fourier transforms and analytic continuation 11 p1780 A66-22439
- Rayleigh-Ritz method, stationary complementary and potential energy principles and Lagrange undetermined multipliers applied to free vibration of elastic body 11 p1781 A66-22611
- Transformation relation for prestress tensor in problem of indifferent equilibrium of elastic bodies derived, using approximation method 12 p1959 A66-23865
- Thermodynamics utilized to show that there is no difference between bodies defined as hypoelastic, elastic and hyperelastic 12 p1960 A66-23957
- Cylindrically symmetric tension field, covering strain gradient effects on potential energy of elastic body [ASME PAPER 65-WA/APM-14] 12 p1960 A66-23974
- Parametric response of elastic columns, discussing longitudinal inertia effects, analytic stability criteria and results [ASME PAPER 65-WA/APM-13] 12 p1961 A66-23985
- Stress function solution in dynamic linear theory of homogeneous incompressible elastic bodies 12 p1962 A66-23998
- Stress states and elastic equilibrium in semicircle pressed against rigid profile base 12 p1969 A66-24352
- Torsional stress distributed on ends and lateral face of anisotropic rod with variable elastic moduli 12 p1969 A66-24353
- Functional analysis demonstrating existence and uniqueness of displacement field, providing solution for linear viscoelasticity problem for medium having behavior satisfying coercivity condition 13 p2195 A66-25463
- Inhomogeneous elastic half-spaces examined for circular crack in plane of contact and perpendicular tensile forces, using Griffith fracture theory 13 p2203 A66-26421
- Purity effects on stress and temperature field distribution in elastic bodies, deriving equations 13 p2203 A66-26425
- Axisymmetric wave propagation in elastic body-conducting fluid system, noting parameters of motion expressed in PDE 13 p2150 A66-26427
- Stresses in concentric and eccentric compound rings 13 p2207 A66-26499
- Elastic analog applicability to geometrically nonlinear creep theory of circular membranes 14 p2397 A66-27390
- Stresses due to two equal and opposite couples applied at ends of diameter on surface of elastic sphere having concentric spherical inclusion 14 p2409 A66-28460
- Galerkin vector for elastodynamic problem of isotropic inhomogeneous body 16 p2823 A66-31707
- Axisymmetric problem in elasticity theory for infinite body weakened by system of periodically distributed coaxial slots of equal radius 17 p3026 A66-32599
- Second-order volumetric change in isotropic elastic materials without external loads 18 p3258 A66-34639
- Constitutive equations for elastic solids sustaining deformation for which displacement gradients are small but where nonlinearity is permitted, formulating plane elastostatic problem 19 p3475 A66-36429
- Impact of elastic conical shell of revolution moving with constant axial velocity toward rigid obstacle 21 p3827 A66-38692
- Optimal control of elastic flight vehicles, describing axis oscillations by equations of beam with variable cross section 21 p3768 A66-39279
- Rectangular-parallelepiped problem of restrained torsion produced by mutual rotation of two absolutely rigid diaphragms attached to opposite faces 21 p3831 A66-39292
- Dependencies of independent components of elastic compliance and rigidity tensors of elastic body reinforced in two directions 22 p3989 A66-39819
- Geometrical and statistical relations of theory of nonlinearly elastic body presented in connection with bifurcation of equilibrium of ideally elastic body 22 p3996 A66-40686
- Stress-strain distribution of sharp corners effect on surface of elastic body, examining mathematical difficulties in application of Lamé equation and boundary data smoothing 23 p4135 A66-40991
- Refined method of selecting roller contact bearing, considering parametrical resonance 23 p4072 A66-41058
- Orthogonality condition for eigenvalue problem of out-of-plane twist-bending vibrations of elastic ring for various sets of boundary conditions 23 p4139 A66-41693
- Approximate solution of certain mixed plane boundary value problems involving isotropic elastic body 23 p4140 A66-41836
- Energy, linear and angular momentum conservation principles for elastic body with finite number of defects 23 p4091 A66-41855
- Surface Rayleigh waves and resonance effects in elastic bodies, noting motion of wedge or load on surface 24 p4291 A66-42842
- ELASTIC BUCKLING**
- Prebuckling deformation and stress-strain distributions in clamped thin cylindrical shell subjected to axial load, determining effect of boundary supports 02 p0297 A66-11557
- Nonlinear buckling of rectangular plates emphasizing calculations of thrust magnitude for boundary value problem, Von Karman equations, etc 03 p0435 A66-12612
- Statistical study of linear buckling of circular cylindrical shells under axial compression, showing preferred mode shape [ASME PAPER 65-APMW-23] 04 p0592 A66-14224
- Effect of torsional and lateral restraints on elastic critical load of centrally loaded simply supported beam buckling laterally 06 p0966 A66-16613
- Elastic critical load of centrally loaded simply-supported beam which buckles laterally out of plane derived by Airy integral functions 07 p1144 A66-18049
- Collapse under end load of pressurized axially stiffened thin cylinders 07 p1147 A66-18282
- Torsional buckling of thin walled prismatic bars of arbitrary cross section, considering buckling shear resilience 08 p1311 A66-19343
- Statistical study of linear buckling of circular cylindrical shells under axial compression, showing preferred mode shape [ASME PAPER 65-APMW-23] 10 p1615 A66-21474
- Axisymmetric imperfections effect on elastic buckling of spherical caps under uniform pressure 10 p1617 A66-21785
- Elastic buckling of clamped conical shells under external pressure 10 p1617 A66-21786
- Stability and buckling of core-filled axially compressed circular cylinder 12 p1957 A66-23603
- Optimum depth, minimum area design charts for laterally supported structural beams in pure bending, discussing weight parameters, elastic buckling, material characteristics, etc 12 p1968 A66-24201
- Principle of stationary complementary energy applied to buckling of column, noting Rayleigh-Ritz method 12 p1969 A66-24362
- Collapse of spherical caps under external pressure, with data for polyvinylchloride and aluminum alloy caps 12 p1972 A66-24979
- Linear creep stability of orthotropic shells, considering shear creep and lateral buckling, determining critical loads and noting errors 13 p2113 A66-25913
- Buckling of rod with initial deflection as sinusoidal half-wave, using Bubnov-Galerkin method and Laplace transform, calculating stresses of rod when subjected to nonsteady creep 13 p2206 A66-26457
- Buckling of unstable perfectly elastic isotropic rectangular plate 14 p2396 A66-27312
- Edge restraint effects on spherical cap stability 14 p2412 A66-27435
- Newton-Kantorovic method solution of Hammerstein type nonlinear integral equation, with application to elasticity theory of buckling of thin spherical shell 14 p2322 A66-27628
- Book on stability loss of highly convex shells at supercritical strains 14 p2401 A66-27786
- Imperfections and edge restraint effect on buckling of axially compressed cylinders 14 p2404 A66-27988
- Dynamic snap-through buckling of shallow spherical caps of elastic material 14 p2406 A66-27998
- Unstabilized rod buckling from impact load with longitudinal compression wave reflection 15 p2607 A66-28736
- Dynamic elastic deflections of shallow circular arch under dynamic pressure loading, solving nonlinear integro-differential motion equation by Galerkin method 15 p2610 A66-29284
- Sandwich shell theory, including effects of transverse shear and extension and quadratic terms essential to buckling problems 17 p3021 A66-32003
- Local buckling of infinite continuous-plane elastic membrane under longitudinal load in form of concentrated forces 17 p3029 A66-32810
- Snapping of shallow simply supported sinusoidal arch under sinusoid step pressure load, using motion equations and infinitesimal stability analysis 18 p3257 A66-34591
- Stability of bending-torsional equilibrium of cantilevered bar subjected at end to follower force, as in case of wing under jet, determining critical thrust 19 p3475 A66-36432
- Book on strength, stiffness and stability of sandwich structural elements for structural designer, emphasizing practical applicability 20 p3666 A66-37010
- Postbuckling behavior of clamped infinite flat strip under action of shearing forces analyzed based on von Karman equations 20 p3669 A66-37531
- Inelastic buckling of rod with initial slight

- sinusoidal deflection subjected to short-term longitudinal compressive dynamic load 20 p3672 A66-38268
- Static perturbation technique used in analysis of stability relationship to shape of equilibrium surface for finite-dimensional problems 22 p3992 A66-40202
- Buckling of stiffened cylindrical shells under various loads and load combinations, noting optimization procedure for elastic stability [ICAS PAPER 66-13] 22 p3996 A66-40673
- Shell stability theory of current interest, noting shell with elastic filler and internal pressure 23 p4135 A66-40994
- Elastodynamic buckling of circular cylindrical shells, unstiffened and longitudinal stringers-stiffened 23 p4147 A66-42000
- ELASTIC COLLISION**
- Elastic collision effects on harmonic current amplitudes and energy conversion process in double beam and beam-plasma interactions 01 p0112 A66-10585
- Strong interactions and cosmic rays, discussing Regge poles, one meson approximation and multiperipheral model theory of elastic and quasi-elastic interactions 07 p1112 A66-17535
- Average diffusion cross section for elastic collisions of electrons with heavy particles, comparing calculated and measured values 15 p2551 A66-29225
- Fast neutrons of solar origin detected by observing protons recoiling from elastic collisions of neutrons with hydrogen nuclei in nuclear emulsion 18 p3188 A66-34824
- ELASTIC CONSTANT**
- SA YOUNGS MODULUS**
- Internal friction and elastic modulus of compressor and turbine blade materials 03 p0372 A66-12399
- Elasticity determined for axial fir-tree-type connections of turbine blade roots 03 p0440 A66-13201
- Niobium elastic constants tabulated for various temperatures, using RF pulse-echo method 04 p0536 A66-13754
- Elastic modulus and ultimate tensile strength of fibers and fiber composites 05 p0705 A66-14814
- Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 05 p0776 A66-15427
- Four elastic constants of Laval, Raman and Viswanathan theories dynamically measured in connection with behavior data on cubic crystals 05 p0781 A66-15736
- Lateral buckling of I-beam, examining stress and strain induced change in elasticity moduli and rigidity 06 p0964 A66-16479
- High temperature extensometer using linear variable differential transformer 07 p1030 A66-17230
- Hole concentration effect on elastic constant of heavily doped p-type silicon 07 p1106 A66-18396
- Leigh theory concerning effect of electron concentration on elasticity of Al and Al alloys compared with experiment 07 p1053 A66-18520
- Aluminum-beryllium base alloys, noting problems of application as construction materials 08 p1239 A66-18904
- Infinite frequency elastic moduli of monatomic fluids related to pressure and internal energy of fluid 08 p1206 A66-18941
- Finite bending of cylindrical plates, evaluating numerical values of stress distribution in baryte sheet 09 p1465 A66-19861
- Dynamic flexural rigidity of polymer plates, measuring elastic modulus, noting variation of Youngs modulus, Poisson ratio with temperature and rate of loading 09 p1466 A66-20183
- Static deformation of model of three-constant isotropic elastic material exhibiting phenomenon of couple stresses [ASME PAPER 65-WA/APM-3] 10 p1615 A66-21480
- Elastic constants obtained from longitudinal and transverse acoustic waves propagated in single-crystal indium phosphide 10 p1578 A66-21585
- Moment stress tensor and elastic constants in statistical fluid mechanics 10 p1523 A66-21801
- X-ray determination of elastic constant of pure nickel and alloy with aluminum 10 p1547 A66-21982
- Temperature dependence of crystalline ammonia elastic moduli 10 p1589 A66-22166
- Diffusivity, elastic modulus and stacking fault energy effect on high temperature creep behavior of alpha brasses 11 p1717 A66-22996
- Glass fiber reinforcement for plastics, determining tensile strength of fibers, glass structure, elasticity modulus improvement via annealing, etc 11 p1720 A66-23126
- Elastomechanical properties of glass fibers and resins in order to determine optimum materials for reinforced glass fiber structures [ONERA TP 322] 11 p1721 A66-23200
- Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 12 p1956 A66-23583
- Elastic constants and thermal expansion coefficients of bodies with inhomogeneous regular structure 12 p1958 A66-23666
- Torsion in orthotropic rod of rectangular cross section and tubular cylindrically anisotropic rod, with variable elastic moduli 12 p1966 A66-24060
- Ultrasonic measurement of elastic moduli of high temperature metal 13 p2194 A66-25092
- Recording assembly for measurement of flexural and torsional moduli and internal friction at various frequencies and temperatures of small samples, using constant amplitude undamped oscillations 13 p2077 A66-25324
- Alloying effects on temperature dependence of titanium normal elastic modulus between -186 and 800 degrees C 13 p2106 A66-25329
- Stressed state of spherical shell weakened by curvilinear holes described by equation of shallow shells 13 p2202 A66-26413
- Shear relaxation time of monatomic fluids for liquid and dense gas phases calculated, using LF viscosity data and estimates of HF elastic moduli 14 p2277 A66-27977
- Effect of compression of outer layers of plate by longitudinal forces on reduced shear moduli of finned filler 16 p2816 A66-31046
- Effect of thermal population of /000/ and /100/ conduction bands on elastic constants of heavily doped n-type germanium 16 p2778 A66-31070
- Elastic field in inclusion and surrounding matrix 16 p2818 A66-31105
- Mechanical properties of solid propellants, determining elastic modulus from tensile tests via stress-strain diagram 16 p2790 A66-31193
- Laminated thin shell theory applied to calculation of elastic coefficients of fiber reinforced shells [AIAA PAPER 66-526] 16 p2822 A66-31499
- Mechanical properties of semiconductors, such as elastic modulus and internal friction determined, noting vacuum and temperature conditions 16 p2785 A66-31669
- Overall elastic moduli of inhomogeneous system composed of various solid phases firmly bonded together at arbitrary concentration 17 p3029 A66-32791
- Theoretical determination of elastic constants, Youngs moduli and Poisson ratios of filament-wound cylinders, using strain measurements in longitudinal uniaxial loading and internal pressure 19 p3472 A66-35355
- Temperature dependence of crystalline ammonia elastic moduli 19 p3441 A66-35780
- X-ray determination of elastic constant of pure nickel and alloy with aluminum 19 p3381 A66-35864
- Hardness, toughness, stress relaxation, corrosion resistance, etc, of niobium-aluminum alloy with stable elastic modulus 20 p3583 A66-37366
- Cosserat coupled stress and effects on stress concentration factor in semiinfinite solid medium with varying elastic modulus 20 p3667 A66-37466
- Ultrasonic measurement of elastic moduli of high temperature metal 21 p3823 A66-38517
- Equations for plane deformation in multimodule elasticity theory, formulating generalized Hooke law for multimodule material 21 p3826 A66-38609
- Elastic constants and thermal expansion coefficients of bodies with inhomogeneous regular structure 22 p3988 A66-39713
- Elastic constants and interatomic interaction parameters of niobium alloyed with tantalum, titanium and vanadium 22 p3936 A66-40788
- Structural efficiency of orthotropic materials for cylindrical shells under axial load, including examination of fibrous composites characteristics [AIAA PAPER 65-73] 23 p4138 A66-41107
- ELASTIC CYLINDER**
- Stresses in elliptical cross section rod subjected to elastoplastic torsion, using Legendre transforms 02 p0301 A66-12173
- Forced torsional motion of semiinfinite isotropic elastic cylinder with vibrations excited by harmonically oscillating rigid disk, using integral equation 04 p0589 A66-13829
- Stress concentration at holes to determine service life or load-carrying capacity of thick walled pressurized cylinders 06 p0966 A66-16703
- Temperature fluctuations of elastic isotropic cylinder, obtaining temperature equilibrium equations and reducing three-dimensional problems of thermoconductivity and thermoelectricity to boundary value problems 08 p1307 A66-18886
- Errors in approximation equations for dynamic bending of cylindrical rod 08 p1308 A66-18889
- Pointwise estimate for stress in uniform isotropic cylinder with zero body forces applied to Saint Venant principle 10 p1618 A66-21876
- Upper estimate of potential elastic energy of cylinder, using concept of permissible surface forces and boundary conditions 11 p1783 A66-22894
- Stresses and strains in anisotropic multilayered thick walled circular cylinder subjected to radial pressure [AIAA PAPER 65-174] 14 p2402 A66-27869
- Small oscillations produced by combined action of stationary and harmonic forces in nonlinearly elastic cylindrical shell of rectangular planform 15 p2607 A66-28769
- Frequency equations and mode displacement functions derived for plane strain free-transverse vibration of solid cylinder with elastic core bonded to thin elastic shell 16 p2823 A66-31716
- Wiener-Hopf and series solutions to BVP of indentation stresses and displacements in infinite hollow elastic cylinder for axisymmetric punch of finite length and arbitrary profile 22 p3990 A66-40139
- Two mixed boundary value problems of infinite elastic cylinder under torsion solved by dual integral equation with differentiation of boundary conditions 24 p4291 A66-42843
- ELASTIC DAMPING**
- Oscillation parameters and effects of nonlinear coupling on solid body with built-in rotating rotor 04 p0587 A66-13557
- Beam on elastic supports, determining fundamental frequency of free oscillation for one weak nonlinear boundary condition 07 p1142 A66-17260
- Harmful oscillation elimination from high rpm gyroscopic centrifuge by introducing one elastic bearing into dynamic system 08 p1307 A66-18877
- Effect of heterophase fluctuations at high and low frequencies near first order phase-transition point on elastic oscillation propagation, noting role of acoustic wave 12 p1972 A66-25020
- Boundary conditions for existence of damped solutions to plane problem in elasticity theory for half-strip with stress-free longitudinal edges 16 p2822 A66-31525
- Gyroscopic rotor vibrations excited by effect of lubrication layer in sliding bearings and stabilized with intervening elastodamping supports, taking into account moment of inertia of

- rotor 17 p3027 A66-32605
- Algorithm for rapid damping of multidimensional system 20 p3670 A66-37675
- First passage problems for lightly damped linear oscillator excited by white noise, discussing time probability distribution, densities, application of computers to obtain numerical solutions, etc 24 p4284 A66-42140
- LASTIC DEFORMATION**
- Dynamics of plate deformed symmetrically with respect to central plane treated by Lure method 01 p0157 A66-10984
- Variational theorem that is equivalent to elastic field equations for incompressible and nearly incompressible materials 02 p0297 A66-11541
- Toroidal shell stresses and displacements under internal pressure in transition range found by bending and membrane theories [AIAA PAPER 65-145] 02 p0297 A66-11542
- Equations for rotational motion of satellite and rods with end loads as stabilizer, considering rods elastic deformation caused by load bending 02 p0295 A66-11651
- Static problem of elasticity for random loads 03 p0434 A66-12529
- Finite plane stretching of neo-Hookean strip bonded at ends treated by principle of stationary potential 03 p0435 A66-12669
- Three-parameter family of nonhomogeneous deformations with strain invariants supported by surface tractions in isotropic incompressible elastic material 03 p0439 A66-13098
- Elastoplastic stressed state of plates with holes assuming Iliushin theory of deformation 04 p0587 A66-13489
- Stress concentration in semiinfinite regions occupied by elastic bodies with concentrated loads acting at region boundaries 04 p0587 A66-13563
- Semizero-moment shell with one edge braced by elastic support with small rigidity for deformation out of plane, noting magnitude of critical stress 04 p0588 A66-13566
- Maximum stress on flat plate stress corrosion strip with ends rotated 90 degrees, using nonlinear bending theory [ASME PAPER 64-WA/AV-3] 04 p0589 A66-14025
- Large axisymmetric nonlinear elastic or plastic deformations of zero-moment circular conical shells 04 p0590 A66-14160
- Small lateral deformation of shallow shells of revolution of radially varying thickness 04 p0590 A66-14165
- Linear deformation of elastic solid in which potential energy-density is function of strain and first and second gradients 04 p0591 A66-14166
- Static elastic deformation and associated change of aerodynamic characteristics of flight vehicle subject to aerodynamic and inertia loading 05 p0609 A66-15784
- Notched structure load analysis, discussing planar stress distribution in flat bar for various points of application of force 06 p0964 A66-16478
- Thermal fatigue of constrained bars made of linearly hardened material evaluated, using mathematical analysis 06 p0967 A66-16969
- Neutral-stability elastic equilibrium problems analyzed by theory of finite deformations, taking geometric and physical nonlinear deformation effects into account 06 p0967 A66-17008
- Boundary conditions producing simple waves in Green-elastic and Cauchy-elastic materials that generate three-dimensional unsteady deformations 06 p0874 A66-17010
- Tetrahedron elements with linearly varying strain for matrix displacement method, interpreting stresses at nodal points 07 p1143 A66-17493
- Karman equation for bending of flexible plate solved by Kantorovich method, taking into account geometrical nonlinear deformations 07 p1143 A66-17860
- Carrier formation due to passage of current through elastically deformed Ge, detecting nonlinearity of volt-ampere characteristics 07 p1106 A66-18381
- Polymeric material deformation under harmonically varying load action, noting steady state regime temperature distribution effects 08 p1243 A66-18879
- Deformation components of photoelastic coatings of shells affected by errors due to rotation of direction of principal deformations 08 p1307 A66-18883
- Singular solutions of concentrated force and concentrated heat source thermoelectricity 09 p1467 A66-20498
- Deformation modulus of airfield pavement materials 09 p1365 A66-20697
- Strict complementary energy theorem for finite deformation of elastic continuum established, using Lagrange strain and stress tensors as conjugate deformation and stress tensors characterizing deformation 10 p1615 A66-21478
- Rotation effect on statically rotating string-mass system determined by Eulerian formulation and prediction of critical speeds 10 p1556 A66-21495
- Wave propagation in quartz to determine third order elastic coefficients 10 p1577 A66-21557
- Ring on three-dimensional elastic foundation containing all six degrees of elastic restraint 10 p1618 A66-21956
- Transformation of sandwich plate equations and deformation of rectangular simply supported sandwich plate 10 p1618 A66-22177
- Boundary value problem for stress concentration at spherical cavity in field of isotropic tension for deformable microstructure 11 p1781 A66-22615
- Changes in microhardness, elastic modulus and shear orientation at boundary between elastic and plastic deformation in steel under tensile stress 11 p1719 A66-23387
- Minimum strain energy characterizations of Saint Venant solution to relaxed Saint Venant problem 12 p1956 A66-23561
- Dynamic strains and transient deformations on opaque body surfaces measured, using bonded birefringent strip 12 p1961 A66-23988
- Stress-strain state of shells of revolution of variable thickness and elastic parameters under effect of external loads and secondary strains obtaining strain, equilibrium and elasticity equations 12 p1963 A66-24043
- Finite deformations of rotating disk of variable thickness, consisting of elastoplastic strain-hardening material, determined from stress-strain diagram 12 p1964 A66-24051
- Nonsymmetric elasticity problem considering stress states, plane deformation and stress concentrated around circular hole 12 p1969 A66-24354
- Mechanical deformation used in fabrication of composite made of continuous columbium wires in copper matrix by drawing, noting optical inspection 12 p1895 A66-24378
- Nonlinear theory for elastic surface deformation, assuming existence of strain-energy function governed mechanically by virtual work 12 p1970 A66-24564
- Elastic problem of infinite plane in stressed state, weakened by two circular holes, solved in system of bipolar coordinates for forces applied at hole edges 12 p1970 A66-24783
- Exact mathematical solution for elastic dielectrics in controllable states, noting Rivlin and Toupin theory, cuboid deformation into rectangular block, electric field effect, etc 12 p1933 A66-24961
- Plane stress problems when yielding occurs locally, analyzing deformation using matrix notation, deriving expressions applicable with stress-strain relations 12 p1972 A66-25008
- Fracture and mechanical failure of polymeric solids at high strain rates 13 p2198 A66-26120
- Soviet monograph on elastic and plastic deformation mechanism, describing stress-strain state of materials, cyclic, variable and reversed load effects, etc 13 p2206 A66-26464
- Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 14 p2359 A66-27184
- Small motion superposed on stationary slow deformation process of viscoelastic material with fading memory, based on Rivlin and Ericksen differential equation 14 p2397 A66-27384
- Heated cylindrical shell with braces subjected to given compression and internal pressure, having elastic beams along edges, analyzing local deformations effect on shell strength and stability 14 p2400 A66-27684
- Stress and deformation in cross section of beam during complex loading, using steepest-descent method 14 p2400 A66-27685
- General constitutive relations for incremental deformation of metal crystals by multislip 14 p2401 A66-27784
- Derivation of approximate two-dimensional equations for thin elastic plates without resorting to Kirchhoff-type hypothesis 14 p2408 A66-28061
- Torsion of elastic cone as mixed boundary value problem, using Mellin transforms and Wiener-Hopf technique 14 p2408 A66-28395
- Elasticity of structural nonhomogeneous centro-asymmetric isotropic bodies, deriving constitutive equations and differential equations of equilibrium 14 p2409 A66-28457
- Distortion in crystals and lattices described by aeotropic model 14 p2409 A66-28467
- Stresses and coupled-stresses generated by dislocation in isotropic media treated in terms of boundary value problem for Cosserat medium 14 p2409 A66-28468
- Stress concentration near circular cavity in nonlinearly deformable material 15 p2608 A66-28780
- Boundary between applicability ranges of network and steepest descent methods in equation integration of Timoshenko theory in analysis of plate deformation 15 p2608 A66-28962
- Plate under plane stress solved in terms of stiffness properties of finite sized model element 15 p2614 A66-29611
- Second-order effects in dissipative solids and their accumulation in causing rapid acceleration of tensile metal creeps 16 p2814 A66-30529
- Nonmetric connections in quasi-static plastic-elastic deformation of crystalline solid with continuous distribution of dislocations and extra-matter 16 p2746 A66-30532
- High temperature compressive deformation equipment for ceramic materials noting loading, alignment and stress-strain measurement 16 p2682 A66-30950
- Dependence of magnetostriction coefficient for diamagnetic materials on change of Fermi surface with momentum and deformation parameter 16 p2777 A66-31035
- Asymptotic integration of three-dimensional equations of linear elasticity to analyze small deformations of plate which is initially stressed 16 p2818 A66-31106
- Thermoelastic problem for plate with prismatic inclusion of rectangular cross section discussing stress, elastic deformation, displacement potential, etc 16 p2818 A66-31108
- Elastic strain distribution in structure of quasi-isotropic polycrystalline titanium 16 p2728 A66-31787
- Linear stress-strain relation for expressing tensile stress for nonlinear large elastic deformations 17 p3018 A66-31879
- Finite rotational and inflectional deformation of incompressible homogeneous isotropic torus 17 p3018 A66-31928
- Mechanical properties of Ag, Al, Ge, Cu, Ni and Fe thin films, showing elastic deformation and strength greater in thinner films 17 p2939 A66-31971
- Elastic large-deflections of annular membrane treated by modified Foppl-von Karman equation 17 p3024 A66-32359
- Stress-strain state of annular plate made of incompressible nonlinear elastic material, noting power function describing relation between maximum tangential stress and displacement 17 p3026 A66-32596
- Structural-energetic theory of metal failure during deformation at raised temperatures 17 p3027 A66-32665
- Variational and reciprocity theorems on thermoelastic distortions in homogeneous isotropic body 17 p3032 A66-33331
- Elastic deformation of biaxially loaded columns of thin-wall open cross section with initial imperfections 17 p3032 A66-33435
- Quasi-linear hyperbolic equations governing one-dimensional longitudinal wave propagation in viscoelastic material 17 p3032 A66-33502
- Temperature range of nonlinear rigid,

elastic and viscoelastic behavior in quasi-isotropic polymeric materials and derivation of stress-strain-time relations by method of small parameters 18 p3251 A66-33701

Equations of motion for inelastic large deformations of circular membranes subjected to blast loading, useful in metal forming 18 p3252 A66-33763

Deformation and strength properties of refractory solids at temperatures up to 2000 degrees C, using indentation hardness measurements for stress-strain measurements in strength properties 18 p3254 A66-33967

Nonlinearity of relationship between stress and deformation in solids subjected to simple nonisotropic loads 18 p3258 A66-34723

Differential equations for deformations of nonuniform flat plates bent into cones 19 p3473 A66-35850

Nonlinear theory for deformation of elastic directed surface, assuming existence of strain energy function and postulating virtual work governing mechanical behavior 19 p3474 A66-36167

Constitutive equations for elastic solids sustaining deformation for which displacement gradients are small but where nonlinearity is permitted, formulating plane elastostatic problem 19 p3475 A66-36429

Elastic deformation of unbounded transversely isotropic body with internal plane-circular slot under slot surface load 19 p3476 A66-36839

Stability of cylindrical shell of average length with elastic filler under uniform external radial pressure 20 p3665 A66-36911

Spherical shell stability under external pressure for nonlinear elastic and plastic deformation 20 p3668 A66-37528

Elastic-plastic axisymmetric bending of circular cylindrical shell with constant and variable thickness 20 p3670 A66-37671

Nonisothermal deformation of viscoelastic medium analyzed on basis of thermodynamically irreversible processes 20 p3671 A66-38112

Stress and strain fields caused by straight-line dislocation located in anisotropic elastic plate 20 p3671 A66-38113

Large deflection of elastically and geometrically nonlinear circular membrane clamped along rim under uniform pressure solved by power series expressions for discontinuity and equilibrium equations 20 p3673 A66-38270

Stress analysis of elastic cylindrical shell perforated by rectangular cut-out and governed by Donnell equation 20 p3673 A66-38272

Equations for plane deformation in multimodule elasticity theory, formulating generalized Hooke law for multimodule material 21 p3826 A66-38609

Prandtl-Reuss flow law for stresses rather than stress deviators of ideally elastic-plastic bodies 21 p3829 A66-38818

Equilibrium phases of elastic materials occurring at uniform temperature and pressure and at zero deviatoric stress, examining rapid quenching and shearing effects 21 p3829 A66-38940

Stress concentration in elastically deformable bodies under effect of concentrated forces applied to boundaries, with solution of problem for two stress-concentration zones 21 p3829 A66-38975

Elasticity and thermal stress in infinite orthotropic plate exposed to distributed and concentrated heat source 21 p3830 A66-38985

Axisymmetrical deformation of multilayer circular sandwich cylindrical shells, deriving governing differential equations by variational theorem 21 p3831 A66-39272

Poynting effect theoretically analyzed, postulating tensor expression for final Green measure in general coordinates for cylindrical coordinates 22 p3988 A66-39672

Boundary value problem for isothermal unidirectional deformation of hyperelastic material applied to inflation of thick walled sphere 22 p3988 A66-39673

Elastoresistance effects in evaporated bismuth films, deposited on glass and epoxy resin substrates, used as strain gauges and transducers 22 p3962 A66-40046

Uniform magnetic field effect on plane acceleration wave propagation and growth in

homogeneously deformed perfectly electroconductive elastic material 22 p3955 A66-40135

Growth of plane acceleration discontinuities propagating into homogeneously deformed hyperelastic dielectric material in presence of magnetic field 22 p3948 A66-40136

Hamilton principle, motion equations, natural boundary conditions and constitutive relations for finite deformation of one-dimensional curved elastica and radial motion and stability of circular ring 22 p3990 A66-40138

Large amplitude oscillations of cylindrical and prismatic bodies resulting from generalized shear deformation in longitudinal direction 22 p3990 A66-40141

Method for compensating resistance of strain gauges for thermal expansion 22 p3918 A66-40155

Irreversible thermodynamics of large viscoelastic deformations, showing hidden coordinates as scalar functionals and applicability to quasi-equilibrium states 22 p3999 A66-40456

Elastic deformations in finite plane strain for which stresses are functions of polar angle as in wedge subjected to constant normal and tangential tractions on faces 22 p3996 A66-40702

Dynamic aeroelastic motion resulting from inertial and aerodynamic effects, coupled through elastic deformation, applied to jet aircraft, considering flutter, buffet, wakes and turbulence 23 p4015 A66-41035

Deformations of isotropic perfectly elastic material associated with simple shear, examining flow and collapse reactions 23 p4141 A66-41944

Laminated structure with dominant displacement from reference point for solid medium working beyond elastic limit 23 p4144 A66-41969

Generalized strain and transition concepts for elastic-plastic deformation creep and relaxation 23 p4144 A66-41973

Displacement matrix analysis of three-dimensional anisotropic and inhomogeneous elastically deformable bodies represented as tetrahedral assemblies 23 p4146 A66-41989

Elastic microstrain of polycrystalline titanium measuring device, discussing measurement error 24 p4227 A66-42222

Elastic anisotropic deformation of thin polycrystalline condensed films of Al, Ag and Ni 24 p4257 A66-42732

**ELASTIC MEDIUM**

Distribution of thermal stress in infinite elastic solid containing penny-shaped crack 01 p0157 A66-10960

Matched asymptotic expansion to derive dynamical displacements of infinite elastic space embedded with light rigid axisymmetric body 02 p0299 A66-11806

Stress distribution in elastic space reinforced by cylindrical rods 04 p0590 A66-14159

Couple-stresses in dislocated solids and effect in classical elasticity 04 p0594 A66-14292

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26] 05 p0778 A66-15447

Poisson ratio for viscoelastic materials undergoing large strains measured, using compression test [ASME PAPER 65-WA/RP-8] 05 p0706 A66-15629

Elastic-plastic material, calculating stress concentration and deformation for planes weakened by circular holes 06 p0964 A66-16476

Flow induced structural vibrations, noting interdependence between deformation and fluid dynamic loading 06 p0872 A66-16615

Boundary conditions producing simple waves in Green-elastic and Cauchy-elastic materials that generate three-dimensional unsteady deformations 06 p0874 A66-17010

Constitutive equations for characteristic effects due to elastic behavior of continuum body expressed by stress and strain field 07 p1145 A66-18225

Thermal stress in infinite nonisotropic elastic slab with heated element on upper surface and base of slab in contact with insulating plane 07 p1145 A66-18227

Mechanical constitutive theory and methods of stress analysis for physically nonlinear solid propellants [AIAA PAPER 66-124] 07 p1110 A66-18460

Discontinuity surface propagation in linearly thermoelastic solid 08 p1311 A66-19227

Breaking stresses in two connected elastic half-spaces determined with aid of Griffith-Sneddon criterion 12 p1968 A66-24349

Stressed state of isotropic elastic medium with two circular holes solved, using approximation method for concentrated loads 13 p2202 A66-26417

Dynamic stresses in infinite elastic space with circular cylindrical cavity 13 p2203 A66-26428

Bending moment of thin nonlinearly elastic plates, noting dependence of coefficient of moment concentration on external load and material properties 13 p2203 A66-26429

Thermal field effect on stress-strain state of infinite elastic plane with circular hole examined, using Muskhelishvili principle 13 p2204 A66-26435

Stress concentration at thermally insulated holes in elastic material created by disturbance of uniform heat flow at holes 13 p2206 A66-26459

Stresses in composite spheroids of two different isotropic elastic materials under compressive forces acting along common axis of revolution 14 p2397 A66-27391

Fundamental equations for birefringence of isotropic elastic solids and isotropic viscous fluid derived from Toupin theory of photoelasticity and stress optics 14 p2408 A66-28388

Mass forces for infinite elastic space expressed by generalized functions 15 p2615 A66-29852

Stress-strain distribution near curvilinear holes in moment theory of elasticity of isotropic medium 16 p2819 A66-31143

Propagation of cylindrical shear waves in nonhomogeneous elastic bodies treated by method of characteristics [AIAA PAPER 66-444] 17 p3027 A66-32757

Plane and spherical wave propagation in locking-type of materials with viscous-type of stress-strain relationship 17 p3031 A66-33077

Three-dimensional linear elasticity problems in homogeneous transversely isotropic elastic materials like infinite circular cylinder, using potential function method [ASME PAPER 65-WA/APM-26] 18 p3248 A66-33582

Nonlinear material with memory defined by constitutive functional, examining fading memory theory 19 p3438 A66-35484

Continuous plane with circular inclusion with different elastic properties, giving solution in form of boundary equation in random variable 20 p3668 A66-37530

Complex load action on elastic-plastic structures in light of limit analysis, discussing safety criterion 21 p3826 A66-38591

Stress and displacement field of plane heat source moving at constant speed through elastic medium 21 p3837 A66-39447

Constitutive equations for nonlinear elastic solid-linear viscous fluid mixture and for mixture of two nonlinear elastic solids 22 p3998 A66-40140

Flat elliptical crack in infinite elastic medium under shear stress at infinity 22 p3995 A66-40457

Status of aircraft structural design analysis methods, examining structural elastic behavior on basis of stress analysis 23 p4138 A66-41381

Approximate solution of forced oscillation PDEs of rectangular orthotropic plate on elastic base with two characteristics 23 p4139 A66-41557

Minimum and variational principles in study of stress locking functions and stress-strain law of elastic perfectly locking materials 23 p4146 A66-41990

Wave propagation in thermoplastic media, discussing dynamic behavior, formation of

wave fronts, velocity, etc 24 p4284 A66-42139  
 Series solution to problem of spherically isotropic elastic medium bounded by concentric spherical surfaces, noting force and stress concentration 24 p4285 A66-42141  
 Circular elastic inclusion bonded to different elastic material except over arc crack, oscillation phenomena in solution indicates linear elasticity can not be used to predict stresses in this region 24 p4286 A66-42153  
 Elastic and plastic behavior of ideal materials with mechanical and thermal properties of ductile structural metals 24 p4288 A66-42275  
 Huygen principle for elastic media, comparing Kupradze formulation with formulations of Knopoff and Bollet 24 p4237 A66-42495

**ELASTIC PLATE**  
 Bending problem of circular orthotropic plate on elastic base under axisymmetric load 01 p0153 A66-10467  
 Bending of elastic rectangular plates uniformly transverse loaded along axes of symmetry 01 p0154 A66-10468  
 Intermediate stages of wave-type bending process in elastic plate investigated by system of approximate methods 01 p0157 A66-10983  
 Fundamental solutions of static and dynamic linear inextensional theories of thin elastic plates [ASME PAPER 65-WA/APM-23] 05 p0778 A66-15445  
 Influence of edge displacements on vertical deflection of semiinfinite isotropic elastic plate 06 p0966 A66-16502  
 Elasto-creeping circular membrane, obtaining nonlinear solution for axisymmetric circular elastic creep problem 07 p1142 A66-17263  
 Stress distribution due to nucleus of thermoelastic strain placed at center of elliptic insert in infinite plate of different elastic material 07 p1145 A66-18244  
 Stress-strain state of elastic space, examining circular crack for axial tensile load effects 08 p1305 A66-18597  
 Two-dimensional problem of disturbance propagation in elastic plate under concentrated load moving along boundaries at constant speed, pressure and stress-strain pattern 08 p1305 A66-18598  
 Stressed state of unbounded nonlinear isotropic plate with square hole during triaxial uniform tension 08 p1307 A66-18880  
 Small parameter method determination of pure bending and torsion of thin plate with circular hole, where material of plate obeys nonlinear elasticity law 08 p1312 A66-19435  
 Classical theory of flexural motions of elastic plates used to determine natural frequencies of uniform annular plates for nine combinations of boundary conditions 10 p1616 A66-21490  
 Natural frequencies and mode patterns for clamped and simply supported square plates of linearly variable thickness solved by finite-difference approximation, using pulsed-air vibrator 11 p1780 A66-22329  
 Exact solution of wave field of point vibrator operator on free plate in form of elastic strip, comparing theory and measurement 11 p1780 A66-22605  
 Fundamental solutions of static and dynamic linear inextensional theories of thin elastic plates [ASME PAPER 65-WA/APM-23] 12 p1960 A66-23971  
 Effect of rivet-attached stringer on stress concentrations in thin elastic sheet with circular cut-out, expressing results as correction factor 12 p1962 A66-23993  
 Inverse problem of stressed state of elastic plate reinforced by members of known rigidity under axisymmetric load 12 p1967 A66-24107  
 Plate loaded over ring-shaped zone, determining bending moment, torque and shearing force 12 p1967 A66-24111  
 Deflections, moments and shears of circular ring plate under transverse load, comparing classical and improved theory of deformation 13 p2195 A66-25180  
 Book on stress-strain analysis including photoelastic investigations of bending impact on cantilever beam 13 p2198 A66-26298

Elastic rectangular plate moment influence field calculated, using photoelastic method 13 p2198 A66-26299  
 Eigenvalue density in vibration of elastic plates and shells, noting concentration points for natural frequencies and influence of rotational inertia and shear strain 14 p2398 A66-27455  
 Stress distribution of isotropic plate with infinite row of circular holes with elastic cores or elastic ring reinforcement 15 p2612 A66-29428  
 Stability of elastic thin plate subjected to self-equilibrating stresses acting in its plane with random intensity and distribution 17 p3018 A66-31835  
 Complex variable method to solve problem of circular elastic plate elastically restrained at edge and subjected to arbitrary concentrated force 17 p3020 A66-32000  
 Mean-square response of thin elastic plate to random pressure acting normal to plate surface 17 p3021 A66-32010  
 Rotatory inertia and transverse shear effects on quasi-stationary response of elastic strip plates to uniformly moving harmonic line loads 17 p3027 A66-32663  
 Surface shear traction and torsional compliance of elastic plate pressed between identical elastic spheres 18 p3249 A66-33586  
 Forced vibrations of flexible rectangular panel backed by closed rectangular cavity under external acoustic pressure, noting sound transmission into cavity 18 p3250 A66-33674  
 Natural nonlinear oscillations of plate studied by Kirchevskii extension of work-reciprocity theorem to problems in nonlinear mechanics 18 p3252 A66-33713  
 Elementary effects method solution of fourth-order PDEs for bending and vibration of elastic plates 20 p3671 A66-37989  
 Stress and strain fields caused by straight-line dislocation located in anisotropic elastic plate 20 p3671 A66-38113  
 Successive approximation method for solving fundamental equations of nonlinear flexural vibration for rectangular elastic plate, noting effect of temperature and large amplitude 20 p3672 A66-38236  
 Stress tensor analysis of elastic plates in reference state, noting nonlinear plate theory and variational principle 20 p3673 A66-38273  
 Two-dimensional nonlinear equations of finite thermal oscillations of anisotropic thin elastic plates 20 p3673 A66-38278  
 Stress distribution in elastically nonhomogeneous rotating thin circular disk of varying thickness of anisotropic material 21 p3745 A66-39597  
 Time-dependent stress distribution in annular hereditary-elastic cylindrical-anisotropic plate 22 p3989 A66-39822  
 Instability of rectangular solid in plane strain subjected axially to constant pressure and laterally to constant hydrostatic pressure 24 p4286 A66-42150  
 Mathematical demonstration that deflection of sandwich plate can be obtained from Reissner theory of plates if deflection function is known 24 p4286 A66-42159

**ELASTIC PROPERTY**

Relation between high pressures and elastic properties of materials present in interior of Sun during process of condensation 01 p0135 A66-10297  
 Polycrystalline niobium elastic properties and effects of alloying with chromium and iron 03 p0383 A66-13128  
 Elastic properties of bearing elements of gyrotachometer and effect on frequency of oscillations 07 p1031 A66-17409  
 Elastic interaction energy of two infinitesimal dislocation loops in transversely isotropic medium estimated from fundamental elasticity tensor 07 p1144 A66-18044  
 Martensitic transformation in titanium alloys containing eutectoid-forming elements, noting elastic properties, shear modulus, etc 08 p1239 A66-18906  
 Stress-strain law and finite torsion of homogeneous circular cylinder, noting deformation and force needed to keep final state of body in equilibrium 17 p3025 A66-32499  
 Elastic and plastic properties of fiber-

reinforced and continuous skeleton tungsten-copper composite materials 17 p2941 A66-33425  
 O-O and O-N clusters in niobium detected via internal friction and elastic aftereffect measurements, noting equilibrium, kinetic properties, binding enthalpy, etc 18 p3121 A66-33728  
 Natural vibration frequencies of rocket nozzles, accounting for anisotropic elastic behavior, internal gas dynamic pressure, boundary conditions, etc 18 p3258 A66-34601  
 Oscillation of oscillator with elastically hereditary and weakly nonlinear characteristics, applying operational method to analysis in terms of hereditary creep theory 19 p3476 A66-36840  
 Approximation of elastic constants of unidirectional fiber reinforced composite material from constituent material properties, including longitudinal modulus, transverse modulus and Poisson ratio 22 p3993 A66-40342  
 Residual stress determination in elastic cylindrical orthotropic materials, using stress-strain relations and Sachs equations 22 p3994 A66-40434  
 Material strength determination based on elastoplastic and rigid-plastic theory of solid bodies 23 p4137 A66-41006

**ELASTIC SCATTERING**

**SA INELASTIC SCATTERING**

Thermal diffuse elastic electron scattering in polycrystalline Al foil, using retarding field apparatus 05 p0736 A66-14980  
 Elastic differential scattering of helium ions discussing energy analysis, geometry and target particle motion effects, and interference phenomena 05 p0719 A66-15767  
 Elastic differential scattering in low energy helium ion collisions, discussing quantal and secondary interference and two-state theory 05 p0719 A66-15768  
 Perturbation effects in differential elastic ion-atom scattering generated by crossing of molecular states from even potentials 11 p1740 A66-22972  
 Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 ev 12 p1917 A66-24222  
 Energy dependence of elastic resonance scattering of low energy electrons from He, Ne, Ar and nitrogen gases at angles ranging from 8 to 110 degrees 14 p2337 A66-27797  
 Ion beam elastic scattering cross section for proton-helium systems 14 p2337 A66-27978  
 High energy measurement of neutron-proton elastic scattering, noting diffraction peak existence, differential cross section and secondary forward peak 18 p3166 A66-34163  
 Angular distributions of elastic and inelastic alpha-particle scattering in even tin isotopes, using 40 mev alpha beam 18 p3138 A66-34166  
 Quantum effects in elastic scattering of atoms and molecules, noting classical treatment 18 p3138 A66-34458  
 Intermolecular reaction between oxygen and nitrogen at energies from 0.1 to 1.5 ev 22 p3951 A66-40584  
 Scattering of plane elastic compressional pulse by circular cylindrical cavity in infinite homogeneous isotropic linear elastic solid 23 p4145 A66-41984

**ELASTIC SHEET**

Dynamic problems of transversely isotropic half-space and elastic layer, solving contact and boundary value problems 08 p1315 A66-19708  
 Stress concentration factor for infinite plate in tension containing doubly symmetrical hole with three intersecting circles forming boundary 17 p3023 A66-32081  
 Thermoelastic stresses in elastic strips and cylinders, computing numerical value along axes and centers of elements 21 p3826 A66-38590  
 Rivet attached stringer effect on stress concentration in thin elastic sheet with crack solved, using computer calculations 24 p4285 A66-42143

**ELASTIC SHELL**

Nonlinear field equations of elastic shell in terms of reference state subjected to strain displacement 01 p0153 A66-10444  
 Free oscillations of elastic shells of

revolution 01 p0154 A66-10469  
Timoshenko-type nonlinear theory of elastic shells based on generalized Hamiltonian variational principle 01 p0157 A66-10982  
Linear elastic analysis of shells of revolution by matrix displacement method [AIAA PAPER 65-142] 03 p0437 A66-12799  
Free vibration and transient elastic response of thin shells within scope of linear theory 04 p0586 A66-13405  
Asymptotic integration of thin elastic shell equations for design of shells of revolution subject to effect of cyclic edge loads 04 p0590 A66-14149  
Deformation of circular membrane containing central rigid disk under axisymmetrically distributed load 04 p0590 A66-14150  
Linearized version for isotropic elastic plates and shells by series expansion method obtained as Euler equations 04 p0591 A66-14201  
Shell linear theory, discussing classical elasticity theory, bending equations, edge effect and asymptotic theory 06 p0962 A66-16350  
Infinitely-long thin elastic circular cylindrical shells loaded along segment of generatrix by arbitrarily distributed loads 07 p1143 A66-17627  
Extension of paper on boundary layer equations, obtaining boundary conditions on major terms of interior stresses for thin elastic shells 08 p1306 A66-18618  
Axisymmetric wave motion in thin walled elastic spherical shell under normal load uniformly distributed over small segment 08 p1315 A66-19763  
Three-dimensional linear elasticity and viscoelasticity theory to obtain axisymmetric plane-strain thickness-stretch modal response of isotropic and orthotropic thick shells 09 p1468 A66-20948  
Generalized analysis of rotationally symmetric thin elastic shells applied to cases where shell wall consists of any number of layers of isotropic or orthotropic material 10 p1617 A66-21496  
Stability analysis of freely supported thin elastic conical three-layer shell situated in potential supersonic flow 11 p1780 A66-22349  
Effect of water immersion on reduction of die stresses in explosive forming, investigating dynamic response of thin elastic spherical shell surrounded by large body of fluid, employing diagrams [ASME PAPER 65-PROD-6] 11 p1709 A66-22474  
Comparison of elasticity and shell theory solutions for infinite circular cylindrical shell subjected to periodically spaced band loads [AIAA PAPER 65-139] 12 p1956 A66-23582  
Stress-strain state of shells of revolution of variable thickness and elastic parameters under effect of external loads and secondary strains obtaining strain, equilibrium and elasticity equations 12 p1963 A66-24043  
Integrals of equations of small axisymmetrical oscillations of thin elastic shell of revolution 12 p1966 A66-24061  
Nonlinear theory of thin elastic shells, discussing surface geometry and deformation, equations of equilibrium and boundary conditions. and stress functions 13 p2196 A66-25600  
Free oscillation of thin elastic shell, using asymptotic method for integrating dynamic equations in classical linear theory 13 p2196 A66-25630  
Eigenvalue density in vibration of elastic plates and shells, noting concentration points for natural frequencies and influence of rotational inertia and shear strain 14 p2398 A66-27455  
Torsional oscillations of hollow cylinder of finite length encased in thin elastic shell 14 p2406 A66-27999  
Asymptotic solutions of boundary value problems for elastic semiinfinite circular cylindrical shells by removing restriction of slow circumferential variation 15 p2609 A66-29239  
Stress distribution in shallow logarithmic shell of revolution 15 p2609 A66-29240  
Differential equations describing elastic

shells of revolution under physical nonlinearities, noting positive stresses in buckling zone 15 p2611 A66-29422  
Computer program for axisymmetric nonlinear behavior of stiffened elastic shells of revolution with variable thickness, calculating collapse pressures [AIAA PAPER 66-529] 16 p2814 A66-30527  
Stresses and displacements in linearly elastic and toroidal shells of circular cross section determined by nonlinear numerical method [AIAA PAPER 65-144] 16 p2816 A66-30905  
Influence of relative thickness of elastic case on acoustic stability of radial modes in solid propellant rockets 16 p2791 A66-31474  
Basic theory derived for nonsymmetric elastic three-layer sandwich shells of variable rigidity 17 p3026 A66-32600  
Elastic model for evaluating stresses in Earth induced by density variations or topographic irregularities 17 p2921 A66-33226  
Stress component expressions derived for axisymmetric elastic shell problem in terms of stress resultants, moments and geometry 18 p3250 A66-33605  
Stress analysis of junction of thin elastic shells of revolution, considering axisymmetric wind and sinusoidal load distributions 18 p3253 A66-33804  
Forced motions of hollow cylinder encased in thin elastic shell and subjected to time-harmonic pressure at inner surface of cylinder 18 p3259 A66-35026  
Stiffness method for analysis of elastic-plastic shells of revolution with axisymmetric loading implemented by step-by-step method of integration in computer program 20 p3667 A66-37482  
Spherical shell stability under external pressure for nonlinear elastic and plastic deformation 20 p3668 A66-37528  
Plane contact problem for ring reinforcing junction of cylindrical and spherical shell, determining forces and displacement in ring 20 p3669 A66-37667  
Liquid instability of vibrating partially filled elastic tank, emphasizing resonant breathing mode and frequency response 20 p3672 A66-38153  
Shell theory, discussing relationship between stress function tensors and shell stress function 20 p3673 A66-38275  
Influence coefficients for semiinfinite and infinite circular cylindrical elastic shell subject to self-equilibrating edge loads 22 p3995 A66-40451  
Elastic shell theory, deriving two-dimensional theory from three-dimensional theory, noting boundary condition contraction, stress-strain relations, etc 23 p4141 A66-41936  
Membrane theory of convex shells and approaches to construction of general moment theory of elastic shells 23 p4141 A66-41938  
Differential equations of linear theory of elastic shells derived under Kirchhoff-Love hypothesis with aid of static-geometric analog 23 p4142 A66-41956  
Large deflection postbuckling analysis of thin walled oval cylinders under axial compression 23 p4143 A66-41961  
Linear thermoelastic theory of general thin shells, adopting Love-Kirchhoff assumptions and considering analogy between thermal field and fictitious body force vector 23 p4143 A66-41966

## ELASTIC STABILITY

Matrix analysis of response of geometrically nonlinear structures to prescribed dynamic loading and effects of thermomechanical midplane preload in prediction of natural frequencies and mode shapes 01 p0148 A66-10135  
Stability theory for elastomechanical systems using algebraic techniques based upon Galerkin method 01 p0153 A66-10446  
Flexible-wall tubes flattened by fluid when velocity reaches critical value, with differential equations describing effect of stability loss 01 p0158 A66-11035  
Discrete critical points of perfect structural system and three branching points in general theory of elastic stability 03 p0434 A66-12370  
Elastic equilibrium of rectangular prism with given stress-vector components at

lateral surfaces and displacements at faces 03 p0435 A66-12635  
Equilibrium stability of rod beyond elastic limit 04 p0590 A66-14161  
Increasing plastic buckling resistance of thin cylindrical /Mg and Al/ shell by means of elastic core /polyurethane foam/ [ASME PAPER 65-APMW-18] 04 p0592 A66-14219  
Elastic stability of clamped shallow spherical shells under concentrated load, noting buckling modes [ASME PAPER 65-APMW-28] 04 p0593 A66-14228  
Parametric response of elastic clamped-free column, noting agreement between theory and experiments for first three spatial and first four temporal modes 04 p0594 A66-14391  
Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 05 p0774 A66-15036  
Elastic equilibrium of rectangular parallelepiped when boundary conditions on surface are given in terms of displacements 07 p1146 A66-18253  
Elastic general instability of orthotropically stiffened cylinders under axial compression [AIAA PAPER 66-139] 08 p1308 A66-19003  
Compressive strength and instability failure mechanism in uniaxial boron fiber-metal matrix composite 08 p1240 A66-19139  
Convergence of Galerkin method in nonconservative stability problems of thin elastic plates and thin elastic rods 08 p1311 A66-19339  
Stability of Al-Mg alloy spherical shells under uniform external pressure beyond elastic limit 08 p1315 A66-19591  
Book on elastic stability of plane rigid-jointed triangulated and nontriangulated frames 09 p1467 A66-20476  
Stability in elastic and aeroelastic systems analyzed by Liapunov direct method 09 p1468 A66-20800  
Elastic general instability collapse pressure of ring-reinforced circular cylindrical shell subjected to uniform external pressure 10 p1613 A66-21318  
Increasing plastic buckling resistance of thin cylindrical /Mg and Al/ shell by means of elastic core /polyurethane foam/ [ASME PAPER 65-APMW-18] 10 p1615 A66-21475  
Saint Venant principle applied to plane strain and generalized plane stress solutions of equations of linear theory of elastic equilibrium 10 p1618 A66-21875  
Maximum-minimum theory of eigenvalues applied to stability in Navier-Stokes equation and to incompressible elastic body vibration 11 p1694 A66-23183  
Transformation relation for prestress tensor in problem of indifferent equilibrium of elastic bodies derived, using approximation method 12 p1959 A66-23865  
Circular ring loaded by constant direction forces used to illustrate kinetic instability of elastic system under random time-dependent forces 12 p1960 A66-23950  
Influence of homogeneous state of initial stress on frequency of three-dimensional vibrations of plates and rods 12 p1961 A66-23984  
Fundamental frequency of four-point-supported square elastic plate 14 p2398 A66-27436  
Buckling, postbuckling and imperfection sensitivity of cylinders and shells 14 p2404 A66-27987  
Dynamic instability in large of elastic body with given initial velocity and displacement, noting example of curved beam subjected to impulsive loads 14 p2408 A66-28387  
Series in function of complex variable applied to mixed problem of elastic equilibrium of annulus 15 p2607 A66-28697  
Two-dimensional representation of relation between stresses, displacement vector and external load for two elastic equilibrium states 15 p2608 A66-28771  
Destabilization of linear system with N degrees of freedom without damping subjected to nonconservative forces 15 p2609 A66-29251

Instability of nonlinearly viscoelastic column under finite compression, noting boundary conditions, application to buckling problem, types of stability loss, etc 15 p2615 A66-29720

Stability of two coplanar wedge-shaped cracks, showing under what conditions interaction effects are important 16 p2814 A66-30533

Variational solution of simultaneous stability equations boundary value problem for transverse displacements and stress state 16 p2819 A66-31137

Free vibration of complete and incomplete rings, considering ring centerline extensibility and rotary inertia 17 p3022 A66-32016

Complex analysis of equilibrium equations in two-dimensional theory of elasticity 17 p3025 A66-32592

Elastic stability of clamped shallow spherical shells under concentrated load, noting buckling modes [ASME PAPER 65-APMW-28] 18 p3248 A66-33575

Elastic equilibrium of infinite isotropic homogeneous plate with soldered circular isotropic ring 18 p3251 A66-33703

Variational formulation of equilibrium stability of nonlinear elastic circular cylindrical panel under radial stress 18 p3251 A66-33704

Structural stability criteria of manned rotating space stations derived from elastic model experiments [AIAA PAPER 65-406] 18 p3240 A66-33822

Cantilevered continuous pipe conveying fluid at constant velocity, showing that internal and external damping and Coriolis forces may have destabilizing effect [AIAA PAPER 66-102] 18 p3257 A66-34594

Elastic stability of thin walled circular cylindrical shells in torsion, applying Galerkin method to Donnell equations for critical stresses 18 p3258 A66-34648

Sufficient condition for stability of linearly viscoelastic continuum subjected to surface tractions following partial deformation of solid are nonconservative and associated with energy source 19 p3401 A66-36302

Static dimensional stability of nonlinear elastic continua reduced to linear shell theory 20 p3668 A66-37527

Nonconservative elastic stability problems treated by Galerkin and Ritz methods 20 p3669 A66-37541

Static and dynamic stability loss of nonconservative mechanical systems describing buckling of clamped-free rod and stability loss of cantilever beam subjected to bending 20 p3672 A66-38267

Stability of circular transversely isotropic plates under various attachment conditions along contour based on Ambartsumian plate theory 21 p3826 A66-38611

Elastic stability of cylindrical shells reinforced by one or two frames and subjected to external radial pressure, noting inertia moment about skin line and frame bending stiffness 21 p3828 A66-38703

General theory of stability of elastic equilibrium in three-dimensional system of orthogonal curvilinear coordinates 21 p3828 A66-38803

Elastic stability theory for second-order strain components in Cartesian, cylindrical, spherical and polar coordinates 21 p3828 A66-38804

Moment stress effect on elastic equilibrium of plate with circular opening 22 p3991 A66-40148

Buckling, postbuckling and imperfection sensitivity of cylinders and shells 22 p3992 A66-40337

Geometrical and statistical relations of theory of nonlinearly elastic body presented in connection with bifurcation of equilibrium of ideally elastic body 22 p3996 A66-40686

Two-dimensional elastic equilibrium problems in reinforced plates with holes and bending theory problems in reinforced thin plates 23 p4137 A66-41003

Two-dimensional purely elastic Earth model used to study elastic equilibrium configuration between density and topographic surface

irregularities 23 p4063 A66-41391

Ritz method for solving elastic stability of rectangular cantilever plate in flows moving in direction perpendicular and parallel to clamped edge of plate 23 p4139 A66-41787

Galerkin based stability theory of elastic equilibrium extended to include nonconservative loads 23 p4097 A66-41983

Equilibrium of elastic sphere with pressing rigid punches 23 p4145 A66-41987

Static elastic and thermoelastic stability, discussing kinetic theory and physical interpretation of energy methods 24 p4287 A66-42271

Stability of ideal plate under compression loading beyond elastic limit 24 p4290 A66-42437

**ELASTIC STRENGTH**

Matrix application to method of initial parameters in solution of problems of elasticity and strength of materials 04 p0588 A66-13759

Elastic torsional analysis of irregular shapes, determining direct stiffness solution, shear stress and warping function distribution for shafts 06 p0966 A66-16614

Symmetrical loading of infinite plate weakened by three circular holes 08 p1306 A66-18704

Elastic problem of infinite plane in stressed state, weakened by two circular holes, solved in system of bipolar coordinates for forces applied at hole edges 12 p1970 A66-24783

Interatomic interaction effect on adsorption-induced loss of strength in metals 14 p2315 A66-27599

Oxide-base cermets prepared by infiltration with silver and silver alloys, noting dispersion strengthening, bend creep, impact loading, etc, for gas-turbine application 16 p2730 A66-30250

Monograph on nonlinear bending theory of three layer plates, covering mathematical theory of elasticity stress-strain diagrams, Galerkin method, maximum deflection criteria, etc 16 p2819 A66-31136
